Comprehensive introductory course in pediatric dentistry. Cariology/oral prevention, oral radiology, diagnosis/treatment planning, behavior guidance, analgesia/anesthesia, restorative dentistry, pulpal therapy, nitrous oxide-oxygen inhalation, periodontal disease.

PDEN 7020. Introduction to Pediatric Hospital Dentistry. (0-2 cr.; A-F only; Every Summer)
PDEN 7030. Parenteral and Oral Moderate Sedation for Children and Young Adults in Dental Settings. (0-2 cr. ; A-F only; Every Fall) Learn to provide evidence-based, safe, effective mild/moderate sedation to children/adolescents. Patient case selection for office based sedation, pre-sedation pediatric physical examination/history taking, parenteral/enteral administration, physiology/monitoring, pharmacology, emergency planning/simulation, post-operative management.

PDEN 7040. Primer in Pediatric Medicine. (0-2 cr. ; A-F only; Every Fall) Provides foundation knowledge in pediatric patient assessment, history taking, communication with pediatric healthcare community. Arranged as 8 modules covering topics of medical home care, health history taking, physical examination, diet/nutrition, health screening, prevention of injury/disease, management of disease, hospital admission.

PDEN 7100. Advanced Clinical Pediatric Dentistry. (1-6 cr. ; max 36 cr.; S-N or Audit; Every Fall, Spring & Summer) Faculty-supervised treatment of patients, including treatment of difficult or unusual pediatric dentistry problems.

PDEN 8010. Pediatric Dentistry Diagnosis and Treatment Planning. (1 cr. ; max 5 cr.; S-N only; Every Fall, Spring & Summer) Systematic approach to diagnosis of and treatment planning for various pediatric dentistry problems. Faculty/peer review of selected patient cases managed by students. Patient care is reviewed/discussed to ensure appropriate treatment protocols and quality of care.

PDEN 8031. Independent Study in Pediatric Dentistry. (2 cr. ; S-N only; Every Fall, Spring & Summer) Independent readings from pediatric dentistry textbooks in preparation for an oral exam. May include additional clinical experiences.

PDEN 8100. Hospital Pediatric Dentistry. (1 cr. ; S-N or Audit; Every Fall, Spring & Summer) Faculty-supervised diagnosis/treatment of pediatric dentistry problems at Fairview-University Medical Center and Hennepin County Medical Center. Rotation seminars in pediatrics/anesthesia. Pre/post-operative discussion/evaluation of treatment plans.

PDEN 8110. Pediatric Dentistry Outreach Experiences. (1 cr. ; max 3 cr.; S-N or Audit; Every Fall, Spring & Summer) Faculty-supervised diagnosis and treatment of pediatric dentistry problems at Hennepin County Medical Center, the CUHCC Clinic, and other off-site locations. Participation on a rotation basis in seminars in pediatrics and anesthesia. Pre/postoperative seminar discussion and evaluation of treatment plans.

Current studies of biological bases (e.g., evolutionary adaptation, genetic, physiological substrates), behavioral expression (e.g., roles of environment, development, learning/motivation, personality, psychopathology), and social interactions (e.g., culture, criminal violence, warfare, genocide). prereq: Ped 6121/ PUBH 6121

PED 6996. Department of Pediatrics-Summer Internship in Pediatrics. EPAC Explore Students Only. (0 cr.; No Grade Associated; Every Summer) Exposure to clinical general pediatrics early in medical school. Two-week preceptorship with general pediatrician during summer hiatus between first/second year of medical school. Only available to students part of EPAC Explore group. Participating students need to be in academic good standing at the medical school.

PED 7091. Independent Study in the Neural Basis of Anger, Tantrums, and Aggression. (2 cr. ; A-F only; Periodic Fall) Neural and other biological bases for emotional expression of anger and for tantrum/aggression. prereq: consent

PED 7501. Pediatric Externship. (4 cr.; H-N only; Every Fall, Spring & Summer) Provides basic pediatric skills and knowledge necessary for each student, no matter what field of medicine they select.

PED 7512. Pediatric Acting Internship. (2-6 cr.; H-N or Audit; Every Fall, Spring & Summer) An intensive learning experience focusing on children with diseases treated by subspecialty services, generally cardiology, nephrology, or oncology. The student functions as an acting intern. prereq: 7501

PED 7531. Pediatrics-Psychology Internship. (12 cr.; max 48 cr.; No Grade Associated; Every Fall, Spring & Summer) The aim of the University of Minnesota Medical School Psychology Internship is to prepare interns to meet the mental health needs of children and to function as psychological consultants in academic health centers or other clinical contexts. Interns provide clinical assessments and care for children and their families in a broad mix of clinical settings within a teaching hospital. In addition to extensive supervised clinical experiences, interns participate in a blend of didactics, conferences, and team meetings to further their professional development. The internship year provides ample opportunities for interns to collaborate closely with faculty and develop collegial relationships with our faculty, staff, and each other. The Internship has been continuously accredited since 1965 by the American Psychological Association making it the longest APA-accredited internship in this region, and is known for its quality assessment and improvement activities. William Robiner, PhD, ABPP, is the Internship Director.

PDEN 7533. Clinical Allergy at Fairview-University Medical Center. (3-6 cr.; H-N or Audit; Every Fall, Spring & Summer) Emphasizes the practical aspects of allergic and immunologic work-ups and treatments. The particular content of the course is modified depending upon individual needs.

PED 7534. Pediatric Cardiology. (4 cr.; H-N only; Every Fall, Spring & Summer) The elective rotation in Pediatric Cardiology is open to third and fourth year medical students who are interested in pediatric cardiovascular disease. The rotation is primarily an outpatient one.

PED 7535. Pediatric Infectious Disease. (4 cr.; H-N only; Every Fall, Spring & Summer) The student works closely with the infectious disease fellow and pediatric resident on service, and contribute to the diagnosis and management of patients with suspected or proven infections. prereq: Med Student Yr 3 or 4/PED 7501 or equivalent courses/one other pediatric elective

PED 7536. Pediatric Hematology/Oncology/Bone Marrow Transplantation. (4 cr.; H-N only; Every Fall, Spring & Summer) This course provides inpatient and outpatient experience in clinical management of children, adolescents and young adults with various blood, cancer, immunologic, or other diagnoses.

PED 7537. Pediatric Endocrinology & Diabetes. (4 cr.; H-N only; Every Fall, Spring & Summer) The student works with faculty, fellows, and residents in a small group. This course is particularly suitable for students planning to pursue residency programs in Internal Medicine and in Pediatrics.

PED 7538. Pediatric Gastroenterology and Nutrition. (4 cr.; H-N only; Every Fall, Spring & Summer) The student sees GI and nutrition consults on the pediatric stations, attends clinic and observes all diagnostic and biopsy procedures pertaining to gastrointestinal patients.

PED 7539. Neonatal Medicine Internship. (4 cr.; H-N only; Every Fall, Spring & Summer) This course offers the student an opportunity to be an extern in one of the neonatal intensive care units. For assigned patients, the student will assume the responsibility of a first year resident: the student will make rounds with the house officers and attending staff on all patients, write orders and progress notes on assigned patients, and carry out necessary procedures under supervision.

PED 7540. Pediatric Neurology. (4 cr.; H-N or Audit; Every Fall, Spring & Summer) Successful completion of this rotation satisfies the Department of Neurology 7-510 requirement. Pediatric neurology patients have a variety of problems ranging from coma, muscular dystrophy, epilepsy to learning disabilities; from inborn errors of metabolism, metabolic neurologic dysfunction to behavior disorders.

PED 7541. Children’s Hospitals and Clinics of MN Pediatric ENT Elective. (2 cr.; P-N only; Every Fall, Spring & Summer) Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
This rotation would be geared towards those with strong interest in ENT or strong interest in Pediatrics with the objectives to improve ENT assessment of the pediatric patient and gain proficiency in head and neck exam. Reading about pertinent issues that the student is encountering in clinic, rounds or the operating room will be expected.

**PED 7542. Pediatric Palliative Medicine and Hospice.** (4 cr.; H-N only; Every Fall & Summer)

This course is designed to introduce students to the fields of pediatric hospice and palliative medicine. Students will primarily spend time with the Pain and Advanced/Complex Care Team (PACCT), the pain and palliative consult service at the University of Minnesota Masonic Children's Hospital (UMMCH), as well as its broader interdisciplinary team members (nurse practitioners, social workers, child life specialists, music therapists, and spiritual health providers). Students will also spend at least one day with the interdisciplinary pediatric home hospice and palliative care team members at Fairview Homecare and Hospice. Depending on availability, students may also rotate in the outpatient clinic at UMMCH. They will be expected to engage in patient care planning, including family meetings and interdisciplinary team collaborations.

**PED 7543. Pediatric Nephrology.** (2 cr.; H-N only; Every Fall, Spring & Summer)

Daily working rounds with the staff will be made, and the team will make formal rounds with the students to discuss the patients in hospital. Outpatient management of a wide variety of problems, both nephrologic and urologic, are considered in clinics.

**PED 7544. Pediatric Pulmonary Disease.** (4 cr.; H-N only; Every Fall, Spring & Summer)

This pediatric course will focus on care of pulmonary problems of patients with diverse lung diseases and will include work with the pediatric pulmonary health care team.

**PED 7545. General Pediatrics Outpatient Elective.** (4 cr.; H-N only; Every Fall, Spring & Summer)

This is a general pediatric care elective. It will allow students to work closely with an outpatient clinical practice team to provide care for patients and families seeking ongoing pediatric primary care.

**PED 7547. Children's Hospitals and Clinics of MN Pediatric Sleep Medicine Elective.** (2 cr.; P-N only; Every Fall, Spring & Summer)

Pediatric sleep disorders are common in all ages and populations. There is limited exposure during medical school and residency to sleep medicine in general and pediatric sleep medicine specifically. This rotation will explore the common pediatric sleep disorders that every pediatrician should be aware of.

**PED 7548. Clinical Genetics.** (4 cr.; H-N only; Every Fall, Spring & Summer)

This course will be valuable for students interested in any discipline and allows exposure to patients in pediatrics, medicine, and obstetrics/perinatology.

**PED 7550. Children's Hospitals and Clinics of MN Pediatric Ethics Elective.** (4 cr.; H-N only; Every Fall, Spring & Summer)

Clinical ethics is an integral part of the practice of medicine. This course is designed to introduce students to ethical practice. Taking the time to understand how the ethical principles work in day to day clinical decision making is paramount to the development of ethically astute clinicians. In order to provide students with an immersive experience in clinical ethics this elective has been created for those who seek more directive knowledge on how ethics affects patient care.

**PED 7553. Adolescent Medicine.** (4 cr.; H-N only; Every Fall, Spring & Summer)

This elective involves two adolescent interviewing workshops and one adolescent pelvic exam workshop. Special emphasis is placed on acquisition of effective clinical communication skills. Students are exposed to a variety of community-based services for youth, including general adolescent medicine clinics, programs for at-risk youth, and for youth in foster care.

**PED 7555. Neonatal Clerkship - Marshfield, WI.** (4 cr.; H-N or Audit; Every Summer)

This elective revolves primarily around medical problems related to the newborn, including neonatal infections, metabolic problems, cardiovascular problems, shock, pulmonary insufficiency, central nervous system asphyxia and hemorrhage. prereq: Med 7501, enrolled yr 4 med

**PED 7556. Pediatrics Clerkship - Marshfield, WI.** (4 cr.; H-N or Audit; Every Fall & Summer)

The student functions as a house officer on the pediatric ward and in the emergency room and has night call every third or fourth night. prereq: 7501, enrolled yr 4 med

**PED 7557. Children's Hospitals and Clinics of MN Pediatric/Adolescent Gynecology Elective.** (4 cr.; H-N only; Every Fall & Spring)

Pediatric and Adolescent Gynecology (PAG) is an important aspect of clinical education for Pediatrics training programs. Furthermore, PAG is an integral part of Pediatrics and Adolescent Medicine licensing exams. Specific PAG learning objectives, like those found in the American Board of Pediatrics must be fulfilled. Residents have indicated that they do not feel they get enough exposure to PAG topics and have expressed a desire to learn more about this population during their training.

**PED 7559. Pediatric Critical Care Medicine.** (4 cr.; H-N only; Every Fall, Spring & Summer)

The student works as a member of the resident-fellow-attending physician team in assessing and treating all medical and surgical patients on the pediatric intensive care unit.

**PED 7560. Pediatric Research.** (2-8 cr. max 16 cr.; H-N only; Every Fall, Spring & Summer)

A research experience in pediatrics can be arranged on an individual basis with various members in the Pediatrics Department. This course affords the student opportunity to work with a pediatric faculty member on a predetermined research project.

**PED 7566. Evolution of American Pediatrics.** (6 cr.; H-N or Audit)

This course explores the evolution of American Pediatrics from the post-Civil War period to the present. American Pediatrics may be divided into several distinct eras based on the forces which defined its boundaries and identity. These include societal and governmental influences, changing norms of medical practice, emerging scientific knowledge, and reforms in medical education. The course will also examine Pediatrics’ contribution to medical knowledge and the influence of pediatrics on the attitudes of government and society toward children. Team teaching format combines formal lectures, assigned readings, and student/faculty discussion.

**PED 7583. Fundamentals of Clinical Oncology.** (4 cr.; H-N or Audit; Every Fall, Spring & Summer)

This multidisciplinary course provides an introduction to the fundamentals of clinical oncology (adult and pediatric) and is designed for the medical student interested in entering any specialty. prereq: Med 7500 or 7501

**PED 7700. Primary Care Selective - Pediatrics.** (4 cr.; P-N only; Every Fall, Spring & Summer)

A 4-week ambulatory experience with a focus on both the specialty specific content areas and the process-of-care in the ambulatory setting.

**PED 7800. Advanced Selective in Pediatrics.** (4 cr.; H-N only; Every Fall, Spring & Summer)

The Advanced Selective in Pediatrics is an opportunity for students to serve patients in a community-based general inpatient setting. Advanced selective students will take on the responsibility of an acting intern on the general pediatrics inpatient teams. They will collaborate with pediatric and medicine-pediatric interns and medical students in their foundational training. They will be supervised by pediatric and medicine-pediatric senior residents and faculty attendings.

**PED 7910. Pediatric Medical Residency.** (6 cr. max 120 cr.; No Grade Associated; Every Fall, Spring & Summer)

Pediatric medical residency.

**PED 7930. Pediatric Medical Fellowship.** (6 cr. max 120 cr.; No Grade Associated; Every Fall, Spring & Summer)

Pediatric medical fellowship.

**Performance of Veterinary Serv (PVS)**

**PVS 5881. Food Production, Manufacturing/Processing, and Supply Chains.** (1 cr.; S-N only; Every Summer)

Food commodities and agricultural crops play critical roles relevant to public health, energy and economic vitality, feeding the increasing global human population, and providing multiple outputs from feed for animals to fuel for vehicles, transportation and energy. Each time the course is offered it will focus...
on a different agricultural commodity which provides critical outputs for the state of MN. Some examples include corn, sugar beets, and soy beans. Individuals working or interested in complex food systems will benefit from the knowledge, networking, and breadth of understanding about agricultural commodities, as a means to think more critically about the interconnection of food, animal feed, fiber and fuel in the economics, culture and health of our society.

PVS 5882. Food governance, Policy and Regulation. (1 cr. : S-N only; Every Spring) This course provides an overview of food governance, policy, and regulation in the United States. The roles of legislative bodies and regulatory agencies at local, state, and national levels will be reviewed in order to explore the complexity of food policy. Current issues will be analyzed.

PVS 5883. Global Food Systems: Geography, Politics and Trade. (1 cr. : S-N only; Every Spring) This course explores the global distribution of food production and consumption in order to understand the dynamics of food systems including both domestic production and trade. The course provides students an opportunity to expand their knowledge about the drivers of global food systems and the complexity of the issues such as food security, global economic development and the implications of climate change, and sustainability.

PVS 5992. Animal Health and Food System Policy and U.S. Federal Government. (1 cr. : S-N only; Every Fall) This course is designed to immerse students in the national policy-making arena for animal health and food systems. Participants will interact with officials in relevant Federal government agencies as well as national stakeholder organizations and policy-relevant think tanks. The course will explore the role of scientific evidence in developing and implementing policy as well as the impact of politics and beliefs. The course will provide students an understanding and experience regarding the policy-making process as it pertains to trade, animal health, and food systems at the national levels.

PVS 5993. Animal Health and Food System Policy and Intergovernmental Organizations. (1 cr. : S-N only; Every Spring) Evidence-based policy development. Relevant global animal health and food system issue. Role of scientific evidence in developing/implementing policy. Policy-making process as it pertains to trade, animal health, and food system across intergovernmental organizations. Role of scientific evidence in intergovernmental organization's policy development. prereq: DVM or equiv degree or current DVM student or instr consent

PVS 5995. Engaging Intergovernmental Organizations. (2 cr. : S-N only; Every Fall & Spring) Each enrolled student will be expected prepare for the program prior to traveling to the off-campus site by becoming familiar with the relevant organizations which includes reading the background materials provided online. Prior to the off-campus component of the course, students will be asked to participate in an online webinar and work as a member of a virtual team in preparing an executive overview of one of the intergovernmental organizations to share with the entire class at the first meeting. Each student is also expected to participate in directed discussions, interact with key officials, perform group task assignments, and ultimately develop and share a presentation to foster professional networks and public-private-academic partnerships with relevant stakeholders.

PVS 5996. Professional Communications: Policy Issue Briefs. (1 cr. [max 2 cr.] : S-N or Audit; Every Fall & Spring) Critical review of scientific and lay literature. Principles of risk communication. Presentation of scientific information. Prepare and critique executive summaries of current topics for CAHFS Daily News. Support media interactions of CAHFS faculty. Generate fact sheets for use on CAHFS website. prereq: Students must have a professional or graduate degree related to human, animal, or ecosystem health or be pursuing a graduate degree (MS/PhD) or professional masters (MPH/MPA) or instruct consent

PVS 5997. Farm to Table Study Program. (1.5 cr. : Student Option; Every Fall) Explore the food system within a specific country while considering aspects of animal welfare/health, food safety, food protection, public health. Site visits along food supply chain. Discussions with government/private sector leaders. Interactive cross-culture group activities. prereq: instr consent

PVS 5999. Professional Communications: Daily News. (1 cr. [max 2 cr.] : S-N only; Every Fall & Spring) Meetings are commonplace in most organizations yet the effectiveness of these meetings is commonly questioned. Students will learn and practice some proven techniques for enhancing the effectiveness of meetings such as agendas, note-taking and preparation of minutes and meeting summaries. Most professionals utilize email as one of their most common forms of communication yet they’ve never learned how to maximize the likelihood that emails will be effective. Students will write and critique emails to enhance the effectiveness of their email communications.

### Periodontics (PERO)

**PERO 5123. Practice Management Externship.** (1 cr. : Student Option; Every Spring) Familiarizes periodontal students with the private practice environment and prepares them to select the type of practice they want to purchase or build and successfully manage their office. prereq: Resident in advanced education program in periodontology

**PERO 7321. Periodontics/Orthodontics Seminar.** (1 cr. : S-N only; Every Fall & Spring) Seminar related to postdoctoral work in periodontics/orthodontics.

**PERO 7322. Multidisciplinary Treatment Seminar in Dentistry Related to Periodontics.** (1 cr. : S-N or Audit; Every Summer) Series of multidisciplinary treatment seminars related to specialized fields in periodontology, endodontics, pediatric dentistry, AEGD/GPR, and prosthodontics dentistry, prereq: Resident enrolled in [periodontology, endodontics, pediatric dentistry, AEGD/GPR, prosthodontics]

**PERO 8000. Advanced Clinical Periodontology.** (1-3 cr. : A-F or Audit; Every Fall, Spring & Summer) Clinical training in examination, diagnosis, treatment planning, and various phases of prevention and treatment of periodontal diseases in patients. prereq: Resident in advanced education program in periodontology

**PERO 8200. Clinical Seminars.** (1 cr. : Student Option; Every Fall, Spring & Summer) bd prereq: Resident in advanced education program in periodontology

**PERO 8250. Anatomy of the Periodontium.** (1 cr. : A-F or Audit; Fall Odd Year) Gingival tissues, cementum, periodontal ligament, and alveolar bone discussed from histological, physiological and pathological point of view. prereq: Resident in advanced education program in periodontology

### Pharmaceutics (PHM)

**PHM 5200. New-Drug Development Process.** (1 cr. : Student Option; Periodic Fall & Spring) New-drug development process in the U.S. pharmaceutical industry.

**PHM 6738. Pharmacokinetics.** (0 cr. : A-F or Audit; Every Fall) Designed to give generalist practitioners fundamental skills to solve pharmacokinetically-based problems in patient care, particularly in regards to dosage regimen design/adjustment. Follows path of drug molecule from incorporation into dosage form to release/disposition in biological system. Requires instructor consent.

**PHM 8100. Seminar: Pharmaceutics.** (1 cr. [max 4 cr.] : S-N or Audit; Every Fall & Spring) Prereq: Grad Phm major
PHM 8110. Readings in Pharmaceutics. (1 cr. [max 4 cr.]; S-N or Audit; Every Fall & Spring)
Current literature. prereq: Grad Phm major

PHM 8120. Readings in Central Nervous System (CNS) Drug Delivery. (1 cr. [max 4 cr.]; S-N only; Every Fall & Spring)
Weekly discussion of recent publications or new techniques, methods, and analyses on delivery of drugs to central nervous system. Topics vary. Informal presentations from CNS drug delivery researchers. prereq: instr consent

PHM 8150. Pharmacokinetics Research Seminar. (1 cr. [max 12 cr.]; S-N or Audit; Every Fall & Spring)
Current concepts and literature review. prereq: Grad Phm major

PHM 8210. Pharmacokinetics Module. (1 cr. [max 2 cr.]; S-N only; Every Fall)
Foundational materials in pharmacokinetics for pharmaceutics graduate students.

PHM 8220. Physical Pharmacy Module I. (1 cr. [max 2 cr.]; S-N only; Every Fall)
First course in a two course sequence which provides foundational materials in physical pharmacy for pharmaceutics graduate students.

PHM 8230. Physical Pharmacy Module II. (1 cr. [max 2 cr.]; S-N only; Every Spring)
Second course in a two course sequence which provides foundational materials in physical pharmacy for pharmaceutics graduate students.

PHM 8240. Biopharmaceutics Module. (1 cr. [max 2 cr.]; S-N only; Every Spring)
Foundational materials in biopharmaceutics for pharmaceutics graduate students.

PHM 8295. Research Problems in Pharmaceutics. (1-12 cr. [max 72 cr.]; S-N or Audit; Every Fall, Spring & Summer)
Experimental investigation of problems in pharmaceutics. prereq: instr consent

PHM 8333. FTE: Master’s. (1 cr. [max 12 cr.]; S-N only; Every Fall & Spring)
Student-presented seminars. prereq: Grad student or instr consent

PHM 8411. Solubility and Solid-State Properties of Drugs. (3 cr.; A-F or Audit; Fall Odd Year)
Physical/physicochemical properties of drugs in solid state as related to drug delivery. prereq: Physical chem course survey or instr consent

PHM 8443. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Doctoral student, adviser and DGS consent

PHM 8481. Advanced Neuropharmaceutics. (4 cr.; A-F or Audit; Fall Even Year)
Delivery of compounds to central nervous system (CNS) to activate proteins in specific brain regions for therapeutics benefit. Pharmaceutical/pharmacological issues specific to direct drug delivery to CNS. prereq: instr consent

PHM 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PHM 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

PHM 8900. Special Topics in Pharmaceutics. (1-4 cr.; Student Option; Periodic Fall & Spring)
Special topics in Pharmaceutics

Pharmacology (PHCL)

PHCL 5102. Pharmacology for Pharmacy Students II. (2 cr.; A-F only; Every Spring)
Action/fate of drugs. prereq: 5101 or instr consent

PHCL 5109. Problems in Pharmacology. (1-18 cr.; Student Option; Every Fall, Spring & Summer)
Research projects and special problems by arrangement. prereq: Upper div or grad student or instr consent

PHCL 5110. Introduction to Pharmacology. (3 cr.; A-F or Audit; Every Fall)
Basic principles of Pharmacology. Focuses on molecular mechanisms of drug action. prereq: Grad student or instr consent

PHCL 5111. Pharmacogenomics. (3 cr.; A-F or Audit; Every Spring)
Human genetic variation, its implications. Functional genomics, pharmacogenomics, toxicogenomics, proteomics. Interactive, discussion-based course. prereq: Grad student or instr consent

PHCL 5112. A Graduate Toolkit I: An Introduction to the Scientific Research Lab. (1 cr.; A-F only; Every Fall)
Basic operating principles/techniques of scientific research lab. Personnel structure, professionalism, authorship/publication. Recombinant protein production/purification, DNA/RNA purification/analysis, molecular biology methods, microscopy, model systems/bioinformatics. prereq: instr consent

PHCL 5113. A Graduate Toolkit II: Scientific Speaking and Writing for Graduate Students. (2 cr.; A-F only; Every Fall)
Guidance on PowerPoint design, public speaking, question/answer sessions at scientific talks. Practice sessions are videotaped/analyzed to highlight strategies for improvement. Guidance in writing thesis research topic. prereq: Completion of one yr of a grad program

PHCL 5462. Neuroscience Principles of Drug Abuse. (2 cr.; Student Option; Periodic Spring)
Current research on drugs of abuse, their mechanisms of action, characteristics shared by various agents, and neural systems affected by them. Offered biennially, spring semester of even-numbered years. prereq: instr consent

PHCL 8014. Small RNA Biology. (2 cr.; A-F or Audit; Every Spring)
Small RNAs as major regulators of gene/protein expression. MicroRNAs and their potential use in diagnosis/prognosis of various disease conditions, including cancers. Biology of small RNAs and their role in health and disease. prereq: BIOC 8002 or MICA 8004 or equiv or instr consent

PHCL 8026. Neuro-Immune Interactions. (3 cr.; Student Option; Every Fall)
Regulatory systems (neuroendocrine, cytokine, autonomic nervous systems) linking brain/immune systems in brain-immune axis. Functional effects of bidirectional brain-immune regulation. prereq: MICA 8001 or equiv or instr consent

PHCL 8100. Laboratory Research in Pharmacology. (4 cr.; [max 8 cr.]; S-N only; Every Fall & Spring)
Supervised independent research in pharmacology. Modern biomedical/pharmacology research methodology, data generation/analysis. Formulation/testing of basic science hypotheses. prereq: Grad student or instr consent

PHCL 8200. Seminar: Selected Topics in Pharmacology. (1 cr.; [max 8 cr.]; A-F only; Every Fall & Spring)
Student-presented seminars. prereq: 5212 or instr consent

PHCL 8207. Seminar: Psychopharmacology. (1 cr.; Student Option; Every Fall & Spring)
For graduate students and postdoctorals interested in studies and research associated with psychotropic drugs and chemicals. Neurochemistry, pharmacology, and behavior as antecedent or consequential variables.

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.

292
Some seminars devoted to biomedical ethics. prereq: instr consent

PHCL 8208. Neuropsychopharmacology. (3 cr.; A-F or Audit; Fall Every Year) Relationships between drugs/biochemical, behavioral, neurophysiological consequences. Functional biogenic amine, peptidergic. How manipulations alter neuronal function or behavior. Feedback mechanisms, induction, inhibition. Reinforcement of, tolerance to, or dependence on drugs. prereq: [5212, Psy 5021, Psy 5061] or instr consent

PHCL 8209. Substance Abuse at the Bedside. (1 cr.; S-N only; Every Fall & Spring) Clinical management of addictive diseases. Students discuss how observed clinical interactions can influence a basic science project in which they are involved. prereq: Grad student in any basic-science program

PHCL 8211. Advanced Medical Pharmacology I. (5 cr.; A-F only; Every Spring) Online content focused on organ system-based study of medical therapeutics. In-class content focused on current biomedical literature. Develop critical reasoning skills needed to interpret/critique basic science, translational, clinical research papers/presentations. prereq: [max 5110]. [grad student or instr consent]

PHCL 8212. Advanced Medical Pharmacology II. (3 cr.; A-F only; Every Summer) Online content focused on organ system-based study of medical therapeutics. In-class content focused on current biomedical literature. Develop critical reasoning skills needed to interpret/critique basic science, translational, clinical research papers/presentations. prereq: 8211 or instr consent

PHCL 8217. Problems in Investigative Pharmacology. (0 cr.; S-N or Audit; Every Fall) Presentation and discussion of contemporary research problems, investigative approaches, and methodologies in experimental pharmacology. Related to cardiovascular, renal, endocrine, and autonomic pharmacology: neuropharmacology; psychopharmacology; chemotherapy; toxicology; and molecular pharmacology.

PHCL 8221. Neurobiology of Pain and Analgesia. (3 cr.; Student Option; Periodic Fall & Spring) Course offered triennially. prereq: instr consent

PHCL 8222. Transdisciplinary Tobacco Research. (1 cr.; max 2 cr.; S-N or Audit; Fall Odd Year) Transdisciplinary science, its application to nicotine/tobacco research. Transdisciplinary theories/methods, examples of their application/integration. Draws on TTURC/local investigators, public health advocates. Offered every other year. prereq: instr consent

PHCL 8320. Readings in Neurobiology. (1-4 cr.; Student Option; Every Fall & Spring) Topics in neurobiology/neurophysiology. prereq: instr consent

PHCL 8333. FTE: Master’s. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master's student, adviser and DGS consent

PHCL 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

PHCL 8666. Doctoral Pre-Thesis Credits. (1-6 cr.; max 12 cr.) No Grade Associated; Every Fall, Spring & Summer) TBD prereq: Doctoral student who has not passed prelim; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

PHCL 7777. Thesis Credits: Master’s. (1-18 cr.; max 50 cr.) No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PHCL 8888. Thesis Credit: Doctoral. (1-24 cr.; max 100 cr.) No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

Pharmacy (PHAR)

PHAR 5200. Drugs and the US Health Care System. (3 cr.; Student Option; Every Fall & Spring) Being an empowered patient is important when discussing ethics-driven issues within the U.S. health care system. This course will expose students to current controversial issues surrounding medications and national health care and help students examine their own role as a participant in this system. Students will learn to draw comparisons between medication use systems around the world and analyze other controversies related to access, choice, and quality of health care. During this course, students will understand how their choices, ethics and behavior affect societal decisions surrounding the availability of medications in the US and what their rights are as a citizen-participant during the health care debate. This is a completely online course with weekly due dates offered each Fall and Spring term. For more information, contact phar5200@umn.edu or 612-624-7976.

PHAR 5205. Obesity: Issues, Interventions, Innovations. (2 cr.; Student Option; Every Fall & Spring) This course will focus on the role of the pharmacist in treating obesity. Students will learn the pharmacology of past and current medications to treat obesity, as well as the pathophysiology of the disease to understand why more options aren’t available. Students will explore drug information sources for dietary supplements for weight loss, discuss the care of an obese patient including nonpharmacologic treatments for obesity, as well as recognizing the potential for bias and its effect on patient care. Finally, students will look at bariatric surgery and discuss some specific adjustments in care for bariatric patients. This is a completely online course with weekly due dates offered each Fall and Spring term. For more information, contact phar5205@umn.edu or 612-624-7976. Prereq: Second or third year pharmacy student, or student enrolled in a graduate science or health-related program. Biochemistry and physiology suggested.

PHAR 5212. Survey of Pediatric Metabolic, Genetic, and Oncologic Disease. (2 cr.; A-F only; Every Fall & Summer) Appraisal of major genetic/metabolic disorders and oncologic diseases of childhood. Disease state epidemiology, pharmacotherapy, monitoring, practical applications. prereq: Second year or higher in College of Pharmacy or instr consent

PHAR 5230. Principles of Clinical Pharmacology Research. (2 cr.; A-F only; Every Fall) Drug therapy investigation. Topics include experimental design of drug studies in human research subject volunteers. Topics related to individualization of therapy including effects of genetic polymorphisms, demographic variables, physiologic variables, age on drug disposition treatment outcomes. prereq: 3rd Year Pharmacy Student or instr consent

PHAR 5700. Applied Fundamentals of Pharmacotherapy. (0 cr.; A-F only; Every Fall, Spring & Summer)
Pharmacotherapy, the treatment of disease through the administration of medications, is a field particularly interesting to many health care workers. This course is designed to introduce students to some of the main drug classes available for the treatment of particular diseases. Students will also learn about basic pharmacology, recognize brand and generic drug names, and explore their common uses and therapeutic classes. A basic understanding of treatment options available for common disease states will also be developed during this course. Additionally, the course develops basic proficiency in the use of drug information resources. This is a completely online course with due dates throughout the semester, though students have the option to work ahead if they choose. This course is offered each Fall, Spring, and Summer term. For more information, contact phar3700@umn.edu or 612-624-7976. Prereq: Medical terminology recommended.

PHAR 5800. Pharmacotherapy for the Health Professions. (3 cr.; A-F only; Every Fall) Pharmacotherapy, the treatment of disease through the administration of medications, is a topic central to the practice of nursing. This course is designed to introduce you to the main drug classes available for the treatment of particular diseases and the monitoring parameters for patients taking these medications. You will also learn about basic pharmacology, recognize brand and generic drug names, and explore their common uses and therapeutic classes. A basic understanding of contraindications and precautions related to various classes of medications will also be covered. Additionally, the course develops basic proficiency in the use of drug information resources. This is a completely online course with weekly due dates offered each Fall term. For more information, contact phar5800@umn.edu or 612-624-7976. Prereq: Anatomy and physiology.

PHAR 6123. Pharmacotherapy III: Patient-centered Pathophysiological Approach. (5 cr.; A-F only; Every Fall) Pathophysiology/pharmacotherapy of common neurologic, psychiatric, pulmonary, geriatric disorders. prereq: 6122, 6163, concurrent registration is required (or allowed) in 6175, PHCL 5101, PHCL 5102.

PHAR 6131. Pharmacy and the Health Care System. (3 cr.; A-F only; Every Spring) Delivery of pharmaceuticals/pharmacy services in U.S. health care system. Issues in hospital/community practice, characteristics of pharmaceutical industry. Economic/financial issues in delivering pharmaceutical services. prereq: 2nd year pharmacy student.

PHAR 6133. Pharmacy Practice Management. (3 cr.; A-F only; Every Spring) Principles of pharmacy management, including inventory control, purchasing, pricing, financial analysis, personnel management. prereq: 3rd year pharmacy student.

PHAR 6135. Pharmacy Outcomes. (2 cr.; A-F only; Every Spring) How to integrate knowledge of basic sciences, pharmacotherapy, pharmacy practice management, pharmaceutical care, written communication, literature evaluation, drug information retrieval, law/ethics, and pharmacoconomics to manage patients with multiple medical conditions. prereq: 6123, 6175.

PHAR 6137. Ethics in Pharmacy Practice. (1 cr.; A-F only; Every Spring) Theories of ethics, ethical analysis of practical ethical issues experienced by pharmacists. Relationship of ethical reasoning to public policy and law. Readings from peer-reviewed publications and popular media. Case studies. prereq: 3rd yr pharmacy student.

PHAR 6150. CoP Honors: Medicinal Chemistry Seminar. (1 cr.; [max 2 cr.]; A-F only; Every Fall & Spring) Current topics in medicinal chemistry. prereq: instr consent.

PHAR 6151. Biochemistry of Medicinals I. (3 cr.; A-F only; Every Fall) Biochemistry topics required for understanding pharmacodynamic action/therapeutic use of medicinal agents. prereq: 1st yr PHAR, 6171.

PHAR 6155. Medicinal Agents II. (2 cr.; A-F only; Every Spring) Chemical/biological properties and therapeutic uses of drugs affecting central nervous, endocrine, and intermediary metabolism systems. prereq: 6154, concurrent registration is required (or allowed) in 6174 and PHCL 5102.

PHAR 6156. Medicinal Agents III. (4 cr.; A-F only; Every Fall) Therapeutic properties/use of antiviral, antinfective, antineoplastic agents. prereq: 6151, 6141.

PHAR 6157. Human Nutrition and Drug Therapy. (3 cr.; A-F only; Every Spring) Basic concepts of human nutrition and clinical application. prereq: 6152.

PHAR 6158. Recombinant DNA-Derived Drugs. (1 cr.; A-F only; Every Spring) Biotechnology as it relates to basic/clinical pharmacological sciences. Emphasizes recombinant DNA techniques and preparation/use of biotechnology-derived agents in diagnosing/treating disease. prereq: 6151.

PHAR 6160. CoP Honors: Experimental and Clinical Pharmacology Seminar. (1 cr.; A-F only; Every Fall & Spring) Selected topics in experimental/clinical pharmacology. prereq: instr consent.

PHAR 6164. Biopharmaceutics. (3 cr.; A-F only; Every Fall) Applied theory of dosage form design for optimal drug activity/bioavailability for all routes of drug administration. prereq: 6161, 6162, 6163.

PHAR 6174. Pharmaceutical Care Skills IV. (2 cr.; A-F only; Every Spring) Basic/clinical science curriculum in lab setting. Longitudinal care in lab setting. prereq: concurrent registration is required (or allowed) in 6122.

PHAR 6175. Pharmaceutical Care Skills V. (2 cr.; A-F only; Every Fall) Integrates basic/clinical science curriculum lab setting. prereq: concurrent registration is required (or allowed) in 6171, 6172, 6173, 6174, 6111, 6112 or instr consent.

PHAR 6182. Pharm.D. IV Seminar. (1 cr.; S-N only; Every Fall) Students present thesis topics to peers and faculty evaluators. prereq: 4th yr pharmacy student, 6181.

PHAR 6183. Pharm.D. IV Paper. (2 cr.; S-N only; Every Fall, Spring & Summer) Final paper describing hypothesis-driven research project, patient-care oriented project, management project, drug-usage evaluation, or extensive literature review. prereq: 6181.

PHAR 6203. College of Pharmacy Community Outreach. (1-2 cr.; [max 3 cr.]; A-F only; Every Fall, Spring & Summer) Apply knowledge gained in classroom and teaching laboratories to community-based patient care activities. prereq: Current student pharmacist in College of Pharmacy.

PHAR 6205. Interprofessional Teamwork for the Health Professions. (1 cr.; A-F only; Every Fall) Interprofessional education that provides an introductory experience to interprofessional teamwork skills with a focus on patient-centered care, especially end of life care. prereq: Major in [public health or nursing or medicine or dentistry or social work or pharmacy].

PHAR 6208. Community-based Immunization Delivery. (1 cr.; S-N or Audit; Every Fall)
Students will learn about, plan, and implement influenza immunization clinics.

PHAR 6211. Non-Prescription Drug Therapy: Focus on Patient Self-Care. (2 cr.; A-F or Audit; Every Spring)
Over-the-counter medications. Diagnostic/durable medical equipment available in community pharmacies. Use of alternative medications. prereq: 6112

PHAR 6212. Dermatology. (1 cr.; A-F or Audit; Every Fall)
Pathophysiology/pharmacotherapy of dermatologic disorders. prereq: 3rd yr Pharmacy student

PHAR 6215. Applied Pharmacokinetics. (2 cr.; A-F or Audit; Every Spring)
Applying clinical pharmacokinetics and assay methodologies to patient care. Assessing drug therapy outcomes. prereq: 6163

PHAR 6217. Advanced Pharmaceutical Care Clinic. (1-2 cr.; Student Option; Every Spring)
Expanded, direct patient care opportunities. Students conduct comprehensive pharmaceutical care assessments in presence of practitioners. Weekly student case presentations/discussions. prereq: [6230] or 3rd yr pharmacy student

PHAR 6219. Building a Pharmaceutical Care Practice. (2 cr.; A-F only; Every Spring)
Initiating pharmaceutical care practice. Building personal practice plan. prereq: 2nd or 3rd year pharmacy student

PHAR 6220. Pediatric Drug Therapy. (2 cr.; A-F only; Every Spring)
Pathophysiology/therapeutics of disease states. Common issues encountered in providing pharmaceutical care to pediatric patients.

PHAR 6222. Advanced Pharmaceutical Compounding. (2 cr.; A-F only; Every Fall & Spring)
Expands skills gained in pharmaceutical care lab. prereq: 2nd or 3rd year pharmacy student

PHAR 6223. Pharmacokinetics Research Seminar. (1 cr. [max 2 cr.]; A-F or Audit; Every Fall & Spring)
Evaluate literature in pharmacokinetics/pharmacodynamics/drug metabolism. prereq: 6163 with grade of "B" or better

PHAR 6224. Pharmacogenomics: Genetic Basis for Variability in Drug Response. (2 cr.; A-F only; Every Spring)
Theory/practice of pharmacogenomics. Principles of human genetics/genomics. Applications to scientific education, problems in drug therapy optimization, patient care. prereq: At least 3rd year or later in healthcare or related program or equivalent experience or instr consent

PHAR 6226. Interprofessional Diabetes Experience. (2 cr.; A-F only; Every Spring)
Diabetes mellitus through active, hands-on learning in interprofessional environment. Participate in week-long experience of living with diabetes. Online learning activities. prereq: 2nd year or later pharmacy student

PHAR 6227. Leading Adaptive Change. (2 cr.; S-N only; Every Fall)
Hands-on experience leading change initiative. Create vision for change, plan approach, implement plan, evaluate outcomes. Project focuses on area of pharmacy practice or education.

PHAR 6230. Ambulatory Pharmaceutical Care Clinic. (2 cr.; Student Option; Every Spring)
How to conduct pharmaceutical care assessments, for patients with actual drug-related needs, in a controlled clinic setting. prereq: Enrolled pharmacy student

PHAR 6231. Community Pharmacy Management. (2 cr.; A-F only; Every Spring)
Management techniques needed in community pharmacy practice. Emphasizes marketing/service.

PHAR 6232. Health System Pharmacy Management. (2 cr.; A-F only; Every Spring)
Management techniques needed in various institutional pharmacy settings. Integrating distributive/clinical components of institutional practice. prereq: 2nd or 3rd yr pharmacy student

PHAR 6233. Drug Use Review and Management. (2 cr.; A-F only; Every Fall)
Principles of drug use review in various health care settings. Optimizing quality, minimizing cost. prereq: 3rd year Pharmacy student

PHAR 6234. Pharmaceutical Economics and Public Policy. (2 cr.; A-F only; Every Spring)
Economic and public policy aspects of the U.S. health care system. Health economic principles and trends applied to the pharmaceutical market.

PHAR 6235. Pharmaceutical Industry: Business and Policy. (2 cr.; A-F or Audit; Every Spring)
Developing, manufacturing, distributing, economically evaluating, purchasing, managing, and ordering pharmaceuticals in health sector. Unique market characteristics, complex regulatory processes, rapid technological change, high expense growth, public policy issues.

PHAR 6236. Clinical/Pharmacy Management in Modern U.S. Health-Care and Regulatory Landscape. (2 cr.; A-F only; Every Fall)
This interactive course provides diverse introductory exposure to key non-traditional pharmacy topics within the broader, complex, and evolving US healthcare and managed care landscape. Class entails expertise and critical evaluation of clinical and pharmacy management topics such as utilization & care management, formulary, clinical planning, HEOR, healthcare policy and strategy, clinical account management, specialty pharmacy, Medicare, benefits consulting, pharmaceutical industry, business issues in managed care, and clinical pharmacy leadership. Relevant regulatory topics such as drug development are included as complementary topics, time permitting.

PHAR 6237. Leading Change in Pharmacy I. (2 cr.; S-N only; Every Fall)
Mini-curriculum. Leadership development, its relation to advancing the profession of pharmacy.

PHAR 6238. Leading Change in Pharmacy II. (2 cr.; S-N or Audit; Every Spring)
Mini-curriculum. Leadership development, its relation to advancing the profession of pharmacy.

PHAR 6249. Addiction Medicine, Substance Abuse, and Chemical Dependency. (2 cr.; A-F or Audit; Every Spring)
Addiction, chemical abuse, chemical dependency. How pharmacists can impact those affected. prereq: 2nd or 3rd yr Pharmacy student

PHAR 6250. CoP Honors: Social and Administrative Pharmacy Seminar. (1 cr. [max 2 cr.]; A-F or Audit; Every Fall & Spring)
Current topics in hospital pharmacy. prereq: instr consent

PHAR 6260. CoP Honors: Pharmaceutics Seminar. (1 cr.; A-F or Audit; Every Fall & Spring)
Contemporary topics in pharmaceutics research. prereq: instr consent

PHAR 6293. Directed Research I. (1-5 cr. [max 10 cr.]; Student Option; Every Fall, Spring & Summer)
Directed research in pharmacy practice, pharmaceutics, medicinal chemistry, or experimental and clinical pharmacology. prereq: instr consent

PHAR 6294. Directed Study I. (1-5 cr.; Student Option; Every Fall, Spring & Summer)
Directed studies in pharmacy practice, pharmaceutics, medicinal chemistry, experimental or clinical pharmacology.

PHAR 6301. Veterinary Pharmacotherapy. (2 cr.; A-F only; Every Spring)
Pharmacotherapy of common medical conditions of small animals. prereq: 3rd year pharmacy student

PHAR 6393. Directed Research II. (1-5 cr. [max 10 cr.]; Student Option; Every Fall, Spring & Summer)
Directed research in pharmacy practice, pharmaceutics, medicinal chemistry, or experimental and clinical pharmacology. prereq: instr consent

PHAR 6394. Directed Study II. (1-5 cr.; A-F or Audit; Every Fall, Spring & Summer)
Directed studies in pharmacy practice, pharmaceutics, medicinal chemistry, and experimental or clinical pharmacology.

PHAR 6493. Directed Research III. (1-5 cr. [max 10 cr.]; Student Option; Every Fall, Spring & Summer)
Directed research in pharmacy practice, pharmaceutics, medicinal chemistry, or experimental and clinical pharmacology. prereq: instr consent

PHAR 6494. Directed Study III. (1-5 cr.; S-N only; Every Fall, Spring & Summer)
Directed studies in pharmacy practice, pharmaceutics, medicinal chemistry, and experimental or clinical pharmacology.
PHAR 6700. Becoming a Pharmacist. (2 cr.; S-N only; Every Fall)
Introduction to knowledge, skills, attitudes necessary for success in professional pharmacy curriculum/practice of pharmacy.

PHAR 6701. CoP Community Outreach. (0 cr.; No Grade Associated; Every Fall, Spring & Summer)
Teaching laboratories to community-clinic-based interprofessional patient care model.

PHAR 6702. Integrated Biochemical Sciences. (4.5 cr.; A-F only; Every Fall)
Foundation in structure/function of medications. Familiarize students with structural/physical properties of proteins, nucleic acids, lipids, carbohydrates, ligands/drugs. Basic concepts central to structure-function relationships of therapeutics. prereq: Successful completion of Becoming a Pharmacist (BaP)

PHAR 6704. Foundations of Social and Administrative Pharmacy. (2.5 cr.; A-F only; Every Fall)
Foundation for how one should think about rational use of drugs in system of care. Content/skills learned will be applied in subsequent courses continuing through 4th year of curriculum. Module focused on Drug Literature Evaluation (DLE), prereq: Successful completion of Becoming a Pharmacist (BaP)

PHAR 6706. Foundations of Pharmaceutical Care. (1.5 cr.; A-F only; Every Fall)
How pharmacist should think about rational use of drugs in caring for patients. Content/skills learned will be applied in provide framework for all subsequent courses continuing through 4th year of curriculum/lifelong into practice. prereq: Successful completion of Becoming a Pharmacist (BaP)

PHAR 6708. Drug Delivery I. (2.5 cr.; A-F only; Every Fall)
Fundamental physicochemical principles applicable to dosage forms. Foundational scientific principles (continued in DDI) illuminated with examples of solution drug dosage forms. Concepts relevant to current/future dosage forms. prereq: Successful completion of Becoming a Pharmacist (BaP)

PHAR 6710. Pharmaceutical Care Skills Lab I. (2 cr.; S-N only; Every Fall)
Introduction to profession/building skills necessary to become competent, caring pharmaceutical care practitioner. Course consists of laboratory section and lecture. prereq: Successful completion of Becoming a Pharmacist (BaP)

PHAR 6715. Professional Development and Assessment Sequence I. (1 cr.; A-F only; Every Spring)
Knowledge acquisition. Career/professional development. prereq: Successful completion of Becoming a Pharmacist

PHAR 6716. Applied Pharmaceutical Care. (3.2 cr.; A-F only; Every Spring)
Common medical conditions/medications students are likely to encounter during their introductory pharmacy practice experiences (IPPEs). prereq: Successful completion of Becoming a Pharmacist

PHAR 6717. Drug Delivery II. (2.4 cr.; A-F only; Every Spring)
Builds on Drug Delivery I. Dosage forms, mostly solid dispersed. Chemical kinetics, chemical stability, buffer systems, polymers/ proteins, thermodynamics. Physicochemical principles relevant to design, preparation, storage, use, efficacy, evaluation of pharmaceutical dosage forms. prereq: Successful completion of Drug Delivery I

PHAR 6720. Pharmaceutical Care Skills Lab II. (2 cr.; A-F only; Every Spring)
Part of pharmaceutical care learning center curriculum spanning six semesters. Introduction to profession. Begin building skills necessary to become competent/caring pharmaceutical care practitioner. prereq: Successful completion of Drug Delivery I

PHAR 6722. Principles of Medicinal Chemistry. (2.1 cr.; A-F only; Every Spring)
Discipline of medicinal chemistry. Principles of drug design/drug metabolism. prereq: Successful completion of Integrated Biochemical Sciences

PHAR 6724. Immune System and Infectious Disease. (3.1 cr.; A-F only; Every Spring)
Immunological, epidemiological, pathogenic basis of viral, bacterial, protozoal, fungal, helminthic disease. Biological composition of vaccines/immunologic response to live attenuated pathogens/microbial extracts. Chemical, cellular, biological principles of immune system, prereq: Successful completion of Integrated Biochemical Sciences

PHAR 6726. Principles of Pharmacology. (2.3 cr.; A-F only; Every Spring)
Builds on information in basic science courses offered in first semester of PharmD program. Foundational content necessary for comprehension/application of all subsequent pharmacotherapy modules that require application of pharmacological concepts/knowledge. prereq: Successful completion of Foundations of SAPh

PHAR 6728. Pharmaceutical Calculations. (0.7 cr. [max 3.1 cr.]; A-F only; Every Fall)
Accurately performing pharmaceutical calculations is a critical component of patient care in every pharmacy practice environment. Calculations contribute just as much to good patient outcomes as the newest methods and guidelines for diagnosis, treatment, and prevention. The challenge of pharmacy calculations lies not in the cutting edge of science or their mathematical complexity, but in the need for consistent accuracy to prevent patient harm and possible fatality. To obtain this level of accuracy, an understanding of methods and deliberate, unfiltered attention to detail is required. Students must understand and master the basic concepts of pharmaceutical calculations with organization, consistency, and accuracy in order to provide optimal care to their future patients every day. Students should be committed to becoming a competent generalist practitioner who assumes responsibility and is willing to be held accountable for their patients’ medication outcomes. prereq: enrolled in the PharmD program, successful completion of Pharm 6700

PHAR 6730. Career and Professional Foundations II. (0.5 cr.; S-N only; Every Fall)
Emphasis on reinforcing, supporting, developing, assessing competencies/skills exercised in multiple courses. Includes work in career/professional development. prereq: Prior concurrent registration is required (or allowed) in I

PHAR 6732. Medicinal Chemistry and Pharmacology of Cardiovascular Agents. (2.3 cr.; A-F only; Every Fall)
Builds upon foundational concepts learned in Principles of Pharmacology/Principles of Medicinal Chemistry, applies them to drug classes primarily used for treatment of cardiovascular diseases. prereq: Principles of Pharmacology, Principles of Medicinal Chemistry

PHAR 6734. Cellular Metabolism and Nutrition. (2.8 cr.; A-F only; Every Fall)
Basic principles of intermediary metabolism/how such processes are used by body. Basic nutrients used by body/their roles as OTC products in community pharmacies. prereq: Integrated Biochemical Sciences

PHAR 6736. Cardiovascular Pharmacotherapy. (1.9 cr.; A-F only; Every Fall)
Key topics critical to preparing generalist practitioner to have input on optimizing care of patients with common conditions such as hypertension, dyslipidemia, ischemic heart disease (angina, acute myocardial infarction) supraventricular arrhythmias (atrial fibrillation), chronic heart failure. prereq: All PharmD year one coursework, Physiology Competency Exam

PHAR 6738. Pharmacokinetics. (3.7 cr.; A-F only; Every Fall)
Designed to give generalist practitioners fundamental skills to solve pharmacokinetically-based problems in patient care, particularly in regards to dosage regimen design/adjustment. Builds on concepts learned in Drug Delivery I/II. Follows path of drug molecule from incorporation into dosage form to release/disposition in biological system. prereq: Drug Delivery I concurrent registration is required (or allowed) in II

PHAR 6740. Pharmaceutical Care Skills Lab III. (2 cr.; S-N only; Every Fall)
Designed for second year pharmacy students to continue to build skills necessary to become pharmaceutical care practitioner. Laboratory section/discussion. prereq: Pharmaceutical Care Skills Lab I concurrent registration is required (or allowed) in II, Applied Pharmaceutical Care

PHAR 6742. Evidence based problem analysis I. (1 cr.; S-N only; Every Spring)
Practice skills necessary to research, prepare, present scholarly paper/seminar. Builds on Biostatistics/Drug Literature Evaluation material from "Becoming a Pharmacist, Foundations of Social/Administrative Pharmacy, Foundations of Pharmaceutical Care." prereq: Becoming a Pharmacist, Foundations of Social and
Administrative Pharmacy, Foundations of Pharmaceutical Care

PHAR 6745. Professional Development and Assessment III. (0.5 cr.; A-F only; Every Spring)
For the second year of the Professional Development and Assessment Sequence, the emphasis is on knowledge comprehension. Class includes work in career and professional development. Successful completion of Professional Development and Assessment I concurrent registration is required (or allowed) in II

PHAR 6748. Biopharmaceutics. (2.6 cr.; A-F only; Every Spring)
Biopharmaceutics is the final course in a four-course sequence that comprises the curriculum in pharmaceutics. Biopharmaceutics integrates core knowledge obtained in the previous three courses (Drug Delivery I & II and Pharmacokinetics), and also relies on general knowledge in anatomy, physiology, mathematics, general chemistry, and pharmacology. prereq: Courses and/or content: Calculus, thermodynamics, viscosity, sedimentation, diffusion, chemical kinetics, novice to developing level understanding of dosage forms, developing understanding of pharmacokinetics/pharmacodynamics, physiology, general chemistry, physics, biochemistry, enzyme kinetics, and metabolic pathways. It is strongly recommended that students review course materials in Drug Delivery I concurrent registration is required (or allowed) in II and Pharmacokinetics as well as anatomy, physiology, calculus, and physics with consideration of the application of the concepts to the delivery of drugs to patients.

PHAR 6750. Pharmaceutical Care Skills Lab IV. (2 cr.; A-F only; Every Spring)
This course is designed for second-year pharmacy students to continue to build the skills necessary to become a competent, caring pharmaceutical care practitioner. prereq: Students must have successfully completed Pharm Care Skills 1, 2, and 3, and Applied Pharmaceutical Care. Students must be concomitantly registered in all required PD2 courses in order to have the content required to complete integrated activities, e.g., students must be enrolled in Diabetes in order to successfully complete the patient care sequence utilizing diabetes content in this course. Exceptions may be made on a case by case basis.

PHAR 6752. Integrated Endocrinology. (2.1 cr.; A-F only; Every Spring)
This course will integrate all pertinent endocrinology topics (excluding diabetes) into one course. Specifically, the pathophysiology, medicinal chemistry, pharmacology and the therapeutic application of the this knowledge will be covered in an integrated approach via specific modules. All major endocrine pathways will be taught including: hypothyroid/pituitary, steroids, female sex hormones, hormonal contraception, menopause/hormone therapy, bone health, male gonadal hormones, drugs in pregnancy and lactation, sexual dysfunction and thyroid hormone. prereq: Students will need to have successfully completed: - Cellular Metabolism/Nutrition, - Cardiovascular Pharmacotherapy - Pharmaceutical Care Skills Labs 1-3. Students should be concurrently enrolled in Kidney, Fluids, and Electrolytes, and Diabetes and Metabolic Syndrome. Students should be able to describe the function of the overall endocrine systems and the multiple roles of hormones in the body.

PHAR 6754. Diabetes and Metabolic Syndrome. (2.1 cr.; A-F only; Every Spring) In this course, students will learn the principles of the pathophysiology of diabetes, pharmacology of the antidiabetic agents, evaluate key research on diabetes, interpret and apply clinical guidelines for diabetes, assess socioeconomic aspects of diabetes, and apply this information to patient cases. Special populations with diabetes will also be discussed including pediatic, gestational, and geriatric diabetes. Students will also learn the the pathophysiology of metabolic syndrome, pharmacology of obesity treatments, nonpharmacological and pharmacological ways to treat metabolic syndrome, including the implications of bariatric surgery on use of pharmacologic agents in general, and apply this information to patient cases. prereq: Students will have to successfully completed: Molecular Metabolism/Nutrition, Cardiovascular Pharmacotherapy concurrent registration is required (or allowed) in Pharmaceutical Care Skills Lab 1-3. Students should be able to describe the physiology of insulin action, incretin hormones, amylin, and the fasting and fed states. Students should be able to describe how insulin is designed and manufactured. Students should be able to describe the following biochemistry topics: carbohydrate metabolism and lipid metabolism, and protein. Students should be able to assess a patient and determine most appropriate pharmacotherapy treatment options for a patient's hypertension and dyslipidemia treatments, including ability to describe, interpret and apply evidence-based guidelines. Students should be able to describe how nutrition impacts energy production, utilization and storage, and obesity. Students need to be able to describe the caloric content of carbohydrates, proteins and lipids and be able to apply that knowledge to reading food labels and evaluating a patient's nutritional status.

PHAR 6756. Kidney, Fluid, and Electrolytes. (2.1 cr.; A-F only; Every Spring)
About 75% of new cases of chronic kidney disease (CKD) are due to diabetes and hypertension. Patients with CKD often experience congestive heart failure and anemia. In addition, the kidney is the main excretory route for many drugs. Thus, this course offers an opportunity to integrate material learned in previous and concurrent courses. In this course, students will learn key concepts and develop specific skills in the management of common fluid and electrolyte and single acid/base disorders and in prevention and management of chronic kidney disease and associated conditions. prereq: Students must have completed the following courses successfully: - Applied Pharmaceutical Care, - Foundations of Social and Administrative Pharmacy, - Medicinal Chemistry and Pharmacology of Cardiovascular Agents, - Pharmacokinetics, - Cardiovascular Pharmacotherapy, - Cellular Metabolism and Nutrition See the course syllabus for more detailed prerequisites.

PHAR 6758. Pulmonary Pharmacotherapy. (1.1 cr.; A-F only; Every Spring)
This course will provide students with the requisite pathophysiology and pharmacotherapeutic knowledge to care for patients with common pulmonary diseases. It will integrate concepts of pediatric and geriatric pulmonary dosing and infectious diseases. prereq: Students must have completed the following courses successfully: - Applied Pharmaceutical Care - Foundations of Social and Administrative Pharmacy - Medicinal Chemistry and Pharmacology of Cardiovascular Agents - Pharmacokinetics, - Cardiovascular Pharmacotherapy, - Cellular Metabolism and Nutrition See the course syllabus for more detailed prerequisites.

PHAR 6760. Career and Professional Foundations IV. (0.5 cr.; S-N only; Every Fall)
For the third year of the Professional Development and Assessment sequence, the emphasis will be on deeper exploration into career options, as well as the tools needed for contemporary pharmacy practice. Students will have the opportunity to engage with their peers as well as practicing pharmacists as they learn about the expectations of contemporary professional practice. prereq: PHAR 6715, 6730, 6745

PHAR 6762. Medicinal Chemistry and Neuropharmacology. (2.8 cr.; A-F only; Every Fall)
Neuropharmacology and Medicinal Chemistry of Neurological Treatments builds upon the foundational concepts learned in Principles of Pharmacology and Principles of Medicinal Chemistry, and applies them to drug classes primarily used for the treatment of central nervous system (CNS) and peripheral nervous system (PNS) dysfunction. prereq: PHAR 6722, 6726, and 6732

PHAR 6766. Biotechnology-Derived Drugs. (1 cr.; A-F only; Every Fall)
Biotechnology-derived drugs are where the future is, and pharmacy students need to understand how they are made, how they act and what special considerations are involved. This course will provide the foundational knowledge necessary to dispense current biotechnology-derived drugs and provide the basis for self-education needed to understand the biotechnology-derived drugs of the future. prereq: PHAR 6702, 6722, 6726, 6724, 6734, and 6752

PHAR 6768. Infectious Diseases. (3 cr.; A-F only; Every Fall)
Course will focus on the pharmacology, pharmacokinetics, and pharmacodynamics of antibiotics and the pharmacotherapy of infectious diseases. prereq: PHAR 6702, 6706, 6718, 6724, 6736, 6738, 6748, 6756, 6758

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
PHAR 6770. Pharmaceutical Care Skills Lab V. (2 cr.; S-N only; Every Fall)
This course is designed for third-year pharmacy students to continue to build the skills necessary to become a competent, caring pharmaceutical care practitioner.

PHAR 6772. Topics in Pharmacotherapy. (1.6 cr.; A-F only; Every Fall)
Course provides students with the pharmacologic, pharmacotherapeutic, and pharmacoeconomics knowledge they need to understand therapies for dermatologic, gastrointestinal, and genitourinary conditions, and arthritis and gout. Prepares future generalist pharmacists to be knowledgeable about common conditions of aforementioned topics and appropriate pharmacotherapy options for treatment. It will focus primarily on pharmacotherapy, but will have an overview of pathophysiology of these conditions. Students will be expected to apply knowledge to design and monitor a patient-centered pharmaceutical care plan and to appropriately educate patients regarding proper use of medications covered in the course. This course prepares students to identify clinically relevant information in the modern healthcare setting, learn it at a depth beyond memorization, and apply and interpret its application to relevant patient case vignettes. prereq: All required PharmD year two coursework

PHAR 6774. Pharmacotherapy of Neurologic and Psychiatric Disorders. (3.1 cr.; A-F only; Every Fall)
Course prepares future generalist pharmacists to be knowledgeable about common psychiatric and neurologic disorders and about the appropriate use of medications used to treat them. Course primarily focuses on the pharmacotherapies used to treat psychiatric and neurologic disorders. This course will additionally provide an overview of the presentation and pathophysiology of specific psychiatric and neurologic disorders, an overview of the differences between the practices of psychiatry and neurology and a discussion of stigmas associated with mental illness. An overview of non-pharmacologic therapies will be introduced to the extent relevant to the generalist pharmacists. At the conclusion of the course students will be expected to apply knowledge learned in the course in order to design and monitor a pharmacotherapeutic plan for specific patients and to appropriately counsel patients regarding proper use of the various psychiatric and neurologic medications covered in the course. prereq: All required PharmD year two coursework

PHAR 6776. Acute Patient Care Pharmacy. (3.4 cr.; A-F only; Every Spring)
Course prepares students to approach patients with multiple medical problems and the dynamic changes that patients can experience in the acute care settings. Students will then learn about the pharmacotherapy approach related to managing those disease states/conditions. Students will be expected to develop therapeutic plans for patient case scenarios at the onset of a hospital admission as well as additional problem that could present over the course of a hospitalization or result in readmission. Additional scenario problems will be incorporated into the cases as the course progresses and the cases and problems will become more complex. By the end of the course, students will have had an opportunity to address multiple medical problems and make pharmacotherapy decisions and will be evaluated based on those decisions. Knowledge gained in this course will prepare students for the APPE acute care/institutional rotation. prereq: successful completion of all 1st year, 2nd year, and fall 3rd year coursework

PHAR 6778. Pharmacy Law. (0.7 cr. [max 1 cr.]; A-F only; Every Spring)
The course covers both federal and state laws that impact and regulate the practice of pharmacy including federal regulation of medications, regulation of controlled substances, and the Minnesota Pharmacy Practice Act. The course will be offered entirely online.

PHAR 6780. Pharmacy Outcomes. (2.5 cr.; A-F only; Every Spring)
Course facilitates integration of knowledge of basic sciences, pharmacotherapy, pharmacy practice management, pharmaceutical care, written communication, literature evaluation, drug information retrieval, law and ethics, and pharmacoconomics to manage patients with multiple medical conditions. This course is where students are required to perform and demonstrate knowledge during curricular assessments. prereq: Phar 6700, 6702, 6704, 6706, 6708, 6710, 7310, 6716, 6718, 6720, 6722, 6724, 6726, 7325, 6732, 6734, 6736, 6738, 6740, 6742, 7330, 6748, 6750, 6752, 6754, 6756, 6758, 7340, 7345, 6770, 6774, 6768, 6762

PHAR 6782. Evidence Based Problem Analysis II. (0.8 cr. [max 1 cr.]; S-N only; Every Fall)
Third year PharmD students practice skills necessary to perform evidence based reviews and prepare written and verbal presentations of inquiries/ investigations to peers. prereq: Phar 6700, 6704, 6706, 6742

PHAR 6784. Integrated Oncology. (2.8 cr.; A-F only; Every Spring)
This course focuses on the etiology and molecular biology of tumorogenesis, medicinal agents, and pharmacology of anticancer agents, treatment of the most common cancers, supportive care of the patient with cancer, and social and ethical considerations of the treatment of the patient with cancer including end of life directives. prereq: PD3 in good academic standing, students will find it helpful to review the following topic areas: Principles of Biochemistry (Lipids [Structure/Function], Proteins [Folding/ Conformation]), Cellular Physiology Molecular Biology, Genetics (Cell Biology [signal transduction, DNA replication, transcription, protein translation, cell cycle, apoptosis], Immunology, Tumorogenesis, Angiogenesis, Genetics principles, Anatomy/Physiology [GI tract, pulmonary, hormone and feedback regulation])

PHAR 6786. Acute Patient Care Pharmacotherapy. (0.1 cr.; S-N only; Every Fall)
Students will practice applying content through patient cases and writing a patient care plan. This is a completely online course with weekly due dates offered each Summer term. For more information, contact phar6800@umn.edu or 612-624-7976.

PHAR 6799. Being a Pharmacist. (0.1 cr.; S-N only; Every Spring)
The Pharm.D. curriculum at the University of Minnesota is anchored by the basic, clinical, and social sciences relevant to the practice of pharmacy. This course serves as a culmination of academic and intellectual expression of the basic, clinical, and social pharmaceutical sciences and connects them to pharmacy practice. Future growth in knowledge and skill of our graduates/practitioners will predominantly occur through collegial exchange and conference-based learning environments. Being A Pharmacist will model how our students will continue to grow in knowledge and skill as they enter practice. In this course, students will be encouraged to think critically, reflect, and apply their skills.

PHAR 6800. Rehabilitation Pharmacotherapy. (2 cr.; A-F only; Every Summer)
The goal of this course is to equip physical therapy students with a general understanding of the impact of medications on rehabilitation and how rehabilitation affects medication use. Students will practice applying content through patient cases and writing a patient care plan. This is a completely online course with weekly due dates offered each Summer term. For more information, contact phar6800@umn.edu or 612-624-7976.

PHAR 6900. Curricular Studies for Internship and Pharmacy Employment. (1 cr. [max 4 cr.]; S-N only; Every Fall, Spring & Summer)
This course is designed for students pursuing an internship or pharmacy-related employment to receive course credit (typically for visa requirements). The course does NOT count toward elective credit requirements. If applicable, students must remain visa compliant and are solely responsible for doing so. The vast majority of the course is the hours a student spends at their internship/employment site. A written assignment is required at the end of the course. Students will meet once during the semester, which is arranged with instructors.

PHAR 6901. Pharmaceutical Care Experience. (1 cr.; S-N only; Every Spring)
The Pharmaceutical Care Experience builds on Foundations of Pharmaceutical Care and provides an early opportunity to practice pharmaceutical care in a primary care clinic setting. This elective will allow students to assess each patient’s unique medication experience and drug-related needs through patient interviews. Students will use this information to develop a patient-centered care plan under the guidance of a practitioner mentor. The pharmaceutical care process
will be applied and assessed in all future coursework, including, but not limited to, pharmacotherapy patient case work-ups, applied learning in the Pharmaceutical Care Learning Center, and during experiential education experiences.

PHAR 6902. Foundations for Integrative Mental Health and Psychiatric Practice. (2 cr.; A-F only; Every Fall)
This course is design to allow students to examine concepts, theories, and paradigms foundational to psychiatric/mental health practice and interprofessional integrative mental health care. Students develop clinical interviewing methods that elicit a client’s health narrative and facilitate the therapeutic relationship. Students also practice techniques that promote beginning skills important in reflective clinical practice. The course is primarily online, with 3 required 3-hr patient care simulations. There will be content posted on the course website for student learning. Activities and assessments include quizzes, patient scenario cases, reflective papers (upon re-watching the video of their interactions with the interprofessional teams and standardized patients during the simulation sessions), and individual and interprofessional group. Pharmacy students need to be PD3 students committed to earning the Interprofessional Mental Health Focus Area designation. We ask pharmacy students to commit to the entire series (fall and spring electives, and mental health APPE).

PHAR 6903. Assessment and Management of Psychiatric Disorders. (2 cr.; A-F only; Every Spring)
This course is design to allow students to apply advanced concepts from integrative mental health theory and research, social sciences, neuropsychology, and neuropsychiology in the differentiation and explanation of psychiatric symptoms and disorders across the age continuum.

PHAR 6906. Introduction to Pharmacy Research. (1 cr.; A-F only; Every Spring)
Overview of principles to research in particular area. Forum for scientists involved in research in particular area to discuss research, environment, careers with students. Prereq: consent of course director.

PHAR 6908. Drugs of Abuse. (2 cr.; S-N only; Spring Odd Year)
Basic medicinal chemistry of substances of abuse, associated paraphernalia. Prereq: Organic Chemistry I and Phar 6702

PHAR 6913. The Science and Spirit of Wellbeing. (1 cr.; A-F only; Every Spring)
Care, in general, and healthcare in particular, requires a certain degree of wellbeing on the part of the provider. This elective survey course introduces students to evidence based wellbeing. The course explores individual wellbeing as well as implications for practice and the health and wellbeing of others. prereq: instr consent

PHAR 6937. Foundations of Leadership. (2 cr.; A-F only; Every Fall & Spring)
Leadership development/its relation to advancing the profession of pharmacy. prereq: PDII or PDIII Pharmacy student

PHAR 6938. Developing Adaptive Leadership. (1 cr.; A-F only; Every Spring)
Directed Study: Developing Adaptive Leadership prereq: Pharm.D. student

PHAR 6939. Leading Change Experience I. (2 cr.; S-N only; Every Fall)
In collaboration with a faculty advisor, students implement a change that requires adaptive leadership. Work will focus on building a “short term win” and a team that can continue efforts into the future. Students will also gain experience in collecting and managing data to assist the change process (e.g., needs assessment and/or outcomes assessment). In addition, working with their faculty advisor, students will create and implement an individualized plan for their own personal leadership development. Students will also gain experience in supporting the leadership development of others. To support individualized development, a leadership networking partner (pharmacist) is assigned and periodic networking events and/or meetings are held. prereq: PHAR 6937 and 6938

PHAR 6940. Leading Change Experience II. (2 cr.; S-N only; Every Spring)
Continues leading change and development work initiated in Leading Change Experience I. During this term, students continue with their networking partners, present their leading change work, facilitate transition of the work to new leaders, conduct a critical appraisal of their leadership development, and support second year students as they initiate their projects. Students will also evolve their roles into shifting from personal development to the development of others. Assisting in a mentoring role in several capacities 1) transitioning new leaders into the leading change experience and 2) providing guidance, ideas and encouragement to those students interested in change initiatives. prereq: PHAR 6937 and 6938

PHAR 6941. Leadership Best Sellers for Pharmacists. (2 cr.; A-F only; Every Fall & Spring)
Part of the leadership track in pharmacy.

PHAR 6942. Leadership Capstone. (2 cr.; S-N only; Every Fall, Spring & Summer)
Supports completion of Leadership Emphasis Designation. Documentation/self-reflection of leadership learning experiences pursued inside/outside of classroom. Prerequisites: This course is for students who are in the fourth year of the Leadership Emphasis Area. Successful completion of Phar 6937, 6938, 6939 and 6940. Completion or concurrent enrollment in 6941 (Leadership Best Sellers).

PHAR 6961. Women’s Health. (2 cr.; A-F or Audit; Every Spring)
During this course, students will have the opportunity to actively learn and discuss women’s health issues taught in the core curriculum to a greater extent. The core curriculum focuses on the pharmacotherapy around women’s health, we will focus on the patient’s perspective, pathophysiology, and other quality care considerations specific to women including cultural, religious, psychosocial, and socioeconomic factors affecting health. Health topics will range from social issues to menstrual health, breast cancer to eating disorders, with a specific focus on preparing students for professional practice and the pharmacist’s role. prereq courses: Endocrinology pharmacotherapy sequence in the PD2 year; prereq topics: Contraceptive agents, emergency contraception, hormonal contraception.

PHAR 6962. Ethics in Pharmacy Practice. (2 cr.; A-F only; Every Spring)
Ethical principles, selected schools of ethical thought. Students discuss/debate ethical dilemmas in pharmacy practice/health care. prereq: Pharm.D. 3rd year student

PHAR 6964. Clinical Toxicology. (1 cr.; A-F only; Every Spring)
This course will cover the clinical signs/symptoms, general management and treatment of poisonings and toxicologic emergencies that are not covered in the main curriculum. It will also cover decontamination and laboratory principles associated with poisonings and toxicologic emergencies. This class will be comprised of lecture format presentations. Students will be given 1 hour to complete the final exam and midterm. prereqs: All students will have successfully completed the first year professional pharmacy program, as well as successfully completed fall semester of the second year. All students will have also successfully completed or be in the process of completing anatomy, physiology, pharmacology, and pharmacology. The student is responsible for this material to the extent necessary as a framework for toxicologic therapeutics. Thus, students are encouraged to review basic anatomy and physiology and specifically encouraged to review the section of the pharmacology textbook relevant to the classes of drugs covered.

PHAR 6966. Food Medicine: Contemporary Issues. (1 cr.; Student Option No Audit; Every Fall & Spring)
Food contributes to the prevention, and conversely, the development of disease processes. In order to better understand the interrelatedness of food and health, this course offers a critical perspective on how the ubiquity of food; race, class, gender; and indigeneity; colonization and corporatization affect people? food experiences; and subsequently, individual and population health. Students will examine modern food systems and describe implications for social determinants of health, health promotion, chronic disease management and IP collaborative practice. We will address questions such as: How do food systems impact our health? What makes food a political and environmental issue? Are we what we eat? Why do we categorize things that are not food as food? What is food sovereignty?

PHAR 6968. Critical Care. (1 cr. [max 2 cr.]; A-F only; Every Spring)
Critical Care is an elective that consists of two main components: a faculty/clinician presentation on an important topic to contemporary critical care practice, followed by a student evaluation and presentation on a selected primary literature topic that applies and integrates the presentation with current practice challenges. Key topics that are covered include discussion of the Surviving Sepsis Guidelines with discussion on the role of corticosteroids, identification and management of the anxious or delirious ICU patient, and application of the updated PAD guidelines, systems of the second 50-minutes a student (or pair of students) present the faculty-selected study using PowerPoint slides, and encourage group discussion of the paper’s merits and application to current critical care practice or future research. Challenges of critical care research are incorporated into the weekly discussions. prereq: Successful completion of P1, P2, and Fall of P3 professional pharmacy program. Interest in critical care pharmacy practice and/or clinical research.

PHAR 6970. Immunization Tour. (1 cr.; A-F or Audit; Every Fall) Role of health care practitioners. Population based disease prevention. Planning/delivering influenza vaccination clinics. Collaborative public health intervention. prereq: 6175, Completion of CPR

PHAR 6971. Geriatric Pharmacotherapy. (2 cr.; A-F only; Only Spring) Pharmacokinetic/pharmacodynamic changes and their implications in elders. Effects of drug-drug/disease interactions. Drug adherence barriers to provide optimum pharmacotherapy to elderly persons. prereq: 3rd or 4th year Pharmacy student

PHAR 7000. Early Pharmacy Practice Experience I. (1 cr.; A-F only; Every Fall) First in series of four courses. Focuses on patient perspective in managing/living with chronic conditions/chronic medication use. Community-based instruction, mentor program. prereq: Criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7002. Early Pharmacy Practice Experience II. (1 cr.; A-F only; Every Fall) Patient perspective in managing/living with chronic conditions/chronic medication use. Community-based instruction, mentor program. prereq: 7001, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7003. Early Pharmacy Practice Experience III. (0.5 cr.; A-F only; Every Fall) 3rd in series of four courses. Patient perspective in managing/living with chronic conditions/chronic medication use. Community-based instruction, mentoring. prereq: 7002 or instr consent, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7004. Early Pharmacy Practice Experience IV. (0.5 cr.; A-F only; Every Spring) Patient perspective in managing/living with chronic conditions/chronic medication use. Community-based instruction, mentoring. Upcoming patient care opportunities. prereq: 7003 or inst consent, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7005. Introductory Community-Practice Pharmacy Experience. (2.5 cr.; S-N only; Every Spring) Experience in patient care at community practice setting. Three weeks. 40 hrs/week. prereq: 6111, 6171, 7001, 1st year pharmacy student

PHAR 7006. Introductory Institutional-Pharmacy Practice Experience. (2.5 cr.; S-N only; Every Spring) Experience in patient care in hospital setting. Three-week, 40 hours/week. prereq: College of Pharmacy student, 6121, 6122, 6131, 6132, 6173, 6174, 7003 and 7004 with passing grade, registered with Minnesota Board of Pharmacy as intern

PHAR 7010. APPE Continuing Professional Development Portfolio. (1.5 cr.; S-N only; Every Spring) Continuing professional development. Systematic maintenance, development, and broadening of knowledge, skills, and attitudes. Students self-assess performance/learning needs and create/follow/evaluate a learning plan. Documentation for peer review/support, regulatory review. prereq: 3rd yr pharmacy student

PHAR 7128. Acute Patient Care Practice Experience II. (4 cr.; A-F only; Every Fall, Spring & Summer) Experience in an inpatient setting. Students responsible for all drug-related needs of individual patients. Full-time for five weeks. prereq: Pharm.D. I-III, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7213. Elective Practice Experience III. (4 cr.; A-F only; Every Fall, Spring & Summer) Experience in inpatient or outpatient pharmacy practices where direct patient contact/ care occurs for 5 weeks, or experience in non-patient care setting. Sites vary widely from governmental agencies to pharmacy associations to specialized practices for 5 weeks. prereq: Pharm.D. I-III, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7228. Infectious Disease. (3 cr.; S-N only; Every Summer) Experience in inpatient or outpatient pharmacy practice where direct patient contact/ care occurs for 5 weeks, or experience in non-patient care setting. Sits vary widely from governmental agencies to pharmacy associations to specialized practices for 5 weeks. prereq: Pharm.D. I-III, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7310. Introduction to Community Health and Interprofessional Engagement. (1 cr.; S-N only; Every Fall) Course builds on content learned in Becoming a Pharmacist to provide opportunities for broadening of knowledge, skills, and attitudes required of competent, caring general pharmacist practitioners. Content is integrated with concurrent first year didactic courses and prepares students for Pre-APPE. prereq: Successful completion of Becoming a Pharmacist (BaP)

PHAR 7325. Introductory Community-Practice Pharmacy Experience. (3 cr.; S-N only; Every Summer) The purpose of the Community IPPE is to introduce you to the fundamentals of pharmacy practice and developing professional attitude and behavior in the community pharmacy setting. The course will build upon knowledge gained in the first year didactic curriculum, specifically Foundations of SAPh and Foundations of Pharmaceutical Care. The format of the IPPE course includes: in person, online, and an experiential component. The experiential component is a combination of observation, application of current knowledge, and feedback and assessment between you, the preceptor, and others. prereq: College of Pharmacy students must complete PHAR 6700 (Becoming a Pharmacist), 6706 (Foundations in Pharmaceutical Care), 6716 (Applied Pharmaceutical Care), 6728 (Pharmaceutical Calculations), 6710 (Pharmaceutical Care Skills Lab 1), 6720 (Pharmaceutical Care Skills lab 2), 6704 (foundations of SAPh), 6730 (first year seminar), 6718 (drug delivery), 6722 (med chem), 6726 (pharmacology) with a passing grade. You must be registered with the Minnesota Board of Pharmacy as an intern prior to the onsite experiential component of this course.

PHAR 7330. Community Teachers I. (0.4 cr.; S-N only; Every Fall) EpHECT is a service learning experience which pairs second year students with a volunteer Community Teacher (CT). Students develop a working/professional relationship with their CT and learn from CT's health and life experiences. Students will work with their CT to choose and complete activities unique...
to each CT's health profile. CTs benefit by gaining better understanding of their health by discussing and evaluating their health profile with professional students. CTs will also better understand the pharmacist's role in healthcare.

prereq: Students must have completed or be currently enrolled in the following courses:

- Becoming a Pharmacist, Foundations of Pharmaceutical Care, Applied Pharmaceutical Care, Pharmaceutical Skills Lab I and II

PHAR 7340. Community Teacher Experience II. (0.4 cr.; S-N only; Every Spring)

EPheCT is a service learning experience which pairs second year students with a volunteer Community Teacher (CT). Through this course students develop a working/professional relationship with their CT and learn from their CT's health and life experiences. Students will work with their CT to choose and complete activities unique to each CT's health profile.

prereq: Students must have completed or be currently enrolled in the following courses:

- Becoming a Pharmacist, Foundations of Pharmaceutical Care, Applied Pharmaceutical Care, Pharmaceutical Skills Lab I, II, and III,
- EPheCT I, and Foundations of SAPh

PHAR 7345. Introductory Institutional-Practice Pharmacy Experience. (3 cr.; S-N only; Every Summer)

The purpose of the Institutional IPPE is to introduce students to the fundamentals of pharmacy practice in the institutional pharmacy setting. The course will build upon knowledge gained in the first two years of the didactic curriculum. The student will spend 120 hours at the institutional site with their preceptor (who is approved by the MN BOP) and the College. An Additional 36 hours is allocated between assignments and online course materials. prereq: Students must have successfully completed Pharm 7325 (Community IPPE), Pharm 6730 (Professional Development I), Pharm 6736 (Cardiovascular Pharmacotherapy), Pharm 6738 (Pharmacokinetics), Pharm 6740 (Pharmaceutical Care Skills III), Pharm 6742 (Colloquium I: Scholarly Presentation Skills). Students must be enrolled concurrently in PD2 Spring semester courses. Students must also be registered intern in the state of Minnesota.

PHAR 7401. Acute Patient Care Practice Experience. (12 cr.; S-N only; Every Fall, Spring & Summer)

Experience in an inpatient setting. Students responsible for all drug-related needs of individual patients. Full-time for twelve weeks. prereq: Pharm.D. I-II, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7411. Ambulatory Patient Care Practice Experience I. (5 cr.; S-N only; Every Fall, Spring & Summer)

Experience in an ambulatory setting. Students responsible for drug-related needs of individual patients. Full-time for five weeks.

prereq: Pharm.D. IV, MN Board of Pharmacy intern, criminal background check, BLS CPR

PHAR 7412. Ambulatory Care 2. (5 cr.; S-N only; Every Fall, Spring & Summer)

Experience in an ambulatory setting. Students responsible for drug-related needs of individual patients. Full-time for five weeks.

prereq: Pharm.D. IV, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7413. Community Pharmacy Practice Experience. (5 cr.; S-N only; Every Fall, Spring & Summer)

Students assigned to participating community pharmacies. Community practice activities full-time for 5 weeks. prereq: Pharm.D. IV, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7421. Elective Practice Experience I. (5 cr.; S-N only; Every Fall, Spring & Summer)

Experience in inpatient or outpatient pharmacy practices where direct patient contact/ care occurs for five weeks, or experience in non-patient care setting. Sites vary from governmental agencies to pharmacy associations to specialized practices for five weeks.

prereq: Pharm.D. I-III, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7422. Elective Practice Experience II. (5 cr.; S-N only; Every Fall, Spring & Summer)

Experience in inpatient or outpatient pharmacy practices where direct patient contact/ care occurs for five weeks, or experience in non-patient care setting. Sites vary from governmental agencies to pharmacy associations to specialized practices for five weeks.

prereq: Pharm.D. I-III, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, negative Mantoux test (or explanation of positive test), chicken pox immunity

PHAR 7433. Elective Experience 3. (5 cr.; S-N only; Every Fall, Spring & Summer)

Patient care experience in any setting.

Students responsible for drug-related needs of individual patients. Full-time for five weeks.

prereq: Pharm.D. I-III, MN Board of Pharmacy intern, criminal background check, BLS CPR certification, proof of negative Mantoux test [or explanation of positive test], proof of chicken pox immunity

PHIL 5010. Ancient Philosophers. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)

Major work of selected ancient philosophers (e.g., Plato's Parmenides, Plato's Sophist, Aristotle's Metaphysics). Works discussed vary. prereq: 3001 or instr consent

PHIL 5040. Rationalists. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)

Major work of selected early modern rationalists (e.g., Descartes' Principles of Philosophy, Spinoza's Ethics, Conway's Principles of the Most Ancient and Modern Philosophy, Leibniz's Discourse on Metaphysics). Works discussed may vary from offering to offering.

PHIL 5085. Wittgenstein. (3 cr.; Student Option; Periodic Fall & Spring)

In "Philosophical Investigations" Wittgenstein challenged some of the most long-standing and entrenched intuitions of philosophers -- basic intuitions about mind, rationality, linguistic understanding, and the very nature of philosophical/conceptual inquiry. Many of these intuitions remain entrenched, and Wittgenstein's challenge is as relevant today as it was in 1950. In Phil 4805 we examine the text and the secondary literature, and do so in the light of issues and debates that continue to demand attention.

PHIL 5101. Metaphysics. (3 cr.; Student Option; Fall Even Year)

Broadly speaking, metaphysics is the study of the nature of reality. Metaphysical questions include questions about what kinds of things exist, what is the nature of things, what are persons, what is possible or impossible, what is the nature of time, what is causality, and many other fundamental questions about the world. The aim of this course is to introduce students to some of the central questions of metaphysics to investigate some of their answers. prereq: One course in history of philosophy or instr consent

PHIL 5201. Symbolic Logic I. (4 cr.; Student Option; Every Fall & Spring)

Study of syntax and semantics of sentential and first-order logic. Symbolization of natural-language sentences and arguments. Development of deductive systems for first-order logic. Metatheoretic proofs and methods, including proof by mathematical induction and proof of consistency and completeness. prereq: 1001 or instr consent

PHIL 5202. Symbolic Logic II. (4 cr.; Student Option; Every Spring)
Elements of set theory, including the concepts of enumerability and nonenumerability. Turing machines and recursive functions; the results of Church, Godel, and Tarski and the philosophical significance of those results. prereq: 5201 or instr consent

PHIL 5211. Modal Logic. (4 cr.; Student Option; Spring Odd Year) Axiomatic and semantic treatment of propositional and predicate modal logics; problems of interpreting modal languages. prereq: 5201 or instr consent

PHIL 5221. Philosophy of Logic. (3 cr.; Student Option; Periodic Fall) Attempts to answer, “What is logic?” Scope of logic. Disputes about alternative logics. Theories concerning logical truth (e.g., conventionalism: view that logical truths are contingent). prereq: 5202 or instr consent

PHIL 5222. Philosophy of Mathematics. (3 cr.; Student Option; Periodic Fall & Spring) Major philosophical questions arising in connection with mathematics. What is mathematics about? How do we know the mathematics we do? What is the relation between mathematics and the natural sciences? Selected readings of leading contributors such as Frege, Dedekind, Russell, Hilbert, Brouwer, Godel, Quine. prereq: College level logic or mathematics course or instr consent

PHIL 5320. Intensive Study of a Historical Moral Theory. (3 cr.; Student Option; Periodic Fall & Spring) Intensive consideration of an author or theory in the history of moral or political philosophy. prereq: 1003 or instr consent

PHIL 5326. Lives Worth Living: Questions of Self, Vocation, and Community. (4 cr.; Student Option; Every Summer) Immersion experience. Students live together as a residential community of learners. Works of philosophy, history, and literature form backdrop for exploring such questions as “How is identity constructed?” “What is vocation?”, and “What experiences of community are desirable in a life?” Each student creates a life-hypothesis for a life worth living. prereq: instr consent

PHIL 5350. Catching Lives Worth Living: Participation in the Growth of a Living-Learning Community. (1-3 cr. max 6 cr.; Student Option; Every Summer) Involvement in a democratic living-learning community built by students/instructors. Students participate in community activities and daily instructor meetings. Four seven-day offerings each summer. prereq: Application, instr consent

PHIL 5415. Philosophy of Law. (3 cr.; Student Option; Periodic Spring) Analytical accounts of law and legal obligation. prereq: 1003 or 1004 or 3302 or social science major or instr consent

PHIL 5510. Philosophy of the Individual Arts. (3 cr.; Student Option; Periodic Fall & Spring) Aesthetic problems that arise in studying or practicing an art. prereq: 3502

PHIL 5601. History of the Philosophy of Science. (3 cr.; Student Option; Periodic Fall & Spring) History of logical empiricism, from its European origins in first half of 20th century to its emergence as nearly universal account of science in post-war Anglo-American philosophy. prereq: instr consent

PHIL 5602. Scientific Representation and Explanation. (3 cr.; Student Option; Periodic Fall) Contemporary issues concerning representation and explanation of scientific facts. prereq: instr consent

PHIL 5603. Scientific Inquiry. (3 cr.; Student Option; Periodic Spring) Philosophical theories of methods for evaluating scientific hypotheses. Role of experimentation in science. How hypotheses are accepted within scientific community.

PHIL 5605. Space and Time. (3 cr.; Student Option; Periodic Fall) Philosophical problems concerning nature/structure of space, time, and space-time. prereq: Courses in [philosophy or physics] or instr consent

PHIL 5606. Philosophy of Quantum Mechanics. (3 cr.; Student Option; ) Problems of interpretation in ordinary (nonrelativistic) quantum mechanics. Two-slit experiment, Schrodinger cat paradox (measurement problem), Einstein-Podolsky-Rosen paradox. Leading approaches to interpretation (Copenhagen, hidden variables, universal wave function) and their connections with philosophical issues.

PHIL 5760. Selected Topics in Philosophy. (3 cr. max 9 cr.; Student Option; Periodic Fall & Spring) Philosophical problems of contemporary interest. Topics specified in Class Schedule. prereq: 3xxx-5xxx course in phil or instr consent

PHIL 5993. Directed Studies. (1-3 cr. max 6 cr.; Student Option; Every Fall, Spring & Summer) Guided individual reading or study. prereq: instr consent, dept consent, college consent

PHIL 6010. Workshop in History of Philosophy. (1 cr. max 4 cr.; Student Option; Every Fall & Spring) Topics vary by offering. prereq: concurrent registration is required (or allowed) in 4xxx hist of phil course, instr consent

PHIL 6080. Seminar: History of Ancient and Medieval Philosophy. (3 cr. max 6 cr.; Student Option; Every Fall & Spring) Topics vary by offering. prereq: instr consent

PHIL 6081. Seminar: History of Philosophy--Ancient Philosophers. (3 cr.; Student Option; ) Major developments in ancient Greek philosophic thought; methods and role of history of philosophy in discipline of philosophy.

PHIL 8085. Seminar: History of Philosophy--Modern Philosophers. (3 cr.; Student Option; Periodic Fall) Major developments in modern philosophic thought; methods and role of history of philosophy in discipline of philosophy. prereq: instr consent

PHIL 8090. Seminar: History of Modern Philosophy. (3 cr. max 6 cr.; Student Option; Every Fall & Spring) Topics vary by offering. prereq: concurrent registration is required (or allowed) in 4xxx [epistemology or metaphysics] course, instr consent

PHIL 8100. Workshop in Epistemology and Metaphysics. (1 cr. max 4 cr.; Student Option; Every Fall & Spring) Topics vary by offering. prereq: 4101 or instr consent

PHIL 8130. Seminar: Epistemology. (3 cr. max 6 cr.; Student Option; Every Fall & Spring) Problems in the theory of knowledge. Topics specified in [Class Schedule]. prereq: 4105 or instr consent

PHIL 8131. Epistemology Survey. (3 cr.; Student Option; ) Survey, against background of traditional issues, of contemporary developments in theory of knowledge.

PHIL 8133. Feminist Theories of Knowledge. (3 cr.; Student Option; ) Interdisciplinary seminar; feminist approaches to knowledge and criticism of paradigms of knowledge operative in the disciplines. Feminists’ use of concepts of subjectivity, objectivity, and intersubjectivity; feminist empiricism, standpoint theory, and contextualism, and postmodern and postcolonial theorizing.

PHIL 8180. Seminar: Philosophy of Language. (3 cr. max 6 cr.; Student Option; Every Fall) Topics vary by offering. prereq: 4231 or instr consent

PHIL 8182. Formal Semantics of Natural Language. (3 cr.; A-F or Audit; Periodic Fall) Truth-conditional model-theoretic semantics applied to treatment of opacity, intensionality, quantification, and related phenomena in natural language. prereq: Phil 5201 or instr consent

PHIL 8200. Workshop in Logic and Philosophy of Mathematics. (1 cr. max 4 cr.; Student Option; Periodic Fall & Spring) Topics vary by offering. prereq: concurrent registration is required (or allowed) in 4xxx logic or 4xxx phil of math, instr consent

PHIL 8210. Seminar: Logical Theory. (3 cr. max 6 cr.; Student Option; Every Fall & Spring) Topics vary by offering. prereq: [5201, 5205] or instr consent
PHIL 8220. Seminar: Philosophy of Mathematics. (3 cr. [max 6 cr.]; Student Option; Every Fall & Spring)
Topics such as significance of limitative metatheorems (Goedel, et al), assessment of major foundational programs (set theoretic, modern Hilbertian, constructivist), modal/structuralist alternatives to standard platonism. prereq: 5202 or [4xxx or 5xxx] math course or instr consent

PHIL 8300. Workshop in Moral and Political Philosophy. (1 cr. [max 4 cr.]; Student Option; Every Fall & Spring)
Topics vary by offering. prereq: concurrent registration is required (or allowed) in 4xxx moral phil or 4xxx pol phil instr consent

PHIL 8310. Seminar: Moral Philosophy. (3 cr. [max 9 cr.]; Student Option; Every Fall & Spring)
Concepts/problems relating to ethical discourse. prereq: 4310 or 4320 or 4330 or instr consent

PHIL 8320. Seminar on Medical Ethics. (3 cr. [max 6 cr.]; Student Option; Periodic Spring)
Patients’ rights/duties, informed consent, confidentiality, ethical issues in medical research, initiation/termination of medical treatment, euthanasia, abortion, maternal/fetal conflicts, allocation of medical resources. prereq: [4xxx or 5xxx] ethics course or instr consent

PHIL 8333. FTE: Master’s. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master’s student, adviser and DGS consent

PHIL 8410. Seminar: Philosophy of Law. (3 cr. [max 6 cr.]; Student Option; Every Fall & Spring)
Primarily for law students and advanced political science, history, or sociology majors or minors. prereq: 5415 or instr consent

PHIL 8420. Seminar: Political Philosophy. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)
Topics vary by offering. prereq: 4321 or 4414 or instr consent

PHIL 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

PHIL 8500. Workshop in Aesthetics. (1 cr. [max 4 cr.]; Student Option; Every Fall & Spring)
Topics vary by offering. prereq: concurrent registration is required (or allowed) in 4xxx aesthetics course, instr consent

PHIL 8510. Seminar: Aesthetics Studies. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)
Topics vary by offering.

PHIL 8550. Seminar: Philosophy of Religion. (3 cr. [max 6 cr.]; Student Option; Every Fall & Spring)
Topics vary by offering. prereq: 4521 or instr consent

PHIL 8600. Workshop in the Philosophy of Science. (1 cr. [max 4 cr.]; Student Option; Every Fall & Spring)
Topics vary by offering. prereq: concurrent registration is required (or allowed) in 4xxx phil sci course, instr consent

PHIL 8602. Scientific Representation and Explanation. (3 cr.; Student Option; Periodic Fall & Spring)
Contemporary issues concerning representation and explanation of scientific facts.

PHIL 8606. Seminar: Philosophy of Medicine and the Biomedical Sciences. (3 cr.; Student Option; Every Fall & Spring)
Aims and goals of medicine; concepts of health, illness, and disease; nature of reasoning in clinical medicine; theoretical evolution in medicine; and role of values in practice of medicine and healthcare.

PHIL 8610. Seminar: History of Modern Physical Sciences. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)
Topics specified in [Class Schedule]. prereq: instr consent

PHIL 8620. Seminar: Philosophy of the Biological Sciences. (3 cr. [max 6 cr.]; Student Option; Every Fall)
Topics vary by offering.

PHIL 8640. Seminar: Philosophy of the Cognitive Sciences. (3 cr. [max 6 cr.]; Student Option; Spring Odd Year)
Philosophical framework for analyzing cognitive sciences. Recent developments in metaphysics/epistemology. Nature of scientific theories, methodologies of cognitive sciences, relations among cognitive sciences. Relation of cognitive science to epistemology and to various philosophical problems. Topics vary by offering. prereq: instr consent

PHIL 8660. Seminar: Social and Cultural Studies of Science. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)
Review of recent work; analysis of theoretical and methodological differences among practitioners; selected responses from historians and philosophers of science.

PHIL 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer)
TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

PHIL 8670. Seminar: Philosophy of Science. (3 cr. [max 6 cr.]; Student Option; Every Fall & Spring)
Topics vary by offering. prereq: instr consent

PHIL 8710. Seminar: Feminist Philosophy. (3 cr. [max 6 cr.]; Student Option; Periodic Fall)
Topics vary by offering. prereq: 4622 or 5622 or WoSt 4122 or WoSt 5122 or instr consent

PHIL 8777. Thesis Credits: Master’s. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PHIL 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

PHIL 8993. Directed Study. (1-3 cr. [max 6 cr.]; Student Option; Every Fall, Spring & Summer)
tbd prereq: instr consent

PHIL 8994. Directed Research. (1-3 cr. [max 6 cr.]; Student Option; Every Fall & Spring)
tbd prereq: instr consent

Physical Med & Rehabilitation (PMED)

PMED 6000. Special Topics for the Transitional DPT: Musculoskeletal. (2-8 cr.; A-F or Audit; Periodic Fall)
Selected pathology, assessment, and rehabilitation of musculoskeletal conditions. Industrial consultation, post fracture management, imaging, surgical options for selected conditions of spine/extremities. Required musculoskeletal case study from clinical internships. prereq: Enrolled in Physical Therapy MS program

PMED 7410. Rehabilitation Medicine for Adults. (4 cr.; H-N only; Every Fall, Spring & Summer)
The student learns to evaluate a patient with chronic illness and/or a disability and then helps plan a rehabilitation team’s problem-oriented approach to total patient management. Medical student responsibility includes inpatient work-ups and management as well as the opportunity to participate in a variety of specialty clinics.

PMED 7412. Rehabilitation Medicine for Adults: Orthopedics, Neurology. (4 cr.; H-N only; Every Fall, Spring & Summer)
This course is designed for students who are interested in pursuing residency in Physical Medicine and Rehabilitation, Orthopedics, Neurology. Student-physicians will be responsible for inpatient work-ups and management as well as having the opportunity to participate in a variety of specialty clinics (EMG and Botox, traumatic brain injury, spinal cord injury, amputee, musculoskeletal pain, cardiac rehab) and inpatient consults.

PMED 7415. Physical Medicine and Rehabilitation for the Generalist. (4-6 cr.; H-N or Audit; Every Fall, Spring & Summer)
evaluated by faculty based on participation, clinical skills, attitude. Case presentation, participation in weekly conferences.

**PMED 7416. Pediatric Rehabilitation Medicine.** (2 cr.; H-N only; Every Fall, Spring & Summer) Student works on inpatient service, outpatient clinics working with pediatric patients with traumatic brain injury, cerebral palsy, ventilatory dependent children, spinal cord injury, and developmental disabilities.

**PMED 7417. Research in Physical Medicine and Rehabilitation.** (6 cr.; H-N or Audit; Every Fall) This elective provides an opportunity for the interested student to pursue a clinical or laboratory problem related to physical medicine and rehabilitation.

**PMED 7418. Rehabilitation Medicine: Trauma Rehab, Med-Spine.** (4 cr.; H-N only; Every Fall, Spring & Summer) Adult rehabilitation management emphasizing traumatic brain injury, major multiple trauma, acute and chronic burns, musculoskeletal ultrasound, stroke, ALS, and EMG.

**PMED 7420. Rehabilitation Medicine Research.** (2-8 cr. [max 16 cr.]; H-N only; Every Fall, Spring & Summer) PM&R is an underrepresented field in terms of academic contribution to clinical research.

**PMED 7910. Physical Medicine and Rehabilitation Medical Residency.** (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer) Physical medicine and rehabilitation medical residency.

**PMED 7930. Physical Medicine and Rehabilitation Medical Fellowship.** (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer) Physical medicine and rehabilitation medical fellowship.

**PMED 8200. Physical Medicine and Rehabilitation Service.** (1-15 cr.; Student Option; Every Fall, Spring & Summer) N/A prereq: enrolled in PMed residency training program

**PMED 8207. Basic and Applied Psychiatry.** (1 cr.; Student Option; Every Fall, Spring & Summer) N/A prereq: enrolled in PMed residency training program

**PMED 8210. Research in Physical Medicine.** (1-15 cr.; Student Option; Every Fall & Spring) N/A prereq: enrolled in PMed residency training program

**PMED 8212. Electromyography.** (1-15 cr.; Student Option; Every Fall, Spring & Summer) N/A prereq: enrolled in PMed residency training program

**PMED 8214. Readings in Electromyography.** (1-3 cr.; Student Option; Every Fall, Spring & Summer) N/A prereq: enrolled in PMed residency training program

**PMED 8220. Seminar: Physical Medicine and Rehabilitation.** (1-15 cr.; Student Option; Every Fall, Spring & Summer) TBD prereq: enrolled in PMed residency training program

### Physical Therapy (PT)

**PT 6002. Ethics in Public Health: Research and Policy.** (1 cr. [max 2 cr.]; S-N or Audit; Every Fall) Moral/ethical analysis. Issues in physical therapy research/practice. Ethical decisions in a practice and in professional training. WebCT lectures, in-class discussions/instruction, exams.

**PT 6058. Anatomy for Physical Therapy.** (6 cr.; A-F or Audit; Every Summer) Study of gross human anatomy, and surface anatomy, for practice of physical therapy. Cadaver dissection of extremities, head, neck, back, abdomen, thoracic, and pelvic regions. Correlation to clinical conditions. Lecture, laboratory.

**PT 6213. Clerkship I.** (2 cr.; A-F or Audit; Every Fall) Practical aspects of clinical education and professional behavior. Psychological, sociological, and cultural needs of diverse patient populations. Students complete a three hrs/week clinical affiliation at University Good Samaritan Center. Patient/therapist observations, concurrent didactic coursework. Facilitation of group exercise, restorative ambulation, range of motion programs, and resident assessment instrument. prereq: Registered PT student

**PT 6214. Clerkship II.** (2 cr.; A-F or Audit; Every Spring) Documentation of physical therapy exams, progress, discharge services. Regulatory agencies responsible for outcomes/accreditation, third party reimbursement, coding, peer review. Complete three hrs/wk clinical affiliation at Good Samaritan Center under supervision of clinical faculty. Observations/documentation, group exercise, restorative ambulation, range of motion programs, resident assessment instrument. prereq: Registered first year PT student

**PT 6215. Clerkship III.** (1 cr. [max 2 cr.]; A-F or Audit; Every Fall) Roles of physical therapist, in orthopedic outpatient setting, as educator and promoter of health/wellness. Students are assigned to a community outpatient orthopedic clinic. Patient evaluations/treatment. Instructing patients, therapists, student physical therapists, and community members to promote physical therapy, health, and wellness. Students assess, prepare, and provide educational experiences. prereq: Registered PT student

**PT 6216. Clerkship IV.** (1 cr.; A-F or Audit; Periodic Spring) Role of physical therapist, in acute care or rehabilitation setting, as clinical educator of physical therapy students. Students are assigned to a local hospital or rehabilitation facility. Patient evaluations, treatment, discharge planning. Students prepare for full time clinical experiences and for their role as potential clinical instructors. prereq: Registered 2nd yr PT student

**PT 6217. Clerkship V.** (2 cr.; A-F or Audit; Periodic Fall) Second-year clerkship. Role of physical therapist in acute care or rehabilitation setting. Students observe/participate in patient evaluation, treatment/discharge planning, client consultation, and community service evaluation/planning. Sites are selected in conjunction with CUPEs. Students keep journal, shared with site supervisor and academic coordinator. prereq: Registered 2nd-year PT student

**PT 6219. Foundations in Interprofessional Communication and Collaboration.** (1 cr.; S-N only; Every Fall) Foundations of Interprofessional Communication & Collaboration (FIPCC) is the first interprofessional course in Phase I of the 1Health curriculum. More than 1,000 health and health care students from allied health, dentistry, dietetics, health coaching, medicine, nursing, pharmacy, physical therapy, public health, social work, speech-language-hearing sciences, and veterinary medicine will be enrolled in this course. The course will be delivered to interprofessional groups of approximately 30-35 students in each room.

**PT 6220. Clinic Volunteer.** (1 cr. [max 6 cr.]; No Grade Associated; Every Fall, Spring & Summer) Functioning evening clinics supervised by licensed physical therapists. Students perform physical therapy exams, provide treatment various conditions, under supervision of a licensed physical therapy clinical instructor.

**PT 6221. Therapeutic Procedures.** (4 cr.; A-F or Audit; Every Spring & Summer) Theory/application of physical agents and therapeutic techniques. Therapeutic massage, ultraviolet radiation, thermotherapy, hydrotherapy, positive pressure devices, transcutaneous electrical nerve stimulation, neuromuscular electrical stimulation, biofeedback, iontophoresis, high volt pulsed current, prereq: Registered PT student

**PT 6231. Clinical Biomechanics.** (5 cr.; A-F or Audit; Periodic Fall) Principles of biomechanics. Forces/structures internal/external to body responsible for normal human movement. Muscle, joint, and tissue mechanics. Joint-specific normal function, whole body posture, gait mechanics. Focuses on normal mechanics as foundation for abnormal mechanics and pathology. Lecture, laboratory. prereq: Intro calculus, physics, registered PT student

**PT 6250. Acute Care in Physical Therapy.** (2 cr.; A-F only; Every Summer) General care of acute and critically ill patient. Disease/disorders common to acute care environment. Integration of evaluation, treatment, and client management skills. prereq: Registered physical therapy student
PT 6251. Integument. (2 cr.; A-F or Audit; Every Summer)
Response of integument to injury, disease, and aging. Emphasizes wound management, burn care, amputee care, and rehabilitation of persons with acute/chronic integument disorders. Integrating elements of physiology, pathophysiology, and therapeutic procedures to evaluate, treat, and manage clients. prereq: Registered PT student

PT 6252. Pathophysiology. (3 cr.; A-F only; Every Summer)
General and organ system pathology. Complicating pathological factors that affect patients. Implications of pathology on patient's clinical presentation. prereq: Enrolled PT student

PT 6280. Clinical Assessment. (4 cr.; A-F or Audit; Periodic Fall)
Clinical assessment techniques of goniometry, manual muscle testing, range of motion, gait analysis, physical/sensory examination, and anthropometrics. Basic intervention approaches, including stretching techniques and resistive exercise. Weekly integration assignments with first clinical clerkship. Lecture, discussion, lab. prereq: Registered PT student

PT 6281. Scientific Foundations I: Theory of Therapeutic Exercise. (3 cr.; A-F or Audit; Every Fall)
Principles of skeletal muscle physiology as basis for therapeutic exercise. Exercise physiology and related microanatomy of musculoskeletal system as they relate to rehabilitation problems. Tissue response to treatment for loss of mobility. Endurance/ strength training. prereq: Registered PT student

PT 6282. Scientific Foundations II: Neuromotor Control. (3 cr. [max 45 cr.]; A-F or Audit; Every Spring)
Principles of neurophysiology, neurology, motor control, and motor learning as basis for therapeutic intervention in motor dysfunction. Practical application of kinesiologic electromyography and nerve conduction. prereq: Registered PT student

PT 6283. Musculoskeletal I. (7 cr.; A-F or Audit; Every Fall & Spring)
First of two-course sequence. Problem-solving approach to evaluating, treating, and preventing selected musculoskeletal conditions across the life span. Chart review, history taking, strength testing, functional testing, gait and posture examination, special orthopedic tests. Therapeutic exercises, orthopedic ambulation, joint mobilization, splinting, patient education. prereq: enrolled PT student

PT 6284. Musculoskeletal Rehabilitation II. (4 cr.; A-F or Audit; Periodic Fall)
Second of two-course sequence. Problem-solving approach to evaluating, treating, and preventing selected musculoskeletal conditions across life span. Practice evaluations, clinic visits, case examples. Integrates diagnostic procedures, medical/surgical management, and tissue response to injury/intervention for selected orthopedic conditions. Screening for recognition of non-musculoskeletal causes of complaints. prereq: Regis PT student

PT 6287. Neurorehabilitation. (8 cr.; A-F or Audit; Every Spring)
Assessment/rehabilitation of patients with neurological conditions (e.g., cerebral vascular disease traumatic brain injury, multiple sclerosis, Parkinson's disease, amyotrophic lateral sclerosis). Using treatment procedures, orthotics, and equipment to improve function and prevent, stabilize, or decrease impairments. prereq: Regis PT student

PT 6288. Pediatric Rehabilitation. (8 cr.; A-F or Audit; Every Spring)
Pediatric assessment/rehabilitation for neurological, orthopedic, cardiac, prematurity, transplant, and behavioral conditions. Preparation for adult assessment/treatment with neurological, general medical, and vascular disease. Students use etiologic knowledge to assess patients in clinic and establish treatment plans/goals. prereq: Registered PT student

PT 6290. Administration. (4 cr.; A-F or Audit; Periodic Fall)
Learning experiences, special assignments related to physical therapy administration, management, supervision, consultation, private practice, and health care issues. Foundations for regulatory compliance and fiscal responsibility. Interpersonal skills for delivery of direct care service. prereq: Regis PT student

PT 6293. Essentials of Rehabilitation Research. (4 cr.; A-F or Audit; Every Fall)
Predictive research, statistical concepts, scientific literature. Tools to design experiments and analyze data. Risk analysis, multivariate regression analysis. Designs of reliability studies, traditional group designs. Students give preliminary presentation of analysis. prereq: Registered 2nd yr PT student

PT 6295. Clinical Internship I. (10 cr. [max 30 cr.]; S-N or Audit; Every Fall, Spring & Summer)

PT 6296. Clinical Internship II. (10 cr.; S-N only; Every Fall, Spring & Summer)
Second of four courses. Students must demonstrate proficiency in communication, team participation, evaluation and treatment, predicting outcomes, and managing patient diagnoses and problems. Selected specialty area of physical therapy practice.

PT 6297. Clinical Internship III. (10 cr.; S-N only; Every Fall, Spring & Summer)
Third of four courses. Students must demonstrate proficiency in communication, team participation, evaluation and treatment, predicting outcomes, and managing patient diagnoses and problems. Selected specialty area of physical therapy practice. prereq: Registered PT student

PT 6298. Clinical Internship IV. (10 cr.; S-N only; Every Fall, Spring & Summer)
Fourth of four courses. Students must demonstrate proficiency in communication, team participation, evaluation and treatment, predicting outcomes, and managing patient diagnoses and problems. Selected specialty area of physical therapy practice.

PT 6310. Physiology for Physical Rehabilitation. (5 cr. [max 10 cr.]; A-F only; Every Spring)
This course is designed to convey foundational information regarding human basic physiology and more advanced integrative physiology to provide the physical therapist a broad range of knowledge on how the human body works at rest, exercise, and as we age.

PT 6340. Human Growth and Development. (3 cr.; A-F or Audit; Every Fall)
Developmental process throughout life span. Physical, motor, social, and personality development. Theories of development. Factors that influence a child's development. prereq: Registered PT student

PT 6400. Health Activism. (1 cr.; No Grade Associated; Every Fall; Spring & Summer)
Joint Medical School-School of Public Health course. Series of skill-building workshops. Hands-on community project completed by small group of public health and medical students in cooperation with a community organization and a faculty mentor. Projects focus on issues of health disparities, environmental justice, and access to care. prereq: Enrolled DPT student

PT 6813. Cardiopulmonary Physical Therapy. (3 cr.; A-F or Audit; Every Fall, Spring & Summer)
Theory and techniques of cardiopulmonary evaluation and treatment. Principles of exercise response and adaptations to training. prereq: enrolled PT student

PT 7000. Neurological Theory and Neurosciences in Physical Therapy. (1-6 cr.; A-F only; Fall Odd, Spring Even Year)
Recent/current updates in neurological theory/ intervention supported by neuroanatomical science. Students explore evidence supporting clinical decision making process. One-six selected weekends. Prereq Admitted to Transisitional Doctor of Physical Therapy Program.

PT 7001. Topics in Musculoskeletal PT. (1-6 cr.; A-F only; Fall & Spring)

PT 7002. Topics in Cardiopulmonary Physical Therapy. (2 cr.; A-F only; Fall Even Year)
Principles of cardiac/pulmonary systems as applied to physical therapy. Principles
of normal/abnormal responses to exercise, pathophysiology, and training. Theory/techniques of cardiopulmonary assessment, evaluation, rehabilitation, and clinical decision making of patients with cardiopulmonary disorders. Two selected weekends. Prereq: Admitted in transitional doctor of physical therapy program.

PT 7003. Topics in Integumentary Physical Therapy. (2 cr.; A-F only; Spring Odd Year) Response of integument to injury, disease, and aging. Advances in wound management, rehabilitation of persons with acute/chronic integument disorders. Physiology, pathophysiology, and therapeutic procedures to evaluate, treat, and manage clients with disorders of integument. Two selected weekends. Prereq: Admitted in transitional doctor of physical therapy program.

PT 7004. Topics in Biomechanics and Pathokinesiology in Physical Therapy. (3 cr.; A-F only; Fall Odd Year) Principles of human biomechanics applied to physical therapy. Biomechanics/pathokinesiology of selected joint complexes. Three selected weekends. Prereq: Admitted in transitional doctor of physical therapy program.

PT 7006. Anatomy for Physical Therapy. (2 cr.; A-F only; Fall Odd Year) Dissection of bones, muscles, nerves, vessels, connective tissue, and selected internal organs. Joint structures of limbs, spinal column, head, and pelvis. Histology, embryology. Correlation of content to clinical practice. Lecture, human cadaver lab. Two selected weekends. Prereq: Admitted in transitional doctor of physical therapy program.

PT 7007. Administration and Legal Issues. (2 cr.; A-F only; Fall Every Year) Ethical/legal application to potential administrative decision making in contemporary practice of patients' physical therapy, theoretical frameworks, concepts, and case analysis to address challenges in practice. Two selected weekends. Prereq: Admitted in transitional doctor of physical therapy program.

PT 7008. Scientific Basis of PT Practice. (2 cr.; A-F only; Spring Even Year) Role of science/research in physical therapy as it relates to critical thinking and decision making in practice. Statistical terminology, research design, hypothesis testing. Two selected weekends. Prereq: Admitted in transitional doctor of physical therapy program.

PT 7009. Capstone Experience. (3 cr.; A-F only; Every Summer) How case studies are conducted/written. Importance of case studies to a profession. Basics of case report, literature review. Measurement theory, writing techniques.

Student projects are evaluated by instructor or core or adjunct faculty. Prereq: Must be a DPT student

PT 7010. Topics in Geriatric Rehabilitation I. (2 cr.; S-N only; Every Fall) Demographics of aging population, psychosocial issues with aging, clinical research in the area of geriatrics. How to write patient case report. Lecture, discussion, literature review. Prereq: Licensed physical therapist enrolled in geriatric clinical residency

PT 7011. Topics in Geriatric Rehabilitation II. (2 cr.; S-N only; Every Spring) Providing physical therapy to geriatric clients. Physiologic, pathophysiology, and therapeutic procedures to evaluate, treat, and manage clients. How clinical issues vary in geriatric population vs. younger patients. Lecture, discussion, literature review. Prereq: Licensed physical therapist enrolled in geriatric clinical residency

PT 7012. Topics in Geriatric Rehabilitation III. (2 cr.; S-N only; Every Summer) Management/reimbursement issues in geriatric health care system. Body systems/pathological processes common in geriatric client. How physical therapy is reimbursed through Medicare system. Lecture, discussion, literature review. Prereq: Licensed physical therapist enrolled in geriatric clinical residency

PT 8131. Research Elective. (1 cr.; S-N only; Every Fall & Spring) Research elective guided by the research advisor. Prereq: Grad PT major

PT 8132. Research Seminar. (1 cr.; S-N only; Spring Odd Year) This initial course for the research series provides a foundation for future guided projects on components of the research cycle. Students explore why research is important and how it can be translated to improvements in clinical care. Basic research design and reporting venues, literature search strategies and tools, critical review of literature, responsible conduct of research, and reference management are discussed. Pre-req: Grad PT major

PT 8193. Research Problems. (2-6 cr.; Student Option; Every Fall, Spring & Summer) Process of developing/completing a scholarly research project or literature review related to rehabilitation science/Physical Therapy education and practice. Students work directly with faculty participating in research in guided small group experience. Type of research experience is determined by adviser. Prereq: Grad PT major

PHYS 5001. Quantum Mechanics I. (4 cr.; Student Option; Every Fall) Schrodinger equation: bound state and scattering problems in one dimension. Spherically symmetric problems in three dimensions, angular momentum, and the hydrogen atom. Approximation methods for stationary states. Time-dependent perturbation theory. Operators and state vectors; general formalism of quantum theory. Prereq: 4101 or equiv or instr consent

PHYS 5002. Quantum Mechanics II. (4 cr.; Student Option; Every Spring) Symmetry in quantum mechanics, space-time symmetries and the rotation group, Clebsch-Gordan coefficients and the Wigner-Eckart theorem. Scattering theory. Method of second quantization with elementary applications. Relativistic wave equations including Dirac equation. Prereq: 5001 or equiv

PHYS 5011. Classical Physics I. (4 cr.; Student Option; Every Fall) Classical mechanics: Lagrangian/Hamiltonian mechanics, orbital dynamics, rigid body motion, special relativity. Prereq: 4001, 4002 or instr consent

PHYS 5012. Classical Physics II. (4 cr.; Student Option; Every Spring) Classical electromagnetism: electrostatics, magnetostatics, Maxwell's equations, electromagnetic waves, radiation, interaction of charged particles with matter. Prereq: 5001 or instr consent

PHYS 5022. Relativity, Cosmology, and the Universe. (4 cr.; Student Option; Periodic Fall) Large-scale structure and history of universe. Introduction to Newtonian and relativistic world models. Physics of early universe. Cosmological tests. Formation of galaxies. Prereq: 2601 or instr consent

PHYS 5041. Mathematical Methods for Physics. (4 cr.; Student Option; Every Fall) Survey of mathematical techniques needed in analysis of physical problems. Emphasizes analytical methods. Prereq: 2601 or grad student

PHYS 5071. Physics for High School Teachers: Experimental Foundations and Historical Perspectives. (3 cr.; Student Option; Periodic Fall) In-depth examination of a conceptual theme in physics, its experimental foundations and historical perspectives. Kinematics and dynamics from Aristotle through Einstein; nature of charge and light; energy and thermodynamics; electricity, magnetism, and quantized fields; structure of matter. Prereq: Gen physics, instr consent; no cr for physics grad or grad physics minor

PHYS 5072. Best Practices in College Physics Teaching. (1-3 cr.; max 5 cr.; Student Option; Every Fall & Spring) Pedagogies for introductory physics classes. Topics from educational research/practice as applied to classroom.
PHYS 5081. Introduction to Biopolymer Physics. (3 cr.; Student Option; Periodic Fall) Introduction to biological and soft condensed matter physics. Emphasizes physical ideas necessary to understand behavior of macromolecules and other biological materials. prereq: working knowledge of thermodynamics, statistical mechanics

PHYS 5401. Physiological Physics. (4 cr.; Student Option; Fall Even Year) Musculoskeletal system, circulatory system/membrane transport, biological control systems, propagation/action potential in nervous system, immunology, electromagnetism at cellular level. prereq: One semester of introductory calculus-based physics, such as PHYS1301W. Students not sure if they meet prerequisites should consult instructor.

PHYS 5402. Radiological Physics. (4 cr.; Student Option; Spring Even Year) Signal analysis, medical imaging, medical x-rays, mammography, radiation therapy, nuclear medicine, MRI, similar topics. prereq: Two semesters of introductory calculus-based physics, such as PHYS1302W. Students not sure if they meet prerequisites should consult instructor.

PHYS 5621. Introduction to Plasma Physics. (3 cr.; Student Option; Periodic Fall) Basic properties of collisionless, magnetized plasmas, single particle motion, plasmas as fluids, magnetohydrodynamics, waves in plasmas, equilibrium, instabilities, kinetic theory/shocks. prereq: CSE grad student, working knowledge of waves/electromagnetism

PHYS 5701. Solid-State Physics for Engineers and Scientists. (4 cr.; Student Option; Periodic Fall & Spring) Crystal structure and binding; diffraction; phonons; thermal and dielectric properties of insulators; free electron model; band structure; semiconductors. prereq: Grad or advanced undergrad in physics or engineering or the sciences

PHYS 5950. Colloquium Seminar. (1 cr.; S-N or Audit; Every Fall & Spring) Colloquium of School of Physics and Astronomy. prereq: [Grad student or advanced undergrad in physics], dept consent

PHYS 5970. Physics Journal Club. (1-3 cr.; S-N only; Every Fall & Spring) Weekly student-led presentation, discussion, and critical analysis of important papers. prereq: 2601, 2605 or equiv; intended for 2nd-yr grad students in physics

PHYS 5980. Introduction to Research Seminar. (1 cr.; [max 3 cr.]; S-N or Audit; Every Fall & Spring) Introduction to the research activities of the School of Physics and Astronomy. prereq: Grad or upper div phys major

PHYS 5993. Directed Studies. (1-5 cr.; [max 15 cr.]; Student Option; Every Fall, Spring & Summer) Independent, directed study in physics areas arranged by the student and a faculty member. prereq: instr consent, dept consent

PHYS 5994. Directed Research. (1-5 cr.; [max 15 cr.]; Student Option; Every Fall, Spring & Summer) Problems, experimental or theoretical, of special interest to students. Written reports. prereq: Jr, dept consent

PHYS 8001. Advanced Quantum Mechanics. (3 cr.; Student Option; Every Fall) Topics in non-relativistic quantum mechanics; second quantization. Introduction to Diagrammatic and Green's function techniques and to relativistic wave equations. Application of relativistic perturbation theory to particle interactions with electromagnetic field. Invariant interactions of elementary particles. prereq: 5002 or instr consent

PHYS 8011. Quantum Field Theory I. (3 cr.; Student Option; Every Spring) Second quantization of relativistic wave equations: canonical quantization of the free scalar and Dirac fields. Fields in interaction: interaction picture. Quantum electrodynamics: quantization of the electromagnetic field, propagators and Feynman rules, tree-level processes. Higher-order processes and renormalization. prereq: 8001 or instr consent

PHYS 8012. Quantum Field Theory II. (3 cr.; Student Option; Every Fall) Aspects of general theory of quantized fields, including space-time and discrete transformation properties, the CPT theorem, and the spin-statistics connection. Introduction to functional and path-integral methods. Renormalization group and asymptotic freedom. Semi-classical methods and instantons in gauge theories. prereq: 8011 or instr consent

PHYS 8013. Special Topics in Quantum Field Theory. (3 cr.; Student Option; Spring Even Year) Includes non-perturbative methods in quantum field theory, supersymmetry, two-dimensional quantum field theories and their applications, lattice simulations of quantum fields, topological quantum field theories, quantum field theory methods applied to condensed matter physics, and string theory. prereq: 8012 or instr consent

PHYS 8100. Seminar: Problems of Physics Teaching and Higher Education. (1 cr. [max 3 cr.]; Student Option; Every Spring) Lectures and informal discussions of courses and curricula, techniques, and materials important in undergraduate physics instruction; relation to general problems of higher education.

PHYS 8161. Atomic and Molecular Structure. (3 cr.; A-F only; Fall Odd Year) Emphasizes interpretation of quantum numbers and selection rules in terms of symmetry. Experimental data summarized and compared with theoretical predictions. prereq: Level of mathematics associated with BS in physical sciences

PHYS 8200. Seminar: Cosmology and High Energy Astrophysics. (1 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Current topics in cosmology and high energy astrophysics. prereq: instr consent

PHYS 8300. Seminar: Biological and Medical Physics. (1 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Current research in biological and medical physics prereq: instr consent

PHYS 8301. Symmetry and Its Application to Physical Problems. (3 cr.; Student Option; Periodic Fall) Fundamental invariance principles obeyed by laws of physics. Group theory as tool for using symmetry and invariance to help understand behavior of physical systems. Applications made to atomic, nuclear, condensed-matter, and elementary particle physics. prereq: 5002 or instr consent

PHYS 8311. Biological Physics of Single Molecules. (3 cr.; Student Option; Spring Odd Year) Biological molecules, based on statistical mechanics, kinetics, optics, and other physics ideas. Physics of DNA/proteins, their interactions. Force spectroscopy (optical tweezers, atomic force microscopy). Concepts of optical spectroscopy. Single molecule fluorescence/imaging. prereq: [[5201 or Chen 4707], 5011] or instr consent

PHYS 8312. Biological Physics of Macroscopic Systems. (3 cr.; Student Option; Spring Even Year) Macroscopic systems, based on physics such as fluid dynamics, statistical mechanics, non-linear dynamics, and chaos theory. Super-molecular aggregates. Biological physics of the cell. Biological physics of populations/evolution. prereq: [[5201 or CHEN 4707], 5011] or instr consent

PHYS 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master's student, adviser and DGS consent

PHYS 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

PHYS 8500. Plan B Project. (4 cr.; Student Option; Every Fall, Spring & Summer) Project topic arranged between student and instructor. Written report required. prereq: instr consent; may be taken once to satisfy Plan B master's project requirement; no cr toward PhD

PHYS 8501. General Relativity and Cosmology I. (3 cr.; Student Option; Periodic Fall & Spring)
University of Minnesota Twin Cities Catalog

Fall, 2018

Tensor analysis and differential geometry. Special relativity leading to formulation of principles of general relativity and Einstein’s equations. Tests of general relativity and thorough discussion of various black hole solutions, including Schwarzschild, Reissner-Nordstrom, and Kerr solutions. prereq: 5012 or instr consent

PHYS 8502. General Relativity and Cosmology II. (; 3 cr.; Student Option; Periodic Fall) Gravitational radiation. Applications of general relativity to stellar structure of white dwarfs and neutron stars, action principle, and symmetric spaces. Big-bang cosmology, strongly emphasizing particle physics. prereq: 8501 or instr consent

PHYS 8800. Seminar: Space Physics. (; 1 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Current topics in space physics and plasma physics.

PHYS 8601. Plasma Physics I. (; 3 cr.; Student Option; Periodic Fall) Theory of plasma waves and instabilities in plasmas, magnetohydrodynamics, nonlinear waves in plasmas, wave propagation in inhomogeneous plasmas. prereq: 4621, 5012 or instr consent

PHYS 8602. Plasma Physics II. (; 3 cr.; Student Option; Periodic Fall) Theory of plasma waves and instabilities, collisions, radiation, transport, nonlinear wave-particle and wave-wave interactions, instabilities in inhomogeneous plasmas. prereq: 8601 or instr consent

PHYS 8611. Cosmic Rays and Plasma Astrophysics. (; 3 cr.; Student Option; Periodic Fall & Spring) Properties of energetic particles in heliosphere and in astrophysical environments; solar physics, including radiation and magnetic effects; solar wind and magnetospheric physics; physics of radiation belts. prereq: 5012 or instr consent

PHYS 8650. Advanced Topics in Space and Plasma Physics. (; 3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Topics in plasma waves and instabilities, solar physics, cosmic ray physics, atmospheric physics or planetary physics. prereq: 8602 or 8611 or instr consent

PHYS 8666. Doctoral Pre-Thesis Credits. (; 1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) TDB prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

PHYS 8700. Seminar: Condensed Matter Physics. (; 1 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Current research. prereq: instr consent

PHYS 8702. Statistical Mechanics and Transport Theory. (; 3 cr.; Student Option; Every Spring) Equilibrium properties of macroscopic classical and quantum systems. Phase transitions and Renormalization Group. Transport theory. Applications to soft condensed matter systems. prereq: 5201 or instr consent

PHYS 8711. Solid-State Physics I. (; 3 cr.; Student Option; Every Fall) Fundamental properties of solids. Electronic structure and transport in metals and semiconductors. Properties of disordered materials. prereq: 4211, 5002 or instr consent

PHYS 8712. Solid-State Physics II. (; 3 cr.; Student Option; Every Spring) Fundamental properties of solids. Electronic structure and transport in metals and semiconductors. Properties of disordered materials. prereq: 8711 or instr consent

PHYS 8750. Advanced Topics in Condensed Matter Physics. (; 3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Sample research topics: magnetism, superconductivity, low temperature physics, superfluid helium. prereq: 8712 or instr consent

PHYS 8777. Thesis Credits: Master’s. (; 1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall & Spring) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PHYS 8800. Seminar: Nuclear Physics. (; 1 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Current research topics.

PHYS 8802. Nuclear Physics II. (; 3 cr.; Student Option; Periodic Fall) Properties of nuclei based on hadronic and quark-gluon degrees of freedom. Relativistic field theory at finite temperatures and density applied to many-body problems, especially nuclear matter and quark-gluon plasma. Applications to lepton and hadron scattering, nucleus-nucleus collisions, astrophysics and cosmology. prereq: 8801 or instr consent

PHYS 8850. Advanced Topics in Nuclear Physics. (; 3 cr. [max 9 cr.]; Student Option; Fall Odd Year) Research topics. prereq: 8802 or instr consent

PHYS 8888. Thesis Credit: Doctoral. (; 1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

PHYS 8900. Seminar: Elementary Particle Physics. (; 1 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Elementary particle physics, high energy physics, particle astrophysics and cosmology.

PHYS 8901. Elementary Particle Physics I. (; 3 cr.; Student Option; Every Fall) Types of fundamental interactions. Exact and approximate symmetries and conservation laws. Gauge quanta: gluons, photons, W and Z bosons, gravitons. Fundamental fermions: leptons and quarks. Isotopic and flavor SU(3) symmetries of strong interaction. Heavy hadrons. Amplitudes and probabilities. Quantum chromodynamics. prereq: 8001 or instr consent

PHYS 8950. Advanced Topics in Elementary Particle Physics. (; 3 cr. [max 9 cr.]; Student Option; Periodic Fall) Research topics. prereq: 8902 or instr consent

PHYS 8994. Research in Physics. (; 1-12 cr. [max 24 cr.]; Student Option; Every Fall, Spring & Summer) Research under faculty direction. prereq: instr consent

Physiology (PHSL)

PHSL 5001. Principles of Physiology for Biomedical Engineering. (; 4 cr.; Student Option; Every Fall) Human physiology with emphasis on quantitative aspects. Organ systems (circulation, respiration, renal, gastrointestinal, endocrine, muscle, central and peripheral nervous systems), cellular transport processes, and scaling in biology. prereq: Biomedical engineering grad, one yr college chem and physics and math through integral calculus

PHSL 5094. Research in Physiology. (; 1-5 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer) Independent lab research project in physiology, supervised by physiology faculty. prereq: instr consent

PHSL 5095. Problems in Physiology. (; 1-5 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer) Individualized study in physiology. Students address selected problem through library or
Muscle contraction: force generation by actin/myosin. prereq: 3061 or 3071 or 5061 or BioC 3021 or BioC 4331 or instr consent

PHSL 5510. Advanced Cardiac Physiology and Anatomy. (2-3 cr.; Student Option; Every Spring)
Fundamental concepts. advanced topics related to clinical/biomedical cardiac physiology. Lectures, laboratories, workshops, anatomical dissections. Intense, one week course. prereq: instr consent

PHSL 5511. Advanced Neuromuscular Junction Physiology. (2-3 cr.; max 2 cr.; Student Option; Every Summer)
Fundamental concepts and advanced topics related to clinical/biomedical aspects of neuromuscular junction physiology. Lectures, laboratories, workshops, anatomical dissections. Intense, one week course. prereq: instr consent

PHSL 5525. Anatomy and Physiology of the Pelvis and Urinary System. (1-2 cr.; A-F only; Every Spring)
Two-day intensive course. Pelvis, perineum, and urinary system with cadaveric dissection. Structure/function of pelvic and urinary organs, including common dysfunction and pathophysiology. Laboratory dissections, including kidneys, ureters, urinary bladder, pelvic viscera and pennum (male or female), pelvic floor, vascular and nervous structures. Grand rounds section. prereq: One undergrad anatomy course, one undergrad physiology course, instr consent

PHSL 5540. Advanced Exercise Medicine: Physiology and Bioenergetics. (1-2 cr.; Student Option; Periodic Fall)
Three-day intensive course. Physiology, bioenergetics, nutrition, and sports medicine. Focuses on application of principles to treatment of diseases and functional deficits. Lectures, demonstrations, hands-on experiences in an exercise medicine facility. prereq: [Grad student or practicing health professional], instr consent

PHSL 5570. Cell Physiology. (4 cr.; A-F only; Every Fall)
Control mechanisms in maintaining homeostasis with respect to critical cell functions. Regulation of pH, volume, nutrient transport, intracellular electrolyte composition, membrane potential. Aspects of intercellular communication. prereq: [Two semesters of physics/chemistry, calculus, one semester of systems-level physiology] or instr consent

PHSL 5701. Physiology Laboratory. (1-2 cr.; A-F or Audit; Every Fall & Spring)
Experiments in physiology. Emphasizes quantitative aspects, including analysis of organ systems. prereq: instr consent

PHSL 6051. Systems Physiology. (4 cr.; A-F or Audit; Every Spring & Summer)
General physiology, endocrine, circulatory, respiratory, digestive, energy metabolism, and renal physiology examined at molecular, cellular, and organ level. Emphasizes homeostasis and basic regulatory aspects of physiological processes of organ systems. prereq: [Prev or current] neuroscience course; [biochemistry, human anatomy] recommended

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
PHSL 8777. Thesis Credits: Master’s. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PHSL 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

Plant Pathology (PLPA)

PLPA 5003. Diseases of Forest and Shade Trees. (3 cr.; Student Option; Every Spring) This course provides an overview of tree diseases in urban and forested areas. It covers diseases that have had a significant impact on society such as Dutch Elm disease; oak wilt, chestnut blight, white pine blister rust, sudden oak death and many others. It also provides an overview of important cankers, leaf diseases, wilts, rusts, root rot and other tree problems. Laboratory sessions enable students to get hands-on experience identifying disease agents, examining symptoms and learning appropriate control procedures. Emphasis will also be placed on ecological processes, biological and cultural control, and host-parasite interactions. This course should be of value to anyone interested in biological sciences, natural resources or ecology. It is a must or individuals that will have a career in natural resources but should also be useful to those interested in maintaining healthy trees at home, in urban areas or woodlands. Alumni of the University working with trees or woody ornamentals indicate this is one of the most important courses you can take as a student.

PLPA 5090. Issues in Plant Pathology. (1-4 cr.; Student Option; Every Fall, Spring & Summer) See Class Schedule or department for current offerings.

PLPA 5100. Topics in Plant Pathology. (1-4 cr.; A-F or Audit; Every Fall & Spring) Topics in Plant Pathology

PLPA 5103. Plant-Microbe Interactions. (3 cr.; Student Option; Every Fall) Genetics, physiology, molecular biology of plant-microbe interactions. Communication between plant/microbes, signal transduction, control of gene expression, symbiosis/parasitism, plant host response mechanisms, plant disease physiology. prereq: Intro course in plant pathology or molecular biology or equiv

PLPA 5202. Field Plant Pathology. (2 cr.; Student Option; Every Summer) Characteristics of a variety of plant diseases. Field trips to observe symptoms and effects of diseases, and to learn about prevention and control of diseases in field, forest, golf course, greenhouse, nursery, orchard, and urban environments.

PLPA 5203. Introduction to Fungal Biology. (3 cr.; Student Option; Spring Odd Year) Fungi are a critical component of the diversity and function of terrestrial ecosystems, affecting decomposition, plant nutrient uptake, and agricultural practices. Key components of fungal biology, including ecology, genetics, life cycles and diversity. Labs provide hands on experience with a diverse range of organisms. prereq: BIOL 1009 or equiv

PLPA 5300. Current Topics in Molecular Plant Pathology. (1 cr. [max 2 cr.]; S-N only; Every Spring) Interactive class. Students read, discuss, and critique publications in molecular plant pathology. Focus on articles, examining from different dimensions (underlying principles, experimental strategies, data analysis, impact on the broader discipline). prereq: instr consent

PLPA 5301. Large Scale Omic Data in Plant Biology. (3 cr.; Student Option; Every Fall) Introduction to large scale data in plant biology. Emphasizes model plants and important agricultural crops focusing on new approaches and technologies in the field. Fundamentals, acquisition, and analysis of high-throughput DNA and RNA sequencing high-throughput plant phenotyping, functional and comparative genomics, epigenomics, proteomics, metabolomics, and microbiomes. prereq: Intro course in genetics or instr consent

PLPA 5444. Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions. (3 cr.; A-F or Audit; Every Fall) Concepts and recent research in the ecology, epidemiology, and evolutionary/coevolutionary biology of plant-microbe interactions spanning the range from parasitic to mutualistic in agricultural and natural habitats. prereq: Intro plant pathology or advanced biology coursework recommended

PLPA 5480. Principles of Plant Pathology. (3 cr.; Student Option; Every Fall) This course is intended for graduate students and undergraduate students in their third or fourth year that are interested in learning about principles of plant pathology, diseases that affect plants, microbiology and microbial and plant interactions. In this course students will learn principles of plant pathology through lectures and demonstrations and exercises in laboratory. Students will gain knowledge of mycology and select diseases caused by fungi within Ascomycota, Basidiomycota and the fungal-like Oomycota. Diseases caused by bacteria, nematodes, viruses, parasitic plants and abiotic damage are also examined. Lectures will include information concerning the history and importance of plant pathology, mycology, bacteriology, nematology, virology, infection process, genetics of host and microorganism interactions, epidemiology of diseases and disease control strategies. In the hands-on laboratory period the student will learn laboratory skills, gain experience using the microscope, work with microorganisms, learn diagnostic skills, and be able to recognize 30 plant diseases. prereq: BIOL 1009 or equiv

PLPA 5560. Plant Disease Resistance and Applications. (3 cr.; A-F or Audit; Every Spring) Fundamentals of disease resistance in plants and the genetics of host-parasite interactions as they relate to the sustainable control of plant diseases. Examples explored at the Mendelian, populational, and molecular level of organization. prereq: 2001, BIOL 4003

PLPA 5999. Special Topics in Plant Pathology. (1 cr.; Student Option; Every Fall, Spring & Summer) Workshops on topics in plant pathology. See Class Schedule or department for current offerings.

PLPA 8005. Supervised Classroom or Extension Teaching Experience. (1-2 cr.; S-N only; Every Fall & Spring) Teaching experience in Plant Pathology. Discussions about effective teaching to strengthen skills and develop a personal teaching philosophy. prereq: instr consent

PLPA 8090. Research and Teaching in Plant Pathology. (1-8 cr.; Student Option; Every Fall, Spring & Summer) Special assignment in teaching or lab and field problems in pathological research. If taking for PLPA teaching requirement: 2 credits= 1 full semester of teaching experience; 1 credit= 1/2 semester of teaching experience

PLPA 8103. Plant-Microbe Interactions. (3 cr.; Student Option; Every Fall) Genetics, physiology, and molecular biology of plant-microbe interactions. Communication between plants/microbes. Signal transduction, control of gene expression, symbiosis/parasitism, plant host response mechanisms, plant disease physiology. prereq: Intro course in plant pathology or molecular biology or equiv

PLPA 8104. Plant Virology. (2 cr.; A-F only; Every Spring) Characteristics, biology, epidemiology, and control of plant diseases caused by viruses. prereq: 5480

PLPA 8105. Plant Bacteriology. (2 cr.; Student Option; Every Spring) For graduate students interested in bacteria that cause plant diseases. Disease cycles, epidemiology, pathogenesis, and means of disease control. The lab section will focus on techniques used to identify bacteria, for inoculating plants, and isolating bacteria from plant material. prereq: 5480

PLPA 8200. Seminar. (1 cr.; A-F only; Every Fall & Spring) Critical review and presentation of current problems and progress in plant pathology.

PLPA 8300. Plant Pathology Project. (1-6 cr. [max 24 cr.]; Student Option; Every Fall, Spring & Summer)
Laboratory or library projects for Plan B master's students in plant pathology.

**PLPA 8333. FTE: Master's.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master's student, adviser and DGS consent

**PLPA 8444. FTE: Doctoral.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

**PLPA 8500. Perspectives in Plant Pathology.** (2 cr. [max 4 cr.]; S-N or Audit; Every Fall) Integrative overview of the field. For Ph.D. students nearing end of formal classroom experience.

**PLPA 8666. Doctoral Pre-Thesis Credits.** (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

**PLPA 8777. Thesis Credits: Master's.** (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

**PLPA 8888. Thesis Credit: Doctoral.** (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

### Plant and Microbial Biology (PMB)

**PMB 5111. Microbial Physiology and Diversity.** (3 cr.; Student Option; Every Fall) Structural-functional organization of bacteria/archaea. Energy metabolism utilizing light, inorganic/organic chemicals. Cell morphologies, roles/assembly of surface structures. Growth/survival mechanisms in various extreme environments. Adaptation to changing conditions by development of specialized cells/structures, altering metabolic patterns.

**PMB 5412. Plant Physiology.** (3 cr.; Student Option; Every Fall) Plant Physiology is the study of how plant cells, tissues and whole organisms function. PMB 4412/5412 is a classic Plant Physiology course that covers plant water relations, mineral nutrition, membrane transport, photosynthesis, respiration, vascular function, metabolism, growth and development, and hormone responses. The physics underlying our understanding of these physiological systems will be addressed as much as possible. Classical and modern approaches to studying these physiological systems will be covered. There are no enforced prerequisites for this course. The following preparation is recommended: PMB 2022 General Botany or PMB 3007W Plant Algal and Fungal Diversity; General Chemistry and Introductory Physics.

**PMB 5500. Special Topics in Plant Biology.** (1-3 cr.; Student Option; Every Spring) Topics Shell

**PMB 5516. Plant Cell Biology.** (3 cr.; Student Option; Periodic Fall) Structure, function, and dynamic properties of plant cellular components such as organelles, cytoskeleton, and cell wall. How cellular structures are assembled, how it contributes to cell growth/division. Cell fate development. Responses to hormones and external signals. prereq: [Biol 2022 or Biol 3007 or Biol 3022]. [Biol 3021 or BiolC 3021 or Biol 4003]

**PMB 5601. Topics in Plant Biochemistry.** (3 cr.; A-F or Audit; Every Spring) Biochemical analysis of processes unique to photosynthetic organisms. Photosynthesis and carbon dioxide fixation. Synthesis of carbohydrates, lipids, and derivatives. Aromatic compounds such as lignin, other natural products. Functions of natural products. prereq: [BIOL 1002 or BIOL 1009 or BIOL 3022]. CHEM 2301

**PMB 5860. Special Topics.** (1-3 cr. [max 18 cr.]; Student Option; Every Fall, Spring & Summer) Topics vary, see Class Schedule.

**PMB 8081. Integrative Plant Biology: Connecting Molecules to Ecosystems.** (3 cr.; A-F only; Every Fall) Fundamental questions in plant/fungal biology. Research approaches. Students read/evaluate primary literature. Critical analysis, written summaries, oral presentations. Research in plant/fungal biology, ranging from molecular to ecosystem levels. prereq: Plant biological sciences grad student or instr consent

**PMB 8082. Current Topics in Plant Biology: Structure-Evolution-Ecology.** (1 cr.; S-N or Audit; Every Spring) Background information and review of selected current literature. For first-year students in plant biological sciences and other biological science graduate programs.

**PMB 8123. Research Ethics in the Plant and Environmental Sciences.** (0.5 cr.; S-N or Audit; Every Spring) History/values relating to research/scholarship. Social responsibility/reporting misconduct. Authorship plagiarism. Peer review. Copyright/intellectual property. Conflicts of interest. Research data management. Fiscal responsibility/management. Environmental health/safety. Research involving humans/animals. Mentorship presentations by faculty and invited speakers. Meets first seven weeks of spring semester. prereq: Grad student in [applied plant sciences or plant pathology or plant biological sciences or soil science]

**PMB 8333. FTE: Master's.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer) FTE: Master's prereq: Master's student, adviser and DGS consent

**PMB 8444. FTE: Doctoral.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

**PMB 8666. Doctoral Pre-Thesis Credits.** (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) Doctoral Pre-Thesis Credits prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

**PMB 8777. Thesis Credits: Master's.** (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall & Spring) Thesis credits: doctoral. prereq: Passed prelim oral or adviser approval

**PMB 8888. Thesis Credit: Doctoral.** (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) Thesis credit: doctoral. prereq: Passed prelim oral or adviser approval

**PMB 8900. Seminar.** (1-2 cr. [max 4 cr.]; S-N or Audit; Every Fall & Spring) Current scientific research.

**PMB 8901. Preparation of Research Proposals.** (2 cr.; S-N only; Every Fall) Grant writing process. Strategies and ethical standards for research proposal preparation/review. Students prepare an original proposal and critique work of others. prereq: Plant biological sciences PhD student

**PMB 8910. Journal Club.** (1 cr. [max 4 cr.]; S-N or Audit; Periodic Fall, Spring & Summer) Critical evaluation of selected current literature.

**PMB 8993. Directed Studies.** (1-5 cr. [max 15 cr.]; Student Option; Every Fall, Spring & Summer) Directed Studies prereq: PBio grad student, instr consent

**PMB 8994. Research.** (1-5 cr. [max 10 cr.]; Student Option; Every Fall, Spring & Summer) Independent research determined by student's interests, in consultation with faculty mentor. prereq: PBio grad student, instr consent

### Political Science (POL)

**POL 5005. Political Engagement: Theories and Practice.** (4 cr.; A-F only; Every Fall) Theories of political and civic engagement; case studies of challenges and opportunities in public service careers; ethics of political engagement.

**POL 5065. Mentorship in Political Engagement.** (3 cr.; A-F only; Every Summer)
POL 5210. Topics in Political Theory. (3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Topics specified in the Class Schedule.

POL 5280. Topics in Political Theory. (3-4 cr. [max 3 cr.]; Student Option; Periodic Fall & Spring) Topics in historical, analytical, or normative political theory. Topics vary, see Class Schedule. prereq: grad student

POL 5306. Presidential Leadership and American Democracy. (3 cr.; Student Option; Periodic Fall) Examines whether president's political and constitutional powers are sufficient to satisfy citizens' high expectations and whether president should be expected to dominate American politics. prereq: grad student or instr consent

POL 5310. Topics in American Politics. (3 cr.; Student Option; Every Fall & Spring) See Class Schedule for description.

POL 5315. State Governments: Laboratories of Democracy. (WI; 4 cr.; Student Option; Periodic Fall) Political behavior, governmental institutions, and public policies in American states. Comparison among states, between state and national government. Emphasizes Minnesota. prereq: grad student or instr consent

POL 5322. Rethinking the Welfare State. (3-4 cr. [max 3 cr.]; Student Option; Periodic Fall & Spring) Competing arguments about welfare states in advanced industrial countries. Whether welfare states result from sectional interests, class relations, or citizenship rights. Compares American social policy with policies in other western countries. prereq: grad student

POL 5325. Political Actors in the American Policy Process. (3 cr.; Student Option; Every Fall) The role of political actors in the American policy process, focusing on actors within government (Congressional representatives, the President, bureaucrats, federal judges, state and local elected officials) and outside government (the public, interest groups, social movements, and the media). Theories of agenda setting, policymaking, and policy change. Graduate standing.

relations on U.S. economy/politics. prereq: Credit will not be granted if credit has been received for: ; 4833; grad student; 3835 recommended

POL 5885. International Conflict and Security. (; 3 cr. ; Student Option; Periodic Fall)
Alternative theories of sources of militarized international conflict. Theories applied to past conflicts. Theories' relevance to present. prereq: grad student

POL 5970. Individual Reading and Research. (1-4 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer)
Guided individual reading or study. Prereq instr consent, dept consent, college consent.

POL 8060. Research Proseminar in Political Science. (; 2 cr. [max 8 cr.]; Student Option No Audit; Every Fall & Spring)
Readings, discussion, guest speakers. Topics vary by semester.

POL 8070. Advanced Research and Writing in Political Science. (; 2 cr. [max 4 cr.]; S-N only; Every Fall & Spring)
Commentary/guidance at all stages of dissertation research process, from conceptualization of topic/project to editing of nearly final drafts.

POL 8101. Introduction to Political Science. (; 3 cr. ; A-F or Audit; Every Fall & Spring)
History, scope, and methods of political science as a discipline; current subfields; major research programs (including realism, postmodern, participatory. Domestic and international struggles over meaning of science as a discipline; current subfields; major research programs (including realism, pluralism, institutionalism, rational choice, and critical theory); problems of theory, interpretation, concept-formation, comparison, measurement and experimentation; designs for research. prereq: Grad pol sci major or instr consent

POL 8104. Professional Development I. (2 cr. [max 4 cr.]; S-N only; Every Spring)
The objectives of this course are as follows: (1) to provide students with professional advice that will help them move with dispatch through the graduate program; (2) to learn the formal and informal norms of the discipline; and (3) to help them prepare to do independent research and dissertation research. prereq: 1st year Pol graduate student

POL 8105. Professional Development II. (; 1 cr. [max 2 cr.]; S-N or Audit; Every Spring)
Research ethics. Skills for teaching undergraduate courses in political science. Completion of dissertation prospecti or early chapters. prereq: Pol sci student, ABD, dept consent

POL 8106. Quantitative Political Science I. (3 cr. ; Student Option; Every Fall)
This course provides a thorough grounding in the quantitative analysis of political science data. The emphasis is on how to analyze such data, interpret statistical results, and summarize and report the findings. By the end of the term you will (1) know how to describe variables; (2) test hypotheses; (3) use measures of association to quantify the relationship between two variables while holding a third variable constant; (4) understand bivariate regression and the basics of multiple regression; (5) understand reliability and validity and how to assess these properties empirically; and (6) know how to use the STATA statistical software program. prereq: political science grad major or instr consent

POL 8107. Quantitative Political Science II. (; 3 cr. ; A-F only; Every Spring)
Multiple linear regression model applied to political science data. How to use regression techniques to analyze data, interpret statistical results, and summarize/report the findings. Estimation of model. Underlying assumptions. Inference. Model diagnostics. Extensions of model. prereq: Political science grad major or instr consent

POL 8108. Maximum Likelihood Estimation. (3 cr. ; Student Option; Every Fall)
This course presents an overview of the likelihood theory of statistical inference, and its wide range of uses in applied quantitative political science. When dependent variables take the form of two or unordered categories, event counts, or otherwise violate the traditional assumptions of the linear regression model, models estimated by maximum likelihood provide an essential alternative. Topics covered include binary, multinomial, and ordered logit/probit, Poisson regression, and multilevel models. We will rely heavily on computational methods of analysis using the R statistical computing environment, and instruction on how to use R for applied research will be provided throughout the length of the course.

POL 8120. Core Course in Political Methodology: Modeling Political Processes. (; 3 cr. ; Student Option; Fall Odd, Spring Even Year)
Methods used and potential for creating models of political processes. Designing political institutions, discerning/forecasting election outcomes, producing early warnings of international conflicts, increasing turnout in elections. Using mathematics to study political strategy and collective decision making in committees/legislatures. Using statistics to measure political variables, design experiments with human subjects, and test micro/macro political theories. prereq: Pol sci grad major or instr consent

POL 8122. Positive Theory. (; 3 cr. ; Student Option; Every Fall)
Survey of positive political theory and rational-choice models. Information and transaction costs; institutions; models of elections, voting, coalitions. prereq: Grad pol sci major or instr consent

POL 8124. Game Theory. (; 3 cr. ; Student Option; Every Spring)
Application of noncooperative game theory in political science. Equilibrium concepts, bargaining, repeated games, games of incomplete information, signaling games, reputation, learning in games. prereq: [8122, grad pol sci major] or instr consent

POL 8125. Dynamic Analysis. (; 3 cr. ; Student Option; Periodic Fall & Spring)
Time series method, its application in political science. prereq: Pol sci grad student or instr consent

POL 8126. Qualitative Methods. (; 3 cr. ; Student Option; Fall Even, Spring Odd Year)
Qualitative methods in social science. Hands-on training through fieldwork projects. Interviewing, participant observation, narrative interpretation, ethical issues. Problems of gender/race in fieldwork. prereq: Grad student

POL 8127. Survey Research Methods: Measuring Public Opinion. (; 3 cr. ; Student Option; Fall Even, Spring Odd Year)
Theoretical/empirical issues in survey research methodology aimed at assessing political attitudes/behavior (including questionnaire design, scientific sampling). Skill areas necessary to analyze, design, or conduct surveys to examine political phenomena. prereq: Pol sci grad major

POL 8131. Advanced Methods and Models. (; 3 cr. ; Student Option; Every Fall)
Intersection of statistical methodology and deductive modeling; issues in merging inductive and deductive research. Sample topics: parties and elections, probabilistic voting, strategic modeling of international relations. prereq: Grad pol sci major, 6 cr 81xx seminars or instr consent

POL 8160. Topics in Models and Methods. (; 3 cr. [max 12 cr.]; Student Option; Every Fall & Spring)
Seminars on selected topics, as specified in Class Schedule.

POL 8201. Understanding Political Theory. (3 cr. ; Student Option; Every Fall & Spring)
Key concepts/major approaches. prereq: Grad student or instr consent

POL 8215. Philosophy of Political Inquiry. (; 3 cr. ; Student Option; Every Fall)
Major schools in philosophy of science as applied to political inquiry: pragmatism, positivism, hermeneutics, critical rationalism, critical theory, realism. Themes of political inquiry: explanation, interpretation, theory, criticism. Political issues raised by philosophy of science: liberalism, democracy, control, multiculturalism. prereq: Grad pol sci major or instr consent

POL 8225. American Political Thought. (; 3 cr. ; Student Option; Every Fall)
Colonial era to present: Puritans, American Revolution, Constitution, rise of individualism, pro- and anti-slavery arguments, civil war and reconstruction, industrialism, westward expansion, Native Americans, immigration, populism, socialism, social Darwinism, growth of corporations and unions; Great Depression; growth of American power at home and abroad. prereq: Grad pol sci major or instr consent

POL 8235. Democratic Theory. (; 3 cr. ; Student Option; Periodic Fall & Spring)
Competing models of democracy: classical, republican, liberal, radical, Marxist, neo-Marxist, pragmatist, populist, pluralist, postmodern, participatory. Domestic and international struggles over meaning of
"democracy"; social science models of and findings on democracy. prereq: Grad pol sci major or instr consent

POL 8251. Ancient and Medieval Political Thought. (3 cr.; Student Option; Every Fall) Politics and ethics in Greece, Rome, Christendom: Thucydides, Socrates, Plato, Aristotle, Cicero, Augustine, Aquinas, Marsilius. prereq: Grad pol sci major or instr consent

POL 8252. Early Modern Political Thought. (3 cr.; Student Option; Every Fall) Theorists and texts from Renaissance to French Revolution. Selectively includes Machiavelli, More, Calvin, Luther, Grotius, Bodin, Hobbes, Winstanley, Harrington, Locke, Montesquieu, Rousseau, Hume, Smith, Burke, and wollstonecraft; key debates over liberty, law, power, and knowledge. prereq: Grad pol sci major or instr consent

POL 8253. Late Modern Political Thought. (3 cr.; Student Option; Every Fall & Spring) Theoretical responses to and rival interpretations of Western economy, society, politics, and democratic culture in the modern age; theories of history; class struggle; the end of metaphysics and the death of God; technology and bureaucracy; psychology of culture, in Hegel, Marx, Tocqueville, Mill, Nietzsche, Weber, Freid. prereq: Grad pol sci major or instr consent

POL 8260. Topics in Political Theory. (3 cr.; max 6 cr.; Student Option; Every Fall & Spring) Readings and research in special topics or problems.

POL 8275. Contemporary Political Thought. (3 cr.; Student Option; Every Fall) From approximately World War II to the present. Survey of range of texts or intensive focus on such authors as Adorno, Arendt, Derrida, Foucault, Habermas, Horkheimer, Rawls, Said. Sample topics: feminism, postmodernism, communitarianism, Frankfurt School, postcolonialism. prereq: Grad pol sci major or instr consent

POL 8301. American Politics. (3 cr.; Student Option; Periodic Fall & Spring) Seminar on main themes of theory and research in American politics, institutions, law, and policy. Major works on individual, mass, elite, and institutional behavior and their relationship to each other. Foundation for advanced seminars in American politics. prereq: Grad pol sci major or instr consent

POL 8302. Public Opinion and Political Behavior. (3 cr.; Student Option; Every Fall) Major theoretical perspectives/research on political participation, voting behavior, public opinion. Voter turnout, importance of party identification, effects of campaigns, long-term change in public opinion, designing/conducting research. prereq: Grad pol sci major or instr consent

POL 8303. Political Parties. (3 cr.; Student Option; Every Fall) Party systems and subsystems; party organizational characteristics, goals, and incentives; distribution of power and authority within the party; chief party functions; party as an organizer of governmental power; determinants of party structure and role. prereq: Grad pol sci major or instr consent

POL 8305. Interest Groups and Social Movements. (3 cr.; Student Option; Every Fall & Spring) Theoretical/empirical work on role of interest groups and social/political movements in American politics and policy-making processes. Theories of interest group and social/political movement formation, maintenance, and decline. How interest groups and social/political movements attempt to influence public policy. Impact/effectiveness groups/movements as agents of democratic representation, particularly for marginalized groups. prereq: Grad pol sci major or instr consent

POL 8307. Proseminar in Political Psychology I. (2 cr.; S-N or Audit; Every Fall) Readings, discussion, and guest speakers. Topics vary by semester. prereq: Grad pol sci major or pol psych minor or instr consent

POL 8308. Proseminar in Political Psychology II. (2 cr.; Student Option; Every Spring) Readings, discussion, and guest speakers. Topics vary by semester.

POL 8311. Political Psychology and Socialization. (3 cr.; A-F or Audit; Every Fall & Spring) Introduction to political psychology. Personality and politics; political cognition, emotion, and political behavior; political expertise; media and politics; aggression, authoritarianism, and political behavior; altruism and politics. prereq: Grad pol sci major or pol psych minor or instr consent

POL 8312. Legislative Process. (3 cr.; Student Option; Every Fall & Spring) Introduction to study of legislative politics; theories of legislative institutions and individual behavior; congressional elections; congressional committees, parties, and leaders. prereq: Grad pol sci major or instr consent

POL 8313. Executive Process. (3 cr.; Student Option; Every Fall) Tension between leadership and democracy in context of American presidency in terms of President's relationship with federal bureaucracy, Congress, and making of diplomatic and military policy. prereq: Grad pol sci major or instr consent

POL 8314. Judicial Process. (3 cr.; Student Option; Every Fall) Judicial systems and roles; selection of judges; organizing and supporting litigation; influences on judicial decisions; impact and enforcement of judicial decisions; courts and other institutions of government. prereq: Grad pol sci major or instr consent

POL 8320. Social Psychology of Prejudice and Intergroup Relations. (3 cr.; A-F or Audit; Every Fall) Approaches, findings, and controversies in research on social psychology of prejudice, racial attitudes, and intergroup relations. Focuses on approaches based in social psychology and on related work from political science and sociology.

POL 8321. Urban Politics. (3 cr.; A-F or Audit; Every Fall) Selection of local leadership; relationship of political system to governmental forms and social institutions; role and impact of political institutions; policymaking at local level; studies in policy problems; the emerging metropolis. prereq: Grad pol sci major or instr consent

POL 8325. State Politics and Intergovernmental Relations. (3 cr.; Student Option; Every Fall) Theoretical approaches to comparative study of state politics; study of political culture and behavior, governmental institutions, and public policy at state level; federalism. prereq: Grad pol sci major or instr consent

POL 8331. Constitutional Law. (3 cr.; Student Option; Every Fall) Overview of substantive and theoretical debates in American constitutional law; role of law and constitutional interpretation in shaping American political institutions and American politics. prereq: Grad pol sci major or instr consent

POL 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master's student, adviser and DGS consent

POL 8335. Public Policy. (3 cr.; Student Option; Every Fall) Theoretical approaches: incrementalism, innovation and policy learning, comparative policy outputs, policy process models, interest groups, and selected areas of public policy. prereq: Grad pol sci major or instr consent

POL 8337. Welfare State Theories and American Social Policy. (3 cr.; Student Option; Every Fall) Rival theoretical explanations for cause and nature of welfare state development in context of four American social policies: social security, welfare, education, and healthcare. prereq: Grad pol sci major or instr consent

POL 8360. Topics in American Politics. (3 cr.; max 9 cr.; Student Option; Every Fall & Spring) Readings and research in special topics or problems. prereq: instr consent

POL 8401. International Relations. (3 cr.; Student Option; Every Fall & Spring) Basic theories/approaches to study of international politics. Surveys representative work/central issues of scholarship. prereq: Grad pol sci major or dept consent

POL 8402. International Security. (3 cr.; Student Option; Spring Odd Year) Introduction to contending theories of international conflict/security. prereq: Grad pol sci major or instr consent

POL 8403. International Norms and Institutions. (3 cr.; Student Option; Periodic Fall & Spring) Origins, roles, and effectiveness of international norms and institutions; theoretical explanations...
and debates. Institution of sovereignty; rational choice versus constructivist perspectives; role of international law, international organizations, and non-governmental organizations; and international society and transnational cultural norms. prereq: Grad pol sci major or instr consent

POL 8404. International Hierarchy. (; 3 cr.; Student Option; Periodic Fall) Asymmetric structures and processes of international relations; systemic conditions and implications of informal empire and structures of hegemony; cultural productions of difference and inequality. prereq: Grad pol sci major or instr consent

POL 8405. International Political Economy. (; 3 cr.; A-F or Audit; Periodic Fall & Spring) Theoretical and policy issues in international economic relations. Different approaches for understanding outcomes in international economy. Trade, finance, labor markets, creation and maintenance of international regimes, and “globalization” of economic liberalism. prereq: Grad pol sci major or instr consent

POL 8406. Politics of International Finance. (; 3 cr.; Student Option; Periodic Fall & Spring) Relationship between workings of the international political system and that of international markets for currency and capital. prereq: Grad pol sci major or instr consent

POL 8407. Morality in World Politics. (; 3 cr.; Student Option; Periodic Fall & Spring) Approaches to normative theorizing and empirical research on moral norms in world politics. Theoretical topics: realism, communitarianism, consequentialism, constructivism, postmodernism, cultural relativism. Substantive issue areas: famine and foreign aid, just war theory, nuclear weapons, moral implications of technology, case study on war (Gulf War). prereq: Grad pol sci major or instr consent

POL 8408. International Relations of the Environment. (; 3 cr.; Student Option; Periodic Fall) Theory and practice of international environmental politics. Emergence of environment as major issue of international relations. Diversities of agendas and politics. Imperatives, templates, resistance in global efforts to forge an applied politics of environmental sustainability. Selected cases. prereq: Grad pol sci major or instr consent

POL 8411. Political Psychology and Foreign Policy. (; 3 cr.; Student Option; Periodic Fall & Spring) Foreign policy theories about decision makers and audiences. Impact of human nature, formal institutions, cultural and cross-cultural settings, and kinds of issues on foreign policy choice, control, and justification. prereq: Grad pol sci major or instr consent

POL 8412. American Foreign Policy. (; 3 cr.; Student Option; Periodic Fall & Spring) U.S. policy toward foreign states and peoples: heritage, motivations, policy processes, what the public generally knows and wants, specific policies. Rise of internecine issues and decline of enemy-focused internationalism; implications for process and content of U.S. foreign policy. prereq: 8410 or instr consent

POL 8444. FTE: Doctoral. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and director of graduate studies consent

POL 8460. Topics in International Relations. (; 3 cr.; [max 6 cr.]; Student Option; Every Fall & Spring) Readings and research in advanced topics or problems. Recent topics: global environmental issues, morality in world politics, and norms and institutions in world politics.

POL 8601. Introduction to Comparative Politics. (; 3 cr.; Student Option; Periodic Fall & Spring) Main theoretical approaches and issues: comparative method, the state and class; political culture; development, democratization, rational choice, social movements. prereq: Grad pol sci major

POL 8602. Families, Children, and the State. (; 3 cr.; A-F or Audit; Periodic Fall) Politics of family, sex, and children. Comparative perspective. Family autonomy vs. state authority. Political struggles over the definition of family, sex, and marriage. Crisis in fatherhood. Children's rights. Globalization of Western ideology of childhood. Political realities of third-world childhood. Theories of political efficacy in family/child advocacy.

POL 8603. European Government and Politics. (; 3 cr.; A-F or Audit; Periodic Fall & Spring) Main theories and approaches used to interpret European politics. Many of these theories have broad relevance for comparative politics, for example, theories about the state, cleavages and coalitional bases, parties and social movements, and constitutional structures and institutions have broad relevance for the field of comparative politics. prereq: Grad pol sci major or instr consent

POL 8605. Government and Politics in Africa. (; 3 cr.; A-F or Audit; Periodic Fall & Spring) Theoretical and methodological approaches to study of African politics, focusing on pre-colonial and colonial legacies for post-colonial reality. Local politics, social construction of identities, political economy of peasantry and working class, political development and decay, social movements, and prospects for democracy. prereq: Grad pol sci major or instr consent

POL 8606. Government and Politics of Russia and the Commonwealth of Independent States. (; 3 cr.; A-F or Audit; Periodic Fall & Spring) Framework for understanding politics of change underway in the former Soviet Union. Roots of current transformation, including causes and legacy of the Russian revolution and creation of the Soviet Union. Issues in current transformation, including nationalism, economic reform, and democratization. Prior knowledge of basic Soviet politics is assumed. prereq: Grad pol sci major or instr consent

POL 8611. Chinese Politics. (; 3 cr.; Student Option; Periodic Fall & Spring) Major issues since 1949: democratization, dissent, violence, gender, capitalist and socialist development strategies, inequality, effect of culture on politics, status of Taiwan. Current scholarly debates on Chinese politics. Professional methods for research on contemporary China. prereq: Grad pol sci major or instr consent

POL 8615. The Political Economy of Contemporary Japan. (; 3 cr.; Student Option; Periodic Fall & Spring) Major political and economic issues confronting the Japanese system; situation of Japanese case within comparative politics literature concerning role of the state in formulating economic and social policy making. Review of literature. Deregulation in key industries, welfare reform, tax reforms. prereq: Grad pol sci major or instr consent

POL 8619. Latin American Politics. (; 3 cr.; Student Option; Periodic Fall & Spring) Major bodies of theory on development, democracy and redemocratization, social movements, civil society, the state, and transnational linkages. prereq: Grad pol sci major or instr consent

POL 8621. Comparative and Case Study Methods. (2 cr.; [max 4 cr.]; Student Option No Audit; Every Fall & Spring) This course will provide students with a basic introduction to methodological debates surrounding comparative and case study methods in political science. Although the course is designed primarily with an eye to the needs of students in comparative politics, this course will also be useful to students in other subfields who wish to learn more about comparative and/or case study methods.

POL 8633. Comparative Sociopolitical Change. (; 3 cr.; Student Option; Periodic Fall & Spring) Critical evaluation of literature and theoretical perspectives; comparative examination of social and political change and interrelationship between both processes; structure/agency nexus. prereq: Grad pol sci major or instr consent

POL 8637. Comparative Political Economy. (; 3 cr.; Student Option; Periodic Fall & Spring) Connections between democracy and markets, emphasizing experiences of countries in North America and Europe. prereq: Grad pol sci major or instr consent

POL 8641. Comparative Mass Political Behavior. (; 3 cr.; A-F or Audit; Fall Even, Spring Odd Year) Examined from a cross-national perspective. Development of political participation, mobilization and its effects, development of political cleavages and political parties as vehicles of conflict, modes of political behavior under varied systems of representation and varied party systems. prereq: Grad pol sci major or instr consent
POL 8643. Comparative Political Institutions. (3 cr.; A-F or Audit; Periodic Fall & Spring)
Structure/operation of various political institutions in different settings. Theoretical approaches, comparative frameworks. Introduction to literature on political institutions. Preparation for comparative research on political institutions. prereq: Pol sci grad student or instr consent

POL 8660. Topics in Comparative Politics. (; 3 cr. [max 9 cr.]; Student Option; Every Fall & Spring)
Readings in advanced topics or problems. Supervised research/training. Topics specified in Class Schedule.

POL 8666. Doctoral Pre-Thesis Credits. (; 1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer)
TBD prereq: Doctoral student who has not passed prelim oral, up to 24 combined cr, permission number required for registration, doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

POL 8777. Thesis Credits: Master's. (; 1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

POL 8888. Thesis Credit: Doctoral. (; 1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

POL 8990. Directed Readings and Research in Political Science. (; 1-7 cr.; Student Option; Every Fall, Spring & Summer)
TBD prereq: 16 cr 8xxx pol sci courses, instr consent, dept consent

POL 5520. Portuguese Literary and Cultural Studies. (; 3 cr. [max 9 cr.]; Student Option; Periodic Fall)
Origins/development of modern Portuguese nation (late 15th to 20th century) using literature, cultural and literary criticism, history, sociology, and various media (film, art, music, Internet). Main cultural problematics pertaining to Portugal as well as fundamental literary texts.

POL 5530. Brazilian Literary and Cultural Studies. (; 3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring)
Study of origins and development of modern Brazilian nation (late 16th to 20th century) using literature, cultural and literary criticism, history, sociology) and various media (film, art, music, Internet). Main cultural problematics pertaining to Brazil as well as fundamental literary texts. prereq: Grad student or instr consent

PORT 5530. Brazilian Literary and Cultural Studies. (; 3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring)
Lusophone manifestations in Portuguese-speaking world (Portugal, Brazil, Lusophone Africa). Literature, history, film, intellectual thought, critical theory, popular culture. Topics may include writers (e.g. Machado de Assis) groups of writers (e.g. Lusophone women writers), or problematics such as (post-)colonialism or Luso-Brazilian modernities.

PORT 5930. Topics in Brazilian Literature. (; 3 cr. [max 9 cr.]; Student Option; Every Fall) Major issues of Brazilian literature; focuses on important authors, movements, currents, and genres. Problems, socioeconomic questions, and literary techniques related to Brazilian themes. Topics specified in Class Schedule.

PORT 5970. Directed Readings. (1-4 cr. [max 9 cr.]; Student Option; Every Fall, Spring & Summer)
Lusophone studies (Portuguese-speaking Africa, Brazil, Portugal). Areas not covered in other courses. Students submit reading plans for particular topics, figures, periods, or issues. Prereq MA or PhD candidate, instr consent.

PORT 5990. Directed Readings and Research in Political Science. (; 1-7 cr.; Student Option; Every Fall, Spring & Summer)
TBD prereq: 16 cr 8xxx pol sci courses, instr consent, dept consent

PORT 5990. Directed Readings and Research in Political Science. (; 1-7 cr.; Student Option; Every Fall, Spring & Summer)

PORT 8333. FTE: Master's. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

PORT 8777. Thesis Credits: Master's. (; 1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PSTL 5306. College Student Mental Health. (2 cr.; A-F only; Every Spring)
Mental health of college students, way colleges provide support for students with mental health concerns, basic skills all college faculty/staff need to provide support to students experiencing distress, self-care strategies for support givers.

PSTL 5306. College Student Mental Health. (2 cr.; A-F only; Every Spring)

PSE 6011. Electric Machines and Drives. (; 3 cr.; A-F or Audit; Every Fall & Spring)
Power Systems, Pwr Electronics (PSE)

PSE 6011. Electric Machines and Drives. (; 3 cr.; A-F or Audit; Every Fall & Spring)
Students learn various aspects of electric machines and drives under a steady state operation. Course provides overview of the components and control and a basic fundamental understanding for further learning. This course describes the principles behind how electric machines operate. In a way that they can be controlled in adjustable speed and position applications. In order to do so, power-electronics based converters are described in their functionality as well as the feedback control of speed and position in a system. prereq: Circuit analysis ?? dc and sinusoidal ac in steady state using phasors; basic idea of diode, transistor and thyristor operation; Fourier analysis; Laplace Transform: Bode Plots, gain and phase margin; Electromagnetic field concepts, magnetic-circuit concepts

PSE 6021. Power Systems. (; 3 cr.; A-F or Audit; Every Fall & Spring)
Students will learn various aspects of electric power systems and receive an overview of the various components and control and a basic fundamental understanding for further learning. Course begins with examining various means of generating electricity and then transmitting it over power lines and cables; calculating power flow in an interconnected grid; various components such as transformers, synchronous generators, etc. that make up power systems. The middle-part of the course describes the requirements for voltage stability and keeping the generators operating synchronously under transient fault conditions. The last part of the courses deals with the protection of power systems against transmission line faults using protective relaying, and under transient over-voltages by means of insulation coordination using surge arrestors. prereq: Circuit analysis ?? dc and sinusoidal ac in steady state using phasors; basic idea of diode, transistor and thyristor operation; Fourier analysis; Laplace Transform; Electromagnetic field concepts, magnetic-circuit concepts

PSE 6031. Power Electronics. (; 3 cr.; A-F or Audit; Every Fall & Spring)
Course on power electronics, an enabling technology, with a focus on its various applications, basic converter structures and how these converters are used and controlled in these applications. By exploiting the commonality of various converters, students get a much deeper and broader understanding. The concentration of this course will be on switch-mode power electronics where the transistors such as MOSFETs and IGBTs are used as semiconductor switches - either ON or OFF. The terminal characteristics of these devices will be discussed for designing converters in which they are used in order to calculate conduction and switching losses for thermal management and design trade-offs; however, in analyzing the voltage transfer ratios in various converter topologies and in their feedback control, these semiconductor devices and the associated passive components will be considered ideal. The last part of the course will discuss thyristor-based converters used at very high power levels in electric-utility applications. prereq:
Preventive Science Minor (PREV)

PREV 8002. Prevention Science Research Methodology. (3 cr.; A-F or Audit; Every Fall) This course is intended to provide students with broad exposure to topics in research methodology within the field of prevention science. Prevention science as a discipline focuses on theory, etiology, and prevention of social, physical and mental health problems and the translation of that information to promote health and well-being. This course will emphasize research methodology as it pertains to preventive interventions in youth and family contexts. The course is intended to serve as a survey of a wide range of topics within these areas, with research design, measurement issues, and analytic methods representing the major foci. Topics will be covered with attention to the community contexts within which prevention research often occurs as well as the ethical and human subjects issues that may arise. Students who successfully complete the course are expected to be able to interpret and critically evaluate prevention research methodology as well as identify appropriate methodological strategies to address research questions within prevention science.

PREV 8003. New Topics in Prevention: Implementation and Dissemination. (3 cr.; A-F or Audit; Every Spring) This is an interdisciplinary course focused on the new science of implementation and dissemination of evidence-based/empirically-supported family-focused psychosocial prevention programs. Course content will include an overview of conceptual and theoretical foundations of implementation research, key research questions, methods for evaluating implementation and dissemination efforts, and case examples from the empirical literature. The course will take an ecological perspective to the implementation of family-based prevention programs, addressing questions such as how widespread efforts to install programs in communities can ensure that programs create change in children and families.

Product Design (PDES)

PDES 5193. Directed Study in Product Design. (1-1.5 cr.; [max 8 cr.]; A-F or Audit; Every Fall, Spring & Summer) Independent study in product design under tutorial guidance. prereq: Grad, instr consent

PDES 5701. Creativity, Idea Generation, and Innovation. (3 cr.; A-F only; Every Fall) Introduction to a variety of creativity and idea generation tools with an emphasis on innovative product concept development. Students apply different toolsets to an ongoing project. Starting with a general theme, students explore problems and concepts, practice using a variety of idea generation tools, and learn methods of evaluating/selecting concepts. Customer needs, benchmarking, and intellectual property.

PDES 5702. Concept Sketching and Rendering. (3 cr.; A-F only; Every Fall) Sketching and rendering for communication of conceptual product design. Free-hand 2-point perspective. Weekly drawing assignments/presentations. Students keep a sketchbook to develop ideas/drawings.

PDES 5704. Computer-Aided Design Methods. (3 cr.; A-F only; Every Fall) Overview of how to make well-modeled, properly illuminated, and carefully composed digital models of existing/conceptual objects. prereq: Senior or grad student

PDES 5705. History and Future of Product Design. (3 cr.; A-F only; Every Spring) This class covers critical milestones in the history, evolution, and trajectory of modern product design as well as the human relationships to consumer goods, including production and consumption. In some assignments, students have the opportunity to apply the topics discussed towards imagining the future of the product design industry.

PDES 5706. Designing for Manufacture. (4 cr.; A-F only; Every Fall) Hands-on exposure to a number of common manufacturing methods and the considerations in product design. Students will be able to apply the theory of design for manufacturing (DFM) and design for assembly (DFA) to other methods that may not be taught in this course. prereq: PDes 5704 or CAD experience.

PDES 5711. Toy Product Design. (2 cr.; A-F only; Every Spring) Toy Product Design is an introduction to integrated product design process in which elements of industrial design, engineering, business, and humanities are combined and applied to a semester-long design project. Cross-functional teams of six students work together to design and prototype new toy product concepts with help from industry mentors.

Prosthodontics (PROS)

PROS 7110. Classic Prosthodontic Literature Review. (2 cr.; A-F only; Every Fall & Spring) Selected historical literature. Current research, its implications for present-day restorative dental therapy. prereq: instr consent

PROS 7120. Current Literature Review. (1 cr. [max 6 cr.]; A-F or Audit; Every Fall, Spring & Summer) Historical development of maxillofacial prosthetics, interdisciplinary relationships in treatment of maxillofacial patient.

PROS 7161. Applied Biomaterials. (2 cr.; A-F or Audit; Every Summer) Principles governing manipulation of materials used in restorative dental practice. The physical and mechanical properties and the biocompatibility of dental materials to oral tissues. prereq: instr consent

PROS 7171. Principles of Maxillofacial Care. (2 cr.; A-F only; Every Fall & Summer) Treatment, biomechanics, and technical procedures associated with fabrication, fitting,
and servicing of various types of oral and facial prostheses.

**PROS 7200. Advanced Clinical Prosthodontics I.** (5 cr.; A-F only; Every Fall, Spring & Summer)
Practical clinical experience in examination, diagnosis, treatment planning, and various phases of treatment of patients with complex restorative dental problems. New and unfamiliar concepts and techniques. prereq: instr consent

**PROS 7210. Advanced Clinical Prosthodontics II.** (2 cr.; A-F or Audit; Every Summer)
Residents are exposed to technical aspects of complete denture, removable partial denture, fixed partial denture construction, associated use of implants, considerations related to temporomandibular dysfunction (TMD). prereq: instr consent; offered concurrently with course on dental materials, head/neck anatomy

---

**Psychology (PSY)**

**PSY 5011. Applied Behavior Analysis.** (3 cr.; Student Option No Audit; Every Spring)
Fundamental concepts of applied behavior analysis. Practical techniques of behavior modification with humans/animals. Emphasizes functional analyses of behavioral deficits/excesses, development/implementation of programs to bring about meaningful behavior change.

**PSY 5014. Psychology of Human Learning and Memory.** (3 cr.; A-F only; Spring Odd Year)

**PSY 5015. Cognition, Computation, and Brain.** (3 cr.; Student Option; Spring Odd Year)
Human cognitive abilities (perception, memory, attention) from different perspectives (e.g., cognitive psychological approach, cognitive neuroscience approach). prereq: [Honors or grad] or [jr or sr, 3011 or 3031 or 3051 or 3061] or instr consent

**PSY 5016. Behavior Analysis and Autism.** (4 cr.; A-F or Audit; Every Fall)
Off-campus work with autistic children, under professional supervision. Professional ethics, social responsibility, scientific methods, moral philosophy. At least eight hours per week, for 12 weeks, at service-learning site. One on-campus evening meeting per week. prereq: Individual auto transportation, instr consent

**PSY 5018H. Mathematical Models of Human Behavior.** (3 cr.; A-F only; Periodic Fall)
Mathematical models of complex human behavior, including individual/group decision making, information processing, learning, perception, and overt action. Specific computational techniques drawn from decision theory, information theory, probability theory, machine learning, and elements of data analysis. prereq: Math 1271 or instr consent

**PSY 5031W. Perception.** (WI; 3 cr.; Student Option; Fall Odd Year)
Cognitive, computational, and neuroscience perspectives on visual perception. Topics include color vision, pattern vision, image formation in the eye, object recognition, reading, and impaired vision. prereq: 3031 or 3051 or instr consent

**PSY 5036W. Computational Vision.** (WI; 3 cr.; Student Option; Fall Even Year)
Applications of psychology, neuroscience, computer science to design principles underlying visual perception, and cognition, action. Compares biological/physical processing of images with respect to image formation, perceptual organization, object perception, recognition, navigation, motor control. prereq: [3031 or 3051], [Math 1272 or equiv] or instr consent

**PSY 5037. Psychology of Hearing.** (3 cr.; Student Option; Periodic Fall)
Biological and physical aspects of hearing, auditory psychophysics, theories and models of hearing, perception of complex sounds including music and speech. Clinical/other applications. prereq: [MATH 1271, [3031 or 3051] or grad student

**PSY 5038W. Introduction to Neural Networks.** (WI; 3 cr.; Student Option; Fall Odd Year)
Parallel distributed processing models in neural/cognitive science. Linear models, Hebbian rules, self-organization, non-linear networks, optimization, representation of information. Applications to sensory processing, perception, learning, memory. prereq: [(3061 or NSCI 3102), [MATH 1282 or 2243]] or instr consent

**PSY 5054. Psychology of Language.** (3 cr.; Student Option; Every Fall)
Theories/experimental evidence in past/present conceptions of psychology of language. prereq: Grad or [jr or sr, 3011 or 3031 or 3051 or 3061] or instr consent

**PSY 5062. Cognitive Neuropsychology.** (3 cr.; Student Option; Every Fall)
Consequences of different types of brain damage on human perception/cognition. Neural mechanisms of normal perceptual/cognitive functions. Vision/attention disorders, split brain, language deficits, memory disorders, central planning deficits. Emphasizes function/phenomenology, neural correlate of brain anatomy. prereq: Grad or [jr or sr, 3011 or 3031 or 3051 or 3061] or instr consent

**PSY 5063. Introduction to Functional MRI.** (3 cr.; A-F only; Every Fall)
How to understand and perform a brain imaging experiment. Theory and practice of functional MRI experimental design, execution, and data analysis. Students develop experimental materials/analyze their own functional MRI data. Lectures/lab exercises. prereq: Jr or sr or grad or instr consent

**PSY 5064. Brain and Emotion.** (3 cr.; A-F or Audit; Spring Odd Year)
Introduction to affective neuroscience. How brain promotes emotional/motivated behavior in animals/humans. Biological theories of emotion in historical/current theoretical contexts. Fundamental brain motivational systems, including fear, pleasure, attachment, stress, and regulation of motivated behavior. Implications for emotional development, vulnerability to psychiatric disorders. prereq: 3061 or 5061 or instr consent

**PSY 5065. Functional Imaging: Hands-on Training.** (3 cr.; Student Option; Every Spring)
Basic neuroimaging techniques/functional magnetic resonance imaging (fMRI). First half of semester covers basic physical principles. Second half students design/execute fMRI experiment on Siemens 3 Tesla scanner. prereq: [3801 or equiv], [3061 or NSCI 3101], instr consent

**PSY 5066. Neuroscience, Philosophy and Ethics.** (3 cr.; Student Option; Every Spring)
Neuroscience increasingly allows us to explain the human experience in terms of mechanistic, electrochemical processes. The current course explores philosophical issues sparked by these developments in two modules. The first module examines the ways in which human neuroscience may shed new light on age-long philosophical quandaries such as mind-body dualism, free-will, and consciousness. For example, will neuroscience solve the mind-body problem by providing a wholly physical account of human nature? Is the neural view of free-will as a logical consequence of brain states incompatible with free-will? Can all of conscious experience (qualia) be reduced to neurobiology? The second module turns to neuro-ethical questions regarding the potential benefits and harms neuroscience might bring to the moral fabric of society.

**PSY 5101. Personality: Current Theory and Research.** (3 cr.; Student Option; Spring Odd Year)
Current theory and research on personality functioning and personality structure. Descriptive, biological, evolutionary, cognitive, developmental, cultural, and narrative perspectives on personality. prereq: Psy 3001W and either Psy 3101 or Psy 5135 OR Psychology PhD student

**PSY 5135. Psychology of Individual Differences.** (3 cr.; Student Option; Periodic Spring)
Differential methods in study of human behavior. Psychological traits. Influence of age, sex, heredity, and environment in individual/group differences in ability, personality, interests, and social attitudes. prereq: [3001W or equiv] or [5862 or equiv] or instr consent

**PSY 5136. Human Abilities.** (3 cr.; Student Option; Every Spring)
Theory, methods, and applications of research in human abilities. Intelligence, aptitude, achievement, specific abilities, information processing/learning and intelligence, aptitude/treatment interactions, and quantitative
PSY 5137. Introduction to Behavioral Genetics. (3 cr.; Student Option; Every Fall) Genetic methods for studying human/animal behavior. Emphasizes nature/origin of individual differences in behavior. Twin and adoption methods. Cytogenetics, molecular genetics, linkage/association studies. prereq: 3001W or equiv or instr consent

PSY 5138. Adult Development and Aging. (3 cr.; Student Option; Spring Even Year) Theories/findings concerning age-related changes in mental health, personality, cognitive functioning, productivity are reviewed/interpreted within context of multiple biological, social, and psychological changes that accompany age. prereq: Junior, Senior or Graduate Student

PSY 5202. Attitudes and Social Behavior. (3 cr.; Student Option; Periodic Spring) Theory/research on social psychology of beliefs/attitudes. Persuasion principles. prereq: 3201 or instr consent

PSY 5204. Psychology of Interpersonal Relationships. (3 cr.; A-F only; Periodic Fall) Introduction to interpersonal relationship theory/research findings. prereq: Honors or grad student or instr consent

PSY 5205. Applied Social Psychology. (3 cr.; Student Option; Spring Odd Year) Applications of social psychology research/theory to domains such as physical/mental health, education, the media, desegregation, the legal system, energy conservation, public policy. prereq: 3201 or grad student or instr consent

PSY 5207. Personality and Social Behavior. (3 cr.; A-F or Audit; Every Fall) Conceptual/methodological strategies for scientific study of individuals and their social worlds. Applications of theory/research to issues of self, identity, and social interaction. prereq: 3101 or 3201 or honors or grad student or instr consent

PSY 5501. Vocational and Occupational Health Psychology. (3 cr.; Student Option; Every Spring) Survey of history, concepts, theories, methods, and findings of vocational/occupational health psychology. Burnout, personality, violence, stressors/stress-relations, counter productive behaviors, coping in workplace. Vocational development/adaptation, career decision-making/counseling, person-environment fit. prereq: 3001W or equiv or instr consent

PSY 5707. Personnel Psychology. (4 cr.; Student Option; Every Fall) Application of psychological research/theory regarding individual differences, psychological measurement, decision making, and learning to personnel selection, performance assessment, and occupational training. Job analysis, recruitment, selection decisions, performance appraisals, and training design, evaluation, and practice. prereq: [3001W or equiv], 3711 or instr consent

PSY 5708. Organizational Psychology. (3 cr.; Student Option; Every Spring) Psychological causes of behavior in work organizations. Consequences for individual fulfillment and organizational effectiveness. Individual differences, social perception, motivation, stress, job design, leadership, job satisfaction, teamwork, organizational culture.

PSY 5862. Psychological Measurement: Theory and Methods. (3 cr.; Student Option; Every Fall) Types of measurements (tests, scales, inventories) and their construction. Theory/measurement of reliability/validity. prereq: 3801H or MATH 1271 or grad student

PSY 5960. Topics in Psychology. (1-4 cr.; 3 cr.; Student Option; Periodic Fall, Spring) Special course or seminar. Topics listed in Class Schedule. prereq: PSY 1001, or instr consent

PSY 5993. Research Laboratory in Psychology. (3 cr.; max 18 cr.) Student Option; Every Fall & Spring) Laboratory instruction and seminars in faculty research areas. prereq: instr consent, dept consent

PSY 8004. Philosophical Psychology. (3 cr.; S-N or Audit; Periodic Spring) Selected philosophical/methodological problems. prereq: Grad student or instr consent

PSY 8010. Advanced Topics in Learning. (3 cr.; max 12 cr.); S-N or Audit; Periodic Spring) Contemporary topics in learning and behavior theory. prereq: 5012 or instr consent

PSY 8026. Neuro-Immune Interactions. (3 cr.; Student Option; Periodic Fall) Regulatory systems (neuroendocrine, cytokine, and autonomic nervous systems) linking brain and immune systems in brain-immune axis. Functional effects of bidirectional brain-immune regulation. prereq: MicB 4131 or equiv, NSc 5111 or equiv

PSY 8031. Seminar: Visual Perception. (2 cr.; max 3 cr.; Student Option; Every Fall & Spring) Cognitive, psychological, neurophysiological determinants of visual perception. Current research. prereq: 5031 or instr consent

PSY 8036. Topics in Computational Vision. (3 cr.; max 12 cr.; Student Option; Every Spring) Recent research in visual psychophysics, visual neuroscience, and computer vision. prereq: 5031 or 5036 or equiv or instr consent

PSY 8037. Psychophysics and Audition. (3 cr.; Student Option; Periodic Spring) Modern/classical psychophysics. Psychophysical/physiological correlates of audition. Theories of hearing, prereq: instr consent

PSY 8041. Seminar in Perception. (3 cr.; A-F or Audit; Fall Odd Year) Seminar. Advanced topics in auditory and visual perception. Lecture, discussion, and student-led presentations of research papers on core topics of the peripheral visual and auditory systems, cortical representations, behavioral and brain-imaging methods, and computational approaches to understanding/simulating perception. prereq: Psy grad student or instr consent

PSY 8055. Seminar: Cognitive Neuroscience. (3 cr.; Student Option; Spring Odd Year) Recent advances in analysis of neural bases of cognitive functions. prereq: 5015 or instr consent

PSY 8056. Seminar: Psychology of Language. (3 cr.; A-F or Audit; Periodic Fall & Spring) Selected topics in psycholinguistics. prereq: Grad psych major or instr consent

PSY 8061. Neuropsychopharmacology. (3 cr.; A-F or Audit; Fall Even Year) Relationships between biochemical, neurophysiological, psychological, and behavioral effects of drugs. Research in neuropsychopharmacology, behavioral pharmacology, and pharmacology of addiction. prereq: 5xxx coursework in biological psych or neuroscience or pharmacology or instr consent

PSY 8070. Seminar: Psychopharmacology. (1-3 cr.; max 12 cr.); Student Option; Every Fall & Spring) Basic issues, contemporary research. Lectures, student presentations. prereq: instr consent

PSY 8111. Biological, Cognitive, Affective, Social, Developmental and Historical Aspects of Psychopathology. (4 cr.; A-F or Audit; Every Fall) Descriptive psychopathology. Theory/research. Evaluation of current experimentation in
various behavior disorders. prereq: Clinical psych grad student, instr consent

PSY 8201. Social Cognition. (; 3 cr.; A-F or Audit; Periodic Fall) Social psychological theory/research on social inference and reasoning processes. Psychology of prejudice/stereotyping. prereq: Psych PhD candidate

PSY 8202. Close Relationships. (; 3 cr.; Student Option; Periodic Spring) Classic/contemporary theory/research on close relationships. Emphasizes romantic relationships. prereq: 5204 or instr consent

PSY 8203. Impression Management. (; 3 cr.; Student Option; Periodic Fall) Classic and contemporary theory and research concerning interpersonal strategies of impression management and interplay between private and public self. prereq: Grad psych major; 8208 recommended; instr consent

PSY 8204. Social Psychology of Prejudice and Intergroup Relations. (; 3 cr.; A-F or Periodic Fall) Approaches, findings, and controversies in research on social psychology of prejudice, racial attitudes, and intergroup relations. Focuses on approaches based in social psychology and on related work from political science and sociology.

PSY 8205. Principles of Social Psychology. (; 3 cr. [max 15 cr.]; Student Option; Every Fall) Contemporary theoretical positions and related research. prereq: Psy PhD student

PSY 8206. Proseminar in Social Psychology. (; 1 cr. [max 5 cr.]; S-N only; Every Spring) Current research topics in social psychology. prereq: [PSY 8205, Social Psych PhD student] or instr consent

PSY 8208. Social Psychology: The Self. (; 3 cr.; A-F or Audit; Every Spring) Social psychological theory and research concerning the self and social behavior. prereq: Psych background especially in personality and soc psych

PSY 8209. Research Methods in Social Psychology. (; 3 cr.; A-F only; Fall Odd Year) Experimental/quasi-experimental methods for research in social psychology. Statistical, interpretive, operational, and ethical issues. prereq: Psych PhD student

PSY 8210. Law, Race, and Social Psychology. (; 3 cr.; A-F only; Periodic Fall) Interdisciplinary seminar. Scientific foundations for and legal implications of implicit (vs explicit) racial or gender bias in four socio-legal domains: criminal law, affirmative action, employment discrimination, and legislative redistricting. prereq: 2nd or 3rd yr law student or PhD student in social science doctoral program

PSY 8211. Proseminar in Political Psychology I. (; 2 cr.; S-N or Audit; Periodic Fall & Spring) Readings, discussion, and guest speakers. Topics vary each semester.

PSY 8212. Proseminar in Political Psychology II. (; 2 cr.; S-N or Audit; Periodic Fall & Spring) Readings, discussion, and guest speakers. Topics vary each semester.

PSY 8333. FTE: Master’s. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master’s student, adviser and DGS consent

PSY 8444. FTE: Doctoral. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

PSY 8501. Counseling Psychology: History and Theories. (; 3 cr.; Student Option; Every Fall) Introduction to history of counseling psychology and to primary theoretical orientations used by counseling psychologists. For each theory: basic principles, application to counseling practice, and research support. prereq: Counseling psy grad student or instr consent

PSY 8502. Assessment in Counseling Psychology. (; 3 cr.; Student Option; Every Spring) Principles and practice. Emphasizes psychometric assessment. History, foundations in measurement, basic methods, survey of instruments, test interpretation evaluation, ethics. prereq: Counseling psy grad student or instr consent

PSY 8503. Interviewing and Intervention. (; 3 cr.; Student Option; Every Fall) Skills-based course: conceptualization of counseling process, stages of counseling, development of counseling skills, and strategies for behavior change. prereq: Counseling Psy grad student or instr consent

PSY 8510. Counseling Psychology Beginning Practicum: General. (; 1-6 cr.; S-N only; Every Fall) Beginning applied experiences in counseling psychology settings. prereq: Counseling Psy grad student

PSY 8511. Counseling Psychology Beginning Practicum: General. (; 1-6 cr.; max 18 cr.; S-N only; Every Spring) Beginning applied experiences in counseling psychology settings. prereq: Counseling Psy grad student

PSY 8512. Counseling Psychology Beginning Practicum: General. (; 1-6 cr.; max 18 cr.; S-N only; Every Summer) Beginning applied experiences in counseling psychology settings. prereq: Counseling Psy grad student

PSY 8514. University Counseling Practicum I. (; 4-6 cr.; S-N only; Every Fall) Integrates science with supervised practice in University Counseling and Consulting Services (UCCS) involving career, academic, and personal counseling clientele. prereq: Counseling Psy grad student, instr consent

PSY 8515. University Counseling Practicum II. (; 4-6 cr.; S-N only; Every Spring) Integrates science with supervised practice in University Counseling and Consulting

Services (UCCS) involving career, academic, and personal counseling clientele. prereq: Counseling Psy grad student

PSY 8541. Multicultural Psychology. (; 3 cr.; Student Option; Spring Odd Year) Approaches, findings, and controversies in research on psychology of ethnic/racial minorities and other cultural populations. Emphasizes counseling/community applications of theory/research. Lecture, discussion, lab. prereq: instr consent

PSY 8542. Professional Standards and Ethics in Clinical Psychology. (3 cr.; A-F only; Every Fall) Ethical principles/codes of conduct for psychologists. Ethical dilemmas faced by researchers, practitioners, teachers. prereq: Counseling or clinical psych grad student or instr consent

PSY 8544. Vocational and Occupational Health Psychology Research. (; 3 cr.; Student Option; Spring Odd Year) Research problems specific to special populations, vocational research, assessment/testing, findings in these areas useful to counseling psychology practice. prereq: [8501, 8502, 8503] or equiv, counseling psy grad student, instr consent

PSY 8545. Counseling Psychology Process and Outcome Research. (; 3 cr.; Student Option; Spring Even Year) Research methods, empirically-supported interventions, assessing treatment outcomes in practice, research on the counseling process, applying counseling research in counseling practice and in non-counseling contexts in the "real world." Ethics and standards of research, history of counseling process and outcome research. prereq: [8501, 8502, 8503] or equiv, counseling psy grad student, instr consent

PSY 8560. Counseling Psychology Advanced Practicum I: General. (1-3 cr.; S-N only; Every Fall) Applied practice experience in counseling psychology settings and seminars. May include guest speakers, readings, and student presentations. prereq: Counseling psy grad student, instr consent

PSY 8561. Counseling Psychology Advanced Practicum II: General. (1-3 cr.; S-N only; Every Spring) Applied practice experience in counseling psychology settings and seminars that may include guest speakers, readings, and student presentations on topics relevant to clients and settings of practice experiences. prereq: Counseling psy grad student, instr consent

PSY 8562. Counseling Psychology Advanced Practicum III: General. (1-3 cr.; S-N only; Every Summer) Applied practice experience in counseling psychology settings and seminar that may include guest speakers, readings, and students presentations on topics relevant to clients and settings of practice experiences. prereq: Counseling psy grad student, instr consent

PSY 8565. Counseling Psychology Advanced Practicum I: Career Counseling
PSY 8621. Foundations in Therapeutic Intervention Applying Theory to Clinical Practice. (3 cr.; A-F or Audit; Every Fall) Professional methods in clinical psychology. Individual and group treatment techniques. Lectures and demonstrations of contemporary theories of methods of intervention with adults and or children. prereq: Clinical psych grad student

PSY 8622. Theories and Methods of Effective Intervention. (3 cr.; A-F or Audit; Spring Even Year) Methodological issues in treatment research, theories of change/motivation. Empirically supported therapies for anxiety, mood, personality disorders, psychosis, addiction. Simulating therapeutic interactions to prepare students to provide therapy. prereq: 8111, CSPR grad student

PSY 8664. Personality Assessment. (3 cr.; Student Option; Spring Even Year) Concepts/issues concerning individual differences in personality and their assessment; content, reality, and significance of personality traits; classification of personality traits; major approaches to measurement of personality. prereq: Psy grad student or instr consent

PSY 8666. Doctoral Pre-Thesis Credits. (1-6 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PSY 8881. Seminar: Quantitative and Psychometric Methods. (3 cr.; Max 15 cr.) Student Option; Every Fall) Reviews individual research on current topics in psychological measurement.

PSY 8882. Seminar: Quantitative and Psychometric Methods. (3 cr.; Max 15 cr.) Student Option; Every Spring) Reviews, individual research on current topics in psychological measurement.

PSY 8888. Thesis Credit: Doctoral. (1-24 cr.; Max 100 cr.) No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

PSY 8935. Readings in Behavioral Genetics and Individual Differences Psychology. (1 cr.; Max 10 cr.) S-N or Audit; Every Fall & Spring) Each week participants read and discuss one or two primary research articles. prereq: 5135, 5137 or instr consent

PSY 8937. Seminar in Human Behavioral Genetics. (3 cr.; Max 9 cr.) Student Option; Every Spring) Advanced topics vary with each offering. Sample topics: gene identification in complex human traits, behavioral genetics of alcoholism, twin-family methodology. prereq: 5137 or instr consent

PSY 8960. Graduate Seminar in Psychology. (1-4 cr.; Max 36 cr.) Student Option; Every Fall & Spring) Graduate seminar in subject of current interest in psychology. prereq: Psychology grad student or instr consent

PSY 8993. Directed Studies: Special Areas of Psychology and Related Sciences. (1-6 cr.; Max 48 cr.) Student Option; Every Fall & Spring) Directed studies in special areas of psychology and related sciences. prereq: Max 24 cr per semester; 15 cr total required [Plan A only]
Public Affairs (PA)

PA 5001. Intellectual Foundations of Public Action. (1.5 cr. ; Student Option; Periodic Fall & Spring)
Evolution of intellectual approaches that underlie public planning, management, and policy analysis in a democratic society. How decision making is shaped by knowledge/values. Role of rationality. Conceptual, descriptive/normative, and structure/process approaches.

PA 5002. Introduction to Policy Analysis. (1.5 cr. ; A-F or Audit; Every Fall & Spring)
Process of public policy analysis from problem structuring to communication of findings. Commonly used analytical methods. Alternative models of analytical problem resolution.

PA 5003. Introduction to Financial Analysis and Management. (1.5 cr. ; A-F or Audit; Every Fall, Spring & Summer)

PA 5004. Introduction to Planning. (3 cr. ; A-F or Audit; Every Fall)
History/institutional development of urban planning as profession. Intellectual foundations, planning theory. Roles of urban planners in U.S./international settings. Scope, legitimacy, limitations of planning/planning process. Issues in planning ethics/settings of diverse populations/stakeholders. prereq: Major/minor in urban/regional planning or instr consent

PA 5011. Management of Organizations. (3 cr. ; A-F or Audit; Every Fall & Spring)
Challenges facing higher-level managers in public and nonprofit organizations in mixed economy and democratic republic. Distinctive features of public and nonprofit management, skills necessary for effective management, manager's role as creator of public value. Lectures, case discussions.

PA 5012. The Politics of Public Affairs. (3 cr. ; A-F or Audit; Every Spring)
Stages of policy making from agenda setting to implementation. Role and behavior of political institutions, citizens, social movements, and interest groups. Concepts of political philosophy. Theories of state. Team taught, interdisciplinary course. Small discussion sections.

PA 5013. Law and Urban Land Use. (1.5 cr. ; A-F or Audit; Every Fall)
Role of law in regulating/shaping urban development, land use, environmental quality, local/regional governmental services. Interface between public/private sector. prereq: Major or minor in urban/regional planning or instr consent

PA 5021. Microeconomics for Policy Analysis. (3 cr. ; A-F or Audit; Every Fall)
Introduction to tools useful for public policy. Intermediate microeconomics.

PA 5022. Applications of Economics for Policy Analysis. (1.5-3 cr. ; max 9 cr.) ; A-F or Audit; Every Spring)
Application of economic reasoning to a wide range of contemporary public policy issues. The following topical-focused courses also fulfill the MPP economics requirement: PA 5431: Public Policies on Work and Pay, PA 5503: Economics of Development, PA 5521: Development Planning and Policy Analysis, PA 5722: Economics of Natural Resource and Environmental Policy, and PA 5805: Global Economics. prereq: 5021 or equiv

PA 5031. Statistics for Public Affairs. (4 cr. ; A-F or Audit; Every Fall)

PA 5032. Applied Regression. (2 cr. ; A-F or Audit; Every Spring)
Bivariate/multivariate models of regression analysis, assumptions behind them. Problems using these models when such assumptions are not met. prereq: [5031 or equiv] or instr consent

PA 5033. Multivariate Techniques. (2 cr. ; A-F or Audit; Every Spring)
Use of bivariate and multivariate statistical approaches for analyzing and evaluating public policy issues and the assumptions behind the analytical approaches. Designed to help students read, understand, interpret, use, and evaluate empirical work used in social sciences by policy analysts and policy makers. prereq: [5032 or 5044 or equiv] or instr consent. May fulfill stats requirements in other programs.

PA 5035. Survey Research and Data Collection. (1.5 cr. ; A-F only; Every Spring)
Introduction to survey research methods. Emphasizes applications to policy/applied research. Research design choices (e.g., descriptive, experimental, case studies), sampling, variable specification, measurement. Conducting interviews, self-administered questionnaires. Qualitative techniques.

PA 5041. Qualitative Methods for Policy Analysis. (4 cr. ; A-F only; Every Fall)
Qualitative analysis techniques, examples of application. Meet with researcher. Hands-on experience in designing, gathering, analyzing data.

PA 5042. Urban and Regional Economics. (2 cr. ; A-F only; Every Spring)
Evaluation of city existence/growth using economics. Economic forces in development of cities. Economic analysis of urban areas/land market. Economic analysis of planning issues in land use, transportation, housing, environment. prereq: [Major or minor in urban and regional planning, microeconomics course] or instr consent

PA 5043. Economic and Demographic Data Analysis. (2 cr. ; A-F only; Every Spring)
Economic/demographic data analysis techniques for urban planning. Exposure to most important data sources. Conceptual understanding of range of methods/hands-on experience in applying these methods. prereq: Major or minor in urban/regional planning or instr consent

PA 5044. Applied Regression, Accelerated. (2 cr. ; A-F only; Every Spring)
Bivariate/multivariate models used in regression analysis, including assumptions behind them/problems that arise when assumptions are not met. Course covers similar topics as PA 5032 but uses more mathematical notation/delves deeper into theory/application of methods. prereq: [5031 or equiv] or instr consent

PA 5045. Statistics for Public Affairs, Accelerated. (4 cr. ; A-F or Audit; Every Fall)
Introduces a range of quantitative tools that are commonly used to inform issues in public affairs. The course provides an introduction to descriptive statistics, probability, and statistical inference, with an emphasis on the ways in which quantitative tools are applied to a diverse range of practical policy questions. PA 5045 is an accelerated treatment of applied statistics for public affairs and serves as a more mathematically and conceptually rigorous alternative to PA 5031.

PA 5051. Public Affairs Leadership I. (; 2 cr. ; A-F only; Every Fall)
Leadership theories, tools, and strategies in global context for the mid-career student. prereq: Major in public affairs (cohort) or public affairs certificate (cohort); 5051-5052 must be taken in same academic yr

PA 5052. Public Affairs Leadership II. (; 2 cr. ; A-F only; Every Spring)
Continues 5051. Leadership theories, tools, and strategies in global context for the mid-career student. prereq: Major in public affairs (cohort) or public affairs certificate (cohort); 5051-5052 must be taken in same academic yr

PA 5053. Policy Analysis in Public Affairs. (; 2 cr. ; A-F only; Every Fall)
Process of public policy and program analysis, including problem formulation, program design and implementation. Opportunity to draw upon published research and conduct field-based research to understand implementation conditions. Professional communications, including writing of memos, requests for proposals, and implementation briefs, are stressed. prereq: Major in public affairs (cohort) or public affairs certificate (cohort); 5053-5054 must be taken in same academic yr

PA 5054. Program Design and Implementation Analysis. (; 2 cr. ; A-F only; Every Spring)
PA 5053. Process of public policy and program analysis, including problem formulation, program design and implementation. Opportunity to draw upon published research and conduct field-based research to understand implementation conditions. Professional communications, including writing of memos, requests for proposals, and implementation briefs, are stressed. prereq: Major in public affairs (cohort) or public affairs certificate (cohort); 5053-5054 must be taken in same academic yr.

PA 5055. Qualitative Research Methods and Analysis. (2 cr.; A-F only; Every Fall) Problem-based learning of analytical reasoning through social science research methods. Systematic review and literature review. Qualitative research including interviews, focus groups, and analysis. Research proposal. prereq: Major in public affairs or public affairs certificate; 5055-5056 must be taken in same academic yr.

PA 5056. Quantitative Research Methods and Analysis. (2 cr.; A-F only; Every Spring) Problem-based learning to analytical reasoning through social science research methods. Frequency distributions, descriptive statistics, elementary probability, statistical inference. Hypothesis testing. Cross-tabulation, analysis of variance, correlation. Simple regression analysis. prereq: Major in public affairs or public affairs certificate; 5055-5056 must be taken in same academic yr.

PA 5080. Capstone Preparation Workshop. (1 cr.; S-N only; Every Fall, Spring & Summer) Project management, qualitative research, and critical framework to complete Capstone course. Students write draft of client project group norms and client contract.

PA 5081. Working in Teams: Crossing Disciplines and Learning from Difference. (0.5 cr.; S-N only; Every Fall) Principles/skills necessary to create high-performing multi-disciplinary/multi-cultural teams. prereq: Major in development practice, public affairs, public policy, urban and regional planning, or sci, tech, and environ policy.

PA 5101. Management and Governance of Nonprofit Organizations. (3 cr.; Student Option; Every Fall) Theories, concepts, and real world examples of managerial challenges. Governance systems, strategic management practices, effect of funding environments, management of multiple constituencies. Types of nonprofits using economic/behavioral approaches. prereq: Grad student or instr consent.

PA 5103. Leadership and Change. (3 cr.; Student Option; Every Fall) Models of change/leadership. How leaders can promote personal, organizational, and societal change. Case studies, action research. Framework for leadership and change.

PA 5104. Strategic Human Resource Management. (3 cr.; A-F or Audit; Every Fall) Theory/practice of developing, utilizing, and aligning human resources to improve culture/outcomes of nonprofit/public organizations. HR strategy, individual diversity, leadership, selection, training, compensation, classification, performance appraisal, future HR practices. prereq: Grad student or instr consent.

PA 5105. Integrative Leadership Seminar. (3 cr.; Student Option No Audit; Every Spring) Basic concepts, practices, people, and organizations associated with integrative leadership. Case materials, related readings, presentations, and interactive discussion. prereq: Grad student or instr consent.

PA 5106. Government, Ethics and the Public Will. (1-3 cr.; Student Option No Audit; Every Spring) Links between core ethical values/formation documents that have shaped democracy in United States or student's homeland. Ethics/agency. Ethics in context of leadership development. Compose narrative of ethical practice. prereq: Grad student or instr consent.

PA 5107. Leadership, Reflective Practice, and Critical Theory: A Practicum. (2 cr.; Student Option; Every Fall) For students immersed in a cultural shift, organization, or leadership form who wish to learn how to negotiate international, cross-cultural/political contradictions. Critical approach to understanding adult learning. How to perceive and challenge dominant ideology, unmask power, contest hegemony, overcome alienation, and practice democracy. prereq: Grad student or instr consent.

PA 5108. Board Leadership Development. (1 cr.; S-N only; Every Fall & Spring) Nonprofit board governance. Governance models, roles/responsibilities, ethics/dynamics. Current research/concepts along with current board experiences to illuminate challenges/explore solutions that build board leadership competencies. prereq: Grad student or instr consent.

PA 5113. State and Local Public Finance. (3 cr.; Student Option; Every Spring) Theory/practice of financing. Providing public services at state/local level of government. Emphasizes integrating theory/practice, applying materials to specific policy areas, and documenting wide range of institutional arrangements across/within the 50 states. prereq: Grad or instr consent.

PA 5114. Budget Analysis in Public and Nonprofit Orgs. (1.5 cr. [max 3 cr.]; Student Option; Every Spring) Techniques, terminology, concepts and skills for developing and analyzing operating and capital budgets in public and nonprofit organizations. Budget analysis using case studies, problem sets, and spreadsheets. Time value of money, cost-benefit analysis, break-even analysis, sensitivity analysis, and fiscal analysis. prereq: PA 5003.

PA 5116. Financing Public and Nonprofit Organizations. (1.5 cr.; Student Option; Every Spring) Financial resource management for public and nonprofit organizations. Short-term and long-term debt management, retirement financing, and endowment investing. Conceptual frameworks and analytical techniques applied to real-world problems. Financial management in context of national and regional economies. prereq: PA 5003; credit will not be granted if credit already received for: PA 5111.

PA 5122. Law and Public Affairs. (3 cr.; Student Option; Every Spring) Overview of evolution of American legal system. Role of courts, legislatures, and political actors in changing law. How law is used to change public policy. prereq: Grad or instr consent.

PA 5132. Mediation Training. (3 cr.; Student Option; Periodic Fall & Spring) Creating an arena for mediation. Skills/expectations needed to mediate disputes between individuals, among groups: balanced (peer or colleague), imbalanced (power differentials). Role playing, group debriefing, critique. Cases. prereq: Grad or instr consent.

PA 5135. Managing Conflict: Negotiation. (3 cr.; Student Option; Every Fall) Theories and frameworks used in negotiations. Navigating diverse audiences and an increasingly complex world. Negotiation in various arenas. Opportunities to practice skills and learn from experts. Structured exercises on issues such as compensation, union conflicts.
PA 5136. Group Process Facilitation for Organizational and Public/Community Engagement. (1 cr.; Student Option No Audit; Every Summer)
Group process facilitation components, theories, tools, techniques. Facilitator’s role in group goals and processes. Facilitation in public policy. Cross-cultural challenges. Topics may include meeting management, group decision-making, conflict, participatory leadership, and other tools.

PA 5137. Project Management in the Public Arena. (1.5 cr.; [max 3 cr.]; Student Option No Audit; Every Spring)
Project management and leadership strategies for implementing public policy, including new or revised government programs, public works, and regulations. Use of project management concepts, principles, and tools, including project definition, scoping, planning, scheduling (using the critical path method), budgeting, monitoring, staffing, and managing project teams. Application of “agile” and “extreme” project management in situations of complexity and uncertainty, including those due to the scrutiny and expectations of elected officials, the media, citizens, and other stakeholders.

PA 5144. Social Entrepreneurship. (3 cr.; A-F only; Periodic Fall & Spring)
Introduction to field of social entrepreneurship. Prepares current/future managers/leaders to create, develop, lead socially entrepreneurial organizations/initiatives. prereq: Grad student or instr consent

PA 5145. Civic Participation in Public Affairs. (3 cr.; A-F only; Every Spring)
Critique/learn various approaches to civic participation in defining/addressing public issues. Readings, cases, classroom discussion, facilitating/experiencing engagement techniques. Examine work of practitioner, design engagement process. prereq: Grad student or instr consent

PA 5151. Organizational Perspectives on Global Development & Humanitarian Assistance. (3 cr.; A-F only; Every Fall)
Organizational analysis of international development and humanitarian assistance, including perspectives from sociology, political science, psychology, public administration, and management. Examine efforts of multiple organizational players, including NGOs, governments, bi-lateral and multi-lateral organizations, corporations, foundations, and international organizations. Critical analysis of aid organizations, especially regarding ways in which they reflect and create power and privilege, the manner in which individuals’ needs and desires interact with, support, or challenge the needs of the organization, and how all of this is influenced by forces outside the boundary of the organization. Students practice developing actionable recommendations to improve the effectiveness of international aid organizations in the context of multiple (and often contested) understandings of global development needs and conflicting stakeholder demands. Readings, class discussions, mini-lectures, simulations, case analyses, group projects, oral presentations, memo writing, opinion writing.

PA 5152. Leadership to Address Global Grand Challenges. (1.5 cr.; Student Option No Audit; Every Spring)
Global grand challenges are novel, emergent, complex, and beyond the resources of any single sector to address. Skills-based course that introduces participants to integrative leadership strategies effective in addressing such challenges, with specific focus on leadership practices that foster collective action across diverse groups of people.

PA 5161. Human-Centered Service Redesign. (3 cr.; A-F or Audit; Every Fall)
This course helps to frame the significance of human-centered redesign to improve service provision and outcomes. It explores how public, nonprofit, and philanthropic structures create unique operational realities and cultures that must be navigated to lead change across institutional boundaries. It also systematically investigates contributors to disparities in the human services system? particularly race. The use of frameworks such as human-centered design, human services value curve, and an equity lens will help us on this exploration. Course learning materials take students through a design process to highlight strategies for systems change and improvement grounded in outcomes. Design processes are iterative and involve understanding and engaging the people and context in problem solving. Through project-based learning approach, students will understand the various constraints that need to be navigated in design: feasibility, viability, and desirability. Students gain experience using design to help appreciate these constraints and develop strategies for overcoming them.

PA 5162. Public Service Redesign Workshop. (3 cr.; A-F only; Every Spring)
Public service delivery innovation and redesign in health and human services fields to improve outcomes. Study and application of theories of organizational development, leadership, and system change. Social system dynamics analysis. Engaging diverse stakeholders. Effects and influence of implicit bias on current and redesigned efforts. Models and tools for public service redesign.

PA 5181. Executive Public Safety Leadership I. (2-3 cr.; Student Option No Audit; Every Fall)
Public safety executive leadership, citizen engagement, and organizational change. Understanding the self and community. Leadership foundations and methods. Public trust and legitimacy. Community participation, inclusion and problem solving. This hybrid course meets 1-2 days per month with all other coursework completed online. It is a prerequisite for PA 5182: Public Safety Leadership II. prereq: Public or nonprofit officials with experience in or with public safety agencies, including law enforcement, fire, emergency management/medical services, or military.

PA 5182. Executive Public Safety Leadership II. (2-3 cr.; Student Option No Audit; Every Spring)
Public safety executive leadership, citizen engagement, and organizational change. Applying Executive Leadership in Complex Situations. Collaboration. Leadership, bias, and diversity. Decision-making and public communications during crisis. Employee wellness and human resources leadership. Application of executive leadership in building teams. This hybrid course meets 1-2 days per month with all other coursework completed online. It is the second in a series with Public Safety Leadership I offered fall term. prereq: Public or nonprofit officials with experience in or with public safety agencies, including law enforcement, fire, emergency management/medical services, or military.

PA 5190. Topics in Public and Nonprofit Leadership and Management. (1-3 cr. [max 9 cr.]; Student Option; Every Fall)
Selected topics.

PA 5204. Urban Spatial and Social Dynamics. (3 cr.; Student Option; Every Spring)
Behavioral theories of internal spatial arrangement, functioning, characteristics of cities at macro level/how they produce system of cities. Factors influencing urban spatial structure over time. Urban form, land use/rent. Spatial expression of economic, social, political forces. prereq: urban/regional planning Major/minor in or public affairs PhD or instr consent

PA 5205. Statistics for Planning. (4 cr.; A-F only; Every Fall)
Basic statistical tools for empirical analysis in urban and regional planning, including descriptive statistics, frequency distributions, elementary probability theory, research design and sampling, statistical inference, hypothesis testing, cross-tabulation/chi-square distribution, correlation, and simple/multiple regression analysis.

PA 5209. Urban Planning and Health Equity. (3 cr.; Student Option; Every Spring)
This interdisciplinary course examines the causes and consequences of place-based health disparities in cities, explores how health disparities can be mitigated and exacerbated by urban planning decisions, and introduces best practices in urban planning for achieving community health equity. The course will involve extensive readings, guest lectures, field-based assignments, data-collection activities, and local community involvement. Twin Cities has one of the largest disparities in health outcomes in the nation and local practitioners are pioneering new urban planning solutions to reduce place-based health disparities. The course will utilize this location advantage and use the region as an immersive learning environment. Students are
expected to apply knowledge and skills learned in the class locally in the Twin Cities region. At the end of the course, students will be able to:
Understand the historical foundations, current trends and challenges, and international perspectives in connecting urban planning to health equity issues; investigate how various planning sectors and urban environment dimensions, including land use, transportation, open space, housing, food systems, and community social capital, interact to affect health disparities in cities; critically evaluate how existing planning processes and decisions respond to the needs of vulnerable populations and contribute to health equity; and develop skills to engage communities and identifying community-sensitive solutions for reducing place-based health disparities. Fulfills a requirement for graduate Health Equity Minor (http://www.sph.umn.edu/academics/minor/health-equity/).

PA 5211. Land Use Planning. (3 cr.; A-F only; Every Fall)
Physical/spatial basis for land use planning at community/regional level. Role of public sector in guiding private development. Land use regulations, comprehensive planning, growth management, innovative land use planning/policies. prereq: Major or minor in urban/regional planning or instr consent

PA 5212. Managing Urban Growth and Change. (3 cr.; Student Option; Fall Even Year)
Theory/practice of planning, promoting, and controlling economic growth/change in urban areas. Economic development tools available to state/local policymakers, historic context of their use in the United States. legal, social, and economic implementation constraints. Interactions among economic, social, and demographic trends. prereq: Grad student or instr consent

PA 5213. Introduction to Site Planning. (3 cr.; Student Option; Every Spring)
Analyzing/paring graphic plans for development or redevelopment of property. Site planning issues, process, opportunities, details, and techniques. Hands-on preparation of a site plan. Site visits, lectures, research, presentations, exam, in-class exercises. prereq: Grad student or instr consent

PA 5215. Computer Applications in Land Use Planning. (3 cr.; Student Option; Every Spring)
Geographical information system software, simulation modeling of land use/development, 3D software, the Internet. Project applications in citizen participation/decision-making. Meets weekly in mostly lab setting, prereq: Grad student or instr consent

PA 5216. Digital Graphics for Planning and Public Policy Makers. (1 cr.; A-F only; Every Fall & Spring)
Concepts, tools, and techniques of graphic representation software tools commonly used in urban planning and basic fundamentals of information design for public policy (InDesign, AutoCAD, Illustrator, PhotoShop). Workflow among programs and production of posters.

Course project utilizes individual and group work.

PA 5221. Private Sector Development. (3 cr.; Student Option; Every Spring)
Roles of various participants in land development. Investment objectives, effects of regulation. Overview of development process from private/public perspective.

PA 5231. Transit Planning and Management. (3 cr.; Student Option; Every Fall)

PA 5232. Transportation Policy, Planning, and Deployment. (3 cr.; Student Option; Periodic Fall & Spring)
Development of transportation policy, making of transportation plans, deployment of transportation technologies. Lectures, interactive case studies, role playing.

PA 5233. Sustainable Transportation. (3 cr.; A-F or Audit; Spring Odd Year)
Concepts of sustainability in movement of people/goods in cities. Techniques/best practices/methods for planning/implementing interventions to improve social, economic, environmental sustainability of communities. prereq: Grad or instr consent

PA 5242. Environmental Planning, Policy, and Decision Making. (3 cr.; A-F or Audit; Periodic Spring)
Theory and practice. Ethical, legal, and institutional frameworks relative to a range of environmental issues. Innovative environmental decision making informed by collaboration, conflict resolution, adaptive management, and resilience thinking. prereq: Grad or instr consent

PA 5251. Strategic Planning and Management. (3 cr.; Student Option No Audit; Periodic Spring)
Theory and practice of strategic planning and management for public and nonprofit organizations and networks. Strategic planning process, management systems; stakeholder analyses. Tools and techniques such as purpose expansions, SWOT analyses, oval mapping, portfolio analyses, and logic models.

PA 5253. Designing Planning and Participation Processes. (3 cr.; A-F only; Every Fall)
Theory/practice of design, implementation, evaluation of planning/participation processes. Types of planning. Stakeholders, including underrepresented groups. Costs/benefits of participation. Participant roles. Planning/participation tools/techniques. prereq: Major or minor in urban/regional planning or instr consent

PA 5261. Housing Policy. (3 cr.; A-F or Audit; Every Spring)
Institutional/environmental setting for housing policy in the United States. Competing views of solving housing problems through public intervention in the market. Federal/local public sector responses to housing problems. prereq: Grad or instr consent

PA 5271. Geographic Information Systems: Applications in Planning and Policy Analysis. (3 cr.; Student Option; Every Fall)
Introduction to GIS. Applications in public planning and policy analysis. Operational skills in GIS software. Mapping analysis of U.S. Census material. Local/state government management/planning. Spatial statistical analysis for policy/planning. prereq: Major in urban/regional planning or instr consent

PA 5281. Immigrants, Urban Planning and Policymaking in the U.S.. (3 cr.; A-F or Audit; Every Fall)
Social, political, economic experiences of contemporary U.S. immigrants. Draws from sociology, economics, demography, political science, public affairs. Local government policies/plans. Cities/suburbs as contexts for immigrants. Interactions between immigrant communities/urban planners/policymakers. prereq: Grad student or instr consent

PA 5290. Topics in Planning. (0.5-4 cr.; [max 12 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 5301. Population Methods & Issues for the United States & Global South. (3 cr.; Student Option; Periodic Spring)
Basic demographic measures/methodology. Demographic transition, mortality, fertility, Perspectives on nonmarital fertility, marriage, divorce, cohabitation. Cultural differences in family structure, aging, migration, refugee movements, population policies. Discussion of readings. prereq: Grad student or instr consent

PA 5311. Program Evaluation. (3 cr.; Student Option; Periodic Fall & Spring)
Principal methods, primary applications of evaluation research as applied to policies/programs in health/human services, education, or the environment. Conducting evaluations. Becoming a critical consumer of studies. prereq: Grad student or instr consent

PA 5390. Topics in Advanced Policy Analysis Methods. (1-4 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Topics in advanced policy analysis methods.

PA 5401. Poverty, Inequality, and Public Policy. (3 cr.; Student Option; Every Fall)
Nature/extent of poverty/inequality in the United States, causes/consequences, impact of government programs/policies. Extent/causes of poverty/inequality in other developed/developing countries. prereq: Grad or instr consent

PA 5405. Public Policy Implementation. (3 cr.; A-F or Audit; Every Fall)
Theory, tools, and practice of the implementation of public policy, particularly in areas involving public, private, and nonprofit organizations. Analytical approach focuses on multiple levels in policy fields to pinpoint and assess implementation challenges and levers for improvement.

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
PA 5412. Aging and Disability Policy. (3 cr.; Student Option; Periodic Fall & Spring) Policy debates concerning populations that are aging or disabled. Students learn/practice analyses in context of important health, social, and economic policy debates. Readings on current theory/evidence. prereq: Grad or instr consent

PA 5413. Early Childhood and Public Policy. (3 cr.; Student Option; Every Fall) State/federal/international policies/legislation touching first 5 years of child's life. Family, community, institutional roles in promoting children's social/cognitive/emotional development. Health, mental health, poverty, special needs, economic/social justice. Part of Early Childhood Pol cert. prereq: Grad or instr consent

PA 5414. Child Human Rights: Work and Education. (3 cr.; Student Option; Periodic Spring) International child labor issues. Options for improving child well-being, including policies/programs that have potential to affect the lives of millions of children. prereq: Grad student or instr consent

PA 5415. Economics of Early Childhood Development. (1.5-3 cr.; A-F only; Periodic Fall) Early childhood development (ECD) is examined from an economic perspective. Course focuses on the role of government in helping to promote ECD for purposes of social welfare and economic growth. Readings include studies of brain development as well as longitudinal studies of ECD. Students will become familiar with the importance of rigorous impact evaluations and the use of cost-benefit analysis as a tool for efficient resource allocation of child policies.

PA 5421. Racial Inequality and Public Policy. (3 cr.; Student Option No Audit; Periodic Fall & Spring) Historical roots of racial inequality in American society. Contemporary economic consequences. Public policy responses to racial inequality. Emphasizes thinking/analysis that is critical of strategies offered for reducing racism and racial economic inequality. prereq: Grad or instr consent

PA 5422. Diversity and Public Policy. (3 cr.; A-F only; Periodic Fall) Economics of diversity. Business/public administration cases for workplace diversity. Value of cultural competency in public/nonprofit organizations. Current policy debates on race, ethnicity, gender, sexual identity, and disability. prereq: Grad student or instr consent

PA 5426. Research and Policy with Marginalized Groups. (3 cr.; Student Option; Every Spring) In context of marginalized communities: Analyze public policy problems using reflexive and/or feminist methodologies, discourse analysis, critical legal theories and legal realism; develop legislative strategy and ethical advocacy plans; design ethical research protocols; problem-solve at intersection of theory and practice.

PA 5431. Public Policies on Work and Pay. (3 cr.; Student Option; Every Spring) Public policies affecting employment, hours of work, and institutions in labor markets. Public programs impacting wages, unemployment, training, collective bargaining, job security, and workplace governance. Policy implications of the changing nature of work. prereq: [IP 5031 or equiv], grad student or instr consent

PA 5441. Education Policy and the State Legislature. (3 cr.; Student Option; Periodic Fall) How Minnesota legislature decides K-12 issues. Implications for higher education. How to increase one's influence in process. Discussions with persons who influence statewide educational policy. Presentations. Field trip to state legislature. prereq: Grad or instr consent

PA 5442. Education Law and Policy. (3 cr.; Student Option No Audit; Periodic Fall) Education law and policy with focus on elementary/secondary. Topics include governance; interplay of federal, state and local law and policy; reform efforts; desegregation; achievement gap; role of teachers unions; and finance. Early childhood education discussed in connection with K-12 issues. prereq: Grad or instr consent

PA 5451. Immigration, Health and Public Policy. (3-4 cr.; A-F only; Every Fall & Spring) How to access demographic, health, and background information on US immigrants. Characteristics and health needs of immigrants. Designing culturally competent health programs. How to advocate for needed policy changes to promote immigrant health and wellbeing. Community visits required. Online course.

PA 5450. Topics in Race, Ethnicity, and Public Policy. (1-3 cr.; max 9 cr.; Student Option; Periodic Fall & Spring) Link between race/ethnicity and public policy. How to identify/measure racial/ethnic disparities and their historical/cultural origins and policy impacts and to craft politically feasible remedies. Topics may include criminal justice, housing, child welfare, and education. prereq: Jr or Sr or grad student or instr consent

PA 5490. Topics in Social Policy. (1-4 cr.; max 12 cr.; Student Option; Periodic Fall & Spring) Selected topics.

PA 5501. Theories and Policies of Development. (3 cr.; Student Option; Every Fall) What makes some countries wealthier than others, one group of people healthier and more educated than another? How does the behavior of rich nations affect poor nations? Origins of development thought, contemporary frameworks and policy debates. Economic, human, and sustainable development. prereq: Grad student or instr consent

PA 5503. Economics of Development. (3 cr.; A-F or Audit; Every Fall) Economic growth, inequality, poverty, rural/urban labor markets, risk/insurance. Investments in human capital, credit markets, gender/household economics, governance/institutional issues. Microfinance, conditional cash transfers, labor/education policies. prereq: PA 5501 or concurrent registration is required (or allowed) in PA 5501

PA 5511. Community Economic Development. (3 cr.; Student Option; Every Fall) Contexts/motivations behind community economic development activities. Alternative strategies for organizing/initiating economic development projects. Tools/techniques for economic development analysis/planning (market analysis, feasibility studies, development plans). Implementation at local level. prereq: Grad or instr consent

PA 5512. Workforce and Economic Development. (3 cr.; A-F or Audit; Spring Even Year) Economic and workforce development examined from a U.S. context, exploring how rural and urban regional economies grow, why industries/employers locate where they do, and how workers decide where to live and work. Government and economic development practices related to businesses and innovation will also be addressed. prereq: Grad or instructor consent

PA 5521. Development Planning and Policy Analysis. (4 cr.; Student Option; Every Spring) Techniques of development planning/policy analysis at national, regional, and project levels. Effects of external shocks and government interventions on national/regional economies. Macroeconomic modeling, input-output analysis, social accounting matrices/multipliers, project evaluation. prereq: 5031 or equiv recommended or instr consent

PA 5522. International Development Policy, Families, and Health. (3 cr.; Student Option; Periodic Spring) Implications of paid/unpaid labor for development policy, using household as prism. Legal/cultural use of property rights. Financial effects of ill health. Caregiving. Work-family conflict, policies that alleviate it. Role of gender. Qualitative/quantitative methods. Readings, lectures, discussions. prereq: Grad student or instr consent

PA 5561. Gender and International Development. (3 cr.; Student Option; Periodic Spring) Women and men are affected differently by development and participate differently in policy formulation and implementation. Gender-sensitive perspective. Historical, political context. Global South. Policy, practice, and experience (theory and measurement; international, national, local stakeholders;
effects of policy and practice on development). prereq: Grad or instr consent

PA 5590. Topics in Economic and Community Development. (1-3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 5601. Global Survey of Gender and Public Policy. (3 cr.; Student Option; Periodic Fall) Introduction to the key concepts and tools necessary for gender policy analysis. Survey of the major findings in the field of gender and public policy in policy areas such as poverty alleviation, health, international security, environment and work-family reconciliation. Scope includes local, national, and global policy arenas as well as exploration of gender and the politics of policy formulation.

PA 5621. Board Service in Women and Public Policy. (1 cr.; S-N only; Periodic Fall) Students serve as full members of a board of directors for a women's movement organization. Organizational leadership. How to be an effective board member. Twin Cities feminist nonprofit organizations. prereq: instr consent

PA 5690. Topics in Women, Gender and Public Policy. (0.5-3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Selected topics. prereq: Grad student or instr consent

PA 5701. Science and State. (3 cr.; Student Option; Periodic Fall & Spring) Relationship between science and contemporary society. Nature of science: Its values, processes, and ways of knowing. How science has influenced U.S. political institutions and political/judicial processes. Issues in current debate over U.S. science policy. prereq: Grad or instr consent

PA 5711. Science, Technology & Environmental Policy. (3 cr.; Student Option; Every Fall) Interplay of science, technology, the environment, and society. Approaches from across the social sciences will cover how science and technology can create new environmental pressures as well as policy challenges in a range of spheres from climate change to systems of intellectual property and international development.

PA 5712. Science to Action: All Paths. (1.5 cr.; Student Option No Audit; Every Spring) Understand practices for translating science to action for the common good, integrating action across multiple sectors: i.e., coordinating action by communities, government, for-profit, non-profit/NGO and academia. Case studies and theories are discussed to address societal grand challenge topic.

PA 5715. Survey of Current Issues in Science, Technology, and Environmental Policy. (1.5 cr.; A-F only; Every Spring) Current topics in science, technology, and environmental policy. prereq: Grad or instr consent

PA 5721. Energy Systems and Policy. (3 cr.; Student Option; Every Fall) Impact of energy production/consumption choices on environmental quality, sustainable development, and other economic/social goals. Emphasizes public policy choices for energy/environment, linkages between them.

PA 5722. Economics of Natural Resource and Environmental Policy. (3 cr.; Student Option; Every Spring) Public policy associated with natural resource use and environmental protection. Develops/apples economic concepts/methodologies/policy mechanisms. Principles of environmental/resource economics. Issues related to renewable/nonrenewable resources and environmental pollution. Focuses on scientific/political aspects of policy. prereq: [Intermediate microeconomics, intermediate policy analysis, grad student] or instr consent

PA 5723. Water Policy. (3 cr.; Student Option; Every Spring) Sociocultural, legal, economic, and environmental forces affecting supply/use of water by individuals, sectors, and governance institutions. Historical trends; water laws in United States and internationally. Institutional structures for managing water at federal, state, and local levels. Current water-related issues/policies. prereq: Grad student or instr consent

PA 5724. Climate Change Policy. (3 cr.; Student Option; Every Fall) Existing and proposed approaches to mitigate and adapt to climate change through policies that cross scales of governance (from local to global) and impact a wide range of sectors. Exploration of climate change policy from a variety of disciplinary approaches and perspectives, emphasizing economic logic, ethical principles, and institutional feasibility. How policy can be shaped in the face of a variety of competing interests to achieve commonly desired outcomes. Students develop a deep knowledge of climate change in particular countries through a team final project. prereq: Intro microecon (such as Econ 1101 or equiv)

PA 5731. Emerging Sciences and Technologies: Law, Ethics and Policy. (3 cr.; A-F only; Periodic Fall) This interdisciplinary course will examine issues at the nexus of law, ethics, public policy, and emerging sciences and technologies (ES&T) including nanotechnology, genetic and biomedical engineering, cognitive science, synthetic biology, and robotics. Topics we will explore include the role of science and technology as both a tool for and the subject of law and policy; the legal, ethical, economic, and policy implications of ES&T research and development; environmental and human health risk analysis and regulation (e.g., EPA, FDA, OSHA, and state and local regulatory mechanisms); intellectual property issues; liability issues; and global impacts. Topics will be approached from the perspective of different stakeholders (e.g., federal agencies, industry, academic researchers, the environment, international organizations, and the public) and in the context of different application areas (e.g., drugs, devices, food, agriculture, energy, environmental remediation) using a variety of interdisciplinary approaches. Students with a broad range of interests are encouraged to enroll.

PA 5741. Risk, Resilience and Decision Making. (1.5 cr.; max 3 cr.; Student Option No Audit; Every Spring) Interplay between risk analysis, decision making, and policy in the context of new and emerging technologies, environmental and human well-being, risk and resilience. Assessment methods; risk management processes, issues and methods; role/treatment of uncertainty; factors in decision making; risk-based rule making; public values; risk communication and perception. Scientific, technical, social, political, and ethical issues. prereq: Grad student or instr consent

PA 5742. Interdisciplinary Environmental Study: Practice and Design. (1.5 cr.; Student Option No Audit; Every Fall) Practice & design of interdisciplinary study to support environmental policy-making. Research design (models, experiments, quasi-experiments, case studies & meta-analysis) from a range of disciplines. Their integration in an overarching framework to address pressing STEP issues (e.g., climate change, food security, energy, future cities).

PA 5743. Acara Impact Venture Launchpad - Moving Your Idea to Impact. (1.5 cr.; A-F only; Every Spring) Introduction to design thinking, problem definition, communication, change management and leadership, non-profit and business models, and social entrepreneurship frameworks for purpose of developing idea to address environment or social problem. Presentation at end of class to panel of experts. Projects may be used in Acara Challenge competition. To register, students will submit project proposal.

PA 5751. Urban Infrastructure Systems for Sustainable and Healthy Cities. (3 cr.; A-F or Audit; Every Summer) Study social actors, engineered infrastructures/natural systems as they, together, shape health/sustainability outcomes for cities. Understand role of infrastructure design, planning, policy in sustainable cities. Learn sustainability systems concepts, local-to-global linkages, inter-disciplinary, inter-cultural skills. prereq: Grad student or instr consent

PA 5752. Material-Energy Flows & Sustainable Development. (3 cr.; A-F only; Every Fall) How do material and energy flows shape the development of a sustainable society? Part I introduces concepts of human wellbeing, sustainable development, the role of natural resources and key physical infrastructure in advancing Sustainable Development Goals (SDGs). Part II describes ways to measure progress toward SDGs, particularly those related to material and energy flows. Part III highlights pathways to work toward SDGs, emphasizing principles and concepts from environmental economics.
PA 5790. Topics in Science, Technology, and Environmental Policy. (1.5-3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 5801. Global Public Policy. (3 cr.; Student Option; Every Spring) Creation of rules, norms, institutions to regulate global activities. Policy making. How global policy making regulates interstate, national, transnational activities. Creation/enforcement of global rules. Applications to international security, political economy. prereq: Grad or instr consent

PA 5802. Global Economic Policy. (; 3 cr.; Student Option; Every Fall) Economic logic of globalization, national policy objectives, international finance/financial institutions, international trade and agreements including regional pacts and the WTO, global environmental and resource governance, immigration and emigration, and development challenges. prereq: Major in [public affairs or public policy] or instr consent

PA 5805. Global Economics. (3 cr.; A-F only; Every Fall) Global trade, exchange rates, finance, international business, and migration in context of theories and evidence that inform the policies pursued at national level. Operation of main international organizations dealing with these issues will also be examined. prereq: [5021 or equivalent] or instr consent

PA 5813. US Foreign Policy: The Institutional Basis. (3 cr.; Student Option No Audit; Every Fall) The institutions that shape, influence and manage U.S. foreign policy including their origins and culture. Structure and function of key foreign policy institutions. Academic and policy critiques of the evolving institutional realities, including the State Department decision-making process; how institutions relate to one another, the changing role of institutions such as the Department of Defense, intelligence agencies, and the Department of Homeland Security in foreign policy. Assessment of the role played by Congress, the media, and the public, including non-governmental organizations and lobbying groups, as they seek to influence Executive Branch foreign policy institutions. Meetings virtually or in person with current or former Washington policy-makers who provide insights on real time issues and institutional realities.

PA 5814. Bilateral and Multilateral Diplomacy. (3 cr.; Student Option No Audit; Every Spring) Theory, practice and profession of bilateral & multilateral diplomacy. History of diplomacy; norms, practices and international legal bases; impact of technology, cultural changes on diplomacy. Readings, discussions and simulations teach how major powers/smaller states, working alone or in blocs, use diplomacy to achieve national and regional goals.

PA 5821. Humanitarianism. (3 cr.; Student Option; Periodic Fall & Spring) Foundations, logic, dynamics, dilemmas, and consequences of humanitarianism, a form of governance that operates in the name of--and for--the international community. prereq: Grad student or instr consent

PA 5823. Managing Humanitarian and Refugee Crises: Challenges for Policymakers & Practitioners. (1 cr. [max 3 cr.]; Student Option No Audit; Periodic Fall & Spring) Examines response of governments, international organizations, NGOs, and others to global humanitarian and human rights challenges posed by civil conflict and other complex emergencies in places such as Syria, the Middle East region, South Sudan, Somalia, Burma, and elsewhere. Course will also consider and assess UN and other institutions established to address these issues (like UNOCHA and UNHCR). In addition, course will examine US policy toward humanitarian issues and refugees (including US refugee admissions).

PA 5824. International Humanitarian Crisis Simulation. (1 cr.; S-N or Audit; Every Fall) Students learn/practice humanitarian crisis response skills reflecting international standards through a multi-day, humanitarian dynamic crisis simulation. Includes training in international crisis response standards (SPHERE) and population assessment, WASH (water, sanitation and hygiene) for refugee camps, nutrition, interactive shelter design/planning, the international legal basis for humanitarian response, safety and security issues, psychosocial trauma awareness, and field hospital scenarios. Composed of class meetings and an on-site sector skill training and field crisis simulation.

PA 5825. Crisis Management in Foreign Affairs. (1.5 cr.; Student Option; Every Spring) Crisis decision making in foreign policy. Examination of the organization and structure of crisis decision-making within U.S. national security apparatus. Analysis of in-depth four foreign policy crises (Cuban Missile Crisis, Vietnam ? Tet, Iraq, and a current crisis). Crisis simulation with students in the role of national security leaders.

PA 5841. Women, Violence, and Armed Conflict. (3 cr.; A-F only; Periodic Fall & Spring) Role of women in recent armed conflicts; how women are affected by wartime as combatants, civilians, victims, and perpetrators of war violence. Conflicts in Sierra Leone, Liberia and El Salvador, where women participated in fighting forces in large numbers, as well as women's roles in the Abu Ghraib scandal, female suicide bombers, wartime sexual violence. Policy solutions offered by policymakers and NGOs to deal with problems of gender-based violence. prereq: Grad student or instr consent

PA 5851. Middle East Politics. (3 cr.; A-F only; Periodic Spring) Middle East Politics examines the domestic, regional, and transnational politics of the Middle East and North Africa. It explores key policy-relevant issues in MENA such as external intervention/occupation, human rights, social movements, political economy, religion and politics, democratization and elections, civil society, and gender. prereq: Grad or instr consent

PA 5880. Exploring Global Cities. (1.5 cr.; S-N or Audit; Every Spring) Study abroad offered in cities across globe. Opportunities to study policy/planning issues in varied contexts from comparative/inter-cultural perspective. Study/work with practitioners/peers in field. Tanzania odd years/Austria even years. Additional countries may be added in future.

PA 5885. Human Rights Policy: Issues and Actors. (3 cr.; Student Option; Every Fall) Politics of human rights issue emergence--relevant international, regional, and domestic norms; correlates of state repression; measurement of human rights abuse and remedies; human rights promotion by states, political parties, international organizations, NGOs, social movements, faith-based organizations, and providers of international development assistance.

PA 5886. Master of Human Rights Cohort Seminar I. (1 cr.; S-N only; Every Fall) The Master of Human Rights Cohort Seminar is a required course for all first-year MHR students. The course is intended to create a cohort group and ensure that all MHR students have an opportunity to work together to explore current issues related to human rights practice, focusing on emerging events or crises, and debates over policy, practice, or theory and for direct contact with and networking particularly with counterparts in the Global South. This course is in a series with, and taken before, PA 5887. prereq: First-year MHR

PA 5887. Master of Human Rights Cohort Seminar II. (1 cr.; S-N only; Every Spring) The Master of Human Rights Cohort Seminar is a required course for all first-year MHR students. The course is intended to create a cohort group and ensure that all MHR students have an opportunity to work together to explore current issues related to human rights practice, focusing on emerging events or crises, and debates over policy, practice, or theory and for direct contact with and networking particularly with counterparts in the Global South. This course is in a series with, and taken after, PA 5886.

PA 5890. Topics in Foreign Policy and International Affairs. (1.5 cr.; max 15 cr.; Student Option; Periodic Fall & Spring) Selected topics.
PA 5910. Developing Your Public Service Career. (1 cr.; S-N or Audit; Every Fall) Students investigate/analyze interests, skills, and abilities and combine them in a career plan. Develop tools to demonstrate abilities, document experiences/knowledge, and explore public service career options. Prereq: [Major in public affairs or public policy or urban/ regional planning] or [science, technology/ environmental policy] or [development practice] or instr consent

PA 5920. Skills Workshop. (0.5-4 cr. [max 48 cr.]; Student Option; Every Fall & Spring) Topics on public policy or planning skills. Topics specified in Class Schedule.

PA 5924. Intercultural Competence. (3 cr.; A-F only; Every Spring) Interacting with working effectively with diverse populations. Researching ancestry. Analyzing cross-cultural communication issues in organizations. Prejudice, discrimination, group belonging. Analyze intercultural competence of global leader. Prereq: Grad student or instr consent

PA 5925. Creating a Professional Online Portfolio. (1 cr.; S-N only; Every Spring) Build electronic portfolio reflecting knowledge/skills learned in coursework, internships, volunteer efforts, leadership roles, research activities. Promote professional selves using social networking platform. Prereq: [MPA, MPP, MS-STEP, MURP] or instr consent

PA 5926. Presentation Skills: How to Inspire Your Audience and Change the World. (1 cr.; max 2 cr.; Student Option No Audit; Every Fall) Learn techniques for making effective, persuasive presentations to different kinds of audiences. Practice is essential to improve speaking skills and reduce anxiety. Students practice by recording brief weekly presentations and making class presentations in a supportive environment. Techniques for using PowerPoint to create effective slides are practiced. Course components include presentation assignments; peer reviews; readings/videos and reflections; and class participation. May be repeated once.

PA 5927. Effective Grantwriting for Nonprofit Organizations. (1.5 cr.; A-F only; Every Fall & Spring) Grantwriting skills, processes, problems and resources for nonprofit organizations. Researching and seeking grants. Communication with potential funders and generating financial support. Collaborating effectively with the organization and clients to create substantive, fundable proposals.

PA 5929. Data Visualization: Telling Stories with Numbers. (1.5 cr.; Student Option; Every Fall & Spring) Tools for communicating quantitative information in an intelligent, effective and persuasive way. Topics covered include 1) determining which types of statistical measures are most effective for each type of data and message; 2) determining which types of design to use for communicating quantitative information; and 3) designing graphs and tables that are intelligent and compelling for communicating quantitative information.

PA 5951. Humphrey Fellows Global Commons Seminar. (1 cr. [max 6 cr.]; S-N only; Every Fall) This seminar will introduce Humphrey International Fellows to the public policy, law, and human rights landscape of Minnesota and provide opportunities for professional growth and development in accordance with the goals of the Hubert H. Humphrey International Fellows Program. Through a series of lectures, presentations, trainings and site visits, fellows will be exposed to professional development opportunities, skill building, cultural education, leadership training and networking opportunities. Fellows will also have the opportunity to hear from experts in their fields of expertise, and learn best practices and strategies in public policy, law, and human rights advocacy.

PA 5962. State Governing and Legislating: Working the Process. (3 cr.; A-F only; Every Spring) The Minnesota Capitol and rules and reality of state governance and legislating. Classroom discussions, high-profile guest speakers (including legislators, lobbyists and potentially the governor), and an extensive State Capitol practicum to explore state politics and policies.

PA 5971. Survey of Election Administration. (3 cr.; Student Option No Audit; Every Fall & Spring) Survey of building blocks of election administration, from voter registration to recounts.

PA 5972. Elections and the Law. (3 cr.; Student Option No Audit; Every Fall) Theories and basic structure of the American legal system. Experience with basic tools and skills for using the law to understand and analyze issues facing election administrators across the nation. Use of election-related and non-election-related materials to prepare election administrators for interacting with counsel, legislators and the courts in carrying out their responsibilities.

PA 5973. Strategic Management of Election Administration. (2 cr.; Student Option No Audit; Every Fall) Strategic management for election administrators in the political environment. Election official tools and challenges. The role of the lawmaking process in budgeting and organizational planning.

PA 5974. Election Administration Capstone Project. (2 cr.; Student Option No Audit; Every Fall & Spring) Application of interdisciplinary methods, approaches, and perspectives from core courses. Written report of an election administration issue or problem in jurisdiction of student's choice. Research best practices and possible solutions. Final paper or presentation with findings.

PA 5975. Election Design. (2 cr.; Student Option No Audit; Every Spring) Election administration design principles, including ballot and polling place design and poll worker training materials. Application of principles of field.

PA 5976. Voter Participation. (1 cr.; Student Option No Audit; Every Fall & Summer) Voter participation issues and challenges including historical survey of voter participation in US and methods to increase voter turnout.

PA 5980. Topics in American Election Administration. (0.5-3 cr. [max 9 cr.]; Student Option; Periodic Summer) Selected topics in American election administration. Prereq: Grad student or instr consent; basic US history course recommended

PA 5981. American Institutions in Historical Perspective. (1.5 cr.; Student Option; Periodic Spring) History of churches, fraternal organizations, charities, and institutions more directly related to government. Prereq: Grad student or instr consent; basic US history course recommended

PA 5982. Data Analysis for Election Administration. (2 cr.; Student Option No Audit; Every Spring) Evidence-based election administration. Collection and analysis of quantitative data to solve problems and identify opportunities for improvement. Emphasis on pre-election forecasting for planning purposes and post-election auditing of election results.

PA 5983. Cybersecurity and Elections. (1 cr.; Student Option No Audit; Every Fall) This course will examine the history of cyberattacks on the United States and the American election system, with special attention to the 2016 election cycle. Students will explore the types of cybersecurity threats that exist and strategies to protect against them; understand the roles different levels of government can play in the process, and hear from key officials about the issues raised by the official response to election security threats at the federal, state and local levels as well as in related private sector communities.

PA 5990. Topics: Public Affairs - General Topics. (0-3 cr. [max 18 cr.]; Student Option; Periodic Fall & Spring) General topics in public policy.

PA 5993. Directed Study in Public Affairs. (1-3 cr.; Student Option; Periodic Fall, Spring & Summer) Self-directed study, with faculty advice.

PA 8003. Integrative Doctoral Seminar in Public Affairs I. (3 cr. [max 6 cr.]; A-F only; Every Fall) Lays foundation for doctoral-level study of public affairs through introduction of key concepts, literature, research questions of public affairs. Critically examines paradigms/methodologies through readings, discussions, writing assignments, research presentations. Facilitates development of dissertation research ideas. Prereq: Public Affairs doctoral student
PA 8004. Integrative Doctoral Seminar in Public Affairs II. (3 cr.; A-F only; Every Spring)
Continues PA 8003. Lays foundation for doctoral-level study of public affairs through introduction of key concepts, literature, research questions of public affairs. Critically examines paradigms/methodologies through readings, discussions, writing assignments, research presentations. Facilitates development of dissertation research ideas. prereq: Public Affairs doctoral student

PA 8005. Doctoral Research Seminar in Public Affairs. (3 cr.; A-F only; Every Spring)
Conduct of research, including ethics. Students develop and refine their research ideas. Facilitates development of dissertation research prospectus. prereq: Public Affairs doctoral student

PA 8006. Current Research in Public Affairs: Topics, Approaches, and Cultures. (1.5 cr. [max 3 cr.]; S-N only; Every Fall & Spring)
Students participate in research seminars exploring current topics, approaches, and cultures in public affairs. Students responsible for discussion, presentation, and evaluation of research, including peer review of papers and presentations. Discussion of research ethics and skills, including literature reviews, research design, data visualization, public engagement, presentation, and project management.

PA 8081. Case Study Seminar. (3 cr.; max 6 cr.; A-F only; Every Fall & Spring)
Project for external client on issue agreed upon by student, client, and instructor. Students apply interdisciplinary methods, approaches, and perspectives from core courses. Written report with analysis and policy recommendations. Oral presentation. Topics vary by term. prereq: completion of core courses or instr consent

PA 8082. Professional Paper-Writing Seminar. (3 cr.; A-F or Audit; Every Fall & Spring)
Facilitates completion of research paper on current issues in public policy, management, and science, technology and environment. Students apply interdisciplinary methods, approaches, and perspectives studied in core courses. Written report includes analysis of issue, policy recommendations. All topics accepted. Plan A students welcome. prereq: completion of core courses, or instr consent

PA 8106. Research Seminar in Management, Leadership & Governance. (3 cr.; A-F only; Fall Even Year)
This seminar provides an introduction to the research and theory of management, leadership, and governance within the public, nonprofit organizations, and cross-sector networks involved in public affairs. The course is team-taught by faculty in the Humphrey School's Leadership & Management area, and focuses on the following research literature: democracy and governance (public participation, civic engagement, and public values); organizational theory and behavior; leadership and management practices

PA 8204. Creating Good Work: Economic and Workforce Development. (4 cr.; A-F or Audit; Every Spring)
Job-oriented economic development. Theories on how/why jobs are created. Tools used by communities and economic developers (e.g., tax abatement, infrastructure, job training, entrepreneurship). Strategy, politics, effectiveness.

PA 8206. Planning Theory. (3 cr.; A-F only; Every Spring)
An overview of the major theories that have shaped the field of urban and regional planning, including the analysis of theories related to the process and substance of urban planning. prereq: Public Affairs Ph.D. student, urban planning subplan

PA 8290. Advanced Topics in Planning. (1-3 cr.; max 6 cr.; Student Option; Periodic Fall & Spring)
Selected topics.

PA 8302. Applied Policy Analysis. (4 cr.; Student Option No Audit; Periodic Fall & Spring)
Policy analysis/other applied social sciences as tools for measuring/detecting discrimination in market/nonmarket contexts. Application of modern tools of labor econometrics/race relations research to specific problems of market/nonmarket discrimination.

PA 8312. Analysis of Discrimination. (4 cr.; Student Option; Periodic Fall & Spring)
Policy analysis/other applied social sciences as tools for measuring/detecting discrimination in market/nonmarket contexts. Application of modern tools of labor econometrics/race relations research to specific problems of market/nonmarket discrimination.

PA 8331. Economic Demography. (3 cr.; A-F or Audit; Every Spring)
Classical theory, advanced econometric methods, recent empirical work, and available datasets for research in economic demography. Topics include the economics of mortality, fertility, migration, marriage, women's labor supply, intra-family bargaining, and age structure. Students develop critical analysis and academic discourse skills through in-depth discussions and replications of papers, presentations, referee-style writing assignments, and a term paper. prereq: Grad-level economic theory (PA 5021 or equiv) and econometrics (PA 5033 or equiv) and instructor permission

PA 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

PA 8386. Research Methods in Public Policy. (2 cr.; Student Option; Every Fall)
Social science research methods to analyze and develop public policies. Nature of the research process in analyzing public policies. Qualities of policy analysis and other types of research. Major data sources available to examine public policy issues in the U.S. and abroad. Statistical approaches to examining
PA 8390. Advanced Topics in Advanced Policy Analysis Methods. (3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) FTE: Doctoral prereq: Doctoral student, adviser and DGS consent

PA 8461. Global and U.S. Perspectives on Health and Mortality. (3 cr.; Student Option No Audit; Every Fall) The health of populations in developing and developed countries is very different. Within countries, great health disparities exist between more advantaged and more disadvantaged populations. When crafting policies that aim to improve population health, it is crucial to know how to measure health and how to think about the health needs of the specific population in question. This course will provide an overview to the factors driving health, mortality, and aging across different populations. In addition, students will learn the best sources of data and measures to use to describe the health status of a population. They will also be able to assess policy options that address the health of their population.

PA 8490. Advanced Topics in Social Policy. (1-3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 8590. Advanced Topics in Economic and Community Development. (1-3 cr.; [max 6 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) Doctoral Pre-Thesis Credits prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr.

PA 8686. Feminist Organizations. (3 cr.; A-F or Audit; Periodic Spring) Uses social movement literature and histories of U.S. second-wave feminism to study feminist organizations. Recurring issues and conflicts within organizations and movements examined through comparative studies of feminism in Latin America, Eastern Europe, Britain, and Italy. Methods and sources for studying feminism.

PA 8687. Women and Electoral Politics. (3 cr.; A-F or Audit; ) Political science and women's studies literature on American women and electoral politics.

PA 8690. Advanced Topics in Women, Gender and Public Policy. (1-3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 8706. Interdisciplinary Research Seminar on Science, Technology, and Environmental Policy. (3 cr.; A-F only; Every Fall) Foundational understanding of conducting research on social and policy processes concerning science, technology, and the environment. Key concepts, literature, and new and emerging research directions will be explored with the objective of developing individual research programs. prereq: Public Affairs Ph.D. student with STEP subplan

PA 8707. Interdisciplinary Sustainability Systems Research Seminar. (3 cr.; Student Option No Audit; Every Spring) Sustainability from systems perspective. Explores what environmental sustainability, health, and well being mean for people and the planet; how these attributes are measured and prioritized by different stakeholders, and how different social-ecological and infrastructural systems transition toward improved health and sustainability outcomes.

PA 8777. Thesis Credits: Master's. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PA 8790. Advanced Topics in Science, Technology, and Environmental Policy. (1-3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 8811. Strategic Issues in International Economic Policy. (3 cr.; Student Option; Periodic Fall & Spring) Compares/contrasts experiences of industrial/developing countries in trade, investment, exchange rates, and immigration.

PA 8821. National Security Policy. (3 cr.; Student Option; Every Fall) Politics and economics of national security policy. Defense policy, military strategy, and weapons procurement. While emphasis is on the United States, other countries also discussed.

PA 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) Doctoral thesis credit. prereq: [Max 18 cr per semester or summer], 24 cr required

PA 8890. Advanced Topics in Foreign Policy and International Affairs. (1-3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring) Selected topics.

PA 8921. Master's: Professional Paper (Individual Option). (1-3 cr.; Student Option; Every Fall, Spring & Summer) Students work under guidance of paper adviser and committee members to complete their Professional Paper (individual option). prereq: instr consent

PA 8922. Master's: Paper: Plan B. (1-3 cr.; Student Option; Every Fall, Spring & Summer) Masters of science in science, technology, and environmental policy majors work under guidance of paper adviser to complete their Plan B. prereq: instr consent

PA 8931. PhD Public Affairs Professional Skills I. (1 cr.; S-N or Audit; Every Summer) First of three professional skills workshops to prepare Public Affairs PhD students to be engaged scholars and public policy practitioners. Develop skills and tactics for leadership in public affairs scholarship.

PA 8932. PhD Public Affairs Professional Skills II. (1 cr.; S-N or Audit; Every Summer) Second of three professional skills workshops to prepare Public Affairs PhD students to be engaged scholars and public policy practitioners. Communicate complex policy problems and solutions with a wide variety of audiences.

PA 8933. PhD Public Affairs Professional Skills III. (1 cr.; S-N or Audit; Every Summer) Third of three professional skills workshops to prepare Public Affairs PhD students to be engaged scholars and public policy practitioners. Utilize communication platforms to engage diverse audiences. Build a digital portfolio to share research and accelerate teaching impact.

PA 8991. Independent Study. (1-0.5-3 cr. [max 6 cr.]; Student Option; Every Fall, Spring & Summer) Independent study. Limit of 6 credits applied toward a Humphrey School of Public Affairs degree or post-baccalaureate certificate program.

Public Health (PUBH)

PUBH 5099. Topics: Epidemiology and Community Health. (1-4 cr. [max 8 cr.]; Student Option; Periodic Fall, Spring & Summer) New courses or topics of interest in epidemiology, community health promotion, public health nutrition or maternal and child health. prereq: specified by course section.

PUBH 5231. Emergency Preparedness: A Public Health Perspective. (2 cr.; A-F only; Every Spring) Public health emergency preparedness, response, recovery. Introduction to field's core competencies. Various components of course, including online modules, intended to stimulate interactions among learners. Purpose, history, organization, functions, tools, activities used in field. prereq: Upper-level undergraduate students and grad/professional students in academic health sciences and fields related to public health emergency preparedness, response, and recovery. Credit will be not granted if student has completed the PUBH 5230 topic course with same title.

PUBH 6000. Topics: Community Health Promotion. (0.5-4 cr.; Student Option; Every Fall) New course offerings or topics of interest in Community Health Promotion.

PUBH 6003. Fundamentals of Alcohol and Drug Abuse for Teacher Education. (1 cr.; Student Option; Every Fall, Spring & Summer) Scientific/socio-cultural aspects of alcohol/drug problems. Emphasizes role of education
in health conservation and drug abuse prevention. prereq: Master of education student or inst or consent

**PUBH 6010. Public Health Approaches to HIV/AIDS.** (3 cr. ; Student Option; Every Fall) Survey of public health approaches to AIDS epidemic. Epidemiological/clinical features of HIV infection. Impact of AIDS on certain communities/populations. Behavior change principles as they apply to AIDS interventions. prereq: Grad student or professional school student or inst or consent

**PUBH 6015. HIV/AIDS: Epidemiology and Public Health Interventions.** (2 cr. ; Student Option; Every Fall) Current/controversial issues related to HIV/AIDS. Primary, secondary, and tertiary prevention. HIV/AIDS in resource-limited countries (including sub-Saharan Africa and Southeast Asia) and in marginalized populations. Evaluation of government policy for control of HIV/AIDS. prereq: [[6320 or 6341 or equiv], [Epi or CHE or MCH or PubH Nut] MPH student or Epi PhD student] or inst or consent

**PUBH 6020. Fundamentals of Social and Behavioral Science.** (2 cr. [max 3 cr.]; A-F only; Every Fall, Spring & Summer) Four major approaches to public health problems: psychosocial, economic, community, policy, Theory, implementation. Small groups practice skills.

**PUBH 6025. Designing e-Interventions for Public Health.** (2 cr. ; Student Option; Spring Even Year) Provide an overview of how technology may be used as a recruitment, assessment, and intervention tool in public health research and practice.

**PUBH 6035. Applied Research Methods.** (3 cr. ; Student Option; Every Fall) This course teaches basic research skills needed to plan, conduct, and analyze data from a quantitative research project. Skills include developing research questions; performing literature searches; developing questionnaires; implementing a study; coding, entering and analyzing data using STATA software; and writing reports.

**PUBH 6040. Dying and Death in Contemporary Society: Implications for Intervention.** (2 cr. ; Student Option; Every Spring) Concepts, attitudes, ethics, and lifestyle management related to dying, death, grief, and bereavement. Emphasizes intervention and educational aspects for community health and helping professionals and for educators.

**PUBH 6045. Skills for Policy Development.** (1 cr. ; Student Option; Every Spring) Skills relevant to policy development and implementation for public health-related issues.

**PUBH 6049. Legislative Advocacy Skills for Public Health.** (3 cr. ; A-F only; Every Spring) State legislature as arena for public health practice. Skills necessary to operate in that arena. Analyzing emergence, development, and resolution of legislative issues of public health importance.

**PUBH 6050. Community Health Theory and Practice I.** (3 cr. ; Student Option; Every Fall) Socioenvironmental factors influencing health-related behavior. Role of groups, institutions, social structures in encouraging healthy, unhealthy behavior. Role of interventions affecting social environment. Barriers to interventions. Individual behavior change theories.

**PUBH 6051. Community Health Theory and Practice II.** (3 cr. ; A-F only; Every Spring) Skill development for developing community health interventions, budgets, implementation plans, and grant proposals. Credit will not be granted if credit has been received for PUBH 6673.

**PUBH 6055. Social Inequalities in Health.** (2 cr. ; Student Option; Every Fall) Extent and causes of social inequalities in health. Degree to which understanding of these inequalities is hampered by methodological limitations in health research. Focuses on individual, community, and policy approaches to reducing social inequalities in health.

**PUBH 6060. Motivational Interviewing: Strategies to Effect Behavior Change.** (1 cr. ; Student Option; Every Summer) Introduction of the theoretical basis of motivational interviewing (MI) style. Using MI style in diverse contexts (clinical, community program, research) and relative to diverse behavioral issues (addictions, healthy lifestyle behaviors, chronic disease adherence).

**PUBH 6066. Building Communities, Increasing Health: Preparing for Community Health Work.** (2 cr. ; Student Option; Every Fall) Taught with Powderhorn-Phillips Cultural Wellness Center. Introduction to community building/organizing. Using culture as a resource for health, reducing barriers, identifying community assets, planning organizing strategy, understanding the impact of history. Emphasizes self-reflection and skill-building for authentic, grassroots community work.

**PUBH 6074. Mass Communication and Public Health.** (3 cr. ; Student Option; Every Spring) This course provides an overview of theory and research that lies at the intersection of mass communication and public health. We examine the potential for media exposure to influence public health outcomes, both as a product of people’s everyday interactions with media and the strategic use of media messages to accomplish public health goals. To this end, we will explore large-scale public health campaigns in the context of tobacco, obesity, and cancer screening. We also will explore news media coverage of controversial health issues, such as the human papillomavirus (HPV) vaccine, and health information in entertainment media, such as smoking in movies. This course seeks to understand whether media messages have had intended and/or unintended effects on public attitudes and behavior. Although our focus is on mass media, interpersonal, medical, and digital media sources will be considered as well.

**PUBH 6078. Public Health Policy as a Prevention Strategy.** (2 cr. ; Student Option; Every Fall) Philosophical, ethical, economic, political, efficacy rationale for policy approach to prevention. Historical/current application of prevention policy to public health problems. prereq: 2nd yr MPH or public health MS student or [Epi, Biostats, Env Hlth, HSRRP Concurrent registration is required (or allowed) in A PhD student] or inst or consent

**PUBH 6081. Sex, Sexuality, and Sexual Health.** (2 cr. ; Student Option; Every Fall) This course is a graduate-level class for students preparing for careers in public health research and practice where sex, sexuality, and sexual health are key components. It is a highly applied, highly interactive course focused on developing skills needed in sex research and sexual health practice. The teaching pedagogical approach is a “flipped classroom” where students are expected to learn the content from the assigned audiotaped lectures, movies and readings, and to come to class ready to participate in exercises, discuss case studies, complete assignments and immerse themselves in public health practice and research focused on sex, sexuality, and sexual health. The purpose of this graduate level course is to prepare health professionals for a professional career addressing community and population sexual health concerns by deepening their knowledge of and exposure to research practice in the field, increasing comfort familiarity and ability to speak on sexual health topics, and by practicing their skills. The assignments focus on hot topics in sex and sexual health, and are designed to increase knowledge of the field of sexual health, while developing skills in conceptualization, measurement, intervention design, and evaluation. Please note this course addresses the greatest challenges in sexual health facing our world, including such hot topics as the Zika virus and HIV prevention, clergy sexual abuse, campus sexual climate, sexual harassment, LGBT health disparities, contraception, abortion, women’s rights, teen sex, and unplanned pregnancy.

**PUBH 6085. Alcohol and Tobacco: Ongoing Threats to Global Health.** (2 cr. ; Student Option; Every Spring) Strategies to prevent and control tobacco and alcohol problems. Policy and community and individual strategies to reduce burden
of tobacco and alcohol problems locally, nationally, and globally. Similarities and differences in public health approaches to tobacco and alcohol prevention and control.

**PUBH 6094. Obesity and Eating Disorder Interventions.** (2 cr.; Student Option; Every Spring) Examine obesity epidemic, eating disorders, prevention and treatment approaches at multiple levels (individual, social, environmental, policy), links between obesity and eating disorders.

**PUBH 6100. Topics: Environmental Health.** (1-4 cr. [max 20 cr.]; Student Option No Audit; Every Fall, Spring & Summer) New course offering/topics in environmental health.

**PUBH 6101. Environmental Health.** (2 cr.; A-F only; Every Fall & Spring) Principles of environmental health relating to macro-/micro-environments and to products consumed or used by people. prereq: Public health [MPH or MHA or certificate] student or instr consent

**PUBH 6102. Issues in Environmental Health.** (2 cr.; A-F only; Every Fall, Spring & Summer). Current issues, principles, and methods of environmental/occupational health practice. prereq: Public health [MPH or MHA or certificate] student or health journalism MA major or nursing MS student or instr consent

**PUBH 6106. Making Sense of Health Studies.** (2 cr.; Student Option No Audit; Every Fall & Spring) How to critically evaluate health news/health research reports on which they are based to make good, well informed decisions about health/well-being.

**PUBH 6107. Excel? and Access? skills in public health settings.** (0 cr.; Student Option; Every Spring) Hands-on course on computer skills to learn a wide range of methods to manipulate public health data. Students will be given ?raw? datasets and practice computer methods to clean, filter, recode, combine, tabulate and report data within the Excel and Access environments. The course is ideal for students who may not pursue more advanced quantitative training but still want to feel comfortable using these widely available programs to produce quality datasets for further analysis, and to generate summary results or reports in their work as public health practitioners. No prerequisites

**PUBH 6108. Foundations of Global Health.** (0-2 cr.; A-F only; Every Fall) This course provides an introduction to key principles and topics in global health including macro-environments and burden of disease, identification of key health problems around the world and the main determinants, health systems and international public health organizations. In addition, we will discuss cross-cutting and timely issues in health promotion, disease control programs, and operational research in international settings.

Class exercises and discussions will focus on challenging global health problems, and strategies to address them. This course is required for those students enrolled in the School of Public Health Global Health Certificate program, and is also open to other qualified students (see Course Prerequisites). Examples of diseases and illustrations of global health problems in this class will include both infectious and non-infectious diseases and should be of interest to students in various programs.

**PUBH 6111. Preventing Pollution: Innovative Approaches to Environmental Management.** (3 cr.; Student Option; Periodic Fall & Spring) Interdisciplinary approach to pollution problems, including sustainability, pollution prevention, risk assessment, regulatory reform, and strategic environmental management. prereq: Public health student or grad student or instr consent

**PUBH 6112. Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals.** (2 cr.; Student Option; Every Fall) Introduction to risk in context of regulatory decision making. prereq: PUBH 6102 and PUBH 6109 or Intro course in toxicology/exposure analysis (e.g., PUBH 6104 Environmental Health Hazards: Introduction to Toxicology, PUBH 6103 Exposure to Environmental Hazards) or equivalent or instructor permission.

**PUBH 6113. Public Policy and Risk: Strategies for Effective Decisions and Discourse.** (3 cr.; Student Option; Periodic Fall & Spring) Introduction to policy making in public health, environment characterized by substantial risk/uncertainty. Basic mathematics of decision making under risk/uncertainty. Cognitive psychology of how people react to risk. Methods of risk communication. prereq: Public health student or grad student or instr consent

**PUBH 6115. Worker Protection Law.** (1 cr.; Student Option; Every Spring) Role of government in protecting rights of citizens. Labor movement history as starting point for discussion of systems for protecting workers in unsafe workplaces and compensating them for injuries. Laws against class-based discrimination.

**PUBH 6116. Environmental Law.** (1 cr.; Student Option; Every Spring) Questions when pollution protection law conflicts with policy encouraging the use of natural resources. Conflicts when government restricts use of property without compensating its owner. Increasing authority of government to audit businesses.

**PUBH 6120. Injury Prevention in the Workplace, Community, and Home.** (2 cr.; Student Option; Every Spring) Injury epidemiology: analyses of major injury problems affecting the public in the workplace, community, and home using epidemiologic model and conceptual framework; emphasis on strategies/program development for prevention and control.

**PUBH 6121. Topics: Injury Prevention in the Workplace, Community, and Home.** (1-2 cr.; Student Option; Every Fall, Spring & Summer) Selected projects in injury prevention.

**PUBH 6122. Seminar: Safety in the Workplace.** (1 cr.; Student Option; Every Spring) Realm of and potential risk factors for occupational safety problems. Strategies for prevention/control.

**PUBH 6123. Violence Prevention and Control: Theory, Research, and Application.** (2 cr.; Student Option; Every Spring) Analysis/critique of major theories and of epidemiological research pertinent to violence, including characteristics of violence and relevant risk factors, reporting/treatment protocols, and current/potential intervention efforts and prevention initiatives. Emphasizes interdisciplinary contributions to violence prevention/control.

**PUBH 6130. Occupational Medicine: Principles and Practice.** (2 cr.; S-N only; Every Spring) Pathogenesis of diseases caused by occupational hazards. Evaluating work-related illnesses. Overall regulatory framework governing occupational health/safety and prerequisite: Environmental health major; toxicology course recommended or instr consent

**PUBH 6132. Air, Water, and Health.** (2 cr.; A-F only; Every Spring) Issues related to providing adequate levels of clean air/water. Local water quantity/quality, air quality in developed/developing world, global air/water quality, policies meant to protect these resources.

**PUBH 6133. Global Health Seminar.** (1 cr.; S-N only; Every Spring) Aspects of global health from public health perspective. Faculty/students from different backgrounds/programs lead/discuss presentations on global health topics. prereq: Public health student or instr consent

**PUBH 6134. Sustainable Development and Global Public Health.** (2 cr.; Student Option; Every Spring) Effects of globalization on social/sustainable development. Population, war, economics, urbanization, environment, water/sanitation, communicable/non-communicable conditions. New infectious/chronic diseases, food security/environmental health. prereq: Credit will not be granted if received for 6100 or 6365

**PUBH 6140. Occupational and Environmental Epidemiology.** (2 cr.; Student Option; Every Spring) Principles/concepts in identifying health effects in workplace. Strategies for identifying excess risk, evaluating strengths/weaknesses
of research techniques, assessing bias/confounding. prereq: Coursework in epidemiology, biostatistics

**PUBH 6150. Interdisciplinary Evaluation of Occupational Health and Safety Field Problems.** (3 cr.; Student Option; Every Spring)
Guided evaluation of potential health/safety problems at work site, recommendations and design criteria for correction/evaluation of occupational health/safety programs. prereq: 6170 or instr consent

**PUBH 6151. Occupational and Environmental Health Nursing Seminar.** (1 cr.; max 6 cr.; S-N only; Every Fall & Spring)
Synthesize information from coursework/professional experience to enhance critical thinking/application to field of occupational/environmental health nursing. prereq: Enrolled in OEHN program, MS, MPH, PhD degrees

**PUBH 6154. Climate Change and Global Health.** (3 cr.; Student Option; Every Spring)
Interconnected relationships between global climate change/human health. Develop computer models to predict climate change from natural/anthropogenic forces, predict human health outcomes as result of changing climate. prereq: Students must have elementary computer skills.

**PUBH 6159. Principles of Toxicology I.** (2 cr.; A-F only; Every Fall)
This is the first of two courses that covers fundamental principles of exposure, uptake and metabolism. This course focuses on identifying the mechanisms and effects of chemical, biological, and physical agents on human health. Discussions will focus on the action of environmental agents and how they interact with humans to cause disease. Emphasis is on understanding the principles of toxicology as they apply to understanding toxicant-human interactions.

**PUBH 6160. Systems Toxicology.** (3 cr.; Student Option; Every Spring)
Application of information regarding basic pharmacokinetic principles/metabolic systems to elucidate mechanisms of toxicity induced by xenobiotic compounds. prereq: [Coursework in biochemistry, molecular biology, organic chemistry] or instr consent

**PUBH 6161. Regulatory Toxicology.** (2 cr.; Student Option; Every Spring)
In-depth introduction to laws (and associated regulations) of U.S. federal regulatory agencies, such as CPSC, EPA, FDA, OSHA, and DOT, that require/use toxicological data/information in their mission of protecting human/environmental health. prereq: Background in toxicology or pharmacology or related field is recommended

**PUBH 6162. Biomarkers.** (2 cr.; A-F only; Every Spring)
Introduce current status of molecular biomarker research, including biomarkers of chemical exposures, genetic toxicity markers, genomics-based biomarkers of susceptibility, organ/systems biomarkers. Progression of biomarker development/application from laboratory environment to clinical or population-based settings/development of public health policies/interventions. prereq: Introductory courses in toxicology and exposure analysis recommended

**PUBH 6164. Toxicological Analysis.** (2 cr.; A-F only; Every Fall)
Methods in molecular toxicology. Research facilities at University. Field trips to local organizations employing modern toxicological methods. prereq: Enrollment in toxicology concentration of Environmental Health PhD program, instr consent

**PUBH 6167. Grant Writing for Toxicological Sciences.** (2 cr.; A-F only; Every Summer)
Principles of writing an NIH-style grant proposal. prereq: Toxicological analysis, toxicology, experience in toxicological research, instr consent

**PUBH 6170. Introduction to Occupational Health and Safety.** (3 cr.; Student Option; Every Fall & Summer)
Concepts/issues in occupational health/safety. Application of public health principles/decision-making process in preventing injury/disease, promoting health of adults, protecting worker populations from environmental hazards. Observational visit to manufacturing facility. prereq: Environmental health major or instr consent

**PUBH 6172. Industrial Hygiene Applications.** (2 cr.; Student Option; Spring Odd Year)
Recognition, evaluation, and control of occupational health/safety hazards. Practice application to specific industrial hygiene problems related to gases/vapors, aerosols, and physical agents.

**PUBH 6173. Exposure to Physical Agents.** (2 cr.; Student Option; Spring Even Year)

**PUBH 6174. Control of Workplace Exposure.** (3 cr.; Student Option; Spring Odd Year)
Hierarchy of options for controlling human exposures to airborne contaminants, both gaseous/aerosol. Science/practice of process control/exhaust ventilation in workplaces/other indoor air spaces/air cleaning. Control of emissions to ambient environment.

**PUBH 6175. Environmental Measurements Laboratory.** (2 cr.; A-F only; Spring Even Year)
Measuring exposures to potentially hazardous agents in air or water. Sampling the agent. Preparing sample for analysis. Conducting analysis. Interpreting results. prereq: EH or instr consent

**PUBH 6176. Hazardous Materials and Waste Management.** (2 cr.; Student Option; Fall Even Year)
Generation, control, and disposal of hazardous materials/wastes. Recognizing, evaluating, controlling, and preventing hazards from chemicals that threaten occupational/environmental health. Lectures, case studies, workshops, field trips. prereq: [6170, courses in [chemistry, organic chemistry] or equiv] or instr consent

**PUBH 6177. Nanotechnology Health and Safety.** (0-3 cr.; Student Option; Every Fall)
As defined by ASTM, nanotechnology is the emerging field of "technologies that measure, manipulate, or incorporate materials and/or features with at least one dimension between approximately 1 and 100 nm". Toxicology studies have indicated that exposures to nanomaterials present unique health risks not encountered with their parent materials. After completing this course, students will understand how the fundamental concepts and methods of occupational hygiene are applied specifically to nanomaterials. Students will learn to use aerosol science, toxicology, product lifecycle assessment, exposure assessment, and occupational hygiene data interpretation methods comprehensively to evaluate workers’ disease risks from nanomaterial exposures and to guide intervention efforts. Emphasis will be placed on control measures appropriate for nanomaterials, and control banding approaches when data are lacking. Participants will study the handling of waste products and potential impacts of released nanoparticles on the public and the ambient environment. The course is aimed at graduate and upper-level undergraduate students in the health and basic sciences, engineering, public health, and industrial hygiene.

**PUBH 6181. Surveillance of Foodborne Diseases and Food Safety Hazards.** (2 cr.; Student Option; Every Fall)

**PUBH 6182. Emerging Infectious Disease: Current Issues, Policies, and Controversies.** (3 cr.; Student Option; Every Spring)

**PUBH 6183. Theory and Practice in Foodborne Disease Outbreak Detection, Investigation and Control.** (1 cr.; S-N only; Every Spring)
This course focuses on the practical basis for developing and implementing methods for foodborne disease outbreak detection, investigation and control; using recent outbreaks to highlight underlying principles. The course will review biological characteristics of major foodborne disease pathogens, clinical features of the illnesses they cause and epidemiologic presentations of foodborne outbreaks. The implications of these characteristics will be discussed in a problem solving, seminar format that examines theory and practice in the context of recent outbreaks.
Strategies to promote timely decision-making will be emphasized.

PUBH 6190. Environmental Chemistry. (.3 cr.; Student Option; Every Fall) Overview air, water, and soil chemistry. Pertinent environmental problems. Human/ecological multimedia exposures to chemicals in the environment. prereq: One course each in [gen chem, org chem] or instr consent

PUBH 6191. Air Pollution. (.3 cr.; A-F or Audit; Every Spring) Overview of many facets of air pollution. Primary/secondary sources. Transport mechanisms, including meteorological effects, atmospheric transformations of pollutants, and deposition processes involved in removal of pollutants. Human/ecosystem health effects, nuisance effects. Regulations/standards in place and under review that affect air pollution management. prereq: [General, organic chemistry] or instr consent

PUBH 6192. Measurement and Properties of Air Contaminants. (.2 cr.; A-F or Audit; Every Fall) Gaseous/particulate air contaminants, their occurrence in workplaces. Factors governing generation/dispersal. Criteria, rationales, and standards for measurement in workplace. Industrial hygiene measurement. Aerosol-related ill health. prereq: Good grasp of [elementary physics, chemistry, mathematics including calculus]

PUBH 6193. Advanced Topics in Human Exposure Science. (.2 cr.; A-F only; Every Fall) Designing exposure studies for epidemiologic investigations and health risk assessments. Techniques to measure/estimate human exposures to hazardous agents in non-occupational and occupational environments. prereq: 6192 or instr consent

PUBH 6200. Topics: Foundations of Interprofessional Communication and Collaboration. (.0-5.4 cr. [max 80 cr.]; S-N only; Periodic Fall) First of three phases of the Center for Interprofessional Education’s 1 HEALTH curriculum. Online hybrid course requiring students to attend small group face-to-face sessions. prereq: [MAA or MPH or MS] student

PUBH 6210. Public Health Medicine Seminar. (.1 cr.; S-N or Audit; Every Fall & Spring) Links between medical practice and public health practice. Emphasizes interdisciplinary public health interventions. Two relatively common medical problems serve to focus discussion about intersection of medicine and public health. prereq: [Public health medicine program MPH major or [MD degree or equiv], instr consent]

PUBH 6231. Global Health Capstone. (.1 cr.; Student Option; Periodic Fall & Spring) This course is designed to facilitate learners’ synthesis of the skills, knowledge, and attitudes learned throughout the Global Health Certificate courses and practiced during field experience. Each student will be

guided through the creation of a portfolio of carefully selected assignments, reflections, and experiences completed during the Certificate program, along with a resume and a final reflection. Each student will then present a portfolio at the end of the course.

PUBH 6241. American Indian Public Health and Wellness, Health Policy, Law, Health Services Administration. (2 cr.; A-F only; Every Fall) This course provides a general basis for understanding American Indian public health and wellness. Central to this area of study, is an appreciation to understand the unique governmental relationship based on how the federal government relates to tribal nations as distinct sovereign political entities, not as a racial classification. The trust responsibility is a government to government relationship as established in the U.S. Constitution. In this course students will learn about the legal responsibility of the United States to the 573 federally recognized tribes, to provide health services to American Indians. Students will examine the public health issues facing American Indian communities; review historical implications, analyze legislation, apply specific financing requirements, and gain an understanding of the unique American Indian public health system and the complex set of services, activities, collaborations and stakeholders that varies by tribe and region. It is designed to help students understand how to work respectfully and effectively with tribes and American Indian communities, to understand the basis of health services and implications of specific tribal (local and federal) law to help improve the devastating health issues currently experienced by American Indians.

PUBH 6250. Foundations of Public Health. (.2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) In this course we will examine values, contexts, principles, and frameworks of public health. We will provide an introduction to public health, consider the history of public health, social/political determinants, impact of health disparities on race, class and gender, moral and legal foundations, public health structures, historical trauma and cultural competence, health and human rights, advocacy and health equity, communication and financing, and the future of public health in the 21st century. Grounded in theory and concepts, we will incorporate core competencies and skills for public health professionals and will focus on developing problem solving and decision-making skills through critical analysis, reflection, case studies, readings, and paper assignments.

PUBH 6271. Management and Organization Within the Ambulatory Care Facility. (.4 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer) Ten-month program of on-campus (two-weeks) and off-campus study, seminar and monthly local classes with preceptors on management principles, organizational behavior, executive roles, problem solving, health care delivery, human resources, information systems, financial management, support, and patient care services/governance. prereq: Certificate of Management Studies in Health Services Administration ISP-I student or instr consent

PUBH 6272. Management and Organization in Hospital and Health Care Systems. (.4 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer) Ten-month program of on-campus (two-weeks) and off-campus study, seminar and monthly local classes with preceptors on management principles, organizational behavior, executive roles, problem solving, health care delivery, human resources, information systems, financial management, support, and patient care services/governance. prereq: Certificate of Management Studies in Health Services Administration ISP-I student or instr consent

PUBH 6273. Patient Care Management and Organization Within the Hospital and Health Care Organization. (.4 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer) Ten-month program including on-campus (two weeks) and off-campus study, seminar and monthly local classes with preceptors on management principles, organizational behavior, executive roles, problem solving, health care delivery, human resources, information systems, financial management, resource allocation, productivity/efficiency, and governance. prereq: Certificate of Management Studies in Health Services Administration ISP-I student or instr consent

PUBH 6274. Administrative and Professional Relationships Within the Ambulatory Care Facility. (.4 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer) Ten-month program. On-campus (two weeks), off-campus study. Seminar. Monthly local classes with preceptors on ethics, change theory, managed care, strategic planning, law capital finance, integrated services, joint ventures, financial planning, community health systems. prereq: Certificate of Management Studies in Health Services Administration ISP-II student or instr consent

PUBH 6275. Administrative and Professional Relationships Within the Health Care Facility. (.4 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer) Ten-month program. On-campus (two weeks), off-campus study. Seminar. Monthly local classes with preceptors on ethics, change theory, managed care, strategic planning, medical staff, law, capital finance, integrated services, joint ventures, financial planning, community health systems. prereq: Certificate of Management Studies in Health Services Administration ISP-II student or instr consent

PUBH 6276. Administrative and Professional Relationships in Patient Care Administration. (.4 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer) Ten-month program. On-campus (two weeks), off-campus. Seminar. Monthly local classes with preceptors on ethics, change theory, managed care, strategic planning, law, capital finance, integrated services, joint ventures, financial planning, community health system.
Design/implementation of clinical research protocols. IRB, FDA, and other regulations. Practical tools for survey management. prereq: [Bachelors degree or degree from health professional program or grad student in [dentistry or medicine or nursing or pharmacy or public health or veterinary medicine]], instr consent

PUBH 6320. Fundamentals of Epidemiology. (3 cr.; A-F only; Every Fall, Spring & Summer)

This course provides an understanding of basic methods and tools used by epidemiologists to study the health of populations.

PUBH 6325. Data Processing with PC-SAS. (1 cr.; Student Option; Every Spring)

Introduction to methods for transferring/processing existing data sources. Emphasizes hands-on approach to pre-statistical data processing and analysis with PC-SAS statistical software with a Microsoft Windows operating system.

PUBH 6333. Principles of Human Behavior I. (2 cr.; A-F or Audit; Fall Even Year)

Theoretical perspective on etiology/modification of health behavior in individuals/communities. prereq: Epi PhD student or instr consent

PUBH 6334. Human Behavior II. (2 cr.; A-F or Audit; Spring Even Year)

Critical evaluation of major behavioral public health intervention research. Experience in research designs/methods in health behavior intervention. prereq: [6333]. Epidemiology grad student in behavioral track) or instr consent

PUBH 6336. Advanced Seminar in Infectious Disease Epidemiology. (1 cr. [max 2 cr.]; S-N or Audit; Every Fall)

Real-world applications of infectious-disease epidemiologic principles to contemporary/controversial issues. Development of prevention/control strategies. prereq: 6341, 6385

PUBH 6341. Epidemiologic Methods I. (3 cr.; A-F only; Every Fall)

Introduction to epidemiologic concepts and methods: (1) Study design (randomized trials and observational studies); (2) Measures of exposure-disease association; (3) Casual inference and bias; (4) Confounding and effect modification.

PUBH 6342. Epidemiologic Methods II. (3 cr.; Student Option; Every Spring)

Methods and techniques for designing, implementing, analyzing, and interpretng observational epidemiologic studies, including cohort, case-control, and cross-sectional studies.

PUBH 6343. Epidemiologic Methods III. (4 cr.; Student Option; Every Fall)

Analysis/interpretation of data from various epidemiological study designs. SAS used to demonstrate epidemiological/statistical concepts in data analysis. prereq: [6342, 6451] with a grade of at least B- or instr consent

PUBH 6344. Completing the Cumulating Experience: Secondary Data Analysis. (2 cr.; Student Option; Every Spring)

Opportunity to start and finish MPH project. Secondary data analysis of cross-sectional, case-control, or cohort studies. Develop study question. Describe methods of study. Writing and interpreting results of analyzed data.

PUBH 6348. Writing Research Grants. (2 cr.; A-F or Audit; Every Fall)

Focuses on NIH research grants. Mechanisms of grant writing: specific aims, hypotheses, innovation, background, approaches, evaluation analyses, principles of informed consent, budget development, and grant-review process.

PUBH 6350. Epidemiologic Methods III: Lab. (1 cr.; Student Option; Every Fall)

Skills-based course in which students get hands-on experience in analysis of a variety of epidemiologic datasets using SAS programming to apply epidemiologic methods presented in PUBH 6343, examine crude data for outliers, data errors and distributional assumptions, debug code when programs do not run correctly, and prepare a scientific presentation with appropriate content for introduction/background, methods, results and discussion.

PUBH 6355. Pathophysiology of Human Disease. (4 cr.; Student Option; Every Fall)

Compendium of human diseases relevant to public health professionals. Focuses on cardiovascular disease, cancer, and infectious disease. Presented from epidemiologic, pathophysiologic perspective. Significance of diseases in terms of prevalence, incidence, morbidity, and mortality. Risk factors, prevention strategies. prereq: Epidemiology major or public health nutrition major or instr consent

PUBH 6363. Design and Analysis of Cluster-Randomized Trials in Epidemiology. (3 cr.; Student Option; Every Spring)

Community, school-based, and work-site trials. Trials involving randomization of other identifiable groups to study conditions. Experimental and quasi-experimental designs and threats to their validity.

PUBH 6365. Global Challenges in Infectious Disease Epidemiology. (2 cr.; Student Option; Every Fall)

This course will focus on the considerable burden due to infectious diseases within middle and low-income countries, as well as the underlying risk factors that lead to their emergence and spread. Students will learn about and review different measures of disease burden and health status. Different diseases of international public health significance will be reviewed, with a focus on epidemiologic research and methods used describe and analyze disease determinants. The course will also expose students to different interventions (prevention and control strategies) that have been used in both an emergency situation and to reduce the burden of more endemic diseases that significantly impact the health of populations. The scientific literature concerning specific diseases of interest will be examined and discussed in order to illustrate these principles. We recognize that it is impossible to cover all subjects in global health. Using a
case-study approach, the course will instead select a variety of infectious diseases of international importance. We will focus instead on approaches to dealing with these different problems, and some of the methodologies used to study them. This course will allow students to gain both skills and a greater understanding of public health research and practice as it applies to international health. prereq: [6320 or 6341, instr consent] master’s or doctoral level student in School of Public Health.

PUBH 6370. Social Epidemiology. (; 2 cr. ; Student Option; Spring Even Year) How a society’s social interactions, past and present, yield differential exposures and differences in health outcomes between persons who make up populations. New disease-specific risk factors. How well-known exposures emerge and are maintained by social system.

PUBH 6375. Screening for Disease: a Double-Edged Sword?. (2 cr. ; Student Option; Every Fall) The earliest concept of screening for disease arose in the early 1900’s with the advent of x-rays, which allowed, literally, for viewing lungs on a “screen”. The rise of screening has also been attributed to public health approaches that were employed to “screen” out pollutants from water or to protect from vector-borne diseases. The earliest application of x-rays was to identify tuberculosis. Use of x-rays for tuberculosis led to realization that the technology allowed for the early diagnosis of latent tuberculosis, thereby offering the opportunity for treatment and control of its spread in the population. Another early application of screening was to determine the mental health suitability of army recruits in World War I. Since the World War II era, screening for disease has become a routine part of medical care. Thirty-six of the 55 U.S. Preventive Services Task Force evidence-based recommendations with an A or B grade are for screening in areas such as cancer, pregnancy, cardiovascular disease, mental health, and obesity, among others. Despite the U.S. Preventive Services Task Force imprimatur on screening recommendations, routine screening is complicated not only by conflicting evidence of its efficacy, leading to disagreement among professional medical societies, but also by increasing recognition of potential physical and psychological harms that may outweigh benefits. In addition, social, economic and political forces shape screening application and policy decisions, such as whether or not to provide insurance coverage for screening tests. For example, the 2009 U.S. Preventive Services Task Force recommendations to change the age at which to begin and frequency of mammography for breast cancer led to a public outcry. Advocacy groups and professional medical societies opposed to the changes lobbied Congress to keep the old recommendations. They claimed the revised recommendations would result in unnecessary deaths. However, it should be noted that reducing mammography frequency and narrowing the age range for women to be screened would also likely reduce reimbursement for clinical screening services. The aim of this course, then, is to provide a comprehensive overview of screening methods and evaluation, and to examine the efficacy, benefits versus harms, population uptake, screening promotion, and controversies surrounding specific screening tests for various health conditions. These include, but are not limited to, cancer, cardiovascular disease, infectious disease, mental health and newborn metabolic and genetic defects. Such controversies can range from overdiagnosis and unnecessary treatment, informed decision-making, screening policies, and ethical issues. The course is designed to appeal to students in Public Health, Nursing, Pharmacy, Medicine, genetic counseling and public policy.

PUBH 6380. Ecology of Infectious Diseases. (; 3 cr. ; A-F or Audit; Every Fall) Ways in which host, agent, and environmental interactions influence transmission of infectious agents. Environmental dissemination, eradication/control, evolution of virulence, analytical/molecular tools.

PUBH 6381. Genetics in Public Health in the Age of Precision Medicine. (; 2 cr. ; Student Option; Every Fall) Mechanisms of molecular genetics. Issues related to medical/public health genetics, including basis of human diversity, Human Genome Project, novel genetic mechanisms underlying diseases, ethical/legal issues. prereq: Grad student or professional school student or instr consent

PUBH 6385. Epidemiology and Control of Infectious Diseases. (; 2 cr. ; Student Option; Every Spring) Principles and methods. Strategies for disease control and prevention, including immunization. Relevance of modes of transmission of specific agents for disease spread and prevention. Public health consequences of infectious diseases at local, national, and international levels.

PUBH 6388. Foundations of Global Health. (; 2 cr. ; Student Option; Every Fall) This course provides an introduction to key principles and topics in global health including measures of global burden of disease, identification of key health problems around the world and the main determinants, health systems and international public health organizations. In addition, we will discuss cross-cutting and timely issues in health promotion, disease control programs, and operational research in international settings. Class exercises and discussions will focus on challenging global health problems, and strategies to address them. This course is required for those students enrolled in the School of Public Health Global Health Certificate program, and is also open to other qualified students (see Course Prerequisites). Examples of diseases and illustrations of global health problems in this class will include both infectious and non-infectious diseases and should be of interest to students in various programs.

PUBH 6389. Nutritional Epidemiology. (; 2 cr. ; Student Option; Every Fall) Nutrition/disease relationships through application of epidemiologic methods. Characterization of various exposures to food/nutrient intakes, biological basis for nutrition/disease relationships. Studies of specific chronic diseases and nutritional intake. Design/interpretation of studies using nutritional measures. prereq: [6320 or 6330 or 6341], [Epidemiology MPH or Public Health Nutrition MPH or Epidemiology PhD student] or instr consent

PUBH 6390. Topics: Epidemiology. (; 0.5-4 cr. ; max 80 cr. ; Student Option; Periodic Fall, Spring & Summer) New course offerings or topics of interest in epidemiology.

PUBH 6400. Topics: Biostatistics. (; 0.5-4 cr. ; max 80 cr. ; Student Option No Audit; Periodic Fall, Spring & Summer) New course offerings or topics of interest in biostatistics.

PUBH 6414. Biostatistical Literacy. (; 3 cr. ; A-F only; Every Fall, Spring & Summer) Develop ability to read/interpret statistical results in primary literature. Minimal calculation. No formal training in any statistical programming software. Biostatistical Literacy will cover the fundamental concepts of study design, descriptive statistics, hypothesis testing, confidence intervals, odds ratios, relative risks, adjusted models in multiple linear, logistic and Poisson regression, and survival analysis. The focus will be when to use a given method and how to interpret the results, not the actual computation or computer programming to obtain results from raw data. prereq: MPH or certificate student or environmental health or instr consent

PUBH 6420. Introduction to SAS Programming. (; 1 cr. ; Student Option; Periodic Fall & Summer) Use of SAS for analysis of biomedical data. Data manipulation/description. Basic
statistical analyses (t-tests, chi-square, simple regression).

PUBH 6431. Topics in Hierarchical Bayesian Analysis. (1 cr.; Student Option No Audit; Every Summer) Hierarchical Bayesian methods combine information from various sources and are increasingly used in biomedical and public health settings to accommodate complex data and produce readily interpretable output. This course will introduce students to Bayesian methods, emphasizing the basic methodological framework, real-world applications, and practical computing.

PUBH 6432. Biostatistical Methods in Translational and Clinical Research. (1 cr.; Student Option No Audit; Periodic Summer) This short course on translational and clinical research will focus on the topics of diagnostic medicine and designing clinical research methods, application of regression models and early phase clinical trials. prerequisite: Students will benefit from having taken one or two semester courses in biostatistics or applied statistics covering up to and including multiple regression and introductory logistic regression.

PUBH 6450. Biostatistics I. (4 cr.; A-F only; Every Fall & Spring) Descriptive statistics. Gaussian probability models, point/interval estimation for means/proportions. Hypothesis testing, including t, chi-square, and nonparametric tests. Simple regression/correlation. ANOVA. Health science applications using output from statistical packages. prerequisite: [College-level algebra, health sciences grad student] or instr consent

PUBH 6451. Biostatistics II. (4 cr.; Student Option; Every Fall & Spring) Two-way ANOVA, interactions, repeated measures, general linear models. Logistic regression for cohort and case-control studies. Loglinear models, contingency tables, Poisson regression, survival data, Kaplan-Meier methods, proportional hazards models. prerequisite: [PUBH 6450 with grade of at least B, health sciences grad student] or instr consent

PUBH 6460. Essential Skills for Biostatistical Practices. (1 cr.; S-N only; Every Fall) The Essential Skills for Biostatistical Practice seminar will teach career development skills and job-relevant? computing and communications skills. Students will learn about MS-level job opportunities from biostatistics professionals from a wide range of occupational settings locally, nationally or internationally. Students will also learn practical skills needed both for their (optional) field experience and for the capstone experience course, including principles of reproducible research, how to integrate statistical output in reports, searching the literature, and research ethics. The format and course topics will vary from week to week, as described below. Some lectures will be shared with an existing seminar course for PhD students. PUBH 4803 Research Skills in Biostatistics. Attendance will be mandatory, and there will be weekly homework assignments to reinforce skills presented in class.

PUBH 6470. SAS Procedures and Data Analysis. (3 cr.; Student Option; Every Fall) SAS procedures, how they are used in various health-related datasets to answer specific problems regarding estimation, testing, or prediction. prerequisite: [PUBH 6450, 6451] or [PUBH 7405, 7406] or [Stat 5101, Stat 5102]

PUBH 6525. Introduction to Population Health: A Health System. (1 cr.; A-F only; Every Fall) Population health is the field of practice and research concerned with the health of groups of individuals and the equitable distribution of health within these groups. Populations may be defined by geographic area, by social and economic characteristics such as gender, socioeconomic status, and race/ethnicity, by disease states such as persons with mental illness or diabetes, or by enrollment in a health care plan or utilization of a specific health care organization. Population health takes an upstream approach, focusing on the social determinants of health and fundamental issues of health equity. While improving population health requires the involvement of multiple sectors such as public health agencies, health departments, education, housing, faith-based organizations and criminal justice, here we focus on how population health can be addressed from within the health system. Through partnerships with other sectors. Using case studies, we will explore how population health innovations are applied by health systems.

PUBH 6527. Healthcare Leadership and Effecting Change. (2 cr.; A-F only, Every Spring) How to become effective change leader in organizations. prerequisite: MHA student

PUBH 6535. Managerial Accounting for Health Services. (3 cr.; A-F or Audit; Every Fall, Spring & Summer) Differential, absorption, activity-based costing. Budgeting, variance analysis. Financial accounting, including transaction data and accrual accounting. Developing financial statements. Ration analysis. prerequisite: [AHC student or instr consent; experience with spreadsheets such as Excel or Lotus recommended

PUBH 6540. Health care Organizational Behavior. (2 cr.; A-F or Audit; Every Fall) Human behavior in organizations. Motivation, leadership, influence of organizational structure, informal group behavior, interpersonal relations, supervision. Emphasizes preventing/solving problems among individuals/groups in organizations. prerequisite: Health care admin student or instr consent

PUBH 6541. Statistics for Health Management Decision Making. (3 cr.; Student Option; Every Fall) Variation. Frequency distribution, measurement, probability, graphing. Significance tests, estimation, trends; data handling. Modeling, odds ratios. Prevalence, incidence and vital statistics. Research applications. Statistical approach to rational administrative decision making. Inductive teaching, lectures, computer/lab exercises. prerequisite: Health care admin student or instr consent

PUBH 6542. Management of Health Care Organizations. (3 cr.; A-F or Audit; Every Fall & Spring) Role of hospital in health services delivery. Relationships with other systems and the community. Emphasizes governance, medical staff, and role of administrator. Lectures, on-site visits to health services organizations. prerequisite: Health care admin student

PUBH 6544. Principles of Problem Solving in Health Services Organizations. (4 cr.; A-F or Audit; Every Spring) Problem-solving theory/technique. Solving a management problem within a health services organization. Presenting a report. Lectures, seminars, demonstrations. prerequisite: PUBH 6541, completed 30 hours of MHA coursework, Health care administration student

PUBH 6545. Advanced Problem Solving in Health Services Organizations. (4 cr.; A-F or Audit; Every Spring) Defining, analyzing, and solving significant senior management-level operational or health public policy problems. prerequisite: PUBH 6544 or concurrent registration is required (or allowed) in PUBH 6544, Healthcare Administration student

PUBH 6547. Health Care Human Resources Management. (2 cr.; A-F or Audit; Every Fall & Spring) Concepts in human resources management as applied to health services organizations. Relationship between human resources management and general management. Work and human resources. Compensation/benefits, personnel planning, recruitment/selection, training/development. Employee appraisal/discipline. Union-management relations. prerequisite: Health care admin student or public health admin student or instr consent

PUBH 6548. Medical Group Management. (2 cr.; A-F or Audit; Every Spring) Overview of physicians group management in integrated delivery systems. Physician/administrative roles, operational/strategic issues, alternative organizational models, risk-contracting, provider payment methods, managing change, effective communication. prerequisite: Health care admin student or instr consent

PUBH 6551. Contemporary Problems in Health Care. (1-2 cr.; Student Option; Every Fall & Spring) Current concepts, problems, principles, and future developments of health and health care, selected by students. Developing models based on current literature and research. Verbal/written presentations from policy/issue perspectives. prerequisite: Grad student

PUBH 6553. Health Care Management Ethics. (1 cr. [max 2 cr.]; A-F only; Every Fall & Spring) Ethical issues faced by health care managers as leaders of an organization, members of a profession, and coordinators of clinical
Group research thesis with verbal/written presentations. prereq: Health care admin student or instr consent

PUBH 6562. Information Technology in Health Care. (2 cr.; Student Option; Every Fall) Managing information as a strategic resource within health care organizations. Designing information technology systems to capture, combine, and transform information to measure processes/outcomes of care, support collaborative clinical decision making, support management decisions, empower patients, and improve health care operations.

PUBH 6563. Integrated Delivery Systems. (2 cr.; A-F only; Every Fall & Spring) Integrated models of health care delivery. Emphasizes organizational design, governance, operations, strategy, resource deployment, and the role of the "embedded medical practice." prereq: Hlth care admin student or instr consent

PUBH 6564. Private Purchasers of Health Care: Roles of Employers and Health Plans in U.S. Health Care System. (2 cr.; A-F or Audit; Every Fall) Development and organization of HMOs and PPOs: risk sharing, provider contracts, utilization management, quality improvement, marketing, and new product development; employer relations; Medicare and Medicaid contracting; budget processing; financial performance; pricing; government regulations. prereq: MHA or MBA or HSRP or PHA student or instr consent

PUBH 6565. Innovation of Healthcare Services. (2 cr.; A-F only; Every Fall) Designing/creating new care delivery services/experiences. Exploiting opportunities for innovation. Overcoming obstacles. Capturing value. prereq: MHA student only

PUBH 6566. Interprofessional Teamwork in Health Care. (2 cr.; Student Option; Every Fall & Summer) Leading/participating in interdisciplinary teams. Team communication, problem solving, conflict management, organizational support. prereq: [Health care admin or MHA or PUBH admin/policy student, familiarly with computerized spreadsheets] or instr consent

PUBH 6569. Healthcare Policy. (1 cr. [max 2 cr.]; A-F only; Every Fall) Public policy environment surrounding health care and public health systems. Political context of health policy. Approaches to policy formation/analysis. Tools/strategies for influencing health policy outcomes. prereq: Public health [MPH or MHA or certificate] student or instr consent

PUBH 6570. Healthcare Administration. (1-4 cr. [max 8 cr.]; Student Option; Periodic Fall, Spring & Summer) Selected readings in healthcare administration. Discussion based on readings. prereq: dept consent

PUBH 6571. Leading Performance Improvement in Health Care. (2 cr.; A-F only; Every Spring) Introduction to concepts of performance improvement in health care institutions. prereq: MHA or MPH or certificate student or instr consent

PUBH 6572. Management for Clinical Research. (2 cr.; Student Option; Every Fall) Management for clinical research. prereq: Pursuing clinical research recommended

PUBH 6573. The Nature of Clinical Care. (2 cr.; A-F only; Every Spring) Discussing clinical matters with colleagues. Students participate as peers in managing health care performance in hospitals, medical groups, and other health care delivery and public health institutions. prereq: School of Public Health student

PUBH 6577. Advanced Problem Solving in Health Services Administration. (2 cr.; A-F only; Every Spring) Capstone course. Students integrate/synthesize knowledge, attitudes, and skills acquired in curriculum and apply them to resolve management problem. prereq: MHA student

PUBH 6578. Negotiation Strategies. (2 cr.; A-F only; Every Spring) The central issues of this course deal with understanding the behavior of individuals, groups and organizations on the context of competitive situations. prereq: MHA student or instructor permission

PUBH 6589. Medical Technology Evaluation and Market Research. (2 cr.; Student Option; Every Spring) Analytical tools for formulating evaluations of innovations in medical technologies. Disseminating results to get a new product to market.

PUBH 6596. Legal Considerations in Health Services Organizations. (2 cr.; A-F or Audit; Every Fall, Spring & Summer) Laws affecting administration of hospitals and other healthcare organizations. Administrative law, corporate/business law, labor law, civil liability, tax-related issues. Legal issues relevant to administration, decision making, and planning. prereq: Health care admin student

PUBH 6600. Topics: Maternal and Child Health. (0.5-4 cr. [max 20 cr.]; Student Option; Periodic Fall, Spring & Summer) New courses or topics of interest.
countries. Social, economic, environmental, behavioral, and political factors affecting health behaviors, reproductive health, chronic and acute diseases, premature mortality and longevity. prereq: Grad level student

PUBH 6605. Reproductive and Perinatal Health. (2 cr.; Student Option; Spring Even Year)
Epidemiology, programs, services, and policies. Social, emotional, psychological, environmental, economic, and political factors that affect reproductive health, pregnancy, and childbirth. prereq: Public health student or grad student or instr consent

PUBH 6606. Children's Health: Issues, Programs, and Policies. (2 cr.; Student Option; Periodic Spring & Summer)
Overview of public health issues related to children in the United States. Focus on identifying and planning public health strategies, policies, and programs to improve health of infants and children.

PUBH 6607. Adolescent Health: Issues, Programs, and Policies. (2 cr.; Student Option; Spring Even Year)
Major public health issues of adolescents in the United States. Emphasizes prevention and health promotion strategies and effectiveness of programs and policies.

PUBH 6613. Children and Youth with Special Health Care Needs. (2 cr.; Student Option; Fall Even Year)
Principles, programs, policies, and practices for identifying/meeting needs of children/youth with special health care needs in the United States. Epidemiology, historic/current legislation, organization/delivery. Readings, online discussions, written assignments. prereq: Graduate-level student in [AHC programs or education or social work or psychology]

PUBH 6617. Practical Methods for Secondary Data Analysis. (3 cr.; Student Option; Every Fall)
Introduction to methods for finding, transferring, and processing existing data sources. Focuses on practical approaches to pre-statistical data processing and analysis with STATA using a PC with an MS Windows operating system. Complex survey samples, other survey biases. prereq: Graduate level student or instr consent

PUBH 6627. Sexuality Education: Criteria, Curricula, and Controversy. (1 cr.; Student Option; Every Fall & Spring)

PUBH 6630. Foundations of Maternal and Child Health Leadership. (3 cr.; Student Option; Every Fall)
Historical/current principles, programs, policies, and practices related to women, children, adolescents, and families. Articulating a personal leadership style/plan for development of leadership competencies. Leadership principles, skills, and models applied to improving health of MCH populations. prereq: Public Health MCH major or instr consent

PUBH 6634. Children and Families: Public Health Policy and Advocacy. (2 cr.; Student Option; Every Spring)
The course will focus on how public policies at the federal, state and local level influence children's health. Students will develop practical skills to understand, analyze, communicate, and advocate on children's policy issues. The course will include presentations and discussions with Minnesota's current leaders in children's health policy including legislators, advocates, and state commissioners. Instructor information: Lauren Gilchrist is the Senior Policy Advisor to Governor Mark Dayton. In this role, she works with commissioners, legislators, local government and stakeholders to advance health and human services policy issues for the state of Minnesota. She previously served as an advisor to the late Senator Ted Kennedy and Senator Al Franken.

PUBH 6636. Qualitative Research Methods in Public Health Practice. (2 cr.; Student Option; Every Fall)
Qualitative inquiry, selected data collection, management, analysis methods for qualitative research in public health. Current approaches to assess strength of evidence of qualitative studies in public health. Provision of practical skills that can be applied in public health settings.

PUBH 6638. Excel and Access in Public Health Settings. (1 cr.; Student Option; Every Spring)
This is a hands-on course on computer skills to learn a wide range of methods to manipulate public health data. Students will be given raw databases and practice computer methods to clean, filter, recode, combine, tabulate and report data within the Excel and Access environments. The course is ideal for students who may not pursue more advanced quantitative training but still want to feel comfortable using these widely available programs to produce quality datasets for further analysis, and to generate summary results or reports in their work as public health practitioners.

PUBH 6655. Principles and Programs in Maternal and Child Health. (2 cr.; A-F only; Every Summer)
Public health perspective for assessing/meeting health needs of women, children, adolescents, and families. Historical/current principles, programs, policies, and practices related to these populations. prereq: Maternal/child health MPH major enrolled in online program or instr consent

PUBH 6673. Grant Writing for Public Health. (1 cr.; Student Option; Every Spring)
Hands-on workshop. Identifying successful elements of a grant application. Grant review process. Critiquing a grant. Writing an application.

PUBH 6675. Women's Health. (2 cr.; Student Option; Fall Odd Year)
Programs, services, and policies that affect women's health in the United States. Methodological issues in research. Emphasizes social, economic, environmental, behavioral, and political factors. Measurement/interpretation of factors, how they translate into interventions, programs, and policies.

PUBH 6702. Integrative Leadership Seminar. (3 cr.; Student Option; Every Spring)
Explore, investigate, discuss, develop basic concepts/practices for people/organizations associated with "integrative leadership", prereq: University of Minnesota doctoral student or master's student, Integrative Leadership minor

PUBH 6703. Health Impact Assessment: A Tool to Promote Health Equity. (1.5 cr.; A-F or Audit; Every Fall)
Health is largely influenced by the upstream social determinants of health, and yet policy decision makers rarely consider health. As a result, our social and physical environments often benefit certain groups over others, leading to health disparities. Health Impact Assessment (HIA) is a tool that uses the best available evidence to uncover the health impacts of policies, plans and projects in order to influence decisions before they are finalized. Strong community engagement grounds the HIA in the health issues and topics important to those who will be impacted by the decision, leading to more equitable, healthier communities. This is a skills focused course that introduces students to the six steps of an HIA, along with relevant data sources and methods. With each step, students will be given the opportunity to practice and apply key concepts. Throughout the semester, students will work in interdisciplinary teams to develop a plan for an HIA, culminating in a group presentation. Students will also critique an HIA of their choice to see how HIAs have been used in the real world. This course will also cover emerging topics and challenges in the HIA field, including data gaps, funding, intersections with government decision making processes, and public engagement in HIAs. Students will have a chance to hear from several practitioners who will share their insights and experiences conducting HIAs in Minnesota.

PUBH 6705. Community Health Assessment. (3 cr.; Student Option; Every Spring)
Two of the three core functions of public health: health assessment, assurance. Lectures, discussion, group activities, oral presentations. prereq: concurrent registration is required (or allowed) in 6320 or concurrent registration is required (or allowed) in 6341, public hhl admin/policy or maternal/child hhl major or instr consent

PUBH 6711. Public Health Law. (2 cr.; Student Option; Every Spring & Summer)
Basic concepts of law, legislative process, and legal bases for existence/administration of public health programs. Legal aspects of current public health issues/controversies, regulatory role of government in health services system. prereq: Grad student or professional school student or instr consent

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
PUBH 6713. Global Health in a Local Context. (3 cr.; Student Option; Every Fall) Global Health in a Local Context: An experiential course on the social determinants, health equity, and leading change in Minnesota immerses students in the study of health equity, the social determinants of health, the principles and practice of global health in a local setting, and community-based healthcare. The discipline of social medicine provides a theoretical and practical framework to explore these topics. This course draws on the social sciences and social epidemiology to forge understandings of the social determinants of health; integrates the voice and decision-making power of individuals, families, and communities; is multidisciplinary and multisectoral in its responses; ensures an equity agenda; and is guided by deep, multi-faceted encounters with local contexts.

PUBH 6717. Decision Analysis for Health Care. (© 2 cr.; Student Option; Every Fall) Introduction to methods/range of applications of decision analysis and cost-effectiveness analysis in health care technology assessment, medical decision making, and health resource allocation.

PUBH 6721. Leading Collaborations. (© 1 cr.; Student Option; Every Spring) How mental health care providers located in individual organizations coordinate their activities so that care of clients is integrated. Coordination of labs and county health departments. Organizations such as rural health networks and community health information networks to achieve community-based goals. prereq: 6752 or instr consent

PUBH 6723. Lean Management in Health Care. (© 1 cr.; Student Option; Every Spring) Organizing to maximize customer value while minimizing waste. Lean management applied in Phillips Neighborhood Clinic. Observing waste. Developing basic value flow diagrams. Using problem-solving techniques to improve quality continuously. prereq: instr consent

PUBH 6724. The Health Care System and Public Health. (© 3 cr.; Student Option; Periodic Fall & Spring) Overview of health care delivery, finance systems within public health context. Components of health care system: financing, role of employers/public programs, health care delivery system, managed care. Collaborative interventions between managed care, public health, prereq: Public health or grad student or instr consent

PUBH 6726. Medical Device Industry; Business and Public Policy. (© 3 cr.; Student Option; Every Spring) Business, public policy, regulatory, technology management issues concerning medical device/biotechnology industries. Nature/effects of private-public sector interactions. Involvement by leaders in Minnesota organizations, prereq: MPH or MHA or grad student or instr consent

PUBH 6727. Health Leadership and Effecting Change. (© 2 cr.; Student Option; Every Fall, Spring & Summer) Analysis of leadership models and competencies, particularly as applied to organizational change. Applications to individual self-development and to health care organizations, prereq: Public hth MPH or MHA or certificate student or [health services research, policy/admin] MS student or instr consent

PUBH 6729. Public Health Leadership. (© 1 cr.; Student Option No Audit; Every Fall) Designed for MPH students interested in enhancing ability to improve public’s health by inspiring/mobilizing others. Core concepts of leadership theory/key competencies of effective public health leaders. prereq: School of Public Health grad student or instr consent

PUBH 6730. International Comparative Health Systems. (2 cr.; Student Option; Spring Odd Year) History and development of health systems from a socio-political perspective. Overview of relative importance and meaning of health outcomes data. Role of WHO. Students use OECD health database.

PUBH 6732. Topics and Methods in Global Health Assessment. (© 2 cr.; Student Option; Spring Odd Year) Evaluation of health populations relative to specific topics important to global health, including methodology appropriate to particular issue. Focuses on developing countries. prereq: [6705, concurrent registration is required (or allowed) in PUBH 6705 or concurrent registration is required (or allowed) in PUBH 6731 or concurrent registration is required (or allowed) in PUBH 6341] or concurrent registration is required (or allowed) in course in epidemiology, [public health MPH or environmental health [MS or PhD] or health services research/policy/administration [MS or PhD] or epidemiology PhD or clinical research MS] or instr consent

PUBH 6734. International Project Planning and Management. (© 2 cr.; Student Option No Audit; Every Spring) Practical skills for work as international project manager. Key international public health issues. Students practice management and work with local nonprofit that works internationally or domestically with refugee and immigrant populations in Minnesota. prereq: PHAP grad student or instr consent

PUBH 6735. Principles of Health Policy. (© 3 cr. [max 6 cr.]; A-F only; Every Fall) The purpose of this course is to introduce students to the policy environment that influences and shapes public health and the provision of health care services, to enhance understanding of the historical and political context of health policy, to develop strategies for analysis of health policy issues, and to communicate effectively in the policy environment. Credit will not be granted if credit has been received for PUBH 6835.

PUBH 6741. Ethics in Public Health: Professional Practice and Policy. (© 1 cr.; A-F only; Every Fall, Spring & Summer) Introduction to ethical issues in public health practice/policy. Ethical analysis, recognizing/analyzing moral issues. prereq: Public health [MPH or MHA or certificate] student or environmental health [MS or PhD] major or instr consent

PUBH 6742. Ethics in Public Health: Research and Policy. (© 1 cr.; A-F only; Every Fall, Spring & Summer) Introduction to ethical issues in public health research/policy. Ethical analysis. Recognizing/analyzing moral issues. prereq: Public health [MPH or certificate] student or [clinical research MS or Environmental health [MS or PhD] or epidemiology PhD or [health services research, policy/admin [MS or PhD]]] major or instr consent

PUBH 6744. State Health Policy and Politics. (© 2 cr.; Student Option; Every Spring) Half semester. Federal health reform debate and debate over reinstating the MN General Assistance Medical Care program. Intergovernmental relationship between the federal and state governments in health policy and finance; role of state and local policy makers and policy advocates. Political context for state health policy development.

PUBH 6751. Principles of Management in Health Services Organizations. (© 2 cr.; A-F only; Every Fall, Spring & Summer) Understanding of and improvement in the competencies of managers in organizations, particularly as applied to health services and public health organizations, prereq: [Public hth MPH or MHA or certificate] student or [environmental health MS or PhD] student or dentistry MS student or instr consent

PUBH 6755. Planning and Budgeting for Public Health. (© 2 cr.; Student Option No Audit; Every Fall & Summer) Principles of budgeting, planning, forecasting, and analyzing in nonprofit/government organizations applied to health care administration and public health, prereq: Academic Hlth Ctr grad student or instr consent

PUBH 6758. Managing Public Health Systems. (© 2 cr.; A-F only; Every Fall, Spring & Summer) Problem solving, process management, quality improvement, collaboration/partnership management. Organizing public health core functions and essential services, prereq: [6751 or concurrent registration is required (or allowed) in 6751], [public health MPH or certificate] student or environmental health [MS or PhD] major or HSRPA [MS or PhD] major

PUBH 6762. Health Finance Applications. (© 2 cr.; Student Option; Every Spring) Top management perspective of healthcare financial management responsibility in context of strategic issues. Emphasizes balancing theory and applications. Capstone course. prereq: [6558, [grad or professional school] student] or instr consent

PUBH 6765. Continuous Quality Improvement: Methods and Techniques. (3 cr.; Student Option; Every Fall) Theory/practical applications of concepts, tools, techniques of continuous quality improvement (QI) in public health/health care.
PUBH 6772. Health Disparities Capstone Seminar. (1 cr. [max 2 cr.]; Student Option No Audit; Every Spring)
Readings and discussion-based seminar. Readings emphasize practice and policy solutions to health disparities. prereq: [CSPH 5115, 2d yr MPH student completing SPH health disparities interdisciplinary concentration] or instr consent

PUBH 6780. Topics: Public Health Administration and Policy. (1-3 cr. [max 60 cr.]; A-F only; Periodic Fall & Spring)
New courses or topics of interest in public health administration/policy.

PUBH 6800. Topics: Health Services Research and Policy. (0.5-4 cr. [max 80 cr.]; Student Option; Periodic Fall, Spring & Summer)
New courses or topics of interest in health services research and policy.

PUBH 6801. Health and Human Rights. (3 cr.; Student Option; Every Fall)
Relationship of health and human rights in public health context. Philosophical frameworks/groundings. Nexus between health and human rights. Historical/contemporary topics. prereq: Grad student or professional student or instr consent

PUBH 6802. Managing Electronic Health Information. (3 cr.; Student Option; Every Fall & Spring)

PUBH 6803. Conducting a Systematic Literature Review. (3 cr.; Student Option No Audit; Every Spring)
Developing skills built on evidence-based practice. Draws on staff of Minnesota Evidence-based Practice Center. prereq: Basic knowledge of epidemiology

PUBH 6804. Community Mental Health. (2 cr.; Student Option; Fall Even Year)
Social-psychological processes that shape experience of mental health/illness. Consequences of disorders for individuals, families, and communities. Epidemiology research, theories of mental health/illness. Effect of policies related to organizing/financing services.

PUBH 6805. Introduction to Project Management for Health Professionals. (2 cr. [max 4 cr.]; A-F only; Every Summer)
Core concepts/skills for managing projects effectively, making sure they are completed on time, within budget, meeting performance objectives. prereq: Matriculation in master's program in School of Public Health, or instr consent

PUBH 6806. Principles of Public Health Research. (2 cr.; Student Option; Every Fall)
Evaluation of public health research literature and planning for independent research projects. Formulation of research question, research design, sampling techniques, use of research concepts, and data analysis. Data collection techniques, including questionnaires, interviews, and data analysis, prerequisite: PubH 6645, 6801, 6806 or instr consent

PUBH 6808. Professional and Research Practice in Health Services Research, Policy and Administration. (1 cr.; S-N only; Every Summer)
Institutional rules related to funder requirement compliance (CMS, NSF, etc.), regulatory compliance (HIPAA, FISMA), risk management related to data management. Integrating/normalizing data from disparate data sources, managing very large scale projects, organizing data warehouses, supporting collaboration with stakeholders. Professional practice and research issues. prerequisite: MS in HSRP & MPH in PHI, PubH 6450, 6451, 6806, or instr consent

PUBH 6809. Advanced Methods in Health Decision Science. (3 cr.; Student Option No Audit; Every Spring)
Methods applicable to issues of medical decision making. Analyses of environmental/safety decisions. How to apply methods at cutting-edge of clinical decision science. prerequisite: [6717 or intro course in decision analysis], some facility with mathematical notation/reasoning

PUBH 6810. Survey Research Methods. (3 cr.; Student Option No Audit; Every Spring)
Theory/application of survey research in data collection. Sampling, item development, instrument design/administration to conduct survey or be aware of issues related to design/implementation. Identification of sources of error in survey research.

PUBH 6811. Health Disparities Research: Measures, Methods, and Data. (2 cr.; Student Option No Audit; Fall Even Year)
Methods for conducting health disparities research using publicly available data sources. Interrelated issues such as conceptualization of disparities, measurement, analytic choices, and available data sources. prerequisite: [Grad or professional] student, introductory research methods course] or instr consent

PUBH 6812. Applied Projects in Health Intelligence and Analytics. (2 cr.; S-N only; Every Summer)
How to translate academic skills, research methods, data management, substantive areas to real world Health Intelligence & Analytics tasks. Complete two five-week long analytic projects provided by sponsor. Experience conducting literature reviews, organizing/describing data, estimating models, writing executive report on findings, presenting findings to sponsor. The project for this course serves as meeting the Plan B master's project requirement.

PUBH 6813. Managing Electronic Health Information. (2 cr.; Student Option No Audit; Every Spring)
Managing health information is a central function of health care organizations. Information is used for managing population health, profiling providers, and measuring quality. This course describes relational data theory, normalization, and Structured Query Language (SQL) will be used to create and query databases. Students will be introduced to the basic programming skills necessary to manage data in research projects. Programming aspects of the course will use SQL procedure in the SAS language. prerequisite: Admission to a University of Minnesota Masters program or Permission of instructor.

PUBH 6814. Data and Information for Population Health Management. (2 cr.; Student Option No Audit; Every Spring)
Information is used for managing population health surveillance, profiling providers, measuring quality, measuring resource use, and managing population health. This course describes the organizational context of health information and how to use health data to manage population health. Sources and types of health information, organizational processes affecting information quality, consistency, completeness, and accuracy, methods for organizing information, use of information for decision making, and how data can be used to provide usable information, will be discussed. prerequisite: Completion or concurrent enrollment in PubH 6813, Managing Electronic Health Information. 2 cr contains the skills necessary for completing the assigned paper/project in this course, PubH 6814, OR instructor permission.

PUBH 6815. Community-based Participatory Research. (2 cr.; Student Option No Audit; Every Fall)
This introductory course is intended for junior faculty, post-docs, graduate students and community practitioners interested in adding CBPR to their repertoire of effective approaches to understanding and addressing social and health disparities. Topics will explore the purpose and applications of CBPR; partnership formation and maintenance; issues of power, trust, race, class, and social justice; conflict resolution; ethical issues; CBPR's relationship to cultural knowledge systems, and funding CBPR projects. This is NOT a methodology course. CBPR is an approach to conducting research that is amenable to a variety of research designs and methodologies and will NOT cover topics such as survey design, quantitative methods, qualitative methods, focus groups, community needs assessment procedures, etc.

PUBH 6832. Economics of the Health Care System. (3 cr.; Student Option; Every Fall)
Development of traditional issues in health economics. Production of health, demand for health capital and health care, insurance theory and markets, managed care, pricing, physician's services, production and costs in health care institutions, role of government, cost effectiveness analysis, reform. prerequisite: [Grad or professional school] student, knowledge of [microeconomic analytical tools, analytical statistics] or instr consent
PUBH 6835. Principles of Health Policy. (2 cr.; Student Option; Every Spring) Social, political, and economic context within which U.S. health-care system developed. Influence of these contextual elements on public policies guiding/regulating organization/delivery of health services. Prereq: [Pub Hlth [MPH or certificate] or pub affairs MPA or healthcare admin MHA or [health serv research, policy/admin [MS or Phd]]] student or instr consent

PUBH 6845. Using Demographic Data for Policy Analysis. (3 cr.; A-F only; Every Spring) How to pose researchable policy questions, locate existing data, turn data into a usable format, understand data documentation, analyze data, communicate findings according to standards of the professional policy community. Quantitative issues, prereq: [Grad level research methods course, basic statistics course] or instr consent

PUBH 6855. Medical Sociology. (3 cr.; Student Option; Every Spring) Introduction to common theoretical/empirical approaches used by sociologists to study health/illness. How content reflects social inequalities in health/illness. Social processes that shape experience of health/illness. Prereq: [(Grad or professional school) student, previous experience with statistical software] or instr consent

PUBH 6861. Health Insurance. (2 cr.; A-F or Audit; Every Spring) Financing personal health care: theory of insurance, health insurance markets, cost sharing, HMOs, PPOs, public and catastrophic health insurance, and the uninsured. Emphasis on public policy. Prereq: Microecon theory course or instr consent

PUBH 6862. Cost-Effectiveness Analysis in Health Care. (3 cr.; Student Option; Every Spring) Government regulations. New technologies. Diagnosis/treatment protocols. Strengths, limitations, appropriateness of different approaches, prereq: instr consent; introductory econ course recommended

PUBH 6863. Understanding Health Care Quality. (2 cr.; A-F only; Every Fall) Introduction to assessing/assuring quality of care. Emphasizes both process and outcomes approaches, paralleling interest in appropriateness/effectiveness of care. Issues around creating needed behavioral changes.

PUBH 6864. Conducting Health Outcomes Research. (3 cr.; Student Option; Every Spring) Major concepts/principles in conducting health outcomes research that evaluates medical care. Developing study designs matched to research questions. Frequentely used study designs. Evaluating health outcomes. Analytical approaches. Prereq: Introductory course in epidemiology or health services research methods or instr consent

PUBH 6875. Practice of Health Services Research. (2 cr.; Student Option; Every Fall) How practice of health services research is conducted in various organizations. Presentations by guest lecturers from health services research organizations. How the specific organization's research is funded, how it sets an agenda, and how it carries out research. Prereq: Public health MPH or grad student or instr consent

PUBH 6876. Public Health Systems Analysis and Design. (2 cr.; Student Option No Audit; Every Fall) Basic knowledge/skills to design, develop, implement public health information systems. Systems development lifecycle, including problem definition, feasibility analysis, logical modeling, system architecture/implementation. Develop communication, analysis, management skills needed to develop information systems that meet user needs. Prereq: Grad or professional student or instr consent

PUBH 6877. Public Health Systems Analysis and Design - Practicum. (2 cr.; Student Option No Audit; Every Fall) Hands-on group project to practice skills of design, development, and implementation of public health information systems. Project teams employ site visits, interviews, surveys, and other data collection methods to gather system requirement specifications. Experience full system development lifecycle, including problem definition, feasibility analysis, logical modeling, and system architecture implementation. Prereq: Grad or professional student or instr consent, [completion of or concurrent registration is required (or allowed) in 6876]

PUBH 6878. Public Health Systems Analysis and Development Practicum. (2 cr.; S-N only; Every Fall) Individual student or student teams will conduct a full systems analysis for a public health information system for a client.

PUBH 6879. Public Health Systems Analysis and Development Practicum. (2 cr.; S-N only; Every Spring) Individual students or student teams will conduct a full systems analysis for a public health information system for a client.

PUBH 6880. Introduction to Public Health Informatics. (2 cr.; A-F or Audit; Every Spring) Information is key to effective public health administration. Surveillance systems provide information on infectious disease tracking, disease clusters, food-borne outbreaks, and injuries. Environmental monitoring systems provide information on health risks such as toxic chemicals or airborne pollutants. Registries contain information on vital statistics such as birth, death, and immunization. e-Public Health integrates information from electronic health records to use in improving population health. Introduction to Public Health Informatics describes these public health information systems and key issues in managing this information effectively, such as data standards, common functions, decision support, meaningful use, health information exchange, privacy and security. Prereq: School of Public Health student or graduate student

PUBH 6881. Advanced Public Health Informatics Applications. (2 cr.; [max 4 cr.]; A-F or Audit; Every Fall) Public Health Informatics includes a wide variety of applications that are used to assess, assure, and advocate for population health such as immunization registries, vital statistics systems, birth and death registries, food and environmental health surveillance systems, and infectious disease surveillance. Health information exchange (HIE), such as reports from labs or clinics to public health departments, is a key informatics tool used to support surveillance systems. Advanced Public Health Informatics Applications teaches the key concepts and the skills related to HIE and the concepts and skills necessary to implement it in surveillance systems.

PUBH 6890. Topics: Public Health Informatics. (1-4 cr.; [max 80 cr.]; Student Option; Periodic Fall, Spring & Summer) New courses or topics of interest in Public Health Informatics.

PUBH 6900. Topics: Public Health Nutrition. (0.5-4 cr.; [max 80 cr.]; Student Option; Periodic Fall, Spring & Summer) New courses or topics of interest in public health nutrition.

PUBH 6901. Foundations of Public Health Nutrition Leadership. (2 cr.; Student Option; Every Fall) Principles of public health nutrition. Roles/function of public health nutritionists. Programs/delivery mechanisms for promoting nutritional status of populations. Students explore their beliefs/competencies in relation to principles/philosophy of public health nutrition. This course has a strong focus on policy, systems and environmental changes to improve access to health foods for individuals and communities.

PUBH 6904. Nutrition and Aging. (2 cr.; Student Option; Every Summer) Current literature on nutrition needs/factors affecting nutritional status of adults and the elderly. Relevant community resources. Prereq: Grad student or professional school student or instr consent

PUBH 6905. Nutrition for Public Health Promotion and Disease Prevention. (2 cr.; Student Option; Every Fall) Nutrition topics of contemporary interest. Concepts/facts about science of human nutrition discussed in relation to personal/community nutrition problems/concerns. Applied introductory course with labs. Prereq: Grad student or instr consent

PUBH 6906. Global Nutrition. (2 cr.; Student Option; Every Spring)
Overview of child and adolescent obesity from public health perspective.

**PUBH 6950. From Kid to Community: Personal, Social and Environmental Influences on Youth Obesity.** (2 cr.; Student Option; Every Fall)
Overview of public health strategies for the prevention of pediatric obesity. Includes overview of epidemiology of child and adolescent obesity with a focus on socio-ecological risk factors. Discusses implications for developing interventions and programs. prereq: completed one of the following: a) basic intro to nutrition course, b) PUBH 6094, or c) 1 year work experience in the field of obesity and/or public health or instructor consent.

**PUBH 6955. Using Policy to Address Child and Adolescent Obesity Prevention.** (1 cr.; Student Option; Every Spring)
Overview of federal, state, local policy approaches. National initiatives for prevention of child and adolescent obesity. Specific policies will be discussed at local, state, federal levels. Extensive discussion on evidence of impact of policies on child and adolescent weight.

**PUBH 6995. Community Nutrition Practicum.** (8 cr.; A-F only; Every Summer)
Didactic/ experiential learning opportunities in community nutrition program delivery/management. Students complete at least 36 hours each week for eight weeks guided by on-site preceptor and course instructor. prereq: Public health nutrition MPH degree student, instr consent

**PUBH 6996. Clinical Nutrition Practicum.** (9 cr.; A-F only; Every Summer)
Didactic/ experiential learning in clinical nutrition. Application of nutrition care process/ model to medical conditions. Students complete at least 36 hours each week for nine weeks guided by on-site preceptor and course instructor. prereq: Public health nutrition MPH degree student, instr consent

**PUBH 7091. Independent Study: Community Health Promotion.** (1-4 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
Independent study supervised by community health promotion faculty member. prereq: CHP program, instr consent

**PUBH 7094. Integrative Learning Experience: Community Health Promotion.** (1-6 cr.; S-N only; Every Fall, Spring & Summer)
MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration-specific competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student's educational and professional goals. prereq: Environmental health program, instr consent

**PUBH 7193. Directed Study: Environmental Health.** (1-4 cr. [max 20 cr.]; Student Option No Audit; Every Fall, Spring & Summer)
Directed study in a topic agreed upon by student and faculty member. prereq: instr consent

**PUBH 7194. Integrative Learning Experience: Environmental Health.** (1-5 cr.; max 25 cr.; S-N only; Every Fall, Spring & Summer)
MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student's educational and professional goals. prereq: Environmental health program, instr consent

**PUBH 7195. MS in Environmental Health Sciences Plan B Project.** (1-5 cr.; S-N only; Every Fall, Spring & Summer)
Students must complete a written plan B project where they are required to synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles in a context that reflects an aspect of professional practice. The culminating experience must be used as a means by which faculty judge whether the student has mastered the body of knowledge and can demonstrate proficiency in the required competencies through written and oral presentation. All master's degree candidates are required to pass a final comprehensive oral examination to be taken after submission of the Plan B project(s).

**PUBH 7196. Applied Practice Experience: Environmental Health.** (1-5 cr.; S-N or Audit; Every Fall, Spring & Summer)
MPH students are required to complete a supervised Applied Practice Experience (APEX). Students must address five competencies and must submit two products that demonstrate attainment of the competencies. prereq: CHP program, instr consent

**PUBH 7200. Topics: Public Health Practice.** (0.5-4 cr. [max 80 cr.]; Student Option No Audit; Every Fall, Spring & Summer)
New course offerings or topics of interest in public health practice.

**PUBH 7210. Topics: Global Food Systems.** (0.5 cr. [max 3 cr.]; S-N only; Every Summer)
Food systems related to specific food products, including inputs, processes, and outputs from production sites to consumers. Context for food safety policy. Concept of food system biosecurity as prerequisites for a safe, abundant, affordable, and diverse food supply. Case studies of food-borne disease outbreaks illustrate critical controls in food production.

**PUBH 7211. Food System Biosecurity: Preparedness and Response.** (1 cr.; Student Option; Periodic Fall)
Public health preparedness and response related to food system biosecurity. Systems approach to biosecurity. Models for systematic evaluation of vulnerabilities (HACCP, ORM) and problem solving (Haddon’s Matrix). Risk communication, preparedness planning, text exercises, contingency planning, prereq: Grad student or professional school student or instr consent

PUBH 7212. Food System Biosecurity: Threats. (1 cr.; Student Option; Periodic Fall)
Public health threats to food system biosecurity. Principles of biosecurity, vulnerabilities of the food system from pre-harvest through post-processing, potential threats by class of agent, strategies to minimize threats and protect public’s health, prereq: Grad student or professional school student or instr consent

PUBH 7213. Applications of Microbiology to Food Systems Monitoring. (1 cr.; Student Option; Periodic Fall)
Microbiological testing to determine prevalence of pathogens in specific foods. Identification of causes of foodborne disease outbreaks. Monitoring critical control points. Traditional/rapid lab methods are used to detect indicator organisms, pathogens, and other contaminants of public health concern, prereq: Grad student or professional school student or instr consent

PUBH 7214. Principles of Risk Communication. (1 cr.; Student Option No Audit; Every Summer)
Key concepts of risk communication theory and their practical application to collection/sharing of information in support of individual and community decision-making about public health issues. Application of risk communication principles to routine, ongoing public health issues and those that arise out of emergency/crisis.

PUBH 7215. Food Safety: Risk Assessment and Risk Management. (1 cr.; Student Option No Audit; Summer Even Year)
Risk assessment methods/strategies for managing risk for specific foods and across the food system. Students work in groups to identify a specific risk management question to be addressed by risk assessment and develop a specific risk management strategy.

PUBH 7216. Food Safety Risk Management. (1 cr.; Student Option No Audit; Summer Even Year)
Strategies for managing risk of food-borne diseases for specific foods and across food system.

PUBH 7217. Advances in Molecular Epidemiological Analysis. (1 cr.; Student Option No Audit; Summer Even Year)
Overview of molecular laboratory techniques used to detect, identify, and characterize infectious disease agents. Application of molecular subtyping techniques to surveillance and outbreak investigations. Implications for public health practice.

PUBH 7218. Culturally Based Community Health Immersion. (0.5 cr.; S-N only; Every Summer)
Students view public health practice in action and reflect on ways that urban environments impact health services for members of underserved/emerging communities. One-day field trip to a culturally specific community health setting in the Twin Cities.

PUBH 7220. Personal Protective Equipment and Respiratory Protection. (1 cr.; Student Option No Audit; Every Summer)

PUBH 7221. Planning for Urgent Threats. (1 cr.; Student Option No Audit; Every Summer)
Role of public health in disaster preparedness, response, and recovery. How public health agencies plan for managing the crisis. Providing surge capacity to maintain public health and health care functions. Assisting a community’s recovery from a disaster.

PUBH 7222. Best Practices in Emergency Response. (1 cr.; S-N only; Periodic Summer)
Best practices in PH preparedness & response are evolving & continually tested with new experiences & expertise. This course for PH professionals and professionals responsible for preparedness planning, response & recovery is designed to provide participants with practical applications & tools to apply learning from real incidents.

PUBH 7223. Concepts of Disaster Behavioral Health. (1 cr.; S-N only; Every Summer)
Impact of disaster on the behavioral health of victims, survivors, and communities. Real scenarios for predictable phases of disaster recovery and concepts of behavioral health services after disaster. Steps for disaster behavioral health response planning/preparation. Presentations, discussion, individual/small group exercises.

PUBH 7224. Business Continuity Planning for Disasters and Emergencies. (1 cr.; Student Option No Audit; Every Summer)
Field-based learning experience. Student help develop business plan for natural or man-made disasters or emergencies, assess current business needs and existing continuity planning, and work in teams to develop, implement, and maintain programs to prevent, mitigate, prepare for, respond to, and recover from disasters/emergencies.

PUBH 7225. Communication and Information Technology Tools for Public Health Emergency Response. (1 cr.; Student Option No Audit; Summer Odd Year)
Uses Incident Command System as framework. Application of information/communication technology to emergency response. Communication exercise design, IT project management, backup communication methods. prereq: [FEMA IS-100a, FEMA IS-546a] with certificate of completion

PUBH 7226. Media Relations Practicum. (1 cr.; Student Option No Audit; Every Summer)

PUBH 7227. Incident Management Systems: The Public Health Role. (1 cr.; S-N only; Periodic Summer)
Managing personnel/resources in an emergency incident. Formalized/common management practices applicable in virtually any setting.

PUBH 7230. Topics in Infectious Disease. (0.5-4 cr. [max 80 cr.]; Student Option No Audit; Every Summer)

PUBH 7231. Surveillance of Foodborne Diseases in Humans. (1 cr.; Student Option No Audit; Every Spring & Summer)

PUBH 7232. Surveillance of Foodborne Diseases in Animals and Plants. (1 cr.; Student Option No Audit; Every Spring & Summer)

PUBH 7233. Food System Defense: Vulnerabilities in the Food System. (1.5 cr.; Student Option No Audit; Periodic Summer)
Holistic view of food system. Tools to assess vulnerability of specific food systems/facilities. Legal, regulatory, supply chain, public health system, and technology strategies. Instructors are from public/private sectors related to food system.

PUBH 7234. Global Food Systems Leadership. (1 cr.; S-N only; Periodic Summer)
Critical competencies for leadership in industry, government, and academia necessary for ensuring an abundant, affordable, and safe global food supply.

PUBH 7235. Surveillance of Zoonotic Pathogens in Animals. (1 cr.; Student Option No Audit; Periodic Summer)
Case-study approach/field trips. Surveillance issues related to zoonotic pathogens in animals.

PUBH 7236. Farm to Table Program: Minnesota. (2 cr.; Student Option No Audit; Every Summer)
Explore the food system from farm to table in Minnesota while considering aspects of food sustainability, environmental health, public health, animal welfare and health, food safety, and food security. Activities & highlights will highlight the farm, processing, retail, government and academic sectors of the food production chain.

PUBH 7237. Using Risk Analysis Tools: Estimating Food Safety on the Farm to Table Continuum. (1 cr.; Student Option No Audit; Periodic Summer) This applications-based course will provide the necessary risk- and science-based tools to evaluate and mitigate the microbial and chemical risks in a food production chain?from the farm until consumption. Participants will be divided in small interdisciplinary groups to mimic a real risk analysis team and develop real-case outbreak scenarios. The attendants will follow the risk analysis process as an integral part of a science-based decision-making (risk prioritization, risk assessment, risk management and risk communication) to estimate and manage the food safety risks. The attendants will apply different qualitative (hazard analysis, decision matrices) and quantitative (risk prioritization, modeling, and web-based software) tools by using a computer. The participants will present the main outcomes from the analyses and will evaluate possible mitigation options to reduce the risk in a cost-effective way.

PUBH 7240. Topics: Health Care Issues in Underserved Populations. (.5-4 cr. [max 20 cr.]; Student Option No Audit; Every Summer) Overview of disparities compared with other U.S. population groups. Health/clinical issues affecting underserved populations. Cultural/historical aspects. Health care systems response.

PUBH 7242. War and Public Health. (1 cr.; Student Option No Audit; Every Summer) Public health problems associated with armed conflict; interdisciplinary perspective with emphasis on analyzing the complexities. Consequences of war, mass displacement, effects on community and family, women's roles and experiences, trauma and healing. Health intervention strategies. Seminar discussion format.

PUBH 7244. Community-based Participatory Research. (1 cr.; Student Option; Periodic Summer) This introductory course is intended for graduate students and community practitioners interested in adding CBPR to their repertoire of effective approaches to understanding and addressing social and health disparities. Topics such as the purpose and applications of CBPR; partnership formation and maintenance; issues of power, trust, race, class, and social justice; ethical issues; CBPR's relationship to cultural knowledge systems will be explored. The course has a required pre-course component (6-8 hours) consisting of readings, lectures and exercises designed to prepare you for in-class discussion and experiential learning.

PUBH 7250. Designing and Conducting Focus Group Interviews. (.1 cr.; Student Option No Audit; Every Spring & Summer) Interactive, intensive overview of focus group procedures for public/non-profit environments. Practical approaches to determining appropriate use of focus groups. Design options, developing questions, recruiting participants, moderating. Analyzing/reporting results.

PUBH 7251. Data Analysis From Focus Groups. (.1 cr.; Student Option No Audit; Every Summer) Alternatives for capturing data in focus groups. Making sense out of data. Alternative analytic strategies. Emphasizes analysis that is systematic/verifiable.

PUBH 7252. Qualitative Research Methods: Discovering the Value of Voice in Words, Stories and Photographs. (1 cr.; Student Option No Audit; Every Summer) Utility of qualitative research methods in public health research and policy initiatives. Key methods, including focus groups, grounded theory, ethnography, phenomenology, and photovoice. Using methods when resources are scarce. Ethical/human subjects considerations. Data analysis/dissemination, software selection. Writing small grant proposals. Mixed methodology approaches.

PUBH 7253. Introduction to GIS. (.1 cr.; S-N only; Every Summer) Concepts/uses of Geographic Information Systems. Data structures, sources of data, tools, vendors/software, health-related applications. Exercises in spatial data display/query, map generation, spatial analysis using ArcGIS software. Students create their own GIS project model. prereq: Experience with spreadsheet programs.

PUBH 7255. Application of EpInfo Software in Epidemiology Investigation and Data Management. (.1 cr.; Student Option No Audit; Every Summer) Introduction to use of EpInfo software for epidemiological investigations. Data management/analysis. Exercises in outbreak investigations and presentation of analysis and results. prereq: Grad-level epidemiology course.

PUBH 7256. Navigating an MPH Project. (0.5 cr.; S-N only; Every Summer) Types of MPH projects. Tools to facilitate completion. Literature review techniques, type of research, Institutional Review Board/Institutional Animal Care/Use Committee approval, analytic tools, writing/presenting/defending projects. prereq: Public health practice MPH student or [other MPH student, instr consent]

PUBH 7257. Qualitative Data Analysis. (1 cr.; Student Option No Audit; Every Summer) Analyze/work with qualitative data from variety of data collection methods/multiple analysis approaches. Discussion of analyzing photograph/video data will provide insights on how best to analyze these types of data.

PUBH 7258. Data Driven and Time-Sensitive Decision Making. (1 cr.; Student Option; Periodic Summer) This course aims to provide knowledge and equip students with techniques to transform data into information that decision makers can use in order to make time critical decisions. It has been well documented that decision-making during a crisis is difficult as information is limited and established procedures may not be followed, thus increasing the amount of stress on individuals required to make those decisions. To improve crisis decision-making data collection, analysis, and synthesis an abundant and wide-variety of data are required in order to make an informed decision. This course will have didactic and application components where students will be able to apply the skills knowledge learned.

PUBH 7261. Ecosystem Health. (1 cr.; Student Option No Audit; Periodic Summer) Impact of global environmental change on human health/welfare. How major changes in the environment such as wild land degradation, increasing contaminant loads, and climate change are altering human, wildlife, and domestic animal fitness/survival. Depletion of wild resources of nutritional, social, or economic importance. Loss of biodiversity. Alterations in disease prevalence, including emerging infectious diseases. Strategies to mediate/prevent changes and their impacts on human well-being.

PUBH 7262. Globalization and Health. (.1 cr.; Student Option No Audit; Periodic Summer) Global health concerns cross the borders of developed and developing nations. Effect of globalization on social and scientific consequences in public health. Interplay between global stressors such as population, war, economics, urbanization, and environment; effects on the health of women/
PUBH 7263. Global One Health Leadership Workshop and Practicum. (2 cr.; Student Option No Audit; Every Summer) Leadership skills for addressing challenges/opportunities at convergence of public health, animal health, environmental/ecosystem health, economic development. Enhance critical leadership competencies in context of complex, multifactorial problems.

PUBH 7291. Independent Study: Public Health Practice. (0.5-2 cr.; S-N only; Every Fall, Spring & Summer) Independent study supervised by a public health practice faculty member. prereq: Public health practice MPH major, instr consent

PUBH 7294. Integrative Learning Experience: Public Health Practice. (0.5-4 cr. [max 12 cr.]; S-N only; Every Fall, Spring & Summer) MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student's educational and professional goals. prereq: Public health practice MPH program, instr consent

PUBH 7296. Applied Practice Experience: Public Health Practice. (1-8 cr.; S-N only; Every Fall, Spring & Summer) MPH students are required to complete a supervised Applied Practice Experience (APEX). Students must address five competencies and must submit two products that demonstrate attainment of the competencies. prereq: public health practice student, instr consent

PUBH 7391. Independent Study: Epidemiology. (1-4 cr.; Student Option; Every Fall, Spring & Summer) Independent study supervised by epidemiology faculty member. prereq: [EPI major or grad student], instr consent

PUBH 7392. Readings in Epidemiology. (1-4 cr.; Student Option; Every Fall, Spring & Summer) Current readings in epidemiology. prereq: Epidemiology major, instr consent

PUBH 7394. Integrative Learning Experience: Epidemiology. (1-6 cr.; S-N only; Every Fall, Spring & Summer) MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student's educational and professional goals. Epidemiology MPH student, instr consent

PUBH 7396. Applied Practice Experience: Epidemiology. (1-5 cr.; S-N only; Every Fall, Spring & Summer) MPH students are required to complete a supervised Applied Practice Experience (APEX). Students must address five competencies and must submit two products that demonstrate attainment of the competencies. prereq: epidemiology student, instr consent

PUBH 7400. Topics: Biostatistics. (0.5-4 cr. [max 20 cr.]; Student Option; Periodic Fall, Spring & Summer) New courses or topics of interest in biostatistics.

PUBH 7401. Fundamentals of Biostatistical Inference. (4 cr.; Student Option; Every Fall) Part of two-course sequence intended for PhD students in School of Public Health who need rigorous approach to probability/statistics/statistical inference with applications to research in public health. prereq: Background in calculus; intended for PhD students in public health and other health sci who need rigorous approach to probability/statistics and statistical inference with applications to research in public health

PUBH 7402. Biostatistics Modeling and Methods. (4 cr.; Student Option; Every Spring) Second of two-course sequence. Rigorous approach to probability/statistics, statistical inference. Applications to research in public health. prereq: 7401; intended for PhD students in health sciences

PUBH 7405. Biostatistics: Regression. (4 cr.; Student Option; Every Fall) T-tests, confidence intervals, power, type I/II errors. Exploratory data analysis. Simple linear regression, regression in matrix notation, multiple regression, diagnostics. Ordinary least squares, violations, generalized least squares, nonlinear least squares regression. Introduction to General linear Model. SAS and S-Plus used. prereq: [Stat 5101 or concurrent registration is required (or allowed) in Stat 5101], biostatistics major or instr consent

PUBH 7406. Advanced Regression and Design. (4 cr.; Student Option; Every Spring) Topics include maximum likelihood estimation, single and multifactor analysis of variance, logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods. R is used. prereq: [Stat 5101 or concurrent registration is required (or allowed) in STAT 5101], biostatistics major or instr consent

PUBH 7407. Analysis of Categorical Data. (3 cr.; Student Option; Every Spring) Contingency tables, odds ratio, relative risk, chi-square tests, log-linear models, logistic regression, conditional logistic regression, Poisson regression, matching, generalized linear models for independent data. SAS/S-Plus used throughout. prereq: 7405, [STAT 5102 or concurrent registration is required (or allowed) in STAT 5102], biostatistics major or instr consent

PUBH 7445. Statistics for Human Genetics and Molecular Biology. (3 cr.; Student Option; Every Spring) Introduction to statistical problems arising in molecular biology. Problems in physical mapping (radiation hybrid mapping, DDP), genetic mapping (pedigree analysis, lod scores, TDT), biopolymer sequence analysis (alignment, motif recognition), and micro array analysis. prereq: [6450, 6451 or equiv] or instr consent; background in molecular biology recommended

PUBH 7450. Survival Analysis. (3 cr.; Student Option; Every Fall)
Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.

**PUBH 7460. Advanced Statistical Computing.** (3 cr.; Student Option; Every Fall)
Statistical computing using SAS, Splus, and FORTRAN or C. Use of pseudo-random number generators, distribution functions. Matrix manipulations with applications to regression and estimation of variance. Simulation studies, minimization of functions, nonlinear regression, macro programming, numerical methods of integration, prereq: [7405, biostatistics major, (C or FORTRAN)] or instr consent

**PUBH 7461. Exploring and Visualizing Data in R.** (2 cr.; Student Option; Every Fall)
This course is intended for students, both within and outside the School of Public Health, who want to learn how to manipulate data, perform simple statistical analyses, and prepare basic visualizations using the statistical software R. While the tools and techniques taught will be generic, many of the examples will be drawn from biomedicine and public health.

**PUBH 7462. Advanced Programming and Data Analysis in R.** (2 cr.; Student Option; Every Spring)
This course is intended for students who are relatively proficient with R, and are looking to improve their coding and data analysis skills. The emphasis will be on learning tools and techniques which are useful to students who will be doing non-trivial programming and/or data analysis in either a research or production environment.

**PUBH 7465. Biostatistics Consulting.** (3 cr.; Student Option; Periodic Spring)
Professional roles/responsibilities of practicing biostatistician as consultant/collaborator in health science research. Discussion, written assignments, student presentations, meeting notes, interviews, guest, prereq: [(7405, 7406, 7407) or (STAT 8051, STAT 8052), (STAT 5101, STAT 5102) or (STAT 8101, STAT 8102), biostatistics major] or instr consent

**PUBH 7470. Statistics for Translational and Clinical Research.** (3 cr.; Student Option; Every Spring)
Diagnostic medicine, including methods for ROC curve, Bioassays. Early-phase clinical trials, methods including dose escalation, toxicity, and monitoring. Quality of life. prereq: [6450, 6451] or equiv, (graduate student in biostatistics or statistics or clinical research), familiarity with SAS

**PUBH 7475. Statistical Learning and Data Mining.** (3 cr.; Student Option; Periodic Spring)
Various statistical techniques for extracting useful information (i.e., learning) from data. Linear discriminant analysis, tree-structured classifiers, feed-forward neural networks, support vector machines, other nonparametric methods, classifier ensembles, unsupervised learning, prereq: [(6450, 6452) or equiv], programming background in (FORTRAN or C/C++ or JAVA or Splus/R) or instr consent; 2nd yr MS recommended

**PUBH 7485. Methods for Causal Inference.** (3 cr.; Student Option; Every Fall)
Although most of statistical inference focuses on association relationships among variables, in many biomedical and health sciences contexts the focus is on establishing the causal effect of an intervention or treatment. Drawing causal conclusions can be challenging, particularly in the context of observational data, as treatment assignment may be confounded. The first part of this course focuses on methods to establish the causal effect of a point exposure, i.e., situations in which treatment is given at a single point in time. Methods to estimate causal treatment effects will include outcome regression, propensity score methods (i.e., inverse weighting, matching), and doubly robust approaches. The second half of the course focuses on estimating the effect of a series of treatment decisions during the course of a chronic disease such as cancer, substance abuse, mental health disorders, etc. Methods to estimate these time-varying treatments include marginal structural models estimated by inverse probability weighting, structural nested models estimated by G-estimation, and the (parametric) G-computation algorithm. We will then turn our attention to estimating the optimal treatment sequence for a given subject, i.e., how to determine the right treatment, for the right patient, at the right time, using dynamic marginal structural models and methods derived from reinforcement learning (e.g., Q-learning, A-learning) and classification problems (outcome weighted learning, C-learning). PUBH 8485 is appropriate for Ph.D students in Biostatistics and Statistics. The homework and projects will focus more on the theoretical aspects of the methods to prepare students for methodological research in this area. PUBH 7485 is appropriate for Masters students in Biostatistics and PhD students in other fields who wish to learn causal methods to apply them to topics in the health sciences. This course uses the statistical software of R, a freely available statistical software package, to implement many of the methods we discuss. However, most of the methods discussed in this course can be implemented in any statistical software (e.g., SAS, Stata, SPSS, etc.) and students will be free to use any software for homework assignments.

**PUBH 7494. Integrative Learning Experience: Biostatistics.** (1-3 cr.; S-N only; Every Fall, Spring & Summer)
MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student?'s educational and professional goals. prereq: Biostatistics program, instr consent

**PUBH 7496. Applied Practice Experience: Biostatistics.** (1 cr. [max 6 cr.]; S-N only; Every Fall, Spring & Summer)
MPH students are required to complete a supervised Applied Practice Experience (APEX). Students must address five competencies and must submit two products that demonstrate attainment of the competencies. prereq: biostatistics MPH student

**PUBH 7534. Marketing for Health Care Professionals.** (1 cr. [max 2 cr.]; A-F only; Every Summer)
Application of principles of marketing to managing professional practice.

**PUBH 7535. Managerial Accounting for Health Services.** (3 cr.; A-F or Audit; Every Spring)
Differential, absorption, activity-based costing. Budgeting, variance analysis. Financial accounting, including transaction data/accrual accounting. Developing financial statements. Ration analysis. prereq: [AHC student or instr consent], experience with spreadsheets such as Excel or Lotus recommended

**PUBH 7536. Health Finance I.** (3 cr.; Student Option No Audit; Every Summer)
Principles of corporate/not-for-profit finance. Net present value, financial analysis, capital budgeting, financing options/decisions, capital structure, capital asset pricing model, financial planning, working capital management.

**PUBH 7537. Health Finance II.** (3 cr.; A-F only; Every Fall)

**PUBH 7541. Statistics for Health Management Decision Making.** (3 cr.; Student Option No Audit; Every Spring)

**PUBH 7542. Quality Improvement and Patient Safety.** (2 cr.; A-F only; Every Fall)
Almost 20 years ago in the United States the Institute of Medicine published To Err is Human, transparently noting that between 44,000 and 98,000 people in that country die every year as a result of medical errors; further research has shown that patients in all countries are subject to unintended harm as a result of their interaction with our healthcare systems. Not only are these errors devastating to those who have them, they harm providers and cost billions of dollars a year. Additionally, as the healthcare landscape shifts rapidly from one build upon volume to a value-based system, health systems and countries face an ever more urgent need to improve quality
and safety for the populations they serve. This course will review the role of the health system leader in addressing the challenge of improving quality, safety, and value. Modules will specifically address: an overview of quality improvement and patient safety, data and common improvement models, patient safety techniques, the administrator's role in the creation of the culture of safety, future trends in quality, safety, and value. Course Goals: a. Understand the patient, system, and population impacts of the current quality and safety challenges faced by healthcare b. Describe common models used for improvement work c. Understand the role that providers and health system leaders play in quality improvement and patient safety d. Utilize common tools of quality and safety e. Balance system and personal responsibilities in quality improvement and patient safety f. Be familiar with common terminology and techniques such as PDSA, Lean, RCA, and Six Sigma Course is reserved for students enrolled in Executive Masters in Healthcare Administration Program? School of Public Health.

PUBH 7551. Principles of Management in Health Services Organizations. (2 cr.; A-F only; Every Spring) Understanding of improvement in competencies of managers in organizations, particularly as applied to health services/public health organizations.

PUBH 7553. Health Care Management Ethics. (1 cr.; max 2 cr.; A-F only; Every Fall) Ethical issues faced by health care managers as leaders of organization, members of profession, coordinators of clinical processes. Perspectives of managerial, organizational, professional, clinical ethics.

PUBH 7555. Topics in Health Economics. (2 cr.; A-F only; Every Summer) General principles of health economics applied to issues in health. Implications for health policy.

PUBH 7560. Operations Research and Quality in Health Care. (3 cr.; A-F only; Every Spring) Using systems perspective to develop models to analyze/improve health care operations. Identifying data needs/sources to model structures, processes, outcomes of care.

PUBH 7562. Information Technology in Health Care. (2 cr.; A-F only; Every Summer) Managing information as strategic resource within health care organizations. Designing information technology systems to capture, combine, transform information to manage processes/outcomes of care, optimize collaborative clinical decision making, support management decisions.

PUBH 7566. The Henry Capstone: Core Concepts in Managing Health Care Organizations. (S Nutrition; Every Fall) Seminar course supporting students as they complete capstone project.

PUBH 7568. Interdisciplinary Teamwork in Health Care. (2 cr.; A-F only; Every Summer) Develop skills to function in inter-professional teams by using knowledge of various health care professions, principles of teamwork, knowledge of teams as they function in health care. Team formation, leading teams, decision making in teams, managing conflict in teams.

PUBH 7570. Healthcare Administration. (1-4 cr.; max 8 cr.; A-F only; Every Fall & Spring) Selected readings in healthcare administration. Discussion based on readings. prerequisites: dept consent

PUBH 7571. Organizational Integration in Health Care Delivery. (2 cr.; A-F only; Every Fall) Introduction to integrated healthcare and integrated health systems. Design, governance, operations, strategies, and the models for effectively integrating and aligning physicians and other medical professionals in interprofessional teams.

PUBH 7573. Managing the Embedded Medical Practice. (2 cr.; A-F only; Every Fall) Build competencies in areas of design, strategy, operations, finance for embedded medical practice.

PUBH 7576. Legal Considerations in Health Services Organizations. (2 cr.; A-F only; Every Summer) Laws affecting administration of hospitals/other healthcare organizations. Administrative law, corporate/business law, labor law, civil liability, tax-related issues. Legal issues relevant to administration, decision making, planning.

PUBH 7580. Organizational Management in Long Term Care. (1 cr.; max 2 cr.; A-F only; Every Fall) Overview of organizational management and human resource management in long-term care setting from senior manager's perspective. Combines three days of on-campus seminars with independent study.

PUBH 7581. Supports and Services for Long Term Care. (1.5 cr.; max 3 cr.; A-F only; Every Spring) Organization, operations, functions, services, and programs of nursing facilities.

PUBH 7582. Practicum in Long-Term Care Administration. (4 cr.; S-N or Audit; Every Fall, Spring & Summer) Students apply knowledge to practice of long-term care administration, under guidance of a preceptor. prerequisites: [7580, 7581, 7583] or [7587, 7588]

PUBH 7583. Managerial Accounting in Long-Term Care Administration. (4 cr.; A-F or Audit; Every Spring) Advanced managerial accounting. Financial statement analysis, strategic planning, costing, control. Planning for capital needs in long-term care administration. Specific applications made to Minnesota State Medicaid reimbursement, Rule 50 cost reporting, nursing home industry standards, and budgeting process. Five days of on-campus seminars are combined with independent study. prerequisites: Introductory accounting

PUBH 7584. Health Care and Medical Needs. (1 cr.; max 2 cr.; A-F only; Every Fall) Advanced managerial accounting. Financial statement analysis, strategic planning, costing, control. Planning for capital needs in long-term care administration. Specific applications made to Minnesota State Medicaid reimbursement, Rule 50 cost reporting, nursing home industry standards, and budgeting process. Five days of on-campus seminars are combined with independent study. prerequisites: Introductory accounting

PUBH 7585. Community Health Care Leadership Development I. (S-10 cr.; A-F or Audit; Periodic Summer) Nine-month program including on-campus (two weeks) plus off-campus study including seminars and monthly dialogues with mentors. Community development of health. Cultural meaning of community. Analyzing economic/ political foundations of health. prerequisites: Member of a community health care group

PUBH 7586. Community Healthcare Leadership Development II. (S-10 cr.; A-F or Audit; Periodic Summer)
Nine-month program including on-campus (two weeks) plus off-campus study including seminars and monthly dialogues with mentors. Innovative community health development. Leading implementation of change. Networking with national/international health communities. prereq: Member of a community healthcare group

PUBH 7587. Regulatory Management in Long-Term Care. (1 cr. [max 2 cr.]; A-F or Audit; Every Summer) Funding mechanisms, regulatory compliance mechanisms, and legal provisions currently in force for long-term care industry.

PUBH 7588. Information Uses in Long-Term Care. (2 cr. ; A-F or Audit; Every Fall) Accumulation/analysis of data to inform management decision-making in long-term care. One day on-campus seminar, independent study. prereq: Some knowledge of computers

PUBH 7589. Human Resource Management in Long Term Care. (0.5 cr. [max 1 cr.]; A-F only; Every Fall) Covers workplace culture, accountability and fairness, and just and learning culture concepts.

PUBH 7590. Gerontology for Healthcare Managers. (1 cr. [max 2 cr.]; A-F only; Every Spring) Covers physical, biological, social, and psychological aspects of the aging process.

PUBH 7591. Independent Study: Health Care Administration. (1-4 cr. [max 20 cr.]; Student Option) Independent study supervised by a health care administration faculty member. prereq: instr consent

PUBH 7592. Healthcare Law. (0.5 cr. [max 1 cr.]; A-F only; Every Summer) Covers legal and regulatory issues related to the operation of long-term care service delivery organizations.

PUBH 7596. Clerkship in Health Care Administration. (2 cr. ; A-F or Audit; Periodic Spring & Summer) Survey/solution of management problems within a local health services organization. Preparation of formal management report. prereq: 6544, health care admin student

PUBH 7691. Independent Study: Maternal and Child Health. (1-4 cr. [max 20 cr.]; Student Option) Independent study supervised by a maternal and child health faculty member. prereq: Maternal/child health major, instr consent

PUBH 7694. Integrative Learning Experience: Maternal and Child Health. (1-4 cr.; S-N only; Every Fall, Spring & Summer) MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student?s educational and professional goals.

PUBH 7696. Applied Practice Experience: Maternal and Child Health. (; 1-5 cr.; S-N only; Every Fall, Spring & Summer) MPH students are required to complete a supervised Applied Practice Experience (APEX). Students must address five competencies and must submit two products that demonstrate attainment of the competencies. prereq: Maternal and Child Health Student, instr consent

PUBH 7710. Setting Priorities and Framing Public Health Issues. (2 cr. [max 6 cr.]; A-F only; Every Spring) The course is designed to develop the skills required to define researchable policy questions, critically analyze policy issues and problems, articulate relevant policy options and bring research and data to help frame decision-making. Additionally, this course will familiarize students with the governmental public health system in the United States. In the field of health policy, there are always multiple sides to every issue and complex political and socio-economic dynamics that create a certain level of uncertainty about what to do. This complexity makes predicting outcomes and making recommendations for policy solutions difficult. Yet decisions still need to be made and are often made given the best information available at that particular time. Providing recommendations based on an analysis of available evidence is an important part of any decision-making process. Through the use of varied writing and presentation exercises students will learn to identify issues, develop problem statements, define an audience and analyze an issue based on a set of key criteria.

PUBH 7730. Public Health Laws, Rules, and Regulations. (1 cr. [max 3 cr.]; A-F only; Every Spring) This course will address basic concepts of public health law and the legal bases for the existence and administration of public health programs. Balancing the legal aspects of current public health issues, controversies, individual rights, and the regulatory role of government in health service systems will be considered.

PUBH 7740. Leadership and Leading Change. (2 cr. [max 6 cr.]; A-F only; Every Fall) Leadership and Leading Change, is designed for E-PHAP students who aspire to be effective leaders and effective change agents in multi-sectoral contexts. The health care sector organizations discussed will include a variety of public health settings, care delivery organizations and others including government, private and public organizations across multiple sectors. Students explore the core concepts of leadership theory and the principles of change in organizational, community, political, social, and global settings. They use a self-assessment instrument to understand their own strengths and areas for improvement as a leader and use the results of that assessment to develop a personal leadership development plan. The readings are books and articles from the general leadership literature, from the change management literature, and from public health teaching cases. In this hybrid course, the face-to-face portion includes small group discussions, guest speakers, exercises and class discussions that focus on applying concepts from the readings to a variety of settings. Students participate in small discussion groups; each small group will have an opportunity to lead a class discussion on assigned reading materials and their application to leadership in health care settings today. The on-line portion of the course focuses on principles of change and change strategies for public health leaders. Students post reflection notes and engage in discussion with colleagues on course content to critique, comment on relationships between concepts, and to provide personal reflections on the material as the course progresses through the on-line weeks. The in-person portion of the course ends with an assigned paper, the personal leadership development plan. Finally, students choose one of two options for their final course paper: (1) a critique of a change project and leadership from the field, or (2) a personal project plan that demonstrates application of change and leadership strategies.

PUBH 7784. Master's Project Seminar: PHAP and HSRP&A. (1 cr. [max 2 cr.]; A-F only; Every Fall & Spring) Students participate in exercises to improve written/verbal communication, enhance skills related to giving constructive feedback. Ways that public health administration/policy is practiced. How to integrate knowledge into individually designed master's project. prereq: Public health administration/policy major or health services research/policy/administration major

PUBH 7791. Independent Study: Public Health Administration and Policy. (1-6 cr. [max 24 cr.]; Student Option; Every Fall, Spring & Summer) Independent study supervised by a public health administration and policy faculty member. prereq: Public hth admin/policy major, instr consent

PUBH 7794. Integrative Learning Experience: Public Health Administration and Policy. (2-3 cr.; S-N or Audit; Every Fall, Spring & Summer) MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student?s educational and professional goals. prereq: Public health administration/policy program, instr consent

PUBH 7796. Applied Practice Experience: Public Health Administration and Policy. (2 cr.; S-N only; Every Fall, Spring & Summer) MPH students are required to complete a supervised Applied Practice Experience (APEX). Students must address five competencies and must submit two products that demonstrate attainment of
the competencies. prereq: public health administration and policy student, instr consent

**PUBH 7894. MS in Health Services Research, Policy, and Administration Plan B Project.** (1-5 cr. [max 10 cr.]; S-N only; Every Spring)
Plan B project. prereq: [Health Services Research, Policy/Administration] MS student

**PUBH 7991. Independent Study: Public Health Nutrition.** (1-4 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
Independent study supervised by a Public Health Nutrition faculty member. prereq: [PubH Nut MPH student or Nutr grad student], instr consent

**PUBH 7994. Integrative Learning Experience: Public Health Nutrition.** (1-6 cr.; S-N only; Every Fall, Spring & Summer)
MPH students complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student's educational and professional goals. prereq: PubH Nut program, instr consent

**PUBH 7996. Field Experience: Public Health Nutrition.** (1-6 cr.; S-N only; Every Fall, Spring & Summer)
Supervised public health nutrition field study in health or public health setting under academic/professional supervision. Emphasizes application of acquired knowledge/skills to relevant issues/problems. prereq: Public health nutrition major, dept consent

**PUBH 8100. Topics: Applied Analyses of Occupational Health Data.** (1-4 cr. [max 80 cr.]; Student Option; Every Fall, Spring & Summer)
New course offerings or topics of interest in environmental health. prereq: Doctoral student in occupational health studies. Prior coursework in epidemiology, statistics

**PUBH 8120. Occupational Health and Safety Research Seminar.** (1 cr. [max 12 cr.]; S-N or Audit; Every Fall, Spring & Summer)
Facilitates student research training in occupational injury prevention. Roundtable discussions, interdiscipliary involvement. prereq: [PubH 6120, 6330 or 6341], 6450, environmental health major, [OIPRTF specialty or equiv] or instr consent

**PUBH 8140. Validity Concepts in Epidemiologic Research.** (2 cr.; S-N only; Every Fall)
Conceptual basis for validity in observational epidemiologic research. Recognizing, evaluating, preventing, and correcting for confounding specification error, measurement-error bias, and selection/follow-up bias.

**PUBH 8141. Doctoral Seminar in Observational Inference.** (2 cr. [max 20 cr.]; S-N or Audit; Every Fall & Spring)

**PUBH 8142. Epidemiologic Uncertainty Analysis.** (2 cr.; S-N only; Every Spring)
Scientific interpretation of statistical analysis as dependent on both data and assumptions. Techniques that enable an investigator to incorporate uncertainty about assumptions into a quantitative analysis. prereq: 8140

**PUBH 8160. Advanced Toxicology.** (2 cr.; A-F only; Every Fall)
Cellular/molecular mechanisms by which xenobiotics cause toxicity. Investigative approaches to current research problems in toxicology/carcinogenesis. Apoptosis, cell cycle regulation, genetic toxicology, molecular mechanisms of chemical carcinogenesis, genetic basis for susceptibility to environmental toxicants. prereq: 6160, one course in biochem, one course in molecular biol, instr consent

**PUBH 8161. Current Literature in Toxicology.** (1 cr. [max 3 cr.]; S-N or Audit; Every Fall & Spring)
Modern methods in toxicology, critical thinking skills. Topics vary each semester. Students read and discuss toxicological literature.

**PUBH 8162. Chemical Carcinogenesis and Chemoprevention.** (3 cr.; A-F or Audit; Periodic Fall)
Fundamental background in chemical carcinogenesis, carcinogen activation/detoxification, carcinogen-DNA adduct formation, cellular oncogenesis, cancer chemoprevention, nutrition/cancer. Topics integrated/interrelated. prereq: [BioC 3001, BioC 3021, BioC 4331] or equiv. [Chem 2302 or equiv]

**PUBH 8163. Toxicology.** (5 cr.; A-F only; Every Fall)
Biological/physiological principles that govern toxicological methods. prereq: Enrolled in toxicology concentration of environmental health PhD program

**PUBH 8165. Current Topics in Toxicology.** (1 cr. [max 2 cr.]; S-N only; Every Fall & Spring)
Seminars presented by students/faculty in toxicology grad program. prereq: [Environmental health PhD, toxicology concentration] student or instr consent

**PUBH 8166. Experiences in Toxicology Research.** (3 cr.; A-F only; Every Spring)
Students complete research projects in labs of toxicology program graduate faculty members. prereq: Environmental health PhD student in toxicology concentration

**PUBH 8170. Advanced Industrial Hygiene Applications.** (2 cr.; A-F or Audit; Periodic Fall)
Recognition, evaluation, and control of occupational health/safety hazards. Application of concepts to specific industrial hygiene problems related to gases/vapors, aerosols, and physical agents. prereq: 5170, eh grad major

**PUBH 8194. Directed Research: Environmental Health.** (1-6 cr.; Student Option; Every Fall, Spring & Summer)
Research, with direction from faculty member, in environmental/occupational stresses on human health. prereq: instr consent

**PUBH 8300. Topics: Epidemiology.** (1-4 cr. [max 80 cr.]; Student Option; Periodic Fall, Spring & Summer)
New course offerings or topics of interest in epidemiology.

**PUBH 8333. FTE: Master's.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

**PUBH 8341. Advanced Epidemiologic Methods: Concepts.** (3 cr.; Student Option; Every Fall)
Conceptual foundations of fundamental issues in epidemiologic methodology. How/why a given method, design, or approach might help explain population health. Strengths, limits, and potential alternatives for a given approach.

**PUBH 8342. Advanced Epidemiologic Methods: Applications.** (3 cr.; Student Option; Every Spring)
Applied methodology course designed for students in the Epi PhD program. Examples and readings are aimed at clinical/biological and social/behavioral track students.

**PUBH 8343. Synthesis and Application of Methods in Epidemiologic Research.** (4 cr.; Student Option; Every Fall)
Focuses on the extension, synthesis, and integration of research methods taught in the advanced epidemiology methods sequence (PubH 8341 and PubH 8342) and the application of these methods. Discussion of novel methods such as causal inferences related to the g-formula and penalized regression. Fosters a deeper understanding of current epidemiologic methods and how they are actually implemented in research.

**PUBH 8392. Readings in Clinical Research.** (1-4 cr.; Student Option; Every Fall, Spring & Summer)
Current readings in clinical research. prereq: Clinical research major, instr consent

**PUBH 8393. Directed Study: Clinical Research.** (1-4 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
Directed research or field practice in clinical research. prereq: Clinical research major, instr consent

**PUBH 8394. Plan B Project: Clinical Research.** (1-10 cr.; S-N only; Every Fall, Spring & Summer)
Directed research toward completion of culminating experience project in clinical research.

**PUBH 8400. Topics: Biostatistics.** (0.5-4 cr. [max 20 cr.]; Student Option; Periodic Fall, Spring & Summer)
Topics of interest.

**PUBH 8401. Linear Models.** (4 cr.; Student Option; Every Fall)
Theory/application of statistical techniques for regression analysis. Computing for linear models. Modeling, computation, data analysis. prereq: [77405, concurrent registration is required (or allowed) in STAT 8101] or instr consent
PUBH 8403. Research Skills in Biostatistics. (1 cr.; S-N only; Every Fall) Introduces research skills necessary for writing/defending dissertation, career in research. prereq: Stat 8101-02 and admission to PhD program in Biostatistics. The course is meant to be taken the fall before PhD written exam is attempted, so Schedule 2 students typically wait to enroll until second year in program.

PUBH 8412. Advanced Statistical Inference. (3 cr.; Student Option; Every Spring) Overview of inferential methods needed for biostatistical research. Topics without overt reliance on measure-theoretic concepts. Classic likelihood inference, asymptotic distribution theory, robust inferential methods (M-estimation). prereq: Stat 8101-8102 or equivalent, students should be comfortable with multivariate normal distribution/have some introduction to convergence concepts.

PUBH 8422. Modern Nonparametrics. (3 cr.; Student Option; Every Fall) Classical nonparametric inference, exact tests, and confidence intervals. Robust estimates. The jackknife. Bootstrap and cross-validation. Nonparametric smoothing and classification trees. Models/applications. Formal development sufficient for understanding statistical structures/properties. Substantial development of algorithms. prereq: [7406, STAT 5102, [public health or grad student]] or instr consent

PUBH 8423. Probability Models for Biostatistics. (3 cr.; Student Option; Every Fall) Three basic models used for stochastic processes in the biomedical sciences: point processes (emphasizes Poisson processes), Markov processes (emphasizes Markov chains), and Brownian motion. Probability structure and statistical inference studied for each process. prereq: [7450, 7407, Stat 5102, [advanced biostatistics or statistics]] major or instr consent

PUBH 8435. Latent Variable Measurement Models and Path Analysis. (3 cr.; Student Option; Every Fall) Introduction to use of statistical techniques known collectively as latent variable models. Exploratory/confirmatory factor analysis, path analysis, structural equation modeling, latent trait models, latent class models. SAS/AMOS software is used. prereq: Biostatistics PhD student or instr consent

PUBH 8442. Bayesian Decision Theory and Data Analysis. (3 cr.; Student Option; Every Spring) Theory/application of Bayesian methods. Bayesian methods compared with traditional, frequentist methods. prereq: [7460 or experience with FORTRAN or with [C, S+]]. Stat 5101, Stat 5102, Stat 8311, grad student in [biostatistics or statistics] or instr consent

PUBH 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

PUBH 8445. Statistics for Human Genetics and Molecular Biology. (3 cr.; Student Option; Every Spring) Introduction to statistical problems arising in molecular biology. Problems in physical mapping (radiation hybrid mapping, DDP), genetic mapping (pedigree analysis, lod scores, TDT), biopolymer sequence analysis (alignment, motif recognition), and micro array analysis. prereq: [(Stat 8101, Stat 8102) or equiv]. PhD student or instr consent; some background with molecular biology desirable

PUBH 8446. Advanced Statistical Genetics and Genomics. (3 cr.; Student Option; Every Spring) Genetic mapping of complex traits in humans, modern population genetics with an emphasis on inference based observed molecular genetics data, association studies; statistical methods for low/high level analysis of genomic/molecular data. Multiple comparison, confidence subnetwork modeling. prereq: [7445, statistical theory at level of STAT 5101-2; college-level molecular genetics course is recommended] or instr consent

PUBH 8452. Advanced Longitudinal Data Analysis. (3 cr.; Student Option; Every Spring) Methods of inference for outcome variables measured repeatedly in time or space. Linear/nonlinear models with either normal or non-normal error structures. Random effects. Transitional/marginal models with biomedical applications. prereq: Stat 5101, Stat 8311, experience with [SAS or S-], advanced [biostats or stat] student or instr consent

PUBH 8452. Advanced Survival Analysis. (3 cr.; Student Option; Periodic Fall & Spring) Statistical methods for counting processes. Martingale theory (transforms, predictable processes, Doob decomposition, convergence, martingales). Applications to nonparametric intensity estimation. Additive/relative risk models. Inference for event history data, recurrent events, multivariate survival, diagnostics. prereq: [7450, 8432, Stat 5102, advanced [biostats or statistics]] major or instr consent

PUBH 8452. Spatial Biostatistics. (3 cr.; Student Option; Periodic Fall & Spring) Spatial data, spatial statistical models, and spatial inference on unknown parameters or unobserved spatial data. Nature of spatial data. Special analysis tools that help to analyze such data. Theory/applications. prereq: [(Stat 5101, Stat 5102) or (Stat 8101, Stat 8102)], some experience with S-plus; Stat 8311 recommended

PUBH 8475. Statistical Learning and Data Mining. (3 cr.; Student Option; Periodic Spring) Statistical techniques for extracting useful information from data. Linear discriminant analysis, tree-structured classifiers, feed-forward neural networks, support vector machines, other nonparametric methods, classifier ensembles (such as bagging/boosting), unsupervised learning. prereq: [(8450, 8451, 8452) or STAT 5303 or equiv], [biostatistics or statistics PhD student] or instr consent

PUBH 8482. Sequential and Adaptive Methods for Clinical Trials. (3 cr.; Student Option; Every Fall & Spring) Statistical methods for design/analysis of sequential experiments. Wald theorems, stopping times, martingales, Brownian motion, dynamic programming. Compares Bayesian/frequentist approaches. Applications to interim monitoring of clinical trials, medical surveillance. prereq: Stat 8101-8102 or equivalent, [students should be comfortable with the multivariate normal distribution or instr consent]

PUBH 8485. Methods for Causal Inference. (3 cr.; Student Option; Every Fall) Although most of statistical inference focuses on associational relationships among variables, in many biomedical and health sciences contexts the focus is on establishing the causal effect of an intervention or treatment. Drawing causal conclusions can be challenging, particularly in the context of observational data, as treatment assignment may be confounded. The first part of this course focuses on methods to establish the causal effect of a point exposure, i.e., situations in which treatment is given at a single point in time. Methods to estimate causal treatment effects will include outcome regression, propensity score methods (i.e., inverse weighting, matching), and doubly robust approaches. The second half of the course focuses on estimating the effect of a series of treatment decisions during the course of a chronic disease such as cancer, substance abuse, mental health disorders, etc. Methods to estimate these time-varying treatments include marginal structural models estimated by inverse probability weighting, structural nested models estimated by G-estimation, and the (parametric) G-computation algorithm. We will then turn our attention to estimating the optimal treatment sequence for a given subject, i.e., how to determine “the right treatment, for the right patient, at the right time,” using dynamic marginal structural models and methods derived from reinforcement learning (e.g., Q-learning, A-learning) and classification problems (outcome weighted learning, C-learning). PUBH 8485 is appropriate for PhD students in Biostatistics and Statistics. The homework and projects will focus more on the theoretical aspects of the methods to prepare students for methodological research in this area. PUBH 7485 is appropriate for Masters students in Biostatistics and PhD students in other fields who wish to learn causal methods to apply them to topics in the health sciences. This course uses the statistical software of R, a freely available statistical software package, to implement many of the methods we discuss. However, most of the methods discussed in this course can be implemented in any statistical software (e.g., SAS, Stata, SPSS, etc.), and students will be free to use any software for homework assignments.

PUBH 8489. Theories of Hierarchical and Other Richly Parametrized Linear Models. (3 cr.; A-F only; Spring Odd Year)

PUBH 8494. Directed Research: Biostatistics. (; 1-4 cr.; S-N only; Every Fall, Spring & Summer) Research, with direction from a faculty member, in biostatistics. prereq: instr consent

PUBH 8666. Doctoral Pre-Thesis Credits. (; 1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) tbdr prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before Summer 2007 may register up to four times, up to 60 combined cr

PUBH 8777. Thesis Credits: Master’s. (; 1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

PUBH 8800. Topics in Health Services Research and Policy. (; 1-4 cr. [max 20 cr.]; Student Option; Periodic Fall, Spring & Summer) Topics and credit vary by instructor.

PUBH 8801. Health Services Policy: Analysis - Theory. (; 3 cr.; Student Option; Every Fall) Integrated overview of U.S. health services policy. Related theoretical/empirical literature. Analysis of alternative policy-making models, political/philosophical underpinnings of those models. prereq: [Grad or professional school] student or instr consent

PUBH 8802. Health Services Policy: Analysis - Applications. (2 cr.; A-F or Audit; Every Spring) Emphasizes relationships between health services research/policy. Uses case studies to examine how research influences policy/vice versa.

PUBH 8803. Long-Term Care: Principles, Programs, and Policies. (; 2 cr.; Student Option; Periodic Spring) Long-term care policy for functionally impaired persons, particularly the elderly. Team taught from healthcare and social services perspective; grounded in research literature on evidence of program effects. Innovative programs addressing current fragmentation of services. prereq: Grad-level health-care policy course or instr consent

PUBH 8804. Advanced Quantitative Methods Seminar. (3 cr. [max 6 cr.]; Student Option; Spring Even Year) Understand/competently use advanced quantitative methods in applied social science, policy, demographic research. Methods considered largely within or related to framework of regression analysis. Effort will be made to reflect interests of class. prereq: This is an advanced, doctoral-level course. Students are expected to have completed a full year of doctoral-level introductory statistical and/or econometric classes in their respective field prior to enrolling in this course (e.g., PUBH 7401-2, ApEc8211-2, SOC 8801-8811). Exceptions may be granted with instr consent.

PUBH 8805. Sociological Theory in Health Services Research. (; 3 cr.; Student Option; Every Fall) Overview of sociological theories in medical sociology, occupations/professions. Emphasizes teaching students how to apply theories to health/social phenomena of their own interest/choice.

PUBH 8806. Sociology of Health Occupations and Organizations. (; 3 cr.; Student Option; Every Fall & Spring) Sociological theories of occupations/organizations as applied to health care. Functional, conflict, evolutionary theories applied to health care reorganization such as managed care, technology on organization of work/occupations. Emphasizes application of theories to develop hypotheses. prereq: Hsproconcurrent registration is required (or allowed) in a grad major or instr consent

PUBH 8810. Research Studies in Health Care. (; 3 cr. [max 6 cr.]; Student Option; Every Fall) Introduction to philosophy of science, conceptual modeling, experimental design, survey/sample design, issues relevant to health services research. prereq: [Grad or professional school] student or instr consent

PUBH 8811. Research Methods in Health Care. (; 3 cr.; Student Option; Every Fall & Spring) Research methods commonly used in analysis of health services research and health policy problems. prereq: [8810, [grad or professional school] student] or instr consent

PUBH 8813. Measurement of Health-Related Social Factors. (; 3 cr.; A-F or Audit; Every Fall & Spring) How social factors such as innovativeness, compliance, religiosity, and stress are measured and tested for reliability and validity. Relationships between theory, concepts, variables, data. prereq: Intro stat course, understanding of simple correlations or instr consent

PUBH 8820. Health Economics I. (; 3 cr.; A-F or Audit; Every Spring) Application of microeconomic theory to healthcare decisions of consumers and producers under different assumptions about market structure and behavior. prereq: One course each in intermediate microeconomics, calculus, intro to linear algebra

PUBH 8821. Health Economics II. (; 3 cr.; A-F or Audit; Every Fall & Spring) Examines application of microeconomic theory to health services research through selected reading from published and unpublished health economics literature. prereq: 8820 or instr consent

PUBH 8830. Writing for Research. (; 2 cr.; Student Option No Audit; Every Fall) Two-course sequence. Writing research grants/papers. Writing skills appropriate to research proposals and scholarly papers. How to review, synthesize, and critique research proposals and published articles. prereq: HSRPA PhD student or instr consent

PUBH 8831. Writing for Research. (; 2 cr.; Student Option No Audit; Every Spring) Second of two course sequence. Writing research proposals and scholarly papers. How to review, synthesize, and critique papers and research proposals. prereq: 8830

PUBH 8833. Integration of Public Health Research Methods in Health Services Research and Policy. (; 2 cr.; Student Option; Periodic Fall) Integration of concepts/designs of public health research methods, how they can be integrated into health services research and policy analysis. Experiential learning opportunities in clinical settings that illustrate need for integration. prereq: Professional school or grad student or instr consent

PUBH 8888. Thesis Credit: Doctoral. (; 1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required; For Environmental Health Students ONLY: Contact Director of Graduate Studies and the Graduate Student Coordinator.

PUBH 8893. Directed Study: Health Services Research, Policy, and Administration. (; 1-3 cr.; Student Option; Every Fall, Spring & Summer) tbdr prereq: HSRPA grad student, instr consent

PUBH 8894. Directed Research: Health Services Research, Policy, and Administration. (; 1-8 cr.; Student Option; Every Fall, Spring & Summer) tbdr prereq: HSRPA grad student, instr consent

Radiology (RAD)

RAD 7101. Externship in Radiology. (; 4 cr.; H-N only; Every Fall, Spring & Summer) The student gains an appreciation for the radiologic examination, its capabilities, limitations, and hazards, and will be offered a review of fundamental physical and basic science aspects of the subject. The student learns how to work with technical and other auxiliary personnel. Emphasis is on how to approach radiologic diagnosis and work with the clinician in a radiologic consultation service. There is observation and participation in daily interpretation of films, fluoroscopy, and special procedures.

RAD 7104. Externship: Diagnostic Radiology--Regions Medical Center. (;}
RAD 7105. Externship in Radiology. (2 cr. [max 4 cr.]; H-N only; Every Fall, Spring & Summer)
The student gains an appreciation for the radiologic examination, its capabilities, limitations, and hazards, and will be offered a review of fundamental physical and basic science aspects of the subject. The student learns how to work with technical and other auxiliary personnel. Emphasis is on how to approach radiologic diagnosis and work with the clinician in a radiologic consultation service. There is observation and participation in daily interpretation of films, fluoroscopy, and special procedures.

RAD 7110. Radiology Research. (2-8 cr. [max 16 cr.]; H-N only; Every Fall, Spring & Summer)
After consultation with staff, the student performs well-defined, radiologic-related research projects adjusted to the student's level of experience and interest.

RAD 7140. Special Problems: Roentgenology. (1-15 cr.; H-N or Audit; Every Fall, Spring & Summer)
N/A prereq: enrolled med

RAD 7172. Radiation Biology. (2 cr.; H-N or Audit; Every Fall, Spring & Summer)
N/A prereq: enrolled med

RAD 7240. Special Problems: Nuclear Medicine. (1-15 cr.; H-N or Audit; Every Fall, Spring & Summer)
N/A prereq: enrolled med

RAD 7400. Interventional Radiology. (4 cr.; H-N only; Every Fall, Spring & Summer)
Dedicated elective for prospective students to become familiar with interventional radiology and understand the clinical scope and research possibilities available in Interventional Radiology.

RAD 7511. Roentgen Technique. (1 cr.; H-N or Audit; Every Fall)

RAD 7530. Nuclear Medicine. (4 cr.; H-N only; Every Fall, Spring & Summer)
Provides the student with a better understanding of the various uses of radioactive materials in the practice of medicine.

RAD 7540. Special Problems: Radiological Physics. (1-15 cr.; H-N or Audit; Periodic Fall)
N/A prereq: enrolled med

RAD 7910. Radiology Medical Residency. (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer)
Radiology medical residency.

RAD 7930. Radiology Medical Fellowship. (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer)
Radiology medical fellowship.

RAD 8200. Nuclear Medicine. (1-15 cr.; Student Option; Every Fall, Spring & Summer)

RAD 8210. Fundamentals of Nuclear Medicine. (1 cr.; Student Option; Every Fall, Spring & Summer)
N/A prereq: 1st-yr resident

RAD 8250. Research: Nuclear Medicine. (1-15 cr.; Student Option; Every Fall, Spring & Summer)

RAD 8450. Research: Radiation Biology. (1-15 cr.; Student Option)

RAD 8550. Research: Radiological Physics. (1-15 cr.; Student Option)

Rehabilitation Science (RSC)

RSC 5058. Anatomy for Rehabilitation Science. (1-6 cr.; A-F or Audit; Every Summer)
Study of gross human anatomy through modular lecture/laboratory experiences that include cadaver dissection of extremities, head, neck, back, abdomen, thoracic, pelvic regions with correlation to clinical conditions. Prereq: Student enrolled in Rehabilitation Science Program, instr consent, dept consent

RSC 5060. Lower Extremity Anatomy Intensive. (2 cr.; A-F only; Every Summer)
Intensive and focused study of lower extremity gross human anatomy for graduate students. The content is presented through lecture and laboratory experiences that include cadaver dissection of human lower extremities with correlation to clinical conditions.

RSC 5065. Upper Extremity Anatomy Intensive. (2 cr.; A-F only; Every Summer)
Intensive and focused study of upper extremity gross human anatomy for graduate students. The content is presented through lecture and laboratory experiences that include cadaver dissection of human upper extremities with correlation to clinical conditions.

RSC 5101. Mathematical Tools for Research Applications in Health, Rehab, and Human Movement Sciences. (1 cr.; A-F or Audit; Every Fall, Spring & Summer)
Quantitative research approaches in health, rehabilitation, human movement sciences. Application examples/practice problems focus of the course. Basic algebra/geometry, solving equations for unknowns, logarithmic transforms, derivatives/integrals, matrix methods, use of macros in research applications. Prereq: Basic algebra, trigonometry, and geometry. Pre-calculus or calculus is helpful but not required.

RSC 5106. Introduction to Rehabilitation Science. (1 cr.; A-F or Audit; Periodic Fall)
This is one of a series of seminar courses that prepares students to think critically in reading and discussing the literature in rehabilitation science and to speak and write persuasively on scientific topics. This semester, the seminar will focus on the past, present, and future of rehabilitation science. This course will include lecture presentations from rehabilitation science faculty for the first 50 minutes of the weekly class time, as well as discussion/interaction sessions planned jointly by assigned students and faculty for the second 50 minute session each week.

RSC 5135. Advanced Biomechanics I: Kinematics. (3 cr.; A-F or Audit; Fall Odd Year)
How to describe/measure movement. Basic/ applied biomechanics, pathokinesiology, and rehabilitation literature. Lecture, lab, seminar discussion. Meets with RSC 8135. Prereq: instr consent

RSC 5200. Introduction to Neuromodulation. (1-3 cr.; A-F or Audit; Fall Even Year)
This course will provide training in the theory, biophysics and evidence-based application of non-invasive magnetic and electric brain stimulation in humans. Course content will be delivered in three modules: (1) safety and administration of non-invasive brain stimulation, (2) neuromodulation methods, and (3) advanced assessment and modeling techniques. All registered students must take module #1. Testing methods will include various methods to assess intracortical, transcallosal and interhemispheric excitability. Neuromodulation methods presented will include non-invasive and invasive forms of brain stimulation. Hands-on instruction and laboratory applications will be provided for cortical excitability testing using transcranial magnetic stimulation (TMS) as well as for other non-invasive forms of brain stimulation. Those enrolled will both administer and receive non-invasive brain stimulation and will be asked to sign a consent form. Specific safety exclusion criteria for receiving non-invasive brain stimulation exist and enrollees who have questions should contact the Division of Rehabilitation Science.

RSC 5206. Academic Ethos. (1 cr.; A-F or Audit; Periodic Spring)
Explicit/implicit culture unique to academia. Early understanding within/beyond rehabilitation science. Role of higher education in society, academic freedom, tenure, corporatization of education, accreditation, globalization of education, regulatory monitoring of research, faculty scholarship/governance.

RSC 5231. Clinical Biomechanics. (2-5 cr.; A-F only; Every Fall)
Biomechanics. Internal/external forces/structures responsible for normal/abnormal human movement. Joint and tissue mechanics, muscle function, task analysis, and gait mechanics. Lecture and lab practice. Prereq: concurrent registration is required (or allowed) in PT 6231, general physics, [intro or short] calculus, anatomy; intensive anatomy course in human cadaver dissection recommended

RSC 5235. Advanced Biomechanics II: Kinetics. (3 cr.; A-F or Audit; Spring Even Year)
Forces that create human motion and are produced within body as a result. Measuring human motion. Clinical movement assessment, Exercise, sport, and activities of daily living. Two-dimensional rigid body dynamics models, forward/inverse dynamics solutions, hypotheses to describe whole body/joint
kinetics. Lectures, lab, discussion; prereq: 5135 or equiv or instr consent

RSC 5281. Scientific Foundations: Exercise Theory. (3 cr.; A-F only; Every Fall)
In-depth presentation of fundamental concepts in exercise physiology/exercise biochemistry related primarily to skeletal muscle, secondarily to cardiovascular system/connective tissue. Exercise/performance-enhancing ergogenic aids. prereq: Rehabilitation Science grad student

RSC 5294. Independent Study in Rehabilitation Science. (1-3 cr.; max 9 cr.; Student Option; Every Fall, Spring & Summer) Independent exploration into topics related to rehabilitation science. prereq: Rehabilitation science student or program approval

RSC 5306. Scientific and Professional Presentation. (1 cr.; A-F or Audit; Periodic Spring)
This course will focus on the process and practice of oral presentation of scientific inquiry and discoveries. These skills are essential for scientists in all disciplines, yet often guidelines for optimal scientific presentation are not taught or practiced in an educational setting. Specific areas to be covered in this course include presentation intent, audience analysis, timing, content, keys to effective communication, vocal behavior, and important things to avoid. Context will include conference-style platform or podium presentations, poster presentations, and seminar presentation. The course will involve opportunities to prepare and practice presentation skills and receive constructive feedback in a safe, supportive environment. It is appropriate for students from all disciplines and levels of PhD study.

RSC 5310. Physiology for Physical Rehabilitation. (1-5 cr.; A-F or Audit; Every Spring)
This course is designed to convey foundational information regarding human basic physiology and more advanced integrative physiology to provide the student a broad range of knowledge on how the human body works at rest, exercise, and as we age. Basic cell physiology, which serves the human body’s infrastructure for function in different cell types for various organ systems, will be discussed with the major emphasis of this course being on the human body as a system. Along these lines, most of the content will relate to integrative physiology, as our systems are often redundant in regulating homeostasis. The objective of this course is to prepare the student for the study of pathophysiologic changes within the human body.

RSC 5814. Age, Exercise, and Rehabilitation. (2 cr.; Student Option; Every Fall)
Overview of normal physiological responses to exercise in the elderly. Comparison of exercise-induced responses of physiological systems throughout aging process. Focuses on importance of exercise from rehabilitation perspective. Offered Fall semesters of even-numbered years. prereq: Rehabilitation science student or program permission

RSC 5841. Applied Data Acquisition and Processing. (3 cr. [max 4 cr.]; A-F or Audit; Fall Even Year)
This course will introduce students to collecting and processing biomedical time series data. Students will gain experience using data acquisition hardware common in many laboratories, as well as related software for acquisition of the data and digital signal processing. Data sources will include electroencephalography (EEG), electromyography (EMG), wearable sensors, and data from other systems based on the background and interests of students in the class. The objective of this course is to provide students with the necessary, fundamental skills to run a successful experiment, troubleshoot errors, and produce high quality data sets. prereq: prefer students to have completed general physics, introductory of short calculus

RSC 5901. Scholarly Inquiry in Health Sciences. (4 cr.; A-F or Audit; Every Spring)
How research evidence is developed, disseminated, utilized in health sciences. Qualitative/quantitative scholarly project proposal. Critique studies/peer proposals. Explore conduct of research. prereq: Three credits of undergraduate statistics. instr consent, dept consent.

RSC 8106. Critical Analysis of Scientific Literature. (2 cr.; A-F or Audit; Periodic Fall)
This course will focus on the process of critical review, appraisal, and synthesis of scientific literature. Overview of organizing and writing literature reviews for a traditional dissertation, systematic reviews, and peer review for scientific manuscripts will be included. The course will involve substantive review of the literature and writing in your anticipated area of dissertation work.

RSC 8130. Current Literature Seminar. (1-3 cr.; max 9 cr.; A-F or Audit; Every Fall, Spring & Summer)
Critical review of literature to evaluate efficacy of selected physical therapy interventions. prereq: Grad student in PT or rehabilitation science major or instr consent

RSC 8135. Human Kinematics. (3 cr.; A-F or Audit; Fall Odd Year)
How to measure/describe movement. Basic/ applied biomechanics, pathokinesiology, and rehabilitation literature. Lecture, lab, seminar discussion. Meets in conjunction with RSC 5135. prereq: Rehabilitation science student or program permission, instr consent

RSC 8170. Special Topics in Rehabilitation Science. (1-3 cr.; max 9 cr.; A-F or Audit; Every Fall, Spring & Summer)
Topics vary by semester. Papers required.

RSC 8185. Problems in Rehabilitation Science. (1-3 cr.; max 9 cr.; Student Option; Every Fall, Spring & Summer)
Research practicum on selected topic. Use of systematic literature search. Critical analysis of scientific literature. Specific measurement systems. Data collection/reduction methods of on-going or new research projects. Preparing/defending research reports.

RSC 8188. Teaching Practicum. (1-5 cr.; A-F or Audit; Every Fall, Spring & Summer)
Supervised experience in teaching/evaluation. Effective use of instructional materials in lecture/lab courses. Students create learning objectives for teaching unit(s), conduct a review of current literature on topic, prepare/deliver presentations, compose test questions. Offered by individual arrangement with faculty. prereq: Rehabilitation science student or program permission, instr consent

RSC 8192. Research Design in Rehabilitation Science. (4 cr.; A-F or Audit; Every Fall)
The goals of this course are to develop abilities to critically evaluate peer-reviewed literature. It will also enable students to identify and apply appropriate statistical procedures, and interpret the meaning of statistical analyses. Finally, it will give students an opportunity to present the aims, methods, intended analyses, and preliminary results of their own research. Additionally, students will meet individually for 2 hours every month with the lecturer to work on the method section of a paper related to their PhD project. This paper will be critically reviewed and graded as end-evaluation for this class. prereq: instr consent

RSC 8206. Grant Writing. (2 cr.; A-F or Audit; Periodic Fall)
Process of applying for individual National Institutes of Health (NIH) pre-doctoral research training fellowship. Overview of NIH Program Announcement PA-11-111 NIH SF424; individual fellowship application guide required for application will be included. Substantive writing of components of NIH fellowship.

RSC 8235. Human Kinetics. (3 cr.; A-F or Audit; Spring Even Year)
Forces that create human motion or are produced within body as a result of motion. Measuring kinetics of motion. Clinical movement assessment. Measuring/analyzing exercise, sport, and activities for transfer of forces within body. Two-dimensional rigid body dynamics. Forward/inverse dynamics. Hypotheses for whole body/joint kinetics. Lectures, lab experiments, discussion. Meets with RSC 5235. prereq: [5135 or equiv] or instr consent

RSC 8282. Problems in Human Movement. (4 cr.; A-F or Audit; Every Spring)
Fundamental principles of neurophysiology, neurology, motor control, and motor learning as a basis for therapeutic intervention in motor dysfunction. prereq: Rehabilitation science student or program permission, instr consent

RSC 8306. Peer Review and Publication. (2 cr.; A-F or Audit; Periodic Spring)
This course will focus on the process of publication in the scientific literature, with emphasis on publication of original research. Overview of organizing and writing for publication, and the peer review process for scientific manuscripts will be included. The course will involve substantive writing practice in your anticipated area of scientific inquiry.

RSC 8333. FTE: Master’s. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
RELS 5001. Theory and Method in the Study of Religion: Critical Approaches to the Study of Religion. (3 cr.; Student Option; Every Spring) Theoretical/methodological issues in academic study of religion. Theories of origin, character, and function of religion as a human phenomenon. Psychological, sociological, anthropological, and phenomenological perspectives. Prereq: Sr or grad student or instr consent.

RELS 5070. Topics in Religious Studies. (3 cr. [max 18 cr.]; Student Option; Periodic Fall, Spring & Summer) Topics specified in Class Schedule and Course Guide.

RELS 5204. Development of Israelite Religion II. (3 cr.; Student Option; Periodic Fall) Ancient Judaism from the Persian restoration (520 B.C.E.) to Roman times (2nd century C.E.). Religious, cultural, and historical developments are examined to understand Jewish life, work, and worship under a succession of foreign empires: Persian, Greek, Roman.

RELS 5513W. Scripture and Interpretation in Israelite Religion and Judaism. (W; 3 cr.; Student Option; Spring Odd Year) Idea of divine revelation. Impact on religion/literature. How history of Bible's creation, transmission, interpretation helps us think critically about role of idea of revelation in history of religious traditions. Prereq: At least one upper level course (3xxx or higher) in academic biblical or religious studies.

RELS 5513W. Scripture and Interpretation in Israelite Religion and Judaism. (W; 3 cr.; Student Option; Spring Odd Year) Idea of divine revelation. Impact on religion/literature. How history of Bible's creation, transmission, interpretation helps us think critically about role of idea of revelation in history of religious traditions. Prereq: At least one upper level course (3xxx or higher) in academic biblical or religious studies.

RELS 5524. Archaeology of Ritual and Religion. (3 cr.; Student Option; Fall Even Year) The course discusses evidence for the origins of religion and its diverse roles in human societies over millennia. It focuses on how artifacts and architecture are essential to religious experience. It asks: What constitutes religion for different cultures? Why is religion at the heart of politics, social life, and cultural imagination?

RELS 5528W. Archaeology of Ritual and Religion. (3 cr.; Student Option; Periodic Fall & Spring) The course discusses evidence for the origins of religion and its diverse roles in human societies over millennia. It focuses on how artifacts and architecture are essential to religious experience. It asks: What constitutes religion for different cultures? Why is religion at the heart of politics, social life, and cultural imagination?

RELS 5593. Directed Studies. (1-4 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) Directed study at the instructor's discretion. Prereq: doctorate.

RELS 5707W. Anthropology of the Middle East. (GP,WI,SOCS; 3 cr.; Student Option; Fall Even Year) Anthropological field methods of analyzing/interpreting Middle Eastern cultures/societies.

RELS 5721. North Africa since 1500: Islam, Colonialism, and Independence. (3 cr.; Student Option; Spring Odd Year) History of Maghrib (Morocco, Algeria, Tunisia, Libya, disputed territories of Western Sahara) from time of Ottoman expansion/Shari'ah dynasties (Sa'dian/'Alawid) in 16th/17th Centuries to end of 20th century. Focus on encounter of Islamic cultures/societies of Maghrib with Africa/Europe.

RELS 5777. The Diversity of Traditions: Indian Art 1200 to Present. (3 cr.; Student Option; Every Fall, Spring & Summer) Issues presented by sculpture, architecture and painting in India, from prehistoric Indus Valley civilization to present day.

RELS 5781. Age of Empire: The Mughals, Safavids, and Ottomans. (3 cr.; Student Option; Periodic Fall) Artistic developments under the three most powerful Islamic empires of the 16th through 19th centuries: Ottomans of Turkey; Safavids of Iran; Mughals of India. Roles of religion and state will be considered to understand their artistic production.

RELS 5870. Readings in Religious Texts. (3 cr. [max 12 cr.]; A-F or Audit; Periodic Fall & Spring) Close reading of selected literary or epigraphical texts of importance for the history of ancient Mediterranean religions, along with critical discussion of trends in recent scholarship. The texts may be read in the original languages (such as Greek, Latin, Hebrew, etc.) but may also be accessed in translation where appropriate.

RELS 5876. Archaeology of Ritual and Religion. (3 cr.; Student Option; Periodic Fall & Spring) The course discusses evidence for the origins of religion and its diverse roles in human societies over millennia. It focuses on how artifacts and architecture are essential to religious experience. It asks: What constitutes religion for different cultures? Why is religion at the heart of politics, social life, and cultural imagination?
illuminatr. prereq: Grad student in relevant field

**Russian (RUS)**

RUSS 5404. Tolstoy in Translation. (GP,LITR; 3 cr.; Student Option; Spring Even Year)
Novels, stories, and philosophical writings of Leo Tolstoy.

RUSS 5411. Dostoevsky in Translation. (GP,LITR; 3 cr.; Student Option; Spring Even Year)
Novels, stories, and other writings of Fyodor Dostoevsky.

RUSS 5421. Literature: Middle Ages to Dostoevsky in Translation. (LITR; 3 cr.; Student Option; Every Fall)
Russian literature from about 1000 A.D. to mid-19th century; emphasizing writers of the first half of the 19th century.

RUSS 5422. Literature: Tolstoy to the Present in Translation. (LITR; 3 cr.; Student Option; Every Spring)
Survey of Russian literature from mid-19th century to the present: realism, modernism, feminism and other trends.

RUSS 5900. Topics in Russian Language, Literature, and Culture. (1-4 cr. [max 3 cr.]; Student Option; Periodic Fall)
Variable topics in Russian language, literature, and culture. Prereq: 1102 for language topics

RUSS 5993. Directed Studies. (1-4 cr. [max 16 cr.]; Student Option; Every Fall & Spring)
Guided individual study. Prereq instr consent, dept consent, college consent.

**Scandinavian (SCAN)**

SCAN 5502. The Icelandic Saga. (3 cr.; Student Option)
Study of the sagas written in 13th-century Iceland. Discussion includes cultural and historical information about medieval Iceland and analysis of a selection of saga texts using contemporary critical approaches. All readings in translation.

SCAN 5605. The Scandinavian Short Story. (LITR; 3 cr.; Student Option; Fall Even, Spring Odd Year)
Short stories by 19th-20th century authors from all five Scandinavian countries. Genre theory/practical criticism. Readings in English for nonmajors.

SCAN 5613. Contemporary Scandinavian Literature. (3 cr.; Student Option)
An investigation of issues which emerged as extremely important after 1945 in Scandinavia, as articulated by writers and analyzed by researchers in social sciences. All readings in translation.

SCAN 5614. Blood on Snow: Scandinavian Thrillers in Fiction and Film. (3 cr.; Student Option; Periodic Fall & Spring)
Scandinavian crime novels/films against background of peaceful welfare states.

Readings in translation for non-majors. Scandinavian majors/minors read excerpts in specific languages.

**SCAN 5634. Scandinavian Women Writers.** (GP,LITR; 3 cr.; Student Option; Fall Even, Spring Odd Year)
Issues important to women as articulated by Scandinavian women writers. Historical overview of women's writing in Scandinavia. In-depth investigation of texts by contemporary women writers. All readings in translation.

**SCAN 5701. Old Norse Language and Literature.** (3 cr.; Student Option; Every Fall)
Acquisition of a reading knowledge of Old Norse; linguistic, philological and literary study of Old Norse language and literature.

**SCAN 5703. Old Norse Poetry.** (3 cr.; Student Option; Periodic Fall)
Reading and analysis of either eddic poetry from the Poetic Edda or skaldic poetry. Texts read in Old Norse.

**SCAN 5710. Topics in Old Norse Literature.** (3 cr. [max 9 cr.]; Student Option; Every Spring)
Topic may focus on Old Norse prose or poetry. Primary texts read in Old Norse. Critical literature about texts, medieval Icelandic culture in English. Topics specified in Class Schedule; prereq: 5701 or equiv

**SCAN 5993. Directed Studies.** (1-4 cr. [max 16 cr.]; Student Option; Every Fall, Spring & Summer)
Guided individual reading and study. Prereq instr consent, dept consent, college consent.

**SCAN 8001. Parallel High-Performance Computing.** (3 cr.; Student Option; Every Fall)
Interdisciplinary overview of computer science aspects of scientific computation, both hardware and techniques. Parallel computing, architectures, programming, and algorithms; restructuring compilers and data structures. Prereq: Undergrad degree in field using sci comp or instr consent

**SCIC 8001. Scientific Visualization.** (3 cr.; Student Option; Every Spring)
Basic issues in scientific visualization, visualization software, graphics, representation of scientific data, modeling, hardware for visualization, user interface techniques, output, commonly used algorithms and techniques for visualization, animation, information visualization, higher dimensional data, case studies, and examples of successful visualizations. Prereq: Undergrad degree in field using sci comp or instr consent

**SCIC 8021. Advanced Numerical Methods.** (3 cr.; Student Option; Every Spring)
Interdisciplinary overview of advanced numerical methods of scientific computation, emphasizing computational aspects. Approximation methods for partial differential equations, numerical linear algebra, sparse matrix techniques, iterative methods, solution of eigenvalue problems, and case studies. Prereq: Undergrad degree in field using sci comp or instr consent

**SCIC 8031. Modeling, Optimization, and Statistics.** (3 cr.; Student Option; Periodic Fall)
Interdisciplinary overview of mathematical modeling, optimization, and statistics techniques for scientific computation. Nonlinear equations and nonlinear optimization, statistics, control theory, modeling, and simulation. Prereq: Undergrad degree in field using sci comp or instr consent

**SCIC 8041. Computational Aspects of Finite Element Methods.** (3 cr.; Student Option; Periodic Fall)
Fundamental concepts and techniques of finite element analysis. Variational equations and Galerkin's method; weak formulations for problems with nonsymmetric differential operators; Petrov-Galerkin methods; examples from solid and fluid mechanics; properties of standard finite element families, implementation. Prereq: Undergrad degree in field using sci comp or IT grad student or instr consent

**SCIC 8095. Problems in Scientific Computation.** (1-3 cr. [max 9 cr.]; Student Option; Periodic Fall)
Selected topics in interdisciplinary aspects of scientific computing. Prereq: Undergrad degree in field using sci comp or instr consent

**SCIC 8190. Supercomputer Research Seminar.** (1 cr. [max 3 cr.]; Student Option; Periodic Fall & Spring)
Series of seminars by distinguished lecturers. Prereq: Undergrad degree in field using sci comp or instr consent

**SCIC 8253. Computational Nanomechanics.** (3 cr.; Student Option; Every Spring)
Fundamentals of mechanical properties in nanometer scale. Role of discrete structure and underlying atomic, molecular, and interfacial forces are illustrated with modern examples. Overview of computational atomistic methods. Lectures, hands-on computing using publicly available or personally developed scientific software packages. Prereq: CSE graduate student
SCIC 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prerequisite: Master's student, adviser and DGS consent

SCIC 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prerequisite: Doctoral student, adviser and DGS consent

SCIC 8551. Multiscale Methods for Bridging Length and Time Scales. (3 cr.; A-F or Audit; Periodic Spring) Classical/emerging techniques for bridging length/time scales. Nonlinear thermoelasticity, viscous fluids, and micromagnetics from macro/atomic viewpoints. Statistical mechanics, kinetic theory of gases, weak convergence methods, quasicontinuum, effective Hamiltonians, MD, new methods for bridging time scales. prerequisite: Basic knowledge of [continuum mechanics, atomic forces], familiarity with partial differential equations, grad student in [engineering or mathematics or physics or scientific computation]

SCIC 8594. Scientific Computation Directed Research. (1-4 cr. [max 9 cr.]; Student Option; Every Fall, Spring & Summer) tbd prerequisite: Undergrad degree in field using sci comp or instr consent

SCIC 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) tbd prerequisite: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

SCIC 8777. Thesis Credits: Master's. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prerequisite: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

SCIC 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prerequisite: Max 18 cr per semester or summer; 24 cr required

**Security Technologies (ST)**

ST 8109. Cybersecurity Foundations - Technology, Risk & Communication. (2 cr.; A-F only; Every Fall) Explore cybersecurity risks through evaluation of consumer driven technology concepts and their applicability to enterprise. Core technology concepts that face both consumers and businesses. How technology works, how to understand and communicate risks to business management, deliver actionable risk mitigation approaches. Security standards and benchmarks that guide industry. This course is also open to non-ST graduate students and non-degree graduate students who may register with permission/certificate from the ST program. (DGS, DGSA or teaching faculty)

ST 8110. Security Science and Technology Foundations. (3 cr.; A-F only; Every Summer) Essential areas of emerging science and pivotal technology disciplines for homeland security. Nanotechnology, sensor networks (biosensing, critical infrastructure protection), food and biosafety, cyber and control systems security, and secure energy technologies. Current state-of-the-art status for each technology, together with barriers and opportunities for commercialization. prerequisite: Admitted student in security technologies program

ST 8111. Methods, Theory, and Applications. (2.5 cr.; A-F only; Every Fall) Methods, theory, techniques and models for understanding risk and implementing security strategies. Processes, methods, and application of risk assessment and management. Approaches for building scenarios, assessing the effectiveness of alternative management strategies, and designing risk management and mitigation plans. Case studies/simulations. How to use emergency management tools, techniques, and resources.

ST 8112. Technology for Homeland Security. (2 cr.; A-F only; Every Fall) Technologies involved in homeland security issues from several perspectives, including science, engineering, business, policy, and society. Advanced tools for the analysis and forecasting of technology and developing strategies aligned with overall stakeholder and organizational goals. Micro- and nanotechnologies and biochemical/chemical, radiological agents. Readings/discussion. Select a technology topic and analyze its current status and possible future trajectories for application or relevance to key issues of importance to security, both threats and opportunities. Present this in the last class session.

ST 8113. Information and Cyber Security. (2 cr.; A-F only; Every Spring) Existing and emerging IT, cyber, communication networks, and coordination activities during emergencies. Technological and policy issues for the need to share information through the use of interoperable technologies and to rapidly collect and synthesize data in real time in order to achieve critical national security. In addition to MSST grad students this course is also open to non-ST graduate students and non-degree graduate students who may register with permission/certificate from the ST program (DGS, DGSA or teaching faculty).

ST 8200. Special Topics in Security Technologies. (0.5-5 cr.; A-F only; Every Fall & Spring) Leaders in the field related to security technologies. Special speakers.

ST 8221. Communications of Risk and Security. (1 cr.; A-F only; Every Fall) Analyze public speaking. How to be an effective listener, how to prepare for effective public speaking, how to be an effective writer, communicate by email, write for emphasis, tone, and business writing. prerequisite: MSST grad student

ST 8330. Critical Infrastructure Protections. (3 cr.; A-F only; Every Summer) Systems risk analysis, engineering, economics, and public policy. Investigate infrastructure security/support design and management of complex civil infrastructure systems. Systems' vulnerability assessment, asset and risk management, investigation of infrastructure interdependencies and couplings, along with judicious analyses of policies. Contribution of science and technology to strategically enhance security/quality of life. prerequisite: MSST grad student

ST 8331. Dynamic Systems Modeling and Simulation Tools. (2 cr.; A-F only; Every Fall) Techniques for modeling complex systems and predicting and evaluating consequences, risks and the potential utility of interventions and countermeasures in the context of intentional disruption or use of the system as an attack vehicle. Importance of inter/intra system modeling. Variety of modeling approaches. How systems can be characterized focusing on the parameters that are important for consequence assessment, risk assessment, capability benchmarking, and decision support. Develop a systems and simulation-based approach to risk assessment, preparedness, intervention assessment, and problem solving.

ST 8440. Security Practicum. (0.5-2 cr.; A-F only; Every Summer) Seminars and focused workshops on selected areas of security science and technology. prerequisite: Admitted to MSST grad program

ST 8441. Internship (optional). (0.5 cr. [max 1 cr.]; A-F only; Every Fall & Spring) Summer internship opportunities at the university centers, companies, state, and federal agencies.

ST 8510. Psychology/Behavior Intelligence for Homeland Security. (2 cr.; A-F only; Every Summer) Political, psychological, sociological, and economic foundations and dynamics of both terrorism and homeland security. Contemporary debates over terrorism, counterterrorism, and homeland security. Students develop their own (informed) perspectives.

ST 8511. Public Policy. (1 cr.; A-F only; Every Fall) Key policies in the U.S. addressing safety and security of citizens, institutions, and systems. Complex network of actors/organizations involved in S&T and security-related areas and their multiple objectives and values.

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu. 359
SW 8020. Field Practicum II. (3 cr.; S-N or Audit; Every Fall, Spring & Summer) Integrates classroom learning within a concentration with the direct experience of an internship. Students expand competency in cross-cultural practice. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8030. Advanced Standing Social Work Practicum. (3-18 cr.; S-N or Audit; Every Fall, Spring & Summer) Integrates classroom learning with direct experience of a social work field internship. Professional support/learning groups discuss issues raised in field placement. Groups focus on professional/personal biases, ethical dilemmas, supervisory issues, cross-cultural sharing, and implications of students' privilege/power in relation to client systems. prereq: Adv standing

SW 8041. Specialized Field Placement. (1-4 cr.; S-N only; Every Fall, Spring & Summer) Field placement added to required foundation/concentration field placements (or to concentration placement for advanced standing students). prereq: [8020 or 8030], instr consent

SW 8151. Social Work Methods: Practice With Individuals and Systems. (3 cr.; A-F or Audit; Every Fall) Develops foundation knowledge and skills for social workers to work with individuals and systems. prereq: MSW student or instr consent

SW 8152. Social Work Practice Methods: Families and Groups. (3 cr.; A-F or Audit; Every Fall) Develop foundational knowledge and skills in relationship building, engagement, interviewing, and assessment with families and groups using the ecological-systems theoretical framework and resiliency-based approach. prereq: MSW student or instr consent

SW 8153. Social Work Practice Methods: Macro Practice and Organizations. (3 cr.; A-F only; Every Fall) Models of community intervention, community practice and macro-level interventions as integral to professional social work. Building upon theoretical approaches to human service organizations and their distinct attributes, the course addresses key practice knowledge, skills, and values that promote, develop, and maintain human service organizations that effectively meet community and client needs.

SW 8251. Social Work Practice in Health, Disabilities, and Aging. (3 cr.; A-F or Audit; Every Fall) Social work practice in health/disabilities/aging. History in social work, practice contexts/settings, service delivery systems. Practice/population overlaps, distinctions, co-operations. prereq: [5051, 5101, 8151, 8152, 8153, 8154] or MSW Adv Standing or instr consent

SW 8261. Advanced Social Work Practice in Health Care. (3 cr.; A-F only; Every Fall, Spring & Summer) Advanced social work practice in health care. Theoretical models/evidence-based interventions. Psychosocial assessment, treatment interventions, interdisciplinary teamwork, ethics, leadership. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8262. Empowerment Practice With Persons With Disabilities. (3 cr.; A-F or Audit; Every Fall) Models of disability, types of disability, common social work practices. Knowledge/skills for use across lifespan/culture/variables settings. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8263. Advanced Direct Practice and Community-Based Interventions in Gerontology. (3 cr.; A-F or Audit; Every Spring) Direct/community-based social work intervention with older adults in individual, family, group, residential, community settings. Geriatric assessment/therapy modalities. Evidence-based interventions/approaches. prereq: [SW 8251 or concurrent registration is required (or allowed) in 8251], [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master's student, adviser and DGS consent

SW 8351. Assessment and Engagement with Families and Children. (3 cr.; A-F or Audit; Every Fall & Spring) Utilizing evidence-informed, culturally respectful assessments/engagement models with families/children. Factors internal/external to families. Work with families/children around broad scope of stressors. Resiliency. prereq: [5051, 5101, 8151, 8152, 8153, 8154] or MSW Adv Standing or instr consent

SW 8352. Intervention Methods with Families. (3 cr.; A-F or Audit; Every Fall & Spring) Work with families/children in family-centered, community, preventive practice. Engagement, assessment, intervention, evaluation. prereq: [8351 or concurrent registration is required (or allowed) in 8351], [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8361. Identification and Assessment of Family Violence. (3 cr.; A-F or Audit; Periodic Fall) Identification/assessment of family violence. Contextual knowledge of behaviors of perpetrators, victims, survivors. Gender, race, culture, age, ability, SES, sexual orientation. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8363. Social Work in Child Welfare. (3 cr.; A-F or Audit; Every Spring) Public, private, tribal child welfare related to assessment of strengths/risks. Develop appropriate plans that secure child safety/well-being. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

SW 8451. Assessment and Engagement in Clinical Social Work Practice. (3 cr.; A-F or Audit; Every Fall & Summer) Mental health diagnostic codes/classifications. Interviewing skills, assessment writing skills/techniques. Biopsychosocial perspective/engagement strategies. prereq: [5051, 5101, 8151, 8152, 8153, 8154] or MSW Adv Standing or instr consent

SW 8452. Core Concepts in Clinical Social Work Practice. (3 cr.; A-F or Audit; Every Fall & Spring) Interpersonal process skills. Developing/maintaining effective therapeutic alliances/positive intervention outcomes with diverse populations. prereq: [8451 or concurrent registration is required (or allowed) in 8451], [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8461. Advanced Clinical Social Work Practice with Adults. (3 cr.; A-F or Audit; Every Fall) Research-informed clinical interventions for adults with mental health distress. Application of cognitive behavioral/psychodynamic psychotherapies through brief/long-term models across diverse populations. prereq: [8451 or concurrent registration is required (or allowed) in 8451], [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8462. Advanced Clinical Practice With Children and Adolescents. (3 cr.; A-F or Audit; Every Fall) Social work interventions using normative developmental supports/mental health case planning. Develop advanced clinical social work practice knowledge/skills for working with children/adolescents with mental health risks. Provide knowledge for community social workers serving children exposed to stress. prereq: [8351 or concurrent registration is required (or allowed) in 8351] or [8451 or concurrent registration is required (or allowed) in 8451], [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8463. Social Work Practice With Severe and Persistent Mental Illness and Severe Emotional Disturbance. (3 cr.; A-F or Audit; Every Spring) Integrated social work approach to assessing/working with individuals with SPMI, SED. Trends/modalities/evidence-supported approaches. Recovery/wellness approaches. Macro systems that impact lives of individuals/families. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8505. Advanced Community Organization and Advocacy. (3 cr.; A-F only; Every Fall & Spring) Methods for stimulating/supporting joint action for constructive change to fulfill community needs. Principles of working with local organizations. Social action to accomplish specific changes. prereq: [Foundation curriculum, advanced standing] or instr consent

SW 8507. Community Practice Seminar. (1 cr.; Student Option; Every Spring)
SW 8551. Advanced Community Practice: Assessment, Organizing, and Advocacy. (3 cr.; A-F or Audit; Every Fall) Community practice, including community organizing, policy advocacy, social service/ change leadership. prereq: [5051, 5101, 8151, 8152, 8153, 8154] or MSW Adv Standing or instr consent

SW 8552. Advanced Community Practice: Leadership, Planning, and Program Development. (3 cr.; A-F or Audit; Every Fall) Advanced community practice knowledge/ skills. Strategic planning, program design, organizational leadership/management, work groups. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8561. Human Resources Management in Human Services Agencies. (3 cr.; A-F or Audit; Every Fall) Processes/components of strategic human resources management in social services. Environmental scanning, job analysis, recruitment/selection, training/development, motivation, performance evaluation, compensation/benefits, termination. Human resources law. Promotion of inclusive workplace. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8562. Human Services Finances. (2 cr.; Student Option; Every Spring) Contexts, purposes, principles, strategies associated with human services financing. Acquiring, allocating, managing, reporting public/private funding. Financial policy, mission. Short/long term agency sustainability. prereq: [5051, 5801, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8563. Advanced Policy Advocacy. (3 cr.; A-F or Audit; Every Fall) Students paired with social service, social policy, social justice agencies, coalitions. Agenda setting, legislative research, legislative advocacy in relation to specific legislation proposed in Minnesota state legislature. Tie policy theory to real-world practice. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8602. Direct Practice Evaluation. (2 cr.; A-F only; Every Fall & Spring) Students design evaluations that incorporate current evaluation methods and principles derived from research, theory, practice wisdom, their own experience. Evaluation methods include single-system designs, client- focused evaluations, practitioner-focused evaluations, and use of event analyses, standardized instruments, self-constructed instruments. prereq: 8601 or equiv or instr consent

SW 8603. Program Evaluation. (2 cr.; A-F only; Every Fall) Conceptual, methodological, political, psychological, and administrative factors related to conduct and consequences of social work program evaluation. Social programs as cause and effect; models, types, and strategies of evaluation; appraisal of selected research literature. prereq: 8601 or equiv or instr consent

SW 8666. Doctoral Pre-Thesis Credits. (3 cr; max 12 cr.; No Grade Associated; Every Fall, Spring & Summer) TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

SW 8693. Directed Study. (1-6 cr.; Student Option; Every Fall, Spring & Summer) Independent study under tutorial guidance. prereq: instr consent

SW 8694. Directed Research. (1-6 cr.; Student Option; Every Fall, Spring & Summer) Individual or small group research inquiry translating introductory course content into research design and study. Projects may be conducted in conjunction with field learning experiences or other coursework. prereq: instr consent

SW 8801. Social Work Ethics and Legal Issues. (3 cr.; Student Option; Periodic Fall & Spring) Develops knowledge base and skills required to identify and understand legal and ethical issues, resolve ethical dilemmas, and make ethical decisions within social work. Values base, ethical standards, ethical decision-making models, and laws and legal procedures related to social work. Legal aspects of child welfare practice. prereq: Credit will not be granted if credit has been received for: 5811; foundation courses or adv standing or instr consent

SW 8804. Child Welfare Policy. (3 cr.; A-F or Audit; Every Spring) Develops advanced policy knowledge/skills for social workers practicing in or collaborating with public or private child welfare services. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8805. Aging and Disability Policy. (3 cr.; A-F or Audit; Every Spring) Social policy related to disability/aging. Major policy areas of income support, health, education, caregiving, employment, housing, retirement. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8806. Health and Mental Health Policy. (3 cr.; A-F or Audit; Every Spring) Critically engaged in health/mental health policy debate, analysis, development, implementation. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8807. International and Comparative Social Welfare Policy. (3 cr.; A-F or Audit; Every Spring) Cross-national comparisons of social welfare policies, major international conventions, treaties. Social welfare, social development theories/policies. In-depth analyses of selected countries' policies, international agreements, social development strategies. prereq: [5051, 5101, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8821. Social Work and Difference, Diversity and Privilege. (2 cr.; A-F only; Every Fall & Summer) Essential knowledge/awareness/skills to support culturally competent social work practice. prereq: [5051, 5801, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8841. Social Work Research Methods. (2 cr.; A-F or Audit; Every Fall & Spring) Develops foundational research methods knowledge/skills fundamental to evidence-based social work practice. prereq: MSW student or instr consent

SW 8842. Advanced Social Work Evaluation. (1-3 cr.; max 6 cr.; A-F or Audit; Every Fall, Spring & Summer) Students design/conduct evaluation of program or own direct practice. Purposes/types of evaluations. Instrument design, data analysis, ethical issues. Organizational, political, social, cultural factors affecting evaluation in diverse human contexts. prereq: [concurrent registration is required (or allowed) in 8020 or 8030], [5051, 5801, 8151, 8152, 8153, 8841] or MSW Adv Standing or instr consent

SW 8843. Social Work Program Evaluation. (1-2 cr.; max 3 cr.; A-F only; Every Fall & Spring) Students design, implement and present an evaluation of a program either in their field practicum or of particular interest to them. Class topics include the purpose and types of evaluations; instrument design; data collection techniques and management; data analysis; ethical issues; and organizational, political, social and cultural factors influencing evaluation in diverse human contexts.

SW 8851. Social Welfare History and Historical Research Methods. (3 cr.; A-F only; Periodic Spring) Methods of historical research in, and survey of, history/evolution of social welfare/work, using primary/secondary source materials. prereq: Completed research courses for soc work PhD student or [equiv research methods courses, grad student]

SW 8855. Social Policy Formulation and Analysis. (3 cr.; A-F only; Periodic Fall) Application of theoretical perspectives, conceptual frameworks, and research methodologies to analysis of social issues and analysis/formulation of social welfare policy. prereq: Soci wk PhD student or instr consent

SW 8861. Theory and Model Development in Social Work. (3 cr.; A-F only; Periodic Fall) Intervention research methods, contemporary social work practice models. Direct intervention in systems, from individual to community. Theoretical, value, empirical foundations of
practice models for intervention research. prereq: Soc wk PhD student or instr consent

SW 8863. Social Work Teaching Methods and Educational Issues. (; 3 cr.; A-F only; Periodic Fall) Teaching methods, skills, strategies, and issues related to Teaching, scholarship, and service roles in social work education. Issues, including curriculum development. Teaching experience in a social work class. prereq: Soc wk PhD student or 2nd-yr MSW student or instr consent

SW 8871. Social Work Research Seminar I. (; 3 cr.; A-F only; Every Fall) Concepts/methods of social research. Issues in social science, social work research, and knowledge development. Development of research questions. Sampling, measurement, data collection in qualitative/quantitative research, prereq: Soc wk PhD student or instr consent

SW 8872. Social Work Research Seminar II. (; 3 cr.; A-F only; Every Spring) Methods/design of quasi-experiments, surveys, descriptive research. Grounded theory. Analysis of qualitative/quantitative data. prereq: 8871 or instr consent

SW 8875. Research Practicum. (; 2 cr. [max 6 cr.]; S-N or Audit; Every Fall & Spring) Experience in conduct of research, following completion of 8871 and 8872. Students work under faculty direction. prereq: Soc wk PhD student or instr consent

SW 8888. Thesis Credit: Doctoral. (; 1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

SW 8901. Assessment and Treatment of Trauma. (2 cr.; Student Option; Every Spring) Sociopolitical context of trauma. Impact on diverse populations of individuals, families, communities. Evidence-based approaches for addressing trauma on multiple system levels. Applications to case conceptualization, treatment planning. prereq: Advanced Standing or students who have completed entire foundation curriculum including SW 8010 or instr consent

SW 8902. Social Work Supervision, Consultation, and Leadership. (2 cr.; Student Option; Periodic Fall & Spring) Sociopolitical context of trauma/its impact on diverse populations of individuals, families, communities. Evidence-based approaches for addressing trauma on multiple system levels through applications to case conceptualization/treatment planning. prereq: Advanced Standing or students who have completed the entire foundation curriculum including SW 8010 or instr consent

Social, Adm, and Clinical Phar (SACP)

SACP 8333. FTE: Master’s. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer)

SACP 8444. FTE: Doctoral. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer) 

SACP 8666. Doctoral Pre-Thesis Credits. (; 1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) 

SACP 8777. Thesis Credits: Master’s. (; 1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) 

SACP 8888. Thesis Credits: Doctoral. (; 1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) 

tbd

Science of pharmacoepidemiology borrows from pharmacology and epidemiology. This course will introduce students to the field of pharmacoepidemiology including study methodology, relevant statistics, data sources, measurement of treatments and outcomes, sources of bias and control of confounding, techniques to reduce bias and confounding, survival analysis and regression techniques, interpretation of results, and drug safety surveillance and risk management.

SAPH 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) Doctoral pre-thesis credits. prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr.

SAPH 8700. Hospital Pharmacy Administration. (3 cr.; A-F or Audit; Periodic Fall) History, classification, organization, and functions of hospital departments in relation to the pharmacy service. prereq: Grad SAPH major or instr consent

SAPH 8702. Hospital Pharmacy Survey. (1 cr. [max 3 cr.]; Student Option; Periodic Fall) Readings for self-directed students to explore contemporary issues in hospital pharmacy practices. prereq: Grad SAPH major or instr consent

SAPH 8777. Thesis Credits: Master's. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

SAPH 8810. Social Psychology of Health Care. (3 cr.; Student Option; Periodic Spring) Behavioral and social aspects of recovery responses to drugs and other therapies, patients' compliance with prescribed therapies, relationships between healthcare professional and patient. prereq: Grad SAPH major or instr consent

SAPH 8840. Social Measurement. (3 cr.; A-F or Audit; Periodic Fall & Spring) How social factors such as innovativeness, compliance, religiosity, and stress are measured and tested for reliability and validity. Relationships between theory, concepts, variables, data, prereq: Intro stat course, understanding of simple correlations or instr consent

SAPH 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

Sociology (SOC)

SOC 5090. Topics in Sociology. (1-3 cr. [max 9 cr.]; Student Option; Periodic Spring) Topics specified in Class Schedule. prereq: Undergrad soc majors/minors must register A-F

SOC 5104. Crime and Human Rights. (3 cr.; A-F or Audit; Periodic Fall & Spring) This course addresses serious violations of humanitarian and human rights law, efforts to criminalize those violations (laws and institutions), and consequences of these efforts. Special attention will be paid to the impact interventions have on representations and memories of atrocities on responses and the future of cycles of violence. Case studies on Holocaust, Balkan wars, Darfur, My Lai massacre, etc. Criminal justice, truth commissions, vetting, compensation programs. prereq: at least one 3xx SOC or GLOS course recommended

SOC 5170. Sociology of International Law: Human Rights, Trafficking, and Business Regulation. (GP; 3 cr.; A-F or Audit; Periodic Fall & Spring) Cultural values and practices in a globalized world. Role of international law. Immigration, terrorism, Americanization, and structure of international legal system.

SOC 5246. Disease, Disasters, and Other Killers. (ENV,HIS; 3 cr.; A-F or Audit; Every Fall) This course studies the social pattern of mortality, beginning with demographic transition theory. Students will study specific causes of death or theories of etiology, including theories about suicide, fundamental cause theory, and the role of early life conditions in mortality. Students learn tools for studying mortality, including cause of death classifications and life tables. Grad student or instructor consent.

SOC 5315. Never Again! Memory & Politics after Genocide. (GP; 3 cr.; A-F or Audit; Spring Odd Year) Course focuses on the social repercussions and political consequences of large-scale political violence, such as genocide, war crimes, and crimes against humanity. Students learn how communities and states balance the demands for justice and memory with the need for peace and reconciliation and addresses cases from around the globe and different historical settings. prereq: SOC 1001 or 1011V recommended. A-F required for Majors/Minors.

SOC 5411. Terrorist Networks & Counterterror Organizations. (3 cr.; A-F or Audit; Periodic Fall & Spring) Theories/evidence about origins, development, and consequences of terrorist networks. Efforts to prevent, investigate, and punish terrorists by use of law enforcement, security, and military forces. Terror involves using violent actions to achieve political, religious, or social goals. This course examines theories and evidence about the origins, development, and consequences of terrorist networks. It analyzes efforts to prevent, investigate, and punish terrorists by counterterror organizations, including law enforcement, security, and military forces. Graduate and honors students are expected to demonstrate greater depth of discussion, depth and to a degree length of writing assignments, presentations, and leadership of the students. prereq: Sociology Major/Minors must register A-F

SOC 5455. Sociology of Education. (; 3 cr.; Student Option; Every Fall) Structures and processes within educational institutions. Links between educational organizations and their social contexts, particularly as these relate to educational change. prereq: 1001 or equir or instr consent; soc majors/minors must register A-F

SOC 5511. World Population Problems. (3 cr.; Student Option; Every Fall) Population growth, natural resources, fertility/mortality in less developed nations, population dynamics/forecasts, policies to reduce fertility. prereq: Soc majors/minors must register A-F, credit will not be granted if credit has been received for PA 5301

SOC 5811. Social Statistics for Graduate Students. (MATH; 4 cr.; Student Option; Every Fall) This course will introduce statistical measures and procedures that are used to describe and analyze quantitative data in sociological research. The topics include (1) frequency and percentage distributions, (2) central tendency and dispersion, (3) probability theory and statistical inference, (4) models of bivariate analysis, and (5) basics of multivariate analysis. Lectures on these topics will be given in class, and lab exercises are designed to help students learn statistical skills and software needed to analyze quantitative data provided in the class. Soc 5811 is intended for new graduate students, undergraduate honors students, and students pursuing the Sociology BS degree. prereq: Credit will not be granted if credit has been received for Soc 3811 (Soc 5811 offered Fall terms only). Undergraduates with a strong math background are encouraged to register for 5811 in lieu of 3811. Soc majors must register A-F. 5811 is a good social statistics foundation course for MA students from other programs.

SOC 8001. Sociology as a Profession. (1 cr. [max 3 cr.]; S-N or Audit; Every Fall & Spring) This 1 credit class fosters adaptation to the Graduate Program in Sociology and preparation for a sociological career. In the Fall, we explore professional careers in this field. We discuss the wide range of opportunities in sociology and help students further explore the next steps to becoming a scholar, educator, and member of various professional, intellectual, and social communities. We share practical information about being a student in sociology and about sociological careers, discuss presentations in department workshop seminars, and provide a safe place to discuss issues of student concerns. Students are encouraged to bring to the class their thoughts and reactions to experiences during their first semester in the PhD program. The Spring 8001 class is oriented to particular milestones in the Sociology Graduate Program and important student activities (for example, preparing reading lists for the preliminary exam and then writing the preliminary exam, preparing
a dissertation prospectus, writing grant proposals, preparing an article for publication, etc.). Pre-req: Soc PhD students

SOC 8011. Teaching Sociology: Theory & Practice. (3 cr.; Student Option; Every Spring)
Social/political context of teaching. Ethical issues, multiculturalism, academic freedom. Teaching skills (e.g., lecturing, leading discussions). Active learning. Evaluating effectiveness of teaching. Opportunity to develop syllabus or teaching plan; prereq: Soc grad student or instr consent

SOC 8090. Topics in Sociology. (1.5-3 cr. [max 12 cr.]; Student Option; Every Fall & Spring)
Topics specified in Class Schedule. prereq: instr consent

SOC 8091. Independent Study. (1-5 cr. [max 20 cr.]; Student Option;)
Independent study of an established 8xxx course.

SOC 8093. Directed Study. (1-4 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
Directed study in sociology. prereq: Grad soc major or instr consent

SOC 8094. Directed Research. (1-4 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
May be used to fulfill sociology graduate requirement for advanced methodological training.

SOC 8101. Sociology of Law. (3 cr.; Student Option; Periodic Fall & Spring)
Sociological analysis of law and society. In-depth review of research on why people obey the law, of social forces involved in creation of law (both civil and criminal), procedures of enforcement, and impact of law on social change.

SOC 8111. Criminology. (3 cr.; Student Option; Periodic Fall & Spring)
Overview of theoretical developments and empirical research. Underlying assumptions, empirical generalizations, and current controversies in criminological research.

SOC 8148. Law, Society, and the Mental Health System. (3 cr.; A-F or Audit; Periodic Fall & Spring)
Intensive survey of psychopathology. Reference to criminal behavior, criminal justice system. prereq: [Grad student, 4148] or instr consent

SOC 8171. Cross-Disciplinary Perspectives in Human Rights. (3 cr.; Student Option; Periodic Spring)
This seminar will approach human rights issues from a variety of "disciplinary" perspectives, including history, the arts, law, the social sciences, and praxis. Empirical work in the social sciences will receive somewhat greater emphasis. One key focus will be the unique advantages (and disadvantages) of the different perspectives and fruitful ways to combine them to strengthen action that improves human rights situations in countries around the world, including the United States. prereq: Grad student or instr consent

SOC 8190. Topics in Law, Crime, and Deviance. (3 cr. [max 9 cr.]; A-F or Audit; Every Fall)
Advanced topics in law, crime, and deviance. Social underpinnings of legal/illegal behavior and of legal systems.

SOC 8211. The Sociology of Race & Racialization. (3 cr.; Student Option; Periodic Fall & Spring)
Major theoretical debates. Classic and contemporary theoretical approaches to studying U.S. race relations: contemporary and historical experiences of specific racial and ethnic groups.

SOC 8221. Sociology of Gender. (3 cr.; Student Option; Periodic Fall)
Organization, culture, and dynamics of gender relations and gendered social structures. Sample topics: gender, race, and class inequalities in the workplace; women's movement; social welfare and politics of gender inequality; theoretical and methodological debates in gender studies; sexuality; science; sociology of emotions.

SOC 8290. Topics in Race, Class, Gender and other forms of Durable Inequality. (3 cr. [max 12 cr.]; Student Option; Periodic Fall)
Comparative perspectives on racial inequality; race, class, and gender; quantitative research on gender stratification; stratification in post-communist societies; institutional change and stratification systems; industrialization and stratification. Topics specified in Class Schedule.

SOC 8311. Political Sociology. (3 cr.; Student Option; Every Fall)
Social dimensions of political behavior and social origins of different forms of the state. How various theoretical traditions--Marxist, Weberian, and feminist--address key issues in political sociology, including citizenship, revolution, state formation, origins of democracy, welfare state, and fascism.

SOC 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

SOC 8390. Topics in Political Sociology. (3 cr. [max 12 cr.]; Student Option; Periodic Fall & Spring)
Topics with common focus on social underpinnings of political behavior/change. Topics specified in Class Schedule. Sample topics: democracy and development, international legal and political systems, power and protest in advanced capitalist states, xenophobia and international migration, and civil society and democracy.

SOC 8412. Social Network Analysis: Theory and Methods. (3 cr.; Student Option; Periodic Fall)

SOC 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Doctoral student, adviser and DGS consent

SOC 8490. Advanced Topics in Social Organization. (3 cr. [max 12 cr.]; Student Option; Every Fall & Spring)
Content varies with instructor. Sample topics: gender and organizations, interorganizational relations, comparative study of organizations, nonprofit organizations, consumer behavior, industry and technology, social networks, conflict, coercion, and social exchange. Topics specified in [Class Schedule]. prereq: instr consent

SOC 8501. Sociology of the Family. (3 cr.; Student Option; Every Fall)
Theoretical and empirical works from contemporary family sociology. Content varies with instructor. Sample topics: definitions of the family, family roles, family interactions, marriage and divorce, childbearing, parenthood, and cultural variations in families.

SOC 8540. Topics in Family Sociology. (3 cr. [max 12 cr.]; Student Option; Periodic Fall & Spring)
Families and mental health; families, work, and the labor market; historical/comparative research on the family. Topics specified in [Class Schedule].

SOC 8551. Life Course Inequality & Health. (3 cr.; Student Option; Periodic Fall)
Seminar examines the changing life course in its social and historical context, including theoretical principles, methodologies, and policy implications. Focus on key societal institutions that offer unequal opportunities and constraints, depending on social class, race/ethnicity, and gender. Unequal access to age-graded social roles and resources shape the course of development, and in doing so, they have profound impacts on health. We will consider how inequality in the family, education, work, the military, and in the health care & criminal justice systems influence health behaviors and outcomes at different ages and life stages. prereq: grad student or instr consent

SOC 8590. Topics in Life Course Sociology. (3 cr. [max 12 cr.]; Student Option; Periodic Fall)
Sociology of aging, sociology of youth, and mental health and adjustment in early life course. Topics specified in [Class Schedule].

SOC 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer)
TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

SOC 8701. Sociological Theory. (4 cr.; A-F or Audit; Every Fall)
Traditions of social theory basic to sociological knowledge, their reflection and expansion.
Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
SENG 5115. Graphical User Interface Design, Evaluation, and Implementation. (2 cr. [max 3 cr.]; A-F or Audit; Every Fall & Spring)
Design and evaluation of interactive application interfaces, user- and task-centered approaches to design, guidelines for graphical design, interface evaluation techniques, current interface trends, including web interfaces and information visualization. Group projects that include designing, prototyping, and implementing an application interface. prereq: Grad SEng major

SENG 5116. Graphical User Interface Toolkits. (2-23 cr.; A-F or Audit; Periodic Fall)
Toolkit-centered introduction to GUI implementation technology. Students learn to use a GUI toolkit to implement a graphical application. Introduction to advanced techniques, including constraint-based data management, 3D visualization tools, and toolkit structure and design. prereq: Grad SEng major

SENG 5130. Introduction to Internet of Things: Systems-Level Design and Experimentation. (3 cr.; A-F or Audit; Every Spring)
Project-based examples from modern "Internet of Things" (IoT) systems. Hands-on experiments with core wireless hardware, sensors, and software elements. Students will gain the practical system-level skills and understandings able to be applied to any IoT system, and walk away with an IoT project created themselves. There will be discussions and team-centric activities focused on market trends, ground-breaking tech and products, security, communication protocols, and exciting emerging technologies related to IoT including machine learning, artificial intelligence, and augmented reality.

SENG 5131. Distributed Application Design and Development. (3 cr.; A-F or Audit; Every Spring)
Java programming, concurrent programming, workflow, distributed database, security, collaborative computing, object-oriented architecture/design, network publishing, messaging architecture, distributed object computing, and intranet. prereq: Grad SEng major

SENG 5132. Web Application Development. (3 cr.; A-F or Audit; Every Spring)
This course is an in-depth discussion of the challenges and complexities involved in designing and implementing modern web applications. Students will gain experience designing and implementing a project during in the course of the semester.

SENG 5199. Topics in Software Engineering. (2-23 cr. [max 6 cr.]; A-F or Audit; Every Spring)
Topics specified in Class Schedule. prereq: SEng grad student

SENG 5271. Cybersecurity. (3 cr.; A-F or Audit; Every Spring)
This course introduces the major topics of cyber security. Class time will focus on demonstrations, exercises, mini-projects, and discussions. Topics include authentication, access control, file system forensics, symmetric and asymmetric cryptography, network monitoring and controls, dynamic web site attacks, and network cryptography.

SENG 5511. Artificial Intelligence. (2-3 cr.; A-F or Audit; Periodic Spring)
Introduces ideas and theories of AI. Problem solving, search, inference techniques. Logic and theorem proving. Knowledge representation, rules, frames, semantic networks. Planning and scheduling. prereq: Grad SEng major

SENG 5551. Introduction to Intelligent Robotic Systems. (3 cr.; A-F or Audit; Periodic Fall)
Transformations, kinematics and inverse kinematics, dynamics, and control. Sensing (robot vision, force control, tactile sensing), applications of sensor-based robot control, robot programming, mobile robotics, and micro-robotics. prereq: Grad SEng major

SENG 5707. The Principles of Database Systems. (3 cr.; A-F or Audit; Every Fall)
Fundamental concepts; representing instances; prototypic model shapes; model evolution; interviewing user skills, reverse engineering; mapping to DBMS schema; database querying. prereq: Grad SEng major

SENG 5708. Data Analytics. (2-3 cr.; A-F or Audit; Every Spring)
Applications/motivation. Extended relational, object-relational, and object-oriented data models. Object identifier, types/constructors, versions, schema evolution. Query language (e.g., recursion, path expressions). Object indices, buffer management, and other implementation issues. Triggers, rules, complex objects, and case studies. prereq: Grad SEng major

SENG 5709. Big Data Engineering and Analytics. (3 cr.; A-F or Audit; Every Spring)
This course aims to teach students how to evaluate and engineer solutions that traditional data systems cannot handle, as well as various real-world use cases related to big data problems. This course will integrate theory and hands-on learning of various big data systems like NoSQL, streaming architectures, along with popular industry tools for scalable analytics. The focus of the course is largely around big data engineering, with some coverage of data science and analytics.

SENG 5801. Software Engineering I: Overview, Requirements, and Modeling. (3 cr.; A-F or Audit; Every Fall & Spring)
Software engineering as a discipline. Preview of topics to be covered in subsequent courses in master of science in software engineering program; in-depth study of requirements engineering; modeling techniques applicable to requirements and specification, including UML and formal modeling. prereq: Grad SEng major

SENG 5802. Software Engineering II: Software Design. (3 cr.; A-F or Audit; Every Spring)
Software design quality, processes that produce quality design, graphical and textual representations, including UML, common problems and patterns that solve them, refactoring. Students develop fluency in object-oriented design, and ability to read, critique, and advocate design ideas. Students work in teams to complete a multiphase project. prereq: Grad SEng major

SENG 5851. Software Testing and Verification. (2 cr.; A-F or Audit; Every Spring)
Theoretical/practical aspects of testing software. Analyzing a requirements document for test conditions. Writing a test plan. Designing, creating, and executing test cases. Recording defects. Writing a test report. prereq: 5801, grad SEng major

SENG 5853. Software Development for Real-Time Systems. (2-3 cr.; A-F or Audit; Periodic Fall)
Analysis, design, verification, and validation of real-time systems. Periodic, aperiodic, and sporadic processes, scheduling theory. Pragmatic issues. prereq: Grad SEng major

SENG 5841. Model-based Development. (3 cr.; A-F or Audit; Every Spring)
Formal specification of software artifacts. Applicability of formal specifications. Methods such as Z, SCR, and Statecharts. Formal analysis. Theorem proving. Reachability analysis. Model checking. Tools such as PVS, Statemate, SPIN, and SMV. prereq: Grad SEng major

SENG 5851. Software Project Management. (3 cr.; A-F or Audit; Every Fall & Spring)
Concepts used to manage software projects. Project management cycle: initiation, planning/control, status reporting, review, post-project analysis. Leadership and motivation strategies. Lecture, discussion, individual/team presentations/projects. prereq: Grad SEng major

SENG 5852. Quality Assurance and Process Improvement. (3 cr.; A-F or Audit; Every Fall & Spring)
Theory and application of capability maturity model: process assessment, modeling, and improvement techniques. Life cycle issues related to development and maintenance; quality, safety, and security assurance; project management; and automated support environments. Group projects and case studies. prereq: Grad SEng major

SENG 5861. Introduction to Software Architecture. (3 cr.; A-F or Audit; Periodic Fall)
Software/systems architecture. Representation/design, how they fit into software engineering process. Description of architectures, including representation and quality attributes. prereq: 2nd year, MSSE grad student

SENG 5899. Software Engineering Seminar. (1 cr. [max 2 cr.]; Student Option; Every Fall)
Software engineering trends. Talks by invited speakers, selected readings. prereq: Grad SEng major, instr consent

SENG 5900. Directed Study. (1-3 cr.; Student Option; Every Fall & Spring)
Directed study/research in software engineering. Topics/scope decided in collaboration with instructor.

**SENG 8333. FTE: Master’s.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prerequisite: Master’s student, adviser and DGS consent

**SENG 8494. Capstone Project (Plan B Project).** (3 cr.; S-N or Audit; Every Spring) Students work in teams on software projects using tools, techniques, and skills acquired during previous coursework. Each team works with a client to establish requirements, agree upon design, and achieve a successful acceptance test of resulting software system. prerequisite: SEng major

**SENG 8891. Independent Project.** (2-6 cr. max 12 cr.; Student Option; Every Fall & Spring) Independent project arranged with faculty.

### Soil, Water, and Climate (SOIL)

**SOIL 5125. Soil Science for Teachers and Professionals.** (4 cr.; Student Option; Every Fall & Spring) Basic physical, chemical, and biological properties of soil. Soil genesis classification, principles of soil fertility. Use of soil survey information to make a land-use plan. WWW used for lab preparation information.

**SOIL 5232. Vadose Zone Hydrology.** (3 cr.; Student Option; Every Fall) Basic soil physical properties/processes governing transport of mass/energy in soils. Emphasizes water/solute transport through unsaturated root/vadose zones, their impact on subsurface hydrology and on water quality. Lectures, hands-on laboratory exercises, discussion of real world problems, problem solving. prerequisite: Math 1271 or equiv. Phys 1042 or equiv

**SOIL 5555. Wetland Soils.** (3 cr.; A-F or Audit; Every Fall) Morphology, chemistry, hydrology, formation of mineral/organic soils in wet environments. Soil morphological indicators of wet conditions, field techniques of identifying hydric soils for wetland delineations. Peatlands. Wetland benefits, preservation, regulation, mitigation. Field trips, lab, field hydric soil delineation project. prerequisite: SOIL 1125 or 2125 or equiv or instr consent; concurrent registration is required (or allowed) in SOIL 4511 recommended

**SOIL 5611. Soil Biology and Fertility.** (4 cr.; Student Option; Every Fall) Properties of microorganisms that impact soil fertility, structure, and quality. Nutrient requirements of microbes and plants, and mineral transformations in biogeochemical cycling. Symbiotic plant/microbe associations and their role in sustainable agricultural production. Biodegradation of pollutants and bioremediation approaches. prerequisite: Biol 1009 or equiv. Chem 1021 or equiv; Soil 2125 recommended

**SOIL 8005. Supervised Classroom or Extension Teaching Experience.** (2 cr.; S-N or Audit; Every Fall & Spring) Teaching experience in one of five departments: Biosystems and Agricultural Engineering; Agronomy and Plant Genetics; Horticultural Science; Soil, Water, and Climate; or Plant Pathology. Participation in discussions about effective teaching to strengthen skills and develop a personal teaching philosophy. prerequisite: instr consent

**SOIL 8110. Colloquium in Soil Science.** (1-3 cr. max 6 cr.; S-N or Audit; Every Fall, Spring & Summer) Research or intellectual areas in soil science or climatology not covered in regular courses. Topics vary; contact department for current offerings.

**SOIL 8282. Modeling Water, Carbon, and Nitrogen Dynamics in the Soil-Plant-Air System.** (3 cr.; A-F or Audit; Spring Even Year) Integrative/quantitative treatment of dynamics of water, carbon, and nitrogen in soil-plant-air continuum.

**SOIL 8510. Advanced Topics in Pedology.** (2-4 cr. max 12 cr.; A-F or Audit; Fall Odd Year) Sample topics: soil-landscape relations, soil genesis, landscape evolution, land use and management, precision agriculture, digital terrain modeling, forest soils. prerequisite: 5515

**SOIL 8541. Aquatic and Soil Chemistry.** (3 cr.; A-F or Audit; Spring Even Year) Physical chemical principles, geochemical processes controlling chemical composition of natural waters, soil-sediment-water interactions. Emphasizes behavior of inorganic contaminants in natural waters, engineered systems, dissolved natural organic matter. prerequisite: Credit will not be granted if credit has been received for: CE 8541; 5311 or CE 4541

### Spanish (SPAN)

**SPAN 5110. Discursive Formulations at the Threshold of 20th-Century Spain.** (3 cr.; Student Option; Periodic Fall & Spring) Theory and representative examples of the realist/naturalist novel (Galdas, Pardo Bazan) in the context of its antecedents ("costumbrosmo"), opposites (the idealist/sentimental novel), and turn-of-the-century innovations of modernism and the "generation of 1898." prerequisite: Grad student or instr consent

**SPAN 5150. Contemporary Spanish Literature.** (3 cr.; Student Option; Periodic Fall & Spring) Major literary works/movements in Spain from 1915 to 2000. Neomodernism, surrealism, social realism, literatures of dictatorship/exile. Postmodernism. Poetry, novel, drama, essays, film, video/TV. Problems of literary history. prerequisite: Grad student or instr consent

**SPAN 5160. Medieval Iberian Literatures and Cultures.** (3 cr.; Student Option; Periodic Fall & Spring) The major literary genres developed in Spain from the Reconquest to 1502, with reference to the crucial transformations of the Middle Ages, including primitive lyric, epic, clerical narrative, storytelling, debates, collections, chronicles, "exempa," and the Celestina (1499-1502).

**SPAN 5170. The Literature of the Spanish Empire and Its Decline.** (3 cr.; Student Option; Periodic Fall & Spring) Major Renaissance/Baroque works of Spanish Golden Age (16th-17th-century poetry, nonfiction prose, novel, drama) examined against historical background of internal economic decline, national crisis, ideological apparatus developed by modern state. prerequisite: Grad student or instr consent

**SPAN 5180. Don Quixote.** (3 cr.; Student Option; Periodic Spring) Analysis of Cervantes’ [Don Quixote] in its sociohistorical context; focus on the novel’s reception from the romantic period to postmodern times. prerequisite: Grad student or instr consent

**SPAN 5190. The Crisis of the Old Regime: Spanish Literature of the Enlightenment and Romanticism.** (3 cr.; Student Option; Periodic Fall & Spring) Major literary works/intellectual movements/conflicts represented in written culture. of 18th/early 19th centuries (1680-1845), examined as expressions of long crisis of Spain’s Old Regime and rise of bourgeois liberalism. prerequisite: Grad student or instr consent

**SPAN 5316. Spanish Picaresque Narratives.** (3 cr.; Student Option; Periodic Fall) Literary autobiography, residual elements of Erasmian humanism, post-Tridentine repression/censorship. Picaro’s critique of imperial Spain’s system of values/authority. Cultural critics’ challenge to rediscover popular
SPAN 5531. Hispanic Literature of the United States. (3 cr.; Student Option; Periodic Fall)
Interdisciplinary approach providing a framework for deconstructing issues of national identity, marginalization, and gender. U.S. Hispanic theatre/literature and its ethnic diversity, regional variations, cultural links, and scope of its genres. prereq: Grad student or instr consent

SPAN 5550. Caribbean Literature: An Integral Approach. (3 cr.; Student Option; Periodic Fall & Spring)
Literature of Spanish-speaking Caribbean. Emphasizes historical legacy of slavery. African culture, independence struggles. prereq: Grad student or instr consent

SPAN 5560. Global Colonial Studies in the Hispanic World. (3 cr.; Student Option; Periodic Fall)
Discourse production in Spanish America between 1492 and 1700. Conquest/colonial writing/counter writing. Historical origin, evolution, impact of cultural, political, socioeconomic factors. prereq: Grad student or instr consent

SPAN 5570. Nineteenth Century Latin America: Enlightened Thought, Nation Building, Literacy, Cultural Discourse. (3 cr.; Student Option; Periodic Spring)

SPAN 5580. Latin American Cultural Integration in the Neocolonial Order. (3 cr.; Student Option; Periodic Fall & Spring)
Modernismo, historical vanguard, impact of populist politics in patterns of culture/literature. 1900-50. prereq: Grad student or instr consent

SPAN 5590. The Impact of Globalization in Latin American Discourses. (3 cr.; Student Option; Every Fall & Spring)

SPAN 5701. History of Ibero-Romance. (3 cr.; Student Option; Periodic Spring)
Origins and developments of Ibero-Romance languages; evolution of Spanish, Portuguese, and Catalan. prereq: Grad student or instr consent

SPAN 5711. The Structure of Modern Spanish: Phonology. (3 cr.; Student Option; Periodic Fall)
Formulating and evaluating a phonological description of Spanish. Approaches to problems in Spanish phonology within metrical, autosegmental, and lexical phonological theories. prereq: Grad student or instr consent

SPAN 5714. Theoretical Foundations of Spanish Syntax. (3 cr.; Student Option; Periodic Fall & Spring)
Linguistic types/processes that appear across languages. Grammatical relations, word order, transitivity, subordination, information structure, grammaticalization. How these are present in syntax of Spanish. prereq: Grad student or instr consent

SPAN 5715. The Structure of Modern Spanish: Semantics. (3 cr.; Student Option; Periodic Fall)
Applying semantic theory to Spanish: conceptual organization and the structuring of experience; meaning and cultural values; semantic fields; categorization and prototypes; cognitive model theory; metaphor, metonymy, and mental imagery as source and change of meaning. prereq: Grad student or instr consent

SPAN 5716. Structure of Modern Spanish: Pragmatics. (3 cr.; Student Option; Periodic Fall)
Concepts in current literature in Spanish pragmatics. Deixis, presupposition, conversational implicature, speech act theory, conversational structure. prereq: Grad student or instr consent

SPAN 5717. Spanish Sociolinguistics. (3 cr.; Student Option; Periodic Spring)
Sociolinguistic variation, cross-dialectal diversity in different varieties of Spanish in Latin America and Spain. Impact of recent cultural, political, and socioeconomic transformations on language. prereq: Grad student or instr consent

SPAN 5718. Spanish Language Contact. (3 cr.; Student Option; Periodic Fall & Spring)
Analysis of different types/results of Spanish language contact globally, taking into account varying social conditions under which contact occurs. prereq: Grad student or instr consent

SPAN 5721. Spanish Laboratory Phonology. (3 cr.; A-F or Audit; Periodic Fall & Spring)
Core literature on Spanish laboratory phonology. Phonology from a laboratory perspective. Students evaluate laboratory research methodologies, perform basic acoustic analyses, and design laboratory phonology studies. prereq: Grad student or instr consent

SPAN 5910. Topics in Spanish Peninsular Studies. (3 cr. [max 9 cr.]; Student Option; Every Fall & Spring)
Crucial moment or characters, works, or events marking beginning of new phase in literary/cultural landscape. prereq: Grad student or instr consent

SPAN 5920. Topics in Spanish-American Studies. (3 cr. [max 9 cr.]; Student Option; Periodic Fall, Spring & Summer)
Spanish-American literature analyzed according to important groups, movements, trends, methods, and genres. Specific approaches depend on topic and instructor. Topics specified in Class Schedule. prereq: Grad student or instr consent

SPAN 5930. Topics in Ibero-Romance Linguistics. (3 cr. [max 9 cr.]; Student Option; Periodic Spring & Summer)
Problems in Hispanic linguistics; a variety of approaches and methods.

SPAN 5970. Directed Readings. (1-4 cr. [max 9 cr.]; Student Option; Every Fall, Spring & Summer)
Students must submit reading plans for particular topics, figures, periods, or issues. Readings in Spanish and/or Spanish-American subjects. Prereq: Grad student or instr consent.

SPAN 5985. Sociolinguistic Perspectives on Spanish in the United States. (3 cr.; Student Option; Periodic Spring)
Sociolinguistic analysis of issues such as language maintenance/shift in U.S. Latino communities; code switching, attitudes of Spanish speakers toward varieties of Spanish and English; language change in bilingual communities, and language policy issues. prereq: Grad student or instr consent

SPAN 5990. Directed Research. (1-4 cr. [max 9 cr.]; Student Option; Every Fall, Spring & Summer)
Directed research. Prereq Grad student or instr consent.

SPAN 5991. The Acquisition of Spanish as a First and Second Language. (3 cr.; Student Option; Periodic Spring)
Analysis of issues such as the acquisition of Spanish and English by bilingual children; Spanish in immersion settings; developmental sequences in Spanish; classroom language learners’ attitudes, beliefs, and motivation; development of pragmatic competence. prereq: Grad student or instr consent

SPAN 6100. Research in Sociohistorical Approaches to Spanish Literature. (3 cr. [max 9 cr.]; Student Option; Periodic Fall)
Sociohistorical functions of Spanish literary works and major theories concerning literary production of tests. Testing modern theories in terms of representative fictional discourses from specific historical periods. prereq: 5xxx courses in Span literature and culture

SPAN 8200. Spanish Literary Texts: Theories of Formal Structures. (3 cr. [max 9 cr.]; Student Option; Periodic Fall)
Advanced research in methods of literary analysis of discourse. Emphasizes theoretical and practical frameworks within which representative texts are analyzed and interpreted from differing perspectives. prereq: 5xxx courses in Span literature and culture

SPAN 8212. Spanish Theater of the 16th Century: Drama up to Lope. (3 cr.; Student Option; Periodic Fall)
Medieval origins of drama to [La Celestina] (1499-1502), pastoral dialogues, crossover plays of Spanish and Portuguese dramatists, popular theater up to emerging public and private theaters under Italian influence. Rojas, Encina, Vicente, Naharro, Cervantes, and new tragedians. prereq: 5xxx courses in Span literature and culture

SPAN 8223. The Poetry of the Spanish Golden Age. (3 cr.; Student Option; Periodic Fall)
New Spanish poetic forms, from Garcilaso de la Vega’s, mystics, and San Juan de la Cruz to Baroque trends by Góngora, Lope, and Quevedo. Classic traditions and modern adaptations.
I ideological foundations of lyric genres—eclogue, lira, mystics, satire, conceptismo/ culturanismo, and sonnet. prereq: 5xxx courses in Span literature and culture

SPAN 8300. The Construction of Spanish Literary History. (3 cr. [max 9 cr.]; Student Option; Periodic Fall)
Origins and development of Hispanic literary canon: sociocultural theories of Spanish literary histories as academic and historiographic disciplines. Critiques of modern literary theories through analysis of literary works by major writers. prereq: Two 5xxx courses in Spanish literature and culture

SPAN 8312. Two Spanish Masterpieces: [Libro de Buen Amor] and [La Celestina]. (3 cr.; Student Option; Periodic Fall)
Cultural reappraisal of the late Middle Ages by reference to two Spanish masterpieces: the Archpriest's [Book of True Love] and Rojas' [La Celestina] (1499-1502). Emphasizes historical function of varied genres, motifs, and sources adapted by the authors. prereq: 5106, 5107 or 5xxx course in Portuguese

SPAN 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

SPAN 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Doctoral student, adviser and DGS consent

SPAN 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer)
TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr.; dept consent for 3rd/4th registrations, up to 24 combined cr.; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

SPAN 8710. Seminar in Hispanic Linguistics. (3 cr. [max 9 cr.]; Student Option; Fall Even Year)
Critical examination of readings/research on specific topic. prereq: 5711, [Ling 5302 or instr consent]

SPAN 8777. Thesis Credits: Master's. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

SPAN 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

SPAN 8900. Spanish Seminar. (3 cr. [max 9 cr.]; Student Option; Every Fall, Spring & Summer)
Projects relying heavily on advanced research in Spanish problems. Investigation of assigned fields, analysis of problems, appraisal of principles. Limited to small group of students. For list of sample seminars, consult department and director of graduate studies. prereq: Span 5xxx series required for MA or instr consent

SPAN 8940. Advanced Research in Spanish-American Literary Historiography. (3 cr. [max 9 cr.]; Student Option;)
Sources and procedures that have given rise to institutionalizations of Spanish-American literary history. Evaluation and review of epistemological principles and assumptions in theory of literary criticism and histories of literature.

SPAN 8960. Workshop: Research in Hispanic Cultural Issues. (3 cr. [max 9 cr.]; A-F or Audit; Every Fall, Spring & Summer)
Individualized support and advice in framing, theorizing, problematizing, and interpreting areas of cultural research. Taught in Spanish, Portuguese, and English. prereq: Reading knowledge of Spanish and Portuguese

SPAN 8990. Advanced Comparative Research of Caribbean Genres. (3 cr. [max 9 cr.]; Student Option; Periodic Fall)
Major literary works and genres of Caribbean literature studied against the background of sociohistorical vicissitudes of the process leading to the formation and consolidation of the national states. prereq: 5525 or instr consent

Spanish and Portuguese (SPPT)

SPPT 5930. Selected Topics in Hispanic and Lusophone Cultural Discourse. (1-3 cr. [max 9 cr.]; A-F or Audit; Periodic Fall & Spring)
Cultural discourses in Spanish- and Portuguese-speaking areas. Historical intersections/divergences. Taught in Spanish or Portuguese, and in English when cross-listed. Topics specified in Class Schedule. prereq: Reading knowledge of Spanish and Portuguese

SPPT 5995. Directed Teaching. (1 cr.; S-N only; Every Fall)
Taken in conjunction with SPPT 5999. Language acquisition theory as applied to foreign language instruction at college level. How current theory translates into practice through hands-on practical application particular to communicative language instruction practiced in Department of Spanish/Portuguese Studies. prereq: Grad student with concurrent enrollment in 5999

SPPT 5999. The Teaching of College-Level Spanish: Theory and Practice. (3 cr.; Student Option; Every Fall)
Theoretical grounding in the general principles of second language acquisition and guidance with their practical applications to the teaching of first- and second-year Spanish at the college-level. prereq: Grad or instr consent

SPPT 8400. Topics in Modern Hispanic and Lusophone Culture. (3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring)
Advanced research in methods of analysis of cultural products, including but not limited to literature. Emphasizes historical, ideological, and theoretical frameworks within which representative texts/events may be interpreted. prereq: Three 5xxx SPAN or PORT courses

SPPT 8920. Introduction to Hispanic and Lusophone Literatures, Cultures, and Languages. (2 cr. [max 9 cr.]; S-N only; Every Spring)
This two-credit seminar will familiarize beginning doctoral students in the areas of Hispanic/Lusophone literary and cultural studies and Hispanic linguistics. Course must be taken during spring semester of the first year. Topics to be covered include: expected milestones and progress prior to reaching ABD status; methods for writing conference abstracts and presentations; the basics of academic writing in cultural studies and linguistics; how to transform a seminar paper into a publishable piece of scholarship; best practices for determining appropriate conference and publication venues; how to start formulating a dissertation project in the early stages of the graduate career; tactics for requesting funding and completing scholarship/grant applications; collegiality and professionalism in the discipline prereq: Graduate Student

SPPT 8930. Dissertation & Professionalization Workshop. (1 cr. [max 6 cr.]; S-N only; Every Spring)

Speech-Language-Hearing Science (SLHS)

SLHS 5401. Counseling and Professional Issues. (3 cr.; Student Option; Every Fall)
Basic counseling principles and current professional issues related to practice in a dynamic multicultural environment. Application of counseling theory to clinical practice. Analysis of regulation, practice, and future direction of communication disorders. prereq: [concurrent registration is required (or allowed) in 8720 or concurrent registration is required (or allowed) in 8820, grad student] recommended

SLHS 5502. Voice and Cleft Palate. (3 cr.; Student Option; Every Spring)
Disordered voice and resonance. Presentation and discussion of the nature of etiologies, assessment and management of organic/functional voice disorders and cleft palate to meet clinical competencies for speech-language pathology. prereq: [3305, 4301] or [CDs 3305, CDIs 4301] or instr consent

SLHS 5503. Fluency and Motor Speech Disorders. (3 cr.; Student Option; Every Fall)
Nature/management of stuttering and other motor speech disorders in adults/children. prereq: graduate SLHS student or department permission, [3305, 4301] or instr consent

SLHS 5504. Evaluation and Management of Dysphagia. (2 cr.; Student Option; Every Fall)

**SLHS 5602. Speech Sound Disorders: Assessment and Treatment across Languages.** (3 cr.; Student Option; Every Fall)

Nature, assessment, and treatment of speech sound disorders in children. Assessment and treatment of phonological awareness and pre-literacy skills. This course covers cross-linguistic issues in speech sound disorders, including characteristics of speech sound disorders in a variety of languages, and the differential diagnosis of speech sound disorder from the effects of normal second-language acquisition. Emphasis on functional speech sound disorders, with some coverage given to disorders of a clear organic origin, like cerebral palsy, hearing impairment, and cleft palate. prerequisite: [3303, 3304, 4601] or instr consent

**SLHS 5603. Assessment and Intervention of Language Disorders in Children.** (3 cr.; Student Option; Periodic Fall & Spring)

Assessment and intervention techniques approaches for treating language impairment in children with disabilities, such as specific language impairment, developmental delays, and autism spectrum disorder. prerequisite: 3303 or CDIs 3303 or equiv or grad student or instr consent

**SLHS 5605. Language and Cognitive Disorders in Adults.** (3 cr.; Student Option; Periodic Fall & Spring)

Acquired cognitive and communicative disorders in the adult population specifically including: stroke/aphasia, right hemisphere dysfunction, traumatic brain injury, and dementia. Consideration of neurolinguistic substrates, disorder symptomology, assessment, clinical intervention, and functional impact across the lifespan and amongst diverse populations. prerequisite: [3302, 4301] or [CDIs 3302, CDIs 4301] or instr consent

**SLHS 5606. Introduction to Augmentative and Alternative Communication.** (3 cr.; Student Option; Every Fall & Spring)

Description of the range of augmentative and alternative communication applications for persons with developmental and acquired disabilities. Topics include assessment, intervention strategies, progress monitoring, generalization, and maintenance; collateral behavior resulting from AAC applications.

**SLHS 5608. Clinical Issues in Bilingualism and Cultural Diversity.** (3 cr.; A-F only; Every Spring)

Topics in cultural diversity, bilingualism, and second language learning needed for clinical competency in speech-language pathology. Basic/applied issues across a broad range of culturally/linguistically diverse populations. prerequisite: 3303 or equiv or instr consent

**SLHS 5609. Child Language Disorders in Diverse Populations.** (3 cr. [max 6 cr.]; Student Option; Every Spring)

This course covers topics across three broad areas of child language: cultural and linguistic diversity, early intervention, and social communication. The first section will address multicultural issues and bilingualism. The second section will focus on assessment and treatment of language disorders from birth through preschool. Finally, we will address the assessment and treatment of social communication and pragmatic language deficits across disorders and developmental levels, including early prelinguistic communication. The course will include both theoretically and clinically motivated content.

**SLHS 5801. Advanced Audiologic Assessment.** (3 cr.; Student Option; Every Fall)

Basic audiometric battery, including pure tone thresholds, measures of speech understanding, masking and immittance in adults. Topics include video otostopy, otoxicity, functional hearing loss, and identification of middle-ear fluid. Students enrolled in this course concurrently enroll in SLHS 5810. prerequisite: 4801 or CDIs 4801 or instr consent

**SLHS 5802. Hearing Aids I.** (3 cr.; Student Option; Every Fall)

Survey of modern hearing aids including history of development, electroacoustic functions, clinic and laboratory measurement techniques, sound field acoustics, techniques for selection. prerequisite: [3305, 4801] or [CDIs 3305, CDIs 4801]. SLHS grad or instr consent

**SLHS 5803. Pediatric Audiology.** (3 cr.; Student Option; Every Fall)

Behavioral, physiological approaches to assessment and identification, development of the auditory mechanism, etiologies of hearing losses in infants, children, principles of case management with children and families. prerequisite: [4801 or CDIs 4801]. SLHS grad or instr consent

**SLHS 5804. Cochlear Implants.** (3 cr.; A-F or Audit; Periodic Spring)

Implantable auditory prostheses. History of device development, including cochlear implants and auditory brainstem implants. Signal processing. Techniques for selection, fitting, and rehabilitation. Behavioral/physiological changes across life span. prerequisite: [4802, 5801, 5802] or [CDIs 4802, CDIs 5801, CDIs 5802]. SLHS grad or instr consent

**SLHS 5805. Advanced Rehabilitative Audiology.** (3 cr.; A-F only; Periodic Spring)

**SLHS 5806. Auditory Processing Disorders.** (3 cr.; A-F or Audit; Fall Even Year)

Normal and disordered auditory processing abilities. Anatomy and physiology of central auditory pathway, assessments to evaluate auditory processing skills, techniques to address auditory processing weaknesses. Current and historical theories and controversies surrounding auditory processing assessment. prerequisite: [4802 or CDIs 4802]. SLHS grad or instr consent

**SLHS 5807. Noise and Hearing Conservation.** (3 cr.; A-F or Audit; Periodic Fall)

**SLHS 5808. Pathophysiology of Hearing Disorders.** (3 cr.; A-F or Audit; Summer Odd Year)

Classifiers of auditory system, including anatomical, physiological, perceptual, and audiological manifestations of pathologies affecting hearing. Focus will be on understanding current data on physiology, pharmacology, and novel treatment alternatives. prerequisite: [8801, 8802] or [CDIs 8801, CDIs 8802]. SLHS grad or instr consent

**SLHS 5810. Laboratory Module in Audiology.** (1-2 cr. [max 10 cr.]; A-F only; Every Fall & Spring)

Intensive study of clinical methods in audiology. Supplemental didactic courses in audiology curriculum. Laboratory study, individually or in small groups. Students enroll in this course concurrently with SLHS 5801, 5802, 8801, 8802. prerequisite: [4801 or CDIs 4801, SLHS grad] or instr consent

**SLHS 5820. Clinical Research and Practice: Grand Rounds.** (1-6 cr.; S-N or Audit; Every Fall & Spring)

Group discussions of current professional issues in audiology. Case presentations, guest presentations on current technology, clinical-research ethics. Group meets for an hour weekly with faculty coordinator who leads discussion. Integrates academic/clinical education. prerequisite: [4801 or CDIs 4801 or equiv]. SLHS grad or instr consent

**SLHS 5830. Clinical Foundations in Audiology.** (1-8 cr. [max 24 cr.]; S-N or Audit; Every Fall, Spring & Summer)

Clinical foundations in audiology for first year AuD graduate students. prerequisite: Grad SLHS major

**SLHS 5900. Topic in Speech-Language-Hearing Sciences.** (1-3 cr. [max 6 cr.]; Student Option; Periodic Fall & Spring)

Topics listed in Speech-Language-Hearing Sciences office. prerequisite: SLHS grad student or instr consent

**SLHS 5993. Directed Study.** (1-12 cr. [max 18 cr.]; Student Option; Every Fall, Spring & Summer)

Directed readings and preparation of reports on selected topics. prerequisite: SLHS grad or instr consent

**SLHS 8333. FTE: Masters.** (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
University of Minnesota Twin Cities Catalog
Fall, 2018

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.

(No description) prereq: Master's student, adviser and DGS consent

SLHS 8410. Seminar: Research. (3 cr.; Student Option; Periodic Fall & Spring) Advanced study exploring application of experimental and quasi-experimental research designs used in single-subject and group research.

SLHS 8420. Seminar: Teaching. (3 cr.; [max 9 cr.]; Student Option; Periodic Fall & Spring) Advanced study to prepare doctoral students for careers in undergraduate and graduate teaching. prereq: Grad com dis major

SLHS 8430. Proseminar in Speech-Language-Hearing Sciences. (1-6 cr. [max 60 cr.]; S-N only; Every Fall & Spring) Presentations/discussions led by faculty and PhD students in the department, based on research or issues in the discipline.

SLHS 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

SLHS 8501. Interdisciplinary Management in Cleft Palate and Craniofacial Disorders. (3 cr.; Student Option; Every Fall) Communication problems associated with cleft palate and craniofacial disorders within interdisciplinary context; structural bases for speech problems, and physical and behavioral approaches to speech treatment; interdisciplinary medical and dental concerns and management. prereq: 3305 or CDIs 3305 or instr consent

SLHS 8530. Seminar: Speech. (3 cr.; [max 12 cr.]; Student Option; Periodic Fall & Spring) Advanced study and analysis of research in speech science and speech pathology.

SLHS 8602. Traumatic Brain Injury. (3 cr.; Student Option; Periodic Fall) Survey of communicative and cognitive disorders in adults who have traumatic brain injuries. Demographics, neuropathologic substrates, assessment and diagnosis, clinical applications. prereq: [3302, 4301] or [CDIs 3302, CDIs 4301] or instr consent

SLHS 8630. Seminar: Language. (3 cr.; [max 12 cr.]; Student Option; Periodic Fall & Spring) Research in language acquisition, language science, and language disorders.

SLHS 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) lbd prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

SLHS 8720. Clinical Education in Speech-Language Pathology. (1-8 cr. [max 24 cr.]; S-N or Audit; Every Fall, Spring & Summer) Clinical experience. Prereq Grad CDIs major, adviser, DGS consent.

SLHS 8777. Thesis Credits: Master's. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

SLHS 8801. Electrophysiologic Assessment of Auditory Function. (3 cr.; Student Option; Every Spring) Basic terminology and theoretical aspects of the auditory evoked potentials, electrococchlography, acoustic reflectance, and otoacoustic emissions. Topics include case studies with clinical application of short-latency responses such as the auditory brainstem response and otoacoustic emissions in adults. Students enrolled in this course concurrently enroll in SLHS 5810. prereq: 5801 or CDIs 5801 or instr consent

SLHS 8802. Hearing Aids II. (3 cr.; Student Option; Every Spring) Instrumentation and methods for fitting and evaluating personal hearing aids; ear impression techniques and materials; repair and modification of hearing aids. prereq: 5802 or CDIs 5802 or instr consent

SLHS 8803. Signals and Systems in Audiology. (3 cr.; Student Option; Every Fall) This mostly laboratory class includes familiarization and application of test equipment and methods for calibrating audiometric equipment. Sessions will include topics such as sound-field calibration, earphone calibration, filters, spectra of transient signals, and use of an artificial mastoid. prereq: [3305, 3306, 4801] or [CDIs 3305, CDIs 3306, CDIs 4801] or instr consent

SLHS 8805. Hearing Science Foundations of Audiology. (3 cr.; Student Option; Periodic Fall) Physiological/psychological acoustics. Emphasizes hearing loss. Acoustics of the middle and external ear, cochlear mechanics, neural codes for perception, frequency selectivity, loudness, temporal resolution, clear speech, attention, prediction of speech understanding ability using stimulus measures, and binaural hearing. prereq: Knowledge of acoustics, basic anatomy/physiology of ear, intro coursework in hearing/speech science

SLHS 8806. Audiology Capstone. (1-6 cr.; S-N or Audit; Periodic Fall) Students research a case history of patient with an auditory disorder, write paper that summarizes the literature on the disorder, and recommend assessment tools and treatment plans. prereq: 8802, 8807

SLHS 8807. Balance Assessment. (3 cr.; Student Option; Spring Odd Year) Anatomy/physiology of vestibular mechanism. Assessment techniques to evaluate balance function. Treatment options available for persons with balance disorders. prereq: 5801, 8801

SLHS 8820. Clinical Education in Audiology. (1-8 cr. [max 24 cr.]; S-N or Audit; Every Fall, Spring & Summer) Clinical experience. prereq: Grad CDIs major

SLHS 8830. Seminar: Hearing. (3 cr.; [max 12 cr.]; Student Option; Periodic Fall, Spring & Summer) Advanced study/analysis of research in hearing science and audiology.

SLHS 8840. Audiology Externship. (1-8 cr. [max 24 cr.]; S-N or Audit; Periodic Fall & Spring) Students intern at external clinical setting under supervision of certified audiologist. Entry-level knowledge and skills required for professional practice as clinical audiologist. External internship settings may include hospitals, schools, private otolaryngology practices, hearing aid dispensing practices, industrial settings, or community clinics. prereq: [8802, 8807] or [CDIS 8802, CDIS 8807]

SLHS 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 24 cr required.

SLHS 8994. Directed Research. (1-12 cr. [max 18 cr.]; Student Option; Every Fall, Spring & Summer) Directed research prereq: instr consent

Statistics (STAT)

STAT 5021. Statistical Analysis. (4 cr.; Student Option; Every Fall & Spring) Intensive introduction to statistical methods for graduate students needing statistics as a research technique. prereq: Credit will not be granted if credit has been received for: 3011; College algebra or instr consent; Stat course recommended

STAT 5031. Statistical Methods for Quality Improvement. (4 cr.; Student Option; Periodic Spring) Random variability/sampling. Controlling statistical process. Shewhart/accumulative charting. Analyzing plant data, trend surface, and variance/design of experiments. prereq: [3021 or 3022 or 4102 or 5021 or 5102 or 8102], Math 1272

STAT 5101. Theory of Statistics I. (4 cr.; Student Option; Every Fall) Logical development of probability, basic issues in statistics. Probability spaces. Random variables, their distributions and expected values. Law of large numbers, central limit theorem, generating functions, multivariate normal distribution, prereq: [Math 2263 or Math 2374 or Math 2574H], [CSCI 2033 or Math 2373 or Math 2243]

STAT 5201. Sampling Methodology in Finite Populations. (3 cr.; Student Option; Every Spring)
Simple random, systematic, stratified, unequal probability sampling. Ratio, model based estimation. Single stage, multistage, adaptive cluster sampling. Spatial sampling. prereq: 3022 or 4102 or 5021 or 5102 or instr consent

STAT 5302. Applied Regression Analysis. (4 cr.; Student Option; Every Fall, Spring & Summer)
Simple, multiple, and polynomial regression. Estimation, testing, prediction. Use of graphics in regression, Stepwise and other numerical methods. Weighted least squares, nonlinear models, response surfaces. Experimental research/applications. prereq: 3022 or 4102 or 5021 or 5102 or instr consent

STAT 5303. Designing Experiments. (4 cr.; Student Option; Every Fall, Spring & Summer)
Analysis of variance. Multiple comparisons. Variance-stabilizing transformations. Contrasts. Construction/analysis of complete/incomplete block designs. Fractional factorial designs. Confining split plots. Response surface design. prereq: 3022 or 4102 or 5021 or 5102 or instr consent

STAT 5401. Applied Multivariate Methods. (3 cr.; Student Option; Periodic Fall)

STAT 5421. Analysis of Categorical Data. (3 cr.; Student Option; Every Fall & Spring)

STAT 5511. Time Series Analysis. (3 cr.; Student Option; Every Fall)

STAT 5601. Nonparametric Methods. (3 cr.; Student Option; Every Fall & Spring)
Order statistics. Classical rank-based procedures (e.g., Wilcoxon, Kruskal-Wallis). Goodness of fit. Topics may include smoothing, bootstrap, and generalized linear models. prereq: 3022 or 4102 or 5021 or 5102 or instr consent

STAT 5701. Statistical Computing. (3 cr.; A-F or Audit; Every Fall)
Statistical programming, function writing, graphics using high-level statistical computing languages. Data management, parallel computing, version control, simulation studies, power calculations. Using optimization to fit statistical models. Monte Carlo methods, reproducible research. prereq: (Stat 5102 or Stat 8102) and (Stat 5302 or Stat 8051) or instr consent

STAT 5931. Topics in Statistics. (3 cr.; Student Option; Periodic Fall)
Topics vary according to student needs and available staff.

STAT 5993. Tutorial. (1-6 cr. [max 12 cr.]; Student Option; Every Fall & Spring)
Directed study in areas not covered by regular offerings. prereq: instr consent

STAT 8051. Advanced Regression Techniques: linear, nonlinear and nonparametric methods. (3 cr.; A-F or Audit; Every Fall)
Linear/generalized linear models, modern regression methods including nonparametric regression, generalized additive models, splines/basis function methods, regularization, bootstrap/other resampling-based inference. prereq: Statistics grad or instr consent prereq: Statistics grad or instr consent

STAT 8052. Applied Statistical Methods 2: Design of Experiments and Mixed -Effects Modeling. (3 cr.; A-F or Audit; Every Spring)

STAT 8053. Applied Statistical Methods 3: Multivariate Analysis and Advanced Regression. (3 cr.; A-F or Audit; Every Fall)
Standard multivariate analysis. Multivariate linear model, classification, clustering, principal components, factor analysis, canonical correlation. Topics in advanced regression. PhD student in stat or DGS permission and 8052

STAT 8054. Statistical Methods 4: Advanced Statistical Computing. (3 cr.; A-F or Audit; Every Spring)
Optimization, numerical integration, Markov chain Monte Carlo, related topics. prereq: STAT 8053 or instr consent

STAT 8055. Applied Project. (2 cr.; S-N only; Every Fall)
Collaborative applied statistical practice with a member of University community, including consulting, problem solving, presentation, documentation of results. prereq: [8054, 8801] or instr consent

STAT 8056. Statistical Learning and Data Mining. (3 cr.; Student Option No Audit; Periodic Spring)
Statistical techniques for extracting useful information from data. Linear discriminant analysis, tree-structured classifiers, feed-forward neural networks, support vector machines, other nonparametric methods, classifier ensembles (such as bagging/boosting), unsupervised learning. prereq: [[B6450, 6451, 6452]] or STAT 5303 or equiv., [biostatistics or statistics PhD student]] or instr consent

STAT 8101. Theory of Statistics 1. (3 cr.; Student Option; Every Fall)

STAT 8102. Theory of Statistics 2. (3 cr.; Student Option; Every Spring)

STAT 8111. Mathematical Statistics I. (3 cr.; Student Option; Every Fall)
Probability theory. Basic inequalities, characteristic functions, and exchangeability. Multivariate normal distribution. Exponential family. Decision theory, admissibility, and Bayes rules. prereq: [5102 or 8102 or instr consent], [Math 5615, Math 5616] or real analysis, matrix algebra

STAT 8112. Mathematical Statistics II. (3 cr.; Student Option; Every Spring)

STAT 8141. Probability Assessment. (3 cr.; Student Option; Periodic Spring)
Probability as a language of uncertainty for quantifying and communicating expert opinion and for use as Bayesian prior distributions. Methods for elicitation and construction of subjective probabilities. De Finetti coherence, predictive elicitation, fitting subjective-probability models, computer-aided elicitation, and use of experts. prereq: 5102

STAT 8171. Sequential Analysis. (3 cr.; Student Option; Periodic Fall)
Wald's sequential probability ratio test and modifications. Sequential decision theory. Martingales. Sequential estimation, design, and hypothesis testing. Recent developments. prereq: 8112

STAT 8201. Topics in Sampling. (3 cr.; S-N or Audit; Periodic Fall)
Sampling theory: stratified sampling, ratio estimators, cluster sampling, double sampling, superpopulation theory, Bayesian methods, multiple imputation, nonresponse. prereq: 8102 or instr consent

STAT 8311. Linear Models. (4 cr.; Student Option; Every Fall)
General linear model theory from a coordinate-free geometric approach. Distribution theory, ANOVA tables, testing, confidence statements, mixed models, covariance structures, variance components estimation. prereq: Linear algebra, 5102 or 8102 or instr consent
STAT 8312. Linear and Nonlinear Regression. (3 cr.; Student Option; Periodic Fall)
Nonlinear regression: asymptotic theory, Bates-Watts curvatures, super leverage, parameter plots, projected residuals, transform-both-sides methodology, Wald versus likelihood inference. Topics in linear and generalized linear models as they relate to nonlinearity issues, including diagnostics, semi-parametric models, and model assessment. prereq: 8311

STAT 8313. Topics in Experimental Design. (3 cr.; Student Option; Periodic Fall)
Optimal, Bayes, and nonlinear designs; algorithms for computing designs; sample size; recent developments. prereq: 8311

STAT 8321. Regression Graphics. (3 cr.; Student Option; Periodic Fall)

STAT 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

STAT 8401. Topics in Multivariate Methods. (3 cr.; Student Option; Every Fall)

STAT 8411. Multivariate Analysis. (3 cr.; Student Option; Periodic Fall & Spring)
Multivariate normal distribution. Inference on the mean, covariance, and correlation and regression coefficients; related sampling distributions such as Hotelling's T-squared and Wishart distribution. Multivariate analysis of variance. Principal components and canonical correlation. Discriminant analysis. prereq: 8311

STAT 8421. Theory of Categorical Data Analysis. (3 cr.; Student Option; Periodic Fall)
Categorical data, multidimensional cross-classified arrays, mixed categorical and continuous data. Loglinear, logit, and multinomial response models. Ordinal responses. Current research topics. prereq: 8062 or instr consent

STAT 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Doctoral student, adviser and DGS consent

STAT 8501. Introduction to Stochastic Processes with Applications. (3 cr.; Student Option; Periodic Fall)
Markov chains in discrete and continuous time, renewal processes, Poisson process, Brownian motion, and other stochastic models encountered in applications. prereq: 5101 or 8101

STAT 8511. Time Series Analysis. (3 cr.; Student Option; Periodic Fall)
Characteristics of time series. Stationarity. Second-order descriptions. Time-domain representation, ARIMA/GARCH models. Frequency domain representation, univariate/multivariate analysis. Periodograms, non-parametric spectral estimation, state space models. prereq: 5102 or 8111 or instr consent

STAT 8666. Doct Pre-Thesis Cr. (1-6 cr.; No Grade Associated; Every Fall, Spring & Summer)
TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

STAT 8701. Computational Statistical Methods. (3 cr.; Student Option; Every Spring)
Random variate generation, variance reduction techniques. Robust location estimation and regression, smoothing additive models, regression trees. Programming projects: basic programming ability and familiarity with standard high-level language (preferably FORTRAN or C) are essential. prereq: 8311, programming exper

STAT 8711. Statistical Computing. (3 cr.; Student Option; Periodic Fall)
Basic numerical analysis for statisticians. Numerical methods for linear algebra, eigen-analysis, integration, and optimization and their statistical applications. prereq: 8701 or instr consent

STAT 8721. Programming Paradigms and Dynamic Graphics in Statistics. (3 cr.; Student Option; Periodic Fall)
Alternative programming paradigms to traditional procedural programming, including object-oriented programming and functional programming. Applications to development of dynamic statistical graphics and representation and use of functional data, such as mean function in nonlinear regression log likelihoods and prior densities in Bayesian analysis. prereq: 8062, 8102

STAT 8777. Thesis Credits: Master's. (1-18 cr.; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

STAT 8801. Statistical Consulting. (3 cr.; S-N or Audit; Every Spring)
Principles of effective consulting/problem-solving, meeting skills, reporting. Aspects of professional practice/behavior, ethics, continuing education. prereq: STAT 8051 and STAT Grad Student or Instructor Consent

STAT 8811. Statistical Consulting Practicum. (3 cr.; max 12 cr.; S-N or Audit; Every Fall & Spring)
Providing (under faculty supervision) statistical support to clients, primarily University researchers. Exercises in problem solving, ethics, listening/communication skills. prereq: Statistics grad student or instr consent

STAT 8821. Curricular Practical Training. (1 cr.; max 3 cr.; S-N only; Every Fall, Spring & Summer)
Industrial work assignment using advanced statistical techniques. Grade based on final report and presentation covering work assignment. prereq: Statistics grad student, dept consent

STAT 8888. Thesis Credit: Doctoral. (1-24 cr.; max 100 cr.; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

STAT 8900. Student Seminar. (1 cr.; max 2 cr.; S-N or Audit; Every Fall & Spring)
Preparation or presentation of seminar on statistical topics. prereq: Statistics graduate student

STAT 8913. Literature Seminar. (1 cr. max 4 cr.; S-N only; Every Fall & Spring)
Students will read, present, discuss, and critique current literature/research. prereq: Statistics grad major or instr consent

STAT 8931. Advanced Topics in Statistics. (3 cr.; max 12 cr.; Student Option; Periodic Fall & Spring)
Topics vary according to student needs/available staff.

STAT 8932. Advanced Topics in Statistics. (3 cr.; max 12 cr.; Student Option; Periodic Fall & Spring)
Topics vary according to student needs/available staff.

STAT 8933. Advanced Topics in Statistics. (3 cr.; max 12 cr.; Student Option; Every Fall & Spring)
Topics vary according to student needs and available staff.

STAT 8992. Directed Readings and Research. (1-6 cr.; max 12 cr.; Student Option; Every Fall, Spring & Summer)
Directed study in areas not covered by regular offerings. prereq: instr consent

STEM Cell Biology (SCB)

SCB 5051. Stem Cell Biology Practical Training Module. (1 cr.; A-F only; Every Fall)
Intensive two-week course. Hands-on instruction in techniques of tissue culture. Conventional, fluorescence, and confocal microscopy. Flow cytometry for both analysis of cell populations and sorting of cells. prereq: Acceptance into stem cell biology master's program

SCB 5054. Stem Cell Institute Research Seminar and Journal Club. (2 cr.; max 6 cr.; A-F or Audit; Every Fall & Spring)
Students attend weekly Stem Cell Institute research seminars and journal clubs, write brief summaries, participate in journal club, and present original research paper. prereq:
Acceptance into stem cell biology [master's prog or PhD minor prog] or instr consent

SCB 5900. Master's Plan B Research Paper and Presentation. (2 cr.; A-F only; Every Fall, Spring & Summer)
Students write research paper based on primary literature on stem cell biology topic of interest, mentored by faculty member. prereq: Admission to stem cell biology master's plan B program

SCB 8181. Stem Cell Biology. (3 cr.; Student Option; Every Fall)
Stem cell research and its applications. Critical analysis, written summaries/critiques, oral presentations. prereq: [GGD 4034], [GGD 4161] or equiv or instr consent

SCB 8333. FTE: Master's. (; 1 cr.; No Grade Associated; Every Fall, Spring & Summer)
FTE: master's prerequisite. Master's student, adviser consent, DGS consent

SCB 8777. Thesis Credits: Master's. (; 1-18 cr. (max 50 cr.); No Grade Associated; Every Fall, Spring & Summer)
Thesis credits: master's

SCMC 5001. Critical Debates in the Study of Cinema and Media Culture. (4 cr.; Student Option; Every Fall)
Basic concepts in historical/international debates over production/reception of media culture. Emphasizes cinema. Advanced orientation toward intellectual traditions that inform contemporary scholarship.

SCMC 5002. Advanced Film Analysis. (4 cr.; A-F only; Every Spring)
Application of textual analysis to the reading of a film. Students work collaboratively to discern and interpret all component aural/visual elements of what the film says and how it says it.

SCMC 5993. Directed Study. (1-3 cr. (max 6 cr.); Student Option; Every Fall & Spring)
Guided individual reading or study.

SST 8000. Colloquium. (; 1.5 cr. (max 3 cr.); S-N or Audit; Every Fall & Spring)
Series of weekly lectures by nationally and internationally known scholars with diverse disciplinary and methodological backgrounds speaking on a variety of issues. prereq: Grad SST minor

SST 8100. Seminar: Models, Theories, and Reality. (3 cr.; Student Option; Every Fall & Spring)
Students participate in ongoing research on the role of models and theories in science, and prepare and present research papers. prereq: HSci 8111 or [Phil 8601 or Phil 8602 or Phil 8605] or instr consent

SST 8200. Seminar: Philosophy of the Physical Sciences. (3 cr. (max 6 cr.); Student Option; Periodic Fall)

Students participate in ongoing research in history, philosophy, and social study of physical sciences and prepare and present research papers. prereq: instr consent

SST 8300. Seminar: The Biological and Biomedical Sciences. (3 cr.; Student Option; Every Fall & Spring)
Students participate in ongoing research in history, philosophy, and social study of biological and biomedical sciences, and prepare and present research papers. prereq: HSci 8111 or [Phil 8601 or Phil 8602 or Phil 8605] or instr consent

Supply Chain and Operations (SCO)

SCO 6041. Project Management. (2 cr.; A-F only; Every Fall & Spring)
In the course of their careers, contemporary managers spend a significant amount of time either participating in or leading projects. Projects are frequently used as proving-grounds for high-potentials. The skills that are required in project management are often the very same attributes that are required for successfully managing a business. While every project is by definition unique, some concepts and tools (e.g., critical path method, time and cost tradeoffs, resource utilization, methods to deal with uncertainties) in project management apply to a wide range of different types of projects. The aim of this course is to equip students with these concepts and tools (e.g., Monte Carlo simulation, risk analysis) and to develop them into successful project managers, as well as team members.

SCO 6045. Strategic Sourcing. (2 cr.; A-F only; Every Spring)
Procurement and supply management has become increasingly visible in a world where supply is a major determinant of organizational success. Supply chain performance influences not only operational and financial risks but also reputational risk. Although this course explores cost containment and supply process improvement methods, it also pushes into revenue enhancement. The job of the supply manager today goes way beyond the scope of value and efficiency to the search for competitive advantage through the supply network. In addition to organizing the supply function for strategic advantage, the course explores strategic sourcing, supplier selection and evaluation techniques, supplier development methods, global sourcing techniques, as well as legal and ethical challenges. High-performance supply managers live for the challenges associated with building and maintaining a high-performance supply chain.

SCO 6048. Logistics and Transportation. (2 cr.; A-F only; Every Spring)
As supply chains become increasingly global, managing the complexity of distribution and transportation is critical to supply chain performance. This course focuses on the role of logistics and distribution networks in customer order fulfillment. Particular emphasis is placed on the linkage among logistics, warehousing and information systems, and the trade-offs involved in alternative distribution strategies. The course also explores the role of third-party logistics providers. Students learn models and techniques related to designing distribution networks that align with the firm's supply chain and corporate strategy.

SCO 6051. Service Management. (2 cr.; A-F only; Every Fall)
Designing and managing business interactions with customers. Creating service innovations, and designing processes and systems for delivering value-added services to customers. prereq: [MBA 6220 or equiv], MBA student

SCO 6056. Managing Supply Chain Operations. (4 cr.; A-F only; Every Fall & Spring)
Decisions/trade-offs managers face when directing operations of supply chain. How supply chain operations are coordinated within manufacturing, distribution, and retail organizations. prereq: [MBA 6220 or equiv], MBA student

SCO 6059. Quality Management and Lean Six Sigma. (4 cr.; A-F only; Every Fall)
Management/technical aspects of process improvement. Organizational performance and financial measures as they relate to process improvement. Strategy, improvement tools/methods. prereq: [MBA 6220 or equiv], MBA student

SCO 6061. New Product Design and Business Development. (3 cr.; A-F or Audit; Periodic Fall & Spring)
Nine-month intensive course. Engineering and business students work in teams on actual product development projects sponsored by business organizations to design prototype products and develop business plans for commercialization. Lectures, workshops, guest speakers, team meetings, company visits.

SCO 6072. Managing Technologies in the Supply Chain. (2 cr.; A-F only; Every Spring)
Course prepares students to develop capabilities for (i) making well-informed technology choice decisions; (ii) effectively managing the development and implementation of technologies; and (iii) collaboratively engaging in crisis management and problem solving during technology development and
implementation. The central question around which the course will be organized is: How can technologies and the related process and people issues be managed to design and sustain reliable, responsive, resilient, and responsible supply chains? Contemporary topics such as big data analytic applications to supply chain management; technology project management as it relates to offshoring and near-shoring; managing technologies in the context of supply chains in emerging economies; and managing technologies for sustainable supply chains will be covered in the course. Implications of globalization for managing technologies in supply chains will be a theme that will run through the entire duration of the course.

SCO 6081. Global Operations Strategy. (4 cr.; A-F only; Every Spring) Operational implications of strategic decisions, such as global facility location, outsourcing, supplier selection and relationship management, process automation and standardization, concurrent product development. prereq: [MBA 6220 or equiv], MBA student

SCO 6082. International Operations Management. (2 cr.; A-F only; Every Fall) Managing operations in global economy. Coordinating product design, technology transfer, sourcing, supply chains, quality standards, product assignment, facility location, and multicultural workforce management across national boundaries. Cross-functional decision making. prereq: [MBA 6220 or equiv], MBA student

SCO 6090. Sales, Inventory, and Operations Planning. (2 cr.; A-F only; Every Fall) Sales, inventory, and operations planning (SI&OP) is an important process for a firm and can provide significant payoffs. SI&OP links strategic goals with production while coordinating financial, operations, sales, marketing, and HR objectives. Sales, inventory, and operations plans serve as input to the master production schedule (MPS), helping coordinate material resources and capacity levels with strategic business objectives. SI&OP focuses on getting the big picture right by balancing demand and supply at product family level. Planning of mix (individual products and orders) becomes easier once volume (rates & levels) is effectively planned. Course is designed to address these questions: What should an executive know about SI&OP? How does SI&OP link with strategic planning, MPS, capacity plans, etc.? What are the challenges in developing an effective SI&OP process? What techniques are most effective? To address these questions, the course covers: forecasting, aggregate planning, master production scheduling, capacity planning, inventory planning, and material requirement planning.

SCO 6091. Process Improvement Methods. (2 cr.; A-F only; Periodic Spring) This course introduces the tools, problem solving methods, and organizational structures for process improvement. The course is organized around the DMAIC (Define Measure Analyze Improve and Control) method for process improvement in Six Sigma, but will also consider more general methods like PDCA (Plan Do Check Act). In addition, the course will consider broader aspects of process improvement that includes understanding organizational change and aligning process improvements with strategy. This course takes both a project level and organizational level perspective to understand process improvement and Six Sigma.

SCO 6092. Supply Chain Risk and Security. (2 cr.; A-F only; Periodic Spring) This course covers the organizational and behavioral aspects of managing quality, risk, and security within and across organizations. It covers various frameworks such as ISO 28000 (security) as a starting point. It covers various organizational issues such as managing organizational culture and navigating across national boundaries to address quality, risk, and security issues. It draws on various management theories to understand how to manage quality, risk, security, and disruptions across the supply chain. The course draws on examples from a variety of industries and government.

SCO 6093. Negotiations in Supply Chain. (2 cr.; A-F only; Periodic Spring) Negotiation is the art and science of securing agreements between two or more interdependent parties. Managing supply chains often requires extensive negotiations related to pricing, joint problem solving and collaboration. This course (i) helps students understand the theory and processes of negotiation as it is practiced in supply chains, (ii) highlight the components of an effective negotiation, and (iii) help students analyze their own behavior in negotiations. The course is largely experiential, providing an opportunity to develop skills by participating in supply chain negotiation exercises and integrating experiences with the principles presented in the assigned readings and class discussions.

SCO 6094. Responsible Supply Chain Management. (2 cr.; A-F only; Every Spring) Companies around the world are facing increasing pressure to perform well on the triple bottom line?People, Planet, and Profit?and responsible supply chain management is often a cornerstone of the CSR strategy for many companies. This course looks at how and why responsible supply chain management could be a powerful strategy to enhance a company's triple bottom line. The course focuses on the social and environmental aspects of managing supply chain operations. Particular emphasis is placed on human rights, health and safety, and environmental issues faced by supply chain managers and the linkage to the firm's supply chain strategy.

SCO 6095. Supply Chain Management in the Food and Agribusiness Sector. (2 cr.; A-F only; Periodic Spring) The food and agribusiness supply chain is complex. It spans input companies, farmers, traders, food companies, and retailers. The goal of this supply chain is to provide access to affordable food, feed, fiber, and fuel in a sustainable manner. The course covers topics relevant to achieving this goal such as supply management, production management, demand management to consumers. Issues such as diversity of production and demand, bulkiness of produce, perishability, seasonality, and complexity of supply chains of food and agricultural products will be addressed.

SCO 6096. Supply Chain Management in the Health Care and Medical Devices Sector. (2 cr.; A-F only; Periodic Spring) This course identifies the inter-relationships between the partners in a health care supply chain that links the development of care to the delivery of care. Issues addressed in the course include managing health care supply chain variables: increasing complexity of manufacturing pharmaceuticals and medical devices; increasing variety in drugs, devices and equipment to meet rapidly changing markets; increasing demand for affordable products from emerging economies; growing quality and compliance challenges with drugs and devices becoming more complex and regulatory scrutiny becoming stricter; and increasing frequency of recalls. Some examples of specific problems in health care delivery are: capacity planning and management in hospitals, location of health care facilities, supply chain management of blood banks, ambulance service planning, etc.

SCO 6097. Supply Chain Management in the Retail Sector. (2 cr.; A-F only; Periodic Spring) This course reviews how the retail sector has evolved over the years and the significance of supply chain management in the retail sector. The course examines the various functional components of retail supply chain management, and focuses on analysis and metrics required to effectively manage a retail supply chain. The students learn the language of retailing and acquire the fundamental skills needed to effectively analyze the performance of retail supply chains. Cases are discussed to illustrate how customers are becoming more exacting and demanding ever-increasing levels of service; and how retailers are responding by increasing product variety, becoming more price competitive, striving towards higher service levels, and utilizing advances in computing capabilities, information technologies, and retail analytics to improve their supply chain efficiency.

SCO 6098. Operations Excellence via Lean Thinking. (2 cr.; A-F only; Every Fall) This course introduces the concepts and theory of quality control, philosophial foundations of lean thinking, and technical concepts related to flow and pull, and tools such as value stream mapping, A3, and 5S. Students learn to identify, measure, and eliminate non-value added activities; process capability analysis; statistical process control; and acceptance sampling from extended value chains in manufacturing and service settings through hands-on exercises.

SCO 6190. Statistics. (2 cr.; A-F only; Every Fall) Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
This course introduces quantitative and business statistics concepts for managerial decision making and problem solving. The course first focuses on the nature of statistical studies and the differences between observational and experimental studies. Methods for producing data, including sampling techniques, process monitoring, and designed experiments will be discussed. Students learn graphical and numerical methods for descriptive statistics. Foundations for statistical inference are covered, including basic probability, discrete and continuous probability distributions, and sampling distributions of statistics. Students then learn how to apply the two basic inferential methods of statistics, statistical estimation, and tests of statistical hypotheses. These methods are used to make inferences about population parameters including means, proportions, and standard deviations. The students also learn to identify sample size requirements.

**SCO 6191. Big Data Analytics in Supply Chains. (2 cr.; A-F only; Every Fall)**
With the advancement of digital technologies and networking capabilities, firms are actively engaged in capturing data related to their supply chains. Firms recognize the immense potential in mining big data for improving the quality and timeliness of decisions, and becoming proactive in detecting and responding to external and internal signals of threats and opportunities. Course develops the capability to analyze and interpret data that is fundamental to managing supply chains and provides an overall understanding of the data and information management framework. This includes an overview of enterprise resource planning, value chain management and customer relationship management frameworks, the interconnections and interdependencies of functions from an information and data perspective. Through a combination of case studies and hands-on exercises, students learn (i) various facets of data analytics: data access, data aggregation, data analysis and data visualization; (ii) appropriateness and inappropriateness of big data analysis; and (iii) big data based predictive analytics.

**SCO 6192. Supply Chain Finance. (2 cr.; A-F only; Every Summer)**
Managing the financial flows and capital is just as important as managing the physical flow of goods and services. This course focuses on the underlying link between supply chain performance and the financial systems within an organization. Students learn concepts and tools related to supply chain costing, valuation, and projecting cash flow and capital requirements. The course looks at issues including tax and trade credits, and students develop an understanding of how financial considerations influence and inform a firm’s supply chain strategy.

**SCO 6290. Managing Supply Chain Operations. (4 cr.; A-F only; Every Fall)**
This course serves as an introduction to the program, providing an overview of the fundamental concepts of supply chain and operations management. The course is taught as a cohort experience with opportunities to interact outside the classroom. Supply chain professionals from a variety of industries are featured throughout to highlight how the concepts apply in different contexts. Students learn methods and models for evaluating and improving end-to-end processes and gain an understanding of the operational challenges inherent in managing global supply chains. The course takes a strategic and cross-functional view of supply chains in both product and service based industries.

**SCO 6291. Leadership Development. (0-2 cr.; A-F only; Every Fall, Spring & Summer)**
Carefully designed lectures, exercises and assignments are positioned through the year to assess and develop leadership skills personalized to each student at three levels: (i) how to lead self: leveraging current strengths, (ii) how to lead others: teamwork, collaboration, motivation, and feedback, and (iii) how to lead organizations: operating in complex global work environments. Substantively, the course is committed to creating an intellectual context that is now viewed as central to developing supply chain leaders. Specifically, the course provides opportunities for raising environmental, social and political awareness; learning about social media and related communications technologies and channels; and interacting with non-commercial organizations such as government and NGOs.

**SCO 6292. Global Operations Capstone. (4 cr.; A-F only; Every Summer)**
This course will examine, compare and contrast business models that work globally, and require a careful design of processes and supply chains to deliver the capabilities necessary to create a competitive advantage. This course helps students understand the strategic nature of decision making in operations, and allows them to apply such thinking to the design and improvement of global supply chain networks that span both developed and developing economies. The course contains an essential experiential component. Students will work with companies, either locally in Minnesota or across the world, on real world supply chain applications.

**SCO 6850. Topics in Operations and Management Science. (2-4 cr. [max 12 cr.]; A-F only; Every Fall & Spring)**
Topics seminar. Provides forum for topics in operations/management science.

**SCO 6851. Experimental Design. (3 cr.; A-F or Audit; Spring Even Year)**
Analysis of variance for one-way, two-way, and multi-way data. Basic concepts of statistical design and analysis of results. Randomized block, Latin square, cross-over, factorial designs, confounding, estimation and comparison of effects, response surfaces, and applications to management. prereq: MBA 6120 or equiv or business admin PhD student or instr consent; offered alt yrs

**SCO 6852. Regression Analysis. (3 cr.; A-F or Audit; Periodic Spring)**
Regression and correlation models, inferences in simple and multiple regression, multicollinearity, indicator variables, variable selection techniques, treatment of assumption violations, applications to management problems, basic concepts of experimental design, prereq: MBA 6120 or equiv, business admin Ph.D student or instr consent; offered alt yrs

**SCO 8711. Research in Operations Strategy. (3 cr.; A-F or Audit; Periodic Fall)**
Operations performance, competitive advantage; focused factory, product, and process innovation; and operations strategy implementation. Research results and methods. prereq: Business admin PhD student or instr consent; offered alt yrs

**SCO 8721. Management of Technological Operations. (3 cr.; A-F or Audit; Periodic Spring)**
Theories and models used to address problems of managing technological operations and operations in manufacturing and service firms. Technology strategy, economic/organizational perspectives on technology, productivity analysis, technology evaluation, project selection and evaluation, learning, etc. prereq: Business admin PhD student or instr consent; offered alt yrs

**SCO 8735. Supply Chain Management. (3 cr.; A-F or Audit; Periodic Fall & Spring)**
Research on forecasting, inventory control, materials requirements planning, just-in-time manufacturing, aggregate planning, scheduling, routing, sequencing, and dispatching in manufacturing and service industries. Research papers and methods are discussed. prereq: Business admin PhD student or instr consent

**SCO 8745. Research on Quality Management. (3 cr.; A-F or Audit; Periodic Fall & Spring)**
Research literature, methods, and results. Research on quality strategy, economics of quality, statistical process control, vendor management, off-line quality, and quality practice. prereq: Business admin PhD student or instr consent; offered alt yrs

**SCO 8755. Behavioral Operations. (3 cr.; A-F only; Periodic Fall & Spring)**
Research/review classic behavioral literature in economics and other business disciplines; identify behavioral problems within operations contexts; test/analyze operations phenomenon through experimental study, empirical methods, and analytical modeling. Supply chain problems. prereq: Business admin Ph.D. student or instr consent

**SCO 8800. Research Topics in Operations and Management Science. (2-4 cr. [max 16 cr.]; A-F or Audit; Periodic Fall)**
Topics selected from new areas of research. Research methods, issues in operations/management science. prereq: Business admin Ph.D. student or instr consent

**SCO 8892. Readings in Operations and Management Science. (1-8 cr. [max 16 cr.]; Student Option; Every Fall, Spring & Summer)**
Readings useful to student’s individual program and objectives that are not available in regular
courses. prereq: Business admin PhD student or instr consent

SCO 8894. Graduate Research in Operations and Management Science. (1-8 cr. [max 16 cr.]; Student Option; Every Fall, Spring & Summer) Individual research on an approved topic appropriate to student's program and objectives. prereq: Business admin PhD student or instr consent

Surgery (SURG)

SURG 7502. Externship in the Surgical Intensive Care Unit. (2-6 cr. ; H-N or Audit; Every Fall, Spring & Summer) This service provides the student with direct bedside experience and opportunities to apply the principles of physiology, biochemistry, and metabolism to critically ill and injured patients. Required reading: Abrams and Cerra, Essentials of Surgical Critical Care, Quality Medical Publishers, 1993. prereq: 7500

SURG 7503. Surgery Research. (4 cr. [max 8 cr.]; H-N only; Every Fall, Spring & Summer) The student will participate in a research experience designed around a specific topic, arranged on an individual basis by the Course Instructor with staff members in the Department of Surgery.

SURG 7504. Externship in Hospital-based Nutrition. (3-6 cr. ; H-N or Audit; Every Fall, Spring & Summer) This multidisciplinary patient care service is designed to provide one student with direct experience in hospital-based parenteral and enteral nutrition.

SURG 7505. Solid Organ Transplant Surgery. (4-46 cr. ; H-N only; Every Fall, Spring & Summer) Deceased and live donor kidney, liver, and pancreas transplantation. Pre-operative evaluation and management and post operative care (including immune monitoring). Intra-operative management (donor and recipient) of transplant patients and back-table work. Clinical rounds/teaching conferences/seminars. Complete abstract in area of interest. Scrub in organ donor operations as well as kidney, liver, and pancreas transplant.

SURG 7509. Burn Surgery. (4 cr. ; H-N only; Every Fall, Spring & Summer) The student is exposed to all aspects of burn care including small outpatient burns as well as massive life threatening burns.

SURG 7510. Advanced Surgery Externship. (4 cr. [max 6 cr.]; H-N only; Every Fall, Spring & Summer) Instruction and advanced experience in surgery and its components. Students participate in patient care at level similar to first year intern. Students work with team in general/vascular surgery, surgical oncology/colorectal, or MIS/thoracic/foregut under faculty supervision and participate in care of patients, in operating room, and in clinics. Students take call on assigned service.

SURG 7511. Advanced Surgery Externship (Subinternship) at VA Medical Center. (3-6 cr. [max 12 cr.]; H-N or Audit; Every Fall, Spring & Summer) Instruction/experience in surgery and its components. Students participate directly in patient care at a level of responsibility exceeding that given to beginning students. Students work under direct supervision of faculty and participate fully with surgical team on assigned service in care of hospitalized patients, in operating room, and in clinics. prereq: 7500, dept consent

SURG 7522. Plastic & Reconstructive Surgery. (4 cr. ; H-N only; Every Fall, Spring & Summer) The student is exposed to the full spectrum of plastic and reconstructive problems while on the rotation.

SURG 7523. Colon and Rectal Surgery. (4 cr. ; H-N only; Every Fall, Spring & Summer) Each student has the opportunity to become adept in the use of the sigmoidoscope as well as performing various outpatient anorectal procedures.

SURG 7524. Externship in Outpatient and Ambulatory Surgery. (3 cr. ; H-N or Audit; Every Fall, Spring & Summer) Surgery clinic. Operating room experience. Surgical pathology review. prereq: instr consent

SURG 7525. Cardiovascular and Thoracic Surgery. (4 cr. ; H-N only; Every Fall, Spring & Summer) Students will have the opportunity to become involved in the evaluation and management of patients with cardiac and thoracic surgical diseases. They will be incorporated at the level of a sub-intern on very busy clinical services. They will attend teaching conferences in addition to clinical duties. They may first or second assist on routine thoracic cases and second assist on some cardiac surgeries.

SURG 7526. Pediatric Surgery. (4 cr. ; H-N only; Every Fall, Spring & Summer) Students participate in all aspects of patient care. Initial evaluation, detailed history, physical exams, initiation/evaluation of diagnostic laboratory/radiologic testing. Formulating plans of resuscitation and patient care. Students also participate in outpatient clinics.

SURG 7910. Surgery Medical Residency. (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer) Surgery medical residency.

SURG 7930. Surgery Medical Fellowship. (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer) Surgery medical fellowship.

SURG 8200. Clinical Surgical Problems in Management. (3 cr. ; A-F or Audit; Every Fall, Spring & Summer) Diagnostic and management instruction in all phases of clinical surgery, inpatient and outpatient. prereq: Grad surg major

SURG 8201. Surgery Roentgenological Pathology Conference. (1 cr. ; A-F or Audit; Every Fall, Spring & Summer) Weekly review of surgical patients presenting interesting roentgenal and pathological findings. Staff from the Departments of Surgery, Radiology, and Laboratory Medicine and Pathology. Basic science and management principles of the surgical patient. prereq: Grad surg major

SURG 8202. Surgical Research. (3 cr. ; A-F or Audit; Every Fall, Spring & Summer) Graduate students undertake original investigation of problems in either experimental or clinical surgery. prereq: Grad surg major

SURG 8203. Surgery Complications and Research Conference. (1 cr. ; A-F or Audit; Every Fall, Spring & Summer) Evaluation of surgical patients, including postoperative course. Discussion and critical evaluation of current research problems. prereq: Grad surg major

SURG 8207. Transplantation Conference. (1 cr. ; A-F or Audit; Every Fall, Spring & Summer) Interdepartmental discussion and evaluation of current clinical and research problems. prereq: Grad surg major

SURG 8293. Applied Statistics. (1 cr. ; S-N or Audit; Every Fall & Spring) Interactive computer course. Concepts of applied statistics. Examples, problem sets based on surgical research. How to independently set up appropriate experiments and perform basic descriptive/inferential analysis. prereq: Grad student in [surgery or experimental surgery or health sciences] or

SURG 8333. FTE: Master's. (1 cr. ; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Master's student, adviser and DGS consent

SURG 8444. FTE: Doctoral. (1 cr. ; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

SURG 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) TBD prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

SURG 8777. Thesis Credits: Master’s. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall & Spring)
to improve operational and environmental performance.

SSM 5413. A Systems Approach to Residential Construction. (4 cr.; Student Option; Every Fall)
Dynamic/interrelated issues of energy, moisture control, indoor air quality in residential buildings. Emphasizes design, construction, and operational aspects to provide an energy efficient, durable structure, and healthy living environment. Interaction between moisture and wood products within building system.

SSM 5414. Advanced Residential Building Science. (4 cr.; Student Option; Fall Even Year)
Building science theory, advanced applications for residential buildings. Focuses on heat/mass transfer. prereq: Grad student or instr consent

SSM 5416. Building Testing & Diagnostics. (2 cr.; Student Option; Spring Even Year)
Theoretical basis for performance testing. Diagnostics applications for residential structures. Focuses on existing structures and retrofit/remedial applications. Digital differential pressure gauges, blow doors, airflow hoods/ grids, duct pressure testing, infrared thermography. Hands-on sessions for equipment use, problem solving. prereq: Grad student or instr consent

SSM 5418. Advanced Building Science: Applications. (3 cr.; A-F or Audit; Every Spring)
This course is intended to be a capstone applications course, where students will learn how to apply key building science principles (from SSM 4414/5414: Advanced Building Science: Fundamentals) to common building enclosure and mechanical system problems. Students will be guided to develop both qualitative and quantitative solutions for many common energy, moisture, and indoor air quality problems facing contemporary buildings. prereq: SSM 4414 or SSM 5414

SSM 5503. Marketing of Bio-based Products. (4 cr.; A-F or Audit; Every Fall)
Introduction to marketing function as it relates to current/emerging bio-based products industries (building materials, paper, fuels, etc.). Product positioning, pricing, promotion, and channel management within strategic planning and environmental marketing management.

SSM 5504. Sustainable Products Systems Management. (3 cr.; A-F only; Every Spring)
Concepts of new product development and product management and their application to bio-based products.

TMDP 8441. Seminar in Temporomandibular Disorders & Orofacial Pain. (1 cr.; A-F or Audit; Every Fall, Spring & Summer)
Advanced topics on theories and application of recently developed techniques of data collection, diagnostic strategies, and management.

TMDP 8442. Advanced Clinical Temporomandibular Disorders and Orofacial Pain. (1-4 cr.; A-F or Audit; Every Fall, Spring & Summer)
Interdisciplinary study of patients with TMD and orofacial pain using techniques of assessment currently being researched; background and clinical knowledge of patient synthesized with respect to current literature on management; management program is developed, discussed with faculty, and implemented. prereq: Participation in TMJ and orofacial pain advanced education program

Theatre Arts (TH)

TH 5100. Theatre Practicum. (1-4 cr.; max 20 cr.; Student Option; Every Fall & Spring)
Individual creative projects in production of approved plays as an actor, director, dramaturg, or playwright. (See 5500 for design practicums) prereq: instr consent, dept consent; 4 cr of 3100 for undergrads

TH 5103. The Theatre Dramaturg. (3 cr.; Student Option; Periodic Fall)

TH 5117. Performance and Social Change. (3 cr.; A-F or Audit; Periodic Fall)
Reading, writing, research, presentations and workshops explore activist performance projects. Theories of social formation and ideology provide framework to discuss/animate theater’s potential for social change. prereq: Jr or sr or grad student

TH 5152. Global Avant-Gardes: Theatre, Music, Modernity. (HIS; 3 cr.; Student Option; Every Spring)
What does it mean to be an avant-garde artist in the Global South? In postcolonial Africa and Asia, where arts were linked to national modernization projects, artists have played a key role in shaping citizens’ identity, alongside schools and universities. While participating in modernizing projects, avant-garde artists maintained independence from state institutions and voiced criticism of dictators. This course examines avant-garde performance in several locations of the Global South, analyzing dramas of national history, modernist music, activist theater, cosmopolitan dance, transnational cultural circuits, and politically radical performances. Reading historical, social, and performance studies, we will develop methods for analyzing performances that aim to make transformative social interventions. These include textual

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
analysis, ethnography, performance analysis, and tracking transnational cultural exchange. You will apply select methods in your final research paper, which centers on an avant-gardist cultural phenomenon in the contemporary Global South.

TH 5179W. Text and Performance. (WI; 3 cr.; A-F or Audit; Every Fall) How to read texts toward performance in various dramatic/ nondramatic material. Method of unlocking metaphorical energy of texts. Vocabulary/techniques of analysis that transform text from page to stage. prereq: [1322, [3171 or 3172]] or grad student

TH 5181W. Blacks in American Theatre. (WI; 3 cr.; Student Option; Periodic Spring) Historical survey of significant events in the development of American black theatre traditions. Essays, plays, playwrights, and theatre from early colonial references to the Black Arts Movement.

TH 5182W. Contemporary Black Theatre: 1960–Present. (WI; 3 cr.; Student Option; Spring Even Year) Essays, plays, playwrights, theatres that have contributed to contemporary black theatre from beginning of Black Arts Movement to present.

TH 5183. Critical Literacy, Storytelling, and Creative Drama. (3 cr.; Student Option; Every Summer) How storytelling and creative drama can be used as tools to help develop K-12 students’ critical literacy and to assist them in becoming more fluent readers/writers. prereq: Jr. or sr or grad student

TH 5330. Comedy: Advanced Physical Performance Studio. (3 cr. [max 9 cr.]; A-F only; Every Spring) Mechanics of creating physical comedy. Focuses on process using clown, Commedia dell’arte, Bouffons, or improvisational comedy. Exercises on how comedy is born from tragedy and state of conflict within one’s self. prereq: 3330, audition

TH 5340. Tragedy/Poetry: Advanced Physical Performance Studio. (3 cr. [max 6 cr.]; A-F only; Every Fall) Specific tragic/poetic training paradigms in physical theater employed by Stanislavski, Grotowski, Brecht, Lecoq, etc. Psychological, emotional, technical, and physical work. Tragic action in Greek tragedy, Shakespeare, Melodrama, operatic characterization, Brecht. Original tragic/poetical work. prereq: [3322, 3331, grad student] or instr consent

TH 5355. Puppetry: Techniques and Practice in Contemporary Theater. (3 cr.; Student Option; Every Fall & Spring) Fundamentals of puppet and object theater/performance are introduced through traditional/contemporary puppetry forms. Focuses on object theater, toy theater, hand puppets, and shadow/Bunraku-style puppets. Readings, in-class screenings of videos/slides. Students build/create series of short works for in-class performance. prereq: [3513 or concurrent registration is required (or allowed) in 3513], instr consent or grad student

TH 5370. Hand, Mind, and Gesture: An Independent Study in the Creation of Image Driven Performance. (3 cr.; Student Option; Every Spring) Create single or collaborative performance/event that lives in time/space. Work will draw from personal investigation, amplify personal signature, explore modalities of image driven forms. Propose, develop, construct, rehearse, present finished public performance. prereq: 5355, instr consent

TH 5500. Theatre Design Practicum. (1-3 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer) Individual projects in production of approved plays as a designer of scenery/properties, costumes, lighting, or sound. (See 5100 for other creative practicums.) prereq: Th 3521, 3531, or 3541

TH 5510. Drawing, Rendering, and Painting for the Theatre Designer I. (3 cr.; Student Option; Periodic Fall & Spring) Development of skills necessary for presentation of theatre scene/costume designs. Materials, layout, and techniques in scene painting. Basic drawing/graphic skills. prereq: 1501 or grad

TH 5520. Scene Design. (3 cr. [max 9 cr.]; Student Option; Every Fall & Spring) Conceiving/communicating design ideas in both two-dimensional sketches and three-dimensional models for theatre and allied venues. Drafting. prereq: 3521

TH 5530. Costume Design. (3 cr. [max 9 cr.]; Student Option; Every Fall) Theory and process of costume design for theatrical productions (e.g., dance, opera, film) through hypothetical productions. prereq: 3531

TH 5540. Lighting Design for the Theatre. (3 cr. [max 9 cr.]; Student Option; Every Spring) Design aesthetics and exploration of design for various stage forms and venues. Development of the lighting plot and paperwork; use of the computer in lighting design. prereq: 3541

TH 5545. Stage Lighting Technology. (3 cr.; Student Option; Periodic Fall) The lighting technician’s skills and crafts: equipment, techniques, control operation, wiring, and maintenance. prereq: 3515 or grad or instr consent

TH 5559. Sound Design for Performance. (3 cr.; Student Option; Periodic Fall & Spring) Audio technology/psychology, their impact on audience in a performance. Communication, design process, psychoacoustics, script analysis. prereq: 4555 or instr consent

TH 5560. Drawing, Rendering, and Painting for the Theatre Designer II. (3 cr.; Student Option; Periodic Spring) Development of skills necessary for presentation of theatre scene/costume designs. Materials, layout, and techniques in scene painting. Rendering and scene painting skills. prereq: 5510

TH 5570. Properties/Scenery Technology. (1-3 cr. [max 15 cr.]; Student Option; Every Fall & Spring) Management, structures, upholstery, mask-making, furniture construction, stage mechanics, soft properties, faux finishes. Topics specified in Class Schedule. prereq: 3515 or grad or instr consent

TH 5580. Costume Technology. (3 cr. [max 15 cr.]; Student Option; Every Fall & Spring) Fabric enhancement techniques, masks, wig-making, millinery, makeup prosthetics, pattern drafting, and draping. Topics specified in Class Schedule. prereq: 3571 or grad or instr consent

TH 5590. Theatre Technology Practicum. (1-3 cr. [max 15 cr.]; Student Option; Every Fall, Spring & Summer) Individual creative project in technology/craft area of theatre. Practical work in costume, lighting, makeup, props, scenery, sound, or theatre management. prereq: 3515, instr consent, dept consent; 4 cr max for undergrads

TH 5711. Advanced Stage Direction. (3 cr.; Student Option; Periodic Fall & Spring) Realistic/non-realistic dramatic forms. Theory/technique of rehearsal. Production problems. Includes directing of three one-act plays. prereq: [4711, instr consent] or grad student

TH 5716. Stage Management for the Theatre. (4 cr.; Student Option; Every Fall) Theories, practicalities, and techniques for rehearsal/performance. Organizing/managing various types of performance venues. prereq: [1101, 1321, soph] or grad

TH 5760. Advanced Stage Management. (2 cr.; Student Option; Every Fall & Spring) Practical experience in stage management for specific productions of the University Theatre with emphasis on rehearsal and performance. prereq: 5716 or concurrent registration is required (or allowed) in 5716, instr consent; 4 cr max for undergrads

TH 5950. Topics in Theatre. (1-4 cr. [max 80 cr.]; Student Option; Every Fall, Spring & Summer) Topics specified in Class Schedule.

TH 5993. Directed Study. (1-5 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer) Guided individual reading or study. Prereq 6 Th cr, instr consent, dept consent, college consent.

TH 6100. Theatre Practicum. (1-4 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer) Individual creative projects in production of approved plays as an actor, director, dramaturg, or playwright (see 8500 for design practicums). prereq: instr consent, dept consent

TH 8102. Theatre Historiography. (3 cr.; Student Option; Periodic Fall) Current trends in historiography; research strategies and methods.

TH 8111. History and Theory of Western Theatre: Ancient World and Early Medieval. (3 cr.; Student Option; Periodic Fall) History, theories, arts, and crafts of western theatre from the ancient world to the present.
TH 812. History and Theory of Western Theatre: Medieval Through Renaissance. (3 cr.; Student Option; Periodic Fall)
History, theories, arts, and crafts of western theatre from the ancient world to the present.

TH 813. History and Theory of Western Theatre: National Theatres to the French Revolution. (3 cr.; Student Option; Periodic Fall & Spring)
History, theories, arts, and crafts of western theatre from the ancient world to the present.

TH 814. Theatre: Performance and Political Modernity. (3 cr.; Student Option; Periodic Fall & Spring)
History, theories, arts, and crafts of western theatre from the ancient world to the present.

TH 815. History and Theory of Western Theatre: 20th Century Through World War II. (3 cr.; Student Option; Periodic Fall)
History, theories, arts, and crafts of western theatre from the ancient world to the present.

TH 816. History and Theory of Western Theatre: 20th Century From 1945 to the Present. (3 cr.; Student Option; Periodic Fall)
History, theories, arts, and crafts of western theatre from the ancient world to the present.

TH 820. Seminar. (3 cr.; [max 12 cr.]; Student Option; Every Fall & Spring)
Selected research topics from various theatre fields and periods. Sample topics: Border Crossings--Theatre History and Representation; The Theatre and Drama of the Third Reich, 1927-1944.

TH 8333. FTE: Master's. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

TH 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Doctoral student, adviser and DGS consent

TH 8500. Theatre Design Practicum. (1-3 cr.; [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
Individual creative projects in production of approved plays as a designer for scenery/properties, costumes, lighting, or sound (see 8100 for other creative practicums); prereq: instr consent, dept consent

TH 8510. Professional Design Workshop. (1-3 cr.; [max 18 cr.]; A-F only; Every Fall & Spring)
Development of graduate student as individual artist working collaboratively in performing arts industry. Further mastery of designer collaboration, self-promotion, management, displaying of job materials. Attend both professional/university productions throughout semester. prereq: MFA candidate

TH 8590. Theatre Technology Practicum. (1-3 cr.; [max 20 cr.]; Student Option; Every Fall & Spring)
Individual creative projects in the technology or craft of costume, lighting, makeup, props, scenery, sound, or theatre management. prereq: instr consent, dept consent

TH 8666. Doctoral Pre-Thesis Credits. (1-6 cr.; [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer)
tbd prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

TH 8711. Theory and Practice of the Modern Stage Director. (3 cr.; Student Option; Periodic Fall)
Survey of principal stage directors (e.g., Saxe-Meiningen, Meyerhold, Brecht, Strehler, Mnouchkine, Brook) and their theories and practices from 1871 to today using books, journals, firsthand accounts, and videos.

TH 8750. MFA Directing Practicum. (2-3 cr.; [max 10 cr.]; A-F or Audit; Every Fall & Spring)
Rehearsed and performed production of published or original one-act (2 cr) or full-length play (3 cr) with budgeted design and technical support. prereq: MFA directing specialization

TH 8777. Thesis Credits: Master's. (1-18 cr.; [max 50 cr.]; No Grade Associated; Every Fall & Spring)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

TH 8888. Thesis Credit: Doctoral. (1-24 cr.; [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

TH 8950. Topics in Theatre. (1-4 cr.; [max 8 cr.]; Student Option; Every Spring)
Topics specified in Class Schedule.

TH 8990. Directed Research. (1-5 cr.; [max 10 cr.]; Student Option; Every Fall & Spring)
tbd prereq: instr consent, dept consent

TH 8994. Directed Research. (1-6 cr.; [max 18 cr.]; No Grade Associated; Every Spring & Summer)
tbd prereq: instr consent, dept consent

Therapeutic Radiology (TRAD)

TRAD 7170. Basic Radiological Physics. (3 cr.; H-N or Audit; Every Fall & Spring)

TRAD 7171. Physics of Nuclear Medicine. (2 cr.; H-N or Audit; Periodic Fall)
N/A prereq: 7170 or instr consent

TRAD 7174. Physics of Diagnostic Radiology. (2 cr.; H-N or Audit;)

TRAD 7177. Radiation Therapy Physics Laboratory: Radiation Physics Basics. (3 cr.; A-F only; Every Spring)
Hands-on experience with hardware/software used in radiation therapy clinic for physics measurements. prereq: 7170 or concurrent registration is required (or allowed) in 7173 or instr consent

TRAD 7505. Introduction to Radiation Oncology. (2 cr.; H-N only; Every Fall, Spring & Summer)
This course is designed not only for the student who plans to go into radiation therapy, but for those who plan to go into a field such as family practice, internal medicine, pediatrics, or surgery, where oncologic patients may be part of their practice. It provides training in clinical oncology, especially the diagnosis, disposition, and care of patients with cancer. The student attends all departmental and interdepartmental functions including follow-up clinics, new patient oncology conference, etc. radiation physics will provide supplemental teaching. There is no night call.

TRAD 7507. Advanced Radiation Oncology. (4 cr.; H-N only; Every Fall, Spring & Summer)
Here the student will gain more familiarity with the role of radiation therapy in the treatment of cancer patients. The student will be able to work-up new patients and present to the staff, assist in the treatment planning and follow patients through therapy. The student will see follow-up patients and new patient in the clinic. Student will observe or assist in brachytherapy source implantation for gynecology cancer.

TRAD 7510. Radiation Oncology Research. (8 cr.; H-N only; Every Fall, Spring & Summer)
This elective provides an opportunity for each interested student to participate in a clinical research project designed around a specific topic related to radiation oncology. The student may choose to participate in an ongoing research project within the radiation oncology division or in an original investigative project of the student's design arranged on an individual basis by the course director with staff members in the Department of Therapeutic Radiology/Radiation Oncology.

TRAD 7910. Therapeutic Radiology Residency. (6 cr.; [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer)
Therapeutic radiology residency.

TRAD 8149. Advanced Topics in Radiation Therapy Physics. (2 cr.; A-F only; Every Fall)
Special procedures, including total body irradiation, intensity-modulated radiation therapy, stereotactic radiosurgery/radiotherapy, image-guided radiation therapy. Treatment planning algorithms and techniques. Advanced techniques in brachytherapy. prereq: [7170, 7173] or [BPHY 5170, BPHY 5173]

Toxicology (TXCL)

TXCL 5000. Directed Research in Toxicology. (1-5 cr.; [max 80 cr.]; A-F or Audit; Every Fall & Spring)
Special project that addresses specific issue in toxicology. Under guidance of faculty member. prereq: instr consent
TXCL 5011. Principles of Toxicology. (2 cr.; A-F or Audit; Periodic Fall) Introduction to fundamentals of poisoning in individuals and the environment, assessment of potential health hazards, and application of toxicology in various professional careers. prereq: Grad tcxL major or instr consent

TXCL 5012. Principles of Toxicology. (3 cr.; A-F or Audit; Every Spring) Science of toxicology. Biomedical principles. Regulatory practices governing protection of human health and environmental quality. prereq: At least one semester [biochemistry, calculus, cell biology]; at least one semester of [human or animal] physiology recommended

TXCL 5013. Chemical Toxicology. (3 cr.; A-F or Audit; Every Fall) Signs, symptoms, and mechanism of toxicity of different classes of chemicals spanning several organ systems, including chemical carcinogenesis. prereq: 5012, instr consent

TXCL 5010. Molecular and Cellular Basis of Nanoparticle Toxicology. (3 cr. [max 6 cr.]; A-F or Audit; Fall Odd Year) Introduction to science of nanotoxicology. Nanotechnology in scientific research. Assessment of impact on biological systems. prereq: Introductory toxicology course

TXCL 5195. Veterinary Toxicology. (3 cr.; A-F or Audit; Every Fall) Toxicology of minerals, pesticides, venoms, and various toxins. Identification of poisonous plants. Recognition, diagnosis, and treatment of animal poisons. prereq: Grad student or instr consent

TXCL 5545. Introduction to Regulatory Medicine. (2 cr.; A-F or Audit; Periodic Spring) Explanation of products requiring pre-market approval and those that may be marketed without approval. Post-market surveillance. Adverse reactions, removal of product from market. prereq: Grad student or instr consent

TXCL 8012. Advanced Toxicology I. (3 cr.; A-F or Audit; Every Spring) Absorption, distribution, metabolism, and excretion of xenobiotics: toxicokinetics; mechanisms of toxicity or specific classes of chemical agents. prereq: 5011 or BioC 4331, PubH 5104 or instr consent

TXCL 8013. Advanced Toxicology II. (3 cr.; A-F or Audit; Every Fall) Kinetic and dynamic determinants of target organ toxicity; pathological alterations in structure/function relationships for major target organ systems; mechanisms of mutagenesis, carcinogenesis, and teratogenesis. prereq: 8012, BioC 4332, Phsl 5062 or Phsl 6101 or instr consent

TXCL 8100. Investigative Toxicology. (1 cr. [max 2 cr.]; A-F or Audit; Every Fall & Spring) Evaluating toxicology research issues and literature; prereq: 8013 or instr consent

TXCL 8333. FTE: Master’s. (1 cr.; No Grade Associated; Every Spring & Summer) (No description) prereq: Master’s student, adviser and DGS consent

TXCL 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer) (No description) prereq: Doctoral student, adviser and DGS consent

TXCL 8666. Doctoral Pre-Thesis Credits. (1-6 cr. [max 12 cr.]; No Grade Associated; Every Fall, Spring & Summer) tbd prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

TXCL 8777. Thesis Credits: Master’s. (1-18 cr. [max 50 cr.]; No Grade Associated; Every Spring & Summer) (No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

TXCL 8888. Thesis Credit: Doctoral. (1-24 cr. [max 100 cr.]; No Grade Associated; Every Fall & Spring) (No description) prereq: Max 18 cr per semester or summer; 24 cr required

Translation and Interpreting (TRIN)

TRIN 5993. Directed Study. (1-3 cr. [max 6 cr.]; Student Option; Every Fall, Spring & Summer) Directed study in translation/interpretation.

University College (UC)

UC 5075. Directed Study. (1-8 cr.; Student Option; Every Fall, Spring & Summer) Directed study.

UC 5950. Special Topics. (1-8 cr. [max 16 cr.]; Student Option; Every Fall, Spring & Summer) Special topics.

Urologic Surgery (UROL)

UROL 7200. Surgical Specialty: Urology. (2 cr.; P-N only; Every Fall, Spring & Summer) Each student learns the basic principles of urology in this externship. Pediatric and adult urology are available. At the completion of the rotation, the student should be able to read an IVP, place Foley catheters, and read a urinalysis.

UROL 7252. Urological Conference. (3 cr.; No Grade Associated; Every Fall, Spring & Summer) Urological conference.

UROL 7253. Research in Urology. (3 cr.; No Grade Associated; Every Fall & Spring) Two-week urologic surgery externship. Principles of Urology students are use in a general medical practice. Urologic emergencies, infections, hematuria, stones, prostate cancer, and erectile dysfunction. How to read an IVP, place Foley catheters, and read a urinalysis. Frequent opportunities for student participation in rural consultations in primary care offices.

UROL 7900. Advanced Urological Surgery. (4-10 cr. [max 20 cr.]; H-N only; Every Fall, Spring & Summer) Advanced clinical urology rotation. Students act as sub-interns on busy clinical urology service. Students participate in weekly conferences and function as integral component of health care team.

UROL 7953. Urologic Research. (4-10 cr. [max 20 cr.]; H-N only; Every Fall, Spring & Summer) This is a full-time laboratory course in which the student learns the basic techniques of cell biology as they apply to urologic research. Basic techniques of protein purification for amino acid composition and sequencing, electrophoresis, Western blots, immunocytochemistry, and tissue culture are used in a well-defined project. The mechanics of working in a lab and research methodology are covered in this course.

UROL 7971. Urologic Surgery Medical Residency. (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer) Urologic surgery medical residency.

UROL 7980. Urologic Surgery Medical Fellowship. (6 cr. [max 120 cr.]; No Grade Associated; Every Fall, Spring & Summer) Urologic surgery medical fellowship.

UROL 8254. Urological Seminar. (2 cr.; Student Option; Every Spring & Summer) tbd

UROL 8255. Urological Radiological Conference. (2 cr.; Student Option; )

UROL 8256. Urological Pathological Conference. (2 cr.; Student Option;)

UROL 8257. Selected Topics in Genitourinary System. (1 cr.; Student Option;)

Veterinary Medicine (CVM)

CVM 6000. Gopher Orientation and Leadership Experience. (2 cr. [max 4 cr.]; S-N only; Every Fall & Spring) Introduces first-year students to the veterinary college, program, and profession. Two-day and one-night off-site orientation program and monthly meetings are experiential in design and focus on leadership development, emotional intelligence, communication, and conflict management. Third orientation day on campus and subsequent noon meetings introduce students to the college facilities and resources and address logistics necessary for participation in the program. Students work in mentor groups of 9-11 students and 2-3 faculty mentors throughout the course. prereq: Admission to veterinary program

CVM 6001. Global and Intercultural Opportunities. (0.5 cr. [max 1 cr.]; S-N only; Every Fall)
Finding and applying for opportunities. Securing funding. Travel safety. Topics in cultural competence. Presentations from students who have participated in international projects.

**CVM 6006. Global One Health: Thailand.** (3 cr.; S-N only; Periodic Spring) Self-guided study. Monthly in person seminars prior to three week study abroad in Thailand. Journal on recommended topics. Assessment via evidence of reading provided references through active participation in discussions, presentation of learning topics, active participation. **CVM 6007. Global Perspectives and Intercultural Development.** (0.5 cr.; S-N only; Every Spring) This course provides information on international and cultural immersion opportunities including finding and applying for opportunities, securing funding, and traveling safely. Additionally, students will explore cultural humility through the Intercultural Development inventory, case studies, and class activities. Students will also have the opportunity to view posters and ask questions from current students who have participated in international projects

**CVM 6026. Small Animal ICU Practicum: Year 4.** (1 cr.; max 3 cr.; S-N or Audit; Every Fall, Spring & Summer) Management of dogs/cats requiring urgent medical care, intensive medical management. Providing primary case support through patient evaluation, problem solving, health care delivery, equipment operation. Practicum in Small Animal Intensive Care Unit.

**CVM 6027. Large Animal Practicum: Year 3.** (1 cr.; S-N only; Every Fall & Spring) Experience in procedures/policies involved in after-hours care of hospitalized/emergency cases in the large-animal hospital. Prereq: 3rd yr DVM or [instr consent, college consent]

**CVM 6028. Large Animal Clerk Duty.** (4 cr. [max 12 cr.]; S-N or Audit; Every Fall, Spring & Summer) Team leadership in procedures/policies involved in after-hours care of hospitalized/emergency cases in large-animal hospital. Prereq: All 4th year students in Food Animal, Equine, Mixed tracks, as well as affiliate students.

**CVM 6029. Small Animal Hospital Practicum: Year 3.** (1 cr.; max 2 cr.; S-N only; Every Fall, Spring & Summer) Management of dogs/cats requiring urgent medical care, intensive medical management. Providing primary case care and service support through patient evaluation, problem solving, health care delivery, equipment operation. Practicum is served in Small Animal Intensive Care Unit. prereq: DVM 3rd yr or instr consent

**CVM 6030. Veterinary and Community Public Health.** (; 2 cr.; A-F or Audit; Every Spring) Epidemiological approach to veterinary public health. Major zoonoses, animal sentinel, meat/milk inspection, preharvest food safety, environmental dispositional health and safety, euthanasia, carcass disposal methods, cruelty investigations, welfare issues. Problem-solving examples, prereq: 6201, 6202, 6220

**CVM 6137. Small Animal Clinical Nutrition.** (2 cr. [max 6 cr.]; A-F only; Every Fall, Spring & Summer) Students participate in clinical nutrition service of VMC, manage nutritional needs of patients, perform nutritional assessments of ICU patients, perform internal/referring nutritional consults, and see outpatient appointments. prereq: 3rd or 4th yr DVM or instr consent

**CVM 6206. Introduction to Integrative Medicine.** (1 cr.; S-N only; Every Spring) This 1 week elective rotation is primarily provided for 4th year veterinary students. The integrative medicine rotation will cover traditional eastern veterinary medicine, animal chiropractic, nutritional therapy, neurotreaticals, physical therapy, and massage therapy.

**CVM 6222. Advanced Clinical Epidemiology.** (; 1 cr. [max 2 cr.]; A-F only; Every Fall) Apply epidemiologic principles to control of infectious diseases in animal populations. Scientific literature. Global impacts of infectious diseases. Diagnostic tests, disease outbreak investigation, economics of disease control/surveillance.

**CVM 6308. Lab Animal Medicine.** (2 cr.; A-F only; Every Spring & Summer) This course is designed to introduce students to the field of laboratory animal medicine and provide a strong foundation in the discipline. Using a mix of didactic and hands-on training methods, students will gain proficiency in the veterinary care of lab animals, and apply their skills and knowledge gained in all previous courses in their veterinary curriculum. Discussions will be challenging and require independent thought and application of concepts to real-world situations. Students will be well-prepared for additional training in laboratory animal medicine as would occur though residency.

**CVM 6312. Veterinary Dental Rotation (SDen).** (2 cr. [max 6 cr.]; A-F only; Every Fall, Spring & Summer) Routine/complex dental problems. Students diagnose and formulate treatment plans. Hands-on training. Basic periodontal procedures, single/multi-rooted extractions, dental radiographic techniques, instrument/equipment care, dental charting. prereq: DVM 3rd or 4th yr student or instr consent

**CVM 6404. Small Animal Dermatology: Advanced Block.** (1 cr.; A-F or Audit; Every Spring) Case-base discussion of common dermatologic conditions that affect dogs/cats. Students work on clinical cases outside classroom. Cases are discussed in classroom.

**CVM 6452. Metabolic Disorders II.** (; 3 cr.; A-F or Audit; Periodic Fall) Pathophysiology, clinical presentation, diagnostic approach, therapeutic options, and management protocols for metabolic and endocrine based disorders of domestic species. prereq: DVM 3rd yr or instr consent

**CVM 6482. Small Animal Theriogenology.** (1 cr. [max 2 cr.]; A-F only; Every Fall) Normal/abnormal reproduction in dogs/cats. Dystocia management. Diagnosis/treatment of reproductive tract disease. Exotics. prereq: 3rd yr DVM or instr consent

**CVM 6500. Animal, Public, and Ecosystem Health.** (2 cr. [max 4 cr.]; S-N only; Every Fall, Spring & Summer) Emphasize interactions with public health, policy, and regulatory partners to provide a basic understanding of the essential roles veterinary professionals play in public health, disease control, food safety, and ecosystem health. prereq: DVM 3rd or 4th yr or grad student or instr consent

**CVM 6501. Advanced Veterinary Public Health: Current Topics.** (1 cr. [max 2 cr.]; S-N only; Every Fall, Spring & Summer) Systems used to raise livestock/poultry, deliver through markets to slaughter or processing facilities, and deliver to consumers. Methods to assess/mitigate risks. Emphasizes public health/food safety issues. Field trips, problem solving, assignments. prereq: DVM or MPH or grad student or instr consent

**CVM 6502. Necropsy.** (2 cr. [max 40 cr.]; S-N only; Every Fall, Spring & Summer) Students perform necropsies, collect tissues for lab analysis, interpret clinicopathologic findings, prepare reports on animals submitted to Veterinary Diagnostic Lab, apply basic clinical science to diseases for animals and populations of animals. Students may participate in history taking. Case findings discussed daily. Student groups present case reports at weekly departmental seminar. prereq: DVM 3rd or 4th yr or instr consent

**CVM 6503. Exotic Animal Necropsy Rotation.** (2 cr.; A-F only; Every Fall, Spring & Summer) Zoo/wildlife pathology service similar to required necropsy rotation (CVM 6502). Perform necropsies of incoming cases of “nontraditional” animals. Write report and
CVM 6504. Remediation course. (0.5-9 cr. [max 27 cr.]; S-N or Audit; Periodic Fall, Spring & Summer) Remediation course.

CVM 6505. Topics course. (0-8 cr. [max 80 cr.]; Student Option; Every Fall, Spring & Summer) Topics Course

CVM 6506. Directed Studies in Large Animal Medicine (DistL). (1-2 cr. [max 40 cr.]; S-N or Audit; Every Fall, Spring & Summer) Students, under guidance of a faculty member, conduct a special project addressing an issue in large animal medicine. Project proposals include hypothesis, objectives, plan of study, and product for evaluation by adviser and approval by the College of Veterinary Medicine’s curriculum committee. prereq: DVM 4th yr or instr consent

CVM 6507. Directed Studies in Small Animal Medicine (DistS). (1-2 cr. [max 40 cr.]; S-N or Audit; Every Fall, Spring & Summer) Students, under guidance of a faculty member, conduct a special project addressing an issue in small animal medicine. Project proposals include hypothesis, objectives, plan of study, and product for evaluation by adviser and approval by CVM’s curriculum committee. prereq: DVM 4th yr or instr consent

CVM 6508. Directed Studies: Pathobiology (DistP). (1-2 cr. [max 40 cr.]; S-N or Audit; Every Fall, Spring & Summer) Students, under guidance of a faculty member, conduct a special project addressing an issue in veterinary pathobiology. Project proposals include hypothesis, objectives, plan of study, and product for evaluation by adviser and approval by CVM’s curriculum committee. prereq: DVM 4th yr or instr consent

CVM 6509. Directed Studies: Diagnostic Medicine (DistD). (1-2 cr. [max 40 cr.]; S-N or Audit; Every Fall, Spring & Summer) Students, under guidance of a faculty member, conduct a special project addressing an issue in diagnostic medicine. Project proposals include hypothesis, objectives, plan of study, and product for evaluation by faculty adviser and approval by CVM’s curriculum committee. prereq: DVM 4th yr or instr consent

CVM 6510. MPH Project: PHP. (1-3 cr. [max 9 cr.]; S-N only; Every Fall, Spring & Summer) Directed field research. Original or secondary analysis of data sets related to public health practice. prereq: DVM student or instr consent

CVM 6511. Zoo and Wildlife Rounds. (0.5 cr. [max 3 cr.]; S-N or Audit; Every Fall & Spring) Zoo, wildlife, and exotic pet conservation. Seminars involving topics of exotic animal conservation, medicine, and pathology encountered at Minnesota, Como, and Lake Superior zoos; Raptor Center; and Minnesota Veterinary Diagnostic Laboratory. Basic biology of the affected animals, clinical aspects, and pathology of encountered diseases. Apply principles of basic/clinical science to address the cause of disease for individual animals as well as populations of species.

CVM 6512. Zoo and Wildlife Rounds. (1-2 cr. [max 4 cr.]; Student Option; Every Fall, Spring & Summer) Large Animal Medicine Rotation at another accredited veterinary college and used to meet a core medicine requirement.

CVM 6521. Avian & Exotic Medicine. (2 cr.; A-F only; Every Fall, Spring & Summer) Develop the knowledge and technical skills needed to manage common medical and surgical issues of popular avian and exotic species.

CVM 6532. Clinical Laboratory Medicine (Labs). (2 cr. [max 4 cr.]; A-F only; Every Fall & Summer) One-week intensive rotation in veterinary clinical lab medicine. Hematology, cytology,
CVM 6535. RaOl Large Animal Surgery and Lameness. (2 cr.; A-F only; Every Fall, Spring & Summer) Large Animal Surgery Rotation at another accredited veterinary college and used to meet a core medicine requirement.

CVM 6538. Lakefield Clinical Rotation. (2 cr.; A-F only; Every Fall, Spring & Summer) Managing general/c Clinical caseload in a non-referral setting. Working with patients at Banfield, The Pet Hospital, under supervision of mentor. Managing acute/chronic cases. Client communication. Clinical skills.

CVM 6539. Wellhaven. (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) The intent of this rotation is to provide the student with experience, instruction, and supervision managing a general/caseload in a non-referral, non-academic setting. The student will use knowledge gained in didactic coursework to refine their medical knowledge base. The student will be provided the opportunity to improve their clinical skills working with patients seen at a Wellhaven hospital under the supervision of an assigned Wellhaven mentor and staff.

CVM 6540. Advanced Veterinary Toxicology. (: 2-8 cr. [max 40 cr.]; S-N or Audit; Every Fall, Spring & Summer) In-depth examination of toxins. Clinical, diagnostic, mechanistic, and therapeutic aspects of biotoxins, organic, and inorganic toxins that affect livestock, poultry, wildlife, and companion animals or that threaten public health, prereq: DVM 3rd or 4th yr or instr consent

CVM 6560. Public Health Issues and Veterinary Medicine Opportunities. (: 1 cr. [max 20 cr.]; A-F only; Every Fall & Spring) Public health practice and veterinary medicine. Day-to-day work of public health professionals. Public health principles in context. Veterinary medicine related to public health research/practice. Students interact with advocacy groups, media, lobbyists, legislators, regulatory officials, industry leaders, and public health professionals.

CVM 6601. Small Animal Internal Medicine: (SAM A). (: 2 cr. [max 4 cr.]; Student Option; Every Fall, Spring & Summer) Primary case responsibility for wide range of clinical diseases. History taking, physical examination, problem definition, diagnostic/therapeutic plans on assigned cases. Cases typically relate to gastroenterology, urology, nephrology, oncology, neurology, immunology, and cardiology. Daily rounds. Students present case discussion topics and interpret lab data, radiographic evaluations, and biopsy information. Emphasizes effective communications with clients/referring veterinarians. prereq: DVM 3rd or 4th yr or instr consent

CVM 6602. Small Animal Internal Medicine: (SAM B). (: 2 cr. [max 52 cr.]; Student Option; Every Fall, Spring & Summer) Problem-solving skills, clinical skills, communication skills, record keeping, ethical issues in referral cases. Methods of knowledge acquisition, including computerized searches and diagnostic programs. Small group rounds discussions. Students assist clinicians in management of referral/emergency cases. Cases typically related to gastroenterology, nephrology, urology, oncology, nutrition, neurology, and cardiology. prereq: [6601, [DVM 3rd or 4th yr]] or instr consent

CVM 6605. Banfield Elective Clinical Rotation. (: 2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Managing general/caseload in non-referral setting. Working with patients at Banfield, The Pet Hospital, under supervision of mentor. Managing acute/chronic cases. Client communication. Clinical skills.

CVM 6609. Emergency/Critical Care (ECC). (: 2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Emergency/critical-care cases in small animal practice or emergency practice. History taking, physical exams. Creating problem lists, proposing diagnostic/therapeutic plans. prereq: Sr

CVM 6630. Behavior. (2 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer) Students participate in behavior consultations: history taking, diagnosis, outline of treatment protocols, sample collection, demonstration of training techniques, writing of treatment plans, case follow-up. Students present one case, prepare one topic of their choice for presentation during rounds. Daily rounds include discussion of cases, review of behavior-related articles, discussion of problem complexes. prereq: DVM 3rd or 4th yr or grad student or instr consent

CVM 6632. Dermatology (Derm). (: 2 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer) Routine dermatologic problems in companion animal practice. History taking, clinical diagnosis, patient management, client education. Students participate in all phases of diagnosis/management of cases. Small-group discussions. prereq: DVM 3rd or 4th yr or instr consent

CVM 6634. Ophthalmology. (2 cr. [max 40 cr.]; Student Option; Every Fall, Spring & Summer) Entry-level ophthalmology. Diagnosis, treatment. Outside readings, review papers, final essay exam. prereq: DVM 3rd or 4th yr or instr consent

CVM 6636. Cardiology. (2 cr. [max 40 cr.]; Student Option; Every Fall, Spring & Summer) Clinical problem solving. Cases of cardiopulmonary disease, including canine/feline congenital heart disease, acquired valvular/myocardial disease, dirofilariasis, arrhythmias, pulmonary disorders. Hands-on experience in conducting physical exams, recording electrocardiograms/echocardiograms, and reading thoracic radiographs. Group discussions, rounds. prereq: DVM 4th yr or CVM grad or instr consent

CVM 6644. Primary Care A. (2 cr. [max 40 cr.]; Student Option; Every Fall, Spring & Summer) Students manage their own cases including developing diagnostic, treatment, and preventive health maintenance plans for each patient, performing routine medical and surgical procedures, and conducting client communication and education. Wide variety of cases.

CVM 6648. Advanced Clinical Oncology Rotation. (: 2 cr. [max 4 cr.]; Student Option; Every Fall, Spring & Summer) Case management, self-directed research. Students receive oncology referrals, work with emergency cases and special procedures, assist in treatment decisions and therapeutic options for new cases, and manage ongoing chemotherapy/radiation therapy patients. Emphasizes principles of oncology and patient care. prereq: DVM 3rd or 4th yr or grad student or instr consent

CVM 6649. Primary Care B. (2 cr.; A-F only; Every Fall, Spring & Summer) Students manage their own cases including developing diagnostic, treatment, and preventive health maintenance plans for each patient, performing routine medical and surgical procedures, and conducting client communication and education. Wide variety of cases.

CVM 6651. Small Animal Ultrasound. (2 cr. [max 8 cr.]; A-F only; Every Fall, Spring & Summer) Students practice routine abdominal ultrasound. Principles for interpretation of exam. Learning through use of clinical caseload. Daily practice of particular ultrasound skills. Students scan clinical patients and interpret radiographic procedures as needed. prereq: [3rd or 4th yr] DVM or instr consent

CVM 6661. Neurology. (2 cr. [max 4 cr.]; Student Option; Every Fall, Spring & Summer) Medical/surgical neurology. Providing complete neurological service for clients, patients, and hospital. Integration into all aspects of service, including receiving, work up, surgery, care, communications, and discharges. prereq: 3rd or 4th yr DVM or instr consent

CVM 6662. Comparative Anesthesiology (Anes). (: 2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Practical experience in sedating/anesthetizing routine clinical cases. Previously taught lab protocols/techniques are used in healthy normal clinical cases and adapted for high risk cases. Emphasizes problem solving in formulation of anesthetic plans, management of patients under anesthesia, team work, and pain management. prereq: DVM 3rd or 4th yr

CVM 6663. SA Surgery. (2 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer) Diagnostic/therapeutic management of surgical patients. History taking, physical examination,
communication, problem solving, and surgical techniques. Economic issues. Students work as part of a surgical service team with faculty member, resident, and intern. prereq: DVM 3rd or 4th yr or instr consent

**CVM 6664. University of Minnesota: Spay and Neuter (UMSN).** (2 cr. [max 10 cr.]; Student Option; Every Fall, Spring & Summer) Elective surgeries such as ovariohysterectomy, neuter, and declaws for small animals. Two-student teams are responsible for pre-surgical evaluation, anesthesia induction/maintenance, surgical procedure, and post-operative care of animals supplied by Humane Society for Companion Animals. prereq: DVM 3rd or 4th yr or instr consent

**CVM 6665. Small Animal Physical Rehabilitation.** (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Students work closely with veterinary technician and physical therapist who are certified canine rehabilitation practitioners. Evaluating a patient to determine a rehabilitation problem list. Establishing treatment goals. Application of basic physical modalities, proper passive range of motion, beginning therapeutic exercises. Students develop treatment goals and plan for one orthopedic and one neurologic case.

**CVM 6666. Special Procedures in Veterinary Radiology.** (2 cr.; Student Option; Periodic Fall & Spring) Contrast agents and procedures used to examine various body systems or anatomical areas. prereq: DVM 3rd or 4th yr or grad or instr consent

**CVM 6668. Small Animal Radiology (RAD).** (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Making high quality radiographs. Students practice routine and special procedures. Principles for interpretation. Exposure to CT and MRI. Daily radiographic interpretation in small animal species. Issues related to radiation protection. prereq: DVM 3rd or 4th yr or instr consent

**CVM 6669. Radiology: Mixed Animal.** (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Making high quality radiographs. Students practice routine and special procedures. Principles for interpretation. Exposure to CT and MRI. Daily radiographic interpretation in small animal species. Issues related to radiation protection. prereq: DVM 3rd or 4th yr or instr consent

**CVM 6690. Integrative Medicine.** (1 cr.; S-N only; Every Spring) History/principles of acupuncture, chiropractic, and other commonly used complementary approaches to care of domestic animals. Training requirements for certification. Lectures, case examples, demonstrations. prereq: 2nd yr DVM student or instr consent

**CVM 6691. Veterinary Acupuncture (AcPunct).** (2 cr. [max 6 cr.]; Student Option; Every Fall, Spring & Summer) Basic veterinary acupuncture theory, point combination, treatment, diagnosis of diseases, hands-on veterinary acupuncture technique. prereq: [6690, [yr 3 or 4 DVM]] or instr consent

**CVM 6702. Large Animal Palpation Labs.** (1.5 cr. [max 2 cr.]; S-N only; Every Fall) Hands-on clinical experiences in equine, bovine, or large animal reproductive status/disorders. Students select species. prereq: DVM or instr consent

**CVM 6704. Reproductive Diseases of Cattle.** (2 cr. [max 6 cr.]; A-F or A/audit; Every Fall) Common diseases affecting reproductive function in cattle, swine, and small ruminants. prereq: 3rd yr DVM or instr consent

**CVM 6711. Large Animal Medicine (LAM).** (2 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer) Medical diseases of horses, cattle, small ruminants, South American camels, and potbellied pigs. History taking, clinical diagnosis, patient management. Assessment of treatment responses. Clinic case material, opportunities to practice common procedures. Small group discussions on clinical diagnosis, treatment, and prevention of common medical disorders. prereq: DVM 3rd or 4th yr or instr consent

**CVM 6712. Equine Ambulatory Rotation.** (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Equine ambulatory rotation meeting for two weeks performing farm calls, call backs, x-ray development, and restocking the van. Student and practitioner discuss cases as calls are being made.

**CVM 6715. Large Animal Surgery and Lameness.** (2 cr. [max 10 cr.]; Student Option; Every Fall, Spring & Summer) General surgery, lameness cases. Emphasizes horses. Some cattle, small ruminants/camels. Diagnostic/therapeutic management in hospital setting. Cases, rounds, exercises. Students work as part of surgical management or advanced diagnostic/therapeutic techniques available in a referral setting. prereq: 3rd or 4th yr DVM student or instr consent

**CVM 6720. Problem Solving in Equine Medicine.** (2 cr.; A-F or Audit; Every Spring) Evidence-based medicine and clinical epidemiology concepts are integrated into discussion of cases. Assignments include reading of journal articles, working through case scenarios on Web CT, and answering case-based questions. prereq: DVM 3rd yr or instr consent

**CVM 6721. Large Animal Neonatology.** (1 cr. [max 2 cr.]; S-N or Audit; Every Fall) Instruction, emergency duty, practical application of principles in evaluating/treating sick equine neonates. Seasonal participation in clinically managing hospitalized foals/pennally reviewing past cases.

**CVM 6727. Equine Palpation.** (0.5 cr. [max 1 cr.]; S-N only; Every Fall) Hands-on clinical experience in evaluation of equine reproductive status and reproductive disorders. prereq: DVM or instr consent

**CVM 6728. Reproductive Diseases of the Horse.** (1 cr.; A-F or Audit; Every Fall) Reproduction patterns, breeding practices, management, artificial insemination, economics of reproductive performance, and infertility in horses. prereq: DVM 3rd yr or instr consent

**CVM 6732. Equine Dentistry and Preventative Medicine.** (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Two-week rotation on dental health care and general preventative health care for horses. Field trips, presentations, labs, case studies, clinical cases. prereq: 3rd or 4th yr DVM or instr consent; intended for equine track or mixed track students

**CVM 6733. Equine Dentistry and Nutrition.** (2 cr. [max 4 cr.]; A-F only; Every Fall & Spring) Equine dentistry and practical abilities for diagnosis/treatment of dental disorders. Equine nutrition and the practical application of common nutrition related health problems. Lectures, hands on activities, group work, and case correlates.

**CVM 6736. Equine Lameness and Podiatry.** (2 cr. [max 4 cr.]; A-F only; Every Fall, Spring & Summer) Rotation introduces diagnosis/treatment of equine lameness/hoof disorders. Clinical cases, presentations, case studies, labs. prereq: Intended for equine track or mixed track students

**CVM 6737. Equine Sports Medicine.** (2 cr.; S-N or Audit; Every Fall) Equine lameness and podiatry. Develop lameness and evaluation skills. Diagnostic principles for identifying lameness. Medical, surgical and rehabilitation therapies available to treat lameness. Didactic material, labs, and clinical cases. prereq: 6736

**CVM 6747. Equine Theriogenology.** (2 cr. [max 16 cr.]; Student Option; Every Fall, Spring & Summer) Techniques in equine reproduction. Handling of stallions and mares. Testing for estrus detection. Rectal palpation, ultrasound exam of reproductive tract. Breeding management, hormone treatments, vaginal examination, uterine culture, cytology and biopsy, semen collection and evaluation, intrauterine therapy, artificial insemination.

**CVM 6750. Equine Sports and Rehabilitation Medicine.** (2 cr. [max 4 cr.]; A-F only; Every Fall & Spring) Rotation on equine sports medicine, exercise physiology, and rehabilitation therapy. Common injuries, prevention/management protocols. Principles/practices of athletic conditioning, performance testing, and rehabilitation therapy. Field trips, presentations, labs, case studies, clinical cases. prereq: DVM 3rd or 4th yr or instr consent; intended for equine track or mixed track students

**CVM 6789. Fresh Dairy Doe and Newborn Goat Kid Management.** (2 cr. [max 4 cr.]; A-F only; Every Spring) Rotation at Poplar Hill Goat Dairy during fresh doe/goat kid season. How to recognize,
diagnose, and treat kid illnesses. Health strategies to control Johne's, caprine arthritis encephalitis virus, coccidiosis, neonatal diarrhea, mastitis, mastitis, parasitism, and nutritional deficiencies.

CVM 6792. Small Ruminant Health and Production Rotation (SmRu). (2 cr. [max 4 cr.]; Student Option; Every Fall, Spring & Summer)
Sheep, goat, llama, farmed-deer production, medicine, and health. Nutrition/health management, new stock, facility maintenance, husbandry, diagnosis, record keeping, zoonosis, necropsy. Reproductive management. Breeding soundness, body condition, vasectomy, ultrasound, castration, tail docking, disbudding, dehorning, vaccination, parasites, restraint/handling, venipuncture, foot trimming, tuberculin testing. Farm visits. prereq: DVM 3rd or 4th yr or instr consent

CVM 6794. Camelid Medicine, Surgery, Reproduction, and Health Management. (2 cr. [max 4 cr.]; A-F only; Every Spring)
Two-week rotation. Approximately 15 farm visits are made to alpaca/llama farms. Approximately 10 alpacas/llamas are evaluated at VMC. Hands-on learning environment. Physical exam, venipuncture, ultrasound. Field surgeries such as castration, dental work, foot trimming, venipuncture, body condition score, preventive herd health management, pharmaceuticals. Common medical/reproductive problems. Interstate health certificates. Tuberculosis testing and necropsy. prereq: 3rd or 4th yr DVM or instr consent

CVM 6796. Beef Production Systems Medicine: Feedlot A. (2 cr. [max 4 cr.]; A-F only; Every Fall & Summer)
Beef cattle feedlot production, medicine, health management. Production systems. Receiving protocols, economics. Livestock selection/evaluation, health management, facility evaluation. Pre-conditioning, pre-immunization, environmental pollution monitoring, transportation/vaccine protocols, nutrition, respiratory diseases, epidemics/disease. Evaluation of small/large feedlot operations. Body condition scoring, castration, dehorning/parasite control. Necropsy, field pathology sampling. Feedlot A rotation is located in Canada. Students are required to fund travel expense. prereq: DVM 3rd or 4th yr student or instr consent

CVM 6797. Beef Production Systems Medicine: Feedlot B. (2 cr. [max 4 cr.]; A-F only; Every Fall & Summer)
Beef cattle feedlot production, medicine, health management. Production systems. Receiving protocols, economics. Livestock selection/evaluation, health management, facility evaluation. Pre-conditioning, pre-immunization, environmental pollution monitoring, transportation/vaccine protocols, nutrition, respiratory diseases, epidemics/disease. Evaluation of small/large feedlot operations. Body condition scoring, castration, dehorning/parasite control. Necropsy, field pathology sampling. Feedlot B rotation is located in Nebraska. Students are required to fund travel expense. prereq: DVM 3rd or 4th yr student or instr consent

CVM 6798. Beef Production Systems Medicine: Feedlot C. (2 cr. [max 4 cr.]; A-F only; Every Fall & Summer)
Beef cattle feedlot production, medicine, health management. Production systems. Receiving protocols, economics. Livestock selection/evaluation, health management, facility evaluation. Pre-conditioning, pre-immunization, environmental pollution monitoring, transportation/vaccine protocols, nutrition, respiratory diseases, epidemics/disease. Evaluation of small/large feedlot operations. Body condition scoring, castration, dehorning/parasite control. Necropsy, field pathology sampling. Feedlot C rotation is located in Canada. Students are required to fund travel expense. prereq: DVM 3rd or 4th yr student or instr consent

CVM 6799. Beef Productions Medicine: Feedlot D. (2 cr. [max 4 cr.]; A-F only; Every Fall & Summer)
Beef cattle feedlot production, medicine, health management. Production systems. Receiving protocols, economics. Livestock selection/evaluation, health management, facility evaluation. Pre-conditioning, pre-immunization, environmental pollution monitoring, transportation/vaccine protocols, nutrition, respiratory diseases, epidemics/disease. Evaluation of small/large feedlot operations. Body condition scoring, castration, dehorning/parasite control. Necropsy, field pathology sampling. Feedlot D rotation is located in Nebraska. Students are required to fund travel expense. prereq: DVM 3rd or 4th yr student or instr consent

CVM 6800. Bovine Palpation. (1 cr.; S-N only; Every Fall)
Practice in diagnostic evaluation of bovine reproductive tract. prereq: DVM or instr consent

CVM 6801. Dairy Production Medicine. (2 cr.; A-F only; Every Spring)
Gives students the background necessary to promote animal welfare, prevent disease and assist clients in making decisions that enhance their farms productivity and financial well-being.

CVM 6802. Food Animal Disease and Diagnostics. (2 cr.; Student Option; Every Spring)
Two-week rotation. Food animal necropsies, diagnostic assays. prereq: 3rd or 4th yr DVM student or instr consent

CVM 6807. Food Animal Surgery & Anesthesia. (2 cr.; A-F only; Every Fall & Spring)
This course is designed to provide intensive training in ruminant surgery to senior students. The course is unusual in format from most veterinary curriculum offerings and provides an in-depth evaluation of food animal surgery principles as well as hands-on laboratory components to solidify understanding of the material.

CVM 6811. Overview of Bovine Theriogenology and Lameness (OBTL). (2 cr. [max 20 cr.]; A-F only; Every Fall, Spring & Summer)
This is a senior rotation that will focus on improving students' clinical skills in the examination of the bovine female. Students will participate during this rotation in routine veterinary (reproductive and lameness related) procedures provided by the instructors' dairies. Students will be taught topics related to diagnostics, treatment and management of reproductive and foot diseases of dairy cows, topics related to reproductive and lameness management of dairy herds, and on-farm data analysis related to reproductive and health performance. prereq: instr consent

CVM 6813. Miracle of Birth. (2 cr. [max 4 cr.]; A-F only; Every Fall & Summer)
Delivery of calves, lambs, and piglets at the Minnesota State Fair. Assist in public education about large animal veterinary medicine processes. Birthing and veterinary assistance of the birthing process. Media relations and interviews. Students work with large animal veterinarians, FFA students, and instructors in this rotation.

CVM 6817. Bovine Theriogenology & Lameness Advanced. (2 cr.; A-F only; Every Fall, Spring & Summer)
Rotation will build on bovine theriogenology and lameness overview and offer more advanced techniques for bovine-interested students.

CVM 6821. Dairy on Farm Clinical. (2 cr. [max 12 cr.]; A-F only; Every Fall, Spring & Summer)
Typical transition cow management, clinical veterinary care. Students assist in all aspects of day-to-day management of TMF. Fresh cow screening/therapies, calvings, routine animal management. Students live at TMF during rotation. prereq: 3rd or 4th yr DVM student or instr consent

CVM 6831. Overview of Dairy Production Medicine. (2 cr.; A-F only; Every Spring)
Gives students the background necessary to promote animal welfare, prevent disease and assist clients in making decisions that enhance their farms productivity and financial well-being.

CVM 6842. Swine Disease Diagnostics, Therapeutics, and Prevention. (2 cr.; max 4 cr.; Student Option; Every Fall & Spring)
Major diseases and high-health technologies. Field trips of high-/low-health farms, abattoir for slaughter check. Problem solving, discussion of on-farm disease cases. In-clinic diagnostic techniques. prereq: DVM 3rd or 4th yr or instr consent

CVM 6845. Swine Production Training (SPT). (2 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer)
Day-to-day management of modern swine farm. Students assist with all techniques, protocols, and practices encountered daily in swine unit, conduct any necessary necropsies or surgical techniques, investigate production/health problems. On final day of rotation, students lead herd visit, summarize findings with producer and course coordinator, and write a herd report. prereq: 3rd or 4th yr DVM or instr consent

CVM 6854. Introduction to Swine Health and Production. (2 cr. [max 12 cr.]; Student Option; Every Summer)
CVM 6856. Advanced Swine Health and Production. (2 cr. [max 12 cr.]; Student Option; Every Summer) Capstone course. Complex field problems. Students follow selected swine disease investigations, from farm through diagnostic lab and back, determine impact of specific swine diseases on productivity and cost of production, design a control program, and collect/submit quality samples to diagnostic lab. prereq: DVM 3rd or 4th yr or instr consent

CVM 6865. Introduction to Swine Production Medicine. (1 cr. [max 2 cr.]; A-F only; Every Spring) Contemporary approaches to swine practice. Swine production, disease diagnosis, control, treatment, eradication, prevention. prereq: DVM student or instr consent

CVM 6883. Raptor. (2 cr. [max 4 cr.]; Student Option; Every Fall, Spring & Summer) Students participate in all aspects of raptor medicine, surgery, and rehabilitation and gain avian experience. Conservation medicine. prereq: 6497, DVM 3rd or 4th yr or instr consent

CVM 6884. Poultry Medicine Clerkship (PMC). (2 cr. [max 8 cr.]; A-F only; Periodic Fall, Spring & Summer) Broiler, layer, and turkey industries, performance analysis, disease diagnosis, management techniques for prevention/ control of disease, food safety problems and diagnostic pathology in a laboratory setting. Classroom presentations, discussions, on-farm evaluations.

CVM 6900. Microscopic Anatomy I. (2 cr.; A-F only; Every Fall) Identification, description, and understanding of basic structure and elements of cells and basic tissues. Identify and describe structure and organization of organ systems presented.

CVM 6902. Veterinary Biochemistry, Nutrition & Genetics. (3 cr.; A-F only; Every Fall) Principles of biochemistry, genetics, nutrition. Background information/how it is used to understand animal health/disease. Examples reinforced with in-class/out-of-class problems.

CVM 6903. Anatomy I. (4 cr.; A-F only; Every Fall) Sequential integration of normal gross/radiographic anatomy of carnivore. Knowledge gained provides solid foundation for current/subsequent courses within veterinary professional curriculum.

CVM 6904. Clinical Skills I. (1 cr. [max 2 cr.]; S-N only; Every Fall) Introduction to small/large animal species. Fundamental clinical skills for small/large animal species. Proper physical exam, safe handling/restraint, behavior/animal safety, frequently used clinical skill procedures. Large animal practicum. prereq: 1st year clinical skills course

CVM 6906. Critical Scientific Reading. (1 cr. [max 2 cr.]; S-N only; Every Fall) Skill development in reading of scientific literature. Papers critiqued for experimental design, statistical analysis, validity of results, contributions to literature, merit of study conclusions. Major aim of the course is to prepare veterinary students to think scientifically, for multiple career pathways, and an increasingly important role for veterinarians in comparative medicine.

CVM 6907. Professional Development II. (1.5 cr.; S-N only; Every Spring) Develop knowledge/skills needed to be successful veterinarian in areas such as communication, ethics, clinical decision-making, medical record keeping. Lecture, hands-on experiences, small group/mentor group discussions. The course will provide an overview of One-Health, animal welfare, legislative/current issues, and field trips to visit animal production facilities.

CVM 6908. Anatomy II. (3 cr. [max 5 cr.]; A-F only; Every Spring) Sequential integration of normal gross/radiographic anatomy of ungulates. Knowledge gained will provide solid foundation for current/subsequent courses within veterinary professional curriculum.

CVM 6909. Clinical Skills II. (1 cr.; S-N only; Every Spring) Domestic animal behavior. Basic small animal handling/management skills. Introduction to hospital. Small-animal clerk duty is required.

CVM 6910. Physiology II. (5 cr.; A-F only; Every Spring) Anatomic strategies adopted by different animal species to achieve same/similar function. Important physiologic processes used by animals to maintain homeostasis. Neural, endocrine, paracrine regulation of organ systems. Intermediary metabolism.

CVM 6911. Immunology. (2 cr.; A-F only; Every Fall) This course is structured as an introductory and multidisciplinary unit consisting of a series of lectures to provide a basic understanding of the cells, molecules, and mechanisms of immunology against microbial pathogens and neoplasia, as well as immune-mediated pathologies such as allergies and autoimmunity.

CVM 6912. Basic Pathology. (2 cr.; A-F only; Every Spring) Mechanisms in reactions of cells/tissues to injury. Retrorgressive changes in cells, cell death, pigments, circulatory disturbances, inflammation, alterations of cell growth (including neoplasia). Applications to evaluation of gross/microscopic tissue alterations.

CVM 6914. Preventive Medicine. (4 cr.; A-F only; Every Fall & Spring) Concepts of preventive medicine. Information reinforced in other coursework. Short video lectures/notes on website for access throughout training.

CVM 6915. Clinical Pathology I. (2 cr.; A-F only; Every Fall) Normal/abnormal function of hematopoietic system. Pathophysiologic changes underlying serum biochemical abnormalities. Principles/clinical application of cytology as diagnostic tool. How clinical laboratory data is generated/interpreted.

CVM 6917. Agents of Disease II. (5 cr.; A-F only; Every Fall) This course is the second part of the Agents of Disease series dealing with diseases caused by infectious agents. This course extends the foundational information obtained on viruses, bacteria and parasites in Agents of Disease I, into understanding diseases caused by these agents in species of veterinary importance. In this course we will continue to integrate concepts on pathogenesis, life cycle, host response, diagnostic tests, and transmission of agents of diseases into developing solutions for diagnosis, prevention and control of infectious diseases in animals.
CVM 6918. Pharmacology I. (2 cr.; A-F only; Every Fall)
Principles of drug action, disposition, and clinical applications in animal patients. Provide a solid base of general knowledge of pharmacology that will be important for later coursework in veterinary medicine and future successful veterinary practice. Students completing this course should have developed an understanding of how drugs from several medicinal classes are processed by animals and how these drugs exert their beneficial and adverse effects in animals.

CVM 6919. Systemic Pathology. (5 cr. [max 10 cr.]; A-F only; Every Fall)
Basic mechanisms of disease in various organ systems. Organ response to injury. Describe or interpret lesions in order to formulate morphological diagnoses/differential diagnoses (etiology). Correlate clinical/laboratory findings with clinical signs or lesions that might occur.

CVM 6920. Clinical Pathology I. (2.5 cr.; A-F only; Every Fall)
Understand/explain normal/abnormal function of hematopoietic system. Principles/clinical application of cytology as diagnostic tool. How clinical laboratory data is generated/interpreted.

CVM 6921. Clinical Skills III. (2 cr.; S-N only; Every Fall)
Builds on a clinical application of first year clinical skills. Include 2-3 clinical skills labs throughout year. Hands on practical experience with live animals. Other options include VMC mini rotations, Humane Society visits, SIRVS, RAVS, Gelding Project, VIDA, VetTouch other student specific proposals.

CVM 6922. Clinical Epidemiology. (1.5 cr. [max 2 cr.]; A-F only; Every Fall)
This course introduces the concepts, principles, and applications of veterinary epidemiology. Veterinary epidemiology is the foundation of health management of animal populations, be they companion animals, livestock, or wild populations. Clinical epidemiology provides the basis for medical decision-making in clinical practice.

CVM 6923. Public Health and Community Practice. (2 cr.; A-F only; Every Fall)
Mixture of didactic classroom lectures/in-class discussions/case presentations to provide overview of common zoonotic agents/other veterinary public health issues. Emphasis on case-based public health situations.

CVM 6924. Small Animal Medicine I. (2 cr.; A-F only; Every Fall)
Pathophysiology, clinical presentation, diagnostic approach, therapeutic options, management protocol of common/important hematologic, immunologic, infectious diseases of dogs/cats.

CVM 6925. Diagnostic Laboratory. (2 cr.; A-F only; Every Fall)
Laboratory experiences designed to help veterinary students practice common clinical tests, understand principles of various types of tests, gain better appreciation of test selection/interpretation. Urinalysis, hematology, serology, detection of parasitic/microbial agents of disease. This course represents an effort to collect the relevant clinical laboratory information needed by the practicing veterinarian.

CVM 6926. Small Animal Medicine II. (5 cr.; A-F only; Every Spring)
Pathophysiology, clinical presentation, diagnostic approach, therapeutic options and management protocols, and prognosis of urinary tract, gastrointestinal, dental and endocrine diseases of dogs and cats.

CVM 6927. Small Animal Surgery I. (3 cr.; A-F only; Every Spring)
Provide students with the basic knowledge and skills needed to evaluate and treat common small animal surgical diseases. Provide students with background knowledge, problem-solving, and technical skills that will be the basis for clinical rotations and initial years in practice.

CVM 6928. Large Animal Medicine I. (2 cr. [max 4 cr.]; A-F only; Every Fall)
This course will address the core medical problems of swine; multisystemic infectious diseases of horses and ruminants; and common medical disorders affecting the hematologic, immunologic, urinary, and gastrointestinal systems of horses, ruminants, and camelids. It will provide part of the large animal clinical content needed to pass the National Board Examination, as well as foundation knowledge for subsequent large animal elective courses.

CVM 6929. Large Animal Surgery I. (3 cr.; A-F only; Every Spring)
This class addresses common surgical conditions in large animal species (equine, bovine, camelid and small ruminants) related to wounds, gastrointestinal disorders and musculoskeletal disorders.

CVM 6931. Diseases of Zoo Animals and Exotic Pets. (1 cr.; S-N or Audit; Periodic Fall)
Diseases of and management procedures for zoo animals and exotic pets. Restraint procedures, medication, diagnosis. prereq: DVM or grad or instr consent

CVM 6932. Introduction to Non-Domestic Veterinary Medicine. (1 cr.; S-N only; Every Fall)
Professions, including zoo, rehabilitation, wildlife, and conservation medicine. Job activities/availability, preparation to obtain a position. Restraint, evaluation, treatment and management of non-domestic species. prereq: 1st yr DVM or instr consent

CVM 6933. Zoological Medicine (MNZM). (2 cr. [max 20 cr.]; Student Option; Every Fall, Spring & Summer)
Introduction to all aspects of health care of zoo animals. Housing, nutrition, preventative health programs. Students assist zoo veterinarians with immobilizations, examinations, necropsies, laboratory work, records keeping. prereq: DVM 3rd or 4th yr or instr consent

CVM 6934. Selected Topics in Zoo Animal Medicine. (2 cr. [max 10 cr.]; A-F only; Periodic Fall & Spring)
Year-long course. Expertise needed by a zoo veterinarian, applications to specific captive species. Manage an animal problem or animal group problem, develop diagnostic/management/therapeutic recommendations, research three topics on an assigned species, build reference materials for case care, present findings to keepers at a selected zoo, develop an item for public education. prereq: [DVM 1st or 2nd yr] or instr consent

CVM 6935. Veterinary Imaging I. (4 cr.; A-F only; Every Spring)
Introduction to radiographic imaging, foundational principles, imaging modalities, and musculoskeletal, general abdomen and alimentary tract systems. Interpretation of radiographic studies and clinical applications germane to common animal diseases. Lectures and exercises using a body systems approach to imaging of large/small animals.

CVM 6936. Microscopic Anatomy II. (2 cr.; A-F only; Every Spring)
Identification, description, and understanding of basic structure and elements of cells and basic tissues. Identify and describe structure and organization of organ systems presented.

CVM 6937. Pharmacology II. (2 cr.; A-F only; Every Spring)
This course covers principles and clinical practices of veterinary toxicology. Mechanisms of action, pharmacokinetics and therapeutic uses of drugs affecting various systems and organs. Basic pharmacodynamics and pharmacokinetic aspects of anti-bacterial, anti-fungal, anthelminthic and anti-neoplastic drugs, including drug mechanim and spectrum of action, side effects and toxicity, and modes of drug resistance that diminish clinical efficacy.

CVM 6938. Professional Development II. (1 cr. [max 2 cr.]; S-N only; Every Fall)
Integrates subjects in veterinary professional curriculum. Introduction to/practice of professional skills. Communication, ethics, teamwork, leadership. As a result of taking this course, students will be able to define medical professionalism, understand the concepts, organization, and hierarchy of problem oriented thinking by demonstrating problem definition and problem refinement. Students will identify, list and utilize resources available for answering clinical questions. Students will utilize clinical skills (history and physical exam) to assess individual or populations of animals in order to develop diagnostic and therapeutic plans. Students will effectively communicate problem oriented approach to colleagues in oral and written format. Students will effectively communicate the medical plan, treatment options, prognosis and cost of recommendations to owner.

CVM 6939. Non-Traditional Pet Care. (1 cr.; S-N only; Every Spring)
Introduction to the care and handling of a variety of small animals including reptiles, amphibians, rodents, rabbits and ferrets, seen by veterinarians in primary care practice. This course provides an overview of gross and radiographic anatomy, major infectious diseases and their management, and normal behavior in domestic environments.
CVM 6941. Clinical Skills IV. (2 cr.; S-N only; Every Spring)
Builds on clinical application of first/2nd year fall clinical skills. Includes clinical skills labs throughout year. Hands on practical experience with live animals. Other options include VMC mini rotations, Humane Society visits, SIRVS, RAVS, Gelding Project, VIDA, VetTouch other student specific proposals.

CVM 6942. Veterinary Clinical Pathology II. (3 cr.; A-F only; Every Spring)
Required readings, didactic classroom lectures, on-line tutorials, group discussions, homework to cover veterinary clinical pathology. Integration of all clinical pathology data available for patient with opportunity for students to distinguish diseases with similar clinical or clinic-pathologic findings.

CVM 6943. Avian Core. (2 cr.; A-F only; Every Spring)
This course will present information on birds. Successful completion will provide a firm foundation for more advanced avian studies such as companion bird medicine, poultry health, raptor rehabilitation and avian surgery. Through a blend of didactic lectures, hands-on laboratories, and student-driven inquiry, topics of ornithology, behavior, anatomy, physiology, production management, diseases and basic clinical procedures will be presented. Fundamentals of flock management and nutrition will be covered along with principles of biosecurity and recognition of diseases will be addressed.

CVM 6944. Small Animal Surgery II & Anesthesia. (3 cr.; A-F only; Every Fall)
This course will introduce the principles of small animal anesthesia, critical care, and will continue the principles of surgery from Surgery I (CVM 6927). The course will consist of lectures laboratories, and a case discussion session.

CVM 6945. Large Animal Medicine II. (3 cr.; A-F only; Every Fall)
Course addresses common medical disorders of the large animal neurological, muscular, cardiovascular, and respiratory systems, as well as core medical problems of swine. It will provide part of the large animal clinical content needed to pass the National Board Examination, as well as foundation knowledge for subsequent large animal elective courses.

CVM 6946. Large Animal Surgery II. (1.5 cr.; A-F only; Every Fall)
Course concentrates on the principles of anesthesia, identifying surgical conditions of the cardiopulmonary and urogenital systems, common urogenital surgeries and miscellaneous conditions of the head and tail. Species discussed include horses, cattle, small ruminants and pot-bellied pigs.

CVM 6947. Veterinary Imaging II. (2 cr.; A-F only; Every Fall)
Imaging of the thorax, urogenital tract, and spine. Emphasis on interpretation of radiographic studies and clinical applications germane to common animal diseases. Lectures and active learning exercises using a body systems approach to imaging (primarily radiographic) of small and large animals.

CVM 6949. Comparative Theriogenology. (3 cr.; A-F only; Every Fall)
This course develops a broad clinical knowledge of common reproductive management strategies and clinical conditions associated with reproduction in the major domestic species. It provides information and strategies for the conduct of breeding soundness examination and infertility work-ups in the male; estrous cycle characteristics, diagnostics and control in females; breeding management strategies, pregnancy diagnosis and management of gestation; investigation and control strategies for pregnancy loss; management of parturition and treatment of dystocia; normal post-partum changes and diseases of the peri-partum period and the pathophysiology and treatment of uterine infections. Material is presented in both a comparative and species specific manner.

CVM 6952. Clinical Skills V. (1 cr.; S-N only; Every Fall)
This course aims to build on the clinical application of the first two years clinical skills coursework including further development of physical examination competence and frequently used clinical skill procedures. The course will incorporate a variety of opportunities to practice clinical skills including 1-2 clinical skills labs in the fall, small and large animal hospital practicum and outside veterinary hospital visits. Other experiences that can be chosen include Humane Society visits, SIRVS, RAVS, Gelding Project, VIDA, VetTouch and other student specific proposals.

CVM 6953. Professional Development IV. (2.5 cr.; S-N only; Every Fall)
This class will prepare students for practice from both a legal and logistical perspective (Practice Management) and provide you with opportunities to hone your communication skills and thereby equip you to build your future relationships with your clients.

CVM 6954. Small Animal Medicine III. (5 cr.; A-F only; Every Fall)
Pathophysiology, clinical presentation, diagnostic approach, therapeutic options and management protocols, and prognosis of cardiopulmonary, neurologic and neoplastic diseases of dogs and cats.

CVM 6956. Small Animal Selective I. (4 cr.; A-F only; Every Spring)
This course is intended to integrate clinical core knowledge for small animal primary care. Included in this course are the entry level competencies for small animal care in the areas of preventive care, anesthesia, emergency medicine, cardiology, surgery, nutrition, dermatology and dentistry. Students will develop the skills and knowledge to maintain health, identify and treat or manage common small animal conditions.

CVM 6957. Small Animal Selective II. (4 cr.; A-F only; Every Spring)
Explore advanced content related to small animal practice. Specialties covered in this course include nutrition, dentistry, cardiology, anesthesia, surgery, oncology, ultrasound, and emergency and critical care. Develop the skills and knowledge to treat a variety of small animal diseases and conditions. Practice advanced dental and surgical skills in a laboratory setting.

CVM 6958. Small Animal Problems. (2 cr.; A-F only; Every Spring)
This course uses a mixture of didactic classroom mini-lecture and group discussion and case-based homework to cover a variety of problems encountered in small animal medicine. Problems may be ones listed as presenting complaints by owners of dogs and cats, problems found on physical examination, or laboratory abnormalities encountered in case evaluation. Emphasis will be placed on selection of laboratory tests, interpretation of results, and using results to guide development of a diagnostic and treatment plan for patients. The course will emphasize integration of information introduced in core companion animal systems courses with clinical pathology.

CVM 6959. Orientation to Clinical Rotations. (2.5 cr.; S-N only; Every Spring)
Provides students with an overview and exposure to various topics, issues, and procedures that will be encountered during their senior rotations. The goal of the Orientation to Clinical Rotations course is to facilitate student transition into clinics. The course will include didactic lectures, group exercises, and open discussions. Topics that will be covered include: CVM and VMC policies and procedures, patient flow, SOAPs, discharges, admissions, ICU/wards, patient care, UVIS, client communications, infection control, safety, pharmacy, licensure, and rotation.

CVM 6960. Equine Selective I. (2.5 cr.; A-F only; Every Spring)
The primary objective of this elective is to provide the opportunity for third year students interested in equine practice to expand their knowledge and clinical skills beyond core levels achieved in the preceding curriculum. This course includes content and skills that are considered entry level requirements for students who plan to provide clinical care for horses at any level in their practice after graduation. It is the minimum required for students with an interest in care of horses in a mixed animal practice setting and serves as a foundation for further learning and skill development provided in the Equine Selective II, as well as for the equine rotations for senior students.

CVM 6961. Equine Selective II. (3 cr.; A-F only; Every Spring)
This elective is designed to provide further opportunity for third year students focused on equine practice to expand their knowledge and skills beyond core levels achieved in the preceding curriculum and Equine Selective I. Content has been chosen to prepare the student for equine work on the large animal rotations and equine or mixed animal practice. Students will study equine disorders, diagnostic testing, anesthesia, and surgical techniques in greater detail through a combination of lectures.
and labs, and will practice working through clinical cases in a problem-based format. By the end of the course, students will have improved their general knowledge of equine medicine and practice; recognize common medical disorders; select initial diagnostic tests; be able to perform neurologic and urinary tract examinations; be able to perform upper airway endoscopy; be able to perform transtracheal wash and bronchoalveolar lavage procedures; and explain therapeutic options for common disorders.

CVM 6962. Equine Problems. (2 cr.; A-F only; Every Spring)
This course is intended for third year students in the veterinary medicine curriculum. Each two-hour class period will include a review of evidence-based medicine concepts integrated into the discussion or one or more cases during the class period. This course is designed to:

1) Enhance student knowledge of diagnosis, pathophysiology and treatment equine diseases; 2) allow students to develop critical clinical thinking and problem solving skills; 3) to demonstrate the use evidence based medicine in solving clinical problems; 4) to give students the tools necessary to become lifelong learners and stay current with advances in veterinary medicine after completion of veterinary school. Students will have the opportunity to create differential diagnosis lists for several common equine presenting complaints, review pertinent literature, and work through several real life cases throughout the semester. By the end of the semester students will be comfortable with the process of case work-up and will be prepared to implement this process during their clinical year.

CVM 6963. Food and Fiber Selective I: Food and Fiber Practice. (4 cr.; A-F only; Every Spring)
Introduction to food animal practice at any level from mixed practice with backyard producers to dedicated species practitioners. Course will cover principles common to all food animal species. Students will gain exposure to common house and production systems, approaches to treatment and management of common diseases as well as field anesthesia and surgery.

CVM 6964. Food & Fiber Selective II: Production Medicine. (4 cr.; A-F only; Every Spring)
The course will provide a detailed understanding of general principles of swine and ruminant health and production, analytical skills applied to production records and economics, and therapeutic and preventative decision-making for prevalent clinical diseases and syndromes in US swine and ruminant herds.

CVM 6966. Applied Small Ruminant and Camelid Practice. (1 cr.; A-F only; Every Spring)
This course will build upon previously taught core material focusing on diagnosing, treating, and preventing common problems seen in routine veterinary practice with sheep, goats, and camelds. This course will be a prerequisite for 4th year Small Ruminant and Doe/Kid rotations (unless instructor permission is given).

CVM 6967. Food and Fiber Animal Problems. (2 cr.; A-F only; Every Spring)
This course uses a mixture of classroom group discussion and case-based assignments to cover a variety of problems encountered in food animal production medicine. Problems may be ones listed as presenting complaints by owners/ producers of food animals (e.g. cattle, swine, small ruminants) problems found on physical examination/herd visits, or abnormalities encountered in case/records evaluation. Emphasis will be placed on applying an epidemiological approach for herd investigations, including records analysis, selection of laboratory tests and interpretation of results. Following diagnosis, students will formulate a plan for treating individual affected animals and develop a preventative health management plan for the herd, as applicable. The course will emphasize integration of information introduced in core food animal systems courses with clinical pathology.

CVM 6968. Obstetrics Lab. (0.5 cr.; S-N only; Every Spring)
This is a practical laboratory in which students will have the opportunity to practice obstetric procedures, including a full fetotomy, that were described in lecture during the fall semester Comparative Theriogenology course. Students will be grouped and each group will have two labs occurring on consecutive days; one for correction of dystocia and the second concentrating on fetotomy technique. Within each group, students will work in pairs. The lab uses late term fetuses, obtained from the slaughterhouse, that are placed in dummy cows. While late term fetuses removed from the uterus have less disease risk than dead calves, students are required to wear protective clothing at all times; including gloves (O8 sleeves and latex), boots, and coveralls. Face shield will be provided if needed. Students MUST be careful with hygiene during and after the labs (e.g., avoid touching the mouth with dirty hands during the lab and WASH HANDS AFTER THE LAB).

CVM 6969. Large Animal Medicine III. (4.5 cr.; A-F only; Every Fall)
Course addresses common medical disorders of the large animal neurological, muscular, cardiovascular, and respiratory systems, as well as core medical problems of swine. It will provide part of the large animal clinical content needed to pass the National Board Examination, as well as foundation knowledge for subsequent large animal elective courses.

CVM 6970. Professional Development V. (1 cr.; S-N only; Every Spring)
Practice of professional skills: communication, ethics, teamwork, and leadership. Students will be able to define medical professionalism, understand the concepts, organization, and hierarchy of problem oriented thinking by demonstrating problem definition and problem refinement. Students will identify, list, and utilize resources available for answering clinical questions, and utilize clinical skills (history and physical exam) to assess individual or populations of animals in order to develop diagnostic and therapeutic plans. Students will effectively communicate a problem-oriented approach to colleagues in oral and written format, as well as a medical plan, treatment options, prognosis, and cost of recommendations to owner.

CVM 6971. Dermatology. (2 cr.; A-F only; Every Spring)
Case-base discussion of common dermatological conditions that affect dogs and cats. Students work on clinical cases outside classroom. Cases are discussed in classroom.

CVM 6972. Ophthalmology. (1.5 cr.; A-F only; Every Fall)
Common procedures for evaluation, diagnosis, and treatment of eye disorders in domestic species.

CVM 6973. Behavior. (1 cr.; S-N only; Every Spring)
Introduction to abnormal and undesired animal behavior, diagnostic procedures, and behavioral and pharmacological modifications.

CVM 6974. Veterinary Toxicology. (2 cr.; A-F only; Every Fall)
Mechanisms by which common toxicants encountered in residential, natural, and agricultural or industrial settings exert their deleterious effects in animals. Approaches to treating common toxicoses arising from toxicant exposure.

CVM 6975. Mixed Animal Problems. (2 cr.; A-F only; Every Spring)
This course uses a mixture of didactic classroom mini-lecture and group discussion and case-based homework to cover a variety of problems encountered in small and large animal medicine and laboratory animal medicine.

CVM 6976. Small Ruminant Practice Elective. (1 cr. [max 2 cr.]; A-F only; Every Spring)
This course will build upon previously taught core FA material focusing on diagnosing, treating, and preventing common problems seen in routine veterinary practice with sheep and goats. This course will be a prerequisite for 4th year Small Ruminant and Doe/Kid rotations (unless instructor permission is given).

CVM 6977. Advanced Dairy Production Medicine I. (2 cr.; A-F only; Every Spring & Summer)
This rotation will give students the background necessary to provide production medicine related services. The concepts introduced in ODPM will used as a basis to explore topics further. This will allow participants to assist clients in making decisions that enhance their farms productivity, promote animal and financial well-being.

CVM 6978. Advanced Dairy Production Medicine II. (2 cr.; A-F only; Every Spring & Summer)
This rotation will give students the background necessary to provide production medicine related services. The concepts introduced in ODPM will used as a basis to explore topics further. This will allow participants to assist clients in making decisions that enhance their farms productivity, promote animal and financial well-being.
Further. This will allow participants to assist clients in making decisions that enhance their farms productivity, promote animal and financial well-being.

**CVM 6981. Clinical Correlations I.** (1 cr.; S-N only; Every Spring)

This course design follows principles of research in learning; prepares students for clinical work as well and what will be expected of them in senior year and, for most, in their career; and prepares students for life-long learning by requiring them to find resources.

**CVM 6982. Clinical Correlations II.** (1 cr.; S-N only; Every Spring)

This course design follows principles of research in learning; prepares students for clinical work as well and what will be expected of them in senior year and, for most, in their career; and prepares students for life-long learning by requiring them to find resources.

**CVM 6983. Study Strategies for Success.** (1 cr.; S-N only; Every Fall & Spring)

This elective course will provide students with information about how learning works and with training in the skills of metacognition to best permit them to develop successful study strategies. Specific skills addressed will include those for study preparation (time management, creating a study space, the role of external factors such as distractions, exercise, and sleep), reading to ensure understanding, review of writing skills, taking notes from readings and in lecture, active review to enhance retention, and test-taking strategies. The course will conclude with information about problem-solving and specific strategies for learning in a clinical environment.

**CVM 6984. Introduction to Laboratory Animal Medicine.** (1 cr.; A-F only; Every Spring)

Understand varying ethical perspectives on the use of animals as research subjects and identify the role and mechanism of regulatory oversight of animal research. Learn basic concepts related to care and husbandry of laboratory animal species and understand the unique anatomic, behavioral, and physiological aspects of common laboratory animal species and identify common clinical diseases of laboratory animals, including pathogenesis, diagnosis, and treatment.

**CVM 6985. PhD Project.** (2 cr. [max 12 cr.]; S-N only; Every Fall, Spring & Summer)

Preparation and research for PhD dissertation

**CVM 6986. MS Project.** (2 cr. [max 12 cr.]; S-N only; Every Fall, Spring & Summer)

Preparation and research for MS thesis

**CVM 6999. Directed Study for Out of Sync Student.** (0 cr.; No Grade Associated; Every Fall, Spring & Summer)

Directed study.

**Veterinary Medicine, Graduate (VMED)**

**VMED 5080. Problems in Veterinary Epidemiology and Public Health.** (1-3 cr.; A-F or Audit; Every Fall & Spring)

Individual study on problem of interest to epidemiology or public health student.

**VMED 5082. Diagnostic Epidemiology of Infectious Diseases.** (2 cr.; A-F only; Every Spring)

Theoretical principles, practical applications of diagnostic testing in populations. Examples related to infectious diseases in veterinary/human health. Basis of test performance, limitations, interpretations. prerequisite: Statistics course or instructor consent

**VMED 5090. Seminar: Veterinary Epidemiology.** (1 cr. [max 3 cr.]; S-N or Audit; Every Fall & Spring)

Each student leads at least one seminar. Reviews of current research, literature reviews, and technique development. Students and participating faculty participate in presentation, discussion, and administration of the seminars. prerequisite: Veterinary Medicine grad student

**VMED 5101. Molecular and Cellular Basis of Nanoparticle Toxicity.** (3 cr. [max 6 cr.]; A-F or Audit; Every Fall)

Use of nanotechnology in scientific research. Impact of nanomaterials on biological systems.

**VMED 5165. Surveillance of Foodborne Diseases and Food Safety Hazards.** (2 cr.; Student Option; Every Spring)

Principles/methods for surveillance of foodborne diseases. Investigation of outbreaks. Assessment of food safety hazards. Focuses on integration of epidemiologic/lab methods. prerequisite: [PHYS 5330, professional school or grad student)] or instructor consent

**VMED 5180. Ecology of Infectious Disease.** (3 cr.; Student Option; Every Fall)

How host, agent, environmental interactions influence transmission of infectious agents. Environmental dissemination, eradication/ control, evolution of virulence. Use of analytical/molecular tools.

**VMED 5181. Spatial Analysis in Infectious Disease Epidemiology.** (3 cr.; Student Option No Audit; Every Spring)

**VMED 5182. Molecular biology for the Public Health Professional.** (2 cr.; Student Option; Every Spring)

This course focuses on introducing students to molecular biology lab tools that are used to investigate infectious diseases in public health settings. The course combines laboratory sessions during which students will learn and run molecular assays with computer lab sessions during which students will analyze molecular data.

**VMED 5190. Seminar and Presentation Development.** (2 cr.; S-N only; Every Fall)

Skills needed to research, organize, develop, and deliver an oral scientific presentation or to assist in finding, compiling, and organizing information for presentations, theses, or papers suitable for publication. prerequisite: Grad student

**VMED 5193. Dairy Decision Making in a Financial Context for Veterinarians.** (3 cr.; A-F only; Every Fall)

Concepts/tools of economic analysis needed to support decision making on dairy farms, particularly as those decisions relate to health, disease impact, nutrition, general farm management. Prerequisite: Earned DVM, instructor consent.

**VMED 5210. Advanced Large Animal Physiology I.** (1-3 cr.; [max 6 cr.]; Student Option; Every Fall)

Review of large animal physiology at level needed for specialty board certification or beginning research. Students present topics in physiology and supplement reading with clinical case material or journal articles.

**VMED 5211. Advanced Large Animal Physiology II.** (1-3 cr.; A-F or Audit; Every Spring)

Large animal physiology for specialty board certification or beginning research. Students present topics in physiology and supplement reading with clinical case material or journal articles. prerequisite: instructor consent, 5210 recommended

**VMED 5232. Comparative Clinical Veterinary Dermatologic Pathology.** (1 cr. [max 2 cr.]; S-N only; Every Fall & Spring)

Microscopic pathology of basic dermatologic reactions and of variable disease states. prerequisite: DVM degree or foreign equiv

**VMED 5240. Advanced Small Animal Pathobiology I.** (1 cr.; A-F only; Fall Even Year)

Biology, physiology, pathophysiology, and medicine of disciplines relevant to companion animals. Pathogenesis/treatment of diseases. Developing hypotheses that can be translated into clinical research. Prerequisite: CVM grad student, [DVM or foreign equiv] degree.

**VMED 5241. Advanced Small Animal Pathobiology II.** (1 cr.; A-F only; Spring Even Year)

Overview of biology, physiology, pathophysiology, and medicine of disciplines. Underlying pathogenesis/treatment of diseases of companion animals. Developing hypotheses that could be translated into clinical research. Prerequisite: CVM grad student, [DVM or foreign equiv] degree.

**VMED 5242. Advanced Small Animal Pathobiology III.** (1 cr.; A-F only; Fall Odd Year)

Overview of biology, physiology, pathophysiology, and medicine. Underlying pathogenesis/treatment of diseases of companion animals. Developing hypotheses that could be translated into clinical research. Prerequisite: CVM grad student, [DVM or foreign equiv] degree.

**VMED 5243. Advanced Small Animal Pathobiology IV.** (1 cr.; A-F only; Spring Odd Year)

Overview of biology, physiology, pathophysiology, and medicine. Underlying
pathogenesis/treatment of diseases of companion animals. Developing hypotheses that could be translated into clinical research. Prereq CVM grad student, [DVM or foreign equiv] degree.

VMED 5295. Problems in Large Animal Clinical Medicine/Surgery and Theriogenology. (1 cr. [max 3 cr.]; A-F or Audit; Every Fall & Spring) Hospital cases using standardized format, audiovisual aids. Review literature pertaining to case. One or two cases presented by enrolled participants per month. prereq: VMED grad student, possess DVM

VMED 5310. Topics in Veterinary Clinical Pathology. (1 cr. [max 2 cr.]; S-N only; Every Fall & Spring) Modified rounds format. Cases from VMC used to explore cytology with associated chemistry/hematology data. Attendees clinicians can request lab topics for discussion. Past topics have included lab measurement of chemical analytes, test sensitivity or specificity (e.g., ethylene glycol test, FELV test), lab testing for infectious agents. prereq: Grad student in CVM

VMED 5319. Veterinary Gross Pathology. (1 cr. [max 3 cr.]; S-N only; Every Fall & Spring) Diagnostic gross lesions of tissues. Evaluating images from wide variety of animals submitted to lab. Mock cases use presentations, reviews on wide variety of diseases in domestic/non-domestic animals. Students present microscopic slide cases and prepare discussions about disease entities, differential diagnoses, and ancillary tests. prereq: Grad student in VMED or [CVM, [DVM degree or foreign equiv]] or instr consent

VMED 5320. Advanced Veterinary Systemic Pathology I. (3 cr.; A-F only; Fall Even Year) Students review/summarize topics in systemic pathology using veterinary pathology textbooks and relevant updates from pathology and veterinary medical journals. Diagnostic cases in alimentary, respiratory, urinary, cardiovascular, and hematopoietic system pathology. Students give 10-15 presentations with handouts for other students. prereq: Grad student in VMED or [CVM, [DVM degree or foreign equiv]] or instr consent

VMED 5330. Veterinary Descriptive Histopathology. (1 cr. [max 2 cr.]; Student Option; Every Fall & Spring) Weekly, one-hour microscopic slide presentations, reviews on wide variety of diseases in domestic/non-domestic animals. Students present microscopic slide cases and prepare discussions about disease entities, differential diagnoses, and ancillary tests. prereq: Grad student in VMED or [CVM, [DVM degree or foreign equiv]] or instr consent

VMED 5430. HIV/AIDS: Pathogenesis, Treatment, and Prevention. (1 cr.; Student Option; Every Fall) Exposure to pathogenesis, treatment, and prevention of HIV/AIDS from clinical faculty who are dealing with AIDS patients. Developing new questions and designing experiments that have greatest chance of translating to clinical setting. prereq: Grad student

VMED 5440. Using Risk Analysis Tools: Estimating Food Safety Risks on the Farm to Table Continuum. (2 cr. [max 3 cr.]; A-F only; Every Fall & Spring) This applications-based course will provide the necessary risk-based tools to evaluate and mitigate the microbial and chemical risks in a food production chain-from the farm until consumption. Students will follow the risk analysis process as an integral part of science-based decision-making to estimate and manage food safety risks. Students will apply different qualitative and quantitative tools by using a computer.

VMED 5442. Quantitative Methods for Population Health. (3 cr. [max 6 cr.]; Student Option No Audit; Every Spring) This course reviews the principles and application of advanced methods for analysis of population health data, with a focus on animal health and infectious diseases. Analytical techniques that will be taught and applied during the course include risk assessment, spatial analysis, disease modeling, and disease economics. prereq: basic statistics (PYHB4650 or equivalent) and basic epidemiology (VM6922 or PYHB341 or equivalent) or instructor approval

VMED 5492. Seminar: One Health and Infectious Diseases of Wildlife. (2 cr.; S-N only; Every Fall) The course will explore the applied concept of One Health and infectious diseases of wildlife in weekly case studies. In each case study, students will gain an understanding of system dynamics, infer the interplay between humans, animals and the environment in the context of a given wildlife disease, and confront current disease management practices and challenges for successfully mediating transmission and spread.

VMED 5496. Training in Swine Production and Management. (4 cr.; S-N only; Every Fall & Spring) Production module introduces techniques/protocols for swine production system operation. Research module covers applied research trials for viral/bacterial pathogens in pigs. prereq: VMED grad student or instr consent

VMED 5594. Research in Veterinary Medicine. (1-4 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer) Independent study as determined by instructor. Usual activity includes conducting research in instructor's lab, though research in field may also be included. prereq: Jr, instr consent

VMED 5599. Research in Veterinary Medicine. (1-4 cr. [max 8 cr.]; Student Option; Every Fall, Spring & Summer) Independent study as determined by instructor. Usual activity includes conducting research in instructor's lab, though research in field may also be included. prereq: Jr, instr consent

VMED 5621. Principles of Veterinary Anesthesiology. (2 cr.; A-F only; Every Spring) In-depth training in principles of veterinary anesthesia. Lectures, anesthesia labs, presentations by students. prereq: VMED grad student, [DVM degree or foreign equiv], instr consent

VMED 5670. Bovine Surgery Practicum. (2 cr.; S-N only; Every Fall & Spring) Intensive training in ruminant surgery. Evaluation of food animal surgery principles, hands-on laboratory components. prereq: [VMED grad student, [DVM or equiv foreign degree]] or instr consent

VMED 5895. Veterinary Public Health Integrated Learning Experience. (1-3 cr.; S-N only; Every Fall, Spring & Summer) Part of the curriculum for the master's degree includes an opportunity for students to develop a written document detailing applications of public health practice. Completion of the ILE allows students to synthesize aspects of public health into a document that can be utilized by public health professionals.

VMED 5896. Veterinary Public Health Applied Practice Experience. (0.5-6 cr.; S-N only; Every Fall, Spring & Summer) The APEX, applied practice experience provides students an opportunity to learn first-hand about the organization, operations, and special activities of selected agencies, institutions and industries concerned with public health practice. This is a means of gaining additional insight into public health programs, personnel management, governmental relations, public relations, legislative support and, particularly, knowledge of special investigations or responses conducted by these organizations. Participation in the activities of public health practice programs internal to the University adds a dimension of experience to the curriculum that enriches the student's training and may be beneficial in seeking employment.

VMED 5910. Grant Writing: Winning Proposal? (2 cr.; Student Option; Every Spring) Components of a strong proposal. Grant submission process. What reviewers look for. How to locate grant announcements that match research interests.

VMED 5915. Essential Statistics for Life Sciences. (3 cr.; A-F or Audit; Every Fall) This course is a broad overview of the principles and methods of statistical analysis used in life sciences research, including biological, veterinary, and translational research, and provides the background a new researcher needs to understand and apply commonly used statistical methods and the preparation needed for more advanced coursework. Classes will include general instruction and background information, detailed examples of how to perform the analyses, with actual data sets, and discussion on how the topic has been applied in biological research, including reading and assessing papers in the field. Computing will be performed using the R software.
This course covers topics on the evaluation and assessment of the welfare of farmed animals. Literature review, discussions, and analyses are used to increase skills needed to evaluate methods for improving the welfare of farmed animals in various situations.

**VMED 8220. Advanced Nephrology/Urology Clinics.** (; 1-3 cr. ; Student Option; Every Fall & Spring)
Clinical investigation of naturally occurring urinary diseases in patients admitted to Veterinary Medical Center. prereq; instr consent

**VMED 8230. Medical Conference.** (; 1 cr. [max 2 cr.]; Student Option; Every Fall & Spring)
Participation in weekly conference about internal medical disorders. prereq; instr consent

**VMED 8250. Problems in Acid-base, Electrolyte, and Fluid Metabolism.** (; 2-4 cr.; A-F or Audit; Every Fall & Spring)
Clinical problems and physiology of acid-base, electrolyte, and fluid disorders of dogs and cats. prereq; instr consent

**VMED 8292. Journal Club: Large Animal Internal Medicine.** (; 1 cr. [max 3 cr.]; A-F or Audit; Periodic Fall & Spring)
Students/faculty keep abreast of current literature in large animal internal medicine. Students critically evaluate the literature. prereq; instr consent

**VMED 8293. Advanced Studies in Nephrology and Urology.** (; 1-3 cr.; A-F or Audit; Every Fall & Spring)
Studies of urinary tract disease with goal of generating new knowledge. prereq; instr consent

**VMED 8333. FTE: Master's.** (; 1 cr. [max 2 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Master's student, adviser and DGS consent

**VMED 8360. Evidence-based Medicine.** (2 cr.; A-F or Audit; Periodic Spring)
Concepts of evidence-based medicine with emphasis on veterinary clinical evidence will be presented. Clinical questions, development of study designs, identification of literature and assessment of the impact of the literature on clinical decisions. prereq; instr consent

**VMED 8392. Infectious Disease Journals: Critical Thinking.** (1 cr. [max 2 cr.]; A-F only; Every Fall & Spring)
A combination of literature review, group discussions and analyses are utilized to improve participants' capacity to critically evaluate scientific journal articles. Scientific research presentations will be led by students or faculty.

**VMED 8520. Advanced Immunology.** (; 2 cr.; Student Option; Every Spring)
Lectures and case presentations.

**VMED 8550. Veterinary Medicine Seminar.** (1 cr. [max 2 cr.]; S-N only; Every Fall & Spring)
Seminar. Exposure to research activities of CMB and VMED students and faculty. Students prepare/present a 20 minute seminar on their original research. prereq; Grad student

**VMED 8560. Research and Literature Reports in Veterinary Medicine.** (1 cr. [max 2 cr.]; S-N only; Every Fall & Spring)
A combination of literature review, group discussions and analyses are utilized to improve participants' capacity to critically evaluate scientific journal articles. Scientific research presentations will be led by students or faculty.

**VMED 8592. Infectious Disease Journals: Critical Thinking.** (1 cr. [max 2 cr.]; A-F only; Every Fall & Spring)
This course is intended to discuss published papers, experimental methods, approaches, diseases and animal health problems with the goal of promoting critical thinking. Students will be responsible for identifying, reviewing and sharing relevant material as well as leading discussion of their assigned class meeting.

**VMED 8593. Advanced Veterinary Virology and Serology.** (; 3 cr.; Student Option; Every Fall & Spring)
Discussion and laboratory practice.

**VMED 8682. Advanced Large Animal Surgery.** (; 2 cr. [max 6 cr.]; A-F or Audit; Every Fall & Spring)
Surgery of various systems in large animals, with preoperative and postoperative evaluation and management. prereq; DVM or equiv degree, instr consent

**VMED 8684. Surgical Physiology.** (; 1-3 cr.; Student Option; Periodic Fall & Spring)
Discussions on pathophysiology of surgical diseases in dogs and cats.

**VMED 8685. Neurosurgery.** (; 2-3 cr.; A-F or Audit; Every Fall & Spring)
Advanced neurosurgical diseases of small animals amenable to surgical treatment.

**VMED 8686. Thoracic and Cardiovascular Surgery.** (; 2-4 cr.; A-F or Audit; Every Fall & Spring)
Advanced thoracic and cardiovascular diseases of small animals amenable to surgical treatment.

**VMED 8693. Seminar: Large Animal Surgery.** (; 1 cr. [max 6 cr.]; A-F or Audit; Every Fall & Spring)
Discussion of current literature and surgery board preparation. prereq; DVM or equiv degree, instr consent

**VMED 8696. Research in Critical Care/Emergency Medicine.** (; 1-3 cr.; Student Option; Every Fall & Spring)
Special problems course. Controlled study; prospective and retrospective models of evaluation are defined, critiqued, and used for experimental design and data collection to
validate research methods. prereq: DVM or equiv degree

VMED 8777. Thesis Credits: Master’s. ( 1-18 cr. [max 50 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required [Plan A only]

VMED 8780. Advanced Avian Critical Care: Principles and Procedures. ( 2 cr.; A-F or Audit; Every Spring)
Procedures and protocols for managing avian medical emergencies such as starvation, toxicities, respiratory failure, and massive trauma. prereq: Course each in vet pathology, physiology, pharmacology, anatomy, small animal anesthesiology and critical care

VMED 8781. Seminar: Advanced Veterinary Anesthesiology. ( 1-3 cr.; A-F or Audit; Every Fall)
Active interaction around topics of advanced anesthesiology in veterinary species. prereq: [(CVM 6321, CVM 6322) or equiv], grad student

VMED 8788. Seminar: Veterinary Critical Care/Emergency Medicine. ( 1 cr.; A-F or Audit; Every Fall & Spring)
Current topics. prereq: DVM or equiv degree

VMED 8793. Seminar: Veterinary Anesthesiology. ( 1-2 cr. [max 4 cr.]; A-F or Audit; Every Fall & Spring)
Discussion and presentations for veterinary anesthesiology and surgery residents and graduate students. prereq: [CVM 6321 or equiv], DVM degree

VMED 8796. Avian Anesthesia and Orthopedic Surgery. ( 1-3 cr.; A-F or Audit; Every Fall & Spring)
Current methods for anesthetizing raptors, psittacine birds, and waterfowl. Lecture and lab on current methods for avian fracture bone fixation. prereq: courses in vet anesthesia, vet small animal orthopedics

VMED 8888. Thesis Credit: Doctoral. (1-12 cr. [max 100 cr.]; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

VMED 8910. Statistical Principles of Research Design. (3 cr.; A-F or Audit; Every Spring)
This course is a broad overview of the principles and techniques of research design and methods used in veterinary and translational research, and provides the background a new researcher needs to understand the literature and make good decisions about what is appropriate for their research, prereq: entry level graduate stats course or equivalent

Vienna Executive MBA (VMBA)

VMBA 5700. Managerial Accounting. ( 4 cr.; A-F or Audit; Every Spring)

VMBA 5701. Data Analysis and Decision Making. ( 4 cr.; A-F or Audit; Every Spring & Summer)
Exploratory data analysis, basic inferential procedures, statistical process control, regression analysis, decision models.

VMBA 5702. Financial Management. ( 4 cr.; A-F or Audit; Every Spring & Summer)
Theory/practice of finance from an analytical approach. Students apply concepts of risk, return, valuation to decisions that a corporate financial officer or person engaged in small business must make about sources/uses of funds during changing financial markets.

VMBA 5703. Marketing Management. ( 4 cr.; A-F or Audit; Every Spring & Summer)
Developing/implementing most appropriate combination of variables to carry out a firm’s strategy in its target markets. Analytic perspectives, concepts, decision tools of marketing for product offering decisions, distribution channel decisions, pricing decisions, communication program decisions.

VMBA 5704. Managing People and Organizations. ( 4 cr.; A-F or Audit; Every Spring)
Theories/frameworks for analyzing behavior of individuals, groups, organization itself. Emphasizes making decisions, developing action plans. Concepts/principles associated with function of human resource management (e.g., personnel selection, reward/compensation, collective bargaining).

VMBA 5705. Operations Management. ( 4 cr.; A-F or Audit; Every Fall)
Operations management function in different types of organizations. Emphasizes productive, innovative, competitive operations. Concepts/principles related to management of quality/innovation within service/manufacturing organizations.

VMBA 5706. Business, Government, and Macroeconomics. ( 4 cr.; A-F or Audit; Every Fall)
Roles of government/business in society. Alternative systems of economics, political values. Social, political, economic, cultural conflicts affecting business sector.

VMBA 5707. Economics in Transition. (4 cr.; A-F or Audit; Every Fall)
Technological, political, and ethical forces that are shaping the competitive environment. Theoretical considerations. Business responses to specific issues. Projects/cases for companies in East Central Europe.

VMBA 5709. Info Tech Mgmt. (4 cr. [max 16 cr.]; A-F or Audit; Every Spring)
Various information technologies, their applications. Competitive advantages associated with information technology, organizational/managerial implications.

VMBA 5710. Advanced Financial Management for Global Markets. ( 4 cr.; A-F or Audit; Every Spring)
Advanced financial concepts for corporate financial decisions at executive level. Investment, firm financing, global markets.

VMBA 5711. Managing Globalization (Guangzhou). (4 cr.; A-F or Audit; Every Spring & Summer)

VMBA 5712. Strategies for a Global Company: an Integrative Perspective. (6 cr. [max 36 cr.]; A-F or Audit; Every Spring)
Multi-disciplinary perspectives from strategic marketing, corporate strategy, operations management. Involvement of faculty/corporate executives. Site visits to global companies, student projects. Capstone course.

VMBA 5713. Negotiations and Conflict Management. ( 4 cr.; A-F only; Every Spring)
Typical challenges faced when negotiating. Strategies for managing challenges and improving skills as a negotiator and conflict manager.

VMBA 5714. Financial Accounting. ( 4 cr.; A-F or Audit; Every Spring)

VMBA 5715. Corporate and Entrepreneurial Strategy. (4 cr.; A-F or Audit; Every Fall & Spring)
The objective of the course is to help develop analytic skills in the identification of key issues and in the formulation of appropriate strategies for firms, both established and entrepreneurial, facing complex business situations. We also examine the process through which strategic decisions are made and implemented and discuss how strategy is different in the age of the internet.

Warsaw Executive MBA (WMBA)

WMBA 5658. Financial Management. ( 4.5 cr.; A-F or Audit; Periodic Fall)

WMBA 5662. Macroeconomic Business Environment. ( 3 cr.; A-F or Audit; Every Spring)
Students apply methods of decision-making and of business/public policy analysis, in various real situations drawn from experience of developed market economies.
WRIT 5001. Introduction to Graduate Studies in Scientific and Technical Communication. (3 cr.; A-F only; Every Fall) History of technical communication. Different audiences, purposes, genres, and emerging trends. International/intercultural issues. Students participate within a community of technical communication professionals. prereq: Grad student or instr consent

WRIT 5051. Graduate Research Writing for International Students. (3 cr.; Student Option; Every Fall, Spring & Summer) Graduate-level writing techniques/formats for summaries, critiques, research, and abstracts. Persuasion, documentation, structure, grammar, vocabulary, field-specific requirements. Writing through several drafts, using mentor in specific field of study. Revising/editing to meet graduate standards. Discussions. prereq: Grad student

WRIT 5052. Graduate Research Presentations and Conference Writing for Non-Native Speakers of English. (3 cr.; Student Option; Every Fall & Spring) Practice in writing/presenting graduate-level research for conferences or professional seminars. Delivery of professional academic presentations to U.S. audiences. Conference abstract, paper, and poster presentation. Communication in research process. Students select topics from their own research/studies. Format, style, transitions, topic narrowing, non-verbal presentation skills. prereq: [Grad student, non-native speaker of English] or instr consent

WRIT 5112. Information Design: Theory and Practice. (3 cr.; A-F or Audit; Periodic Spring) This course examines how verbal, visual, data, and other forms of content can be designed and combined to create meaning, improve comprehension, and make information more usable. In particular, we will study the rhetorical roles visual elements play in print and digital communications, and how we as technical communicators can use visual means to reach audiences, convey information, and achieve rhetorical goals. We will read and discuss theory, practice, information design skills, and apply both to real communications projects suitable for inclusion in a professional portfolio. prereq: Grad student or instr consent

WRIT 5196. Internship in Scientific and Technical Communication. (3-6 cr.; S-N or Audit; Every Fall, Spring & Summer) Internship sites may include the University, industry, or government agencies. An internship proposal, progress report, internship journal (optional), and final report with a letter from the internship supervisor are required.

WRIT 5270. Special Topics. (WI; 3 cr. [max 9 cr.]; Student Option; Periodic Fall & Spring) Topics specified in Class Schedule.

WRIT 5291. Independent Study, Reading, and Research. (1-3 cr.; Student Option; Every Fall, Spring & Summer) Supervised reading/research on advanced projects not covered in regularly scheduled offerings. prereq: instr consent, dept consent

WRIT 5531. Introduction to Writing Theory and Pedagogy. (3 cr.; A-F or Audit; Every Fall) Pedagogical philosophy/methodology in composition, primarily first-year writing. Theories underlying teaching/tutoring with technology. prereq: Grad student

WRIT 5532. Writing Pedagogy Practicum. (1 cr. [max 3 cr.; S-N only; Every Spring]) Discussion/activities that support development of sound pedagogical practices. Practical details of classroom. Professionalization, theory/research. prereq: Grad student

WRIT 5561. Editing and Style for Technical Communicators. (3 cr.; A-F; Every Spring & Summer) Proofreading, copy-editing, comprehensive editing. Students primarily use electronic editing methods. Editor's responsibilities, relationship to writers, roles within an organization, style guides, ethical choices. Editing in global setting. Editing/style for visual design and online documents. prereq: [Grad student, knowledge of grammar/punctuation rules] or instr consent

WRIT 5570. Minnesota Writing Project Directed Studies. (1-3 cr. [max 9 cr.]; A-F or Audit; Every Summer) Guided individual research into current theories/practices of writing and writing pedagogy.
WRIT 5671. Visual Rhetoric. (3 cr.; A-F only; Every Spring)
Range/development of visuals, especially those in science/technology. Vocabulary for commenting on, criticizing, and creating visuals. prereq: Jr or br grad student

WRIT 5775. The Rhetorical Tradition: Classical Period. (3 cr.; A-F-only; Every Fall)
Rhetoric in the Classical world and recurring themes that constitute "the rhetorical tradition." Epistemological/ethical status and sociopolitical importance of ancient rhetorical training and discourse. Works by Isocrates, Plato, Aristotle, Cicero, Quintilian, and others. Prepares students for preliminary examinations/seminars in rhetoric.

WRIT 5776. The Rhetorical Tradition: Modern Era. (3 cr.; A-F or Audit; Periodic Spring)
Core works in modern/contemporary rhetorical theory. Twentieth-century revivals of and challenges to the Aristotelian rhetorical tradition. Units devoted to Enlightenment rhetorics; the New Rhetorics of I. A. Richards, Kenneth Burke, and Chaim Perelman; feminist rhetorical theory, historiography, and critique; deconstruction/post-structuralism. Prepares students for preliminary examinations/seminars in rhetoric.

WRIT 8011. Research Methods in Writing Studies and Technical Communication. (3 cr.; A-F or Audit; Periodic Fall)
Survey of quantitative/qualitative research methods. Theoretical perspectives that demonstrate/test analytical approaches to scientific/technological rhetoric. prereq: STC/RSTC grad student or instr consent

WRIT 8012. Applied Research Methods in Writing Studies and Technical Communication. (3 cr.; A-F or Audit; Every Fall & Spring)
Introduction to one or two quantitative or qualitative research methods in scientific/technical communication or rhetoric (e.g., ethnography, case studies, discourse analysis). prereq: [grad student] or instr consent

WRIT 8333. FTE: Master’s. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
Survey of qualitative research method in rhetoric. Topic announced in advance. prereq: Master's student, adviser and DGS consent

WRIT 8444. FTE: Doctoral. (1 cr.; No Grade Associated; Every Fall, Spring & Summer)
Introduction to field of rhetoric for doctoral students. prereq: Doctoral student, adviser and DGS consent

WRIT 8505. Professional Practice. (3 cr.; S-N only; Every Fall, Spring & Summer)
Supervised study, reading, or research on projects not covered in regularly scheduled offerings. prereq: instr consent

WRIT 8888. Thesis Credit: Doctoral. (1-24 cr.; Max 100 cr.)
Topics include literacy, genre, history of writing, narrative theory and practice, writing as textual practice. Topics vary. See the Class Schedule.

WRIT 8520. Seminar in Scientific and Technical Communication. (3 cr.; [max 12 cr.; A-F or Audit; Periodic Fall & Spring)
Topics may include theories, landmark studies, history, gender, ethics. Topics vary. See the Class Schedule.

WRIT 8540. Seminar in Technical Communication and Composition Pedagogies. (3 cr.; [max 12 cr.; A-F or Audit; Periodic Fall & Spring)
Topics may include theories of pedagogy or research studies that inform the classroom or workplace, social and ethical concerns, landmark studies, current controversies. Topics vary. See the Class Schedule.

WRIT 8550. Seminar in Technology, Culture, and Communication. (3 cr.; [max 12 cr.; A-F or Audit; Periodic Fall & Spring)
Topics may include computer-mediated communication, democracy/technology, controversies over digital communication, privacy/ethical issues, feminist theory and interactions of gender with science and technology, communication in legal or medical settings. Topics vary. See the Class Schedule.

WRIT 8560. Seminar in Writing Studies and Usability. (3 cr.; [max 12 cr.; A-F only; Every Fall & Spring)
Topics may include literacy, genre, history of writing, narrative theory and practice, writing as textual practice. Topics vary. See the Class Schedule.

WRIT 8666. Doctoral Pre-Thesis Credits. (1-6 cr.; [max 12 cr.; No Grade Associated; Every Fall, Spring & Summer)
Doctoral Pre-Thesis Credits prereq: Doctoral student who has not passed prelim oral; no required consent for 1st/2nd registrations, up to 12 combined cr; dept consent for 3rd/4th registrations, up to 24 combined cr; doctoral student admitted before summer 2007 may register up to four times, up to 60 combined cr

WRIT 8777. Thesis Credits: Master’s. (1-18 cr.; [max 50 cr.; No Grade Associated; Every Fall, Spring & Summer)
(No description) prereq: Max 18 cr per semester or summer; 10 cr total required (Plan A only)

WRIT 8792. Independent Study, Reading, and Research. (1-4 cr.; [max 12 cr.; S-N only; Every Fall, Spring & Summer)
Supervised study, reading, or research on projects not covered in regularly scheduled offerings. prereq: instr consent

WRIT 8794. Directed Research. (1-4 cr.; [max 12 cr.; S-N only; Every Fall, Spring & Summer)
Supervised research project. prereq: instr consent

WRIT 8888. Thesis Credit: Doctoral. (1-24 cr.; Max 100 cr.)
No Grade Associated; Every Fall, Spring & Summer
(No description) prereq: Max 18 cr per semester or summer; 24 cr required

YOST 5011. Youth Voices: The Fight for Social Change in Croatia. (3 cr.; A-F only; Periodic Summer)
This international immersion course explores the history, struggles, accomplishments, and experiences of Croatian young people who have engaged in social change efforts. Our focus will be on young people’s involvement in a diverse range of social change movements and how these emerged, how they worked, and what caused them to decline.

YOST 5030. Youth Voices: The Fight for Social Change in Croatia. (3 cr.; A-F only; Periodic Summer)
This international immersion course explores the history, struggles, accomplishments, and experiences of Croatian young people who have engaged in social change efforts. Our focus will be on young people’s involvement in a diverse range of social change movements and how these emerged, how they worked, and what caused them to decline.

YOST 5031. International Youthwork. (3 cr.; Student Option; Every Fall)
Lives of young people living outside the United States and of immigrants/refugees now resident in this country. Working with and on behalf of such groups. Socio-political analysis of globalization. Its impact on young people, youthwork, and youth policy worldwide. prereq: 2xx or instr consent

YOST 5032. Adolescent and Youth Development for Youthworkers. (4 cr.; Student Option; Every Fall & Spring)
Application of theory/research about children/adolescents. How findings/theories facilitate understanding of behavior. prereq: [1001 or 2001 or 2002W or 2101]. [Any Psych or CPsych course]

YOST 5234. Youth Agencies, Organizations, and Youth Service System. (3 cr.; Student Option; Every Spring)
Communities and governmental responses to young people as potential problems through agencies and programs and other organizational forms. Purpose, structure, and activities of such forms. How forms are/are not integrated into youth service systems. prereq: [Two soc/anth courses, work experience in [youth agency or org]] or instr consent

YOST 5235. Community Building, Civic Engagement, and Civic Youthwork. (4 cr.; Student Option; Every Spring)
Reciprocities between youth development and community development brought about by young people’s civic engagement. Individual, social, and political change by/for young people and their community. prereq: [2001, one basic course in Pol, one basic course in Soc] or instr consent

YOST 5240. Special Topics in Youth Studies. (2-8 cr.; [max 40 cr.]; Student Option; Every Fall, Spring & Summer)
In-depth investigation of one area of youth studies. Teaching procedure and approach determined by specific topic and student needs. Topic announced in advance. prereq: Two social sci courses, exper working with youth or instr consent

Courses listed in this catalog are current as of 2018-08-30. For up-to-date information, visit www.catalogs.umn.edu.
YOST 5291. Independent Study in Youth Studies. (1-8 cr. [max 16 cr.]; Student Option; Every Fall, Spring & Summer) Independent reading and/or research under faculty supervision.

YOST 5301. Communicating With Adolescents About Sexuality. (3 cr.; Student Option; Every Summer) How to communicate sensitively/effectively with adolescents and their concerned persons about sexuality in everyday life. Healthy sexual development (physical, emotional, ethical), sexual differences. Gender/body image, disease, sexual violence, intimacy, sex in cyberspace. Prereq: Upper div AdPy course, exper working with youth or instr consent

YOST 5314. Theatre Activities in Youthwork and Education. (2 cr.; Student Option; Every Spring) Using experiential learning and theater activities to enhance creativity and imagination of young workers and educators. Approaches to working with youth in school and agency settings. Application of experiential learning and improvisational theater theory/praxis. Prereq: 1001 or 2101

YOST 5315. Youthwork in Schools. (4 cr.; Student Option; Every Fall & Spring) Craft of youthwork as a framework to understand young people and a practice to enhance healthy development. How young people often make artificially/harmfully divide their lives into "school" and "not school." Prereq: Introductory course in education or instr consent

YOST 5316. Media & Youth: Learning, Teaching, and Doing. (2 cr.; Student Option; Every Spring) Youth are targets, producers, and consumers of a variety of media. This course is about understanding and learning to use a variety of these sources with young people to enhance their development and civic engagement. Prereq: 1001 or 2101 or instr consent

YOST 5319. Understanding Youth Subcultures. (3 cr.; Student Option; Every Summer) Young people's participation in and understanding of subcultures, life-styles, and event cultures. Place of these in young people's identity, friendship, and life chances. Prereq: 2001 or one course each in [Anth, Soc] or instr consent

YOST 5321. Work With Youth: Individual. (2 cr.; Student Option; Every Fall, Spring & Summer) Basic assumptions underlying individual work with youth. Special issues and concerns of adolescents and of persons who work with them, especially those who work with youth in one-to-one interactions. Prereq: 1001 or 2002W or instr consent

YOST 5322. Work With Youth: Families. (2 cr.; Student Option; Every Fall, Spring & Summer) Theories and techniques of working with youth and their families. Practical methods of structural change. Developing effective communication. Decision-making and problem-solving systems. Winning the family's cooperation. Role of professional in influencing healthy family development. Prereq: 1001 or 2002W or instr consent

YOST 5323. Work with Youth: Groups. (2 cr.; Student Option; Every Fall & Summer) Social group work. Adolescent group needs and associations. Group process. Working with diverse groups of youth in community, in group living situations, and in group therapy. Prereq: 1001 or 2002W or instr consent

YOST 5402. Youth Policy: Enhancing Healthy Development in Everyday Life. (4 cr.; Student Option; Periodic Fall & Spring) Youth policy as formulated in response to youth issues, problems, and community and public concerns. Policy as political response to youth panics, as indirect youthwork, and as a community's moral compact with its young people. Perspectives are explored specific to student interests. Prereq: 2001, one course each in [FSoS, PolSci, Soc] or instr consent

YOST 5450. Ways of Knowing in Youth Development Leadership: Using Research and Evaluation to Support Community. (3 cr.; A-F only; Every Fall) This course aims to stimulate students to think critically about youth development and youth work through exploring different ways of knowing. These paradigms each construct different understandings of young people and offer evidence to support diverse youth development practice and programs. Students will leave with a broad perspective of how youth development and youth work empirical evidence is constructed and used to support healthy youth development.

YOST 5452. Everyday Lives of Youth. (3 cr.; A-F or Audit; Every Fall) Youth as idea/lived-reality in scholarship, public discourse, and professional practice. Building practice of work or on behalf of youth.

YOST 5454. Experiential Learning: Pedagogy for Community and Classroom. (3 cr.; Student Option; Every Fall & Spring) Relationship between experience and learning in community and school settings. Emphasizes intentional application of experiential learning theory/practice to educational program development.

YOST 5456. Organizational Approaches to Youth Development. (3 cr.; A-F or Audit; Every Fall) Historical contexts, theoretical frameworks, organizational practices, and public policies that shape nonformal educational experiences of youth in community-based or school-linked settings.

YOST 5598. Community: Context for Youth Development Leadership. (3 cr.; A-F or Audit; Every Spring) Issues/policies in family, school, and community that drive the professional practice of community-based youth work. Practical projects explore what it means to be local, to build social capital for youth, and to involve youth in community change.

YOST 5960. Seminar in Youth Development Leadership. (1 cr. [max 4 cr.]; S-N or Audit; Every Fall, Spring & Summer) Group study of topics/issues. Course proposal, educational program development. Students participate in co-created learning experience with a group of peers. Four-course sequence. Prereq: YDL student or instr consent

YOST 5962. Leadership Field Experience: Youth Development. (4 cr.; S-N only; Every Fall, Spring & Summer) Demonstration of leadership in practice. Project on youth, experiential pedagogy, and community/program settings. Focuses on public policy, advocacy, evaluation, pedagogical issues, program design, curriculum development, or applied research. Prereq: YDL student

Academic Calendars: Twin Cities, Crookston, Morris, Rochester

POLICY STATEMENT

Academic calendars will be established at least four years in advance so that students may plan their schedules and University units may plan events. Revisions to approved calendars must be made no less than two years before the date the calendar goes into effect.

A. Fall and Spring Semesters

1. There will be two semesters, each of which will include a minimum of 70 days of instructions, a maximum of 75 days of instruction, and approximately one week of final examinations (including Saturdays but not Sundays).
2. For the fall semester, the exam period will end no later than December 23.
3. Colleges and campuses may authorize courses shorter or longer than the semester, subject to the approval of appropriate college or academic unit curriculum review committees.
4. Professional schools are permitted to have calendars that vary from the requirements of this policy.

B. Summer Term

1. Departments may schedule a three-week May session following the end of the spring semester and before the summer session. No department will be obligated to offer courses or academic work during this three-week session.
2. There will be a standard eight-week summer session. No department will be obligated to offer courses or academic work during this eight-week session. Departments and programs may deliver courses over either shorter or longer periods of time and with starting and ending dates that differ from the standard eight-week and May sessions.

C. Revisions of Calendars

All calendars and any subsequent revisions or exceptions must be approved by the Faculty Senate.

Exclusions

This policy is not applicable to the Duluth campus.

REASON FOR POLICY
Establishing an academic calendar at least four years in advance allows students to plan their degree programs and enables University units to schedule events at times that do not conflict with other key activities.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

1. Can each of the campus set its own academic calendar?
   Yes, each campus is responsible for setting its own academic calendar. The Faculty Senate approves the University of Minnesota, Morris and University of Minnesota, Twin Cities calendars. The University of Minnesota, Duluth and University of Minnesota, Crookston calendars are transmitted to the University Senate for information only. The University of Minnesota, Rochester follows the Twin Cities academic calendar.

2. Can instructors assign work to students prior to the beginning of the academic term?
   No. Instructors cannot assign work until the term starts.

3. Does the University of Minnesota hold regularly scheduled classes the day before a holiday?
   Yes, scheduled classes, including evening classes, are held the day before a holiday. For example, classes are held the Wednesday evening before the Thanksgiving holiday. Refer to the current academic calendar for University holidays.

- Twin Cities
- Crookston
- Morris
- Duluth
- Rochester

HISTORY

Amended:
December 2009 - Policy now applies to the Crookston campus.

Effective:
April 2009

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

Departments, colleges, and campuses have the authority to establish, change, and discontinue academic plans and sub-plans that appear on official University transcripts, subject to appropriate consultation with other units and subject to the final approval of the Board of Regents. (See Administrative Policy: Adding, Changing or Discontinuing Academic Plans).

Establishing and changing academic plan requirements

1. Academic units (departments, colleges, and campuses) have the authority to establish their curricula and the requirements, including prerequisite courses, for academic plans, subject to the final authority of the Board of Regents. Academic plans include:
   - undergraduate degrees,
   - graduate degrees;
   - professional degrees;
   - majors;
   - minors;
   - undergraduate certificates; and
   - post-baccalaureate certificates.

2. Academic units have the authority to add to or remove courses, including prerequisite courses, from academic plans. The additions or deletions of courses from the academic plan requirements must be in accordance with Board of Regents policies and in compliance with rules established by the college and campus.

3. Changes to academic plans must have an effective date, based on the start of an academic term (e.g., fall semester 2018). Changes to requirements may not be made in the middle of an academic term. Changes to academic plans should be announced far enough in advance so that students, including continuing students and prospective first-year and prospective transfer students, can plan accordingly.

4. Students must follow the requirements of the academic plan in effect during the term in which they entered the plan. Academic units may offer the choice of moving to the new requirements to currently enrolled students who have already been admitted to an existing academic plan. However, the academic unit cannot mandate a new requirement of students who are currently enrolled in the plan without having sought and received prior approval of the dean of the college or the appropriate official on a campus.
5. Academic units must clearly communicate their policies and decisions regarding new or revised requirements for academic plans to prospective and current students. This includes changes to a major, minor, or certificate program, including changes in required prerequisites.

Expiration of old credits

To ensure that students receiving a degree or certificate will be up-to-date in the discipline, an academic unit (a department or comparable unit) may decide not to accept course work towards satisfying requirements for the major, minor, or certificate if the course was taken too long ago.

Students returning from an approved leave of absence are subject to the specific conditions/requirements identified in Administrative Policy: Leave of Absence and Readmission for Undergraduates: Twin Cities, Crookston, Morris, Rochester.

Exclusions

This policy is not applicable to the Duluth campus.

REASON FOR POLICY

Departments, colleges and campuses are best suited to determine curricula and requirements for majors and minors, for graduate and professional degrees, and to add or remove course offerings. It is in students' best interests if changes in requirements do not occur frequently or arbitrarily, and students are provided with advance notice of such changes.

This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

1. What is a change in major requirements?
   The academic department(s) responsible for a major may add, delete, or modify the published degree requirements for a major in that department. As examples, required courses may be added or deleted, or changed; admissions requirements for a major may be changed.

2. What are some examples of the levels of academic unit authority?
   A department, or a group of departments working collaboratively, has the authority to establish the course requirements for a major, minor, or certificate program, including prerequisite requirements; for example, the particular courses required to receive an M.A. degree in History.
   
   A college has the authority to establish college-wide requirements for particular types of academic programs, for example, a second language requirement for a B.A. degree granted within that college.
   
   A campus has the authority to establish campus-wide requirements for groups of academic programs. Some examples are a first-year writing requirement for all undergraduate degrees, the minimum number of credits required for a baccalaureate degree, and a minimum GPA requirement for graduation.
3. How does expiration of old credits show on a student's transcript?

"Expiration of old credit" refers to coursework a student has completed too long ago for that subject matter to be current in the discipline. The academic unit may determine that the student must take additional, current coursework in that subject matter in order to fulfill the requirements for an academic program. The prior credits are not removed from the student's transcript; however, they do not count toward satisfying requirements for the particular major, minor, or certificate.

## DEFINITIONS

**Academic Program**
Undergraduate, graduate, and professional degrees, majors, minors, and certificates that appear on official University transcripts.

**Academic Major**
A student's main field of specialization during the student's undergraduate or graduate studies. The major is recorded on the student's transcript.

**Academic Minor**
A student's declared secondary field of study or specialization during the student's undergraduate or graduate studies. A minor typically consists of a set of courses that meet specified guidelines and is designed to allow a sub-major concentration in an academic discipline or in a specific area in or across disciplines. The minor is recorded on the student's transcript.

**Certificate**
A particular set of courses or coursework that typically addresses new knowledge or practice areas emerging from technological, social, or economic changes to which particular professions or occupations must adjust. The certificate is recorded on the student's transcript.

**Curriculum**
The set of courses offered by a unit.

## RESPONSIBILITIES

**Academic Department(s) Responsible for the Academic Program**
- Maintain complete, up-to-date descriptions of the requirements for its academic programs, including all prerequisite courses
- Determine requirements for admission to particular academic programs/plans.
- Maintain up-to-date curricular offerings, regularly scheduled, in order to allow students to make timely progress toward completing an academic program.
- Provide full and timely information regarding course content and scheduling.
- Clear students for graduation, certifying that they have met the requirements for the major, minor, or certificate.
- Review and provide final approval for requests for waivers of particular requirements for the major, minor, or certificate.
College/Campus
- Maintain up-to-date descriptions of the collegiate and campus requirements for academic programs within that college and campus.
- Review and provide final approval for requests for waivers of particular academic program requirements at the college/campus level.

Executive Vice President and Provost
- Review and recommend approval of academic proposals for Board of Regents consideration and final action.

Board of Regents
- Review and provide final approval of proposals for new, changed, or discontinued academic programs/plans.

RELATED INFORMATION
- Administrative Policy: [Adding, Changing or Discontinuing Academic Plans](#)
- Administrative Policy: [Leave of Absence and Readmission for Undergraduates: Twin Cities, Crookston, Morris, Rochester](#)
- [Higher Learning Commission, Criteria and Requirements for Accreditation](#)

HISTORY

Amended:
June 2014 - Comprehensive Review, Major Revision: 1. Defines "academic plan" to include majors, minors, and certificates (i.e., to include all academic plans that are documented on the transcript). Certificates were not included in the past, as their requirements were not formally documented in PCAS until two years ago. 2. Provides examples of levels of academic units authority in FAQ #5, to clarify for advisors and faculty who has authority over a particular requirement. 3. Includes a definition of a certificate, consistent with the definitions in other policies 4. Outlines the responsibilities at the department/program level, college/campus level, SVPP level, and Regents level. 5. Aligns with Administrative Policy: Adding, Changing or Discontinuing Academic Plans.

Amended:
September 2014 - Clarifications related to Higher Learning Commission accreditation requirements.

Amended:
August 2010 - Added questions 2-4 to Frequently Asked Questions.

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009
POLICY STATEMENT

Each campus will develop and maintain processes for the good faith review and resolution of student academic complaints that will:

- encourage informal resolution of alleged violations at the lowest unit level;
- allow for a formal resolution mechanism if not resolved informally; and
- provide for appeal to a final decision maker.

The final decision following appeal is not appealable further within the University.

Scope

Student academic complaints are brought by students regarding the University’s provision of education and academic services affecting their role as students and must be based on a claimed violation of a University rule, policy, or established practice.

Student academic complaints do not include student complaints regarding:

- their University employment
- disciplinary action under Board of Regents Policy: Student Conduct Code
- grades
- University admission decisions

Relief Available

Resolution of complaints under this policy may include student reinstatement or other corrective action for the benefit of the student, including refunds, but may not award monetary damages, or direct disciplinary action against any employee of the University.

This policy does not limit the University’s right to change rules, policies, or practices related to the provision of academic services and education.

REASON FOR POLICY

To implement Board of Regents Policy: Conflict Resolution Process for Student Academic Complaints, and to comply with law, including Title IX. This policy provides a framework for resolving student academic complaints that is simple and fair and allows for both informal and formal resolution of conflicts. This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.
PROCEDURES

- **UMC Student Academic Grievance Procedures**
- **Conflict Resolution Process for Student Academic Complaints: Twin Cities**
- **Duluth: Student Academic Complaint Resolution**
- **Morris: Student Academic Grievance Procedure (see page 44)**
- **Rochester: Grievance Procedures**

FORMS/INSTRUCTIONS

- **UM 1698 - Student Academic Complaint** [um1698.doc]

APPENDICES

- **Guidelines for Colleges: Hearings Under the Conflict Resolution Process for Student Academic Complaints: Twin Cities**

FREQUENTLY ASKED QUESTIONS

1. **I am a student with a complaint, and I don't know where to direct it. Where can I get information and advice?**
   The University of Minnesota takes student complaints and grievances seriously and has processes in place to ensure that complaints and addressed appropriately and in a timely manner. Helpful resources and information about the channels for student complaints are provided on the [One Stop student services web site](#).

2. **I don't agree with the grade I received from my instructor. Is there anything I can do?**
   While grades are not subject to complaint, you are entitled to an explanation for the grade assigned. If you are not able to get an explanation for the grade from your instructor, consult the appropriate director for undergraduate students or department chair. Students also may wish to seek assistance from the **Student Conflict Resolution Office**. An instructor's judgment in assigning a grade is not a subject for a formal hearing, and can only be reviewed through these informal processes.

3. **I have been dismissed by my college for academic reasons. What steps can I take to challenge the dismissal? What is my enrollment status while the dispute is pending?**
   If your college or program has an appeal process for dismissals, you must follow that process before filing a student academic complaint. Your enrollment continues while the appeal is pending. If your appeal is denied, your enrollment ends and you may file a student academic complaint at that point. If your academic complaint is successful, you then would be reinstated as a student.

4. **A student has a complaint about sexual harassment by a University employee. Where should the student go?**
   A student with a complaint of sexual harassment by a University employee (1) can seek assistance from the campus equal opportunity office (see Administrative Policy: **Sexual Harassment, Sexual Assault, Stalking and Relationship Violence**) or (2) can bring a student academic complaint under this policy and procedure, where applicable. If the student chooses the latter, the University will provide training for resolving the complaint under this procedure to all administrators and other staff who are authorized to investigate or resolve student complaints of sexual harassment. Colleges can contact the Office of General Counsel (612-624-4100) or the campus's equal opportunity office to arrange the training.

**DEFINITIONS**

**Student Academic Complaint**
Complaints brought by students regarding the University's provision of academic services and education affecting their role as students.

**Sexual Harassment**
Unwelcome sexual advances, requests for sexual favors, and/or other verbal or physical conduct of a sexual nature when (1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment or academic advancement in any University activity or program; (2) submission to or rejection of such conduct by an individual is used as the basis of employment or academic decisions affecting this individual in any University activity or program; or (3) such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creating an intimidating, hostile, or offensive work or academic environment in any University activity of program.

**RESPONSIBILITIES**

**Academic Complaint Officer**
Comply with the Conflict Resolution Process for Student Academic Complaints procedures.

**Chancellor**
Ensure that campus has processes consistent with policy.

**College**
Schedule a hearing should the Academic Complaint Officer refer the matter to a College Hearing Panel.

**Office of the General Counsel**
Provide legal advice to the University and provide legal representation to the University respondent when the student is represented by a lawyer.

**Executive Vice President and Provost**
Ensure that campus has processes consistent with policy.

**RELATED INFORMATION**

- Board of Regents Policy: [Conflict Resolution Process for Student Academic Complaints](#)
- [Higher Learning Commission, Criteria and Requirements for Accreditation](#)

**HISTORY**

Amended:
August 2014 - Comprehensive Review. Minor Revision. Edits were made to clarify existing procedures and action steps.
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

The University establishes minimum admission requirements for master’s and doctoral degrees. Colleges and graduate programs may set additional or more stringent requirements (e.g., an undergraduate GPA standard). Colleges and graduate programs must publish and maintain their admission requirements.

Graduate programs make all admission decisions. All applicants must be informed of admission decisions. The central graduate admissions system is used to deliver the official confirmation of admission decisions to applicants on behalf of the graduate program.

I. General Admission Requirements for Degree Seeking Students

a. Applicants must hold a bachelor’s degree from a regionally accredited U.S. college or university or a comparable degree from a recognized college or university in another country by the time of their matriculation in their graduate program.

i. Students may be admitted and may matriculate in a graduate program at the discretion of the program while simultaneously completing their baccalaureate work, with the program’s permission, if they have no more than seven semester credits or two courses remaining to complete their bachelor’s degree.

If the student does not complete the work for the baccalaureate degree by the end of the first term of enrollment in the graduate program, a hold is placed on the student’s graduate registration until the graduate program determines that the student has completed the baccalaureate degree.

At the discretion of the program, current University students in officially approved integrated bachelor’s/master’s degree programs may be admitted to the master’s program prior to the award of the bachelor’s degree if allowed under the admission requirements of the integrated program.

b. International applicants must meet the minimum standards for English language proficiency of the University as maintained and published by the central graduate admissions office. Colleges and programs may set higher minimum standards for English language proficiency.

c. Applicants must provide unofficial transcripts from all post-secondary institutions attended. If they are admitted, applicants must provide official transcripts before they register and enroll at the University.

d. Applicants may be admitted on a trial basis, contingent upon satisfying specific requirements. Graduate programs that choose to admit applicants on a trial basis must ensure that these requirements are communicated in the notification of admission. A timeframe for satisfying the requirements must be specified. If the specified requirements are not satisfied before the expiration of the timeframe, the student may be terminated from the program.

II. Admission for Graduate Professional Development

Colleges and graduate programs may offer admission for Graduate Professional Development to applicants who wish to enroll in a graduate program but who may not wish to complete a graduate degree. Applicants for Graduate Professional Development must apply and be admitted to the college and program in which they plan to pursue
coursework. Applicants for Graduate Professional Development must meet the admission requirements specified in I.a, b, c, and d.

III. Concurrent or Sequential Graduate Degrees
Applicants who wish to pursue degrees concurrently in different graduate programs and/or different colleges must apply and be admitted to each college and program in which they plan to pursue a degree.
Applicants who have already been awarded a University graduate degree or a post-baccalaureate certificate and are seeking to obtain an additional degree must apply and meet the admissions criteria for their new graduate program and/or degree objective.

IV. Deferred Admission
Admitted applicants may request, from the graduate program, a deferral of their admission to graduate study for up to one full academic year without re-applying. If the deferral is approved and matriculation does not occur within the one-year period, the applicant must re-apply.

V. Acceptance of Financial Support
In the event that a college or graduate program offers an applicant admitted for fall semester financial support, the student may not be compelled by the college or graduate program to accept the financial support offer prior to April 15 of the year of admission. [Council of Graduate Schools’ Resolution Regarding Graduate Scholars, Fellows, Trainees, and Assistants]

VI. University Employees
In order to protect against potential conflict of interest, University employees holding academic appointments above the rank of instructor or research fellow must obtain permission from their college and supervisor or department chair to accept an offer of admission to pursue a University master’s or doctoral degree in the same field, or a closely related field, in which they are also employed.

VII. Exceptions
b. Programs may request from their collegiate dean or unit’s chief academic officer (or designee), an exception to the requirement that admitted students hold a U.S. Bachelor’s or comparable degree.
c. Programs may request from their collegiate dean or unit’s chief academic officer (or designee) an exception to the required use of the University’s central graduate admissions application system for admission, readmission, and changes to master’s and doctoral degree objectives.

REASON FOR POLICY
The University’s admission standards are highly selective and competitive, and reflect the institution’s identity as a leading public and land grant research university. Decisions on admission should ensure that students admitted to a program have appropriate preparation for graduate work in a particular discipline and at the intended degree level.

DEFINITIONS

Recognized college or university
A college or university in another country that is comparable to a regionally accredited U.S. college or university. This information is available through the University’s central graduate admissions office.

RESPONSIBILITIES

Colleges
- Publish and maintain admission requirements.
- Ensure that all information relevant to enrollment (e.g., legal, terms of financial support, if awarded) is communicated to the student in the collegiate confirmation of admission.
- Review letters generated by the University’s central graduate admission application system and letters sent by graduate programs to ensure conformity with collegiate policy and University policy governing financial support.
- Request exceptions from the Executive Vice President and Provost (or designee) to the requirement to use the University’s central graduate admission application system.

Programs/Departments
- Publish and maintain admission requirements.
- Provide timely communication with applicants throughout the admissions process.
- Request exceptions from their collegiate dean, or the unit’s chief academic officer (or designee) to the requirement that applicants hold a bachelor’s degree from a regionally accredited U.S. college or university or an equivalent degree from a recognized college or university in another country.
- Request from their collegiate dean, or unit’s chief academic officer (or designee) an exception to the required use of the University’s central graduate admissions application system for admission, readmission, and changes to master’s and doctoral degree objectives.

Central Graduate Admissions Office
- Authenticate and review domestic and international transcripts and credentials.
- Advise programs on comparability of non-U.S. colleges and universities with regionally accredited U.S. colleges and universities.
- Advise programs regarding admission of students not meeting the University’s minimum standards for English language proficiency.
- Issue the official confirmation of admission decisions on behalf of the program using the central graduate admissions application system.
- Issue the student visa form I-20.
- Create the official University student record for admitted applicants.

RELATED INFORMATION

- Council of Graduate Schools' Resolution Regarding Graduate Scholars, Fellows, Trainees, and Assistants
- English Language Proficiency Information
- Office of Human Resources Academic Job Codes and Titles

HISTORY

Amended:
June 2017 - Comprehensive Review, Minor Revision. 1. Clarifies the language specifying the role of colleges, programs, and central graduate admissions system in making admission decisions. 2. Specifies the standards for minimum English language proficiency for international applicants. 3. Clarifies the requirements for admission without a baccalaureate degree to specify access for all applicants, not just U of MN undergraduates, and associated completion timeline for outstanding requirements. 4. Specifies the responsibilities related to conditional admission programs, and clarifies "admitted on a trial basis" language.

Effective:
May 2012 - New Policy, Comprehensive Review.
POLICY STATEMENT

The proposed revision of this policy has completed it’s 30­day review and the policy owner is currently considering the feedback received to determine what changes should be made to the proposed version.

This policy governs the application of graduate credit to satisfy the requirements for the following degrees:

- Master’s Plan A degrees
- Master’s Plan B degrees
- Master’s Plan C degrees
- Doctoral degrees

1. Applying credits from a baccalaureate degree
Graduate credits taken before the award of a baccalaureate degree may not be counted toward a graduate degree.

2. Credits-in-common between University graduate degrees
   a. A maximum of eight graduate course credits may be counted in common between two University master's degrees.
   b. Approved graduate course credits may be counted in common between a University doctoral and master’s degree in the same program.
   c. Plan A thesis (xxxx8777) and doctoral degree thesis (xxxx8888) credits in the same program:
      - Can be counted toward either the Plan A master's or the doctoral degree thesis credit requirement, but not both.
      - may be used to meet the Plan B master's project credit requirement.
   d. Plan B Project credits may count only toward the Plan B master’s degree requirements.

3. Transferring graduate course credits from outside the University
Graduate course credits earned at other accredited institutions may be transferred to master’s or doctoral degree plans subject to approval by the University graduate program and the limits described below. In the case of a transfer from a non­United States institution, graduate course credits to be transferred must have been earned in a program judged by the University graduate program to be comparable to a graduate degree program of a regionally accredited institution in the United States. Transfer of thesis credits is not allowed.
   - For master’s degrees – A minimum of 60% of total course credits (not including thesis credits) required for a specific master’s degree must be taken at the University. Transferred credits can include a maximum of 12
graduate course credits taken as non-degree seeking or non-admitted status. Transfer of thesis credits is not allowed.

- **For doctoral degrees** – Individual programs may determine, on a case-by-case basis, how many transfer course credits doctoral students may apply toward their degree requirement. However, doctoral students must take a minimum of 12 course credits at the University. Transferred credits can include a maximum of 12 graduate course credits taken as non-degree seeking or non-admitted status. Transfer of thesis credits is not allowed.

### 4. Applying graduate credits across University graduate programs

a. Graduate course credits earned while enrolled in one University graduate program may be applied to another University graduate program.

   - The number of graduate course credits applied is determined by the graduate program to which the student is applying.
   - Earned master’s thesis credits (8777) and doctorate thesis credits (8888) in one University graduate program cannot be applied toward the thesis credit requirement for another University graduate program.

b. A maximum of 12 graduate course credits from other University registration categories, such as non-degree seeking or non-admitted students, may be considered for transfer once the student is admitted and enrolled in a graduate program.

c. Graduate programs may accept University 4000-level course credits as graduate courses. A maximum of nine 4000-level course credits may be used to satisfy the doctoral or master’s course credit requirement, but graduate programs may impose a lower maximum.

### Exceptions

For approved joint or dual degree programs, items 1, 2a, and 2b do not apply. Such programs may formulate more specific requirements to regulate instances of courses-in-common arising as a result of the special nature of joint/dual degree curricula.

### REASON FOR POLICY

This policy provides the framework for applying graduate credits toward degree requirements under various scenarios. Graduate programs have the authority to accept or reject any graduate course credits that can be applied to a student's current degree plan.

### PROCEDURES

There are no procedures associated with this policy.

### FORMS/INSTRUCTIONS

To apply graduate credits from another college or university to a University graduate degree, use the form and follow the procedures specified by your college. For students in programs formerly in the Graduate School, use the Degree Program Form and follow the instructions included on the form.

*(Note: The development of automated procedures to replace the Graduate School Degree Program Form is ongoing. Until students, faculty, and staff are notified that any new procedures are in place, students will continue to use the existing form.)*

### APPENDICES

There are no appendices associated with this policy.

DEFINITIONS

**Master’s Plan A**
Master's degree programs that require a thesis for degree completion

**Master’s Plan B**
Master's degree programs that substitute additional coursework and special projects for the thesis

**Master’s Plan C**
Master's degree programs that are coursework only which provide an alternative structure for degree completion, such as a culminating experience in the form of a capstone course and/or paper

**Plan B Project Credits**
Credits taken by the students in relation to their Plan B project as part of the degree requirements

RESPONSIBILITIES

There are no specified responsibilities associated with this policy.

RELATED INFORMATION

There is no related information associated with this policy.

HISTORY

**Effective:**
September 2011 - New Policy. Comprehensive Review. Addresses the handling of credit transfers and credits-in-common. Specifies that graduate programs may allow up to a maximum of nine 4000-level course credits, unless the specific graduate program imposes a lower maximum. Allows for Plan A thesis credits to count toward the doctoral degree in the same field if the thesis credits were not applied to the master's degree. Continues to limit the number of credits for the master's and doctoral degrees that may be taken as a non-degree or non-admitted student. Stipulates a minimum number of course credits that doctoral students must take at the University.

University Policy Program
140 McNamara Alumni Center, Minneapolis, MN 55455 - P: 612-624-8081
policy@umn.edu

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

1. Every graduate program must have a Director of Graduate Studies, appointed by the collegiate dean on the Twin Cities campus or chief academic officer (or designee) on a system campus after consultation with program faculty. For All-University programs, a Director of Graduate Studies must be provided on each campus on which a program is offered.

2. A tenured or tenure-track faculty member with an earned doctorate or designated equivalent in an appropriate field from an accredited institution is eligible to serve as Director of Graduate Studies or co-Director of Graduate Studies.
   a. Collegiate deans/chief academic officers or their designated representatives at the collegiate level may, with the approval of the Provost, assign the role of Director of Graduate Studies (or co-Director of Graduate Studies) to an individual who is not otherwise eligible under this standard. The Provost may delegate the approval responsibility to the Vice Provost and Dean of Graduate Education.

3. Collegiate units may develop additional criteria consistent with this policy.

4. Each college must have a set of publicly available written statements regarding the position of Director of Graduate Studies, which will include:
   a. a description of the director's responsibilities and reporting lines;
   b. the standards for selection and evaluation of the director;
   c. the process for selecting the director and approving the appointment, including effective involvement of program faculty; and
   d. the process for removing a director, including consultation with program faculty where appropriate.

5. All programs not housed within a single collegiate unit must specify in the program's Memorandum of Understanding which collegiate dean will appoint the Director of Graduate Studies (or co-Director of Graduate Studies) and what process will be used to nominate program faculty for the position.

Exceptions

REASON FOR POLICY

A faculty Director of Graduate Studies represents the program to faculty governance bodies, takes a leadership role in maintaining program quality and effectiveness, and communicates with collegiate deans and/or the Graduate School about the program's larger concerns.
PROCEDURES
There are no procedures associated with this policy.

FORMS/INSTRUCTIONS
- UM 1762 - Request to Appoint Director of Graduate Studies Who is Not a Tenured or Tenure-Track Faculty Member

APPENDICES
- Director of Graduate Studies Handbook: Suggested Components
- Typical Roles and Responsibilities of the Director of Graduate Studies

FREQUENTLY ASKED QUESTIONS
1. Is a faculty member who earned a Ph.D. degree at a non-U.S. university that is judged to be equivalent to an accredited institution in the U.S. eligible to serve as a DGS?
   Yes.
2. Do minor-only programs require a DGS?
   Yes. The requirements for DGS pertain to both degree-granting programs and free-standing minors.

DEFINITIONS

All-University Programs
Programs that have been approved by the Board of Regents for joint offering by two or more campuses. Such programs have substantial involvement from all participating campuses in such matters as oversight and administration, recruitment and admission of students, course development and course offering, faculty and student participation, commitment of financial resources, student funding opportunities and related student support, and other aspects of the academic program operation.

RESPONSIBILITIES

Collegiate Units
Provide orientation for new Directors of Graduate Studies, where possible. Develop a set of publicly available written statements regarding the position of the Director of Graduate Studies as outlined in policy item 4. Develop a plan to ensure that the responsibilities of Directors of Graduate Studies are being covered for the entire calendar year.

Collegiate Deans
Appoint Director of Graduate Studies after consultation with program faculty. Appoint an acting DGS, in consultation with program faculty, to cover an absence or temporary vacancy.
Director of Graduate Studies (DGS)
Serves as the coordinator of graduate studies within a program. Together with the graduate program faculty and department and collegiate leadership, the DGS shares responsibility for guiding and improving graduate education within the program(s) under the DGS's jurisdiction. The DGS is the liaison among the graduate students, program faculty, and the college and Graduate School administrations. DGS is also responsible for understanding and complying with University and collegiate policies that govern or have an impact on the graduate program and its students.

RELATED INFORMATION

There is no related information associated with this policy.

HISTORY

Amended:
February 2016 - Comprehensive Review, Minor Revision. Specifies that the provost may delegate approval responsibility. Expanded on the responsibilities for the collegiate units. Minor clarifications to the policy.

Amended:
April 2012 - Policy now applies University Wide (there is no longer an exclusion for the Duluth campus).

Effective:
September 2011 - New Policy, Comprehensive Review. Requires every graduate program to have a director of graduate studies (DGS). Continues the requirement that only tenured or tenure-track faculty are eligible to serve as a DGS, unless an exception by the Provost or designate has been granted.
POLICY STATEMENT

The University may grant undergraduate, graduate and professional degrees posthumously. If a college determines that a deceased student has completed sufficient coursework to be awarded a degree, the college (Twin Cities only) or chief academic officer (or designee) on each system campus has the authority to grant the degree posthumously. Graduate students must have completed enough work toward the thesis or dissertation, if required for the degree.

REASON FOR POLICY

To recognize the academic achievement of students who have died, and to empower colleges and Vice Chancellors to award degrees posthumously where the student has completed enough of the planned degree program.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

## DEFINITIONS

**Posthumous:**
Following or occurring after one's death.

## RESPONSIBILITIES

**Registrar**
- Notify departments and colleges of this policy.
- Establish individual campus procedures for recording the posthumous degree.
- Post the degree to the student's record.
- Work with the department or college to facilitate appropriate presentation of the degree at the next commencement ceremony or presentation to the student's family in an appropriate setting.

**College (Twin Cities)**
- In consultation with the academic department of the degree, determine if posthumous degree should be awarded.
- Notify the Office of the Registrar of posthumous degree granting for diploma. Send a copy of the request and approval to the Registrar, and place a copy in the student's file.
- Contact the Office of the Registrar to determine the correct information for posting the degree and issuing the diploma.
- Facilitate appropriate presentation of the degree
- As a courtesy, notify the Executive Vice President and Provost of the awarding of the posthumous degree.

**Collegiate Office, (Crookston, Duluth, Morris & Rochester)**
- In consultation with the academic department of the degree, make a request of the campus Chief Academic Officer that the degree be awarded.

**Chief Academic Officer (Crookston, Duluth, Morris & Rochester)**
- In consultation with the college requesting the posthumous degree, determine if posthumous degree should be awarded.
- Notify the Office of the Registrar of posthumous degree granting for diploma. Send a copy of the request and approval to the Registrar, and place a copy in the student's file.
- Contact the Office of the Registrar to determine the correct information for posting the degree and issuing the diploma.
RELATED INFORMATION

There is no related information associated with this policy.

HISTORY

Amended:
March 2016 - Comprehensive Review, Minor Revision. Administrative Procedure: Requesting a Posthumous Degree incorporated into the Responsibilities section of the policy. Minor wording changes to Statement and Reason.

Reviewed:
September 2011 - Comprehensive Review.

Amended:
April 2008 - Updated contacts section. Added definitions for "Posthumous" and "Eligible Student". "Vice Chancellor for Academic Affairs" changed to "Chief academic officer" in responsibilities section. Additional edits made to clarify policy, but not to change meaning.

Effective:
June 2003
POLICY STATEMENT

Each campus is responsible for establishing a standard class schedule and class period in order to maximize classroom utilization and student access to courses. These standards apply to courses that are scheduled during an academic term. Academic terms are defined by the academic calendars set for each campus.

A. Standards for Class Schedules

1. Each campus of the University must adopt a standard class schedule with an appropriate change period between classes. Although the practice is discouraged, start times and/or class periods that vary from the standard schedule are permitted, subject to campus procedures for approval of such variances.

2. Departments are encouraged to schedule classes so that classroom space is used to the maximum extent practicable while ensuring that students have reasonable access to courses.

3. Classes may not be held on official University holidays except with the approval of the appropriate dean.

4. Class schedules, and information on non-conforming classes, will be reported annually to the Senate Committee on Educational Policy by the office on the campus responsible for class scheduling.

B. Twin Cities Campus Standard Schedule and Class Periods

1. Monday - Friday Standard Class Periods
   
   There are three standard class periods, described below and set out in the table following:

   a. The standard "A" class is 50 minutes, with a 15-minute change period between classes. The first class of the day starts at 08:00 on the Minneapolis campus and at 08:30 on the St. Paul campus. Classes meeting for two or more periods (such as labs), must start and end according to this schedule.

   b. The standard "B" class is 75 minutes, with a 15-minute change period between classes. The first class of the day starts at 08:15 on the Minneapolis campus and at 08:45 on the St. Paul campus. Such classes will be scheduled only on Tuesdays and Thursdays.

   c. The standard "C" class is 75 minutes, with a 15-minute change period between classes. The first class of the day starts at 08:15 on the Minneapolis campus and at 08:45 on the St. Paul campus. Such classes will only be scheduled Monday/Wednesday, Wednesday/Friday, or Monday/Friday.

2. Classes designed exclusively for graduate and/or post-baccalaureate professional students on the Twin Cities campus are exempt from the scheduling requirements in this policy, if held in a room under the control of the department. Clinically based Academic Health Center (AHC) courses in AHC rooms may be
scheduled at non-standard times on the Twin Cities campus. Departments should schedule classes so that students have reasonable access to courses inside and outside the department.

3. **Distribution of meeting times**
   Colleges must distribute classes evenly throughout the day. Non-compliant colleges must change class meeting times to meet distribution requirements.

4. **Distribution of meeting patterns**
   Colleges are permitted to schedule a maximum of 50% of their classes using a Tuesday/Thursday meeting pattern, with the remaining classes using a combination of Monday/Wednesday/Friday meeting patterns. Non-compliant colleges must change class meeting times to meet distribution requirements.

5. **Distribution of enrollments**
   Colleges must distribute enrollments throughout the day (i.e., across class hours) and throughout the week (i.e., day patterns).

6. **Distribution calculations**
   Distributions are calculated by summing the number of minutes for each meeting pattern occurring in a standard "A" class meeting time on each weekday, Monday through Friday. Colleges are permitted to schedule up to 3% of departmental classes during any individual time period (e.g., period VII on Thursday or period II on Monday) on any given weekday. Meeting patterns for combined sections are calculated once and are attributed to the parent section's department.

7. **Standard Class Meeting Times**

</tr>
</tbody>
</table>

8. Colleges are permitted to request classes during non-standard times. These requests must be approved by the college associate dean and the Office of Classroom Management; in case of a disagreement, final authority to grant a variance rests with the Executive Vice President and Provost's office.

9. **Standard Scheduling Rules for Classes Carrying 1-5 Credits.**
The following rules do not apply to the length of labs, film classes, performing arts classes, or specialized class components, but such classes must begin according to the schedule in Section 1. Neither these rules nor those in Section 1 apply to courses administered online or directed study, directed readings, or directed research courses, but these courses must comply with Administrative Policy: Expected Student Academic Work per Credit.

One Credit Classes
- Meet for one standard hour per week, begin at a standard "A" class meeting time, and meet for one class period.
- Meet twice per week, and follow the rules for two-credit classes; or
- Meet three times per week, and follow the rules for three-credit classes.

Two Credit Classes
- Meet twice per week, begin at a standard "A" class meeting time, and meet for one class period, or
- Meet once per week, begin at a standard "A" class meeting time, and last two class periods.

Three Credit Classes
- Meet three times per week on MWF, begin at a standard "A" class meeting time, and meet for one class period; or
- Meet twice per week, use the standard "B" class meeting times, and meet on Tuesdays and Thursdays only; or
- Meet twice per week, use the "C" class meeting times, and meet on MW, WF, MF only; or
- Meet once per week, use the standard "A" start time, and meet on F.

Four Credit Classes
- Meet four times per week, begin at a standard "A" class meeting time, or
- Meet twice per week for two hours, begin at a standard "A" time, and last two class periods; or
- For lecture/laboratory or lecture/discussion courses with three hours of lecture time, the lecture component follows the schedule for three-credit courses and the discussion component follows the schedule for one-credit classes.

Five Credit Classes
- Meet five times per week, begin at a standard "A" class meeting time, meet for one class period, and meet MTWThF.
- For lecture/laboratory or lecture/discussion courses with three hours of lecture time, the lecture component follows the schedule for three-credit courses. For lecture/laboratory or lecture/discussion courses with four hours of lecture time, the lecture component follows the schedule for four-credit courses and the discussion component follows the corresponding one- or two-credit schedule.

Summer Term (May session plus first and second summer session).
Classes may meet during the May session, first or second summer session, or may extend across two or all three sessions. Class period duration in the May and summer sessions is at the discretion of the department offering the class, in consultation with the Office of Classroom Management. The first class hour will begin at 08:00 on the Minneapolis campus and at 08:30 on the St. Paul campus.

**REASON FOR POLICY**

Standard class scheduling allows for maximum access to class offerings for students and facilitates the most efficient use of classrooms.

**PROCEDURES**

There are no procedures associated with this policy.

**FORMS/INSTRUCTIONS**
There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

1. Are campuses allowed to set their own class schedule and passing times?
   Yes, each campus of the University (e.g. University of Minnesota, Crookston; University of Minnesota, Morris; University of Minnesota, Rochester; University of Minnesota, Twin Cities) is permitted to set the appropriate class schedule and passing times for its institution.

2. What is a centrally-scheduled classroom versus a departmentally-controlled classroom (Twin Cities)?
   Centrally-scheduled classrooms at the University of Minnesota, Twin Cities are operated, maintained and scheduled through the Office of Classroom Management. Departmentally-scheduled classrooms are operated, maintained and scheduled through the individual departments that control them.

DEFINITIONS

First and Second Summer Session
The University of Minnesota academic calendar includes Fall Semester, Spring Semester, May Session and Summer Session. Summer Session is typically divided into two time periods, although some classes may span both summer sessions. Classes are offered each of these terms although the duration of the term can vary. See the Academic Calendar of the appropriate campus for exact dates of the terms in a particular calendar year.

May Session
The University of Minnesota academic calendar includes Fall Semester, Spring Semester, May Session and Summer Session. May session classes occur between the end of spring semester and the beginning of summer session.

RESPONSIBILITIES

Departments (Twin Cities)
- Follow the established campus standard schedule and class periods.
- Distribute meeting times and patterns, and enrollment.

Office of Classroom Management (Twin Cities)
- Establish campus standard schedule and class period times.
- Monitor and report use of time distributions and variations from standard schedule.
Office of the Executive Vice President and Provost

Consider a request for variance from the standard class schedule when it is necessary, and if agreement about scheduling has not been reached at a lower level.

RELATED INFORMATION

- Educational Policy: Instructional Time per Course Credit
- Educational Policy: Expected Student Academic Work per Credit: Twin Cities, Morris, Rochester
- Educational Policy: Teaching and Learning: Instructor and Unit Responsibilities: Twin Cities, Morris, Rochester
- University of Minnesota, Twin Cities Academic Calendar

HISTORY

Amended
May 2011 - Comprehensive Review: Requires colleges to distribute classes evenly throughout the day; Requires colleges to distribute enrollment, as well as classes, throughout the day and throughout the week; Eliminates the 60/40 guidelines of not scheduling more than 60% of the classes during peak hours. Adds two new meeting patterns to the standard class times.

Amended
April 2010 - Added an additional approval step if a faculty member wants to schedule a class on an official University Holiday.

Amended:
December 2009 - This policy now applies to Crookston.

Effective:
April 2009

University Policy Program
140 McNamara Alumni Center, Minneapolis, MN 55455 - P: 612-624-8081
policy@umn.edu

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

1. Enrollment limits for course sections
   Departments or programs may set minimum and maximum enrollment limits for any course or any section of a course. Enrollment limits are subject to review by the dean.

2. Cancellation of low-enrollment courses
   a. Each campus and college must maintain a policy regarding the cancellation of low-enrollment courses or sections. These policies may differ across colleges and may allow variations by department. Any such policy must, at a minimum, take into account (1) the effect of cancellation of a course or courses on student academic progress and graduation, (2) the need for a course to contribute to appropriate program breadth and curriculum, and (3) commitments made to instructors that a course would be offered.
   b. Courses may not be cancelled after the fifth day of classes for that term.

Exclusions
This policy is not applicable to the Duluth campus.

REASON FOR POLICY

Maximum efficiency and optimal learning occurs within an enrollment range: it is not feasible or educationally sound to teach certain courses if enrollments are either too small or too large. Departments must be able to cancel a course if it is too under-prescribed to warrant offering it, as well as to limit the enrollment to maximize learning. Students need adequate time to select a replacement course if a course is cancelled.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS
There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

Where can college guidelines on canceling low enrollment courses be found?
Each college of the University of Minnesota, Twin Cities should have its guidelines for canceling low enrollment courses on its website. Policies for the University of Minnesota, Morris and the University of Minnesota, Rochester can be obtained in the Office of the Vice Chancellor for Academic Affairs.

</tbody>
</table>

DEFINITIONS

Enrollment limits (maximum or minimum)
The minimum or maximum number of students allowed in a course; the minimum informs when a course may be cancelled and the maximum informs when a course is considered closed to additional enrollments.

RESPONSIBILITIES

Departments (Twin Cities)
- Establish minimum and maximum course limits.
- Proactively monitor course enrollments so as to cancel courses as early as possible so students can still register for additional course(s) without needed permission to do so.

RELATED INFORMATION

There is no related information for this policy.

HISTORY

Amended:
December 2009 - Policy now applies to Crookston.
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

The primary purpose of the course numbering system is to help students select and sequence courses. Consistent use of the course numbering system also helps those who view a student’s transcript identify the level of courses that appear on the transcript.

1. Departments and colleges must use 4-digit course numbers using the system in the Appendix to this policy.
2. Students should use the course numbering system to assist in selecting courses to advance them toward their degree.
3. Use of 4xxx Courses in Graduate Programs: Graduate programs may accept University 4xxx-level course credits as graduate courses. A maximum of nine credits of 4xxx-level course work may be used to satisfy the doctoral or master’s course credit requirement, but individual graduate programs may impose a lower maximum. A graduate program may restrict the use of 4xxx courses in the program (e.g., by stipulating that only certain 4xxx courses may be counted). A graduate program has the authority to establish its curricula and the requirements for its academic programs.
4. 6xxx and 7xxx Courses: 6xxx and 7xxx courses are to be used primarily for post-baccalaureate professional programs (e.g., D.D.S., J.D.). It is at the discretion of a graduate program whether it will accept University 6xxx- and 7xxx-level course credits as satisfying degree requirements. Similarly, it is at the discretion of a professional program whether it will accept University 5xxx- and 8xxx-level course credits as satisfying degree requirements. Those departments or programs offering courses for degrees that span graduate and professional education may determine how to best number courses in their curriculum.
5. Alphabetic Suffixes: No alphabetic suffixes other than those already in place at the time this policy is adopted (April 2009) may be used (see the FAQ).
6. Graduate programs must use the standard numbering conventions for all thesis credit courses (see Appendix).
7. Graduate programs will use the all-University numbering conventions for other kinds of courses (see Appendix for xx91 – xx98 courses).
8. Thesis credit courses (see Appendix) and xx91 – xx98 are examples of courses that students may repeat for credit.
9. Use of a zero as the last digit of a course number should be reserved for other kinds of courses that may be repeated for credit (e.g., "topics" courses).
**Exclusions**
This policy is not applicable to the Duluth campus.

---

**REASON FOR POLICY**

Minnesota law requires the University to have a course numbering convention to distinguish remedial, lower division, upper division, and graduate level coursework. Consistent use of the course numbering system helps students select and sequence their courses and helps those who view a student’s transcript to identify the level of courses that appear on the transcript.

---

**PROCEDURES**

There are no procedures associated with this policy.

---

**FORMS/INSTRUCTIONS**

There are no forms associated with this policy.

---

**APPENDICES**

- [Course Numbering System](#)

---

**FREQUENTLY ASKED QUESTIONS**

**What are suffixes and how can they be used?**
Suffixes help identify certain characteristics of courses. Currently three suffixes are used: W (for writing intensive courses); H (for honors courses); and V (for courses that are both honors and writing intensive).

**DEFINITIONS**

**Directed Research**
An opportunity in which a student designs and carries out a research project under the direction of a faculty member. Directed research may be taken for variable credit and special permission is needed for enrollment.

**Directed Study**
A course in which a student designs and carries out an independent project under the direction of a faculty member. Directed study courses may be taken for variable credit and special permission is needed for enrollment.

**Independent Study**

A course in which a student enrolls in an established course but studies independently under an instructor’s guidance rather than attending class. Independent study courses may be taken for variable credit and special permission is needed for enrollment.

**Remedial**

Remedial courses are intended to correct or improve deficient skills and knowledge in a specific subject. 0xxx courses are remedial courses that do not carry credit.

**RESPONSIBILITIES**

There are no specified responsibilities associated with this policy.

**RELATED INFORMATION**

- Administrative Policy: [Academic Unit Authority over the Curriculum and Major](#)
- Administrative Policy: [Application of Graduate Credits to Degree Requirements](#)

**HISTORY**

**Amended:**
May 2016 - Comprehensive Review. Minor Revision. Language now aligns with Administrative Policy: [Application of Graduate Credits to Degree Requirements](#). Removes language that pertained to the old Graduate School structure.

December 2009 - Policy now applies to Crookston.

**Effective:**
April 2009
POLICY STATEMENT

This policy governs the credit requirements for the following degrees:

- Master’s Plan A degrees
- Master’s Plan B degrees
- Master’s Plan C degrees
- Doctoral degrees

Credit requirements for master’s degrees

1. Master’s degrees must consist of the following minimum credits:
   a. Plan A degrees: 10 master’s thesis credits (xxxx8777) and a minimum of 20 graduate-level course credits.
   b. Plan B degrees: a minimum of 30 graduate-level course credits, including Plan B Project credits as defined by each program and approved by the college.
   c. Plan C degrees: a minimum of 30 graduate-level course credits.

2. No collegiate unit or program may require more than:
   a. 36 credits with a combination of course and thesis for a master’s Plan A
   b. 36 credits with a combination of course and Plan B project credits for a master’s Plan B, and
   c. 48 course credits for a master’s Plan C.

3. Master’s thesis credits (xxxx8777) may be taken for the master’s Plan A at any time during a student’s degree program.

4. A minimum of 6 graduate-level course credits is required for a master’s level minor.

Credit requirements for doctoral degrees

1. Doctoral degrees must consist of a minimum of 48 credits: a minimum of 24 graduate-level course credits and a minimum of 24 doctoral thesis credits (xxxx888).

2. No collegiate unit or program may require more than 72 credits with a combination of course and doctoral thesis credits (xxxx8888) for the completion of the doctoral degree.

3. Programs have the discretion, with college approval, to determine when it is academically appropriate for students to take doctoral thesis credits (xxxx8888).

4. A minimum of 12 graduate-level course credits is required for a doctoral level minor.
Exceptions
Collegiate deans or the appropriate campus Vice Chancellor may request exceptions from the Executive Vice President and Provost to items 1b and 2b based on accreditation requirements, national standards of the field, interdisciplinary nature of the program or similar arguments. Collegiate deans or the appropriate campus Vice Chancellor may petition the Provost for an exception to the 24 doctoral thesis-credit (xxxx8888) minimum in item 2a on behalf of doctoral programs that do not require dissertations. The petition should show that the exception conforms to national standards in the field and that appropriate additional credits (course credits, internships, project credits, etc.) will replace the 24 doctoral thesis credits (xxxx8888).

REASON FOR POLICY

This policy establishes the minimum and maximum credit requirements for Master’s Plan A, B, and C degrees and for Doctoral degrees. It provides a framework for curriculum development that balances coursework, research training, and independent scholarly work.

PROCEDURES

- Early Doctoral Thesis Credit Registration Option

FORMS/INSTRUCTIONS

- UM 1760 - Request for Exception to the Maximum Requirements for Master's and Doctoral Degrees

DEFINITIONS

Graduate-level Course Credits
Graduate-level course credits That are primarily numbered as 5xxx or above, excluding thesis credits. Graduate programs may choose to allow 4xxx-level course credits to be applied toward a graduate degree, up to the limit specified in Administrative Policy: Application of Graduate Credits to Degree Requirements.
Plan B Project Credits
Credits taken by the students in relation to their Plan B project as part of the degree requirements.

Thesis Credits
Credits taken by students in relation to their research work as part of the degree requirements. These include: xxxx-8777 (master's thesis credits) and xxxx-888 (doctoral thesis credits).

RESPONSIBILITIES

Colleges and Programs
Restructure program requirements to conform to this policy by the effective date. Request exceptions from the Executive Vice President and Provost to items 1b and 2b based on accreditation requirements, national standards of the field, interdisciplinary nature of the program or similar arguments.

RELATED INFORMATION

There is no Related Information associated with this policy.

HISTORY

Amended:
June 2015 - Comprehensive Review, Minor Revision: The changes provide greater clarity around the specific type of credits. Removed the effective date of the policy statement, which was inserted when this policy was first created.

Effective:
September 2011 - New Policy, Comprehensive Review. Establishes the minimum and maximum credit requirements for Master's Plan A, B, and C degrees and for Doctoral degrees. Provides a framework for curriculum development that balances coursework, research training, and independent scholarly work. Eliminates the requirement for outside coursework in view of the trend towards interdisciplinary curricula within many programs. Programs are given the option to require a minor or supporting program where warranted by educational objectives. Outlines a process by which collegiate deans may request exceptions.
POLICY STATEMENT

Directed study, directed readings, and directed research courses are opportunities for students to work individually with a faculty member and to earn credit for individually designed content.

1. Departments, colleges and campuses who wish to offer these types of courses must specify:
   a. the levels for these directed courses within their curricula;
   b. the criteria for registration for these courses; and
   c. the criteria that are used to determine who is eligible to teach these courses.

2. Colleges and campuses must establish and publish procedures for registration in directed study, directed research, and directed readings courses.

3. The instructor of a course and the student must have a written contract in place that specifies the student’s responsibilities for the courses and the name of the instructor who is responsible for turning in the student’s grade for the course, as part of the enrollment in the course. Instructors must provide a copy of the contract to the academic department in which the registration for the course occurs.

4. These courses do not require a syllabus.

5. The instructor must set the number of credits for these courses in accordance with the provisions of Administrative Policy: Expected Student Academic Work per Credit: Twin Cities, Crookston, Morris, Rochester so that the academic workload requirements are in conformance (generally 3 hours of work per week per credit for undergraduate students and more than that for graduate and professional students).

6. Programs may limit the number of directed study, directed readings, and directed studies courses a student may take per term.

Exclusions
This policy is not applicable to the Duluth campus.

REASON FOR POLICY
Uniformity of expectations across directed study, readings and research opportunities is in the best interest of students, faculty and staff.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

DEFINITIONS

Directed Research
An opportunity in which a student designs and carries out a research project under the direction of a faculty member. Directed research may be taken for variable credit and special permission is needed for enrollment.

Directed Study
A course in which a student designs and carries out an independent project under the direction of a faculty member. Directed study courses may be taken for variable credit and special permission is needed for enrollment.

Directed Readings
A course in which a student designs an area of study under the direction of a faculty member. Directed readings may be taken for variable credit and special permission is needed for enrollment.

RESPONSIBILITIES
Instructor

- Review and approve the contract a student has created for a courseruse. Work with the student to revise the contract, as needed, before approval.
- Supervise the student’s work in such a course.
- Submit final grade at the end of the course.

Student

- Obtain permission to enroll in the course and register for the course.
- Complete the responsibilities of the course, as specified in the contract.
- Maintain regular contact with the instructor.

Academic Unit

- Maintain records of such courses, including the individual contracts for each occurrence.
- Maintain oversight of curriculum and instructor workload.

RELATED INFORMATION

- Administrative Policy: Expected Student Academic Work per Credit: Twin Cities, Crookston, Morris, Rochester
- Administrative Policy: Academic Unit Authority Over the Curriculum and the Major: Twin Cities, Crookston, Morris, Rochester

HISTORY

Amended: October 2015 - Comprehensive Review, Major Revision. 1. Requires instructors to file a copy of the contract associated with these courses, to be on file in the academic department offering the course. 2. Requires departments, colleges, and campuses to specify the criteria for both eligibility and registration into these courses. 3. Allows departments to establish limits to the number of these types of courses that a student may take. 4. Specifies the responsibilities for the instructor, student, and academic unit.

Amended: December 2009 - Policy now applies to Crookston.

Effective: April 2009

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

This policy sets the standards for the doctoral final oral examination and the submission of the final copy of the doctoral dissertation for the completion of the doctoral degree.

I. The Doctoral Final Oral Examination

a. The doctoral final oral committee must consist of at least four members, including the advisor(s). All members of the committee and the candidate must participate in the final oral examination. Committee members and/or the student may participate remotely as long as all conditions for remote participation in the examination are met.
   i. At least three members (including the advisor) must be from the student's major field.
   ii. At least one member must represent a field outside the major. If the student has declared a minor, the outside member, or one of the outside members, must represent the minor field.
   iii. Members cannot satisfy the requirement with respect to more than one field.
   iv. The chair of the committee must not be the candidate's advisor or co-advisor.
   v. At least two members of the committee must be tenured or tenure-track University faculty members who hold earned doctorate degrees or designated equivalents in appropriate fields from an accredited institution. At least one of the committee members must be a tenured University faculty member.
   vi. Collegiate deans or their designated representatives at the collegiate level must verify eligibility and approve the members of the final oral examination committee.

b. Thesis Reviewers for final oral examination:
   i. A minimum of 2 major field reviewers and 1 minor/outside reviewer are required. In the case of multiple minors, there must be a reviewer for each minor.
   ii. Advisor(s) and co-advisor(s) must serve as reviewers.
   iii. Students must provide reviewers with a copy of the dissertation at least 14 days before the scheduled date of the doctoral final oral examination.
   iv. Every designated reviewer on the doctoral dissertation reviewer's report must certify that the dissertation is ready for defense before the doctoral final oral examination may take place.

c. The doctoral final oral examination must include:
   i. A public presentation of the candidate’s dissertation to the doctoral final oral examination committee and the invited scholarly community.
   ii. A closed session (open only to the doctoral final oral examination committee and the candidate) immediately following the public presentation.

d. To be recommended for the award of the doctoral degree, all committee members, or all committee members save one, must vote that the student has passed the doctoral final oral examination.
e. Students are not allowed to retake the final oral examination.

II. Submission of final copy of the doctoral dissertation

a. Committee members must notify the candidate in writing of all required revisions to the doctoral dissertation as well as specifying a time limit for the submission of the revised doctoral dissertation within seven (7) days of the final oral examination.

b. All students who complete a doctoral dissertation must file a digital copy of the dissertation with the University in accordance with University standards. Students may choose whether or not to request an embargo of the publication of the dissertation for a limited period of time.

Exceptions

Doctoral programs with approved completion requirements that do not include a final oral examination are exempt from I.

Doctoral programs with approved completion requirements that do not include a doctoral dissertation are exempt from II.

Effective Date

This policy applies to all students admitted after January 1, 2013. Students who matriculated before January 1, 2013 may choose to continue under the policies in effect when they initially matriculated in their graduate program.

This policy does not apply to the J.D., M.D., Pharm.D., D.V.M., D.D.S, L.L.M degrees.

REASON FOR POLICY

This policy establishes uniform standards for the doctoral final oral examination; defines timely submission of copies of the dissertation for University archives, and supports Board of Regents Policy: Openness in Research which covers public dissemination of University-sponsored research.

PROCEDURES

- Canceling or Recessing the Doctoral Preliminary and/or Master's or Doctoral Final Oral Examination
- Degree Completion Procedures

FORMS/INSTRUCTIONS

DEFINITIONS

There are no definitions associated with this policy.

RESPONSIBILITIES

Graduate School

• Provide guidelines for formatting and submitting the dissertation, to include not only current instructions for electronic formatting and filing but also guidelines governing the use of already published material in the dissertation. Guidelines should take account of possible copyright issues.

Collegiate Units

• Approve and archive in the system of record committee membership (including any subsequent changes to an approved committee).
• Approve and record the specific procedures used by programs for administering and grading the doctoral preliminary and final examinations.
• Maintain and publish any additional collegiate-level publishing standards or guidelines (e.g., stylistic conventions based on discipline, language of the thesis).

Programs

• Provide program-specific information in the graduate handbook
• Maintain and publish any additional program-level publishing standards or guidelines (e.g., stylistic conventions based on discipline, language of the thesis).
• Review and approve committee membership (including any subsequent changes to an approved committee); route program-approved requests to the collegiate unit for approval.

Students

• Must meet all standards for the doctoral final oral examination
• Must meet the formatting requirements for the submission of the final doctoral dissertation.
• Must meet all requirements for completing the doctoral degree.

RELATED INFORMATION

• Administrative Policy: Eligibility to Serve on Graduate Examination Committees
• Administrative Policy: Doctoral Degree: Performance Standards and Progress
• Administrative Policy: Admission for Master’s and Doctoral Degrees
• Administrative Policy: Readmission or Changes to Master’s or Doctoral Degree Objectives
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

This policy sets minimum standards for doctoral students to maintain academic good standing and satisfactory progress in their degree programs, and establishes requirements and procedures for the administration and evaluation of doctoral written and oral preliminary examinations. Programs and collegiate units may have additional and/or more stringent requirements.

I. Requirements Upon Matriculation

a. Students are responsible for knowing all program requirements of their doctoral program when they matriculate.

b. Upon matriculation, programs must:
   i. Provide each student a current graduate program handbook, specifying the program’s requirements and policies governing successful degree completion.
   ii. Assign each student a temporary advisor.

II. Progress Review

a. Annual Review
   i. Programs must have a procedure to review the progress of each doctoral student at least once a year and must provide the results to the student in writing.

b. Degree Plan
   i. Doctoral students must have an approved degree plan on file with their collegiate unit prior to taking the preliminary oral exam. It is recommended that the degree plan be filed a minimum of three months prior to the exam date.
   ii. If a student intends to complete a minor, the minor must be declared on the degree plan prior to taking the preliminary oral exam.
   iii. The degree plan must be centrally archived in the system of record.

III. Performance Standards

a. Continuous Enrollment Students are required to enroll every semester (fall and spring) from the time of matriculation until degree conferral except for cases with an approved Leave of Absence on the student’s record.

b. Time Limit for Earning the Doctoral Degree All requirements for the doctoral degree must be completed and the degree awarded within eight calendar years after initial enrollment to the graduate program or the more restrictive time frame specified by the program.
i. Students who are unable to complete the degree within the time limits described above may, with the approval of their advisor/s and program DGS, petition the program and collegiate unit for one extension of up to 24 months. Students must submit the petition for an extension prior to the end of the term in which the time limit will expire.

- If a petition is approved, the student is notified in writing of the expectations for progress and of the expected timeline for completion and award of degree.
- If the petition is denied, the student is notified in writing that the student will be terminated from the doctoral program.

ii. Under extraordinary circumstances, students may file a second petition for an additional extension of up to 24 months; however such petitions after the initial extension must be reviewed and approved by the student's advisor/s, program DGS, and Vice Provost and Dean of Graduate Education. Students must submit the petition for an extension prior to the end of the term in which the initial extension will expire.

a. If a petition is approved, the student is notified in writing of the expectations for progress and of the expected timeline for completion and award of degree

b. If the petition is denied, the student is notified in writing that the student will be terminated from the doctoral program

iii. Students who have been terminated under such circumstances may apply for readmission to the program; however, readmission is not guaranteed.

c. **Minimum Grade Requirements** To remain in good academic standing students must meet the minimum GPA requirement specified by the graduate program or 3.000 (on a 4.000 scale) for courses being applied toward program requirements, whichever is higher. Students who have filed a doctoral degree plan must maintain a 3.000 GPA for courses included on the degree plan. Only courses with grades of A, B, C (including C-) and S may be counted toward the degree. Students who fall below the program’s minimum GPA requirement may be terminated from the program.

d. **S/N grades for courses** A minimum of 2/3 of the course credits included on a degree plan must be taken A/F.

### IV. Doctoral Preliminary Written and Oral Examinations

a. Every doctoral student must pass a written examination in the major field.

i. Students must be notified in writing whether or not they have passed the written examination requirement(s).

ii. Programs must record whether the student has met the written examination requirement(s) in the central system of record. Students who are reported to have failed to meet the written examination requirement(s) will be terminated from the doctoral program.

b. Every doctoral student must pass a preliminary oral examination in the major field. The preliminary oral examination is conducted as a closed examination, attended by only the student and the examining committee.

i. The oral examination may not take place before the program has certified that the candidate has passed all written examination requirement(s).

ii. The doctoral preliminary oral examination will be graded either pass, pass with reservations, or fail.

iii. If a student fails the exam, the student may retake the examination once, if all committee members, or all committee members save one, approve this option on the Doctoral Preliminary Oral Examination form.

iv. The second attempt to pass the preliminary oral examination must use the same committee members unless an extraordinary or emergency situation necessitates a substitution.

v. If the committee does not approve a retake, or if the student fails the second attempt, the student will be terminated from the doctoral program.

c. The doctoral preliminary oral committee must consist of at least four members, including the student’s advisor/s. All members appointed to the committee must meet the minimum standards established by the program and college. All members of the committee and the candidate must participate in the preliminary oral examination. Committee members and/or the student may participate remotely as long as all conditions for remote participation in the examination are met.

i. At least three members (including the advisor) must be from the student's major field.

ii. At least one member must represent a field outside the major. If the student has declared a minor, the outside member, or one of the outside members, must represent the minor field.

iii. Members cannot satisfy the requirement with respect to more than one field.
d. Collegiate deans or their designated representatives at the collegiate level must verify eligibility and approve the members of the preliminary oral examination committee.

e. Voting Requirements for the Doctoral Preliminary Oral Examination:

a. At the end of the closed examination, the candidate is excused from the room and an independent, non-binding vote is taken before discussion of the examination begins. This initial non-binding vote is intended to represent the independent assessment of each committee member of the student’s performance free from undue influence of other committee members. Following discussion, a final vote is taken and is recorded on the examination form.

b. The outcome of the preliminary oral examination is recorded in one of three ways: pass, pass with reservations, or fail. The voting proportions necessary to pass the exam are shown in the table below:

<table>
<thead>
<tr>
<th>Number of committee members</th>
<th>Minimum number of votes needed to pass (A vote to pass with reservations constitutes a passing vote)*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Four</td>
<td>Three</td>
</tr>
<tr>
<td>Five</td>
<td>Four</td>
</tr>
<tr>
<td>Six</td>
<td>Four</td>
</tr>
<tr>
<td>Seven</td>
<td>Five</td>
</tr>
</tbody>
</table>

*The outcome is recorded as “pass with reservations” in situations where to achieve the minimum number of votes to reach a verdict of pass, any vote of pass with reservations is included. For example, on a four-person committee, if there is one “pass with reservations” vote and three pass votes, the result is pass. If there is one “pass with reservations” vote, one fail, and two pass votes, the result is pass with reservations.

c. Students who do not earn the minimum number of passing votes fail the examination. A vote to pass the student with reservations still constitutes a passing vote.

Exceptions

Programs with a distinctive student population or approved joint-degree programs may request a program-wide exception to the eight-year time limit for earning the doctoral degree.

Doctoral programs with approved degree performance standards and progress requirements that do not require preliminary written and oral examinations are exempt from IV.

This policy does not apply to the J.D., M.D., Pharm.D., D.V.M., D.D.S, L.L.M. degrees.

Effective Date

This policy applies to all students admitted after January 1, 2013. Students who matriculated before January 1, 2013 may choose to continue under the policies in effect when they initially matriculated in their graduate program.

REASON FOR POLICY

This policy creates the framework for communications to students about degree requirements and degree progress expectations; sets minimum standards for satisfactory progress in doctoral programs; establishes standards and procedures for administering and grading doctoral written and oral preliminary examinations. This policy establishes uniform procedures for doctoral preliminary examinations.

The policy also assists the student and advisor in planning for timely completion of program requirements, provides timely evaluations to students as they proceed through program; alerts student and advisors to problems, and provides the opportunity to develop best approaches for addressing those problems; and creates a clear record in cases where a program decides to terminate student from the doctoral program.

DEFINITIONS

**Good standing/good academic standing**
Students remain in good standing if they: (a) make timely progress towards degree completion as required by the program and by this policy; (b) maintain a GPA at or above the minimum set by the program and by this policy; and (c) pass all appropriate examinations within the time frame specified by the program.

RESPONSIBILITIES

**Collegiate Units**
- Ensure appropriate review of coursework on the degree plan (including any subsequent changes to an approved degree plan).
- Approve committee membership (including any subsequent changes to an approved committee).
- Approve the specific procedures used by programs for administering and evaluating the doctoral preliminary and final examinations.
• Review and approve program-wide requests for exceptions to the time limit for completing the doctoral degree.
• Review and approve student requests for extensions to the time limit for completing the doctoral degree.

Departments/Programs

• Clearly state the program requirements for maintaining good standing in the Graduate Program Handbook, even if they are identical to the requirements in this policy.
• Establish procedures to review all doctoral students at least once a year and provide the results in writing to the students.
• Review and approve the coursework on the student's degree plan (including any subsequent changes to an approved degree plan).
• Review and approve committee membership (including any subsequent changes to an approved committee); route program-approved requests to the collegiate unit for approval.
• The DGS is responsible for ensuring that each doctoral student receives training appropriate to the discipline in the responsible conduct of research and ethical teaching and scholarship.
• Review and approve requests for extensions to the time limit for completing the doctoral degree; notify students in writing of the decision and subsequent actions (i.e., expectations for progress and for the month/year of degree conferral or termination from the program upon expiration of the limit).

Students

• Must know all program requirements when matriculated.
• If program requirements change, students may elect to continue under the requirements in effect when they matriculated, provided they have remained in good standing.
• Must obtain the required approvals and file the degree plan with the program and collegiate unit.
• Must initiate the request for an extension to the maximum time limit for completing the doctoral degree, obtain the approval of their advisor/s and program DGS, and submit their request by the deadline.

RELATED INFORMATION

• Administrative Policy: Admission for Master's and Doctoral Degrees
• Administrative Policy: Eligibility to Serve on Graduate Examination Committees
• Administrative Policy: Doctoral Degree: Completion
• Administrative Policy: Leave of Absence and Reinstatement from a Leave: Graduate Students
• Administrative Policy: Readmission or Changes to Master's or Doctoral Degree Objectives

HISTORY

Amended:
June 2017 - Comprehensive Review, Minor Revision. 1) Rewrote introduction to clarify the goal of the policy and distinguish from unrelated policies, 2) Added Leave of Absence language, 3) Clarified language related to conditions that necessarily result in discontinuation from program, 3) Clarified language regarding grading requirements for preliminary examination, removing pass with reservations when recording the final result of the prelim exam, 4) moved language on voting requirements for the prelim from an appendix to the body of the policy. Changes in policy respond to need for greater clarity on policy intent on the part of affected constituencies and enhanced consistency in policy implementation across programs.

Effective:
July 2012 - New Policy, Comprehensive Review. 1. Changes the beginning and ending points for calculating time to degree. Time is currently measured from the conclusion of the oral prelims, to defense of the thesis. This policy measures time to degree from enrollment in the doctoral program to the point at which the degree is awarded. 2. Establishes a minimum GPA for students to remain in good standing (3.0 for doctoral students.) 3. Extends applicability of policy requirements to programs not formerly under the aegis of the Graduate School.
investigate the matter, or submit a report to UReport.
POLICY STATEMENT

General Provisions
The principal criterion for the choice of any required materials for a course or program should be that the materials are the most appropriate for the purpose. The instructor who has been assigned responsibility for the course or program, in most cases, identifies what materials are required for the course. The process for selecting course materials must avoid conflict of interest or the appearance of conflict of interest.

Generally, no member of the instructional staff of the University may personally profit from the assignment of materials, or assignment of the venue of purchase of materials, to students in classes or any other instructional setting at the University. If the faculty member responsible for a course or program judges that the best materials available for use with the course are materials whose sale will provide them personal income, the faculty member must receive approval from the head of the academic unit.

Review and Approval
The instructional staff member must justify the requirement to use the materials in the course in their request for approval to the head of the academic unit.

The head of the academic unit should judge the request solely on the academic merit of the materials. The decision to approve the request should typically include a consultative step with faculty peers knowledgeable about the use of the materials. If the head of the academic unit is also involved in the use of these materials, the dean of the college must give the written approval.

The approval, if given, will apply to all offerings of the course for which the affected individual is responsible during the twelve-month period following the approval date.

If the individual wishes to assign the same materials, or other materials created by that individual for courses occurring after the twelve-month period lapses, a new request for approval must be submitted to the head of the academic unit.

Documentation
The unit must retain the request and the subsequent decision, as well as file a copy of the record of the approval with the dean of the college.

Exclusions
This policy is not applicable to the Duluth campus.
**REASON FOR POLICY**

To manage conflict of interest concerns, persons teaching courses may not by themselves make the decision to assign course materials for which they could personally earn a profit. Requiring approval from a higher level provides appropriate internal controls.

**PROCEDURES**

There are no procedures associated with this policy.

**FORMS/INSTRUCTIONS**

There are no forms associated with this policy.

**APPENDICES**

There are no appendices associated with this policy.

**FREQUENTLY ASKED QUESTIONS**

1. What is meant by ‘materials’?
   Materials refers to anything that may have been developed by or be the intellectual property of an instructor, including but not limited to textbooks, reading packets or materials, models, computer programs, artwork, etc.

**DEFINITIONS**

**Instructional Staff**
Faculty, including adjunct faculty; graduate teaching assistants; and all other individuals assigned to provide instruction in a course.

**RESPONSIBILITIES**

**Instructional staff**
Identify materials required for the course.
Submit a formal request to the department head, requesting permission use any materials in the course from which the individual will personally profit. Provide justification for the selection of those materials as part of the request.

**Academic Unit Head**
- Review the academic merit of the materials, and consult with faculty peers.
- Provide a formal response to the request.
- Retain a copy of the record of the decision in the academic unit files.
- File a copy of the decision with the collegiate dean’s office.
- Monitor compliance and provide information about this policy to instructional staff.

**Academic Dean**
Review and render decisions on requests, if the individual providing the instruction in the course is an academic department head.

---

**RELATED INFORMATION**

Administrative Policy: *Individual Conflicts of Interest*

---

**HISTORY**

**Amended**
February 2016 - Comprehensive Review. Minor Revision. Changes clarifies the documentation expectations when approval is given to use materials in a course that were created by that instructor, and specifies that a one-up approval is required when the head of the administrative unit is involved in the use of the materials.

**Amended:**
December 2009 - Policy now applies to Crookston.

**Effective:**
April 2009
POLICY STATEMENT

This policy governs who is eligible to serve on master's final examination committees and doctoral preliminary oral and final oral examination committees in the following roles:

- Advisor
- Chair
- Committee member
- Reviewer

I. Eligibility to Serve on Graduate Examination Committees

a. Any University tenured or tenure-track faculty member who holds an earned doctorate or designated equivalent in an appropriate field from an accredited institution is eligible to serve in any role on master's final, doctoral preliminary oral, and doctoral final oral examination committees.

b. Other University faculty (including adjunct, term, or contract faculty) who hold an earned doctorate or designated equivalent in an appropriate field from an accredited institution but who do not hold a tenured or tenure-track appointment are eligible to serve in any role on master's final, doctoral preliminary oral, and doctoral final oral examination committees.

c. Emeritus faculty and tenured or non-tenured faculty who have left the University are eligible to continue with all examination committee assignments that were approved and active at the time of their departure, if the faculty member and the student both agree to the continuation in writing.

d. Academic staff who hold an earned doctorate or designated equivalent in an appropriate field from an accredited institution but who do not hold any faculty appointment (tenured, tenure-track, adjunct, term, or contract) are eligible to serve in any role on master's final examination committees. They are also eligible to serve on doctoral preliminary oral and doctoral final oral examination committees except in the roles of advisor or chair.

e. Experts outside of the University who do not hold any faculty appointments (adjunct, term, or contract) at the University are eligible to serve on master's final examination committees, doctoral preliminary oral and doctoral final oral examination committees except in the roles of advisor or chair. All appointments of outside experts to graduate examination committees must be reviewed at the collegiate level according to a review process and criteria specified by the collegiate unit.

f. Individuals having a nonacademic relationship with the student are not eligible to serve on that student's examination committee.

g. Individuals working toward a graduate degree at the University are not eligible to serve on any examination committees unless an exception has been granted by the Vice Provost and Dean of Graduate...
II. Assignment of Graduate Examination Committee Roles

a. Graduate programs must assign roles to individuals serving on graduate examination committees subject to collegiate level approval according to a review process and criteria specified by the collegiate unit.

b. Collegiate deans or their designated representatives must review for approval all assignments as advisor.

III. Exceptions

---

REASON FOR POLICY

To ensure quality, consistency, and fairness in standards and practices for final examinations of master’s candidates and preliminary and final examinations of doctoral candidates.

---

PROCEDURES

There are no procedures associated with this policy.

---

DEFINITIONS

**Designated equivalent**
A terminal post-baccalaureate degree qualifying the recipient to teach at the university level in their field. Example: MFA.

**Nonacademic relationship**
A personal relationship OR a financial relationship not connected with the student's academic program.
RESPONSIBILITIES

Collegiate Units
- Maintain a set of publicly available standards, processes, and forms for appointments to all roles on graduate examination committees with special attention to requirements for advisors and for chairs of the doctoral examination committees.
- Review and approve all assignments as adviser (including co-advisors).
- Review and approve all examination committee assignments.

Graduate Programs
- Programs are responsible for maintaining a current list of individuals with Graduate Education Responsibilities (GER) and updating the Faculty Role List Database.

HISTORY

Amended:
Comprehensive Review, Minor Revision: 1. Revised the title of the policy to reflect its purpose more clearly. 2. Clarified the goal of this policy relative to other related policies and moved elements of the policy into related policies. 3. Simplified and organized the criteria with regards to the roles on each type of committee and the criteria to be eligible to serve in each role. Created an appendix table to summarize the policy. 4. Reviewed the roles of outside experts as advisors and chairs of graduate examination committees. 5. Discussed development of a policy with regards to reinstating a “Graduate Faculty” at the central level.

Effective:
February 2011

University Policy Program
140 McNamara Alumni Center, Minneapolis, MN 55455 - P: 612-624-8081

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
Enrolling in Overlapping or Back-to-back Classes: Twin Cities, Crookston, Morris, Rochester

**POLICY STATEMENT**

Enrolling in overlapping classes is prohibited so students can actually attend the classes in which they enroll. For Twin Cities campus students, back-to-back classes with insufficient travel time may lead them to consistently arrive late or to depart early, which can disrupt a class and cause the student to miss instruction. Students are responsible for planning a schedule that allows enough time for travel between classes. Instructors may accommodate student-scheduling problems but are not required to do so.

1. **Overlapping class times**
   a. Classes that have any common meeting time are considered to be overlapping.
   b. Students are not permitted to register for classes that overlap unless they successfully petition for permission to do so.
   c. Petitions for overrides for such conflicts require the approval of all instructors involved. The decision to approve or disapprove such a petition for override is discretionary with each instructor involved, but petitions should be granted only under extenuating circumstances.

2. **Enrollment in back-to-back classes** [Twin Cities only]
   a. Students should not enroll in back-to-back classes when (1) the amount of time available for travel is less than 15 minutes (when both are on either the Minneapolis or St. Paul campus), or (2) the amount of time available to travel between two classes (when one is on the Minneapolis campus and the other on the St. Paul campus) is less than 30 minutes.
   b. Petitions for protection from penalties for such conflicts require the approval of all instructors involved and will be approved only under extenuating circumstances. The decision to approve or disapprove such a petition for override is discretionary with each instructor involved.
   c. If the student's petition has not been approved, instructors have the authority to penalize students who consistently arrive late or depart early from a class.

**Exclusions**

This policy is not applicable to the Duluth campus.

**REASON FOR POLICY**

Students consistently arriving late for a class or departing early can disrupt the teaching and learning process. Instructors must understand that they may accommodate student-scheduling problems but are not required to do so.
PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

- OTR024 - Class Time Conflict Approval (electronic) (Restricted Access)
  - Online Class Time Approval (login required)

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

1. How do students obtain permission to enroll in back-to-back courses?
   Students who wish to enroll in back-to-back courses (or those with overlapping times) must complete the "Course Time Conflict Approval" form. Completing the form requires the signature of both instructors involved in a course time conflict. Without written permission, students will not be allowed to register for courses that are separated by less than one minute or overlap in the time they are offered. Verbal permission will not allow the student to register.

RESPONSIBILITIES

There are no specific responsibilities associated with this policy.

RELATED INFORMATION
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.

**HISTORY**

**Amended:**
December 2009 - Policy now applies to Crookston.

**Effective:**
April 2009
POLICY STATEMENT

1. Departments and colleges should be selective in determining prerequisites for courses. Prerequisites should not be set for a course except in progressive, sequence courses or where departments can clearly demonstrate that a student will not be able to complete the course successfully without first completing the prerequisite course work.

2. Where prerequisites have been set, catalogues and course materials must list them and advise students to take only those courses for which the prerequisites have been met.

3. Where prerequisites have been set, instructors may require that any student who has not taken the specified prerequisites for the course must withdraw. Instructors may, however, grant permission, on an individual basis, for a student to take a course without having taken the prerequisite(s).

4. When a student successfully completes a prerequisite course after successfully completing a subsequent course that required the prerequisite, credit for the prerequisite course will be granted. Colleges and departments, at their discretion, may also allow students to receive credit by examination for the prerequisite course.

Exclusions
This policy is not applicable to the Duluth campuses.

REASON FOR POLICY

Prerequisites inform students that, in order to be successful in a particular course, they must enter the course already having attained specific knowledge as a necessary background. Prerequisites provide a process for directing students to courses for which the students are adequately prepared. This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.

PROCEDURES

There are no procedures related to this policy.
FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices related to this policy.

Prerequisite
A course that is a necessary requirement before subsequent advanced courses.

RESPONSIBILITIES

There are no specified responsibilities related to this policy.

RELATED INFORMATION

- Higher Learning Commission, Criteria and Requirements for Accreditation

HISTORY

Amended:  
September 2014 - Clarifications related to Higher Learning Commission accreditation requirements

Amended:  
December 2009 - Policy now applies to Crookston.

Effective:  
April 2009
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

Evaluation of teaching provides information (1) to help improve teaching, (2) to be used for faculty tenure decisions and salary and promotion decisions based on merit, and (3) to assist students in course selection. The methods used are:

- Student ratings of teaching
- Peer evaluations

A. General Provisions for Evaluation of Teaching

1. All instructors, regardless of their academic rank or tenure status, will have their teaching performance evaluated.
2. The process for evaluating teaching used in tenure and promotion decisions must follow Board of Regents Policy: Faculty Tenure.
3. Student rating data, including the response rates for the data, may be used in personnel decisions for faculty and instructional staff whose salary is fully or partially based on teaching, (e.g., merit and salary reviews, promotion, tenure for tenure-track faculty).
   - The results must be shared with the instructor being reviewed.
   - Only those individuals who are responsible for decisions on reappointment, promotion, tenure, and salary adjustments may have access to information about a specific instructor.
   - Instructors are allowed to respond to student rating results by adding written comments to their files that are communicated to individuals responsible for personnel decisions.
4. When used for salary, promotion, and tenure decisions, information from student ratings should be used in conjunction with other relevant metrics to assess instructional effectiveness.
5. The academic unit must maintain a record of the instructor's contributions to teaching, including cumulative summaries of student ratings of the instructor's courses. Units must protect the materials as private data.
6. To assist students in course selection, students may view Student Rating of Teaching responses that pertain to a course and not to a specific individual. (This provision does not apply to the Crookston campus)
7. Student rating data should be used with other types of information to identify instructors who deserve rewards as well as instructors who may need assistance in improving their classroom effectiveness. When used for salary, promotion, and tenure decisions, these data should be used in conjunction with other relevant metrics.
8. Custom Items
Colleges and departments may, after consultation with, and approval from, the vice provost for faculty and academic affairs, add custom items to the Student Rating of Teaching form. If custom items are added by a department or college, that unit will make available to instructors a written policy that defines which data from the custom items will be used (1) for improvement of teaching, (2) for personnel decisions, and (3) for improving courses or programs.
- Data used solely for teaching improvement will be provided only to the instructor.
- Data to be used for personnel decisions will be available to individuals charged with reviewing instructor performance.
- Data to be used for course and program improvement will be available to curriculum committees and similar bodies only in aggregated form and will not be identified with individual instructors. In all instances, the data will be provided to the instructor.

B. Student Rating of Teaching Form and Requirements
1. Every course with a University course number will be rated by the use of student rating forms every time it is offered, except that thesis-only credits, directed or independent study, and internships will not be rated using such forms. For courses with one instructor but multiple components (e.g., lab, lecture, recitation, etc.), departments have the discretion to evaluate the components separately. For courses with multiple components, each taught by a different instructor, each component should be evaluated separately.
2. The standard student rating form (see Appendix X) will be used except that:
   - In courses with more than two instructors, departments and/or colleges that wish to use alternative evaluation procedures must seek written approval from the Senate Committee on Educational Policy (SCEP).
   - Academic units in which student evaluation procedures must meet national accreditation standards may use alternative evaluation procedures with written approval from SCEP.
3. All students present when the evaluation is conducted, or all students enrolled in online courses, must be provided the student rating form. Completed forms will be submitted anonymously. Students, regardless of the rating protocol or method used, have the option to:
   a. opt-out of responding to one or more questions on the form; or
   b. opt-out of completing the entire student rating form.
4. Instructors may not be present when the evaluations are completed and collected. Instructors may only see the completed forms after their grades have been turned in.
5. Students who have withdrawn from the course may not participate in the rating of that course.
6. The dean or chancellor of each college or campus, in consultation with the faculty, will determine whether and how written comments on student evaluation forms may be used in personnel decisions. In units where all written comments on students’ ratings of teaching are sent to the chair and/or to reviewing bodies and are included in the file, unfairly prejudicial comments will be withheld from the file upon request of the instructor concerned and accordingly will not be part of annual or other reviews. The decision whether particular comments are unfairly prejudicial will be made by the chair, a senior faculty member designated through a process determined by the department, or a standing or ad-hoc committee. This provision is intended to cover offensive, racist, sexist, homophobic, and other personal comments, and is not intended to exclude from the file negative comments directly related to the course.
7. The original completed student-rating forms will be returned to the instructor with any student demographic information removed. Information from electronic forms will be made available to the instructor.

C. Peer Evaluation of Teaching
Peer review should include assessment of the instructor’s knowledge of the subject matter, general contributions to departmental teaching efforts, and any other teaching contributions. (see Appendix for best practice guidelines.)
1. Peer review process.
   a. Every academic unit should have a documented process for peer review of every instructor’s teaching efforts and contributions to teaching, both for purposes of promotion decisions and for teaching-based salary increases. The academic unit should evaluate instructors in ways appropriate to the discipline, and include consideration of activities outside the classroom such as facilitating student research, advising students, and other activities related to students’ educational programs.
The peer-review process must include consideration of any additional materials identified by the instructor as relevant to the evaluation. Instructors are encouraged to prepare and regularly update a teaching portfolio that contains materials that will be considered during their evaluation.

2. Faculty peer review.
   a. Faculty peers are responsible for evaluating teaching conducted by tenured and tenure-track faculty as outlined in Board of Regents Policy: Faculty Tenure, Administrative Policy: Faculty Compensation, and Administrative Procedure: Reviewing Candidates for Tenure and/or Promotion: Tenure-Track and Tenured Faculty.
   b. Both faculty and instructional staff may participate in the evaluation of instructors who are not tenure-track or tenured faculty.

Exclusions
This policy is not applicable to the Duluth campus.
Course-related SRT results from the Crookston campus will not be released to students.

REASON FOR POLICY
This policy establishes standards and processes for evaluating teaching: peer review and student rating of teaching for the campuses of Morris, Rochester, and the Twin Cities.
It is essential to ensuring quality of instruction and providing feedback to instructors and supervisors.

PROCEDURES
- Using Paper and Online Forms to Conduct Student Ratings

FORMS/INSTRUCTIONS
- UM 1811 - Student Rating of Teaching
Original forms (not photocopies) are required for processing. Please see your department contact or the Office of Measurement Services for forms.

APPENDICES
- Peer Review of Teaching: Best Practices

FREQUENTLY ASKED QUESTIONS
1. Are there costs associated with administering custom items on a form?
   Units should consult the Office of Measurement Services to inquire about costs associated with administering a custom form or adding custom items on the Student Rating of Teaching form.

2. Can instructors administer additional evaluation items?
   Instructors are encouraged to conduct early- and mid-semester course assessments for the purpose of receiving feedback about student learning during the term. Instructors may ask students to answer supplemental questions in the open-ended section of the standard rating form, on a separate sheet, or online. See http://z.umn.edu/earlyterm for more information about early- and mid-semester course assessments.

CONTACTS
### DEFINITIONS

There are no definitions associated with this policy.

### RESPONSIBILITIES

**Executive Vice President and Provost**
- Convey to colleges the importance of teaching in decisions regarding promotion, tenure, and merit-pay increases.
- Consult with colleges regarding custom items and exceptions to the policy.

**Deans**
- Convey the importance of teaching in decisions regarding promotion, tenure, and merit-pay increases.
- Consult with college governing bodies regarding the use of written comments in personnel decisions.

**Department Heads**
- Convey to instructors the importance of teaching in decisions regarding promotion, tenure, and merit-pay increases.
- Ensure that evaluation of teaching takes place in the unit.
- Decide whether particular written comments are unfairly prejudicial.

### RELATED INFORMATION

### HISTORY

**Amended:**
November 2015 - Policy now applies to Crookston - with minor exception: Course-related SRT results from the Crookston campus will not be released to students.

**Amended:**
January 2015 - Comprehensive Review. Minor Revision. Key policy changes: 1. Meets the student requests for information that may aid in course selection by releasing course related information from the Student Rating Tool that does not violate Minnesota State Data Privacy law. 2. Eliminates unnecessary language related to policy compliance. 3. Revises the language regarding the authority to decide whether written comments may be used for personnel decisions.
Amended:
December 2014 - 1. Meets the student requests for information that may aid in course selection by releasing course related information from the Student Rating Tool that does not violate Minnesota State Data Privacy law. 2. Eliminates unnecessary language related to policy compliance. 3. Revises the language regarding the authority to decide whether written comments may be used for personnel decisions.

Effective:
April 2009

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

Workload expectations in this policy are an estimate of the amount of work needed for an average student to earn an average grade. Course grades are based on the quality of the work submitted, not on hours of effort (as provided in Administrative Policy: Grading and Transcripts: Twin Cities, Crookston, Morris, Rochester). Workload expectations per credit do not vary with the method of delivery of the course or the length of the academic term.

A. Undergraduate Courses

1. Student workload expectations per undergraduate credit. For fall or spring semester, one credit represents, for the average University undergraduate student, three hours of academic work per week (including lectures, laboratories, recitations, discussion groups, field work, study, and so on), averaged over the semester, in order to complete the work of the course to achieve an average grade. One credit equals 42 to 45 hours of work over the course of the semester (1 credit x 3 hours of work per week x 14 or 15 weeks in a semester equals 42 to 45 hours of academic work). Thus, enrollment for 15 credits in a semester represents approximately 45 hours of work per week, on average, over the course of the semester.

2. Exceptions to undergraduate workload standard. Professional norms and the nature of the academic work may necessitate spending more than three hours of work per week on average. For example, clinical experiences, some laboratory work, and some studio activities may require more than an average three hours per week. Demands on the student in excess of the average of three hours per credit per week are permissible with college approval and with appropriate notification to the student of the amount of work expected for the course or educational experience (e.g., in class schedules, bulletins, or syllabi).

3. Student workload statement required for undergraduate courses. All proposals for undergraduate courses must include a student workload statement demonstrating how the course conforms to the student workload expectations in sections (a) and (b). College and campus curriculum committees and other approving bodies (e.g., the Council on Liberal Education) must consider the student workload statement in reaching a decision on whether to approve a proposed course.

B. Graduate School and Professional School Courses

It is expected that the academic work required of Graduate School and professional school students will exceed three hours per credit per week.

C. All Courses
1. For courses using one course number that enroll both undergraduate and graduate/professional students, workload expectations may be different for the two.
2. When a course is offered at two levels (e.g., 1xxx/3xxx or 3xxx/5xxx), workload expectations will differ for the students enrolled at different levels.
3. Instructional units should periodically review course syllabi to determine whether the number of course credits is appropriate for the expected student workload.

**Exclusions**

This policy is not applicable to the Duluth campus.

---

**REASON FOR POLICY**

Information on workload expectations assists students in understanding the necessary time to allocate for their courses. Outlining workload expectations also allows for greater consistency across the curriculum, as well as identifies areas where the expectations are not necessarily applicable due to the nature of the course being taught. This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.

---

**PROCEDURES**

There are no procedures related to this policy.

---

**FORMS/INSTRUCTIONS**

There are no forms associated with this policy.

---

**APPENDICES**

There are no appendices related to this policy.

---

**FREQUENTLY ASKED QUESTIONS**

1. **Do the student workload expectations per undergraduate credit apply to courses that are scheduled in academic terms other than the standard semester?**
   Yes. The expectation of academic work per credit established for semesters applies to all academic terms. Courses scheduled during the May session, summer session, and any other special terms have the same expectations for student workload per credit as for courses held during the typical semester. For example, a one-credit course represents approximately 42 to 45 hours of academic work, regardless of the length of the academic term.

2. **Do the student workload expectations per undergraduate credit apply to all courses, including online and distance education courses?**
   Yes. The workload expectations per credit are the same, regardless of the method of delivery of the course (for example, online, interactive video, correspondence, classroom, or a combination of delivery methods).

DEFINITIONS

Average grade
According to the policy on Grading and Transcripts, an average grade (C) represents achievement that meets the course requirements in every aspect.

RESPONSIBILITIES

There are no specific responsibilities related to this policy.

RELATED INFORMATION

- Administrative Policy: Grading and Transcripts: Twin Cities, Crookston, Morris, Rochester
- Higher Learning Commission, Criteria and Requirements for Accreditation

HISTORY

Amended:
September 2014 - Clarifications related to Higher Learning Commission accreditation requirements

Amended:
September 2011 - Comprehensive Review. Minor clarifications made to Policy Statement including that workload expectations per credit do not vary with the method of delivery of the course or the length of the academic term and added Frequently Asked Questions section.

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009

The University of Minnesota expectations for workload per credit were first adopted by the Faculty Senate on February 16, 1922.
POLICY STATEMENT

By the start of the term, every department must identify, for each course offering, the instructor responsible for the course.

1. Instructor responsibility
   a. The instructor who is in overall charge of a course offering is accountable for all grades given to students. Responsibility for grading or evaluating student work in a course may be assigned to a teaching assistant or grader but ultimate responsibility remains with the instructor for the course. All individuals who grade or evaluate student work in a course must have a formal affiliation with the course (e.g., as instructor of record, teaching assistant, paid grader).
   b. Instructors in charge of a course with multiple sections or laboratories must take reasonable steps to ensure that grading across sections or laboratories is consistent.
   c. If the instructor in charge of a course has left the institution or is no longer available, the department or academic unit has the authority to handle grades and grade changes for the course. The department or academic unit should assign a regular faculty member to be accountable for grades after the course has ended.
   d. Students in every course must be clearly informed via the syllabus or class schedule of who is ultimately responsible for assigning grades in the course.

2. Student questions about grades
   a. Students have the right to request and receive an explanation for a grade during and after the course but have no right to challenge the academic merits of any grade.
   b. Students may seek an explanation for a grade until the end of the following semester (not including summer session). The instructor is obligated to provide an explanation for a grade within a reasonable time if a request is made by the end of the following semester. The instructor is not obligated to reconsider the grade.
   c. If a student does not receive an explanation for a grade from the instructor within a reasonable time of making a request, the student may consult the director of undergraduate studies, director of graduate studies, or department chair for assistance in obtaining an explanation. Students also may seek assistance from the campus student conflict resolution office.

Exclusions
This policy is not applicable to the Duluth campus.
REASON FOR POLICY

This policy clarifies both the accountability and responsibility for assigning grades; and for responding to requests for explanations about the grades.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

DEFINITIONS

Explanation of a grade
The criteria used to formulate a grade, not an automatic change of grade.

RESPONSIBILITIES

Department
Identify an instructor for each course offering by the start of the term.

Instructor

- Inform students in class who is ultimately responsible for assigning a grade.
- Respond to grade inquiries and provide explanations upon request.
RELATED INFORMATION

There is no related information associated with this policy.

HISTORY

Amended:
November 2017 - 1. Minor edits to clarify what happens when an instructor leaves or is no longer available.

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
A. Establishment and Use of University Grading Systems

1. There are two distinct grading systems on each campus of the University, A-B-C-D-F (with pluses and minuses as permitted by this policy) and S-N. The S-N system is a self-contained alternative to the A-F system and the two may not be combined for a particular student in a particular course. Students may receive grades or symbols only from the grading system under which they have registered for a course. This policy does not require any instructor to use pluses and minuses.

2. There are, in addition, registration symbols identified and described in this policy that carry neither grade nor credit.

3. No campus, college, or program is required to offer a course on the S-N grading system.

4. Any unit may choose to limit grades in a particular course to the A-F or the S-N system.

5. When both grading systems are available to a student, the student must declare a choice of system as part of the initial registration for the course. The choice may not be changed after the end of the second week of classes (the first week in summer sessions).

6. Except as provided in this policy in Sections A (7) and F (12), no college may use any grading systems other than the ones established by this policy.

7. The Law School and the Medical School are exempt from the provisions of this policy, but will report their grading systems, and any changes therein, to the Faculty Senate. Any other units that believe that the national norms of their profession require a different grading system may make application to the Senate Committee on Educational Policy for an exemption from this policy. The Faculty Senate must approve all such exemptions.

8. The No Grade (NG) grading basis is used for certain graduate-level registrations as determined by the Graduate School.

B. Permanent Grades for Academic Work for Credit

1. The list below identifies the possible permanent grades that can be given for any course for which credit is to be awarded. These grades will be entered on a student's official transcript and, for an A, B, C, or D with permitted pluses and minuses, carry the indicated grade points. (Except for the Law School, the University does not award A+ grades, nor are D- grades permitted). The S grade will not carry grade points but the credits will count toward the student's degree program if allowed by the college, campus, or program.
A 4.000 - Represents achievement that is outstanding relative to the level necessary to meet course requirements
A- 3.667
B+ 3.333
B 3.000 - Represents achievement that is significantly above the level necessary to meet course requirements
B- 2.667
C+ 2.333
C 2.000 - Represents achievement that meets the course requirements in every respect
C- 1.667
D+ 1.333
D 1.000 - Represents achievement that is worthy of credit even though it fails to meet fully the course requirements
S Represents achievement that is satisfactory, which is equivalent to a C- or better.

2. These definitions apply to grades awarded to students who are not enrolled in graduate, post-baccalaureate, and professional programs, but the grade points are the same no matter the level or course of enrollment.

3. Instructors are permitted to hold graduate and undergraduate students who are in the same class to different standards of academic performance and accomplishment. The syllabus must make clear what the different standards will be for the different groups of students who may be enrolled in the class.

4. These are the general University standards. In connection with all symbols of achievement instructors will define for a class, at one of its earliest meetings and as explicitly as possible, the performance that will be necessary to earn each.

C. Permanent Grades for Academic Work for which No Credit is Given

1. There are two permanent grades given for a course for which no credit is to be awarded. These grades will be entered on a student's official transcript.

- F “0” Represents failure and signifies that the work was either (1) completed but at a level of achievement that is not worthy of credit or (2) was not completed and there was no agreement between the instructor and the student that the student would be awarded an I (see Section D). The F carries 0 grade points and the credits for the course do not count toward any academic degree program. The credit hours for the course will count in the grade point average.
- N Represents no credit and signifies that the work was either (1) completed but at a level of achievement that is not worthy of credit or (2) was not completed and there was no agreement between the instructor and the student that the student would be awarded an I (see Section C). The N carries no grade points and the credits for the course do not count toward any academic degree program. The credit hours for the course do not count in the grade point average.

2. a. Scholastic dishonesty. Scholastic dishonesty in any portion of the academic work for a course will be grounds for awarding a grade of F or N for the entire course, at the discretion of the instructor. This provision allows instructors to award an F or an N to a student when scholastic dishonesty is discovered; it does not require an instructor to do so. Students who enroll for a course on the A-F grading system will receive an F if such grade is warranted; students who enroll for a course on the S-N system will receive an N if such grade is warranted. (See Board of Regents Policy: Student Conduct Code for a definition of scholastic dishonesty.)

b. If the instructor determines that a grade of F or N for the course should be awarded to a student because of scholastic dishonesty, the student cannot withdraw to avoid the F or N. If the student withdrew from the course before the scholastic dishonesty was discovered or before the instructor concluded that there was scholastic dishonesty, and the instructor (or the appropriate hearing body if the student requests a hearing) determines that the student should receive the F or the N, the student will be re-registered for the course and the F and N grade will be entered on the transcripts.

D. Incompletes

1. There will be a symbol I (incomplete) awarded to indicate that the work of the course has not been completed. The I will be assigned at the discretion of the instructor when, due to extraordinary circumstances (as determined by the instructor), the student who has successfully completed a substantial portion of the course's work with a passing grade was prevented from completing the work of the course on time.
2. The assignment of an I requires a written agreement between the instructor and student specifying the time and manner in which the student will complete the course requirements. In no event may any such written agreement allow a period of longer than one year to complete the course requirements (except as provided in section D (8)).

3. Work to make up an I must be submitted within one year of the last day of final examinations of the term in which the I was given for all students except graduate and professional students. If not submitted by that time, the I will automatically change to an F (if the student was registered on the A-F system) or an N (if the student was registered on the S-N system) for the course. If an I changes automatically to an F or an N, the instructor has the discretion to reinstate the I for one additional year only.

4. For graduate and professional students, an I remains on the transcript until changed by the instructor or department.

5. When an I is changed to another symbol, the I is removed from the record. Once an I has become an F or an N, under the provisions of the preceding paragraph, it may subsequently be converted to any other grade, upon petition by the instructor (or the department if the instructor is unavailable) to the college.

6. A student does not need to be registered at the University in order to complete the work necessary to convert an I to a grade with credit in the time and manner previously agreed upon between the student and the instructor. The instructor is expected to turn in the new grade within four weeks of the date the work was submitted by the student. (Depending on the timing of when the work is turned in and the ability of the instructor to award a grade, an F or an N may appear temporarily on the transcript.) Students who have received an I in a course are not allowed to sit in on the class again (that is, without registering for it) to complete the grade.

7. If a student graduates with an I on the transcript, the I will remain permanently an I. A student may petition the college, within a year of graduation, to complete the work in the course and receive a grade. The degree GPA is frozen upon graduation but the cumulative GPA will reflect the change in GPA if a student chooses to complete the work and change the I to a grade within a year of graduation.

8. When students are called to active military duty, and reach agreement with their instructor(s) to take an incomplete, they will have up to one calendar year following their discharge from active duty to complete their incomplete(s).

9. Receipt of an I in a course does not create an entitlement for a student to take the course a second time.

E. Other Transcript Symbols

1. Auditing a course.
   a. There will be a symbol V, visitor, indicating registration as an auditor or visitor, which will carry no credit and no grade.
   b. Students auditing a course are required to pay full tuition but do not take exams and are not required to do homework. An auditor is entered on the class roster (grade report), is counted as filling a seat in a controlled entry course, and is counted in an instructor's student contact hours.
   c. Students may not sit in on a course without registering for it.
   d. A student will be allowed to take a previously audited class for a grade.

2. Withdrawing from a course.
   a. There will be a symbol W, withdrawal, entered upon a student's record when the student officially withdraws from a course in accordance with procedures established by the student's college or campus. The W will be entered on the transcript irrespective of the student's academic standing in that course if the student withdraws from the course during the third through eighth week of class (Crookston) or the third through tenth week of class (Morris, Rochester, Twin Cities) or during the second or third weeks of summer sessions.
   b. If a student officially withdraws from a course during the first two weeks of classes, there will be no record of that course registration entered on the student's transcript.
   c. One-time late withdrawal: Each student may, once during an undergraduate enrollment, withdraw from a course without college approval, and receive the transcript symbol W, after the deadline for withdrawal and at any time up to and including the last day of instruction for that course. A student may not withdraw after completing the final examination or equivalent for a course.
   d. Except as provided in the preceding section, withdrawal after the deadlines will require approval of the college and may not be granted solely because a student is failing the course; there must be extenuating non-academic circumstances justifying late withdrawal.

3. Continuation course. There will be a symbol X, indicating a student may continue in a continuation course in which a grade cannot be determined until the full sequence of courses is completed. The instructor will submit a grade for each X when the student has completed the sequence.
4. **Course in progress.** There will be a symbol K, assigned by an instructor to indicate the course is still in progress and that a grade cannot be assigned at the present time.

5. **No grade reported.** There will be a symbol NR, administratively assigned to indicate that a grade was not reported for the course. The NR does not carry any GPA points.

F. Other Provisions

1. **Zero-credit courses.** Courses that carry zero credits do not count in either term or cumulative grade point averages. Such courses carry normal tuition and fee charges.

2. All grades for academic work are based on the quality of the work submitted, not on hours of effort. Instructors have the responsibility and authority to determine how final grades are assigned, including, in classes where they use numeric scores, the method that will be used to translate numeric scores into letter grades. (Examples: the instructor may decide that 90% equals an A, 80% a B, and so on, or the instructor may decide that the top 10% of the scores will receive an A, the next 20% a B, and so on.)

3. **Counting credits toward a University degree.**
   a. A course that carries University credit toward a degree in one department or college must carry University credit in all other departments and colleges.
   b. A department or college has discretion to decide whether a course completed in another unit will count towards the specific college or department/program/major requirements.

4. When a student graduates, no further changes to the student's transcript will be made (to that portion of the transcript related to the program from which the student graduated) except as expressly allowed under the provisions of this policy.

5. **Releasing transcripts.** The University's official transcript, the chronological record of the student's enrollment and academic performance, will be released by the University only at the request of the student or in accord with state or federal statutes.

6. **Repeating courses.**
   a. An undergraduate student may repeat a course only once (except as noted in section 6(c)). The college offering the course may grant an exception to this provision. [Morris only] Students who receive a grade of S or C or higher may repeat a course only if space permits.
   b. When a student repeats a course before receiving the degree, (a) both grades for the course will appear on the official transcript, (b) the course credits may not be counted more than once toward degree and program requirements, and (c) only the last enrollment for the course will count in the student's grade point average.
   c. Provisions 6 (a) and (b) of this policy will not apply to courses (1) using the same number but where students study different content each term of enrollment and (2) to courses designated as "repetition allowed."
   d. If an undergraduate student repeats a course after the degree has been awarded, the original course grade will not be excluded from the degree GPA nor will the new grade be included in the degree GPA.
   e. Bracketing is the practice of not including a course in the calculation of a student's GPA and not counting the course as satisfying any degree requirements, including electives, because a student has repeated a course. When a student repeats a course, all prior attempts are bracketed and only the most recent attempt counts (except as provided in 6 (c)). No department or college may bracket the courses of another department or college for any reason other than course repetition. An F may not be bracketed with an N. A University course may not be bracketed with a course taken at another institution. The Graduate School does not bracket courses.
   f. When a student enrolled in the Graduate School repeats a course, provisions 6(a) and (b) apply, but all grades for the course will be counted in the student's grade point average.

7. **Grade point average.** Every student will have calculated, both at the end of each grading period (quarter or semester) and cumulatively, a grade point average, which will be the ratio of grade points earned divided by the number of credits attempted with grades of A-F (including pluses and minuses). Both the term and cumulative grade point average will appear on each student's record.

8. **Final grade due date.** Final grades will be submitted to the Registrar no later than three business days after the last day of the final examination period.

9. This policy may be modified from time to time but existing transcripts will not be modified when there are changes in policy. Changes to the grading and transcript policy will be reflected on the legend on the back of the official transcript.

10. **Compiling and reporting grading data.**
    a. Data on the mean grade point average by designator and course level, on the percentage of As awarded by course level, and on overall collegiate grade point averages will be prepared for grades
awarded each Fall Semester. Data should be reported for all undergraduate students. Cells in the tables with fewer than 10 grades should be suppressed, in order to protect the privacy of students, but the numbers should be included in the totals.

b. The Office of Institutional Research will produce the required tables and provide them to the chair of the Senate Committee on Educational Policy and to the Office of the Executive Vice President and Provost.

c. The data tables and graphs required in 10 (a) and (b) will be reported annually to the Faculty Senate. These data should also be provided to all deans and department heads and made available to faculty and students.

11. All colleges and campuses will publish each term a dean's list, consisting of students who achieved a 3.666 GPA or higher and who completed a minimum of 12 credits on the A-F grading system. There will be a transcript notation for each term that a student achieves the dean's list. Students who have chosen to suppress all their public information (which includes academic awards and honors) will not be included on the published dean's list.

12. Alternative grading systems.
   a. Only the Senate Committee on Educational Policy will have the authority to grant to individual colleges or campuses permission to use alternative grading methods outside the provisions of this official University system, for a specified period (but no longer than five years), and only for the purpose of experimenting with a new grading system for possible system-wide adoption. Such permission may be granted if the proposal does not interfere significantly with the registration options of students from other colleges, campuses, and programs. Such alternative systems will be reported for information to the University Senate as soon as permitted and, after the specified period, will be re-evaluated, either to be discontinued, or with University Senate approval on recommendation from the Senate Committee on Educational policy, made part of the system-wide policy. Except for the provisions of this section 6, no college or program may use any grading system except for the one contained in this policy.

   b. Because alternative grading systems, once used, must be maintained by the University forever afterward (to preserve the integrity of the transcripts), the Senate Committee on Educational Policy will rarely grant permission for alternative grading systems. It will consider doing so only when (1) those who propose it can make a persuasive case that the alternative is a more accurate and effective way to measure and record student academic performance, and (2) there is strong reason to believe that the proposal will be useful to all colleges and campuses of the University (except the Law School and Medical School).

Exclusions
This policy is not applicable to the Duluth campus.

REASON FOR POLICY

A standard grading system establishes a common understanding of the meaning of grades and promotes uniformity in assigning them. Defining grades and their associated meaning (grade points and assessment of achievement) allows for comparison and for computation of the term and cumulative grade point average.

PROCEDURES

There are no procedures associated with this policy.

DEFINITIONS

Major/program requirements
Program requirements include those determined as the requirements to complete a major or minor in a department. Program requirements must be completed in addition to the other requirements for a degree (e.g. liberal education requirements).

Scholastic Dishonesty
Plagiarizing; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using test materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; altering, forging, or misusing a University academic record; or fabricating or falsifying data, research procedures, or data analysis.

RESPONSIBILITIES

Office of the Registrar
Maintain the transcript

Instructor
Submit final grades within three working days of the last day of final exams.

- Board of Regents Policy: Student Conduct Code
- Administrative Policy: Credit and Grade Point Requirements for an Undergraduate (Baccalaureate) Degree: Twin Cities, Morris, Rochester
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

This policy guides academic units in scheduling the instructional time for a specified number of course credits. Instructional time expectations per credit do not vary with the method(s) of delivery of the course or with the length of the academic term.

1. For all enrollment periods and for all courses, the hours of instructional time for a course must equal at least the number of credits for the course times the number of weeks the course is offered during the full academic term.

2. Instructional time is defined for these purposes as instruction by the instructor(s) assigned to the class as scheduled by the academic department. Instructional time does not include office hours or casual or informal time spent with students.

3. Course proposals must include information regarding instructional time. Proposals must provide significant evidence to justify a schedule that includes fewer total instructional hours than the standard defined in paragraph (1.). Instructional hours of all types equal to or in excess of the standard defined in paragraph (1.) need not be justified.

4. When reviewing a course proposal, college and campus curriculum committees and other approving bodies (e.g., the Council on Liberal Education) must consider the instructional hours in reaching a decision on whether to approve a proposed course; such bodies should normally reject course proposals that have fewer instructional hours than the standard defined in paragraph (1.), barring significant evidence that reduced instructional contact hours are appropriate. In their review, these bodies will also take into consideration the method(s) of delivery of the course (e.g., traditional classroom setting, various distance education delivery methods).

5. Courses for individualized instruction such as directed study, directed readings, and directed research, which require a written contract outlining the responsibilities of the student for the course, are explicitly exempted from this standard, and may have fewer instructional hours per week than the standard.

Exclusions
This policy is not applicable to the Duluth campus.

REASON FOR POLICY

Instructional time per course credit is defined to provide a consistent minimum expectation for students and faculty. Students and faculty should know in general what time commitment is involved for a specified number of course

**DEFINITIONS**

**Instructional time**
Scheduled instruction/teaching by an individual appointed for that purpose.

**RESPONSIBILITIES**

**Collegiate and campus curriculum committees**
Review proposed courses in light of conformance with policy; assess the appropriateness of proposed instructional hours. When proposed instructional hours vary from the standard, assess the type of course, and the proposed delivery method.

**Academic Departments**
Follow the established policy for instructional time per course credit when scheduling courses.
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

Graduate students are expected to maintain active status through continuous registration from the time they matriculate until they graduate. Students who are not able to maintain active status are strongly encouraged to consult with their Director of Graduate Studies, advisor, and relevant offices to determine whether requesting a leave of absence is the most appropriate course of action. Students who do not have an approved leave of absence and are not continuously enrolled may experience negative consequences related to academic, visa, financial aid, and other student issues.

1. Students who experience circumstances that prevent them from maintaining active student status will ordinarily be granted college approval for a leave of absence upon request. Students must complete a leave of absence form that specifies the term(s) and year(s) of the leave.

2. An approved leave of absence may not exceed two academic years.

3. Students who do not obtain a college-approved leave of absence prior to interrupting their enrollment (excluding summer) may be terminated from their graduate program or held to new requirements if they are subsequently readmitted.

4. Students granted a leave of absence may not use University facilities or services available only to registered students.

5. The term(s) and year(s) of an approved leave of absence will not be counted toward time to degree.

6. Students who obtain a college-approved leave of absence in accordance with this policy are eligible for reinstatement provided they enroll no later than the term immediately following the expiration of the leave (excluding summer). Colleges may specify reasonable conditions for reinstatement to active status, whether the student returns early or at the expiration of the leave. Colleges may deny reinstatement to active status based on crimes or other serious misconduct occurring during the leave that would have been grounds for suspension or expulsion had the student engaged in the conduct while enrolled (see Board of Regents Policy: Student Conduct Code).

7. Students whose leave of absence has expired and who have not yet registered for the following term (excluding summer) will be placed on inactive status. Students who are placed on inactive status must apply for readmission.

8. Collegiate units may develop additional rules governing leaves of absence, as long as they are consistent with this policy.

Documentation
Each college must establish and publicize its process for implementing this policy and must inform all entering students about it.
REASON FOR POLICY

Students may need to interrupt their enrollment for reasons they cannot control. Allowing students to take a leave of absence provides students the opportunity to return to the University under the rules and policies in effect when they left and without affecting their time to degree. It also allows the University the opportunity to counsel students about actions they must take to be reinstated upon the expiration of the leave.

DEFINITIONS

Continuous registration
Registration for every fall and spring semester. Required to maintain active status.

Graduate students
Students enrolled in post baccalaureate degree programs with the exception of “first professional” degrees. (The first professional degrees are: the J.D., M.D., Pharm.D., D.V.M., D.D.S, and L.L.M. degrees.)

Active status
Graduate students who register every fall and every spring (i.e., continuously registered) are considered active.

Inactive status
Graduate students who do not register every fall and spring and who have not been granted a formal leave of absence by their college will be placed on inactive status.
Leave of absence
Refers to a process by which students obtain college approval to leave the University for a specified period of time (i.e., not register for fall/spring term[s]), but for no longer than two academic years.

Matriculate
Individually matriculate upon their first registration as an admitted graduate student at the University.

Reinstatement
The process required for returning to the University after an approved leave of absence. Students with a college-approved leave of absence are eligible for reinstatement if they notify their college via the appropriate reinstatement form prior to the term in which they intend to enroll, they enroll no later than the term immediately following the expired leave (excluding summer), and they return to the same major and degree objective.

Readmission
The process of reapplication to the University for admission. Readmission is required following a break in enrollment without an approved leave of absence, as well as after failure to return by the term immediately following an approved leave of absence (excluding summer).

RESPONSIBILITIES

College
- Establish and publicize leave of absence policy and ensure that students are informed throughout their academic careers of the policy and consequences of inactive status.
- Inform students of potential conditions that may be imposed upon reinstatement at the end of an approved leave of absence.
- Help students who are pursuing degrees in multiple colleges to connect with each college to ensure coordinated leave of absence requests.
- Help reinstate students at the end of an approved leave of absence.
- Enter the necessary information into PeopleSoft related to effect start - and return - leave of absence dates for each degree being pursued by the student.
- Discontinue students from the degree(s) they are pursuing in the event that students do not request reinstatement prior to the approved term/year, or if upon reinstatement, fail to register for the approved term/year.

Graduate student
- Talk with their advisor and Director of Graduate Studies for each degree they are pursuing, and other relevant offices (e.g., International Student and Scholar Services, Office of Student Finance, Graduate Assistant Employment).
- Submit the Leave of Absence Form for Graduate Students when planning a leave of absence. Submit the Application for Reinstatement for Graduate Students prior to intended term of return. Students pursuing degrees in more than one college must submit the Leave of Absence and Reinstatement forms with each college.

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.

Effective:
August 2011 - New Policy, Comprehensive Review: Establishes a formal leave of absence for graduate students who need to interrupt their enrollment for reasons they cannot control such as illness, family emergencies, etc. This policy parallels a similar policy already in effect for undergraduate students. Allows students to return to the University under the rules and policies in effect when they left. Aligns with best practice at peer institutions.
**POLICY STATEMENT**

Instructors and academic units are responsible for maintaining records of student work and grade books, as follows:

1. Instructors and academic units should either return submitted student work to the student, or retain it for 30 days after grades for the class are posted to the student's transcript. This provides students the opportunity to retrieve or review their work, as appropriate.

2. After 30 days, any retained student work may be discarded securely (following applicable University document-destruction procedures).

3. A student may request that retained student work be retained until 30 days into the next semester (not including summer, so a request in the spring would require a unit to hold the work until 30 days into the following fall semester). A student must make this request to the instructor no later than the last day of instruction for the class.

4. Instructors must follow FERPA, Minnesota Government Data Practices Act (MGDPA) and University policy in retaining and returning student work. For example, student work may not be left in hallways or other public places where anyone may see it.

5. Academic units must retain grade books or their equivalents for a minimum of one year or, if a grade is appealed, until the end of the appeal. Instructors leaving the University must give all grading records to the department.

6. Academic units must also be aware of and follow Administrative Policy: Managing University Records Retention.

**Exclusions**

This policy is not applicable to the Duluth Campus.

**REASON FOR POLICY**

To comply with state and federal law regarding data privacy and to establish a reasonable time period after the end of a term during which students are able to retrieve or view their work while recognizing the physical storage space limitations in units.
PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

1. Does this policy apply to online classes or student work submitted electronically?
   Yes. Work may be returned electronically or stored electronically to meet the requirements of this policy.

DEFINITIONS

Student Work
Materials a student has submitted for a class, including but not limited to, papers, projects, exams, problem sets, artwork, and architectural models.

Maintain
The process of keeping student work where it can be safely stored and accessed, whether submitted physically or electronically.

RESPONSIBILITIES

Academic Units
Maintain grade books or their equivalents for a minimum of one year, or until the end of an appeal if a grade is appealed.

Instructors
Return student work or retain it for 30 days after grades are posted to a student’s transcript. Maintain the privacy of student work.

Students
Before the last day of instruction, request their student work be retained for 30 days into the next semester.

RELATED INFORMATION

- Administrative Policy: Managing University Records Retention

HISTORY

Amended:
January 2017 - Comprehensive Review, Minor Revision. 1. Clarifies obligations when work has been returned earlier than the 30-day requirement for retention. 2. Revise to use “course” and “class” clearly in policy. 3. Title Change: Maintaining Course Records changed to Maintaining Records of Student Work.

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009
## POLICY STATEMENT

University policy recognizes that there are a variety of legitimate circumstances in which students will miss coursework, and that accommodations for makeup work will be made. This policy applies to all course requirements, including any final examination. Students are responsible for planning their schedules to avoid excessive conflicts with course requirements.

1. Instructors may not penalize students for absence during the academic term due to the following unavoidable or legitimate circumstances:
   - illness, physical or mental, of the student or a student’s dependent;
   - medical conditions related to pregnancy;
   - participation in intercollegiate athletic events;
   - subpoenas;
   - jury duty;
   - military service;
   - bereavement, including travel related to bereavement;
   - religious observances;
   - participation in formal University system governance, including the University Senate, Student Senate, and Board of Regents meetings, by students selected as representatives to those bodies; and
   - activities sponsored by the University if identified by the senior academic officer for the campus or the officer’s designee as the basis for excused absences.

2. Voting in a regional, state, or national election is not an unavoidable or legitimate absence.

3. Instructors are expected to accommodate students who wish to participate in party caucuses, pursuant to Board of Regents resolution (see December 2005 Board of Regents Minutes, p 147.)

4. For circumstances not listed in (1), the instructor has primary responsibility to decide on a case-by-case basis if an absence is due to unavoidable or legitimate circumstances and grant a request for makeup work.

### Notification, Verification of Absences, and Make-up Work

5. Students must notify their instructors of circumstances identified in (1) or other circumstances leading to a request for makeup work as soon as possible and provide information to explain the absence. Some
situations will be sufficiently urgent that arrangements for makeup work cannot be made prior to the date of an absence. In such cases, arrangements should be made as soon as possible following the student's return.

6. The instructor has the right to request, and the student must provide if requested, verification for absences, with the exception of a single episode medical absence that does not require medical services.

7. The instructor has the right to request verification for a single episode medical absence if (i) the student has had more than one single episode medical absence in the class, or (ii) the single episode medical absence involves missing laboratory sessions, exams or important graded in-class assignments.

8. The instructor may not penalize the student and must provide reasonable and timely accommodation or opportunity to make up missed work, including exams or other course requirements that have an impact on the course grade if the student:
   - Was absent due to circumstances identified in (1);
   - Has complied with the notification requirements; and
   - Has provided verification if the instructor has requested further information.

9. Colleges and academic units may establish more specific criteria for notifying instructors and completing the associated make-up work, especially when the absence involves activities that may not be possible to make up, such as laboratory or clinical sessions and performances.

10. Instructors are not obligated to accommodate a student who has missed so much of the critical components of a course, even for legitimate reasons, that arrangements for makeup work would not be reasonable.

Instructors should take all factors into consideration when determining whether to grant an excused absence and how to make arrangements for makeup work that has an impact on the course grade. If a student has missed a component of the course that cannot be made up in exactly the same manner, the instructor may substitute another activity or assignment in order to assess the missed components. If no substitution can be devised, the missing component(s) cannot be factored into determining that student's final grade for the course.

**Appeals**

If a student believes the student has been wrongly denied the opportunity to make up work due to disagreement with the instructor about the legitimacy or unavoidability of an absence, the student should pursue the student's complaint using the usual process for appeals of student grievances. Chairs and deans who have questions about what constitutes an excusable bereavement absence, religious observance, or eligible dependent illness should consult with the senior academic officer for the campus for resolution of the disagreement.

In accordance with the Administrative Policy: *Addressing Student Academic Complaints*, final authority rests with the senior academic officer for the campus.

**Special Situations**

For health or safety of a campus, the senior academic officer for the campus or the officer’s designee may waive the requirement that students provide verification from a health care provider for illness.

**Exclusions**

This policy does not apply to the Duluth campus.

---

**REASON FOR POLICY**

The University aims to foster an atmosphere of honesty and trust between instructors and their students. It is in both the University's and the student's interest to outline academic protections for students when they miss class for legitimate reasons. This policy places parameters around what is a legitimate absence, and reinforces the responsibilities of the instructor and the student.

---

**PROCEDURES**

There are no procedures associated with this policy.

DEFINITIONS

**Dependent**
A person, typically a qualifying child or other relative, other than the taxpayer or spouse, who entitles the taxpayer to claim a dependency exemption for tax purposes.

**Intercollegiate athletics**
Sports teams organized and funded by the institution through the athletics department. Intercollegiate does not refer to or include recreational sports, intramural sports, club sports, or other special interest sport clubs or organizations.

**Medical provider**
A licensed mental health or medical professional including registered nurses (RNs).

RESPONSIBILITIES

**Instructor**
- Provide timely and clear responses to requests for makeup work for absences.
- Provide reasonable and timely accommodation for makeup work for legitimate absences.
- Maintain consistency in how this policy is applied to all students enrolled in the course.

**Student**
- Plan schedules to avoid excessive conflict with course requirements.
- Notify instructors of circumstances related to absences as soon as possible.
- Provide verification of absence, if requested by the instructor.

Other Related Information

Board of Regents resolution. December 9, 2005, "Approval of a resolution related to Events and Classes on Precinct Caucus Night", [See pp.147-8].

HISTORY

Amended:
Comprehensive review, Major Revision: adding participation in U Senate, Student Senate, and Regents meetings by student reps to the list of approved absences. Specifying when instructors can request verification for "single episode" medical absences. Adding two FAQs about single episode medical absences. Adding an FAQ about student government absences. Adding a definition of a "medical provider"

Amended:
December 2015 - Comprehensive Review, Minor Revisions. 1. Organizes the information more logically and includes key subheadings. 2. Expands on the FAQ to incorporate numerous questions and answers received or given over the past years, including information related to family vacations and attendance at weddings. 3. Added new language addressing travel related to bereavement.

Amended:
June 2014 - Comprehensive Review. Clarifies the instructor responsibility for accommodating student absences due to medical conditions related to pregnancy, supporting a request from Kim Hewitt. Moves the sentence re: instructors having the right to request verification to a separate bullet. Adds instructor and student to the Responsibilities section.

Amended:
January 2011 - Comprehensive Review. Expands allowable absences to include caring for student's dependent. Documentation required only when requested by instructor. Responsibility for determining whether absence is legitimate rests with instructor.

Amended:
May 2010 - Expands the application of this policy to final exams, in addition to all course requirements, since legitimate absences can occur anytime during the academic year.

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009
POLICY STATEMENT

The University protects the rights of students with respect to their education records. Education records generally include any personally identifiable records maintained about a student by the institution, including academic, disciplinary, and administrative records. Each campus must:

- provide students with an annual notice of their rights,
- regulate access to education records in accordance with law and policy,
- maintain records as required by law and policy,
- provide students with the right to request amendment to their education records and the right to a hearing concerning their education records,
- provide complete records, from all units at the University, in response to a student's request that records be provided.

Access to student records. University officials may have access to student information, if their responsibilities reasonably require access to that information for educational, administrative, or research purposes in the performance of their job duties. University employees who have access to student education records are obligated to carefully protect them and will be held accountable for safeguarding them. Policy or procedure violations may result in disciplinary action, including possible termination of employment, and applicable civil and criminal sanctions.

Distributing grades. The posting of grades or examination results with personally-identifiable information (i.e., student ID number, Social Security Number, student name) is prohibited. Examinations, papers, blue books, or any other graded materials that contain personally-identifiable student information (i.e., name, student ID number) should be distributed directly to students or made available for pick up in departmental offices in a manner that ensures the privacy of each student's grade.

Student right to review. Students are entitled by law to review portions of their records at the University and to request amendments of such records if the student believes they are inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student.

Disclosure of student records, including disciplinary background checks. Personally-identifiable student information may only be released under the conditions outlined in the procedures or with the written permission of the student. When a student provides a valid authorization to release student records to a third party, all records that are legally covered by the authorization must be released as requested by the student. Units responding to external requests for information must ensure that the response includes all requested information that exists at the University.

REASON FOR POLICY

This policy implements Board of Regents Policy: Student Education Records, and establishes procedures to ensure compliance with state and federal law governing student education records.

DEFINITIONS

Directory Information
Student's name, address, etc.

Legitimate Education Interest
An interest in student records for the purpose of performing stated job duties.

Student Applicant
A person who has applied for admission to a University college. It includes students who are enrolled in a University college and are applying for admission to another University college.

Student Education Records
Any student record maintained by the institution that contains personally identifiable information.
University Official
University officials are those members of the University whose responsibilities reasonably require access to student records for educational, administrative, or research functions and may include faculty, administration, clerical and professional employees, and other persons who manage student record information.

RESPONSIBILITIES

Custodian of Education Records
Bring Board of Regents Policy: Student Education Records and other pertinent federal and state laws to the attention of all people who have access to student records. Respond to requests by student to amend an educational record.

Vice Provost & Chancellors
Appoint the custodians of student education records.

Departments with Academic Records
Adopt these administrative procedures or prepare its own departmental procedures that are set forth in the Regents and this policy.

Hearing Officers
Comply with the hearing procedures.

Registered Student
Complete a request to prevent disclosure to prohibit the disclosure of directory information during the term of enrollment.

Office of the Registrar
Publish an annual public notice designating directory information and informing students of their option to prohibit release of directory information.

University Officials
Respond to inquiries about students without their consent if the requested information is a matter of public record or directory information and not suppressed.

RELATED INFORMATION

Statutes:

Related Policies:
- Board of Regents Policy: Student Education Records
- Administrative Policy: Reporting and Notifying Individuals of Information Security Breaches

HISTORY

Amended:
October 2009 - Added new procedure: Responding to Authorizations to Disclose Student Records. Title changed from Protecting the Privacy of Student Education Records to Managing Student Records. Clarifying changes made throughout policy.

Effective:
June 2005
University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

1. Students are required to attend the first class session in order to receive important information about the course from the instructor. Students must attend the first class meeting of every part of a course in which they are registered (including, labs, discussion sections, lectures, and other types of class meetings), unless they have obtained prior approval from the instructor (or department, if appropriate) for an intended absence before the first class meeting. Without such prior approval, a student may lose their place in the class to another student.

2. If a student wishes to remain in a course from which the student has been absent the first day without prior approval, the student must contact the instructor as soon as possible. In this circumstance, instructors have the right to deny access to the class if other students have been added and the course is full. However, instructors should consider extenuating circumstances that may have prevented a student from attending the first class session and from notifying the instructor in advance.

3. Absence from the first class session that falls during a recognized religious holiday (e.g., Rosh Hashanah) does not require instructor approval, but the student must notify the instructor in advance regarding the absence and the reason for the absence. In this instance, the place for the student will be retained. (See Administrative Policy: Makeup Work for Legitimate Absences: Twin Cities, Crookston, Morris, Rochester for further information regarding absences).

4. Students are responsible for officially canceling their enrollment in any course in which they have enrolled and subsequently been denied enrollment. If any such student does not officially cancel enrollment from the course, the instructor has the choice to either (a) assign a failing grade to the student for that course, or (b) request that the student be disenrolled.

Exclusions
This policy is not applicable to the Duluth campus.

REASON FOR POLICY

Students are required to attend the first class session to receive important information about the course from the instructor. In addition, because students can enroll and disenroll for courses on-line, the list of registered students
fluctuates. A student’s presence at the first class session is required to clearly indicate the number of students who are committed to taking the course. Instructors can then determine whether any students who were not able to register for a course because all seats were taken may take the place of students who registered but did not attend the first class session.

**PROCEDURES**

There are no procedures associated with this policy.

**FORMS/INSTRUCTIONS**

There are no forms associated with this policy.

**APPENDICES**

There are no appendices associated with this policy.

**FREQUENTLY ASKED QUESTIONS**

1. **Is it mandatory that a student be removed from a class if the student misses the first class session?**
   
   Instructors are not required to request that the student be removed from the class, but it is their prerogative to make such a request.

2. **What is the necessary process for instructors to disenroll students from a course?**
   
   Instructors can contact their college’s student services department or One Stop Student Services to request students be disenrolled for not attending the first class session.

3. **How does this policy apply to on-line courses?**
   
   The policy extends to on-line courses as well as traditional in-person courses. Students must attend the first class meeting or obtain permission from the faculty member to be absent. In the traditional classroom courses, attendance means the student is physically present in the course. For courses that are delivered partially or completely online, instructors have discretion to indicate on the syllabus the specific action(s) a student would need to take within a specified time period (e.g., post an online discussion group on academic matters, initiating contact with a faculty member to ask a question about an academic course topic, submitting an assignment, taking a quiz) in order to be considered as having attended the online course.

4. **How does this policy impact students who add a class during the first or second week of the semester?**
   
   Students may generally add open classes without instructor permission during the first week of the term (fall and spring), and with instructor permission during the second week (fall and spring). Students are not required to attend the sessions prior to registration. Students should communicate with their instructor to determine if any graded work has been missed and what makeup work is available.

DEFINITIONS

Officially cancel
Students must cancel (drop) a class if they have been denied enrollment in that course. Students are responsible for dropping a course to officially remove it from their record and may do so online in the course registration system.

RESPONSIBILITIES

Students
Attend the first sessions of courses for which they have registered, or seek prior approval from the instructor if they are unable to attend. Use the course registration system to drop a course they have registered for but will not be attending.

Instructors
Monitor official course registration lists. Take attendance at first class meeting(s). Respond promptly to students who have contacted the instructor regarding not attending the first class session. Notify students if they have been denied enrollment in a course. Report a failing grade if a student who was denied enrollment in a course does not drop the course, or request that the student be disenrolled.

RELATED INFORMATION

- Administrative Policy: [Makeup Work for Legitimate Absences: Twin Cities, Crookston, Morris, Rochester](#)

HISTORY

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009
POLICY STATEMENT

This policy sets the standards for the master’s final examination and the requirements for completion of the master’s degree.

I. Final Examination Committee: Plan A and B Master’s Degrees
   a. The master's final examination committee must consist of at least three members, including the advisor(s). All members appointed to the committee must meet the minimum standards established by the program and college. All members of the committee and the student must participate in the final examination. Committee members and/or the student may participate remotely as long as all conditions for remote participation in examination are met.
      i. At least two members (including the advisor) must be from the student's major field.
      ii. At least one member must represent a field outside the student’s major. If the student has a declared minor(s), the outside member(s) must be from the minor field(s).
      iii. Members cannot satisfy the requirement with respect to more than one field.
      iv. Collegiate deans or their designated representatives at the collegiate level must verify eligibility and approve members of the final oral examination committee.
      v. The approved committee membership must be centrally archived in the system of record.
   b. Changes in committee membership may be made after filing the degree plan if approved by the program Director of Graduate Studies (DGS) and the collegiate unit. Changes must also be archived centrally in the system of record.

II. Final Examination:
   a. For students submitting a Plan A thesis, the final examination must contain an oral component.
      i. The final oral examination is a closed examination open only to the final oral examination committee and the student. Programs may also require a written final examination.
      ii. Students must provide the reviewers with a copy of the Plan A thesis/professional engineering design project at least 14 days before the scheduled date of the final examination.
      iii. Every member of the final examination committee must certify on the master’s thesis reviewer's report that the thesis/professional engineering design project is ready for defense before the final examination may take place.
   b. Committee members must notify the candidate in writing of all required revisions to the thesis or final project as well as specify a time limit for the submission of the revised master’s thesis or project within 7 days of the final examination.
      i. If revisions are required as a condition of passing, the advisor(s) must certify that the revisions have been completed before the degree is awarded.
   c. For students submitting a Plan B project, the final examination may be oral, written, or both. The final oral examination is a closed examination open only to the final oral examination committee and the student.
d. A majority vote of an examining committee is required to pass the master’s final examination.

e. If the student fails the final examination, the student may retake the examination only if all committee members, or all committee members save one, approve this option.

f. The second attempt to pass the master’s final examination must use the same committee members as the first examination unless an extraordinary or emergency situation necessitates a substitution.

g. If the committee does not approve a retake, or if the student fails the second attempt, the student will be terminated from the program.

III. Thesis Submission: Master’s Thesis/Professional Engineering Design Project

All students who complete a Plan A Thesis or Professional Engineering Design Project must file a digital copy of the thesis/project with the University in accordance with University standards. Students may choose whether or not to request an embargo of publication of the thesis or design project for a limited period of time.

IV. Plan C Master’s Degrees

Plan C master’s degrees typically do not include standard final examination formats like those for Plan A and Plan B master’s degrees. However, students must satisfy all of the course and other requirements specified by the program in order to complete the degree.

V. Minimum GPA required for graduation

Students must have a 2.800 minimum GPA for courses included on the degree plan at the time of degree clearance.

Exceptions

This policy does not apply to the M.B.A. [Twin Cities] degree.

Effective Date

This policy applies to all students admitted after January 1, 2013. Students who matriculated before January 1, 2013 may choose to continue under the policies in effect when they initially matriculated in their graduate program.

REASON FOR POLICY

This policy establishes uniform standards for the master’s final examination; defines timely submission of copies of the thesis for University archives, and supports Board of Regents Policy: Openness in Research which covers public dissemination of University-sponsored research.

DEFINITIONS

There are no definitions associated with this policy.

RESPONSIBILITIES

Graduate School

- Provide guidelines for formatting and submitting the thesis, to include not only current instructions for electronic formatting and filing, but also guidelines governing the use of already published material in the thesis. Guidelines should take account of possible copyright issues.

Collegiate Units

- Approve and archive in the system of record committee membership (including any subsequent changes to an approved committee).
- Approve and record the specific procedures used by programs for administering and grading the master’s final examination.
- Maintain and publish any additional collegiate-level publishing standards or guidelines (e.g., stylistic conventions based on discipline, language of the thesis).

Departments/Programs

- Publish the specific procedures used for administering and grading the master's final examination, and identify whether candidates for each degree and track offered must take written examinations, oral examinations, or both.
- Provide program-specific information in the graduate handbook.
- Maintain and publish any additional program-level publishing standards or guidelines (e.g., stylistic conventions based on discipline, language of the thesis).
- Review and approve any changes in committee membership; route program-approved requests to the collegiate unit for approval.

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

This policy sets minimum standards for master’s students to maintain academic good standing and satisfactory progress in their degree programs. Programs and collegiate units may have additional and/or more stringent requirements.

I. Requirements Upon Matriculation
   a. Students are responsible for knowing all program requirements of their master’s program when they matriculate.
   b. Upon matriculation, programs must:
      i. Provide each student a current graduate program handbook, specifying the program’s requirements and policies governing successful degree completion.
      ii. Assign each student a temporary advisor.

II. Progress Review
   a. Annual Review
      i. Programs must review the progress of each master’s student at least once per year. Students deemed not to be in good standing must be informed of the results of the review in writing, with a copy to the student’s advisor.
   b. Degree Plan
      i. Master’s degree students must have an approved degree plan on file with their collegiate unit in order to defend the degree and/or apply for degree clearance. It is recommended that the degree plan be filed at least one term (fall or spring semester) before the intended term of the defense and/or application for degree clearance.
      ii. Students intending to pursue a minor must declare the minor prior to the final examination. In master’s programs that do not include a final examination, students must declare the minor prior to filing for degree conferral.
      iii. The degree plan must be centrally archived in the system of record.

III. Performance Standards
   a. Continuous Enrollment Students are required to enroll every semester (fall and spring) from the time of matriculation until degree conferral except for cases with an approved Leave of Absence on the student’s record.
b. **Time Limit for Earning the Master's Degree** All requirements for the master's degree must be completed and the degree awarded within five calendar years after initial enrollment in the graduate program or the more restrictive time frame specified by the program.
   
i. Students who are unable to complete the degree within the time limits described above may, with the approval of their advisor/s and program DGS, petition the program and collegiate unit for one extension of up to 12 months. Students must submit the petition for an extension prior to the end of the term in which the time limit will expire.
   
   - If a petition is approved, the student is notified in writing of the expectations for progress and of the expected timeline for completion and award of degree.
   - If the petition is denied, the student is notified in writing that the student will be terminated from the graduate program upon expiration of the limit.
   - Students who have been terminated under such circumstances may apply for readmission to the program; however, readmission is not guaranteed.

c. **Minimum Grade Requirements** To remain in good academic standing, students must meet the minimum GPA requirement specified by the graduate program or 2.800 (on a 4.000 scale), whichever is higher. Students who have filed a master's degree plan must maintain a 2.800 GPA for courses included on the degree plan. Only courses with grades of A, B, C (including C-) and S may be counted toward the degree. Students who have not yet filed a degree plan should maintain an overall GPA of 2.800. Students who fall below the program's minimum GPA requirement may be terminated from the program.

d. **S/N grades for courses** A minimum of 2/3 of the course credits included on a degree plan must be taken A/F.

---

**Exception**

Programs with a distinctive student population or approved joint-degree programs may request a program-wide exception to the five-year time limit for earning the master's degree.

This policy does not apply to the M.B.A. [Twin Cities] degrees.

**Effective Date**

This policy applies to all students admitted after January 1, 2013. Students who matriculated before January 1, 2013 may choose to continue under the policies in effect when they initially matriculated in their graduate program.

---

**REASON FOR POLICY**

Assists student and advisor in planning for timely completion of program requirements; provides timely evaluations to students as they proceed through program; alerts student and advisors to problems, and provides opportunity to develop best approach for addressing those problems; creates clear record in cases where program decides to terminate student.

---

**PROCEDURES**

There are no procedures associated with this policy.

DEFINITIONS

Good standing/good academic standing
Students remain in good standing if they: (a) make timely progress towards degree completion as required by the program and by this policy; (b) maintain a GPA at or above the minimum set by the program and by this policy; and (c) pass all appropriate examinations within the time frame specified by the program.

RESPONSIBILITIES

Collegiate Units
- Ensure appropriate review of coursework on the degree plan (including any subsequent changes to an approved degree plan); archive the degree plan in the system of record
- Set college deadline for students who are requesting an extension to the time limit for completing master’s degrees
- Review and approve program-wide requests for exceptions to the time limit for completing the master’s degree, archive requests in the system of record
- Review and approve requests for extensions to the time limit for completing the master’s degree; archive petitions in the system of record

Departments/Programs
- Clearly state the program requirements for maintaining good standing in the Graduate Program Handbook, even if they are identical to the requirements in this policy
- Review and approve the degree plan (including any subsequent changes to an approved degree plan)
- Review and approve requests for extensions to the time limit for completing the master’s degree; notify students in writing of the decision and subsequent actions (i.e., expectations for progress and for the month/year of degree conferral or termination from the program upon expiration of the limit)

Students
- Must obtain the required approvals and file the degree plan with the collegiate unit
- Must initiate the request for an extension to the maximum time limit for completing the master’s degree, obtain the approval of their advisor(s) and program DGS, and submit their request for an extension by the deadline
RELATED INFORMATION

- Administrative Policy: Admission for Master’s and Doctoral Degrees
- Administrative Policy: Eligibility to Serve on Graduate Examination Committees
- Administrative Policy: Leave of Absence and Reinstatement from a Leave: Graduate Students
- Administrative Policy: Master’s Degree: Completion
- Administrative Policy: Readmission or Changes to Master’s or Doctoral Degree Objectives

HISTORY

Amended:
June 2017 - Comprehensive Review, Minor Revision. 1) Rewrote introduction to clarify the goal of the policy and distinguish from unrelated policies, 2) Added Leave of Absence language, 3) Clarified language related to conditions that necessarily result in discontinuation from program, 3) Clarified language regarding grading requirements for preliminary examination, removing pass with reservations when recording the final result of the prelim exam, 4) moved language on voting requirements for the prelim from an appendix to the body of the policy. Changes in policy respond to need for greater clarity on policy intent on the part of affected constituencies and enhanced consistency in policy implementation across programs.

Effective:
July 2012 - New Policy, Comprehensive Review. 1. Continues the five year time limit for master’s degrees, but provides a process for requesting a program wide exception for distinction student populations. 2. Requires an annual progress review for all master’s students. 3. Extends applicability of policy requirements to programs not formerly under the aegis of the Graduate School.
POLICY STATEMENT

This policy governs post-baccalaureate certificates approved by the Board of Regents. Such certificates may be offered by collegiate units to individuals who wish to enhance their knowledge, skills, and professional training.

I. Admission

Minimum admission requirements for post-baccalaureate certificates are the same as for master’s and doctoral degrees. Admission is governed by the Administrative policy: Admission for Master’s and Doctoral Degrees.

II. Program Requirements

Programs offering post-baccalaureate certificate plans must assure students receive graduate-level training. The minimal criteria are:

a. Plans must consist of at least 12 semester course credits.

b. All courses must be at the 4000 level or above. At least 50% of the certificate course credits must be at the 5000 level or above.

c. Students must maintain at least a 2.800 GPA (on a 4.000 scale) for satisfactory progress.

d. Only courses with grades of A, B, C (including C-) and S may be counted toward the degree.

Colleges and programs may specify additional or more stringent requirements. Colleges and graduate programs must publish these requirements and provide them to students upon matriculation.

Note: Students must have at least a 2.800 GPA for courses included on the degree plan at the time of degree clearance.

III. Transfer of Credits

a. Graduate course credits earned at other institutions may be transferred to University post-baccalaureate certificate plans subject to approval by the University graduate program. Such credits must have been earned at an accredited institution in the United States or at a non-U.S. institution judged by the graduate program to be comparable to a regionally accredited graduate program in the United States.

b. At least 60% of the graduate course credits required for the certificate must be taken at the University.

IV. Credits in Common

A maximum of three graduate course credits may be counted in common between two University post-baccalaureate certificate plans.

V. Certificate Completion Timeline

All requirements for the certificate must be completed and the certificate awarded within five calendar years after initial enrollment. Colleges and programs may set more stringent time requirements and may
allow students to petition for exceptions to the time limit.

**REASON FOR POLICY**

This policy provides a framework for offering post-baccalaureate education that is oriented primarily toward professional and skills development and that culminates in the award of a certificate.

**PROCEDURES**

There are no procedures associated with this policy.

**FORMS/INSTRUCTIONS**

There are no forms associated with this policy.

**APPENDICES**

**DEFINITIONS**

**Post-baccalaureate**
Following the completion of undergraduate studies and the award of the undergraduate degree.

**RESPONSIBILITIES**

**Colleges and Programs**
Publish the requirements for post-baccalaureate certificate plans and provide them to students upon matriculation.

**RELATED INFORMATION**

- Administrative Policy: Adding, Changing, or Discontinuing Academic Plans
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

Graduate programs make all decisions about readmission, change of degree objective, or addition of degree objective. Programs have the discretion to require a full admissions application from a student requesting a new or additional degree objective.

I. Readmission
In cases where active student status has lapsed and an individual wishes to resume graduate studies, readmission to a University graduate program is required. Readmission is not guaranteed, and colleges and programs may add conditions to the readmission (e.g., course grades older than a specified number of years may not be included in the degree plan). These conditions must be specified in writing by the time of readmission. If the specified conditions are not satisfied, the student may be terminated at the discretion of the graduate program.

II. Change to or Addition of a Degree Objective within the Same Program
Currently enrolled graduate students, or returning students, who wish to change or add a degree objective (e.g., add the doctoral degree in the same program in which they are completing a master's degree) must request the change or addition of degree objective. The student's graduate program must either approve or deny the request.

If the change is to a lesser degree (e.g., to a master's degree from a doctoral degree) in the same program to which the student was admitted, the student must still request a change of degree objective (see Procedures for Readmission/Change or Addition of Degree Objective and Associated Requirements).

III. Change to or Addition of a Degree Objective in a Different Program
Currently enrolled graduate students who wish to change to a different program, or add another degree objective in a different program, must complete and submit an application for admission. The graduate program offering the new degree must either approve or deny the request (see Procedures for Readmission/Change or Addition of Degree Objective and Associated Requirements).

IV. Exceptions
a. This policy does not apply to the J.D., M.D., Pharm.D., D.V.M., D.D.S, L.L.M., and M.B.A (Twin Cities) degrees.

b. Programs may request from their collegiate dean or unit's chief academic officer (or designee) an exception to the required use of the University's central graduate admissions application system for admission, readmission, and changes to master's and doctoral degree objectives.
REASON FOR POLICY

Decisions on readmission, and the addition or change of a degree objective, should ensure that students admitted to a program have appropriate preparation for graduate work in a particular discipline and at the intended degree level.

PROCEDURES

- Use of the Central Graduate Admissions Application System

FORMS/INSTRUCTIONS

- UM 1768 - Request for Exception: Use of the University’s Central Graduate Admission Application System for Admission, Readmission and Changes to Master’s or Doctoral Degree Objectives
- UM 1772 - Request for Express Readmission: Post-Baccalaureate Certificates, Master's and Doctoral Degree Programs
- University of Minnesota Central Graduate Admission Application System

APPENDICES

DEFINITIONS

There are no definitions associated with this policy.

RESPONSIBILITIES

Colleges

- Publish and maintain the requirements for readmission, and adding or changing a degree objective.
- Request exceptions from the Executive Vice President and Provost (or designee) to the required use of the University’s central graduate admission application system for admission, readmission, and changes to master’s and doctoral degree objectives.
• Publish and maintain the requirements for readmission, and adding or changing a degree objective.
• Approve or deny requests for readmission, change to or additions of additions a degree objective within the same program, and change to or addition of additions of a degree objective in a different program.
• Request exceptions from the collegiate dean or unit's chief academic officer (or designee) to the required use of the University's central graduate admission application system for admission, readmission, and changes to master's and doctoral degree objectives.

Central Graduate Admissions Office

• Process requests from programs for student readmission
• Communicate readmission decisions to the applicant
• Reactivate the student record for students who are readmitted

RELATED INFORMATION

• Administrative Policy: Leave of Absence and Reinstatement from a Leave: Graduate Students - Twin Cities, Rochester
• Administrative Policy: Admission for Master's and Doctoral Degrees

HISTORY

Amended:
June 2017 - Comprehensive Review, Minor Revision. 1. Documents appropriate reasons for a leave of absence. 2. Uses "discontinue" language rather than "inactive" language for accuracy about the process. 3. Clarifies language regarding semester/term including how terms are counted for leaves and discontinuation.

Effective:
May 2012 - New Policy. Establishes the University's minimum readmission and change of status requirements for master's and doctoral degrees, which help ensure that students are sufficiently prepared to succeed in obtaining their degree. Consolidates information that was previously contained in the Graduate School catalog and on the Graduate School website.
POLICY STATEMENT

Each campus will develop and maintain fair processes for resolving complaints against students and student organizations under Board of Regents Policy: Student Conduct Code. These processes will emphasize student development through understanding and accepting responsibility for personal behavior, while protecting community interests and due process. Each campus's disciplinary process will:

- provide fair notice to students of alleged violations of Board of Regents Policy: Student Conduct Code;
- encourage informal resolution of alleged violations without the need for a hearing;
- permit students the opportunity for a fair hearing upon request, and the opportunity for one campus-wide appeal of a finding of violation of the Code; and
- provide for a preponderance of the evidence (i.e. more likely than not) standard of proof.

For cases involving violations of sexual assault, sexual harassment, stalking, or relationship violence, each campus's disciplinary process will also:

- be conducted by officials who receive annual training on the issues related to sexual assault, sexual harassment, stalking, and relationship violence and how to conduct an investigation and hearing process that protects the safety of victims and promotes accountability;
- provide equitable access to an appeal by both the accused student and the reporting party;
- allow equitable access to a support person of their choice for both the accused student and the reporting party at any related meeting or proceeding;
- allow equitable access to an advocate, if permitted for either, for both the accused student and the reporting party at any related meeting or proceeding; and
- provide simultaneous written notice to both the accused student and the reporting party:
  - of the results of any disciplinary proceeding;
  - of the procedure for the accused student and the reporting party to appeal the results of the disciplinary proceeding;
  - of any change to the results prior to the time the results become final; and
  - when the results become final.

The campus will provide a hearing body to conduct hearings requested by students. The hearing body may differ depending on the college or program in which the student is enrolled and the nature of the alleged violation. Each campus will maintain a student behavior committee that may be the hearing body for any case under Board of Regents Policy: Student Conduct Code. Colleges may, however, establish their own hearing bodies to decide intracollege scholastic honesty cases under the Code (that is, cases that involve the college's student within the college's own course). Likewise, certain administrative programs, such as housing and residential life, student activities offices, and learning abroad offices, may establish and apply their own codes of conduct and hearing procedures. Any student
found to have violated Board of Regents Policy: Student Conduct Code under any of these processes is entitled to one campus-wide appeal.

---

**REASON FOR POLICY**

This administrative policy implements Board of Regents Policy: Student Conduct Code. It provides a framework for each campus to fairly resolve complaints about violations of Board of Regents Policy: Student Conduct Code.

**DEFINITIONS**

**Advocate:**
Non-attorney chosen by the party who represents the party through the disciplinary process.

**Attorney:**
An individual who has a law degree.

**Support Person:**
For sexual assault, sexual harassment, stalking, or relationship violence case, a person chosen by the party who accompanies the party through the disciplinary process but does not speak or participate in the process.

**Student organizations:**
Student-led organizations that are registered pursuant to campus policies.

**RESPONSIBILITIES**

**Chancellors:**
Ensure the establishment and maintenance of appropriate disciplinary procedures on their system campus.

**Provost:**
Ensure the establishment and maintenance of appropriate disciplinary procedures on the Twin Cities Campus.

**RELATED INFORMATION**

- Board of Regents Policy: *Conflict Resolution Process for Student Academic Complaints*
- Board of Regents Policy: *Student Conduct Code*
- Administrative Policy: *Sexual Harassment, Sexual Assault, Stalking and Relationship Violence*

**HISTORY**

**Amended:**
March 2014 - Comprehensive Review, Major Revision: 1. This policy version includes a new section that outlines required elements of a campus disciplinary process related to allegations of sexual assault, sexual harassment, stalking, or relationship violence. 2. Provides for one campus-wide appeal for the reporting party to align with recent law changes in the Violence Against Women Reauthorization Act of 2013.

**Effective:**
March 2008 - Administrative Policy to implement Board of Regents Policy: *Student Conduct Code*.
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

A. Examinations During the Term

1. Examinations during the term (e.g., mid-terms) will normally be given only during the regular class sessions, except that make-up exams may be given at other times arranged to accommodate student class schedules. Exams may be held at times other than the regularly scheduled class period only under unusual circumstances, and only if approved by the dean of the college in consultation with the Vice Provost and Dean of Undergraduate Education or the appropriate decision-making office on the system campuses. Any regularly scheduled examination to be held outside of regular class time must be listed in the published class schedule.

2. Accommodation must be provided by the examining department(s) to any student who encounters an academic conflict, such as between an examination scheduled outside of regular class time and the regular class period of another course, or between two exams scheduled to be held simultaneously outside of regular class time.

3. Comprehensive examinations, which require reflection, study, and application of the work of the entire semester, are strongly encouraged, but must be given during the final examination period. The only examinations allowed during the last week of classes are those equivalent in scale, scope, length, and percent of grade to other examinations given in that class during the term. Although late-semester examinations may rely on cumulative knowledge of the work of the course during the semester, such examinations must not be comprehensive in nature if they are given prior to the final examination period. In a course where only one examination is given during the term, that examination must be given during the final examination period.

4. Take-home examinations are specifically exempted from this section of the policy.

B. Final Examinations

1. All classes that normally permit undergraduates to enroll will follow the standard examination schedule. Final examinations on the Twin Cities campus will extend over a six-day period. It is not a violation of this policy for a faculty member to use secure online test-taking, authorized by the academic unit, that permits students to take an exam at a time of their choosing rather than at a scheduled final examination time. System campuses will each determine the length of their final examination period.

2. Final examinations normally will be two clock hours (120 minutes) long.
3. Instructors may schedule longer examinations with the approval of their department, which will arrange longer use of the examination room with the appropriate campus scheduling office. Instructors and departments must decide in advance of scheduling a course if the examination is to exceed two hours, and must work with the campus office that schedules central classrooms on scheduling the location of the exam. Any examinations that exceed two hours must be noted in the class schedule, in order that students are informed and can try to fit the longer examination in their schedule of final examinations. Accommodation must be provided by the examining department to any student who encounters a conflict with another final examination because of this lengthened examination time.

4. Instructors may offer take-home final examinations (but see 7(c) below).

5. For courses that do not run for a full semester, the final examination will be administered (or due, in the case of take-home or other out-of-class examinations) on the last day of the course, except that short courses that end with the semester may use the final exam time scheduled for that course.

6. The requirement that the final examination period on the Twin Cities campus be six days will not apply to units that have been granted an exemption from the University calendar by the Senate Committee on Education Policy.

7. Final examinations at times other than regularly scheduled:
   a. **Examinations outside the final examination period.** Instructors are permitted to schedule their final examinations outside of the scheduled examination days only under extraordinary circumstances and with the approval of their dean and the campus academic officer. (For the Twin Cities, this is the Vice Provost and Dean of Undergraduate Education.)
   b. **Moving an examination within the final examination period.** When an instructor and students conclude they wish to move the final examination for the course to a different time and/or day during the final examination period, the change must be (1) proposed by the instructor, (2) have the concurrence of the department chair, and (3) must be approved unanimously by written secret ballot by students in class when the vote in taken.
   c. Laboratory practicums may be given during the final week of classes during the normal lab period, and take-home or other out-of-class finals may be distributed prior to the final exam period but may not be due before the scheduled final exam for that course.
   d. Students with final examination conflicts, or with three (or more) final examinations in one calendar day, will be expected to notify and provide documentation to instructors as soon as possible during the term. Instructors are expected to make appropriate accommodation to eliminate the conflict. In the event none of the instructors agrees to make appropriate accommodation, the student should contact the student’s advisor. If a student has three or more examinations in one day because one exam date was changed, the instructor who changed the exam must make the accommodation. Note: this section does not cover cases where a student has three (or more) examinations from morning to evening the same day.
   e. **Summer term final examinations.** Final examinations for summer terms will be scheduled during the regular meeting time of the course on the last day.

**C. Study Days**
Each campus will decide whether or not to have a Study Day; when the calendar permits, a Study Day should be added to the schedule. For campuses that choose to have one, the final examination period will begin on the second day after classes end, with the day after classes designated as a Study Day. In the event classes end on a Friday, final examinations will not start until the following Monday and Saturday and Sunday will be designated Study Days.

**D. Classes and Events During the Study Day/Finals Period**
1. No classes will be permitted after the last scheduled day of instruction for that term/semester for any course that normally includes undergraduate students. Instructors may not schedule classes on a Study Day.
2. Instructors may not hold a regular class during the final examination period (which can interfere with students’ other exams) and may not hold a class during the first hour of the examination period and then conduct the final examination during the remaining hour(s).
3. No University-sponsored extra-curricular events, which require the participation of students, may be scheduled from the beginning of Study Day to the end of Final Examinations. Exceptions to this policy may be granted ONLY by the Senate Committee on Educational Policy. Instructors must provide an alternative and timely opportunity for students to complete course requirements they were unable to complete because of an absence permitted by this policy.

**Exclusions**
This policy is not applicable to the Duluth campus.

**Special Situations**
The Senate Committee on Educational Policy has the authority to grant waivers to the provisions of this policy, and will report such waivers to the Faculty Senate at its next meeting.

---

**REASON FOR POLICY**

This policy defines exams and outlines common scheduling practices and guidelines to allow students and faculty to plan for Study Day and examinations with a minimum of scheduling conflicts.

**DEFINITIONS**

**Study Day**
A day designated in the Academic Calendar reserved for study, which occurs immediately before finals period or during finals period; no required classes or exams may be scheduled on a Study Day.
RESPONSIBILITIES

There are no specific responsibilities associated with this policy.

RELATED INFORMATION

- Administrative Policy: Makeup Work for Legitimate Absences

HISTORY

Amended:
May 2016 - Comprehensive Review, Minor Revision. 1. Clarifies that a course with a single exam must have the exam during the finals week. 2. Replaces “coordinate campuses” label with “system campuses”. 3. Provides clarity around the final exam period. May not necessarily be a final exam week.

Amended:
December 2009 - Policy now applies to Crookston.

Effective:
April 2009

University Policy Program
140 McNamara Alumni Center, Minneapolis, MN 55455 - P: 612-624-8081
policy@umn.edu

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

Introduction
The University supports and promotes international travel and education abroad by students for University purposes, while encouraging sound health, safety and security measures that minimize risks to the traveler and institution. This policy includes the minimum pre-departure requirements and minimum requirements while abroad. The education abroad office on each campus may have additional requirements.

Units Pre-Travel and Program Planning Requirements
All University units (including campuses, colleges, departments, centers, offices, or other operational units) and education abroad offices organizing or promoting student travel abroad must:

- complete a due diligence review of all programs before promoting them to University students;
- ensure appropriate contracting of partners;
- develop a 24-7 contact protocol and emergency plan;
- obtain International Travel Risk Assessment and Advisory Committee (ITRAAC) approval before promoting any program in a United States Department of State (USDOS) Travel Warning Country;
- ensure completion of the student requirements; and
- ensure completion of faculty/staff leader requirements, where relevant.

Undergraduate travel: All University units must work through one of the University's education abroad offices prior to organizing or promoting undergraduate student travel abroad for University purposes.

All University units supporting student travel (e.g. scholarship, credit, degree requirement etc.) that they are not organizing or promoting, must:

- notify students of the student requirements listed below; and
- provide students with a 24-7 University contact information.

Education Abroad Offices
In addition to the requirements above, each education abroad office in the system must also:

- register students for USDOS Smart Traveler Enrollment Program (STEP) or advise them on self registry;
- implement the student health disclosure form and process;
- implement consistent processes for any participant under the age of 18;
- implement the student behavior review and code of conduct policy/process; and
for any program with a program leader:
  - require the program leader acknowledgement form from the leader;
  - implement the program leader health process;
  - implement the program leader companion process; and
  - ensure staff/faculty led programs have two program leaders.

**Student Pre-Travel Requirements**

All students must complete the following requirements in advance of this travel:

- register their travel officially with the University;
- sign a Student Release and Waiver detailing their academic, financial, behavioral, travel risk and health-related responsibilities while abroad;
- obtain University-approved international travel, health and security insurance;
- create an emergency communications plan;
- complete the mandatory online health and safety orientation; and
- address any health and safety concerns prior to departure (e.g., check-ups, immunizations).

In addition, students must discuss self-identified travel plans (international activities not promoted by the University) with an appropriate education abroad office, University faculty and/or staff member prior to confirming travel plans.

All travelers are strongly encouraged to register with the USDOS Smart Traveler Enrollment Program (STEP) and review the [USDOS](#), [Centers for Disease Control (CDC)](#) and [World Health Organization (WHO)](#) resources for their planned destination.

**Travel Approval**

The University does not encourage travel to a country subject to a current travel warning issued by the U.S. Department of State (USDOS Travel Warning Country).

**Pre-Approval of Student Travel**

Any student planning to travel for University purposes, as well as any faculty member or staff planning to lead or travel with any University students, to a USDOS Travel Warning Country must obtain approval from the International Travel Risk Assessment and Advisory Committee (ITRAAC). Units who wish to promote an education abroad opportunity in a USDOS Travel Warning Country must receive ITRAAC approval prior to promotion. The University, in its sole discretion, may deny approval for international travel. In addition, travelers may be required to submit a request for permission to travel to locations or participate in programs that pose a specific health, safety, or security concern as indicated by authorities other than the U.S. Department of State, such as the Center for Disease Control (CDC), World Health Organization (WHO), non-U.S. government authorities (e.g., Australian or Canadian authorities), and University of Minnesota authorities.

**Suspension of Travel**

ITRAAC will review student travel currently in process when a significant health or safety concern arises regarding that travel including new and renewed USDOS travel warnings or advisories, travel warnings from the CDC or WHO, natural disasters, wars or other political disturbances, or other indicators of potential health or safety threats. The University, in its sole discretion, may withdraw approval for international travel at any time.

**While Abroad**

Students, and faculty/staff/units traveling with students and/or organizing, promoting or supporting student programs abroad, must keep their University contact apprised of any changes to their address and contact information while abroad. Changes should be submitted as soon as possible and at a minimum within 24 hours of the change taking effect.

Students are held to Board of Regents Policy: [Student Conduct Code](#) while abroad for University purposes in addition to any additional codes of conduct or behavior codes from the University unit organizing, promoting or supporting travel, education abroad office, affiliate or host.

Students are not permitted to drive motor vehicles (including but not limited to scooters, motorbikes, motorcycles and cars) while participating in an education abroad opportunity.

Faculty and staff may not drive vehicles in which students are passengers abroad without an approved exception from the Office of Risk Management in advance of departure from the U.S. Faculty and staff who need transportation for students must either use public transportation or hire a local driver/vehicle.

**Travel in Violation of this Policy**

Students who choose to travel in violation of this policy are acting outside the control and responsibility of the University. If the travel is occurring during a required term, the student must take a leave of absence from the...
University, where possible. Students on leave of absence from the University are not eligible for financial aid, scholarship, travel stipends and other University supports including credit. If a leave of absence is not an option, students who travel in violation of this policy risk losing their student status.

Exclusions
This policy does not apply to personal, non-University travel by students. For information on reimbursement for travel and faculty and staff travel requirements, see Administrative Policy: *Traveling on University Business*.

REASON FOR POLICY

This policy endeavors to support education abroad by balancing the educational value of participation in international activities with the potential risks to the welfare and safety of students.

**DEFINITIONS**

**Education abroad/University purpose travel**

Travel by students (both for credit and not for credit) that is affiliated with the University in any way. This includes, but is not limited to:

- travel through one of the University's education abroad offices sponsored or affiliated programs;
- travel through unit organized or promoted education abroad programs or activities;
- travel to a University or unit exchange partner;
- travel as part of, or in support of, a University research activity;
- travel for University credit;
- travel that fulfills a degree requirement (including internships, field studies, service learning, research);
- travel that fulfills University contractual agreements;
- professional development opportunities promoted by or supported by any University unit (including conference attendance);
- travel for which you are acting as a representative of the University;
- travel for University athletics;
- travel supported by University funding including grant awards, scholarships, informal financial awards and financial aid;
- travel with, or organized by, a University faculty or staff member; and
- travel with a University Campus Life Program.

Students traveling abroad for University purposes, including education abroad, are held to this policy within the dates of their activity. Thus, they must follow this policy for any weekend or overnight travel taken during the activity. See definition of non-University travel below for more information on when this policy does not apply.
**Campus Life Program**

A University program similar to a student organization in purpose and composition but whose activities, operations, and decision-making processes are directly governed by University academic or administrative departments, and for which the University is ultimately responsible. A CLP is considered part of the University and is required to have a designated University faculty or staff advisor. University Recognized Organizations (URO) at Morris and Recognized Student Groups (RSG) at Rochester are treated like CLPs for the purpose of this policy.

**Faculty and staff**

Full and part-time faculty, including adjunct faculty and staff employees at the University. Graduate assistantship appointments and other appointments that require student status are not considered employees for the purpose of this policy. Where faculty and staff are also taking classes, they are faculty/staff when traveling for work and a student when traveling for education/coursework.

**International travel**

Travel to any country (including Mexico and Canada) or territory outside the continental U.S. (CONUS), Alaska and Hawaii. Travel to the non-contiguous US locations of American Samoa, Guam, Midway Islands, Northern Mariana Islands, Puerto Rico, the U.S. Virgin Islands, and Wake Island are considered international travel for purposes of this policy and CISI insurance purposes.

**International Travel Risk Assessment and Advisory Committee (ITRAAC)**

Committee responsible for reviewing all proposed student travel to USDOS Travel Warning Countries and other locations that pose a specific health, safety, or security concern as indicated by authorities other than the U.S. Department of State, such as the Center for Disease Control (CDC), World Health Organization (WHO), non-U.S. government authorities (e.g., Australian or Canadian authorities), and University of Minnesota authorities. Committee has University-wide jurisdiction and its decisions apply uniformly to all campuses. Composed of the Associate Vice President and Dean for International Programs (Chair), the General Counsel, the Associate Dean of Graduate Education, and the Vice President for Health Sciences (officials may delegate their responsibilities to others within their areas of authority and consult other administrators, faculty and experts as they choose). The Dean of the School of Public Health will serve on the committee whenever a decision is being considered to cancel or suspend an education abroad opportunity for public health reasons.

**Non-University travel**

Travel that is not related to the University in any way. This means travel that is not in support of University business, programs or education and for which the University assumes no control or responsibility, and therefore this policy does not apply. Examples include:

- Registered Student Organization travel (see definition below) that is not otherwise funded or supported by the University (see Education abroad/University purpose travel above);
- Personal travel such as vacation;
- Personal travel before or after a University/education abroad activity.

**Registered Student Organization (RSO)**

A voluntary association composed primarily of students that has no direct relationship to the University; but upon completion of the established registration process is entitled to certain privileges including operating, meeting, advertising, and participating in activities on the University of Minnesota campuses, as well as eligibility to receive services from the University. Also referred to as an Independent Student Group (Morris) and Non-Recognized Student Organization (Rochester).

**Sponsored or Affiliated Programs through Education Abroad Offices**

Sponsored programs are study abroad experiences developed, administered and evaluated by an education abroad office. Affiliated programs are administered by other institutions/organizations and approved by the University (students will receive support and services from the education abroad office, and credits will be posted as resident credit).

**Students**

Any undergraduate, graduate or professional student enrolled in a degree program, credit bearing non-degree program, professional certificate or executive education program at the University. Students traveling as part of assigned duties within an assistantship are considered students and not employees for the purpose of this policy.

**Unit**

A campus, college, department, program, research center, institute, business center, office or other operating unit.

**Unit Organized or Promoted Travel**

Student travel or education abroad activities organized or promoted by a University unit. This includes programs for the unit administers directly as well as any education abroad opportunities administered outside the University for which a University staff or faculty member has promoted to students (via email, word of mouth, print, etc.). Units are required to comply with the Procedure: Preparing for Student Travel and Education Abroad (Units) and, for all undergraduate student travel abroad, work through one of the University's education abroad offices.
Unit Supported Travel
Student travel or education abroad activities NOT organized or promoted by a University unit but supported by a unit by providing funding, offering credit, fulfilling a degree requirement, etc. Units are required to notify students of the student requirements in this policy and provide students with a 24-7 University emergency contact.

U.S. Department of State (USDOS) Travel Warning Country
A country subject to a current travel warning issued by the U.S. Department of State. Travel warnings are issued when long-term, protracted conditions make a country dangerous or unstable and lead the State Department to recommend that Americans avoid or consider the risk of travel to that country. A travel warning is also issued when the U.S. Government's ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff. See list of countries subject to a travel warning at http://travel.state.gov/travel/cis_pa_tw/tw_1764.html.

RESPONSIBILITIES

Associate Vice President and Dean for International Programs
Promotes the global dimensions of teaching, research, and engagement across all colleges and campuses of the University. Chair the International Travel Risk Assessment and Advisory Committee (ITRAAC).

Director of International Health, Safety and Compliance, GPS Alliance
Provide background information on specific health and safety risks and participate in the decision whether to cancel or suspend education abroad opportunities. Call a meeting of the International Travel Risk Assessment and Advisory Committee (ITRAAC). Notify unit and/or program directors when an educational opportunity has been suspended or canceled by the committee and when ITRAAC approves applications to travel to a USDOS Travel Warning Country or other locations that pose a specific health, safety, or security concern as indicated by authorities other than the U.S. Department of State, such as the Center for Disease Control (CDC), World Health Organization (WHO), non-U.S. government authorities (e.g., Australian or Canadian authorities), and University of Minnesota authorities. A member of the director's staff will provide assistance to ITRAAC applicants and facilitate ITRAAC reviews of applications.

Education abroad offices
Ensure compliance with University policy for all programs and activities they support. Serve as a resource to units, faculty and staff planning international activities.

The following are the education abroad offices:
- Carlson School of Management Global Institute
- Crookston Learning Abroad Office
- Duluth International Education Office
- Morris Academic Center for Enrichment
- Twin Cities' Learning Abroad Center

Export Controls Officer and Designated Cuba Representative
Reviews and approves proposed student travel to embargoed countries and works with travelers to apply for any licenses needed for U.S. citizens to travel to Cuba. Advises on any restrictions that may apply during travel to embargoed countries.

Faculty, staff and unit organizing or promoting travel and/or leading student travel abroad
Ensure compliance with University policy before and during organizing or promoting travel or leading student travel abroad.

International Travel Risk Assessment and Advisory Committee (ITRAAC)
Determine when to cancel or suspend education abroad opportunities because of significant health or safety risks to students at any time. In the members' absence, appoint alternates to serve on the ITRAAC. Make exceptions to suspension of education abroad opportunities and approve applications for travel to USDOS Travel Warning Countries or other locations that pose a specific health, safety, or security concern as indicated by authorities other than the U.S. Department of State, such as the Center for Disease Control (CDC), World Health Organization (WHO), non-U.S. government authorities (e.g., Australian or Canadian authorities), and University of Minnesota authorities on a case-by-case basis.

Office of General Counsel (OGC)
Create and approve the student release and waiver. Serve on the International Travel Risk Assessment and Advisory Committee (ITRAAC). Work with the International Health, Safety and Compliance Director to review mandatory health and safety orientation, assist faculty and staff with related questions and resources while abroad.

Office of Risk Management (ORM)
Regularly review and approve the University's mandatory international travel, health and security insurance. Work with the International Health, Safety and Compliance Director to review mandatory health and safety orientation, assist faculty and staff with related questions and resources while abroad.

**Purchasing/Travel Services**
Advises University faculty and staff on appropriate contracting procedures for activities involving travel or purchasing. Assists those traveling for University purposes on a variety of travel items. Ensures the integrity, accountability, and efficiency of purchasing processes.

**Students**
Complete the requirements detailed in this policy and procedures before departure on international travel. Take independent measures to promote one's own safety, the safety of fellow travelers and the safety of the broader University community including consulting with experts on the region of travel, as appropriate. Abide by the University Student Code of Conduct while abroad.

**HISTORY**

**Amended:**
October 2014 - 1. Adds the involvement of the collegiate dean(s) in any situation where ITRAAC is considering a rejection (or request to delay travel) of an application submitted by a graduate student. 2. Explicitly notes the role of the Vice President for Academic Affairs when consensus cannot be reached. 3. Standardizes processes carried out the education abroad offices across the University system. 4. Clarifies the pre-travel and program planning requirements for units and students. 5. Adds a new requirement that units may not promote or organize an education abroad opportunity for undergraduates unless they work through an education abroad office. Title changed from *Education Abroad Opportunities: Addressing Health and Safety Risks to Student Travel and Education Abroad: Health and Safety*

**Amended:**
January 2009 - Statement and Responsibilities clarified, Updated Contacts section, Updated procedures, and added Appendix: International Insurance Eligibility Requirements.

**Amended:**
January 2007 - Statement, definitions and responsibilities and procedures rewritten.
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
**Policy Statement**

Instructors are required to develop a course syllabus for each offering of a course and communicate the syllabus to students unless the course is offered to an individual student (e.g. directed study, readings or research courses that require contracts between the student and instructor). For the purposes of this policy, a syllabus is a written or electronic document that contains information students need to know in order successfully to complete the work of the course.

Each syllabus includes two types of information. First is information specific to the course such as its title, goals, readings, assignments and instructor. Second is information informing students of University policies that may have an impact on their participation in the course. This information includes, for example, the University grading system, a disabilities statement, and how to resolve problems between students and instructor.

**A. Syllabus Requirements: Information Specific to the Course**

The elements listed in this section of the policy are required. This information may also be distributed or provided by the department or college if done so routinely and explicitly. (For additional recommendations for good practice in teaching, see Administrative Policy: *Teaching and Learning: Instructor and Unit Responsibilities: Twin Cities, Crookston, Morris, Rochester*).

1. Catalog information such as the course name, department, number, meeting time, meeting place, and credits.
2. Instructor’s name and contact information.
3. Course pre-requisites if any exist.
4. Course goals and objectives. (For undergraduate courses on the Twin Cities campus, instructors are encouraged to identify learning and development outcomes addressed by the course. See the Administrative Policy: *Undergraduate Student Learning and Development Outcomes: Twin Cities, Crookston, Morris, Rochester*).
5. Required and recommended materials and, if necessary, the location of materials. After the second week of the term, minor, but not major, changes in the assigned readings may be made (see Administrative Policy: *Teaching and Learning: Instructor and Unit Responsibilities: Twin Cities, Crookston, Morris, Rochester*).
6. General description of assignments, papers, projects, exams and other student work with a schedule of approximate due dates and relative weight in the grade. Minor but not major changes may be made to assignments after the second week of the term.
7. Description of any course meetings that occur outside of the regularly scheduled class time (see Administrative Policy: Teaching and Learning: Instructor and Unit Responsibilities: Twin Cities, Crookston, Morris, Rochester).

8. Attendance requirements and penalties if any (see the Administrative Policy: Enrolling in Overlapping or Back-to-back Classes: Twin Cities, Crookston, Morris, Rochester).

9. Statement on extra credit. If an instructor wishes to offer what is commonly known as extra credit opportunities for students in a class to allow them to improve their grade, those opportunities must be announced and made available to all students. (This provision does not address the option of increasing the number of credits a student may earn for the course.)

10. Policy for making up missed exams and grading late work.

11. The date, time and place of the final examination if one is scheduled. Instructors who schedule final exams that are longer than two hours must provide alternative testing times for students who have other final exams scheduled during that time (see the Administrative Policy: Scheduling Examinations, Final Examinations, and Study Days: Twin Cities, Crookston, Morris, Rochester).

B. Syllabus Requirements – Policy Statements

Instructors must have as part of the syllabus copies of, references to, or statements on the following and are encouraged to discuss elements of the policies particularly applicable to their course (see Appendix - Recommended Policy Statements for Syllabi):

5. Board of Regents Policy: Sexual Harassment, Sexual Assault, Stalking and Relationship Violence.

8. Statement about the availability of mental health and stress management services.

The Office of the Executive Vice President and Provost will prepare electronic copies of these policy statements for instructors to incorporate into syllabi. Instructors are encouraged to provide paper copies of these policies to classes with first-year students.

Exclusions

This policy is not applicable to the Duluth campus.

REASON FOR POLICY

Students need a consistent level of basic information about the content and expectations for each course in which they are enrolled. This policy outlines the minimum components of a syllabus and notes recommended policy statements for inclusion, to ensure that instructors communicate course requirements to students in writing and in a timely manner. This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.

PROCEDURES

There are no procedures related to this policy.

POLICY STATEMENT

The University promotes community-building activities for its faculty, staff, students, and visitors, and recognizes that tailgating has the potential to enhance the TCF Bank Stadium event experience within a safe, responsible, and controlled environment.

Tailgating is permitted only on Gopher football game days in designated areas, during specified hours, and under the conditions specified in the Tailgating Rules. Tailgating is not permitted for events at any venue on the Twin Cities campus other than TCF Bank Stadium.

Violations

Individuals who violate this policy, the Tailgating Rules, or applicable policies, rules, or law may be assessed fines; lose their season tickets, parking, or tailgating privileges; be removed from campus; and, for students, be subjected to disciplinary action under Board of Regents Policy: Student Conduct Code.

Exceptions

This policy supports the Gopher football experience. The vice president for University Services may approve tailgating at non-Gopher football events held in TCF Bank Stadium at their discretion.

In rare instances, the vice president for University Services in consultation with the director of Intercollegiate Athletics may grant exceptions to the Tailgating Rules within the scope of the law.

This policy applies to the Twin Cities campus only, and only to those events held in TCF Bank Stadium.

REASON FOR POLICY

To provide the framework for responsible tailgating on Gopher football game days or approved TCF Bank Stadium event days that enhances the event experience, promotes a safe campus environment, and preserves the beauty of the campus.

PROCEDURES

There are no procedures associated with this policy.
FORMS/INSTRUCTIONS

There are no forms associated with this policy.

DEFINITIONS

Tailgating
Pre- and post-game festivities outdoors in designated tailgating locations which may include some or all of the following: eating food, drinking beverages (alcoholic or nonalcoholic), grilling, or a canopy.

RESPONSIBILITIES

Director, Intercollegiate Athletics
- Jointly administer the policy, including maintaining Tailgating Rules and communicating policy and rules for responsible tailgating to participants.

University of Minnesota Parking and Transportation
- Open and close designated tailgating areas on football game days.

University of Minnesota Police Department
- Enforce applicable laws and Tailgating Rules on football game days.

Vice President for University Services
- Jointly administer the policy, including maintaining Tailgating Rules and communicating policy and rules for responsible tailgating to participants.
- Determine, in consultation with appropriate University administrators and Intercollegiate Athletics, the University-authorized locations and hours for tailgating on Gopher football game days.
- Determine exceptions for TCF Bank Stadium events that are permitted to tailgate.

- *Using and Leasing University Outdoor Space: Twin Cities*

**HISTORY**

Amended:
February 2018 - Comprehensive Review, Minor Revision. The main change is to clarify that the policy applies specifically to events at TCF Bank Stadium, and not at other stadiums or arenas. It also specifies that the policy applies to Gopher football games, not necessarily to other football games that may take place at TCF Bank Stadium.

Amended:
January 2014 - Comprehensive Review, Major Revision. 1. Expands the applicability of the policy to other major stadium events on the Twin Cities campus, such as concerts. 2. Revises the list of lots in which tailgating is allowed, and addresses hours for tailgating on weekdays and for the RV tailgating lot. 3. Prohibits pets on tailgating lots and includes a new reference to the Board of Regents policy on weapons.

Effective:
January 2009
POLICY STATEMENT

Instructors have a responsibility to establish and maintain a civil, productive, inclusive, and stimulating learning environment. Both instructors and students have a fundamental obligation to respect the instructional setting as a place for civil, courteous discourse. Instructors have a responsibility to accommodate students with documented disabilities and are encouraged to invite students to talk or communicate with them about such circumstances.

Instructors have a responsibility to accommodate legitimate student absences and student exam conflicts in accordance with the policies (1) Intercollegiate Athletic Events During Study Day and Finals Week, (2) Makeup Work for Legitimate Absences, and (3) Scheduling Examinations, Final Examinations, and Study Days.

Instructor Responsibilities

A. Provide Course Information
Instructors are responsible for providing accurate and timely information about their courses to prospective students, current students, and relevant members of the University community.

1. Instructors must provide academic units and students with accurate course descriptions in a timely fashion. Instructors should use official information tools, to provide information about courses to students.

2. The course descriptions available in University catalogs and/or in the Course Guide must be generally consistent with the content of the actual course taught, though the content may vary somewhat with the individual instructor and across sections.

3. At the beginning of each course, instructors must communicate the course objectives. Class activities should be directed toward the fulfillment of these objectives and student performance should be evaluated in relationship to these objectives.

4. If an instructor changes the course requirements or materials, students should be given timely notice consistent with the magnitude of the change (e.g., a few days of notice for an additional article to read or a few weeks of notice if a paper is added). No major change (e.g., adding a research paper or major examination) should be imposed after the second week of the semester.

5. In accordance with Administrative Policy: Grading and Transcripts, instructors must inform students in their classes of the methods to be used in determining course grades, i.e., evaluation criteria and the contribution to the final grade of each graded component.

6. At the beginning of the course, instructors must inform students of any requirements related to regular course attendance and participation.
7. At the beginning of the course, instructors must inform students of any special attendance requirements. This includes, insofar as possible, specific dates, times, and places of additional outside-of-class work such as field trips, study sessions, or extra class meetings, and whether or not attendance at these additional activities will be reflected in the grade. If an instructor schedules mandatory activities that occur outside the regularly scheduled class time, information about these activities must be included on the syllabus and, when possible, in the class schedule.

8. Instructors should discuss scholastic dishonesty and what it means in the context of their class (e.g., whether collaboration is permitted and limits on it, requirements about and methods for citing sources, whether direct quotes are allowed and to what extent, receiving or giving aid on tests, and using electronic aids or communications during exams when prohibited).

B. Provide Students with Access to and Feedback on Their Work

1. Instructors must evaluate examinations and other student work with sufficient promptness to enhance the learning experience. Instructors must promptly return examinations or permit students to review their exams to request clarification of grades.

2. Instructors should specify the process and schedule for returning student work during the semester. Term papers and comparable projects are the property of students who prepare them (see Board of Regents Policy: [Copyright](#)). Instructors who desire to retain a copy for their own files should state their intention to do so.

3. Instructors are strongly encouraged to provide sufficient graded feedback early in the term and before the deadline for withdrawing from classes to enable students to assess their progress in the course.

4. Instructors must turn in grades within three business days after the last day of final examinations.

5. Instructors must provide mid-term alerts to students in 1-xxx courses who are at risk of failing a class, in accordance with the provision of the policy on Mid-term Alerts.

C. Secure Handling of Examinations

Instructors must maintain the security of student examinations both before and after exams are given. For those using a University office, such as the Office of Measurement Services (OMS), for scoring answer sheets, instructors or their designate (departmental office employee or teaching assistant) must submit examination answer sheets in the manner prescribed by that office.

D. Observe Scheduled Class Times

1. Instructors are expected to meet their classes at the scheduled times, to be prepared for all class sessions, and to start and end classes at the scheduled times.

2. When instructors know in advance that they will be unable to attend particular class sessions, they are responsible for working with their academic unit to make appropriate alternate arrangements.

E. Observe Office Hours or Appointment Times

Instructors must schedule and keep a reasonable number of office hours or appointment times for student conferences. The minimum number of office hours or appointment times may be defined by the academic unit.

F. Report Scholastic Dishonesty

Instructors are obligated to report suspected scholastic dishonesty to their departments and to the appropriate office on campus (on the Twin Cities campus, the Office for Community Standards; at Morris, the Office of the Vice Chancellor for Student Affairs; at Rochester, the Office of Student Affairs; and at Crookston, the Vice Chancellor of Academic Affairs and Student Life).

G. Maintain an Appropriate Learning Environment

Instructors should take appropriate steps to have removed from class students who disrupt the educational process because of discourteous, threatening, harassing, or other aggressive behavior. "Appropriate steps" may include calling the University Police.

H. Maintain the Classroom Environment

Instructors are expected to leave the classroom and its equipment in good order (e.g., white/blackboards clean, chairs arranged, electronic equipment shut off).

Academic Unit Responsibilities

A. Maintain an Appropriate Schedule

1. Courses must be offered on a schedule, and frequently enough, to permit students to graduate in a timely fashion. All undergraduate departments must have a four-year graduation plan in place and must have course offerings that support it.

2. Classes must be offered at standard times. Failure to observe standard class periods leads to inefficient use of classrooms and is disrespectful of students and faculty: students are forced to be late to other classes, and faculty access to classrooms they need is reduced.
Academic units are responsible for retaining course records in accordance with Administrative Policy: Maintaining Records of Student Work.

Exclusions
This policy is not applicable to the Duluth campus.

REASON FOR POLICY

This policy clarifies and outlines responsibilities, to provide clear expectations for the instructor and the instructor’s department and college. Faculty and students need a common understanding of their responsibilities for the learning process. This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

1. How do these instructor responsibilities apply to courses in which instruction is provided by more than one individual, for example, a course in which a faculty member and teaching assistants share responsibilities?
   The person in charge of the course (e.g., the lead instructor, course coordinator, faculty member supervising teaching assistants who work with the faculty member within a course) is responsible for ensuring that standards and policies are applied consistently to all students enrolled in the course. The lead instructor is responsible for communicating this information to teaching assistants, responding to questions, and ensuring a common understanding among everyone who is part of the instructional team for the course.

Amended:
September 2014 - Added clarifications related to Higher Learning Commission accreditation requirements.

Amended:
December 2013 - Comprehensive Review, Minor Revision. Includes language from the retired policy on classroom environment.

Amended:
December 2009 - Policy now applies to Crookston.

Amended:
April 2009 - Clarified policy and put in standard format. Added contact information.

Effective:
April 2009

Supercedes:
Classroom Expectations Guidelines

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

1. Satisfying prerequisites. Students should not register for courses in which they lack the prerequisites unless they have permission from the instructor.

2. Responsibility for class work. Students are responsible for knowing all information contained in the syllabus. Students are responsible for meeting all course requirements, observing all deadlines, examination times, and other course procedures.

3. Attending class.
   a. Students are expected to attend all meetings of their courses. They may not be penalized for absence from class, however, to participate in religious observances, for approved University activities, and for other reasons in accordance with the policy on Makeup Work for Legitimate Absences. Students should notify instructors as soon as possible about such absences. (See Administrative Policy: Makeup Work for Legitimate Absences: Twin Cities, Crookston, Morris, Rochester).
   b. Students must attend the first class meeting of every course in which they are registered unless(1) they obtain approval from the instructor before the first meeting or (2) they provide notice to the instructor they must miss class because of a recognized religious holiday (see the policy on Mandatory Attendance at First Class Session and Consequences for Absence). Otherwise, they may lose their places in class to other students. (See Administrative Policy: Mandatory Attendance at First Class Session and Consequences for Absence: Twin Cities, Crookston, Morris, Rochester).
   c. Students are responsible for being on time and prepared for all class sessions.

4. Maintaining academic integrity. Students are expected to maintain academic integrity, including doing their own assigned work for courses. If it is determined that a student has engaged in scholastic dishonesty, the instructor may impose an academic consequence (e.g., giving the student a grade of "F" or an "N" for the course), and the student may face additional sanctions from the University. (See Board of Regents Policy: Student Conduct Code, Section VI, Subd 1, Scholastic Dishonesty, and Administrative Policy: Grading and Transcripts: Twin Cities, Crookston, Morris, Rochester).

5. Seeking help and accommodation.
   a. Students are responsible for seeking academic help in a timely fashion.
   b. Students who need special accommodations are responsible for working first with the relevant University offices and then with the instructor at the beginning of the course.

6. Respecting intellectual property. Students may not distribute instructor-provided notes or other course materials, except to other members of the same class or with the express (written) consent of the
instructor. Instructors have the right to impose additional restrictions on course materials in accordance with copyright and intellectual property law and policy. Students may not engage in the widespread distribution or sale of transcript-like notes or notes that are close to verbatim records of a lecture or presentation.

7. **Keeping classroom in good order.** Students may be responsible for helping straighten up a classroom at the end of a class period, if requested to do so by the instructor. Keeping a classroom in good order includes taking away or disposing of everything one came in with, such as pop cans/bottles, food containers/wrappers, newspapers, etc. Students must also not deface or damage classrooms or classroom furniture or equipment.

8. **Use of personal electronic devices in the classroom.** Instructors determine if personal electronic devices (such as cell phones and laptops) are allowed in the classroom. Students may be directed to turn off personal electronic devices if the devices are not being used for class purposes. Students are not permitted to record any part of a class/lab/other session unless explicitly granted permission by the instructor. If the student does not comply, the student may be asked to leave the classroom.

9. Guests may not be brought to class without permission from the instructor.

**Exclusions**

This policy is not applicable to the Duluth campus.

---

**REASON FOR POLICY**

This policy clarifies and outlines student responsibilities and expectations for enrollment and participation in a course. Faculty and students need a common understanding of their responsibilities for the learning process. This policy implements criteria and requirements for accreditation established by the Higher Learning Commission.

DEFINITIONS

Prerequisite
A course that is a necessary requirement before subsequent advanced courses.

Scholastic Dishonesty
Plagiarism; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using course materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; altering, forging, misrepresenting, or misusing a University academic record; or fabricating or falsifying data, research procedures, or data analysis.

RESPONSIBILITIES

Responsibilities are specified in the Policy Statement.

RELATED INFORMATION

HISTORY

Amended:
September 2014 - Clarifications related to Higher Learning Commission accreditation requirements.

Amended:
May 2013 - Major Revision, Comprehensive Review.
1. Incorporates language from two related policies (Appropriate Use of Class Notes and Course Materials, and Use of Personal Electronic Devices in the Classroom). These policies are proposed for elimination.
2. Expands the language around academic integrity. The reference now is on scholastic dishonesty, which would include cheating, plagiarism, etc.

Amended:
December 2009 - Policy now applies to Crookston.
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

University-administered fellowships or traineeships are ones for which the funds are administered by the University to the student, regardless of the funding source. Graduate student fellowships and traineeships are awarded on the basis of academic merit and provide actively enrolled students with the opportunity to pursue study, training and research. Fellowships carry no service obligations. Traineeships may carry service obligations.

I. Eligibility and Selection for Graduate Student Fellowships and Traineeships

a. Students who are admitted to a University of Minnesota graduate program are eligible to hold a University-administered fellowship or traineeship if they are registered for at least the minimum number of credits required by the fellowship or traineeship for a particular term.

b. Recipients of graduate student fellowships and traineeships must meet registration requirements and other terms and conditions of their award for the duration of their fellowship or traineeship.

c. All students who apply for and meet the eligibility criteria for a fellowship or traineeship must be considered for the fellowship or traineeship in accordance with established review and selection processes and criteria.

d. University colleges and departments, or other University units as appropriate, must publicize the fellowships and traineeships the unit offers, including the eligibility and selection criteria.

II. Fellowship and Traineeship Stipends and Benefits

a. Ranges for graduate fellowship and traineeship stipends are established each fiscal year by the awarding collegiate unit, department, academic program, and/or external agency. These ranges must follow the rules and guidelines set by the sponsoring entity.

b. The awarding collegiate unit, department, academic program, and/or external agency stipulates the benefits. These benefits must follow the rules and guidelines set by the sponsoring entity.

c. Students who hold University-administered fellowships or traineeships that provide a stipend that is equivalent to at least a 25% graduate assistantship are eligible for resident tuition rates.

d. Students who hold University-administered fellowships or traineeships for at least two academic semesters are eligible for the extended benefit of resident tuition rates once their fellowship or traineeship ends. They may receive this benefit for no more than the number of semesters for which they held their fellowship or traineeship, up to a maximum of four semesters. This benefit will not extend beyond three years from the termination of the qualifying fellowship or traineeship. Members of the student’s immediate family may also be eligible for resident tuition rates.
e. Fellows and trainees are responsible for payment of charges not covered by the fellowship or traineeship (e.g., lab, installment, or late registration fees).

f. Fellows or trainees who leave their graduate program before the end of a semester in which they hold a fellowship or traineeship may be required to re-pay all or a portion of the stipend for that term.

g. Fellowships and traineeships may be supplemented by other University-administered support (e.g., a graduate assistantship) unless restricted by the terms of the fellowship or traineeship. The level of supplementation may vary according to the terms of the fellowship or traineeship.

**Exceptions**

This policy does not apply to the J.D., M.D., Pharm.D., D.V.M., D.D.S, L.L.M. and M.B.A. (Twin Cities) degrees.

**REASON FOR POLICY**

This policy incorporates equity and fairness standards in the selection of recipients for University-administered fellowships and traineeships. This policy also aids the University in recruiting high-quality graduate students.

**PROCEDURES**

There are no procedures associated with this policy.

**FORMS/INSTRUCTIONS**

There are no forms associated with this policy.

**APPENDICES**

There are no appendices associated with this policy.

**DEFINITIONS**

**Graduate Fellowship**

A merit-based stipend award that an individual student wins competitively. The student applies (or is nominated) directly to the funding source.
Graduate Traineeship
Is awarded competitively to a group of faculty members in a particular disciplinary or interdisciplinary area, the discipline having been specified in advance by the funding agency. The University faculty group awarded the training grant identifies the recipients from among its students interested in studying in the targeted field.

University-Administered Graduate Fellowship or Traineeship
University-administered fellowships or traineeships are ones for which the funds are administered by the University to the student, regardless of the funding source. Funding sources for University-administered graduate fellowships may be national (e.g., the National Science Foundation Fellowship), the University or Graduate School (e.g., the Graduate School Doctoral Dissertation Fellowship) or from programs and departments (e.g., fellowships from department funds.)

Service
Work performed that is typically recognized by payment of a salary.

Stipend
A fixed sum of money primarily paid to cover living costs and educational expenses while the recipient is enrolled in an educational program.

Salary
A wage paid for work performed.

Immediate Family (for the purpose of qualifying for resident tuition rate)
Spouse, children, or legal ward living in the household.

RESPONSIBILITIES

Graduate School Fellowships Office
- Publicize the fellowships the Graduate School offers.
- Clearly stipulate the benefits provided by each fellowship offered by the Graduate School.
- Fairly consider all students who apply and meet the eligibility criteria for a fellowship or traineeship.

Colleges
- Publicize the fellowships the college offers.
- Clearly stipulate the benefits provided by each fellowship offered by the college.
- Fairly consider all students who apply and meet the eligibility criteria for a fellowship or traineeship.

Programs/Departments
- Publicize the fellowships the program offers.
- Clearly stipulate the benefits provided by each fellowship offered by the program.
- Fairly consider all students who apply and meet the eligibility criteria for a fellowship or traineeship.

Students
- Meet all requirements, terms and conditions associated with their award.

HISTORY

Amended:
June 2017 - Comprehensive Review, Minor Revision. Clarifies language in the following areas: a. eligibility for University-administered graduate student fellowships and traineeships and the need for publication of the eligibility and selection criteria; b. when a student holding a University-administered fellowship or traineeship is eligible for resident
Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

The University provides students with an email account upon the student's matriculation to the institution. This account is free of charge and currently is active as long as the student remains active.

A University assigned student email account is the University's official means of communication with all students. Students are responsible for all information sent to them via their University assigned email account. If a student chooses to forward the provided University email account, the student is responsible for all information, including attachments, sent to any other email account.

REASON FOR POLICY

To better serve our students, upon matriculation students are informed that their University assigned email account is the primary means of communication from the University community and that they will be held responsible for the information in the email. Email is the primary method of communication between students and the University. It is imperative that students understand that information will be communicated to them via their University assigned account while they are students.

PROCEDURES

There are no procedures associated with this policy.

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.
FREQUENTLY ASKED QUESTIONS

1. Are other forms of communication (i.e., social media or websites) considered official communications?
While the content found in these forms of communication should match information included in emails sent to students, the content of the email is considered the official information.

DEFINITIONS

Student
Any undergraduate, graduate and professional students. Student status starts upon matriculation. Student status may depend upon credit load.

Student Information
Any information related to student activities at the University of Minnesota.

Matriculation
The time a deposit has been submitted by a student for attendance.

RESPONSIBILITIES

Faculty and staff
Communicate information to students via email with sufficient time for the student to act upon/respond to the information included in the message.

Student
Routinely check assigned University of Minnesota email account to review relevant information.

Registrars on each campus
Maintain policy. Respond to student requests.

- Internet Account Initiation

HISTORY

Amended:
December 2013 - Comprehensive review, minor revision. Improves the clarity of the policy by minor adjustments to the language and a new FAQ.

Amended:
April 2008 - This policy now applies University Wide, rather than to the Twin Cities Campus Only.

Effective:
September 2001

University Policy Program
140 McNamara Alumni Center, Minneapolis, MN 55455 - P: 612-624-8081
policy@umn.edu

Have a good faith belief there has been a violation of University policy? Please report concerns to your supervisor, the appropriate University administrator to investigate the matter, or submit a report to UReport.
POLICY STATEMENT

The University will not issue diplomas or official transcripts to students with financial obligations equal to, or in excess of, $100 or to students who have not satisfied any student conduct or academic integrity sanctions. Once a student satisfies the student's financial obligation or satisfies the outstanding sanction, the diploma will be issued and the hold barring issuance of the official transcript will be removed.

REASON FOR POLICY

The University expects students to meet any financial and/or student conduct and academic integrity obligations to the institution, both during their enrollment and upon graduation. Withholding the diploma and official transcript for not meeting these responsibilities is consistent with both of these expectations.

PROCEDURES

- [Diplomas and Official Transcripts: Notification to Students of the Hold and Issuance after the Obligation is Met](#)

FORMS/INSTRUCTIONS

There are no forms associated with this policy.

APPENDICES

There are no appendices associated with this policy.

FREQUENTLY ASKED QUESTIONS

Printed on: 08/24/2018. Please go to http://policy.umn.edu for the most current version of the Policy or related document.
1. How is a student notified that the student will not be receiving a diploma or an official transcript due to these obligations?
Students are notified via both email and paper letter.

2. Will a student's degree still be posted to the individual's record if money is owed or a judicial sanction is not met?
Yes.

### DEFINITIONS

**Financial Obligation**
Students that owe a minimum of $100 to the University handled by the University collections offices on respective campuses.

**Student conduct and academic integrity sanction**
A sanction imposed upon a student for violation of the University's Student Conduct Code

### RESPONSIBILITIES

**Registrar**
Notify faculty, staff and students of the policy of withholding diplomas and official transcripts.

**College or department**
Advise students of the policy on the policy of withholding diplomas and official transcripts.

**Campus Collections Office**
Determines if diploma can be issued based on satisfactory payment of financial obligations.

**Office for Community Standards (OCS) - Twin Cities Campus**
Notify faculty, staff and students of the policy of withholding diplomas and official transcripts. Determines if diploma can be issued based on satisfactory resolution of obligation.

### RELATED INFORMATION

There is no related information associated with this policy.

### HISTORY

**Amended:**
December 2013 - Comprehensive Review, Minor Revision. Provides additional guidance to the students who have a hold on their record through a new FAQs.
Amended:
December 2009 - Changes withholding of "degrees" to withholding of "diplomas and official transcripts"; Improves satisfaction of student conduct or academic integrity sanctions by expanding the policy to address these types of obligations; Aligns with practices of our peer institutions.

Effective:
December 2004
Twin Cities Campus
Medical Laboratory Sciences MMLS
Allied-Medical Technology

Email: cahpinfo@umn.edu
Website: https://www.alliedhealth.umn.edu/medical-laboratory-sciences

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 55
- This program requires summer semesters for timely completion.
- Degree: Master of Laboratory Sciences

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The masters in medical laboratory sciences (MMLS) is a 5 semester full-time or 8 semester part-time, graduate level program for students with a baccalaureate (or higher) degree in biology or a related field. The program includes all of the essentials of the bachelor of science in medical laboratory science (BS in MLS) program, plus additional graduate work. Upon completion of the coursework, students are eligible to take the American Society of Clinical Pathologists Generalist (MLS) Board of Certification exam (ASCP BOC) as well as the categorical exam in molecular biology (MB).

Accreditation
This program is accredited by National Accrediting Agency for Clinical Laboratory Science (NAACLS)

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Completion of a baccalaureate degree from an accredited institution completed no later than June 1 prior to start of fall semester for year admitted.

Required prerequisites
Prerequisite Biology
8 credit hours of biology must be taken prior to entry to the program.
BIOL 1009 - General Biology [BIOL] (4.0 cr)
PHSL 3051 - Human Physiology (4.0 cr)

Prerequisite Calculus
3-4 credits of calculus must be completed prior to program entry.
MATH 1142 - Short Calculus [MATH] (4.0 cr)
or MATH 1271 - Calculus I [MATH] (4.0 cr)

Prerequisite Statistics
3-4 credit hours of statistics is required prior to being admitted to the program.
STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)

Prerequisite Chemistry
14 credits of chemistry must be completed prior to entering the program.
Chemistry Principles I and II
Chemistry Principles I
CHEM 1061 - Chemical Principles I [PHYS] (3.0 cr)
CHEM 1065 - Chemical Principles I Laboratory [PHYS] (1.0 cr)
Chemistry Principles II
CHEM 1062 - Chemical Principles II [PHYS] (3.0 cr)
CHEM 1066 - Chemical Principles II Laboratory [PHYS] (1.0 cr)

Organic Chemistry
Organic Chemistry I and II
CHEM 2301 - Organic Chemistry I (3.0 cr)
CHEM 2302 - Organic Chemistry II (3.0 cr)

Microbiology with Lab
5 credit hours of microbiology with laboratory component must be completed prior to entry to the program.
VBS 2032 - General Microbiology With Laboratory (5.0 cr)
or MICB 3301 - Biology of Microorganisms (5.0 cr)

Genetics
3 credit hours of genetics must be completed prior to entry to the program.
GCD 3022 - Genetics (3.0 cr)
or BIOL 4003 - Genetics (3.0 cr)

Biochemistry
3 credit hours of biochemistry must be completed prior to entry to the program.
BIOC 3021 - Biochemistry (3.0 cr)

Immunobiology
3 credit hours of immunobiology must be completed prior to entry to the program.
MLSP 5511 - Principles of Immunobiology (3.0 cr)

Other requirements to be completed before admission:
There are fourteen prerequisite courses to complete before the start of the master in medical laboratory sciences program (MMLS) program: biology, general chemistry (2 semesters with lab), organic chemistry (2 semesters), biochemistry, calculus, statistics, human physiology, microbiology with lab, plus upper division genetics and immunology. At least ten courses must be completed, with final grades sent to the MLS program, by the application deadline.

Special Application Requirements:
Prior to matriculation to the program, students must complete a Minnesota background check, immunizations, and meet the Medical Laboratory Sciences Program published technical standards. Application to the MMLS program is available on the Medical Laboratory Sciences Program website. After a preliminary review of submitted materials, selected applicants are invited to participate in an interview with representatives of the admissions committee.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
• MELAB
  - Final score: 85
  - Speaking test score: 0

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 to 55 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: The capstone project is an examination of a clinical problem in the setting where students complete their final clinical rotation. It may also be a type of research experience or research paper with an MLS program faculty member.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Required Coursework (55 Credits)
Take the following courses for a total of 55 credits:
- MLSP 5011W - Professional Issues in the Health Care Community [WI] (2.0 cr)
- MLSP 5012 - Foundations in Interprofessional Communication and Collaboration (1.0 cr)
- MLSP 5013 - Scholarly Inquiry and Analysis in Medical Laboratory Sciences (1.0 cr)
- MLSP 5014W - Laboratory Operations and Management in Health Care Systems [WI] (2.0 cr)
- MLSP 5112 - Application of Diagnostic Microbiology Principles (2.0 cr)
- MLSP 5212 - Application of Hematology & Hemostasis Principles (1.0 cr)
- MLSP 5214 - Advanced Hematology Morphology (1.0 cr)
- MLSP 5311 - Fundamental Biomedical Laboratory Techniques (4.0 cr)
- MLSP 5312 - Body Fluid Analysis (2.0 cr)
- MLSP 5514 - Application of Transfusion Medicine Principles (2.0 cr)
- MLSP 5701 - Clinical Experience in Microbiology (2.0 cr)
- MLSP 5702 - Clinical Experience in Hematology and Hemostasis (2.0 cr)
- MLSP 5703 - Clinical Experience in Clinical Chemistry and Urinalysis (2.0 cr)
- MLSP 5704 - Clinical Experience in Transfusion Medicine (2.0 cr)
- MLSP 6024 - Advanced Laboratory Operations and Management (3.0 cr)
- MLSP 6111 - Concepts in Diagnostic Microbiology (3.0 cr)
- MLSP 6113 - Advanced Diagnostic Microbiology (3.0 cr)
- MLSP 6211 - Advanced Principles in Hematology and Hemostasis (3.0 cr)
- MLSP 6213 - Advanced Diagnostic Hematology (3.0 cr)
- MLSP 6313 - Advanced Chemical Analysis in Health and Disease (3.0 cr)
- MLSP 6401 - Fundamentals of Molecular Diagnostics (3.0 cr)
- MLSP 6513 - Advanced Principles in Transfusion Medicine (3.0 cr)
- MLSP 6801 - Advanced Practicum in Medical Laboratory Science (2.0 cr)
- MLSP 6905 - Research Methods and Capstone Project (3.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.
Twin Cities Campus
Occupational Therapy M.O.T.
Allied-Occupational Therapy
Academic Health Center Shared

Website: http://www.cahp.umn.edu/ot

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 78
- This program requires summer semesters for timely completion.
- The program admits students to two locations, the Minneapolis campus and the Rochester campus.

Level I Fieldwork occurring within select courses, will be located across the state of Minnesota. Two full-time Level II Fieldwork placements occur in Minnesota with rare exceptions. Students are responsible for all costs associated with Level I and Level II fieldwork including housing arrangements and transportation for all fieldwork placements.

- Degree: Master of Occupational Therapy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Occupational Therapy (OT) program is a 22-25 month, 78-credit, graduate-level professional program completed over five semesters.

Graduates of the program will be eligible to sit for the National Certification Examination for the Occupational Therapist, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the graduate will be an occupational therapist, registered (OTR). In addition, most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT certification examination.

A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure. Information is available from:
National Board for Certification in Occupational Therapy
12 South Summit Avenue, Suite 100
Gaithersburg, MD 20877-4150
(301) 990-7979
FAX (301) 869-8492
www.nbcot.org
info@nbcot.org

The program has been continuously accredited since 1946. In 2007, a new performance site was accredited making the OT program available in both Minneapolis and Rochester, Minnesota.

The OT program at both performance sites is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA).
4720 Montgomery Lane, Suite 200
Bethesda, MD 20814-3449
ACOTE's telephone number, c/o AOTA, is (301) 652-AOTA
www.acoteonline.org.

Accreditation
This program is accredited by Accreditation Council for Occupational Therapy Education (ACOTE) - see above contact information
Program Delivery
This program is available:
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must have a bachelor’s degree completed prior to fall enrollment in order to apply to the Occupational Therapy program. There are no preferred undergraduate majors.

Required prerequisites
Core Prerequisite Courses
Courses must be satisfactorily completed at a regionally accredited institution. Six of the seven courses must be completed at the time of application. All prerequisites must be completed no later than the end of summer session of the year of admission. The non-core prerequisite, medical terminology, may be taken as a college course or as an online course equivalent to 1 college credit.

Prerequisites must be fulfilled with a minimum number of semester credits, listed next to each course.
Human Anatomy (3 cr)
Human Physiology (3 cr)
Statistics (3 cr)
This course must include descriptive and inferential statistics. Courses that focus on Research Methods are not sufficient to fulfill this requirement.
General Psychology (3 cr)
Abnormal Psychology (3 cr)
Human Development Across Life Span (3 cr)
Students will be required to verify that the course(s) taken covered content from conception to death. Students may need to take a series of courses to complete this prerequisite.

Sociology/Anthropology
This course should include content related to human societies and behaviors, social theory and theories of social change, methods of study in sociology, characteristics of social units (for example, race/ethnicity, economics/social organizations, gender, politics, religious systems) and the impact of cultural diversity. Courses that focus on one topic (e.g. sociology of education or sociology of sports) are not sufficient to fulfill this requirement.
Intro to Sociology (3 cr)
or Cultural Anthropology (3 cr)

Non-Core Prerequisite
Medical Terminology (1 cr)
Or the equivalent to 1 college credit may be substituted.

Other requirements to be completed before admission:
Computer Competency:
Admitted applicants must be proficient at using a personal computer, including but not limited to sending and receiving email, using data and word processing software (primarily Microsoft Office software), using the Internet, and navigating the U of MN and other web sites. See computer requirements for online courses http://cahp.umn.edu/minimum-technical-standards.

Practical Experience:
Minimum of 20 hours of OT observation in at least two practice areas OR completion of an Orientation to OT course is required.

Recommended:
• Additional OT observation experience, above that which is required.
• Work, volunteer or observation experience in health or education related fields (e.g. nursing, physical therapy, education/teaching, speech pathology, long term care, home health, children and youth, neurotypical or disability populations). Experiences must be direct interaction with patients/clients/students.
• Participation in research.
• Leadership experiences.

Special Application Requirements:
• Applicants must meet Minimum Technical Standards found on the OT Program web page. http://cahp.umn.edu/minimum-technical-standards
- Applicants whose native language is not English or whose academic studies were done exclusively at a non-English speaking institution(s) must prove English proficiency by providing official Test of English as a Foreign Language (TOEFL) scores.

- International Applicants: The OT Program is NOT able to accept students on F1 or F2 visas due to federal regulations regarding online degree programs. Applicants with other visa types should contact cahpinfo@umn.edu for information about admission eligibility.

- Applicants should complete a prerequisite planning sheet found on the OT program web page. http://cahp.umn.edu/prerequisites

If the student's school(s) is not listed, or if the Prerequisite Planning Sheet does not list the courses taken, the student should send course description(s) for each course taken that the student believes fulfills a specific prerequisite requirement to cahpinfo@umn.edu.

- Criminal Background Studies: The University of Minnesota requires Minnesota Department of Health criminal background studies on all students admitted to the OT Program. Failure to pass the background study may preclude successful completion of the program. Additional background studies may be required by specific fieldwork settings. Students will be required to complete these studies in order to participate in the experiences.

Admitted students are provided detailed instructions for how to request a criminal background study soon after beginning the program.

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 550

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 78 major credits and 0 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: Students will engage in a group or individual study of a research question related to occupational therapy. Students will demonstrate a high level of critical thinking as they plan, conduct, and evaluate their mentored scholarly project. Students will submit a written description of their project in APA format and defend their scholarly project through an oral poster presentation.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

All courses must be graded "C" or higher and a minimum semester GPA of 2.8 is also required for students to remain in good standing.

Students complete two 12-week, full-time equivalent, Level II fieldwork experiences in Minnesota after successfully completing all classroom-based coursework. All Level II fieldwork must be completed within 24 months of classroom-based coursework.

Year One
The first year builds a foundation in the study of activity and occupation; society, community, family, and environmental influences on human occupation; and foundations of occupational therapy practice when human occupation is reduced. All students participate in their communities as engaged citizens and with their inter-professional colleagues as they practice professional level skills. Five Level I fieldwork experiences provide guided practice in the occupational therapist role.

Fall Semester
6-8 sessions face-to-face
CAHP 5110 - Foundations of Interprofessional Communication and Collaboration (1.0 cr)
OT 6100 - Public and Professional Engagement I (0.5 cr)
OT 6101 - Foundations of Occupational Science and Occupational Therapy (4.0 cr)
OT 6102 - Professional Identity: Behaviors and Attitudes (2.0 cr)
OT 6103 - Occupational Therapy Process for Society (3.0 cr)
OT 6111 - Foundations: Occupations as Therapy (3.0 cr)
OT 6113 - Occupational Therapy Process for Community (3.0 cr)

Spring Semester
6-8 sessions face-to-face
OT 6200 - Public and Professional Engagement II (0.5 cr)
OT 6201 - Functional Anatomy and Kinesiology (3.0 cr)
OT 6202 - Occupational Therapy Process for Individuals: Occupation Through Compensation (5.0 cr)
OT 6203 - Occupational Therapy Process for Family (2.0 cr)
OT 6213 - Occupational Therapy Process for Individuals: Medical Contexts (2.0 cr)
OT 7201 - Scholarly Inquiry in Health Sciences (4.0 cr)

**Summer Semester**
8-15 sessions face-to-face
OT 6200 - Public and Professional Engagement II (0.5 cr)
OT 6301 - Neuroscience (5.0 cr)
OT 6302 - Occupational Therapy Process for Individuals: Occupation Through Remediation (4.0 cr)
OT 6312 - Occupational Therapy Process for Individuals: Psychosocial Approaches (3.0 cr)
OT 6322 - Occupational Therapy Process for Individuals: Work Contexts (2.0 cr)
OT 7394 - Scholarly Project in OT I (2.0 cr)

**Year Two**
Year two shifts to a focus on practice. Students apply OT concepts to increasingly complex areas of practice in a broad range of contexts including work, school, and group settings. Level I fieldwork provides opportunities to practice within communities. Six months is devoted to Level II fieldwork where students practice under the direct supervision of an occupational therapist in a medical and/or community setting. Students should expect to travel to fieldwork sites.

**Fall Semester**
15 sessions face-to-face
OT 6200 - Public and Professional Engagement II (0.5 cr)
OT 6402 - Occupational Therapy Process for Individuals: Occupation Through Neurorehabilitative Approaches (4.0 cr)
OT 6403 - Management of Occupational Therapy Services (1.0 cr)
OT 6412 - Occupational Therapy Process for Individuals: Orthotics and Prosthetics (3.0 cr)
OT 6422 - Occupational Therapy Process: Group Context (2.0 cr)
OT 6432 - Occupational Therapy Process for Individuals: Educational Context (2.0 cr)
OT 7494 - Scholarly Project in OT II (4.0 cr)

**Spring Semester**
OT 7596 - Occupational Therapy Level II Fieldwork I (6.0 cr)
OT 7696 - Occupational Therapy Level II Fieldwork II (6.0 cr)

**Program Sub-plans**
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

**Rochester**
Sub-plan is used by the program in Occupational Therapy to differentiate between students admitted to the Minneapolis or the Rochester campus. Regardless of the assigned campus, all occupational therapy students take the same courses with the same instructors during the same semester. Instructional support staff may vary by campus.
Twin Cities Campus
Ecology, Evolution and Behavior M.S.
Ecology, Evolution & Behavior
College of Biological Sciences

Contact Information:
Email: eebgrad@umn.edu
Website: http://www.cbs.umn.edu/explore/departments/eeb/graduate/about-program

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in ecology, evolution, and behavior (EEB) links faculty and students interested in the biology of organisms from molecules to ecosystems. Studies address questions from molecular mechanisms of evolution, the interactions of organisms in social groups and populations, the distributions and abundances of species in communities and ecosystems, to global biogeochemical processes. The program provides broad training in the general areas of ecology, evolution, and animal behavior, and specialized courses and research in vertebrate and invertebrate zoology; behavior and ethology; evolution; population genetics; molecular evolution; systematics; population, community, and ecosystem ecology; global ecology; limnology; ecology of vegetation; and theoretical ecology. Opportunities for field research are available in Africa, Central America, and other parts of the world, as well as in local ecosystems, including the Cedar Creek Ecosystem Science Reserve and Itasca Biological Station. Seminars and individually designed tutorials are an important part of student programs and provide an exciting intellectual environment.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Courses in inorganic chemistry, organic chemistry, biochemistry, general physics, one year of college calculus, animal biology, genetics, physiology, and plant biology are strongly recommended and provide an important background to pursue graduate work in EEB. Proficiency in a foreign language is not required but is strongly recommended for students who expect to pursue field work in a country where English is not the native language. Deficiencies must be made up early in the graduate program.

Special Application Requirements:
Students are admitted only in fall semester. Deadline for application is December 1. Refer to the EEB website for more details.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The MS is offered under both Plan A (with thesis) and Plan B (without thesis). Plan A requires 20 course credits in the major and 10 thesis credits. Plan B requires 30 course credits and a research paper. Students pursuing the joint JD/MS degree have the exception that some Law courses can be "cross counted" for credit. Degree programs are planned by the student and an advisory committee of three faculty members to meet the student's interests and needs.

EEB Foundations course: EEB 8201-8202

All students are expected to complete EEB 8201-8202 their first year. The goal of this course is to provide students in their first year with foundation of knowledge in ecology, evolution and behavior.

EEB 8201 - Graduate Foundations in Ecology, Evolution and Behavior - Semester 1 (4.0 cr)
EEB 8202 - Graduate Foundations in Ecology, Evolution and Behavior - Semester 2 (4.0 cr)

Electives/Supporting Courses

Plan A students select a minimum of 12 coursework credits and Plan B students select a minimum of 22 elective credits, in consultation with the advisor. Electives may include courses in statistics or history of science if additional background is needed.

- EEB 5042 - Quantitative Genetics (3.0 cr)
- or EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
- or EEB 5068 - Plant Physiological Ecology (3.0 cr)
- or EEB 5221 - Molecular Evolution (3.0 cr)
- or EEB 5322 - Evolution and Animal Cognition (3.0 cr)
- or EEB 5327 - Behavioral Ecology (3.0 cr)
- or EEB 5371 - Principles of Systematics (3.0 cr)
- or EEB 5407 - Ecology (3.0 cr)
- or EEB 5409 - Evolution (3.0 cr)
- or EEB 5601 - Limnology (3.0 cr)
- or EEB 5605 - Limnology Laboratory (2.0 cr)
- or EEB 5609 - Ecosystem Ecology (3.0 cr)
- or EEB 8150 - EEB Lab Tours (1.0 cr)
- or EEB 8151 - EEB Lab Tours (1.0 cr)
- or EEB 8200 - Sustainability Science Distributed Graduate Seminar (3.0 cr)
- or EEB 8301 - Prelim Proposal Writing Seminar (1.0 cr)
- or EEB 8302 - EEB Written Prelim Workshop (1.0 cr)
- or EEB 8360 - Behavioral Biology Seminar (1.0 cr)
- or EEB 8500 - NSF GRF Graduate Research Fellowship Proposal Writing Seminar (1.0 cr)
- or EEB 8601 - Introduction to Stream Restoration (3.0 cr)
- or EEB 8602 - Stream Restoration Practice (2.0 cr)
- or EEB 8641 - Spatial Ecology (3.0 cr)
- or EEB 8980 - Seminar on Current Topics (1.0 - 3.0 cr)
- or EEB 8990 - Graduate Seminar (1.0 - 3.0 cr)
- or EEB 8991 - Independent Study: Ecology, Evolution, and Behavior (1.0 - 10.0 cr)

- Courses Outside of EEB

Students may select graduate-level courses outside of EEB in consultation with their advisor.

- AGRO 5121 - Applied Experimental Design (4.0 cr)
- or BIOL 8100 - Improvisation for Scientists (1.0 cr)
- or DSSC 8111 - Approaches to Knowledge and Truth: Ways of Knowing in Development Studies and Social Change (3.0 cr)
- or EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
- or FW 8051 - Statistical Modeling of Ecological Data using R and WinBugs/JAGS (4.0 cr)
or HSCI 5211 - Biology and Culture in the 19th and 20th Centuries [CIV] (3.0 cr)
or HSCI 5242 - Navigating a Darwinian World (3.0 cr)
or HSCI 5244 - Nature's History: Science, Humans, and the Environment (3.0 cr)
or HSCI 8920 - Seminar: History of Biological Sciences (3.0 cr)
or PA 5701 - Science and State (3.0 cr)
or PA 5721 - Energy Systems and Policy (3.0 cr)
or PHIL 5602 - Scientific Representation and Explanation (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5101 - Theory of Statistics I (4.0 cr)
or STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)
or BIOL 5272 - Applied Biostatistics (4.0 cr)
or HSCI 5401 - Ethics in Science and Technology (3.0 cr)
or HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
or FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)

Ethics Requirement
A four-session ethics seminar offered during the Friday Noon Seminar series. Required areas of ethics include: Academic and Research Community; Authorship; Peer Review and Research Conduct.

Plan A

Plan A Thesis
Take exactly 10 credit(s) from the following:
+EEB 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Joint- or Dual-degree Coursework: JD/MS-Ecology, Evolution, and Behavior Student may take a total of 12 credits in common among the academic programs.

Website: http://www.cbs.umn.edu/explore/departments/eeb/graduate/about-program

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in Ecology, Evolution, and Behavior (EEB) links faculty and students interested in the biology of organisms from molecules to ecosystems. Studies address questions from molecular mechanisms of evolution, the interactions of organisms in social groups and populations, the distributions and abundances of species in communities and ecosystems, to global biogeochemical processes. The program provides broad training in the general areas of ecology, evolution, and animal behavior, and specialized courses and research in vertebrate and invertebrate zoology; behavior and ethology; evolution; population genetics; molecular evolution; systematics; population, community, and ecosystem ecology; global ecology; limnology; ecology of vegetation; and theoretical ecology. Opportunities for field research are available in Africa, Central America, and other parts of the world, as well as in local ecosystems, including the Cedar Creek Ecosystem Science Reserve and Itasca Biological Station. Seminars and individually designed tutorials are an important part of student programs and provide an exciting intellectual environment.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Master's Course List
Take 6 or more credit(s) from the following:
• EEB 5xxx
• EEB 8xxx

Doctoral
Doctoral Course List
Take 12 or more credit(s) from the following:
• EEB 5xxx
• EEB 8xxx
Twin Cities Campus
Ecology, Evolution and Behavior Ph.D.

Seminars and individually designed tutorials are an important part of student programs and provide an exciting intellectual environment.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Courses in inorganic chemistry, organic chemistry, biochemistry, general physics, one year of college calculus, animal biology, genetics, physiology, and plant biology are strongly recommended and provide an important background to pursue graduate work in EEB. Proficiency in a foreign language is not required but is strongly recommended for students who expect to pursue field work in a country where English is not the native language. Deficiencies must be made up early in the graduate program.

Special Application Requirements:
Students are admitted only in fall semester. Deadline for application is December 1. Refer to the EEB website for more details.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Significant field or laboratory experience, proficiency in using computers in research, and competence in advanced statistics are required. Students are expected to gain some appreciation of history or philosophy of science and are required to teach a minimum of two semesters at 50 percent time. Course plans are discussed and agreed upon by the student and an advisory committee of three to five faculty members.

Required EEB Coursework
Take the following courses for a total of 13 credits:
EEB 8150 - EEB Lab Tours (1.0 cr)
EEB 8151 - EEB Lab Tours (1.0 cr)
EEB 8201 - Graduate Foundations in Ecology, Evolution and Behavior Semester 1 (4.0 cr)
EEB 8202 - Graduate Foundations in Ecology, Evolution and Behavior - Semester 2 (4.0 cr)
EEB 8301 - Prelim Proposal Writing Seminar (1.0 cr)
EEB 8302 - EEB Written Prelim Workshop (1.0 cr)
EEB 8500 - NSF GRF Graduate Research Fellowship Proposal Writing Seminar (1.0 cr)

Elective Coursework
Select at least 11 elective credits, in consultation with the advisor. Electives may include courses in statistics or history of science if additional background is needed.
Take 0 - 24 course(s) totaling 11 - 24 credit(s) including 0 - 24 sub-requirements(s) from the following:
• EEB 5068 - Plant Physiological Ecology (3.0 cr)
• EEB 5221 - Molecular Evolution (3.0 cr)
• EEB 5322 - Evolution and Animal Cognition (3.0 cr)
• EEB 5327 - Behavioral Ecology (3.0 cr)
• EEB 5371 - Principles of Systematics (3.0 cr)
• EEB 5407 - Ecology (3.0 cr)
• EEB 5409 - Evolution (3.0 cr)
• EEB 5601 - Limnology (3.0 cr)
• EEB 5605 - Limnology Laboratory (2.0 cr)
• EEB 5609 - Ecosystem Ecology (3.0 cr)
• EEB 8100 - EEB Department Seminar (1.0 cr)
• EEB 8200 - Sustainability Science Distributed Graduate Seminar (3.0 cr)
• EEB 8360 - Behavioral Biology Seminar (1.0 cr)
• EEB 8601 - Introduction to Stream Restoration (3.0 cr)
• EEB 8602 - Stream Restoration Practice (2.0 cr)
• EEB 8641 - Spatial Ecology (3.0 cr)
• EEB 8980 - Seminar on Current Topics (1.0 - 3.0 cr)
• EEB 8990 - Graduate Seminar (1.0 - 3.0 cr)
• BIOL 8100 - Improvisation for Scientists (1.0 cr)
• EEB 8991 - Independent Study: Ecology, Evolution, and Behavior (1.0 - 10.0 cr)
• EEB 8994 - Directed Research (1.0 - 5.0 cr)

Courses outside of EEB
Courses from the following, or other coursework selected in consultation with the advisor, may be used to fulfill the 24-credit minimum requirement.
Take 0 - 24 course(s) totaling 0 - 24 credit(s) including exactly 0 sub-requirements(s) from the following:
• AGRO 5121 - Applied Experimental Design (4.0 cr)
• BIOL 8100 - Improvisation for Scientists (1.0 cr)
• DSSC 8111 - Approaches to Knowledge and Truth: Ways of Knowing in Development Studies and Social Change (3.0 cr)
• EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
• FW 8051 - Statistical Modeling of Ecological Data using R and WinBugs/JAGS (4.0 cr)
• HSCI 5211 - Biology and Culture in the 19th and 20th Centuries [CIV] (3.0 cr)
• HSCI 5242 - Navigating a Darwinian World (3.0 cr)
• HSCI 5244 - Nature's History: Science, Humans, and the Environment (3.0 cr)
• HSCI 8920 - Seminar: History of Biological Sciences (3.0 cr)
• PA 5701 - Science and State (3.0 cr)
• PA 5721 - Energy Systems and Policy (3.0 cr)
• PHIL 5602 - Scientific Representation and Explanation (3.0 cr)
• PHIL 8620 - Seminar: Philosophy of the Biological Sciences (3.0 cr)
• PUBH 6450 - Biostatistics I (4.0 cr)
• STAT 5101 - Theory of Statistics I (4.0 cr)
• STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
• STAT 5303 - Designing Experiments (4.0 cr)
• STAT 5601 - Nonparametric Methods (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• BIOL 5272 - Applied Biostatistics (4.0 cr)
• HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
• TH 5950 - Topics in Theatre (1.0 - 4.0 cr)

Ethics requirement
A four-session ethics seminar offered during the Friday Noon Seminar series. Required areas of ethics include: Academic and Research Community; Authorship; Peer Review and Research Conduct.

Thesis Credits
Take 24 doctoral thesis credits.
EEB 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Joint- or Dual-degree Coursework: JD/PhD-Ecology, Evolution, and Behavior
Student may take a total of 12 credits in common among the academic programs.
Twin Cities Campus
Microbial Ecology Minor
College of Biological Sciences - Adm
College of Biological Sciences

Contact Information:
Microbial Ecology Minor Program, University of Minnesota, 439 Borlaug Hall, 191 Upper Buford Circle, Saint Paul, MN 55108 (612-624-2706)
Email: micecol@umn.edu

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This minor is available to master's (M.S.) and doctoral (Ph.D.) students. Microbial ecology is an interdisciplinary research area concerned with the relationships between microorganisms and their natural environment. The microbial ecology minor offers core coursework in microbiology, microbial physiology, microbial genetics, microbial genomics, microbial ecology, ecology, and theoretical ecology. Additional courses and opportunities to interact with others interested in microbial ecology are also part of the minor. The microbial ecology/biotechnology seminar series allows students and faculty to interact with microbial ecologists from other universities. The curriculum encourages interdisciplinary interaction, communication, and synthesis.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
To be admitted to the minor, a student must be admitted to a master's or doctoral degree-granting program within the Graduate School, should have broad training in the biological sciences, and must be accepted by the director of graduate studies of the microbial ecology minor program. All students are expected to have had the equivalent of introductory microbiology (MICB 3301) and general ecology, but may fulfill deficiencies in these areas by taking these courses while in the program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's minor requires 6 graduate credits, all of which must be outside the student's major department and must include at least one laboratory course in microbiology (e.g., MICB 4215) and one ecology (EEB) course chosen from the list below. The remaining courses also are chosen from this list with the guidance and approval of the director of graduate studies.

The doctoral minor requires 12 graduate credits, 9 credits of which must come from the core courses listed below (contact the director of graduate studies for potential alternatives to these courses). The remaining credits must come from at least two courses chosen from this list, but may not be in the student's major.

Core courses:
EEB 5053 (4 cr)
MICB 4111 (3 cr)
MICB 4121 (3 cr)
MICA 8002 (4 cr)
Additional courses
CE 8541
CE 8542
CE 8551
EEB 4601
EEB 4609
PLPA 8102
PLPA 8103
SOIL 5515
SOIL 5611
Twin Cities Campus
Microbial Engineering M.S.

Email: mce@umn.edu
Website: http://www.bti.umn.edu/MicE

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Microbial engineering allows students to pursue an interdisciplinary program that combines microbiology, biochemistry, molecular biology, bioinformatics, chemical engineering, and related sciences. Students perform brief rotations in faculty laboratories to choose an independent project, and tailor their coursework to support and complement their research. Projects can span modern basic microbiology, applied industrial engineering, as well as include computer science and informatics disciplines. After graduation, many students choose to continue on to a PhD program in a related discipline or work directly in biotechnology research and development. Supporting courses are chosen from fields including biochemistry, microbiology, food science, genetics and cell biology, and computer science. The program is coordinated by the BioTechnology Institute (BTI) and involves faculty from 10 departments and 5 institutes of the University.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Science or Engineering Discipline
N/A

Other requirements to be completed before admission:
Typically, applicants with a bachelor's degree in biological sciences, biochemistry, chemistry, or chemical engineering or related engineering disciplines apply. Recommended academic preparation includes one year each of calculus, organic chemistry, physics, microbiology, and a background in a field such as basic chemical engineering, biology, physical chemistry, or genetics. Background deficiencies can be made up during the first year of graduate work. Most students enter the program with a GPA of 3.00 or higher.

Special Application Requirements:
Three letters of recommendation, scores from the General Test of the GRE, the TOEFL score for international applicants, transcripts, Curriculum Vitae, and an autobiographical statement including occupational goals must be submitted to the director of graduate studies. Applications are accepted for fall semester only. To receive full consideration for financial aid, students must apply for fall semester admission by January 14.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80
    - Speaking test score: 0

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

MicE Requirements

All students are required to sign up for the following courses:

MicE 5355 (1 Credit during winter break with special registration) and MicE 8990 (1 Credit per semester) Attendance is MANDATORY for two semesters. Two credits are needed for graduation.
MICE 5355 - Advanced Fermentation and Biocatalysis Laboratory (1.0 cr)
MICE 8990 - Biotechnology Seminar (1.0 - 3.0 cr)

Computer Proficiency Requirement

Students are required to show evidence of competence in using computers and a practical working knowledge of at least one computer language such as Pascal, Fortran, python, scripting, or statistical packages appropriate to their area of interest. Experience and competence may be obtained by passing a semester of basic computer use and programming courses, or submitting evidence that Equivalent courses of study have been completed elsewhere. (One course upper level required.)
BIOL 5272 - Applied Biostatistics (4.0 cr)
or CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)

Plan Options

Plan A
Take at least 14 additional course credits, in consultation with the advisor, and 10 thesis credits (MICE 8777).

Thesis Credits
Take at least 10 master's thesis credits.
MICE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

RELATED ELECTIVES
A maximum of 9 credits of 4000-level coursework is allowed. Additional courses can be used with the approval of the director of graduate studies.
Take 14 or more credit(s) from the following:
• BBE 4713 - Biological Process Engineering (3.0 cr)
• BBE 5713 - Biological Process Engineering (3.0 cr)
• BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)
• BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
• BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
• BIOC 4521 - Introduction to Physical Biochemistry (3.0 cr)
• BIOC 5309 - Biocatalysis and Biodegradation (3.0 cr)
• BIOC 5352 - Biotechnology and Bioengineering for Biochemists (3.0 cr)
• BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
• BIOC 5527 - Introduction to Modern Structural Biology (4.0 cr)
• BIOC 5xxx
• BIOC 8084 - Research and Literature Reports (1.0 cr)
• BIOL 4003 - Genetics (3.0 cr)
• BIOL 4004 - Cell Biology (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Plant and microbial biology encompasses all aspects of plant and microbial life, from molecular biology to genomics to ecosystem science. Students study plants from the subcellular and molecular to the whole plant and community levels of biological organization. They also have opportunities for laboratory and field research at state, national, and international levels. Each student's program is planned to meet individual requirements within the framework of a multidisciplinary core of coursework.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Students are admitted to the M.S. program only under special arrangement with a faculty advisor. The deadline to apply is December 1. Refer to the Plant and Microbial Biology website for full details on application requirements and procedures: https://cbs.umn.edu/academics/departments/pmb/graduate-education.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.
Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The MS is offered under both Plan A (with thesis) and Plan B (without thesis). Plan A requires 20 course credits in the major and 10 thesis credits. Plan B requires 30 course credits in the major and one to three research papers, which may be written in conjunction with graduate courses. Significant field or laboratory experience and competence in statistics, to include hypothesis testing, regression, and correlation are required. Degree programs are planned by the student and an advisory committee of three faculty members to meet the student's interests and needs.

Core Coursework
All students take the following required courses, for a total of 6.5 credits. [Note: Take PMB 8900 three times (1 credit each time, for a total of 3 credits): section 001 (PMB colloquium), section 002 (Itasca orientation seminar), and section 003 (PMB graduate students seminar).]

- PMB 8081 - Integrative Plant Biology: Connecting Molecules to Ecosystems (3.0 cr)
- PMB 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- PMB 8900 - Seminar (1.0 - 2.0 cr)

Professional development requirement
Participate in at least one professional development activity. Options to fulfill this requirement include, but are not limited to: courses (e.g., GRAD 8101 Preparing Future Faculty, BIOL 8100 Improvisation for Scientists), workshops (e.g., career planning, research group management, teaching skills, leadership development), internships in industry.

Plan A and Plan B course options

Plan A
Take at least 13.5 credits of additional coursework, in consultation with the academic advisor and advisory committee, and with approval from the PMB Director of Graduate Studies (DGS), to complete the 20 course credits total (6.5 credits of required core coursework and 13.5 credits of electives/supporting courses) required for the Plan A master's degree. A maximum of two 4000-level courses is allowed.

Take 14 or more credit(s) from the following:
- PBS 8xxx
- PMB 4xxx
- PMB 5xxx
- AGRO 5xxx
- AGRO 8xxx
- BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
- BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
- BIOC 4521 - Introduction to Physical Biochemistry (3.0 cr)
- BIOL 4003 - Genetics (3.0 cr)
- BIOL 4004 - Cell Biology (3.0 cr)
- BIOL 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
- BIOL 8100 - Improvisation for Scientists (1.0 cr)
- CSCI 5xxx
- EEB 5xxx
- EEB 8xxx
- FNRM 5xxx
- FNRM 8xxx
- GCD 5xxx
- GCD 8xxx
- GRAD 5xxx
- GRAD 8xxx
- HORT 5xxx
- HORT 8xxx
- MICB 4xxx
• PLPA 5xxx
• PLPA 8xxx
• STAT 5xxx
• STAT 8xxx

**Thesis Credits**

Take 10 master's thesis credits.

**PMB 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)**

**Plan B**

Take at least 23.5 credits of additional coursework, in consultation with the academic advisor and advisory committee, and with approval from the PMB Director of Graduate Studies (DGS), to complete the 30 course credits total (6.5 credits of required core coursework and 23.5 credits of electives/supporting courses) required for the Plan B master's degree. A maximum of two 4000-level courses is allowed.

Take 24 or more credit(s) from the following:

• PBS 8xxx
• PMB 4xxx
• PMB 5xxx
• AGRO 5xxx
• AGRO 8xxx
• BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
• BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
• BIOC 4521 - Introduction to Physical Biochemistry (3.0 cr)
• BIOC 5xxx
• BIOL 4003 - Genetics (3.0 cr)
• BIOL 4004 - Cell Biology (3.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Professional Studies

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the MPS in addictions counseling experience a rigorous, evidence-informed applied clinical preparation program that fulfills Minnesota's Licensed Alcohol and Drug (MNLADC) educational requirements, with the added benefit of receiving a master's degree. The 30-credit curriculum includes specific licensure preparation content in the following areas: evidence based practices and evaluation, individual and group counseling skills, professional ethics, diversity and cultural sensitivity, co-occurring assessment and treatment interventions, and an applied field placement experience. The MPS meets the education and training needs of individuals new to the helping profession as well as individuals with an allied license (MSW, LP, LPC, LMFT) seeking to add the LADC.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Bachelor's degree from an accredited institution - Transcripts - Personal statement - Two letters of reference - Updated resume or CV

Special Application Requirements:
International students interested in the M.P.S. in Addictions Counseling should contact the International Student and Scholar Service (www.isss.umn.edu) for information on visa status and academic requirements.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 84
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 563
• IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
• MELAB
  - Final score: 84

Key to test abbreviations (TOEFL, IELTS, MELAB).
Program Requirements

Plan C: Plan C requires 30 major credits and 0 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: The ADDS 5996 Internship Seminar serves as a capstone experience where students apply the knowledge and skills learned in their previous courses in a real-world clinical setting. Students receive close clinical supervision from both a site and faculty supervisors, participate in formal on-campus clinical supervision meetings, and actively engage in weekly required postings and practice assignments. Upon completion of the internship experience, each student undergoes an extensive formal written and oral evaluation process to ensure ethical and competent clinical practice.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

In addition to course work, an 880-hour field placement is required to complete the degree. This field placement will be done as part of the 4 credit class ADDS 5996.

Students may take one or more courses per term and have up to five years to complete a master's degree. Students who wish to transfer graduate-level coursework from other institutions should contact the Graduate Programs office at ccapsinfo@umn.edu for information and assistance.

Only coursework for which the student has earned a grade of B- or better will be counted toward the minimum of 30 semester credits required for the degree.

Foundation Courses (7 credits)
These courses are prerequisites for most other courses in the program. They should be the first courses students complete.

- ADDS 5011 - Foundations in Addiction Studies (2.0 cr)
- ADDS 5021 - Introduction to Evidence Based Practices and the Helping Relationship (3.0 cr)
- ADDS 5031 - Applied Psychopharmacology (2.0 cr)

Required Courses (16 credits)
Required courses. All courses except ADDS 5051 are prerequisites for the internship (ADDS 5996). Either ADDS 5071 or ADDS 5081 may be taken concurrently with the internship.

- ADDS 5041 - Methods and Models I: Motivational Counseling (2.0 cr)
- ADDS 5051 - Methods and Models II: Cognitive-Behavioral Therapy (2.0 cr)
- ADDS 5061 - Foundations of Group Work (3.0 cr)
- ADDS 5071 - Foundations of Co-occurring Disorders (2.0 cr)
- ADDS 5081 - Multicultural Foundations of Behavioral Health (3.0 cr)
- ADDS 5091 - Assessment and Treatment Planning I (3.0 cr)
- ADDS 5121 - Professional Seminar 1 (1.0 cr)

Elective Courses (3 credits)
Electives not on this list must be preapproved.

Take 3 or more credit(s) from the following:

- ADDS 5993 - Directed Study (1.0 - 3.0 cr)
- IBH 6021 - Methods and Models III: Synthesis Seminar in Client Centered Care (2.0 cr)
- IBH 6031 - Methods and Models IV: Trauma and Anxiety, Assessment and Treatment Intervention (2.0 cr)
- IBH 6032 - Advanced Multicultural Practice (1.0 cr)
- IBH 6081 - Human Lifespan Development and Behavioral Health (3.0 cr)
- IBH 6111 - Research and Evaluation Methods (3.0 cr)
- IBH 6222 - Adolescents and Co-occurring Substance Use and Mental Health Disorders (3.0 cr)

Required Internship (4 credits)
Students must take 4 credits/880 field hours of ADDS 5996.

ADDS 5996 - Internship in Behavioral Health (1.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Professional Studies

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Arts and Cultural Leadership (ACL) program is designed for students who have at least three years of professional, volunteer, and/or advocacy work in the arts and cultural field. Required curriculum, blended with flexible course work, allows students to build a program around their current strengths, experiences, and career direction. Courses in leadership and nonprofit management, along with seminars and directed studies in arts and cultural studies, provide working adults a degree with a clear, career-related focus.

The ACL program is designed to help students:

Gain insight and develop approaches to creating and stewarding the relationships and interdependencies necessary for sustaining a vibrant arts community
Refine strategic planning and communications skills in order to better lead organizations in complex environments
Advocate for the arts and culture sector by promoting better understanding and integrating the economic, political, ethical, technological, and diverse social environments in which it functions
Understand and convey the international context for the arts and the impact of the global economy
Appreciate and nurture the creative process, recognizing how art and the artist function in society

The ACL program uses a foundation of 18 credits (out of 30 that are required for the degree), with latitude built in to pursue elective coursework in support areas such as nonprofit management, leadership, education, public affairs/policy, urban planning, strategic planning, etc. Using an applied learning approach, students receive a high-quality education that draws on the expertise of University faculty and community-based faculty.

By the end of the program, students will be knowledgeable in:

Critical and strategic thinking, and effective communication
The intersection, navigation, and impact of cultural and creative practices within local and global dynamics
Policy formation, implementation, and application relevant to culture, creativity, and the arts
Leadership practices in a variety of contexts
How to implement expertise, improve relationships, and optimize resources

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

To be admitted, students must have a bachelor's degree from an accredited post-secondary US institution or its foreign equivalent.

Other requirements to be completed before admission:
At least 3 years of professional, volunteer, and/or advocacy work in the arts and cultural field is required. Factors of academic
preparation, relevant experience, evidence of readiness and maturity, writing ability, and reasons for seeking the degree will be taken into account as part of the admissions review. GRE scores may be submitted, but are not required.

**Special Application Requirements:**
The application package must include official transcripts of all baccalaureate and post-baccalaureate work, a current resume, two letters of recommendation, a two- to three-page written statement of purpose in which the student elaborates on his or her interest in the program, and an additional writing sample of approximately 10 pages. Application deadlines are in spring for fall semester admission, and fall for spring semester admission. Please refer to the program website for further details.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 84
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 563
- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
- **MELAB**
  - Final score: 84

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** See department for more details.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

A minimum of 30 credits are required for completion of the MPS degree.

Take core courses for a letter grade, earning a B- or better.

Obtain a cumulative GPA for all degree course work of 3.0 or better.

**Required courses (15 credits)**

- ACL 8001 - Introduction to Critical and Cultural Inquiry in Arts and Culture (2.0 cr)
- ACL 5211 - Trends and Impacts in Arts and Cultural Leadership and Management (3.0 cr)
- ACL 5221 - Creative Entrepreneurship and Resource Development (3.0 cr)
- ACL 5231 - Ethical Dilemmas and Legal Issues for Cultural Leaders (3.0 cr)
- ACL 8201 - Creative Leadership in Practice (2.0 cr)
- ACL 8202 - Service Leadership and Board Practicum (1.0 - 2.0 cr)

**Electives (12 credits)**

Elective courses can be selected from related academic departments including ACL, MST, OLPD, and PA. Electives should relate to the professional tasks required of arts and cultural leaders or enhance the student's understanding of the arts within a broader cultural context. Courses must be chosen in consultation with the advisor. Examples include, but are not limited to the courses listed below. Take 12 or more credit(s) from the following:

- ACL 5100 - Topics in Arts and Cultural Leadership (1.0 - 4.0 cr)
- ACL 5241 - Financial Management for Arts Nonprofits (2.0 cr)
- ACL 5251 - Arts Advocacy in the Political Landscape (2.0 cr)
- ACL 5950 - Special Topics (1.0 - 4.0 cr)
- ACL 5993 - Directed Studies (1.0 - 4.0 cr)
- DES 5165 - Design and Globalization (3.0 cr)
- GEOG 8106 - Seminar: Social and Cultural Geography (3.0 cr)
• JOUR 4263 - Strategic Communication Campaigns (3.0 cr)
• JOUR 5251 - Strategic Communication Theory (3.0 cr)
• LA 5413 - Introduction to Landscape Architectural History (3.0 cr)
• LS 5100 - Liberal Studies Seminar (1.0 - 4.0 cr)
• MST 5011 - Museum History and Philosophy (3.0 cr)
• MST 5012 - Museum Practices (3.0 cr)
• OLPD 5011 - Leading Organizational Change: Theory and Practice (3.0 cr)
• OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
• OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
• PA 5003 - Introduction to Financial Analysis and Management (1.5 cr)
• PA 5011 - Management of Organizations (3.0 cr)
• PA 5101 - Management and Governance of Nonprofit Organizations (3.0 cr)
• PA 5102 - Organization Performance and Change (3.0 cr)
• PA 5103 - Leadership and Change (3.0 cr)
• PA 5104 - Strategic Human Resource Management (3.0 cr)
• PA 5111 - Financing Public and Nonprofit Organizations (3.0 cr)
• PA 5190 - Topics in Public and Nonprofit Leadership and Management (1.0 - 3.0 cr)
• PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
• PA 5211 - Land Use Planning (3.0 cr)
• PA 5251 - Strategic Planning and Management (3.0 cr)
• PA 5253 - Designing Planning and Participation Processes (3.0 cr)
• PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
• Other electives chosen in consultation with student's advisor.

Final Project

The ACL Final Project provides students with an opportunity to focus on the needs of a particular organization or community as they identify and carry out, in consultation with the leadership of that group and their academic advisor(s), a project that meets a need within that group and reflects both the interest of the students and their academic achievement.

ACL 8002 - Capstone: Applied Research Project (1.0 cr)
ACL 8003 - Capstone: Reflections and Presentation (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Biological Sciences

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of biological sciences (MBS) degree is a highly flexible graduate-level program designed to meet the needs of members of the working community who wish to increase their knowledge in areas of modern biology. Students focus their studies in one of three broad areas: molecular biosciences, cellular and organismal biology, or environmental and population biology. Limited elective credits in areas, such as education, business, and public health can be used to support a student's individual career goals and program focus. The degree enables recipients to learn new job skills, change professional emphasis, or provide added value to their present job and may be completed on a part-time basis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

To be admitted, students must have a bachelor's degree from an accredited post-secondary US institution or its foreign equivalent.

Other requirements to be completed before admission:
Evidence of knowledge of current, college-level concepts of basic chemistry, organic chemistry, and some biology coursework is required. Transcripts showing equivalent coursework combined with professional experience will be considered for application toward fulfillment of the prerequisites for admission. Two years of relevant experience in the workforce is preferred for admission.

Special Application Requirements:
A statement of career goals, letters of reference, transcripts for all undergraduate and post-baccalaureate degrees or coursework, and an updated resume must accompany the application. Application deadlines are in the spring for fall semester admission, and in the fall for spring semester admission. Please refer to the program website for further details.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 84
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 563
- IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
- MELAB
  - Final score: 84
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B project is carried out under the direction of a faculty member. It can be literature-based or lab-based with a testable hypothesis and a final paper of 30-50 pages in length, which is an in-depth examination and analysis of a particular area, problem, technique, etc.

**Plan C:** Plan C requires 30 major credits and 0 credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** The Plan C requirement is the Capstone course APS 8003.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The program includes coursework, independent study, and a project for Plan B master's students or capstone course for Plan C master's students. With guidance from program advisors, students complete 30 credits. MBS candidates may transfer up to 12 credits into the program. Foundation credits may be waived or substituted if the student can show proficiency in the subject area. A bioethics requirement may be met with a credit or non-credit course. Coursework is taken from the regular graduate-level coursework. An overall GPA of 3.00 is required for the degree to be awarded.

**Introductory Course (1 credit)**

- APS 8001 - Introduction to Research in the Biological Sciences (1.0 cr)

**Biochemistry Foundation (3 credits)**

- BIOC 6021 - Biochemistry (3.0 cr)

**Biological Sciences Courses (17 - 23 credits)**

Courses in the student's area of concentration within the biological sciences chosen in consultation with student's advisor. One course in at least two of the following areas should be taken: Molecular Biosciences, Cellular and Organismal Biology, Environmental and Population Biology. Up to 7 credits of directed research or directed study courses can be included. Plan C students MUST take at least 1 credit of APS 8110.

Take 17 - 23 credit(s) from the following:

- Courses in the student's area of concentration within the biological sciences chosen in consultation with student's adviser.

**Electives (0 - 6 credits)**

Elective courses outside the biological sciences chosen with student's advisor.

Take 0 - 6 credit(s) from the following:

- Electives courses outside the biological sciences chosen with student's adviser.

**Final Project or Capstone (3 credits)**

Plan B students take APS 8002 in their final semester.

Plan C students take APS 8003 in their final semester.

- APS 8002 - Final Project Course for Plan B MBS Students (2.0 - 3.0 cr)
- **or APS 8003 - Capstone Course for Plan C MBS Students (2.0 - 3.0 cr)**
**Twin Cities Campus**

**Biological Sciences Minor**

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Professional Studies

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of professional studies in horticulture is designed to enhance the capacity of those currently working in the horticulture industry and to provide the knowledge base needed by others interested in beginning new careers, starting their own business, or pursuing personal interests in horticulture. The degree provides a solid foundation of contemporary horticultural knowledge, yet is flexible enough to allow individuals to focus on the specific skills they wish to hone.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

To be admitted, students must have a bachelor's degree from an accredited post-secondary U.S. institution or its foreign equivalent.

Other requirements to be completed before admission:
Evidence of knowledge of current, introductory, college-level concepts of algebra, chemistry, biology, botany, or plant propagation is required for admission to the program. Prerequisite coursework may be completed at the University of Minnesota or at other educational institutions subject to transfer review. In all cases, documentation of completed, equivalent coursework combined with professional experience will be considered for application toward fulfillment of the prerequisites for admission to the M.P.S. in Horticulture. A minimum grade of C will be the standard for admission for all prerequisite coursework. Undergraduate prerequisite coursework must come from the following areas: algebra, chemistry, biology, botany, or plant propagation. Please refer to the program website for further details.

Special Application Requirements:
The application package must include official transcripts of all baccalaureate and post-baccalaureate work, a current resume, two letters of reference, a written statement of purpose (no more than two pages) which addresses pertinent aspects of the student’s background and academic qualifications as related to admission to the program and demonstrates a strong interest in horticultural science including documentation of any relevant experiences in the field of horticulture. Application deadlines are in spring for fall semester admission, and in fall for spring semester admission. Refer to the program website for further details.

International applicants must submit score(s) from one of the following tests:

Information current as of August 31, 2018
Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: See department for more details.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

Students who have not completed relevant introductory coursework in soils, plant pathology, and entomology, either during or subsequent to completion of their bachelor's degree, will be required to complete courses in these areas as part of their M.P.S. degree requirements. These courses are not prerequisites for admission. Depending on the specific courses included in the student's program, some additional coursework may also be required over and above the 30 graduate credits required for the degree.

All prerequisites associated with courses included in the student's course program must be completed as part of the student's degree requirements, unless exempted in writing by the instructor for the course and approved by the student's advisor and the program director of graduate studies (DGS) prior to taking the course.

Excluding the capstone course, a maximum of 3 credits taken S/N may be applied toward the minimum requirements for the degree.

The student's course program must be approved by the DGS and M.P.S. Steering Committee.

Only coursework for which the student has earned a grade of B- or better will be counted toward the minimum of 30 semester credits required for the degree.

Horticulture Coursework (15 credits)

15 credits of Horticulture (HORT) courses are required. A maximum of 9 credits total at the 4xxx level may be applied to the program in consultation with the student's advisor. A maximum of 3 credits of HORT 5090 Directed Studies may be used.

Take 15 or more credit(s) from the following:

• HORT 4xxx
• HORT 5xxx
• HORT 6003 - Masters of Professional Studies in Horticulture Professional Experience Program: Internship (1.0 - 3.0 cr)
• HORT 6011 - Plant Propagation (4.0 cr)
• HORT 8xxx

Related Fields (12 credits)

Select at least 12 credits, such as the following, from related fields coursework offered across the University. Other courses can be selected in consultation with the advisor. A maximum of 9 total credits at the 4xxx level, in consultation with the advisor, can be applied to program requirements.

Take 12 or more credit(s) from the following:

• AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
• APS 5103 - Integration of Sustainable Agriculture Concepts (3.0 cr)
• APS 5101 - Ecological Design for Horticulture (3.0 cr)
• APS 5102 - Garden Design: Theory and Application (2.0 cr)
• ENT 5011 - Insect Structure and Function (4.0 cr)
• ENT 5021 - Insect Biodiversity and Evolution (4.0 cr)
• ENT 5051 - Scientific Illustration of Insects (3.0 cr)
• ENT 5081 - Insects, Aquatic Habitats, and Pollution (3.0 cr)
• ENT 5121 - Applied Experimental Design (4.0 cr)
• ENT 5341 - Biological Control of Insects and Weeds (3.0 - 4.0 cr)
• ENT 5361 - Aquatic Insects (4.0 cr)
• HORT 4xxx
• HORT 5xxx

- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Human Sexuality Postbacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Human sexuality and associated gender roles and sexual behavior are an integral part of health care, clinical and social sciences, biological sciences, and a determinant of population dynamics and population science. The HIV pandemic, and the prevalence of sexually transmitted infections (STIs) worldwide, make training in human sexuality an essential component of international development, reproductive and population health, and social policy. Sexual health issues are often part of a clinically oriented medical curriculum, and this online certificate broadens human sexuality education to a wider audience across the US and internationally. Completing this coursework will fulfill part of the requirements towards AASECT certification for sex educators in the components of core knowledge and sexuality education training.

Program Delivery
This program is available:
• completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must have a bachelors degree from an accredited post-secondary US institution or an international equivalent.

Other requirements to be completed before admission:
Online Application through Apply Yourself
Online application fee of $75 ($95 for international students)
Resume or CV
Personal Statement (1-2 pages)
Two letters of recommendation from academic or professional references

International applicants must submit score(s) from one of the following tests:

- This program does not require summer semesters for timely completion.
- Degree: Master of Professional Studies

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The high prevalence of co-occurring mental health and substance use disorders virtually guarantees that counselors, no matter the treatment setting, will encounter clients struggling with not one, but two or more disorders.

The master of professional studies in integrated behavioral health (IBH) prepares counselors for this clinical reality. The IBH degree merges mental health and substance abuse education and training into a single, comprehensive and cohesive program. This synthesis represents an important and pioneering shift in the preparation of clinicians.

The IBH is designed to fulfill education and training requirements for two licenses: Licensed Professional Clinical Counselor (LPCC) and Licensed Alcohol and Drug Counselor (LADC).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
- Bachelor's degree from an accredited institution
- Transcripts
- Personal statement
- Two letters of reference
- Updated resume or CV

Special Application Requirements:
International students interested in the master of professional studies in integrated behavioral health should contact the International Student and Scholar Service (http://www.isss.umn.edu) for information on visa status and academic requirements.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 84
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 563

- Final score: 84

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 60 major credits and 0 credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Satisfactory completion of a portfolio demonstrates the student's clinical conceptualization and practice skills through the following:

- A client case study that includes an assessment and treatment plan
- A videotaped treatment session with a mock client
- A philosophy of counseling statement outlining the student's theoretical orientation to counseling and specific applications of his/her counseling philosophy to the population she/he intends to serve
- Evaluations outlining areas of competence and skill as assessed by internship site supervisor
- Self-selected papers and projects from program coursework that demonstrate the student's mastery of knowledge and skills

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

In addition to course work, an 880-hour field placement is required to complete the degree. The credit and field placement requirements are designed to fulfill licensing requirements as defined in the Minnesota Statutes, section 148B.54, subdivision 2; and Minnesota Rules, part 2150.2500 to 2150.2660. As noted in the statute, "The national trend for master's programs in counseling is towards 60 semester credits." In order for a practitioner to be eligible for third party reimbursement for services, the practitioner must demonstrate a minimum of 60 semester graduate level credits in counseling coursework.

Students may take one or more courses per term and have up to five years to complete a master's degree. Students who wish to transfer graduate-level coursework from other institutions should contact the Graduate Programs office at ccapsinfo@umn.edu for information and assistance.

Only coursework for which the student has earned a grade of B- or better will be counted toward the minimum of 60 semester credits required for the degree.

Foundation Courses (10 credits)

These courses are prerequisites for most other courses in the program. They should be the first courses students complete.

- ADDS 5011 - Foundations in Addiction Studies (2.0 cr)
- ADDS 5021 - Introduction to Evidence Based Practices and the Helping Relationship (3.0 cr)
- ADDS 5031 - Applied Psychopharmacology (2.0 cr)
- IBH 6111 - Research and Evaluation Methods (3.0 cr)

Prerequisites for First Internship (14 credits)

These courses (along with "Foundation Courses" ADDS 5011, 5021, 5031, and IBH 6111) must be completed before students can register for the first internship ADDS 5996.

Either ADDS 5071 or ADDS 5081 may be taken concurrently with the internship.

- ADDS 5041 - Methods and Models I: Motivational Counseling (2.0 cr)
- ADDS 5061 - Foundations of Group Work (3.0 cr)
- ADDS 5071 - Foundations of Co-occurring Disorders (2.0 cr)
- ADDS 5081 - Multicultural Foundations of Behavioral Health (3.0 cr)
- ADDS 5091 - Assessment and Treatment Planning I (3.0 cr)
- ADDS 5121 - Professional Seminar 1 (1.0 cr)

First Internship (2 credits)

Two credits (440 field hours) of ADDS 5996 must be completed near the program's mid-way point.

- ADDS 5996 - Internship in Behavioral Health (1.0 - 4.0 cr)

Prerequisites for Second Internship (21 credits)

These courses must be completed before students can register for the second internship IBH 6996.

- ADDS 5051 - Methods and Models II: Cognitive Behavioral Therapy (2.0 cr)
IBH 6011 - Foundations in Differential Diagnosis (3.0 cr)
IBH 6022 - Foundations of Psychological Assessment (2.0 cr)
IBH 6031 - Methods and Models IV: Trauma and Anxiety, Assessment and Treatment Intervention (2.0 cr)
IBH 6061 - Applied Advanced Diagnostics I (2.0 cr)
IBH 6071 - Advanced Professional Issues (3.0 cr)
IBH 6081 - Human Lifespan Development and Behavioral Health (3.0 cr)
IBH 6101 - Family Dynamics and Therapy (3.0 cr)
IBH 6121 - Professional Seminar 2 (1.0 cr)

Second Internship (2 credits)
Two credits (440 field hours) of IBH 6996 must be completed near the end of the program.
IBH 6996 - Internship for Integrated Behavioral Health (1.0 - 4.0 cr)

Additional Required Courses (4 credits)
Additional required courses. Can be taken any time.
IBH 6051 - Advanced Group Practice (2.0 cr)
IBH 6091 - Intersection of Career and Mental Health (2.0 cr)

Electives (6 credits)
Electives not on this list must be preapproved.
Take 6 or more credit(s) from the following:
• ADDS 5996 - Internship in Behavioral Health (1.0 - 4.0 cr)
• HSEX 6001 - Foundations of Human Sexuality (3.0 cr)
• HSEX 6012 - Sexual Function and Dysfunction (3.0 cr)
• HSEX 6013 - Perspectives and Practices in Sexuality Education (3.0 cr)
• IBH 6021 - Methods and Models III: Synthesis Seminar in Client Centered Care (2.0 cr)
• IBH 6032 - Advanced Multicultural Practice (1.0 cr)
• IBH 6041 - Prolonged Exposure Therapy for PTSD (2.0 cr)
• IBH 6062 - Applied Advanced Diagnostics II (2.0 cr)
• IBH 6221 - Applications of Counseling Theories (2.0 cr)
• IBH 6222 - Adolescents and Co-occurring Substance Use and Mental Health Disorders (3.0 cr)
• IBH 6227 - Supervision Models and Methods in Integrated Behavioral Health (3.0 cr)
• IBH 6228 - Mental Health and Addiction Program Administration (2.0 cr)
• IBH 6230 - Clinical Application in Prolonged Exposure Therapy (3.0 cr)
• IBH 6232 - Introduction to Navigating Issues of Sexual Health and Gender in the Therapy Session (2.0 cr)
• IBH 6233 - DBT Skills Training: Group Practices and Treatment Modalities (2.0 cr)
• IBH 6234 - Counseling Grief and Loss (2.0 cr)
• IBH 6910 - Topics in Integrated Behavioral Health (1.0 - 4.0 cr)
• IBH 6993 - Directed Study in Integrated Behavioral Health (1.0 - 3.0 cr)
• IBH 6996 - Internship for Integrated Behavioral Health (1.0 - 4.0 cr)

Portfolio (1 credit)
Required portfolio course
IBH 8002 - Portfolio Seminar (1.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 59 to 90
- This program does not require summer semesters for timely completion.
- Degree: Master of Architecture

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Architecture encompasses the making and study of the buildings and environments that we inhabit. The concerns of architecture involve a wide variety of areas of study, including the art of representing built projects through drawings and computer graphics; the technology of building structure, building materials, and natural and mechanical systems; the history, theory, and art of making, using, and understanding buildings as cultural artifacts for human use; and the practice of architecture in the context of sustainable environmental systems, urban form, and business economics. The School of Architecture offers one accredited professional degree, the Master of Architecture (M.Arch.), and a non-professional research degree, the Master of Science (MS) in architecture, with four potential tracks: heritage conservation and preservation, metropolitan design, research practices, and sustainable design.

The Master of Architecture degree is the accredited three-year professional program that prepares students for licensure and practice in the discipline of architecture as a speculative, analytic, and investigative endeavor. Through rigorous methods of inquiry developed in the design studio, lectures, and seminars students acquire the breadth of knowledge required of the professional architect, including: the techniques and processes of representation, communication, and analysis; the history and theory of making architecture and urban form for human use; and the technology, systems, processes, and economics of construction and practice. The 90-credit M.Arch. professional degree program is accredited by the National Architectural Accrediting Board (NAAB). A portfolio for admission is required.

The Master of Science in architecture is a nonprofessional degree offering advanced studies and research methods in heritage conservation and preservation, metropolitan design, research practices, or sustainable design. The nonprofessional MS in architecture seeks advanced students from architecture, building science, art history, geography, archaeology, landscape architecture, environmental design, or related disciplines to pursue multidisciplinary graduate study and research in sustainable building practices and historic preservation. The School of Architecture also offers a concurrent degree program that combines the M.Arch. professional degree and the MS in architecture. Students may take a total of 24 credits in common between the two academic programs. See information on the MS in architecture for degree requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
- Total Score: 6.5
- MELAB
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 59 to 90 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

**Capstone Project:** The Master's Final Project is a 10-credit studio-based design exploration under the supervision of a studio faculty mentor.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Advanced placement into the second year is possible for students with a Bachelor of Science or other pre-professional degree and excellent English language proficiency.

**Required Coursework (61 credits)**

Take the following required courses for a total of 61 credits:

- ARCH 5411 - Principles of Design Theory (3.0 cr)
- ARCH 5412 - Architecture: A Global and Cultural History (3.0 cr)
- ARCH 5561 - Tech 1, Structures for Building (3.0 cr)
- ARCH 5562 - Tech 2, Intro to Building Technology (3.0 cr)
- ARCH 5563 - Tech 3: Advanced Building Technology Integrated Building Systems (3.0 cr)
- ARCH 5564 - Tech 4: Building Structural Systems (3.0 cr)
- ARCH 5621 - Professional Practice in Architecture (3.0 cr)
- ARCH 8251 - Graduate Architectural Design I (9.0 cr)
- ARCH 8253 - Graduate Architectural Design II (6.0 cr)
- ARCH 8255 - Graduate Architectural Design III (6.0 cr)
- ARCH 8299 - Master's Final Project (10.0 cr)
- ARCH 5518 - Environmental Technology: Integrative Ecological Design for Responsive Architecture (3.0 cr)
- ARCH 5413 - Modern and Contemporary Global Architecture (3.0 cr)
- ARCH 8254 - Technical Applications in Design (3.0 cr)
- ARCH 5563 - Tech 3: Advanced Building Technology Integrated Building Systems (3.0 cr)

**Project Modules (9 credits)**

Take 9 credits (3 courses) from the following:

- ARCH 5250 - Advanced Topics in Design (1.0 - 6.0 cr)
- or ARCH 8250 - Advanced Topics in Design (1.0 - 6.0 cr)

**Catalysts (2 credits)**

Take the following course twice for a total of 2 credits:

- ARCH 5110 - Architecture as Catalyst (1.0 cr)

**Electives (18 credits)**

Take 18 credits of Architecture electives. At least 3 credits must be in ARCH 54xx or 84xx.

- Arch 5xx
- or Arch 8xxx

**Advanced Standing (59 credits)**

Students with a Bachelor of Science in Architecture may be eligible for a waiver of the required first-year coursework.

**Required Courses (40 credits)**

Take the following courses for 40 credits:

- ARCH 5563 - Tech 3: Advanced Building Technology Integrated Building Systems (3.0 cr)
- ARCH 5564 - Tech 4: Building Structural Systems (3.0 cr)
- ARCH 5621 - Professional Practice in Architecture (3.0 cr)
ARCH 8253 - Graduate Architectural Design III (6.0 cr)
ARCH 8255 - Graduate Architectural Design V (6.0 cr)
ARCH 8299 - Master's Final Project (10.0 cr)
ARCH 8254 - Technical Applications in Design (3.0 cr)
ARCH 5411 - Principles of Design Theory (3.0 cr)
ARCH 5413 - Modern and Contemporary Global Architecture (3.0 cr)

**Project Modules (3 credits)**
Take one of the following courses once for 3 credits:
ARCH 5250 - Advanced Topics in Design (1.0 - 6.0 cr)
or ARCH 8250 - Advanced Topics in Design (1.0 - 6.0 cr)

**Catalysts (1 credit)**
Take the following course for 1 credit:
ARCH 5110 - Architecture as Catalyst (1.0 cr)
Take 15 credits of Architecture electives. At least 3 credits must be in ARCH 54xx or 84xx.
Arch 5xxx
or Arch 8xxx

**Joint- or Dual-degree Coursework:** M.Arch/M.S.-Architecture
Student may take a total of 24 credits in common among the academic programs.
Twin Cities Campus
Architecture M.S.
School of Architecture
College of Design

Contact Information:
School of Architecture, University of Minnesota, 145 Rapson Hall, 89 Church Street SE, Minneapolis, MN 55455 (612-624-7866; fax: 612-624-5743)
Email: archinfo@umn.edu
Website: http://arch.cdes.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Architecture offers four distinct master of science in architecture degrees:
1) MS in architecture, sustainable design track (plan A or B);
2) MS in architecture, heritage conservation and preservation track (plan A or B);
3) MS in architecture, metropolitan design track (plan A, B, or C); and,
4) MS in architecture, research practices track (plan C only).

Each of the above has its own unique application requirements, prerequisites, and curriculum structure. Prospective applicants are encouraged to consult the degree programs section of the School of Architecture website for additional information: http://arch.design.umn.edu. Students who successfully complete the a master of science in architecture degree are eligible to receive 936 hours of IDP credit that is 17% of the 5,600 hours of mandatory internship for registration as an architect. To receive the IDP credit, the MS degree must be earned after receiving the M.Arch degree. The MS metropolitan design track requires summer semester coursework. The other three MS tracks do not require summer semester work.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Each of the master of science in architecture programs has its own unique application requirements, prerequisites, and curriculum structure. Prospective applicants are encouraged to consult the degree programs section of the School of Architecture website for additional information: http://arch.design.umn.edu.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS
- MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 27 to 28 major credits and 6 credits outside the major. The final exam is oral.

Plan C: Plan C requires 24 to 30 major credits and 0 to 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Joint- or Dual-degree Coursework: M.Arch/MS-ArchitectureMLA/MS-Architecture Student may take a total of 24 credits in common among the academic programs.

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Sustainable Design

This sub-plan is limited to students completing the program under Plan A or Plan B.

The sustainable design track of the MS admits from diverse design and environmental backgrounds. Candidates for the program include, practicing design professionals, architecture graduate students, engineering and environmental science professionals, and related disciplines. Ideal applicants will have a clear sustainable design research agenda, experience in environmental design or design production, and a desire to develop new knowledge in the sustainable design field.

The sustainable design track’s goals are to foster sustainable design education, research, and practice and to create a significant positive impact on sustainable design in the region and nation. It will achieve these goals by providing courses and research opportunities that:

- Promote excellence and innovations in regional and global ecological design practice and research.
- Contribute to the evolving and emerging sustainable design practice and research knowledge base, which includes ecological, environmental, social, and economic issues and impacts.
- Provide architectural designers and researchers with qualitative and quantitative knowledge, methods, and tools to implement sustainable design in professional practice.

Required Coursework

Take the following courses for a total of 12 credits:

- ARCH 8561 - Sustainable Design Theory and Practice (3.0 cr)
- ARCH 8567 - Site and Water Issues in Sustainable Design (3.0 cr)
- ARCH 8563 - Energy and Indoor Environmental Quality Issues in Sustainable Design (3.0 cr)
- ARCH 8565 - Materials Performance in Sustainable Building (3.0 cr)

Architecture Electives

Take at least 6 ARCH elective credits, in consultation with the advisor or director of graduate studies.

Arch Electives

Take 6 - 7 credit(s) from the following:

- ARCH 5521 - Material Investigation: Concrete (4.0 cr)
- ARCH 5523 - Material Investigation: Steel and Glass (4.0 cr)
- ARCH 5527 - Material Investigations: Stone and Water (4.0 cr)
- ARCH 5541 - Material Strategies (3.0 cr)

Electives Outside Architecture

Take at least 6 credits outside the major, in consultation with the advisor or director of graduate studies.

Take 6 - 7 credit(s) from the following:

- SSM 5414 - Advanced Residential Building Science (4.0 cr)
- DES 5168 - Evidence-Based Design (3.0 cr)
- EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
- ESPM 5242 - Methods for Environmental and Natural Resource Policy Analysis (3.0 cr)
- ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
- ESPM 5251 - Natural Resources in Sustainable International Development (3.0 cr)
- ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
- ESPM 5261 - Economics and Natural Resources Management (4.0 cr)
- ESPM 5603 - Environmental Life Cycle Analysis (3.0 cr)
• ESPM 5605 - Recycling: Extending Raw Materials Supplies (3.0 cr)
• HSCI 5244 - Nature's History: Science, Humans, and the Environment (3.0 cr)
• LA 5413 - Introduction to Landscape Architectural History (3.0 cr)
• LA 5514 - Making the Mississippi (3.0 cr)
• PA 5211 - Land Use Planning (3.0 cr)
• PA 5253 - Designing Planning and Participation Processes (3.0 cr)
• PA 5271 - Geographic Information Systems: Applications in Planning and Policy Analysis (3.0 cr)
• PA 5511 - Community Economic Development (3.0 cr)
• PA 5721 - Energy Systems and Policy (3.0 cr)
• PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
• PSY 5960 - Topics in Psychology (1.0 - 4.0 cr)

Plan A Requirements
Take 10 master's thesis credits.
ARCH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B Requirements
Take at least 10 additional credits, in consultation with the advisor or director of graduate studies.

Additional credits
Take 10 - 11 credit(s) from the following:
• ARCH 5521 - Material Investigation: Concrete (4.0 cr)
  or ARCH 5523 - Material Investigation: Steel and Glass (4.0 cr)
  or ARCH 5527 - Material Investigations: Stone and Water (4.0 cr)
  or ARCH 5541 - Material Strategies (3.0 cr)
  or SSM 5414 - Advanced Residential Building Science (4.0 cr)
  or DES 5188 - Evidence-Based Design (3.0 cr)
  or ESPM 5242 - Methods for Environmental and Natural Resource Policy Analysis (3.0 cr)
  or ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
  or ESPM 5251 - Natural Resources in Sustainable International Development (3.0 cr)
  or ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
  or ESPM 5261 - Economics and Natural Resources Management (4.0 cr)
  or ESPM 5603 - Environmental Life Cycle Analysis (3.0 cr)
  or ESPM 5605 - Recycling: Extending Raw Materials Supplies (3.0 cr)
  or HSCI 5244 - Nature's History: Science, Humans, and the Environment (3.0 cr)
  or LA 5413 - Introduction to Landscape Architectural History (3.0 cr)
  or LA 5514 - Making the Mississippi (3.0 cr)
  or PA 5211 - Land Use Planning (3.0 cr)
  or PA 5253 - Designing Planning and Participation Processes (3.0 cr)
  or PA 5271 - Geographic Information Systems: Applications in Planning and Policy Analysis (3.0 cr)
  or PA 5511 - Community Economic Development (3.0 cr)
  or PA 5721 - Energy Systems and Policy (3.0 cr)
  or PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
  or PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
  or PSY 5960 - Topics in Psychology (1.0 - 4.0 cr)

Heritage Conservation & Preservation
This sub-plan is limited to students completing the program under Plan A or Plan B.

The heritage conservation and preservation track of the Architecture MS offers courses and research opportunities in the study of the preservation of historic buildings, districts, and landscapes, as well as the design and management of cultural heritage sites. The track explores heritage on several distinct but related levels. It examines the materiality of heritage resources through documentation, diagnosis, and the design of treatment interventions. It also encourages critical analysis and assessment of the cultural values that underlie and define preservation policies, laws, and professional norms. Through fieldwork, case studies, and courses that investigate regional, national, and global heritage, the track focuses on the philosophy, policy, technology, economics, and social implications of heritage preservation.

Required Coursework
Take the following courses for a total of 6 credits:

ARCH 5671 - Historic Preservation (3.0 cr)
ARCH 5673 - Historic Property Research and Documentation (3.0 cr)

Heritage Conservation and Preservation Electives
Take 2 courses from the following list for at least 6 credits:
ARCH 5410 - Topics in Architectural History (3.0 cr)
ARCH 5411 - Principles of Design Theory (3.0 cr)
ARCH 5412 - Architecture: A Global and Cultural History (3.0 cr)
ARCH 5670 - Topics in Historic Preservation (1.0 - 3.0 cr)
ARCH 5672 - Historic Building Conservation (3.0 cr)
ARCH 5674 - World Heritage Conservation (3.0 cr)
ARCH 5676 - Economics of Heritage Preservation (3.0 cr)
ARCH 5677 - Preservation of the Vernacular Built Environment and Cultural Landscape (3.0 cr)
ARCH 5678 - Preservation & Sustainability (3.0 cr)

Architecture Electives
Take at least 6 ARCH elective credits, in consultation with the advisor or director of graduate studies.
Take 6 - 7 credit(s) from the following:
- ARCH 5441 - Minnesota: Architecture and Landscapes (3.0 cr)
- ARCH 5711 - Theory and Principles of Urban Design (3.0 cr)
- ARCH 4435 - History of American Architecture (3.0 cr)
- ARCH 5609 - Development and Implementation of Research (3.0 cr)

Electives Outside Architecture
Take at least 6 credit(s) outside the major, in consultation with the advisor or director of graduate studies.
Take 6 - 7 credit(s) from the following:
- ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
- LA 5413 - Introduction to Landscape Architectural History (3.0 cr)
- LA 5514 - Making the Mississippi (3.0 cr)
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 5271 - Geographic Information Systems: Applications in Planning and Policy Analysis (3.0 cr)
- PA 5511 - Community Economic Development (3.0 cr)
- PA 5221 - Private Sector Development (3.0 cr)
- PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)
- MST 5011 - Museum History and Philosophy (3.0 cr)
- MST 5012 - Museum Practices (3.0 cr)

Plan A Requirements
Take 10 master's thesis credits.
ARCH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B Requirements
Take an additional 9 to 10 credits, in consultation with the advisor or director of graduate studies.
Take 9 - 10 credit(s) from the following:
- ARCH 5441 - Minnesota: Architecture and Landscapes (3.0 cr)
- ARCH 5711 - Theory and Principles of Urban Design (3.0 cr)
- ARCH 5435 - History of American Architecture (3.0 cr)
- ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
- LA 5413 - Introduction to Landscape Architectural History (3.0 cr)
- LA 5514 - Making the Mississippi (3.0 cr)
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 5271 - Geographic Information Systems: Applications in Planning and Policy Analysis (3.0 cr)
- PA 5511 - Community Economic Development (3.0 cr)
- PA 5221 - Private Sector Development (3.0 cr)
- PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)
- MST 5011 - Museum History and Philosophy (3.0 cr)
- MST 5012 - Museum Practices (3.0 cr)

Metropolitan Design
This sub-plan is limited to students completing the program under Plan A, Plan B, or Plan C.

The metropolitan design track of the architecture MS is an advanced program intended for individuals who are keenly interested in the study of cities and their metropolitan regions. The track combines strong design instruction supported by applied research courses in urban design history and theory. The objective is to train students to work across a large range of urban scales and become familiar with the social, ecological, economic, and political interactions that eventually shape the quality of city living. It is open to professionals from the design disciplines and provides concurrent options for graduate students enrolled in the M.Arch and MLA professional programs. Concurrent students must graduate from the Architecture MS (metropolitan design track) after they have successfully completed their professional programs.

Required Coursework
Take the following courses for a total of 12 credits:
ARCH 5711 - Theory and Principles of Urban Design (3.0 cr)
ARCH 5721 - Case Studies in Urban Design (3.0 cr)
ARCH 8255 - Graduate Architectural Design V (6.0 cr)

Electives Outside Architecture
Take at least 6 credits outside the major, in consultation with the advisor or director of graduate studies.
Take 6 - 7 credit(s) from the following:
- PA 5501 - Theories and Policies of Development (3.0 cr)
- PA 5511 - Community Economic Development (3.0 cr)
- PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
- HSG 5467 - Housing and the Social Environment (4.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)
- HSG 5463 - Housing Policy (3.0 cr)
- LA 5405 - Interdisciplinary Studies in Landscape Architecture (1.0 - 6.0 cr)
- LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
- PA 5721 - Energy Systems and Policy (3.0 cr)
- PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- PA 5723 - Water Policy (3.0 cr)
- PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5212 - Managing Urban Growth and Change (3.0 cr)
- PA 5231 - Transit Planning and Management (3.0 cr)
- PA 5261 - Housing Policy (3.0 cr)
- PA 5802 - Global Economic Policy (3.0 cr)
- PA 8202 - Networks and Places: Transportation, Land Use, and Design (4.0 cr)

Remaining Electives
Take elective credits from the following list, in consultation with the advisor or director of graduate studies, to meet minimum major and total course credit requirements:
Take 6 - 7 credit(s) from the following:
- ARCH 5410 - Topics in Architectural History (3.0 cr)
- ARCH 5441 - Minnesota: Architecture and Landscapes (3.0 cr)
- ARCH 5731 - Territorial City (3.0 cr)
- ARCH 5671 - Historic Preservation (3.0 cr)
- ARCH 5361 - 3-D Computer Architectural Modeling and Design (3.0 cr)
- ARCH 5750 - Topics in Urban Design (1.0 - 4.0 cr)
- PA 5511 - Community Economic Development (3.0 cr)
- PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)
- HSG 5467 - Housing and the Social Environment (4.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)
- LA 5405 - Interdisciplinary Studies in Landscape Architecture (1.0 - 6.0 cr)
- ARCH 8561 - Sustainable Design Theory and Practice (3.0 cr)
- LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
- PA 5721 - Energy Systems and Policy (3.0 cr)
- PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- PA 5723 - Water Policy (3.0 cr)
- PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5212 - Managing Urban Growth and Change (3.0 cr)
- PA 5231 - Transit Planning and Management (3.0 cr)
- PA 5261 - Housing Policy (3.0 cr)
- PA 5802 - Global Economic Policy (3.0 cr)
- PA 8202 - Networks and Places: Transportation, Land Use, and Design (4.0 cr)

Plan A Requirements
Take 10 master's thesis credits.
ARCH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Research Practices
This sub-plan is limited to students completing the program under Plan C.

The Research Practices track addresses two goals: providing a structured path to licensure totaling seven years, and integrating research with practice.

MS-RP students are required to maximize their progress toward completing the Architectural Experience Program (AXP) during their MS program. This means work in a firm or other AXP setting is required while enrolled in the program, including each semester and summer between semesters. Exceptions will be made for extraordinary circumstances (such as grant-funded research or personal
situation).

**Required Coursework**
Take the following courses for a total of 18 credits:
ARCH 5609 - Development and Implementation of Research (3.0 cr)
ARCH 5621 - Professional Practice in Architecture (3.0 cr)
ARCH 5651 - Building Stories (3.0 cr)
ARCH 5686 - Research Practices Final Project: Research into Practice (4.0 cr)
ARCH 5687 - Research Practices Final Project: Practice into Research (4.0 cr)
ARCH 5688 - Research Practices Final Project: Representation of Case Studies (1.0 cr)

**Required Practicum**
Take the following course twice:
ARCH 5630 - Practicum: Advanced Issues in Practice (3.0 cr)

**Electives**
Take two 3-credit elective courses from architecture or non-architecture offerings, in consultation with the adviser or director of graduate studies.
ARCH 5xxx
ARCH 8xxx

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The design graduate program focuses on the study of relationships between humans and their designed environments. This focus is based on the assumption that design and analysis of environments contributes to the improvement of the human condition. The program addresses theory, research, and application, using a shared disciplinary base from the arts and social and behavioral sciences. The goal of the program is for students to analyze, evaluate, and integrate theoretical frameworks related to humans and their designed environments.

Applications submitted to the design graduate program specify a track and degree objective. Formal tracks are:
- Apparel studies (including dress, history, and culture; product development; and retail merchandising and consumer studies)
- Graphic design
- Housing studies
- Interior design

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Eligibility requirements are located on the track pages of the design graduate program website:
http://dha.design.umn.edu/programs/grad.

Special Application Requirements:
Application requirements: http://dha.design.umn.edu/programs/grad/admissions.html

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language
Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 28 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students may be required to complete additional credits upon recommendation of their committee.

**Design Program Core Requirements**

DES 8181 - Research Ethics (1.0 cr)

**Related Field Coursework**

Students are required to take a minimum of 6 credits in a related field. Courses are selected with the approval of the advisor and committee.

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Apparel Studies**

The apparel studies track advances both theoretical knowledge and applications for textile and apparel products and their relationship to human behavior using a design lens. Students may focus on product development; dress, history, and culture; or retail merchandising and consumer studies. Within each of these areas of emphasis within the track, the student completes related coursework as well as research or creative production that culminates in a thesis. The MA degree is focused on the arts and humanities and is appropriate for the dress, history, and culture emphasis.

**Evaluation and Analysis Coursework**

Students are required to take a minimum of 6 credits in evaluation and analysis. Students may take other courses with the approval of the advisor and committee.

Take 6 or more credit(s) from the following:

- DES 8102 - Quantitative Research Methods (3.0 cr)
- DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)

**Concentration**

**Dress, History, and Culture**

**Theory and Philosophy Coursework**

Students take a minimum of 3 credits in this category.

DES 8164 - Innovation Theory and Analysis (3.0 cr)

or DES 8112 - Design Theory (3.0 cr)

**Plan A Requirements**

Take 8 or more credit(s) from the following:

- APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
- APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)
- APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
- APST 8193 - Directed Study (1.0 - 3.0 cr)
• **APST 8267** - Dress and Culture (3.0 cr)
• **APST 8268** - Behavioral Aspects of Dress (3.0 cr)
• **DES 5165** - Design and Globalization (3.0 cr)
• **DES 8112** - Design Theory (3.0 cr)
• **DES 8113** - Teaching and Assessment (2.0 cr)
• **DES 8115** - Grant Writing (2.0 cr)
• **DES 8164** - Innovation Theory and Analysis (3.0 cr)
• **DES 8166** - Material Culture and Design (3.0 cr)
• **DES 8167** - Aesthetics of Design (3.0 cr)

**Thesis credits**
Students take a minimum of 10 thesis credits.
• **DES 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

or **Plan B Requirements**
All Plan B Master's students are required to register for DES 8222, Plan B Master's Project, the last semester of the program. Take 15 or more credit(s) from the following:
• **APST 5193** - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• **APST 5218** - Fashion, Design, and the Global Industry (3.0 cr)
• **APST 8192** - Readings in Apparel Studies (1.0 - 3.0 cr)
• **APST 8193** - Directed Study (1.0 - 3.0 cr)
• **APST 8267** - Dress and Culture (3.0 cr)
• **APST 8268** - Behavioral Aspects of Dress (3.0 cr)
• **DES 5165** - Design and Globalization (3.0 cr)
• **DES 8112** - Design Theory (3.0 cr)
• **DES 8113** - Teaching and Assessment (2.0 cr)
• **DES 8115** - Grant Writing (2.0 cr)
• **DES 8164** - Innovation Theory and Analysis (3.0 cr)
• **DES 8166** - Material Culture and Design (3.0 cr)
• **DES 8167** - Aesthetics of Design (3.0 cr)

**Plan B Master's Project**
Students take a minimum of 3 credits in this category.
• **APST 8222** - Plan B Master's Project (3.0 cr)

-OR-

**Product Development**

**Theory and Philosophy Coursework**
Students take a minimum of 3 credits in this category.
• **DES 8112** - Design Theory (3.0 cr)
• **DES 8164** - Innovation Theory and Analysis (3.0 cr)

**Plan A Requirements**
Take 8 or more credit(s) from the following:
• **APST 5193** - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• **APST 5218** - Fashion, Design, and the Global Industry (3.0 cr)
• **APST 5224** - Functional Clothing Design (4.0 cr)
• **APST 8192** - Readings in Apparel Studies (1.0 - 3.0 cr)
• **APST 8193** - Directed Study (1.0 - 3.0 cr)
• **DES 5185** - Human Factors in Design (3.0 cr)
• **DES 8113** - Teaching and Assessment (2.0 cr)
• **DES 8114** - Design Studio (4.0 cr)
• **DES 8115** - Grant Writing (2.0 cr)
• **DES 8151** - Product Development: Theory and Practice (3.0 cr)
• **DES 8166** - Material Culture and Design (3.0 cr)
• **DES 8167** - Aesthetics of Design (3.0 cr)
• **GDES 8361** - Color, Design, and Human Perception (3.0 cr)

**Thesis Credits**
Students take a minimum of 10 thesis credits.
• **DES 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

or **Plan B Requirements**
Plan B Master's students are required to take DES 8222, Master's Plan B Project, the final semester of the program. Take 15 or more credit(s) from the following:
• **APST 5193** - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• **APST 5218** - Fashion, Design, and the Global Industry (3.0 cr)
• **APST 5224** - Functional Clothing Design (4.0 cr)
• **APST 8192** - Readings in Apparel Studies (1.0 - 3.0 cr)
• **APST 8193** - Directed Study (1.0 - 3.0 cr)
• **DES 5185** - Human Factors in Design (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8114 - Design Studio (4.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• DES 8166 - Material Culture and Design (3.0 cr)
• DES 8167 - Aesthetics of Design (3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)

Plan B Master's Project
Students take a minimum of 3 credits in this category.
• APST 8222 - Plan B Master's Project (3.0 cr)

OR

Retail Merchandising and Consumer Studies

Theory and Philosophy Coursework
APST 8272 - Digital Consumers: Theories in Retail and Consumer Studies (3.0 cr)

Plan A Requirements
Take 8 or more credit(s) from the following:
• APST 5117 - Retail Environments and Human Behavior (3.0 cr)
• APST 5123 - Living in a Consumer Society (3.0 cr)
• APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
• APST 8193 - Directed Study (1.0 - 3.0 cr)
• APST 8267 - Dress and Culture (3.0 cr)
• APST 8268 - Behavioral Aspects of Dress (3.0 cr)
• APST 8271 - Retailing: Strategic Perspectives (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• DES 8166 - Material Culture and Design (3.0 cr)
• DES 8167 - Aesthetics of Design (3.0 cr)

Thesis Credits
Students take a minimum of 10 thesis credits.
• DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

OR

Plan B Requirements
Plan B Master's students are required to take APST 8222, Master's Plan B Project, the final semester of the program. Take 15 or more credit(s) from the following:
• APST 5117 - Retail Environments and Human Behavior (3.0 cr)
• APST 5123 - Living in a Consumer Society (3.0 cr)
• APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
• APST 8193 - Directed Study (1.0 - 3.0 cr)
• APST 8267 - Dress and Culture (3.0 cr)
• APST 8268 - Behavioral Aspects of Dress (3.0 cr)
• APST 8271 - Retailing: Strategic Perspectives (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• DES 8166 - Material Culture and Design (3.0 cr)
• DES 8167 - Aesthetics of Design (3.0 cr)

Plan B Master's Project
Students take a minimum of 3 credits in this category.
• APST 8222 - Plan B Master's Project (3.0 cr)

Graphic Design
The track in graphic design focuses on design theory, process, and methods related to design practice and research. Potential areas of study include graphic design history, theory, and critical narrative; design creativity; color and design; user-centered design; design authorship; data visualization; and interactive design.

Theory and Philosophy Coursework
Students take a minimum of 3 credits in this category.
• DES 8112 - Design Theory (3.0 cr)

OR

DES 8164 - Innovation Theory and Analysis (3.0 cr)

Evaluation and Analysis Coursework
Students take a minimum of 6 credits in this category.
DES 8102 - Quantitative Research Methods (3.0 cr)
or DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
or GDES 5388 - Graphic Design Research (3.0 cr)

Concentration

Plan A Requirements
Students are required to take DES 8114, and GDES 8361 or GDES 8362.
Take 8 or more credit(s) from the following:
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8114 - Design Studio (4.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• GDES 4131W - History of Graphic Design [WI] (4.0 cr)
• GDES 4330 - Surface Fabric Design Workshop (4.0 cr)
• GDES 4345 - Advanced Typography (4.0 cr)
• GDES 5193 - Directed Study in Graphic Design (1.0 - 4.0 cr)
• GDES 5311 - Illustration (3.0 cr)
• GDES 5341 - Interactive Design (3.0 cr)
• GDES 5342 - Advanced Web Design (3.0 cr)
• GDES 5371 - Data Visualization Studio (3.0 cr)
• GDES 5372 - Data Visualization for Interactive Platforms (3.0 cr)
• GDES 5383 - Digital Illustration and Animation (3.0 cr)
• GDES 5386 - Fundamentals of Game Design (3.0 cr)
• GDES 8192 - Readings in Graphic Design (1.0 - 3.0 cr)
• GDES 8193 - Directed Study (1.0 - 3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)
• GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

Thesis Credits
Students take a minimum of 10 thesis credits.
• DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B Requirements
Students are required to take DES 8114, and GDES 8361 or GDES 8362. Plan B Master's students are required to take GDES 8222, Plan B Master's Project, the last semester of the program.
Take 15 or more credit(s) from the following:
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8114 - Design Studio (4.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• GDES 4131W - History of Graphic Design [WI] (4.0 cr)
• GDES 4330 - Surface Fabric Design Workshop (4.0 cr)
• GDES 4345 - Advanced Typography (4.0 cr)
• GDES 5193 - Directed Study in Graphic Design (1.0 - 4.0 cr)
• GDES 5311 - Illustration (3.0 cr)
• GDES 5341 - Interactive Design (3.0 cr)
• GDES 5342 - Advanced Web Design (3.0 cr)
• GDES 5371 - Data Visualization Studio (3.0 cr)
• GDES 5372 - Data Visualization for Interactive Platforms (3.0 cr)
• GDES 5383 - Digital Illustration and Animation (3.0 cr)
• GDES 5386 - Fundamentals of Game Design (3.0 cr)
• GDES 8192 - Readings in Graphic Design (1.0 - 3.0 cr)
• GDES 8193 - Directed Study (1.0 - 3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)
• GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

Plan B Master's Project
Students take a minimum of 3 credits in this category.
• GDES 8222 - Plan B Master's Project (3.0 cr)

Housing Studies
The housing studies track advances both theoretical and applied knowledge in the housing field. Through research experiences, students are prepared to assist people and communities in addressing housing-related issues. Courses emphasize human needs and behavior, analysis of designed environments, policy and community development, and housing of specific subpopulations such as the elderly or low-income families with children.

Theory and Philosophy: Required Course
HSG 8467 - Theoretical Perspectives in Housing Studies (3.0 cr)

**Evaluation and Analysis Coursework**
Students take a minimum of 6 credits in this category.
Take 6 or more credit(s) from the following:
- DES 8102 - Quantitative Research Methods (3.0 cr)
- DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)

**Concentration**

**Plan A Requirements**
8 credits are required, including at least two courses from the following: HSG 5463, HSG 5467, and HSG 8463.
Take 8 or more credit(s) from the following:
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- HSG 4461 - Housing Development and Management (4.0 cr)
- HSG 4465 - Housing in a Global Perspective (3.0 cr)
- HSG 5170 - Topics in Housing Studies (1.0 - 4.0 cr)
- HSG 5193 - Directed Study in Housing Studies (1.0 - 4.0 cr)
- HSG 5462 - Housing and Community Development (3.0 cr)
- HSG 5463 - Housing Policy (3.0 cr)
- HSG 5467 - Housing and the Social Environment (4.0 cr)
- HSG 5481 - Promoting Independence in Housing and Community (3.0 cr)
- HSG 8170 - Topics in Housing Studies (1.0 - 3.0 cr)
- HSG 8180 - Professional Seminar (1.0 - 2.0 cr)
- HSG 8192 - Readings in Housing Studies (1.0 - 3.0 cr)
- HSG 8193 - Directed Study (1.0 - 3.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)

**Thesis Credits**
Students take a minimum of 10 credits in this category.
DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

*OR*

**Plan B Requirements**
Students select at least two of the following courses: HSG 5463, HSG 5467, and HSG 8463.
Take 15 or more credit(s) from the following:
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- HSG 4461 - Housing Development and Management (4.0 cr)
- HSG 4465 - Housing in a Global Perspective (3.0 cr)
- HSG 5170 - Topics in Housing Studies (1.0 - 4.0 cr)
- HSG 5193 - Directed Study in Housing Studies (1.0 - 4.0 cr)
- HSG 5462 - Housing and Community Development (3.0 cr)
- HSG 5463 - Housing Policy (3.0 cr)
- HSG 5467 - Housing and the Social Environment (4.0 cr)
- HSG 5481 - Promoting Independence in Housing and Community (3.0 cr)
- HSG 8170 - Topics in Housing Studies (1.0 - 3.0 cr)
- HSG 8180 - Professional Seminar (1.0 - 2.0 cr)
- HSG 8192 - Readings in Housing Studies (1.0 - 3.0 cr)
- HSG 8193 - Directed Study (1.0 - 3.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)

**Plan B Master's Project**
HSG 8222 - Plan B Master's Project (3.0 cr)

**Interior Design**
Graduate study in the interior design track emphasizes the theory, research, and specialized practice components of design as applied to people's health, safety, and welfare in the interior environment, including design education, sustainability, social/cultural issues, aspects of professional practice, and facilities research (educational, office, criminal justice, and residential). Students are prepared for teaching and research positions as well as design specializations within the profession.

**Theory and Philosophy Coursework**
- DES 8112 - Design Theory (3.0 cr)
- DES 8164 - Innovation Theory and Analysis (3.0 cr)
- DES 8166 - Material Culture and Design (3.0 cr)

**Evaluation and Analysis Coursework**
Students should take a minimum of six credits. Statistics course is required and either DES 8102 or DES 8103.

Take 6 or more credit(s) from the following:
- **DES 8102** - Quantitative Research Methods (3.0 cr)
- **DES 8103** - Qualitative and Mixed Methods Research (3.0 cr)
- **EPSY 5261** - Introductory Statistical Methods (3.0 cr)
- **EPSY 5262** - Intermediate Statistical Methods (3.0 cr)
- **EPSY 8252** - Statistical Methods in Education II (3.0 cr)
- **EPSY 8266** - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- **EPSY 8267** - Applied Multivariate Analysis (3.0 cr)

**Concentration**

Take 8 or more credit(s) from the following:
- **DES 5165** - Design and Globalization (3.0 cr)
- **DES 5168** - Evidence-Based Design (3.0 cr)
- **DES 5185** - Human Factors in Design (3.0 cr)
- **DES 8113** - Teaching and Assessment (2.0 cr)
- **DES 8115** - Grant Writing (2.0 cr)
- **IDES 8192** - Readings in Interior Design (1.0 - 3.0 cr)
- **IDES 8193** - Directed Study (1.0 - 3.0 cr)
- **GDES 8361** - Color, Design, and Human Perception (3.0 cr)

**Thesis Credits**
Students take a minimum of 10 credits in this category.

- **DES 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)
Twin Cities Campus
Design M.F.A.
Design, Housing & Apparel
College of Design

Website: http://dha.design.umn.edu/programs/grad

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 60
• This program does not require summer semesters for timely completion.
• Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The design graduate program focuses on the study of relationships between humans and their designed environments. This focus is based on the assumption that design and analysis of environments contributes to the improvement of the human condition. The program addresses theory, research, and application, using a shared disciplinary base from the arts and social and behavioral sciences. The goal of the program is for students to analyze, evaluate, and integrate theoretical frameworks related to humans and their designed environments.

Applications submitted to the design graduate program specify the track and degree objective.

The MFA is available in the graphic design track only.

The track in graphic design focuses on design theory, process, and methods related to design practice and research. Potential areas of study include graphic design history, theory, and critical narrative; design creativity; color and design; user-centered design; design authorship; data visualization; and interactive design.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Eligibility requirements are located on the track pages of the design graduate program website: http://dha.design.umn.edu/programs/grad.

Special Application Requirements:
Application requirements: http://dha.design.umn.edu/programs/grad/admissions.html

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 52 major credits and 8 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: MFA coursework and research culminates in a creative thesis, which includes a paper and extensive creative project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students may be required to complete additional credits upon recommendation of their committee.

Design Program Core Requirement

DES 8181 - Research Ethics (1.0 cr)

Related Field

Students are required to take a minimum of 8 credits in a related field. Courses are selected with the approval of the advisor and committee.

Theory and Philosophy

Take 6 or more credit(s) from the following:
- DES 8112 - Design Theory (3.0 cr)
- DES 8164 - Innovation Theory and Analysis (3.0 cr)

Evaluation and Analysis

Take 6 or more credit(s) from the following:
- GDES 5388 - Graphic Design Research (3.0 cr)
- DES 8102 - Quantitative Research Methods (3.0 cr)
- DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)

Concentration

All students are required to take DES 8114, GDES 8361, and GDES 8362.

Take 27 or more credit(s) from the following:
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8114 - Design Studio (4.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- GDES 4131W - History of Graphic Design [WI] (4.0 cr)
- GDES 4330 - Surface Fabric Design Workshop (4.0 cr)
- GDES 4345 - Advanced Typography (4.0 cr)
- GDES 5193 - Directed Study in Graphic Design (1.0 - 4.0 cr)
- GDES 5311 - Illustration (3.0 cr)
- GDES 5341 - Interactive Design (3.0 cr)
- GDES 5342 - Advanced Web Design (3.0 cr)
- GDES 5371 - Data Visualization Studio (3.0 cr)
- GDES 5372 - Data Visualization for Interactive Platforms (3.0 cr)
- GDES 5383 - Digital Illustration and Animation (3.0 cr)
- GDES 5386 - Fundamentals of Game Design (3.0 cr)
- GDES 8192 - Readings in Graphic Design (1.0 - 3.0 cr)
- GDES 8193 - Directed Study (1.0 - 3.0 cr)
- GDES 8361 - Color, Design, and Human Perception (3.0 cr)
- GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

MFA Creative Thesis Credits
Take 12 credits or more of the following:
GDES 8990 - MFA Creative Thesis (6.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Graphic Design
All Design MMFA students must complete the graphic design track. See program requirements above.
Twin Cities Campus
Design M.S.
Design, Housing & Apparel

Program Requirements

**Plan A:** Plan A requires 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 28 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students may be required to complete additional credits upon recommendation of their committee.

**Design Program Core Requirement**

DES 8181 - Research Ethics (1.0 cr)

**Related Field Coursework**

Students are required to take a minimum of 6 credits in a related field. Courses are selected with the approval of the advisor and committee.

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Apparel Studies**

The apparel studies track advances both theoretical knowledge and applications for textile and apparel products and their relationship to human behavior using a design lens. Students may focus on product development; dress, history, and culture; or retail merchandising and consumer studies. Within each of these areas of emphasis within the track, the student completes related coursework as well as research or creative production that culminates in a thesis. The MS degree is focused in a scientific, social science or technical direction and is appropriate for the product development and the retail merchandising and consumer studies emphasis areas.

**Evaluation and Analysis Coursework**

Students are required to take a minimum of 6 credits in evaluation and analysis.

Students may take other courses with the approval of the advisor and committee.

Take 6 or more credit(s) from the following:

- DES 8102 - Quantitative Research Methods (3.0 cr)
- DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)

**Concentration**

**Dress, History, and Culture**

**Theory and Philosophy Coursework**

Students take a minimum of 3 credits in this category.

- DES 8164 - Innovation Theory and Analysis (3.0 cr)
- or DES 8112 - Design Theory (3.0 cr)

**Plan A Requirements**

Take 8 or more credit(s) from the following:

- APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
- APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)
• APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
• APST 8193 - Directed Study (1.0 - 3.0 cr)
• APST 8267 - Dress and Culture (3.0 cr)
• APST 8268 - Behavioral Aspects of Dress (3.0 cr)
• DES 5165 - Design and Globalization (3.0 cr)
• DES 8112 - Design Theory (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• DES 8164 - Innovation Theory and Analysis (3.0 cr)
• DES 8166 - Material Culture and Design (3.0 cr)
• DES 8167 - Aesthetics of Design (3.0 cr)

**Thesis credits**
Students take a minimum of 10 thesis credits.

• DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

or

**Plan B Requirements**
All Plan B Master's students are required to register for DES 8222 Plan B Master's Project the last semester of the program. Take 15 or more credit(s) from the following:

• APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)
• APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
• APST 8193 - Directed Study (1.0 - 3.0 cr)
• APST 8267 - Dress and Culture (3.0 cr)
• APST 8268 - Behavioral Aspects of Dress (3.0 cr)
• DES 5165 - Design and Globalization (3.0 cr)
• DES 8112 - Design Theory (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• DES 8164 - Innovation Theory and Analysis (3.0 cr)
• DES 8166 - Material Culture and Design (3.0 cr)
• DES 8167 - Aesthetics of Design (3.0 cr)

**Plan B Master's Project**
Students take a minimum of 3 credits in this category.

• APST 8222 - Plan B Master's Project (3.0 cr)

-OR-

**Product Development**
**Theory and Philosophy Coursework**
Students take a minimum of 3 credits in this category.

DES 8112 - Design Theory (3.0 cr)
or
DES 8164 - Innovation Theory and Analysis (3.0 cr)

**Plan A Requirements**
Take 8 or more credit(s) from the following:

• APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)
• APST 5224 - Functional Clothing Design (4.0 cr)
• APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
• APST 8193 - Directed Study (1.0 - 3.0 cr)
• DES 5185 - Human Factors in Design (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8114 - Design Studio (4.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• DES 8166 - Material Culture and Design (3.0 cr)
• DES 8167 - Aesthetics of Design (3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)

**Thesis Credits**
Students take a minimum of 10 thesis credits.

• DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

or

**Plan B Requirements**
Plan B Master's students are required to take DES 8222 Master's Plan B Project the final semester of the program. Take 15 or more credit(s) from the following:

• APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)
• APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)
• APST 5224 - Functional Clothing Design (4.0 cr)
• APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)
- **APST 8193** - Directed Study (1.0 - 3.0 cr)
- **DES 5185** - Human Factors in Design (3.0 cr)
- **DES 8113** - Teaching and Assessment (2.0 cr)
- **DES 8114** - Design Studio (4.0 cr)
- **DES 8115** - Grant Writing (2.0 cr)
- **DES 8151** - Product Development: Theory and Practice (3.0 cr)
- **DES 8166** - Material Culture and Design (3.0 cr)
- **DES 8167** - Aesthetics of Design (3.0 cr)
- **GDES 8361** - Color, Design, and Human Perception (3.0 cr)

**Plan B Master's Project**

Students take a minimum of 3 credits in this category.

- **APST 8222** - Plan B Master's Project (3.0 cr)

** Retail Merchandising and Consumer Studies**

**Theory and Philosophy Coursework**

- **APST 8272** - Digital Consumers: Theories in Retail and Consumer Studies (3.0 cr)

**Plan A Requirements**

Take 8 or more credit(s) from the following:

- **APST 5117** - Retail Environments and Human Behavior (3.0 cr)
- **APST 5123** - Living in a Consumer Society (3.0 cr)
- **APST 5193** - Directed Study in Apparel Studies (1.0 - 4.0 cr)
- **APST 8192** - Readings in Apparel Studies (1.0 - 3.0 cr)
- **APST 8193** - Directed Study (1.0 - 3.0 cr)
- **APST 8267** - Dress and Culture (3.0 cr)
- **APST 8268** - Behavioral Aspects of Dress (3.0 cr)
- **APST 8271** - Retailing: Strategic Perspectives (3.0 cr)
- **DES 8113** - Teaching and Assessment (2.0 cr)
- **DES 8115** - Grant Writing (2.0 cr)
- **DES 8151** - Product Development: Theory and Practice (3.0 cr)
- **DES 8166** - Material Culture and Design (3.0 cr)
- **DES 8167** - Aesthetics of Design (3.0 cr)

**Thesis Credits**

Students take a minimum of 10 thesis credits.

- **DES 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

**or Plan B Requirements**

Plan B Master's students are required to take ApSt 8222 Master's Plan B Project the final semester of the program.

Take 15 or more credit(s) from the following:

- **APST 5117** - Retail Environments and Human Behavior (3.0 cr)
- **APST 5123** - Living in a Consumer Society (3.0 cr)
- **APST 5193** - Directed Study in Apparel Studies (1.0 - 4.0 cr)
- **APST 8192** - Readings in Apparel Studies (1.0 - 3.0 cr)
- **APST 8193** - Directed Study (1.0 - 3.0 cr)
- **APST 8267** - Dress and Culture (3.0 cr)
- **APST 8268** - Behavioral Aspects of Dress (3.0 cr)
- **APST 8271** - Retailing: Strategic Perspectives (3.0 cr)
- **DES 8113** - Teaching and Assessment (2.0 cr)
- **DES 8115** - Grant Writing (2.0 cr)
- **DES 8151** - Product Development: Theory and Practice (3.0 cr)
- **DES 8166** - Material Culture and Design (3.0 cr)
- **DES 8167** - Aesthetics of Design (3.0 cr)

**Plan B Master's Project**

Students take a minimum of 3 credits in this category.

- **APST 8222** - Plan B Master's Project (3.0 cr)

**Graphic Design**

The track in graphic design focuses on design theory, process, and methods related to design practice and research. Potential areas of study include graphic design history, theory, and critical narrative; design creativity; color and design; design authorship; data visualization; and interactive design.

**Theory and Philosophy Coursework**

Students take a minimum of 3 credits in this category.

- **DES 8112** - Design Theory (3.0 cr)

**Evaluation and Analysis Coursework**

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Students take a minimum of 6 credits in this category.

DES 8102 - Quantitative Research Methods (3.0 cr)
or DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
or GDES 5388 - Graphic Design Research (3.0 cr)

Concentration

Plan A Requirements
Students are required to take DES 8114, and GDES 8361 or GDES 8362.
Take 8 or more credit(s) from the following:
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8114 - Design Studio (4.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- GDES 4131W - History of Graphic Design [WI] (4.0 cr)
- GDES 4330 - Surface Fabric Design Workshop (4.0 cr)
- GDES 4345 - Advanced Typography (4.0 cr)
- GDES 5193 - Directed Study in Graphic Design (1.0 - 4.0 cr)
- GDES 5311 - Illustration (3.0 cr)
- GDES 5341 - Interactive Design (3.0 cr)
- GDES 5342 - Advanced Web Design (3.0 cr)
- GDES 5371 - Data Visualization Studio (3.0 cr)
- GDES 5372 - Data Visualization for Interactive Platforms (3.0 cr)
- GDES 5383 - Digital Illustration and Animation (3.0 cr)
- GDES 5386 - Fundamentals of Game Design (3.0 cr)
- GDES 8192 - Readings in Graphic Design (1.0 - 3.0 cr)
- GDES 8193 - Directed Study (1.0 - 3.0 cr)
- GDES 8361 - Color, Design, and Human Perception (3.0 cr)
- GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

• Thesis Credits
Students take a minimum of 10 thesis credits.
- DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B Requirements
Students are required to take DES 8114 and GDES 8361 or GDES 8362.
Take 15 or more credit(s) from the following:
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8114 - Design Studio (4.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- GDES 4131W - History of Graphic Design [WI] (4.0 cr)
- GDES 4330 - Surface Fabric Design Workshop (4.0 cr)
- GDES 4345 - Advanced Typography (4.0 cr)
- GDES 5193 - Directed Study in Graphic Design (1.0 - 4.0 cr)
- GDES 5311 - Illustration (3.0 cr)
- GDES 5341 - Interactive Design (3.0 cr)
- GDES 5342 - Advanced Web Design (3.0 cr)
- GDES 5371 - Data Visualization Studio (3.0 cr)
- GDES 5372 - Data Visualization for Interactive Platforms (3.0 cr)
- GDES 5383 - Digital Illustration and Animation (3.0 cr)
- GDES 5386 - Fundamentals of Game Design (3.0 cr)
- GDES 8192 - Readings in Graphic Design (1.0 - 3.0 cr)
- GDES 8193 - Directed Study (1.0 - 3.0 cr)
- GDES 8361 - Color, Design, and Human Perception (3.0 cr)
- GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

• Plan B Master's Project
Students take a minimum of 3 credits in this category the last semester of the program.
- GDES 8222 - Plan B Master's Project (3.0 cr)

Housing Studies
The housing studies track advances both theoretical and applied knowledge in the housing field. Through research experiences, students are prepared to assist people and communities in addressing housing-related issues. Courses emphasize human needs and behavior, analysis of designed environments, policy and community development, and housing of specific subpopulations such as the elderly or low-income families with children.

Theory and Philosophy: Required Course
HSG 8467 - Theoretical Perspectives in Housing Studies (3.0 cr)

**Evaluation and Analysis Coursework**

Students take a minimum of 6 credits in this category.

Take 6 or more credit(s) from the following:

- DES 8102 - Quantitative Research Methods (3.0 cr)
- DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)

**Concentration**

**Plan A Requirements**

Students take a total of at least 8 credits from this list; at least two courses must be chosen from the following: HSG 5463, HSG 5467, and HSG 8463.

Take 8 or more credit(s) from the following:

- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- HSG 4461 - Housing Development and Management (4.0 cr)
- HSG 4465 - Housing in a Global Perspective (3.0 cr)
- HSG 5170 - Topics in Housing Studies (1.0 - 4.0 cr)
- HSG 5193 - Directed Study in Housing Studies (1.0 - 4.0 cr)
- HSG 5462 - Housing and Community Development (3.0 cr)
- HSG 5463 - Housing Policy (3.0 cr)
- HSG 5467 - Housing and the Social Environment (4.0 cr)
- HSG 5481 - Promoting Independence in Housing and Community (3.0 cr)
- HSG 8170 - Topics in Housing Studies (1.0 - 3.0 cr)
- HSG 8180 - Professional Seminar (1.0 - 2.0 cr)
- HSG 8192 - Readings in Housing Studies (1.0 - 3.0 cr)
- HSG 8193 - Directed Study (1.0 - 3.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)

**Thesis Credits**

Students take a minimum of 10 credits in this category.

DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

**Plan B Requirements**

Students take a total of at least 15 credits from this list; at least two courses must be chosen from the following: HSG 5463, HSG 5467, and HSG 8463.

Take 15 or more credit(s) from the following:

Take 15 or more credit(s) from the following:

- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- HSG 4461 - Housing Development and Management (4.0 cr)
- HSG 4465 - Housing in a Global Perspective (3.0 cr)
- HSG 5170 - Topics in Housing Studies (1.0 - 4.0 cr)
- HSG 5193 - Directed Study in Housing Studies (1.0 - 4.0 cr)
- HSG 5462 - Housing and Community Development (3.0 cr)
- HSG 5463 - Housing Policy (3.0 cr)
- HSG 5467 - Housing and the Social Environment (4.0 cr)
- HSG 5481 - Promoting Independence in Housing and Community (3.0 cr)
- HSG 8170 - Topics in Housing Studies (1.0 - 3.0 cr)
- HSG 8180 - Professional Seminar (1.0 - 2.0 cr)
- HSG 8192 - Readings in Housing Studies (1.0 - 3.0 cr)
- HSG 8193 - Directed Study (1.0 - 3.0 cr)
- HSG 8463 - Housing: Race and Class (3.0 cr)

**Plan B Master's Project**

Students take a minimum of 3 credits the final semester of the program.

- HSG 8222 - Plan B Master's Project (3.0 cr)

**Interior Design**

This sub-plan is limited to students completing the program under Plan A.

Graduate study in the interior design track emphasizes the theory, research, and specialized practice components of design as applied to people's health, safety, and welfare in the interior environment, including design education, sustainability, social/cultural issues, aspects of professional practice, and facilities research (educational, office, criminal justice, and residential). Students are prepared for
teaching and research positions as well as design specializations within the profession.

**Theory and Philosophy Coursework**
- DES 8112 - Design Theory (3.0 cr)
- or DES 8164 - Innovation Theory and Analysis (3.0 cr)
- or DES 8166 - Material Culture and Design (3.0 cr)

**Evaluation and Analysis Coursework**
Students should take a minimum of six credits. A statistics course is required and either DES 8102 or DES 8103.

Take 6 or more credit(s) from the following:
- DES 8102 - Quantitative Research Methods (3.0 cr)
- DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)

**Concentration**
Take 8 or more credit(s) from the following:
- DES 5165 - Design and Globalization (3.0 cr)
- DES 5168 - Evidence-Based Design (3.0 cr)
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
- IDES 8192 - Readings in Interior Design (1.0 - 3.0 cr)
- IDES 8193 - Directed Study (1.0 - 3.0 cr)
- GDES 8361 - Color, Design, and Human Perception (3.0 cr)

**Thesis Credits**
Students take a minimum of 10 credits in this category.
- DES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Twin Cities Campus

Design Minor
Design, Housing & Apparel
College of Design

Design Graduate Program, 240 McNeal Hall, 1985 Buford Avenue, St. Paul, MN 55108.
Email: dhagrad@umn.edu
Website: http://dha.design.umn.edu/programs/grad

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The design graduate program focuses on the study of relationships between humans and their designed environments. This focus is based on the assumption that design and analysis of environments contributes to the improvement of the human condition. The program addresses theory, research, and application, using a shared disciplinary base from the arts and social and behavioral sciences. The goal of the program is for students to analyze, evaluate, and integrate theoretical frameworks related to humans and their designed environments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Students select a minimum of 9 credits in consultation with their advisor and the director of graduate studies for the design graduate program.

Doctoral
Students select a minimum of 12 credits in consultation with their advisor and the director of graduate studies for the design graduate program.
Twin Cities Campus
Design Ph.D.
Design, Housing & Apparel
College of Design

Website: http://dha.design.umn.edu/programs/grad

• Program Type: Doctorate
• Requirements for this program are current for Fall 2018
• Length of program in credits: 64
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The design graduate program focuses on the study of relationships between humans and their designed environments. This focus is based on the assumption that design and analysis of environments contributes to the improvement of the human condition. The program addresses theory, research, and application, using a shared disciplinary base from the arts and social and behavioral sciences. The goal of the program is for students to analyze, evaluate, and integrate theoretical frameworks related to humans and their designed environments.

Applications submitted to the design graduate program specify a track and degree objective.

Formal tracks are:
Apparel studies (including dress, history, and culture; product development; and retail merchandising and consumer studies)
Graphic design
Housing studies
Interior design (including evidence-based design)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Eligibility requirements are located on the track pages of the design graduate program website: http://dha.design.umn.edu/programs/grad.

Special Application Requirements:
Application requirements: http://dha.design.umn.edu/programs/grad/admissions.html

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 144
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
28 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students may be required to complete additional credits upon recommendation of their committee.

Design Program Core Requirements
DES 8181 - Research Ethics (1.0 cr)

Related Field Coursework
Students are required to take a minimum of 12 credits in a related field. Courses are selected with the approval of the advisor and committee.

Doctoral Dissertation Credits
Students take a minimum of 24 credits of DES 8888. With the permission of the advisor, up to 10 credits may be taken prior to passing the preliminary oral examination.
DES 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Apparel Studies
The apparel studies track advances both theoretical knowledge and applications for apparel and worn products and their relationship to human behavior. Students may focus on product development; dress, history, and culture; or retail merchandising and consumer studies. Within each of these areas of emphasis within the track, the student completes related coursework as well as research or creative production that culminates in a thesis.

Evaluation and Analysis Coursework
Students are required to take a minimum of 9 credits in evaluation and analysis, including 3 credits in statistics.
DES 8102 - Quantitative Research Methods (3.0 cr)
DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
Statistics
Take 3 or more credit(s) from the following:
• EPSY 5261 - Introductory Statistical Methods (3.0 cr)
• EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)

Concentration
Dress, History, and Culture
Theory and Philosophy Coursework
Students take a minimum of 6 credits in this category.

**DES 8164 - Innovation Theory and Analysis (3.0 cr)**

**DES 8112 - Design Theory (3.0 cr)**

**Dress, History, and Culture Concentration Coursework**

Take 12 or more credit(s) from the following:

- **APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)**
- **APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)**
- **APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)**
- **APST 8193 - Directed Study (1.0 - 3.0 cr)**
- **APST 8267 - Dress and Culture (3.0 cr)**
- **APST 8268 - Behavioral Aspects of Dress (3.0 cr)**
- **DES 5165 - Design and Globalization (3.0 cr)**
- **DES 8112 - Design Theory (3.0 cr)**
- **DES 8113 - Teaching and Assessment (2.0 cr)**
- **DES 8115 - Grant Writing (2.0 cr)**
- **DES 8164 - Innovation Theory and Analysis (3.0 cr)**
- **DES 8166 - Material Culture and Design (3.0 cr)**
- **DES 8167 - Aesthetics of Design (3.0 cr)**

**OR**

**Product Development**

**Design Theory and Philosophy Coursework**

Students take a minimum of 6 credits in this category.

**DES 8112 - Design Theory (3.0 cr)**

**DES 8164 - Innovation Theory and Analysis (3.0 cr)**

**Product Development Concentration Coursework**

Take 12 or more credit(s) from the following:

- **APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)**
- **APST 5218 - Fashion, Design, and the Global Industry (3.0 cr)**
- **APST 5224 - Functional Clothing Design (4.0 cr)**
- **APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)**
- **APST 8193 - Directed Study (1.0 - 3.0 cr)**
- **DES 5185 - Human Factors in Design (3.0 cr)**
- **DES 8113 - Teaching and Assessment (2.0 cr)**
- **DES 8114 - Design Studio (4.0 cr)**
- **DES 8115 - Grant Writing (2.0 cr)**
- **DES 8151 - Product Development: Theory and Practice (3.0 cr)**
- **DES 8166 - Material Culture and Design (3.0 cr)**
- **DES 8167 - Aesthetics of Design (3.0 cr)**
- **GDES 8361 - Color, Design, and Human Perception (3.0 cr)**

**OR**

**Retail Merchandising and Consumer Studies**

**Design Theory and Philosophy Coursework**

Students take a minimum of 6 credits in this category.

**APST 8272 - Digital Consumers: Theories in Retail and Consumer Studies (3.0 cr)**

Take 3 or more credit(s) from the following:

- **APST 8268 - Behavioral Aspects of Dress (3.0 cr)**
- **DES 8112 - Design Theory (3.0 cr)**
- **DES 8164 - Innovation Theory and Analysis (3.0 cr)**

**Retail Merchandising and Consumer Studies Concentration Coursework**

Take 12 or more credit(s) from the following:

- **APST 5117 - Retail Environments and Human Behavior (3.0 cr)**
- **APST 5123 - Living in a Consumer Society (3.0 cr)**
- **APST 5193 - Directed Study in Apparel Studies (1.0 - 4.0 cr)**
- **APST 8192 - Readings in Apparel Studies (1.0 - 3.0 cr)**
- **APST 8193 - Directed Study (1.0 - 3.0 cr)**
- **APST 8267 - Dress and Culture (3.0 cr)**
- **APST 8268 - Behavioral Aspects of Dress (3.0 cr)**
- **APST 8271 - Retailing: Strategic Perspectives (3.0 cr)**
- **DES 8113 - Teaching and Assessment (2.0 cr)**
- **DES 8115 - Grant Writing (2.0 cr)**
- **DES 8151 - Product Development: Theory and Practice (3.0 cr)**
- **DES 8166 - Material Culture and Design (3.0 cr)**
- **DES 8167 - Aesthetics of Design (3.0 cr)**
Graphic Design
The track in graphic design focuses on design theory, process, and methods related to design practice and research. Potential areas of study include graphic design history, theory, and critical narrative; design creativity; color and design; user-centered design; design authorship; data visualization; and interactive design.

Theory and Philosophy Coursework
Students take a minimum of 6 credits in this category.
DES 8112 - Design Theory (3.0 cr)
or DES 8164 - Innovation Theory and Analysis (3.0 cr)

Evaluation and Analysis Coursework
Students take a minimum of 9 credits in this category, including 3 credits in statistics.
Take 6 or more credit(s) from the following:
• DES 8102 - Quantitative Research Methods (3.0 cr)
• DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
• GDES 5388 - Graphic Design Research (3.0 cr)

Statistics
Take 3 or more credit(s) from the following:
• EPSY 5261 - Introductory Statistical Methods (3.0 cr)
• EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)

Graphic Design Concentration Coursework
Students are required to take GDES 8361 and GDES 8362.
Take 12 or more credit(s) from the following:
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8114 - Design Studio (4.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• GDES 4131W - History of Graphic Design [WI] (4.0 cr)
• GDES 4330 - Surface Fabric Design Workshop (4.0 cr)
• GDES 4345 - Advanced Typography (4.0 cr)
• GDES 5193 - Directed Study in Graphic Design (1.0 - 4.0 cr)
• GDES 5311 - Illustration (3.0 cr)
• GDES 5341 - Interactive Design (3.0 cr)
• GDES 5342 - Advanced Web Design (3.0 cr)
• GDES 5371 - Data Visualization Studio (3.0 cr)
• GDES 5372 - Data Visualization for Interactive Platforms (3.0 cr)
• GDES 5383 - Digital Illustration and Animation (3.0 cr)
• GDES 5386 - Fundamentals of Game Design (3.0 cr)
• GDES 8192 - Readings in Graphic Design (1.0 - 3.0 cr)
• GDES 8193 - Directed Study (1.0 - 3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)
• GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

Housing Studies
Housing studies is a multidisciplinary track that draws from a variety of theoretical perspectives. Students are trained in a variety of research methodologies. Coursework and research experiences combine to further understanding of the innovative approaches to the development of housing and related programs. With expertise in housing studies and research methods, graduates build careers in higher education, state and federal agencies, nonprofit community organizations, and government.

Theory and Philosophy Coursework
Students are required to take a total of 6 credits in this category, including HSG 8467. Students select one additional course in theory and philosophy with the approval of the advisor and committee.
HSG 8467 - Theoretical Perspectives in Housing Studies (3.0 cr)

Evaluation and Analysis Coursework
Students take a minimum of 9 credits in this category, including a minimum of 3 credits in statistics.
DES 8102 - Quantitative Research Methods (3.0 cr)
DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)

Statistics
Take 3 or more credit(s) from the following:
• EPSY 5261 - Introductory Statistical Methods (3.0 cr)
• EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)

Housing Studies Concentration Coursework
HSG 5463, HSG 5467, and HSG 8463 are required.
Take 12 or more credit(s) from the following:
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• HSG 4461 - Housing Development and Management (4.0 cr)
• HSG 4465 - Housing in a Global Perspective (3.0 cr)
• HSG 5170 - Topics in Housing Studies (1.0 - 4.0 cr)
• HSG 5193 - Directed Study in Housing Studies (1.0 - 4.0 cr)
• HSG 5462 - Housing and Community Development (3.0 cr)
• HSG 5463 - Housing Policy (3.0 cr)
• HSG 5467 - Housing and the Social Environment (4.0 cr)
• HSG 5481 - Promoting Independence in Housing and Community (3.0 cr)
• HSG 8180 - Professional Seminar (1.0 - 2.0 cr)
• HSG 8192 - Readings in Housing Studies (1.0 - 3.0 cr)
• HSG 8193 - Directed Study (1.0 - 3.0 cr)
• HSG 8463 - Housing: Race and Class (3.0 cr)

Interior Design
Graduate study in the interior design track emphasizes the theory, research, and specialized practice components of design as applied to people's health, safety, and welfare in the interior environment, including design education, sustainability, social/cultural issues, aspects of professional practice, and facilities research (educational, office, criminal justice, and residential). Students are prepared for teaching and research positions as well as design specializations within the profession.

Theory and Philosophy Coursework
Students take DES 8112 and choose either DES 8164 or DES 8166 for a total of 6 credits in this category.
• DES 8112 - Design Theory (3.0 cr)
  Take 3 or more credit(s) from the following:
  • DES 8164 - Innovation Theory and Analysis (3.0 cr)
  • DES 8166 - Material Culture and Design (3.0 cr)

Evaluation and Analysis Coursework
Students take a minimum of 9 credits in this category, including a minimum of 3 credits in statistics.
• DES 8102 - Quantitative Research Methods (3.0 cr)
• DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
Statistics
• Take 3 or more credit(s) from the following:
  • EPSY 5261 - Introductory Statistical Methods (3.0 cr)
  • EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
  • EPSY 8252 - Statistical Methods in Education II (3.0 cr)
  • EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
  • EPSY 8267 - Applied Multivariate Analysis (3.0 cr)

Interior Design Concentration Coursework
Take 12 or more credit(s) from the following:
• DES 5165 - Design and Globalization (3.0 cr)
• DES 5166 - Evidence-Based Design (3.0 cr)
• DES 5185 - Human Factors in Design (3.0 cr)
• DES 8113 - Teaching and Assessment (2.0 cr)
• DES 8115 - Grant Writing (2.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)
• IDES 8192 - Readings in Interior Design (1.0 - 3.0 cr)
• IDES 8193 - Directed Study (1.0 - 3.0 cr)
Ecological Restoration in Landscape Architecture Minor

College of Design

Link to a list of faculty for this program.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 10
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Restoration, conservation, and ecological design projects have become an increasingly important component of the practice of landscape architecture and natural resource management. It is critical for students interested in the design and management of natural lands, water management landscapes, landscape reclamation, and other restoration project types to gain exposure to the issues associated with ecological restoration projects. This minor focuses on the applied practice of restoration with an emphasis on restoration management and design and the skills needed to lead successful projects.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Master's Minor Requirements
- ESPM 5071 - Ecological Restoration (4.0 cr)
- LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
- LA 5576 - Ecological Restoration Project Planning and Management (3.0 cr)
Heritage Studies and Public History M.H.S.P.H.

Contact Information:
School of Architecture
College of Design
Room 101 Rapson Hall
89 Church St SE
Minneapolis, MN 55455-0811

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 37
- This program does not require summer semesters for timely completion.
- Minnesota Historical Society History Center
- Degree: Master of Heritage Studies & Public History

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Heritage studies and public history (HSPH) are the publicly engaged and community-accountable practices of historical scholarship, whether it is based in archival research, archaeology, material culture studies, architecture, preservation, or landscape studies. Although such a commitment to public interpretation, education, and preservation is part of all these disciplines, it is of tremendous benefit to heritage professionals to understand the connections and common issues in all of these perspectives, because the heritage field is increasingly characterized by such interdisciplinary integration.

The goal of this graduate program is to provide heritage and public history professionals this broader view, increasing their resource base and network of expertise. The program takes advantage of the deep scholarly expertise in these fields at the University of Minnesota, as well as the Minnesota Historical Society's extensive resources and expertise, to offer unparalleled training in the theory and methods of heritage and public history studies at the graduate level. The program will combine rigorous scholarly training with hands-on professional development, preparing graduates for positions in major public history and heritage institutions in Minnesota and elsewhere. The program will also train future generations of scholars and practitioners in the field to develop new, innovative, and entrepreneurial forms of historical interpretation in service of the public good.

Students are expected to acquire both general and specialized sets of perspectives and skills. Some required courses are designed to instill breadth and cohort connections; others are designed to build expertise in specific arenas of the heritage field, represented by the program tracks. Students will engage in experiential learning through embedded (credited) internships, and the design and execution of a community-engaged project.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Prospective applicants are encouraged to consult the degree programs section of the School of Architecture website for additional information: http://arch.design.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the
Program Requirements

Plan B: Plan B requires 31 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B option is available only to students pursuing the archaeological heritage track. The Plan B project is identified and planned in consultation with the adviser and the Archaeology Department at the Minnesota Historical Society.

Plan C: Plan C requires 31 major credits and 6 credits outside the major. The final exam is no required. A capstone project is required.

Capstone Project: This course will operate as a workshop, drawing together a cohort of students, working individually or as part of a team, to craft independent heritage studies and public history research projects under the supervision of a faculty instructor. Projects may be based in archival research, public exhibitions, archaeology, material culture studies and preservation, architecture and preservation, or landscape studies. Consistent with the values of the program, projects shall have multidisciplinary perspectives, broadly consider aspects of diversity, and will be accountable to some stakeholder(s) identified by the students.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Core Coursework (13 credits)
All students must complete the following core courses. Take HSPH 8005 every fall and spring for 2 years for a total of 4 credits.

- HSPH 8001 - Who Owns the Past? Common Concerns and Big Questions in Heritage and Public History (3.0 cr)
- HSPH 8002 - Core Practices in Heritage Studies and Public History (3.0 cr)
- HSPH 8003 - Race and Indigeneity in Heritage Representation (3.0 cr)
- HSPH 8005 - Leadership and Future of Historical Organizations (1.0 cr)

Outside Coursework (6 credits)
All students must complete at least 6 credits outside the major, chosen in consultation with the adviser or director of graduate studies.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Archaeological Heritage
This sub-plan is limited to students completing the program under Plan B or Plan C.

Archaeological Heritage Track (18 credits)
The archaeological heritage track offers both the Plan B and Plan C options. Students are expected to identify their chosen option, in consultation with the adviser or director of graduate studies, by end of their second year in the program.

Required Archaeological Heritage Track Coursework (6 credits)
Take the following courses for a total of 6 credits:

- HSPH 8004 - Capstone in Heritage Studies and Public History (3.0 cr)
- ANTH 5448 - Applied Heritage Management (3.0 cr)

Electives (6 credits)
Students must complete at least 6 additional elective credits, selected in consultation with the advisor or director of graduate studies.

Plan Options

Plan B Requirements
Take 6 credits of HSPH 8101. At least 3 of the 6 credits must be applied to the Plan B project, with the remaining 3 assigned in consultation with the advisor or director of graduate studies.

HSPH 8101 - Internship (3.0 cr)

-OR-

Plan C Requirements
Take HSPH 8101 twice, to complete two separate internships, for a total of 6 credits.

HSPH 8101 - Internship (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Heritage Studies and Public History (HSPH) are the publicly engaged and community-accountable practices of historical scholarship, whether based in archival research, archaeology, material culture studies, architecture, preservation, or landscape studies. Although such a commitment to public interpretation, education, and preservation is part of all these disciplines, it is of tremendous benefit to heritage professionals to understand the connections and common issues in all of these perspectives, because the heritage field is increasingly characterized by such interdisciplinary integration. The masters level minor is intended for students who are in programs preparing them for work in the heritage field, such as anthropology, art history, architecture/historic preservation, urban and regional planning, history, American studies, and other allied fields. The doctoral minor is intended for students who plan to work in heritage/public history positions outside of academia, or to be academic scholars whose work includes community-engaged research. The HSPH program and grad minor take advantage of the deep scholarly expertise in these fields at the University of Minnesota, as well as the Minnesota Historical Societys extensive resources and expertise, to offer unparalleled training in the theory and methods of heritage and public history studies at the graduate level.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Core Coursework
All students pursuing the heritage studies and public history minor must complete the following core courses for a total of six credits.
HSPH 8001 - Who Owns the Past? Common Concerns and Big Questions in Heritage and Public History (3.0 cr)
HSPH 8003 - Race and Indigeneity in Heritage Representation (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.
Masters
Take additional HSPH-affiliated coursework, in consultation with the HSPH director of graduate studies, to complete the 9-credit minimum for the master's-level minor. Coursework must be from a discipline other than the major field.

Doctoral
Take additional HSPH-affiliated coursework, in consultation with the HSPH director of graduate studies, to complete the 12-credit minimum for the doctoral-level minor. Coursework must be from a discipline other than the major field.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Housing Studies PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The housing studies certificate is designed for individuals interested, or currently working, in housing related professions to expand their knowledge in areas including housing and community development, housing policy, and the residential environments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Some elective courses require prerequisites that may be waived with instructor permission according to University policy.

Required Course
- HSG 5471 - Housing Studies Certificate Seminar (2.0 cr)

Elective Courses
Take 13 or more credit(s) from the following:
- DES 8113 - Teaching and Assessment (2.0 cr)
- DES 8115 - Grant Writing (2.0 cr)
• HSG 4461 - Housing Development and Management (4.0 cr)
• HSG 4465 - Housing in a Global Perspective (3.0 cr)
• HSG 5170 - Topics in Housing Studies (1.0 - 4.0 cr)
• HSG 5193 - Directed Study in Housing Studies (1.0 - 4.0 cr)
• HSG 5462 - Housing and Community Development (3.0 cr)
• HSG 5463 - Housing Policy (3.0 cr)
• HSG 5467 - Housing and the Social Environment (4.0 cr)
• HSG 5481 - Promoting Independence in Housing and Community (3.0 cr)
• HSG 8170 - Topics in Housing Studies (1.0 - 3.0 cr)
• HSG 8180 - Professional Seminar (1.0 - 2.0 cr)
• HSG 8192 - Readings in Housing Studies (1.0 - 3.0 cr)
• HSG 8193 - Directed Study (1.0 - 3.0 cr)
• HSG 8463 - Housing: Race and Class (3.0 cr)
• HSG 8467 - Theoretical Perspectives in Housing Studies (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Human factors and ergonomics (HFE) is the study of how to make technological systems safe, effective, and easy and enjoyable to use. The graduate program offers interdisciplinary coursework that addresses human performance and how it can be enhanced through design of tools, systems, working environments, processes, and organizations. HFE has applications ranging from clothing and living spaces to business processes, the design of health care processes and technology, computer interfaces, and aircraft cockpits.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 96
  - Internet Based - Listening Score: 24
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 24
  - Internet Based - Speaking Score: 24

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan C: Plan C requires 30 major credits and 0 credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.
A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

**Required Courses (8 credits)**

All students are required to complete the following:

**Research Methods Core (8 credits)**
- PSY 8814 - Analysis of Psychological Data (4.0 cr)
- PSY 8815 - Analysis of Psychological Data (4.0 cr)

**Research Ethics**

In addition to the following course, students have online options to complete the research ethics requirement. See program Research Ethics page for more information: [http://humanfactors.design.umn.edu/research_ethics.html](http://humanfactors.design.umn.edu/research_ethics.html)

Take 0 or more credit(s) from the following:
- DES 8181 - Research Ethics (1.0 cr)

**Plans**

**Plan A**

**Plan A Coursework**

Take courses from each component as follows: Human Factors Fundamentals (3 credits), Cognitive Human Factors (3 credits), and Physical Human Factors (3 credits). To complete the 20-credit minimum, select coursework from approved electives.

**Human Factors Fundamentals (3 credits)**

Take 3 or more credit(s) from the following:
- DES 5185 - Human Factors in Design (3.0 cr)
- HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
- HUMF 5211 - Human Factors and Work Analysis (4.0 cr)
- HUMF 5874 - Service Design: Designing complex systems to improve service delivery (4.0 cr)

**Cognitive Human Factors (3 credits)**

Take 3 or more credit(s) from the following:
- CGSC 8000 - Seminar: Philosophy of the Cognitive Sciences (3.0 cr)
- EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
- IDSC 8721 - Behavioral Decision Theory (3.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- PSY 5031W - Perception [WI] (3.0 cr)
- PSY 5037 - Psychology of Hearing (3.0 cr)
- PSY 5062 - Cognitive Neuropsychology (3.0 cr)
- PSY 5064 - Brain and Emotion (3.0 cr)
- PSY 8041 - Proseminar in Perception (3.0 cr)
- PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)
- PSY 8201 - Social Cognition (3.0 cr)

**Physical Human Factors (3 credits)**

Take 3 or more credit(s) from the following:
- KIN 4133 - Perceptual-Motor Control and Learning (3.0 cr)
- KIN 4136 - Embodied Cognition (3.0 cr)
- KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- KIN 5505 - Human-Centered Design - Principles and Applications (3.0 cr)
- KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
- KIN 8211 - Seminar: Perception and Action (3.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 8135 - Human Kinematics (3.0 cr)

**Approved Electives**

Select courses from the following approved electives to complete the 20-credit minimum:

Take 0 or more credit(s) from the following:

**User Interface Design**

Take 0 or more credit(s) from the following:
- CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
- CSCI 8115 - Human-Computer Interaction and User Interface Technology (3.0 cr)
- NURS 7118 - Human Factors and Human-Computer Interaction in Health Informatics (3.0 cr)
- WRIT 4501 - Usability and Human Factors in Technical Communication (3.0 cr)
- WRIT 8520 - Seminar in Scientific and Technical Communication (3.0 cr)

**Statistics**

Psy 8960: Select Multivariate Statistics for Social Scientists section only.

Take 0 or more credit(s) from the following:
• PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
• PUBH 7406 - Advanced Regression and Design (4.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)

Designing Experiments
Take 0 or more credit(s) from the following:
• STAT 5303 - Designing Experiments (4.0 cr)

Research Methods
Take 0 or more credit(s) from the following:
• ANTH 4035 - Ethnographic Research Methods (3.0 cr)
• KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
• PUBH 6341 - Epidemiologic Methods I (3.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6343 - Epidemiologic Methods III (4.0 cr)

Human Factors
Take 0 or more credit(s) from the following:
• CSCI 5125 - Collaborative and Social Computing (3.0 cr)
• CSCI 5609 - Visualization (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• CSCI 8117 - Understanding the Social Web (3.0 cr)
• DES 5165 - Design and Globalization (3.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)
• HUMF 8001 - Special Topics: Human Factors/Ergonomics (2.0 - 3.0 cr)
• HUMF 8002 - Proseminar in Human Factors/Ergonomics (1.0 cr)
• PSY 5501 - Vocational and Occupational Health Psychology (3.0 cr)
• PSY 5708 - Organizational Psychology (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
• PUBH 6470 - SAS Procedures and Data Analysis (3.0 cr)
• SOC 8412 - Social Network Analysis: Theory and Methods (3.0 cr)
• CGSC 8410 - Perspectives in Learning, Perception, and Cognition (2.0 cr)
• IDSC 8722 - Heuristic Decision Making (2.0 cr)
• MKTG 8813 - Consumer Judgment and Decision Making I (2.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)

Thesis Credits
Take at least 10 master's thesis credits.
HUMF 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan C

Plan C Coursework
Take courses from each component as follows: Human Factors Fundamentals (3 credits), Cognitive Human Factors (3 credits), Physical Human Factors (3 credits), and 50% Project-based (2 3-credit courses for 6 credits). To complete the 30-credit minimum, select coursework from approved electives.

Human Factors Fundamentals (3 credits)
Take 3 or more credit(s) from the following:
• DES 5185 - Human Factors in Design (3.0 cr)
• HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
• HUMF 5211 - Human Factors and Work Analysis (4.0 cr)
• HUMF 5874 - Service Design: Designing complex systems to improve service delivery (4.0 cr)

Cognitive Human Factors (3 credits)
Take 3 or more credit(s) from the following:
• CGSC 8000 - Seminar: Philosophy of the Cognitive Sciences (3.0 cr)
• EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
• IDSC 8721 - Behavioral Decision Theory (3.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5031W - Perception [WI] (3.0 cr)
• PSY 5037 - Psychology of Hearing (3.0 cr)
• PSY 5062 - Cognitive Neuropsychology (3.0 cr)
• PSY 5064 - Brain and Emotion (3.0 cr)
• PSY 8041 - Proseminar in Perception (3.0 cr)
• PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
Physical Human Factors (3 credits)
Take 3 or more credit(s) from the following:
• KIN 4133 - Perceptual-Motor Control and Learning (3.0 cr)
• KIN 4136 - Embodied Cognition (3.0 cr)
• KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
• KIN 5505 - Human-Centered Design - Principles and Applications (3.0 cr)
• KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
• KIN 8211 - Seminar: Perception and Action (3.0 cr)
• RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
• RSC 8135 - Human Kinematics (3.0 cr)

50% Project-Based Coursework (6 credits)
Take 2 courses for at least 6 credits:
Take 6 or more credit(s) from the following:
• CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
• CSCI 5609 - Visualization (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• DES 5185 - Human Factors in Design (3.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• HUMF 5874 - Service Design: Designing complex systems to improve service delivery (4.0 cr)
• WRIT 4501 - Usability and Human Factors in Technical Communication (3.0 cr)

Approved Electives
Select courses from the following approved electives to complete the 30-credit minimum:
Take 0 or more credit(s) from the following:
User Interface Design
• CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
• CSCI 8115 - Human-Computer Interaction and User Interface Technology (3.0 cr)
• NURS 7118 - Human Factors and Human-Computer Interaction in Health Informatics (3.0 cr)
• WRIT 4501 - Usability and Human Factors in Technical Communication (3.0 cr)
• WRIT 8520 - Seminar in Scientific and Technical Communication (3.0 cr)

Statistics
• PSY 8960: Select Multivariate Statistics for Social Scientists section only.
Take 0 or more credit(s) from the following:
• PUBH 7406 - Advanced Regression and Design (4.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)

Designing Experiments
• STAT 5303 - Designing Experiments (4.0 cr)

Research Methods
• ANTH 4035 - Ethnographic Research Methods (3.0 cr)
• KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
• PUBH 6341 - Epidemiologic Methods I (3.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6343 - Epidemiologic Methods III (4.0 cr)

Human Factors
• CSCI 5125 - Collaborative and Social Computing (3.0 cr)
• CSCI 5609 - Visualization (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• CSCI 8117 - Understanding the Social Web (3.0 cr)
• DES 5165 - Design and Globalization (3.0 cr)
• DES 8151 - Product Development: Theory and Practice (3.0 cr)
• GDES 8361 - Color, Design, and Human Perception (3.0 cr)
• HUMF 8001 - Special Topics: Human Factors/Ergonomics (2.0 - 3.0 cr)
• HUMF 8002 - Proseminar in Human Factors/Ergonomics (1.0 cr)
• PSY 5501 - Vocational and Occupational Health Psychology (3.0 cr)
• PSY 5708 - Organizational Psychology (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
• PUBH 6470 - SAS Procedures and Data Analysis (3.0 cr)
• SOC 8412 - Social Network Analysis: Theory and Methods (3.0 cr)
• CGSC 8410 - Perspectives in Learning, Perception, and Cognition (2.0 cr)
• IDSC 8722 - Heuristic Decision Making (2.0 cr)
• MKTG 8813 - Consumer Judgment and Decision Making I (2.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)

Human Factors and Ergonomics Minor
DHA Human Factors and Ergonomics
College of Design

Link to a list of faculty for this program.

Contact Information:
Human Factors and Ergonomics Graduate Program, c/o DHA, 240 McNeal Hall, 1985 Buford Avenue, St. Paul, MN 55108.
Email: HFEgrad@umn.edu
Website: http://humanfactors.design.umn.edu/

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Human factors and ergonomics (HFE) is the study of how to make technological systems safe, effective, and easy and enjoyable to use. The graduate program offers interdisciplinary coursework that addresses human performance and how it can be enhanced through design of tools, systems, working environments, processes, and organizations. HFE has applications ranging from clothing and living spaces to business processes, the design of health care processes and technology, computer interfaces, and aircraft cockpits. The minor is available to master’s and doctoral students.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Any University of Minnesota graduate student in good standing is eligible to apply. Students discuss appropriate coursework with their advisers and the Director of Graduate Studies for Human Factors and Ergonomics. A GPA of 3.0 is required for good standing in the minor.

Master’s students are required to take 9 credits to fulfill the minor.
Doctoral students are required to take 12 credits to fulfill the minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Students select a minimum of 9 credits in consultation with their advisor and the director of graduate studies for the human factors and ergonomics graduate program.
Doctoral
Students select a minimum of 12 credits in consultation with their advisor and the director of graduate studies for the human factors and ergonomics graduate program.

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 96
  - Internet Based - Listening Score: 24
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 24
  - Internet Based - Speaking Score: 24

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
42 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.
A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

**Program Requirements**

**Research Methods Core (8 credits)**
Take the following courses for a total of 8 credits:
- PSY 8814 - Analysis of Psychological Data (4.0 cr)
- PSY 8815 - Analysis of Psychological Data (4.0 cr)

**Research Ethics (0-1 credits)**
In addition to course listed below, online options are available to complete the research ethics requirement. See program Research Ethics page for more information: [http://humanfactors.design.umn.edu/research_ethics.html](http://humanfactors.design.umn.edu/research_ethics.html)
Take 0 or more credit(s) from the following:
- DES 8181 - Research Ethics (1.0 cr)

**Additional Research Methods Course (3-4 credits)**
Take one additional course in research methods from the following:

**Statistics**
Take 0 or more credit(s) from the following:
- PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)

**or Designing Experiments**
Take 0 or more credit(s) from the following:
- STAT 5303 - Designing Experiments (4.0 cr)

**or Research Methods**
Take 0 or more credit(s) from the following:
- ANTH 4035 - Ethnographic Research Methods (3.0 cr)
- KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6343 - Epidemiologic Methods III (4.0 cr)

**Component Courses (9 Credits)**
Take at least one 3-credit course from each of the following components for a total of 9 credits.

**Human Factors Fundamentals**
Take at least 3 credits from the following:
- DES 5185 - Human Factors in Design (3.0 cr)
- HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
- HUMF 5211 - Human Factors and Work Analysis (4.0 cr)
- HUMF 5874 - Service Design: Designing complex systems to improve service delivery (4.0 cr)

**Cognitive Human Factors**
Take at least 3 credits from the following:
- CGSC 8000 - Seminar: Philosophy of the Cognitive Sciences (3.0 cr)
- EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
- IDS 8721 - Behavioral Decision Theory (3.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- PSY 5031W - Perception [WI] (3.0 cr)
- PSY 5037 - Psychology of Hearing (3.0 cr)
- PSY 5062 - Cognitive Neuropsychology (3.0 cr)
- PSY 5064 - Brain and Emotion (3.0 cr)
- PSY 8041 - Proseminar in Perception (3.0 cr)
- PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)
- PSY 8201 - Social Cognition (3.0 cr)

**Physical Human Factors**
Take at least 3 credits from the following:
- KIN 4133 - Perceptual-Motor Control and Learning (3.0 cr)
- KIN 4136 - Embodied Cognition (3.0 cr)
- KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- KIN 5505 - Human-Centered Design - Principles and Applications (3.0 cr)
- KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
- KIN 8211 - Seminar: Perception and Action (3.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 8135 - Human Kinematics (3.0 cr)

**Electives**
Take remaining credits from the following, in consultation with the advisor, to complete the 42 course credits required.

**User Interface Design**
- CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
- CSCI 8115 - Human-Computer Interaction and User Interface Technology (3.0 cr)
- NURS 7118 - Human Factors and Human-Computer Interaction in Health Informatics (3.0 cr)
- WRIT 4501 - Usability and Human Factors in Technical Communication (3.0 cr)
- WRIT 8520 - Seminar in Scientific and Technical Communication (3.0 cr)

**Human Factors**
- CSCI 5125 - Collaborative and Social Computing (3.0 cr)
- CSCI 5609 - Visualization (3.0 cr)
- CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
- CSCI 8117 - Understanding the Social Web (3.0 cr)
- DES 5165 - Design and Globalization (3.0 cr)
- DES 8151 - Product Development: Theory and Practice (3.0 cr)
- GDES 8361 - Color, Design, and Human Perception (3.0 cr)
- HUMF 8001 - Special Topics: Human Factors/Ergonomics (2.0 - 3.0 cr)
- HUMF 8002 - Proseminar in Human Factors/Ergonomics (1.0 cr)
- MKTG 8813 - Consumer Judgment and Decision Making I (2.0 cr)
- PSY 5501 - Vocational and Occupational Health Psychology (3.0 cr)
- PSY 5708 - Organizational Psychology (3.0 cr)
- PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
- PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6470 - SAS Procedures and Data Analysis (3.0 cr)
- SCC 8412 - Social Network Analysis: Theory and Methods (3.0 cr)
- CGSC 8410 - Perspectives in Learning, Perception, and Cognition (2.0 cr)
- IDSC 8722 - Heuristic Decision Making (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)

**Thesis Credits**
Take at least 24 doctoral thesis credits.

- HUMF 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Landscape Architecture M.L.A.
Landscape Architecture
College of Design

Link to a list of faculty for this program.

Contact Information:
Department of Landscape Architecture, 144 Rapson Hall, 89 Church Street SE, Minneapolis, MN 55455 (612-625-6860)
Email: ladesk@umn.edu
Website: http://landarch.design.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 58 to 89
- This program does not require summer semesters for timely completion.
- Degree: Master of Landscape Architecture

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of landscape architecture (MLA) is a first-professional degree required for students who wish to become licensed professional landscape architects. The program is accredited by the national Landscape Architecture Accreditation Board (LAAB). The curriculum introduces students to the practice and discipline of landscape architecture, providing them with the artistic, technical, cognitive, and communication skills, in addition to the scientific and aesthetic knowledge, necessary to practice in the profession and in related environmental fields. Students are encouraged to select from electives offered to develop a special focus or to explore more areas in depth.

The MLA program (MLA I) is a three-year, 89-credit degree. Coursework exposes students to the broad field of landscape architecture as both a discipline and a profession. Classes are collaborative in nature and challenge students to delve into landscape issues that cut across multiple systems and scales. Because the core of the curriculum is six design studios, organized in a sequential framework, a commitment to three successive years in the program is essential.

Applicants with accredited professional baccalaureate degrees in landscape architecture or architecture may be considered for the advanced-standing MLA degree (MLA II). The MLA II requires at least 58 credits of design studio, research methods, and elective courses.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
MLA program applicants must have completed a baccalaureate degree.

Special Application Requirements:
Students are admitted for fall semester only. MLA program applicants must apply by January 15, for entry the following fall, to receive first consideration for admission, fellowships, and assistantships. In addition to the University's admission requirements, applicants must submit an electronic portfolio in 8.5 x 11 PDF format. GRE scores are not required; however, they can be helpful to applicants seeking national fellowships such as the Fulbright Scholarship. Please refer to the MLA website for detailed information regarding department specific application requirements and procedures, including a downloadable checklist, at http://landarch.design.umn.edu/prog/index.html.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 86
- IELTS
  - Total Score: 6.5
- MELAB
Program Requirements

Plan C: Plan C requires 52 to 83 major credits and 6 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: See department for more details.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Core Coursework
All MLA students must take the following courses for a total of 36 credits:
LA 5131 - Geospatial Data Analysis and Design (3.0 cr)
LA 5202 - Landscape Analysis Workshop (1.0 cr)
LA 8201 - Designing Landscapes for Dwelling and Settlement (6.0 cr)
LA 8773 - Landscape Infrastructure and Systems III (3.0 cr)
LA 8206 - Making Urban Landscape Space (6.0 cr)
LA 8301 - Landscape Infrastructure and Systems IV (3.0 cr)
LA 8302 - Professional Practice (3.0 cr)
LA 8554 - Project Programming (2.0 cr)
LA 8774 - Landscape Infrastructure and Systems V (3.0 cr)
LA 8775 - Landscape Infrastructure and Systems VI (3.0 cr)
LA 8555 - Advanced Landscape Planning and Design (6.0 cr)

Outside Coursework
All MLA students must take at least 6 credits outside landscape architecture, in consultation with their advisor.

MLA I and MLA II Program Options

MLA I Requirements
Additional Course Requirements
MLA I students must take the following courses for 32 credits:
LA 5201 - Making Landscape Spaces and Types (6.0 cr)
LA 5376 - Representation I (4.0 cr)
LA 5413 - Introduction to Landscape Architectural History (3.0 cr)
LA 5771 - Landscape Infrastructure and Systems I (3.0 cr)
LA 5203 - Ecological Dimensions of Space Making (6.0 cr)
LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
LA 5377 - Representation II (4.0 cr)
LA 5772 - Landscape Infrastructure Systems II (3.0 cr)
MLA I students may participate in the Cities on the Water study abroad option, with the approval of their advisor and the director of graduate studies. Students choosing the study abroad option take 8 credits of LA 8207, 3 credits of LA 5405, and 4 additional credits in consultation with their advisor for a total of 15 credits. Students who do not choose the study abroad option take LA 8205 for 6 credits plus 9 credits of electives for a total of 15 credits.
LA 8207 - Cities on Water International Workshop (6.0 cr)
LA 5405 - Interdisciplinary Studies in Landscape Architecture (1.0 - 6.0 cr)

OR
LA 8205 - Urban Form Options: Landscape Architecture Studio (6.0 cr)

Landscape Architecture Electives
MLA I students not choosing to study abroad take at least 9 elective credits. Credits are selected in consultation with the advisor.
LA 5xxx
LA 8xxx

-OR-

MLA II Requirements
MLA II students may participate in the Cities on the Water study abroad option, with the approval of their advisor and the director of graduate studies. Students choosing the study abroad option take 8 credits of LA 8207, 3 credits of LA 5405, and 4 additional credits in consultation with their advisor for a total of 15 credits; those not choosing to study abroad take 6 credits of LA 8205, 4 credits of LA 5377 and 6 credits of electives for a total of 16 credits.
LA 8207 - Cities on Water International Workshop (6.0 cr)
LA 5405 - Interdisciplinary Studies in Landscape Architecture (1.0 - 6.0 cr)
Or LA 8205 - Urban Form Options: Landscape Architecture Studio (6.0 cr)
LA 5377 - Representation II (4.0 cr)

**Landscape Architecture Electives**
MLA II students not choosing to study abroad take at least 6 elective credits. Credits are selected in consultation with the advisor.
LA 5xxx
LA 8xxx

**Joint- or Dual-degree Coursework:** MLA/MS-Architecture
Student may take a total of 24 credits in common among the academic programs.
Twin Cities Campus
Landscape Architecture M.S.

Contact Information:

Website: http://landarch.design.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MS is for students with a clear focus in research related to landscape architecture. MS students build expertise related to the practice of landscape architecture as they learn how to conduct research. Students specialize within areas of faculty expertise, which may include art and landscape architecture, landscape ecology, landscape architectural history and theory, park and recreation design, rural and suburban landscape planning, transportation, planning of world heritage sites, and urban design.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.8
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 6 major credits, 14 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.
Coursework Requirements

Landscape Architecture Electives
Take 6 or more credit(s) from the following:
• LA 5xxx
• LA 8xxx

Interest Area Electives
Choose elective credits, in consultation with the advisor, from coursework outside landscape architecture.
Take 6 or more credit(s) from the following:
• xxxx 5xxx
• xxxx 6xxx
• xxxx 7xxx
• xxxx 8xxx

Remaining Electives
Choose remaining credits in consultation with the advisor.
Take 8 or more credit(s) from the following:
• xxxx 5xxx
• xxxx 6xxx
• xxxx 7xxx
• xxxx 8xxx

Thesis credits
Take 10 master's thesis credits.
LA 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Twin Cities Campus

- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in landscape architecture develop professional design skills through courses that address the increasingly complex relationships between art, ecology, and community that influence and inform design on the land. Courses emphasize three principal areas of study: 1) landscape architecture as a means to add to the aesthetic richness of our culture and environment--helping us to better understand ourselves and our place in the world; 2) integration of biological, geophysical, and ecological processes into lasting, meaningful, and systemically rigorous landscape architecture that sustains and protects the health of people and the ecosystems on which they depend; and 3) design for urban and suburban places and people, with emphasis on gaining knowledge and experience through direct engagement with clients and the public in order to address the problems and opportunities of the metropolitan core of cities.

Program Delivery
This program is available:
  • via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Minor requirements are determined in consultation with the Landscape Architecture director of graduate studies.

Required Course
Take the following required course for 3 credits:
LA 5413 - Introduction to Landscape Architectural History (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Electives
Take at least 6 credits from the following:
LA 5003 - Climate Change Adaptation (3.0 cr)
LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
LA 5514 - Making the Mississippi (3.0 cr)
LA 5755 - Infrastructure, Natural Systems and the Space of Inhabited Landscapes (3.0 cr)
LA 5771 - Landscape Infrastructure and Systems I (3.0 cr)
LA 8301 - Landscape Architecture: Research Issues and Methods (3.0 cr)

Doctoral

Electives

Take at least 9 credits from the following:

Website: http://www.designcenter.umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 21
- This program does not require summer semesters for timely completion.
- Degree: Metropolitan Design PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The metropolitan design certificate at the College of Design prepares students with the essential knowledge and understanding of the city within the complexities of the 21st-century metropolis. As suburban development is losing some of its past seductions, traditional cities are being transformed to accommodate the return to city living, an American counter-trend that requires the integrative approach of many fields of knowledge.

The certificate is open to graduate students in the College of Design and graduate students from other colleges with related urban planning programs are welcome to apply. The certificate is a two-semester, 21-credit course sequence within existing master's degrees at the College of Design. It is strongly recommended that the required urban design courses should be taken in sequence.

Interested students should enroll during the second semester (spring) of graduate studies. It is recommended that students make a decision to enroll in the certificate early so that the completion of courses can be made within the time required for completion of the professional degree.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
An application is required including a 2-page statement of interest in the program, university transcripts, and a portfolio of design work (no more 10 pages). Other students not from the College of Design should submit comparable graphic examples and two written papers.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Coursework

Required Courses
ARCH 5711 - Theory and Principles of Urban Design (3.0 cr)
ARCH 5721 - Case Studies in Urban Design (3.0 cr)
ARCH 8255 - Graduate Architectural Design V (6.0 cr)

Electives
Take 9 or more credit(s) from the following:
• ARCH 5361 - 3-D Computer Architectural Modeling and Design (3.0 cr)
• ARCH 5441 - Minnesota: Architecture and Landscapes (3.0 cr)
• ARCH 5671 - Historic Preservation (3.0 cr)
• ARCH 5731 - Territorial City (3.0 cr)
• ARCH 8561 - Sustainable Design Theory and Practice (3.0 cr)
• HSG 5463 - Housing Policy (3.0 cr)
• HSG 5467 - Housing and the Social Environment (4.0 cr)
• HSG 8463 - Housing: Race and Class (3.0 cr)
• LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
• LA 5405 - Interdisciplinary Studies in Landscape Architecture (1.0 - 6.0 cr)
• PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
• PA 5211 - Land Use Planning (3.0 cr)
• PA 5212 - Managing Urban Growth and Change (3.0 cr)
• PA 5231 - Transit Planning and Management (3.0 cr)
• PA 5261 - Housing Policy (3.0 cr)
• PA 5501 - Theories and Policies of Development (3.0 cr)
• PA 5511 - Community Economic Development (3.0 cr)
• PA 5721 - Energy Systems and Policy (3.0 cr)
• PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• PA 5723 - Water Policy (3.0 cr)
• PA 5802 - Global Economic Policy (3.0 cr)
• PA 8202 - Networks and Places: Transportation, Land Use, and Design (4.0 cr)
• PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The museum studies minor offers a structured graduate curriculum for master’s and doctoral students interested in museums. It provides students from a variety of disciplines with an introduction to the issues involved in museum practices (e.g., educational, curatorial, administrative, and conservation). The curriculum includes seminars and internships.

**Program Delivery**

This program is available:
* via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

**Special Application Requirements:**
As a minor-only program, all graduate students who have already been accepted into a University of Minnesota Graduate program are eligible for acceptance into the program.

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

**Core Course Requirements**

All students pursuing the museum studies minor must take the following core coursework, including 1 internship credit (MST 5020). Internships must be approved by the museum studies director of graduate studies.

- **MST 5011** - Museum History and Philosophy (3.0 cr)
- **MST 5012** - Museum Practices (3.0 cr)
- **MST 5020** - Internship (1.0 - 6.0 cr)

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

- **Master’s**
  Complete the 7-credit core curriculum described above.

**Doctoral**

**Doctoral Electives**
In addition to the core curriculum, take at least 5 credits from the following courses:

**Communication**
Take 0 or more credit(s) from the following:
* JOUR 5251 - Strategic Communication Theory (3.0 cr)

**Leadership**
Take 0 or more credit(s) from the following:
* ACL 5221 - Creative Entrepreneurship and Resource Development (3.0 cr)
* OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
* OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)
* PA 5101 - Management and Governance of Nonprofit Organizations (3.0 cr)
* PA 5104 - Strategic Human Resource Management (3.0 cr)
* PA 5123 - Philanthropy in America: History, Practice, and Trends (3.0 cr)
* PA 5253 - Designing Planning and Participation Processes (3.0 cr)
* PA 5251 - Strategic Planning and Management (3.0 cr)

**Education**
Take 0 or more credit(s) from the following:
* PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)

**Evaluation**
Take 0 or more credit(s) from the following:
* OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
* PA 5311 - Program Evaluation (3.0 cr)

**Exhibition Design**
Take 0 or more credit(s) from the following:
* DES 5185 - Human Factors in Design (3.0 cr)
* DES 8164 - Innovation Theory and Analysis (3.0 cr)
* GDES 8361 - Color, Design, and Human Perception (3.0 cr)
* KIN 5505 - Human-Centered Design - Principles and Applications (3.0 cr)

**Other Museum Studies Electives**
Internships (MST 5020) must be approved by the museum studies director of graduate studies. Directed study (MST 8993) must be guided by a member of the museum studies graduate faculty.
Take 0 or more credit(s) from the following:
* MST 5020 - Internship (1.0 - 6.0 cr)
* MST 8993 - Directed Study in Museum Studies (1.0 - 4.0 cr)

- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Product design is the planning of an item intended to be manufactured and sold. These items exist both as discrete artifacts and as actors in larger social systems, such as branded environments, services, experiences, and social interactions. A graduate minor may be earned in product design when it logically relates to the graduate major field. The minor program is designed to suit the particular needs and interests of the student. The course of study is determined in consultation with the student's major advisor and the director of graduate studies for the minor.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A graduate minor may be earned in product design when it logically relates to the graduate major field.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum of two courses with the PDES designator must be taken to fulfill the minor requirements.

The course of study must be approved by the product design director of graduate studies.

Product Design Core Courses
Required Course (3 Credits)
PDES 5701 - Creativity, Idea Generation, and Innovation (3.0 cr)

Product Design Process (3 to 8 Credits)
Option 1
PDES 5711 - Toy Product Design (4.0 cr)

Option 2
DES 8151 - Product Development: Theory and Practice (3.0 cr)

Option 3
ME 8221 - New Product Design and Business Development I (4.0 cr)
ME 8222 - New Product Design and Business Development II (4.0 cr)

Option 4
BMEN 8401 - New Product Design and Business Development (4.0 cr)
BMEN 8402 - New Product Design and Business Development (4.0 cr)

Option 5
Take ENTR 6041 for 2 to 4 credits, in consultation with the Product Design director of graduate studies.

ENTR 6041 - Initiating New Product Design and Business Development (2.0 - 4.0 cr)
ENTR 6042 - Implementing New Product Design and Business Development (4.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Electives (0 to 4 Credits)
Select remaining coursework, in consultation with the product design director of graduate studies, to meet the 11-credit minimum and the requirement for 2 PDES courses. Product design core courses not applied to the core requirement may be used as electives.

Design Process
- PDES 5711 - Toy Product Design (4.0 cr)
  or DES 8151 - Product Development: Theory and Practice (3.0 cr)
  or BMEN 8401 - New Product Design and Business Development (4.0 cr)
  BMEN 8402 - New Product Design and Business Development (4.0 cr)
  or ME 8221 - New Product Design and Business Development I (4.0 cr)
  ME 8222 - New Product Design and Business Development II (4.0 cr)
  or DES 8164 - Innovation Theory and Analysis (3.0 cr)

Drawing and Visualization
- PDES 5702 - Concept Sketching and Rendering (3.0 cr)
  or PDES 5704 - Computer-Aided Design Methods (3.0 cr)
  or GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

Prototyping, Manufacturing, and the Environment
- PDES 5703 - Product Form and Model Making (4.0 cr)
  or ME 5221 - Computer-Assisted Product Realization (4.0 cr)
  or ME 5223 - Materials in Design (4.0 cr)
  or ME 5241 - Computer-Aided Engineering (4.0 cr)
  or ME 8243 - Topics in Design (4.0 cr)
  or ESPM 5603 - Environmental Life Cycle Analysis (3.0 cr)
  or ESPM 5605 - Recycling: Extending Raw Materials Supplies (3.0 cr)

Human Factors
- DES 5185 - Human Factors in Design (3.0 cr)
  or CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
  or GDES 5341 - Interactive Design (3.0 cr)
  or GDES 5386 - Fundamentals of Game Design (3.0 cr)
  or KIN 5505 - Human-Centered Design - Principles and Applications (3.0 cr)
  or HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)

Understanding the Consumer and the Market
- PDES 5705 - History and Future of Product Design (3.0 cr)
  or ANTH 5121 - Business Anthropology (2.0 cr)
  or DES 8164 - Innovation Theory and Analysis (3.0 cr)
  or MKTG 6055 - Consumer Behavior (4.0 cr)
  or MKTG 6050 - Business Research Methods (2.0 cr)

Doctoral
Electives (1 to 4 Credits)
Select remaining coursework, in consultation with the product design director of graduate studies, to meet the 12-credit minimum and the requirement for 2 PDES courses. Product design core courses not applied to the core requirement may be used as electives.

Design Process
- PDES 5711 - Toy Product Design (4.0 cr)
  or DES 8151 - Product Development: Theory and Practice (3.0 cr)
  or BMEN 8401 - New Product Design and Business Development (4.0 cr)
  BMEN 8402 - New Product Design and Business Development (4.0 cr)
  or ME 8221 - New Product Design and Business Development I (4.0 cr)
  ME 8222 - New Product Design and Business Development II (4.0 cr)
  or DES 8164 - Innovation Theory and Analysis (3.0 cr)

Drawing and Visualization
- PDES 5702 - Concept Sketching and Rendering (3.0 cr)
  or PDES 5704 - Computer-Aided Design Methods (3.0 cr)
  or GDES 8362 - The Nature of Representation in Visual Communication (3.0 cr)

Prototyping, Manufacturing, and the Environment
PDES 5703 - Product Form and Model Making (4.0 cr)
or ME 5221 - Computer-Assisted Product Realization (4.0 cr)
or ME 5223 - Materials in Design (4.0 cr)
or ME 5241 - Computer-Aided Engineering (4.0 cr)
or ME 8243 - Topics in Design (4.0 cr)
or ESPM 5603 - Environmental Life Cycle Analysis (3.0 cr)
or ESPM 5605 - Recycling: Extending Raw Materials Supplies (3.0 cr)
or Human Factors
DES 5185 - Human Factors in Design (3.0 cr)
or CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
or GDES 5341 - Interactive Design (3.0 cr)
or GDES 5386 - Fundamentals of Game Design (3.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 19 to 24
- This program requires summer semesters for timely completion.
- Degree: College of Education Additional Licensure

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The additional licensure program offers a variety of courses specifically designed to address the competencies required by the state for various teaching and administrative licenses. Additional licenses are added to a current five-year, full-time professional Minnesota teaching license. Courses are offered throughout the year with evening courses offered during fall, spring, and summer semesters, and day courses offered during the summer semester. Students who enroll in the program are generally practicing teachers. They complete the program in an average of one to two years.

**Accreditation**
This program is accredited by NCATE/BOT, Council of Exceptional Children (CEC) and Council on Education of the Deaf (CED).

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
Other requirements to be completed before admission:
This program is not offered full-time and therefore is not intended for international students needing a visa to study in the United States.

Information current as of August 31, 2018
Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

**Academic and Behavioral Strategist**
The professional development program in special education offers a program of study that leads to K-12 licensure as an Academic Behavioral Strategist (ABS) and an MEd degree. This degree is designed to prepare teachers to work in a variety of educational settings with students who have mild to moderate disabilities. Graduates of the program are student-centered, collaborative professionals who implement evidence-based instructional interventions with fidelity to improve learner outcomes. The program incorporates maximizing learner expectations and learning opportunities including cultural and social diversity. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with developmental disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

**ABS Licensure Required Courses**
EPSY 4613, 5604, 5605, 5611, 5614, 5616, 5617, 5618, 5619, 5657, 5704, 5705 and 5741

**Agricultural Education 5-12**

**Autism Spectrum Disorders licensure**
The professional development program in special education offers a program in Autism Spectrum Disorders (ASD) that leads to Birth-12 licensure and an MEd degree. This degree is designed to prepare teachers to work in a variety of educational settings including home and school based programs with children who have been identified with ASD and their families. Graduates are prepared to assess, analyze, and provide intervention and remediation of academic, social and communicative challenges for students with ASD. This program focuses on the implementation of evidence-based practices, specialized educational services, and outcomes that add value to the learning and development of infants, children and adults with ASD from diverse cultural backgrounds.

**ASD Licensure Required Courses**
EPSY 4613, 5611, 5614, 5616, 5618, 5621, 5622, 5625, 5631, 5632, 5633, 5661, 5662, 5663, 5664, 5681, 5705, 5742

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in adult education (AdEd), is a specialized academic area of the Human Resource Development program in the Department of Organizational Leadership, Policy, and Development. AdEd graduate programs prepare individuals to work with adults in a variety of roles, such as program developers, teachers, advisers, administrators, and managers in a variety of formal and informal settings, such as educational institutions, business and industry, community agencies, healthcare organizations, continuing and professional education, and adult basic education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Special Application Requirements:
When applying online, applicants should complete Statements #1 & 2 (Statement #1 should indicate if student is in a special cohort). Filling out statement #3 optional. Applicants must also submit a résumé and personal statement (limit two pages) describing career goals and rationale for interest in the M.Ed. program. Two letters of recommendation from individuals who can attest to the applicant's potential are also required. Admissions are done on a rolling basis with the following deadlines: March 1 (Summer), July 1 (Fall), November 1 (Spring).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan C: Plan C requires 24 major credits and 10 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Required Courses

Students must complete at least 34 credits, including the following courses:

- OLPD 5296: Field Experience in Adult Education (3 credits are required and no more than 6 credits may be applied toward the program)
- OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
- OLPD 5202 - Perspectives of Adult Learning and Development (3.0 cr)
- OLPD 5204 - Designing the Adult Education Program (3.0 cr)
- OLPD 5296 - Field Experience in Adult Education (1.0 - 6.0 cr)
- OLPD 5607 - Organization Development (3.0 cr)
- OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)
- OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)

One additional 3 credit Adult Education course with adviser approval

Up to 10 credits of electives courses with adviser approval to equal the 34 credits needed for this program. The appropriate elective courses may vary.

Note on OLPD 5296 Field Experience in Adult Education: 3 credits are required and no more than 6 credits may be applied toward the program.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

Rochester

All sub-plans have the same curriculum requirements. New students are not being admitted to this sub-plan. Courses may be taken on the Twin Cities campus.

- This program does not require summer semesters for timely completion.
- Degree: Adult Education PBacc Certificate Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in adult education (AdEd), is a specialized academic area of the Human Resource Development program track in the Department of Organizational Leadership, Policy, and Development. AdEd graduate programs prepare individuals to work with adults in a variety of roles, such as program developers, teachers, advisors, administrators, and managers in a variety of formal and informal settings, such as educational institutions, business and industry, community agencies, healthcare organizations, continuing and professional education, and adult basic education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Admission is open to degree-seeking or non-degree seeking students who possess a U.S. bachelor's degree (or international equivalent). Applications are reviewed on an ongoing basis and may be submitted at any time.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.
Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

**Required Coursework**
- OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)
- OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
- OLPD 5202 - Perspectives of Adult Learning and Development (3.0 cr)

Students should enroll for a minimum of 4 credits of OLPD 5296 or OLPD 5696
- OLPD 5296 - Field Experience in Adult Education (1.0 - 6.0 cr)
- or OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)

**Electives**
- Only if needed to meet 14 credit minimum
- OLPD 5607 - Organization Development (3.0 cr)
- or Additional OLPD courses with adviser approval to make total credits earned equal at least 14 credits.

- This program does not require summer semesters for timely completion.
- Degree: Adult Literacy PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The adult literacy certificate is designed to prepare teachers, administrators, trainers, and counselors in the broad political, social, economic, and theoretical aspects of adult literacy in a global environment.

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
Other requirements to be completed before admission:
US bachelor's degree or international equivalent.

Special Application Requirements:
Admission is open to degree-seeking or non-degree seeking students. Students may pursue the certificate alone or concurrently with a UM master's or doctoral degree program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

Adult Literacy
Select courses from the following three modules for a total of at least 6 credits.

Module 1
OLPD 5211 - Introduction to the Undereducated Adult (1.0 cr)
OLPD 5212 - Introduction to Adult Literacy in the Workplace (1.0 cr)
OLPD 5213 - Introduction to Adult Literacy in the Community (1.0 cr)

or Module 2
OLPD 5224 - Formal Assessment of Adult Literacy (1.0 cr)
OLPD 5225 - Informal Assessment of Adult Literacy (1.0 cr)
OLPD 5226 - Advanced Assessment of Adult Literacy (1.0 cr)

or Module 3
OLPD 5233 - Methods of Teaching Beginning Adult Literacy (1.0 cr)
OLPD 5234 - Methods of Teaching Intermediate Adult Literacy (1.0 cr)
OLPD 5235 - Methods of Teaching Advanced Adult Literacy (1.0 cr)

or Subgroup 3

**Adult Education**

Take one of the following courses for 3 credits.

OLPD 5201 - Strategies for Teaching Adults (3.0 cr)

or OLPD 5202 - Perspectives of Adult Learning and Development (3.0 cr)

**Field Experience**

Take the following course for 3 credits.

OLPD 5296 - Field Experience in Adult Education (1.0 - 6.0 cr)

**Electives**

Take at least 2 credits of electives. Courses other than the following may be substituted with program advisor approval.

CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)

or CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)

or CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)

or CI 5662 - Second Language Curriculum Design (3.0 cr)
Twin Cities Campus

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program requires summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota’s Advanced Practices in Second Language Teaching Certificate program is designed for teachers of foreign languages and English as a second/foreign language and is offered by the Department of Curriculum and Instruction in partnership with the Center for Advanced Research on Language Acquisition (CARLA) Summer Institute Program.

Courses are offered on the Twin Cities campus, typically during the last three weeks in July. The certificate may be completed independently or in conjunction with a master of education (M.Ed) degree in second languages and cultures education at the University of Minnesota.

Although the University certificate does not lead to teaching licensure or state certification, it adds value to a pre-service or in-service teacher’s academic program and professional life. Completion of the advanced practices in second language teaching certificate indicates successful participation in a set of internationally recognized, high-quality summer institutes for language teaching and provides a vehicle for teachers to receive tangible recognition of preparation in advanced language teaching practices and methodologies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A completed bachelor's degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page personal statement discussing your experience teaching languages and the ways this certificate program will contribute to your professional development. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Courses (6 credits)
- CI 5621 - Culture as the Core in the Second Language Classroom (2.0 cr)
- CI 5622 - Growing Learner Language: A Hands-On Approach to Developing the Language Learners Produce (2.0 cr)
If CI 5608: CARLA Summer Institute Seminar is selected, student must take "Teaching Language Online" topic section.
- LGTT 5110 - Technology in the Second Language Classroom (2.0 cr)
  or CI 5608 - CARLA Summer Institute Seminar (1.0 - 4.0 cr)

Elective Courses (6 credits)
Take 3 or more course(s) totaling 6 or more credit(s) from the following:
- CI 5608 - CARLA Summer Institute Seminar (1.0 - 4.0 cr)
- CI 5623 - Improving Language Learning: A Practical Course in Styles- and Strategies-based Instruction (2.0 cr)
- CI 5624 - Content-based Language Instruction and Curriculum Development (2.0 cr)
- CI 5625 - Developing Assessments for the Second Language Classroom (2.0 cr)
- CI 5626 - Developing Learners’ Sociocultural Competence (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 32
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students will gain knowledge of developmental processes and competence in the application of theory and research to practice and policy/research. Specialization happens via formal tracks in infant and early childhood mental health, child life, or individualized studies.

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have completed at least one general psychology, human development, or social science course with a grade of B or higher. Applicants must submit, via the online application system, a departmental application to a specific track, TOEFL scores if applicable, three letters of recommendation from persons familiar with their potential for graduate study, unofficial transcripts, a statement of career interests, goals, and objectives, and a statement of diversity.

Child life track applicants must also have completed or have in progress one child life course taught by a certified child life specialist (CCLS) and 100 hours of documented direct experience with children and families in a hospital/medical setting, preferably under the supervision of a CCLS. In addition, applicants must meet the minimum technical standards for internship in a clinical setting as outlined by the Child Life Council.

Please see our website for full details.

International applicants must submit score(s) from one of the following tests:
- TOEFL

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 32 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.
Capstone Project: Students will develop an individual capstone project in consultation with their advisor. Their capstone project should integrate the foundational knowledge gained via their coursework with the applied experience required as part of their Plan C Project.

Credits: CPSY 5996 Field Experience in Applied Child and Adolescent Development (3-6 credits).

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Students are admitted to a specific track (academic content sub-plan) and must complete the core courses, the required courses for their track as listed below, and the Plan C Project credits.

Core Courses
Take 14 or more credit(s) from the following:
- CPSY 5301 - Advanced Developmental Psychology (3.0 cr)
- CPSY 5302 - Cognitive and Biological Development (3.0 cr)
- CPSY 5303 - Social and Emotional Development (3.0 cr)
- CPSY 5304 - Research Methods in Applied Child and Adolescent Development (3.0 cr)
- CPSY 5306 - Ethics and Professionalism in Applied Child and Adolescent Development (2.0 cr)

Plan C Project Credits
Take 3 - 6 credit(s) from the following:
- CPSY 5996 - Field Experience in Applied Child and Adolescent Development (1.0 - 12.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Infant and Early Childhood Mental Health
The infant and early childhood mental health track is committed to the development of culturally competent, trauma-informed practitioners and policy makers through inter-disciplinary studies and supervised professional practice. The program philosophy is shaped by an ecological, multi-generational, relational model of development and intervention, attending to the ways biology, environment (i.e., family, culture, socioeconomic context), and individual history transact to promote health and pathology. The track consists of coursework and training in the application of developmental science to early childhood evidence-based practice and policy development. The training prepares practitioners to conceptualize case work with young children (0-5) and their caregivers, and prepares individuals to formulate and advocate research-based policy and practice in the area of childrens mental health.

Infant and Early Childhood Mental Health Track Required Courses
Take 15 or more credit(s) from the following:
- CPSY 5503 - Development and Psychopathology in Early Childhood (3.0 cr)
- CPSY 5506 - Infant Observation Seminar I (1.0 cr)
- CPSY 5508 - Infant Observation Seminar II (1.0 cr)
- CPSY 5511 - Infant Observation Seminar III (1.0 cr)
- CPSY 5513 - Early Childhood Assessment (3.0 cr)
- CPSY 5518 - Prevention and Intervention in Early Childhood: Principles (3.0 cr)
- CPSY 5521 - Prevention and Intervention in Early Childhood: Practice (3.0 cr)

Child Life
The child life track is committed to preparing child life specialists with a strong educational foundation in developmental science coupled with a thorough theoretical education in topics central to the child life profession such as illness and injury, therapeutic play and relationships, and childhood death and bereavement. Students will develop the skills necessary to promote family-centered care and work with children and their families who are living with chronic and acute healthcare challenges.

Child Life Track Required Courses
Take 15 or more credit(s) from the following:
- CPSY 5601 - Child Life Theory, Practice and Program Development (3.0 cr)
- CPSY 5602 - Developmental Perspectives on Illness and Injury in Healthcare (3.0 cr)
- CPSY 5603 - Therapeutic Play for Child Life Practice (3.0 cr)
- CPSY 5604 - Therapeutic Relationships: Supporting Children in Healthcare (3.0 cr)
- CPSY 5605 - Childhood Death and Berevement (3.0 cr)

Individualized Studies
The individualized studies track prepares students whose work intersects with children and families with a strong academic foundation in developmental science, exposure to current issues and great challenges in developmental science, and the opportunity to craft a...
supporting program or add a graduate minor tailored to a student's individual career goals. This track recognizes the wide ranging professions that benefit from integration with developmental science, such as policy development, evaluation studies, prevention science, parent education, among many other domains currently addressed via existing coursework at the University.

**Individualized Studies Track Required Courses**
Take 9 or more credit(s) from the following:
- CPSY 5310 - Current Issues in Applied Child and Adolescent Development (3.0 cr)
- CPSY 5413 - Early Childhood and Public Policy (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)

**Individualized Studies Track Electives**
Take at least 6 credits, selected in consultation with an advisor.

Website: http://www.cehd.umn.edu/edpsych/Programs/SpecialEd/certificate/Autism.html

Program Type: Post-baccalaureate credit certificate/licensure/endorsement
Requirements for this program are current for Fall 2018
Length of program in credits: 12
This program does not require summer semesters for timely completion.
Degree: Autism Spectrum Disorder Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate program in autism spectrum disorder (ASD) is designed to prepare teachers and related service personnel to design and deliver services to children and youth with ASD and their families. This 12-credit program provides a broad overview of major issues in ASD and specialized training in methods of assessment, intervention, and treatment evaluation. This program offers professional development opportunities for autism resource specialists, public and private social service agency staff, personnel at public and private schools, treatment facility personnel, and other human service professionals.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
International students wishing to complete the certificate must be admitted to a degree program at the University of Minnesota, Twin Cities. Graduate applicants must have a minimum 2.80 GPA in an undergraduate degree and 3.00 in graduate coursework from accredited institutions.

Special Application Requirements:
All applicants must submit the following materials: - Two letters of recommendation on letterhead stationery from individuals who can address the applicant's abilities to work in a professional context with this population - Typed goal statement - Completed online application - Transcripts from all postsecondary institutions attended or currently attending, except the University of Minnesota. For students not currently in a University of Minnesota program, transcripts must be received from the issuing school in a sealed and stamped envelope.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 68 to 70
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD in child psychology focuses primarily on training for research in normal human development. The goal of the program is to train all students for careers in research and college teaching in child psychology, and to prepare students in the collaborative program options for careers in applied areas of child psychology, as well. Students are admitted to either the general track or the developmental psychopathology and clinical studies track.

General track students may choose to specialize in an area such as cognitive neuroscience, language, learning, personality, memory, perception, psychobiology, or social development.

Students interested in clinical research may specialize in developmental psychopathology and clinical science through participation in the developmental psychopathology and clinical science (DPCS) training program. DPCS training is a cooperative effort between the Institute of Child Development and the Department of Psychology to instruct leaders in research and teaching. DPCS training draws on the unique strengths of each program. Students in this track complete a required clinical internship, which adds an additional year to program completion.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Most students admitted have a substantial background in psychology, courses in mathematics and the natural sciences, and undergraduate research experience.

Special Application Requirements:
For full application instructions, please see: http://www.cehd.umn.edu/icd/programs/CPSY/Graduate/apply.html Applications are accepted for fall semester entry only and due by December 1 of the previous year. Late applications are not accepted.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 27
- IELTS
  - Total Score: 6.5
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
44 to 46 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The PhD degree usually requires five years of graduate work. Major program components include coursework, research activities, and teaching experience. Coursework requirements are specialization specific, but all students are required to take 45 credits in the major and 24 thesis credits.

Each student specializes in an area such as social and personality development, learning, cognitive development, cognitive neuroscience, language development, psychobiology, or perceptual development.

Major Program Coursework
CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
CPSY 8304 - Developmental Research Methods (3.0 cr)
CPSY 8307 - Prelim Seminar (1.0 cr)
CPSY 8321 - Seminar in Teaching Developmental Psychology (1.0 cr)
CPSY 8322 - Apprenticeship in Teaching Developmental Psychology (1.0 - 3.0 cr)

Special Topics and Advanced Seminars (5 credits minimum)
5 credits of CPSY 8360/CPSY 86xx, of which one course must be at least 3 credits.
Take 2 or more course(s) totaling 5 or more credit(s) from the following:
• CPSY 8360 - Special Topics in Developmental Psychology (1.0 - 3.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• CPSY 8607 - Developmental Neurobiology of Stress and Emotion (3.0 cr)
• CPSY 8608 - Clinical Intervention with Children (3.0 cr)
• CPSY 8660 - Advanced Developmental Psychology (1.0 - 4.0 cr)

Statistical Analysis
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Research Credits (14 credits minimum)
Take 14 or more credit(s) from the following:
• CPSY 8994 - Research Problems in Child Psychology (1.0 - 6.0 cr)

5 elective credits of CPSY or outside coursework
5 credits of CPSY or outside elective coursework, planned in consultation with adviser.

Thesis Credits
Take exactly 24 credit(s) from the following:
• CPSY 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Clinical Physiology and Movement Science Minor
Kinesiology, School of
College of Education and Human Development

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's or doctoral minor in clinical physiology and movement science is an innovative free-standing graduate minor that is available to University of Minnesota graduate students. Offering a uniquely interdisciplinary program in a new, emerging field of study, the minor is designed for graduate students in clinical, engineering, nursing, public health, and medical fields who are interested in the clinical aspects of physiology and movement science. The interdisciplinary coursework combines physiology and movement science with clinical skills for research and the diagnosis and assessment of disease conditions. Developed by faculty with rich collective expertise from across the University, the minor offers students a choice of two tracks: clinical physiology or clinical movement science.

The minor is attractive to graduate students seeking a PhD or master's degree in kinesiology, rehabilitation sciences, and the speech and hearing sciences; in biomedical or mechanical engineering; in the School of Nursing; in the School of Public Health; or seeking a combined MD/PhD who have an interest in a variety of medical fields such as neurology, neurosurgery, otolaryngology, orthopedics, and pediatrics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students wishing to pursue this graduate minor must be currently enrolled in a graduate degree program at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

CPMS 5101 Introduction to Clinical Physiology and Movement Science is a required core course for all students seeking the minor. KIN 5987 Professional Skills and Grant Writing for Health Sciences, 2 credits, is also required for a PhD minor, unless an equivalent course has been taken or the student can document previous grant writing experience.

Additional elective courses are selected in consultation with the faculty advisor and approved by the director of graduate studies (DGS), in order to satisfy the requirements for the minor. Courses chosen will depend on the background and goals of the student. Students can select one of two tracks: clinical physiology or clinical movement science.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Clinical Movement Science (Master's)

**Required Courses**
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)
- KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)

**Electives**
Electives are chosen in consultation with the advisor. NURS 8173 and SAPH 8173 are cross-listed. Take 4 or more credit(s) from the following:
- • BMEN 5201 - Advanced Biomechanics (3.0 cr)
- • CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)
- • CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)
- • KIN 5122 - Applied Exercise Physiology (3.0 cr)
- • KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- • KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- • KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- • KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
- • KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
- • KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
- • KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
- • KIN 8132 - Seminar: Motor Development (3.0 cr)
- • KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
- • KIN 8211 - Seminar: Perception and Action (3.0 cr)
- • NURS 5222 - Advanced Human Physiology (2.0 cr)
- • NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)
- • NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
- • SAPH 8173 - Principles and Methods of Implementing Research (3.0 cr)
- • NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
- • OT 5393 - Functional Anatomy and Kinesiology (4.0 cr)
- • OTOL 5993 - Directed Studies (1.0 - 12.0 cr)
- • OTOL 8239 - Otoneurology (1.0 - 2.0 cr)
- • OTOL 8244 - Seminar: Current Literature (1.0 cr)
- • PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- • PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- • PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- • PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
- • PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- • RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- • RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
- • RSC 5841 - Applied Data Acquisition and Processing (3.0 cr)
- • RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- • RSC 8135 - Human Kinematics (3.0 cr)
- • RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
- • RSC 8282 - Problems in Human Movement (4.0 cr)

Clinical Movement Science (Doctoral)

**Required Courses**
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)
- KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)

**Electives**
Electives are chosen in consultation with the advisor. NURS 8173 and SAPH 8173 are cross-listed. Take 7 or more credit(s) from the following:
- • BMEN 5201 - Advanced Biomechanics (3.0 cr)
- • CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)
- • CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)
- • KIN 5122 - Applied Exercise Physiology (3.0 cr)
- • KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- • KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- • KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- • KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
- • KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
- • KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
- • KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
- • KIN 8132 - Seminar: Motor Development (3.0 cr)
- • KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
Clinical Physiology (Master's)

**Required Courses**

- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

**Electives**

Electives are chosen in consultation with the advisor. NURS 8173 and SAPH 8173 are cross-listed.

Take 6 or more credit(s) from the following:

- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)
- CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)
- KIN 5122 - Applied Exercise Physiology (3.0 cr)
- KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
- KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
- KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
- KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
- KIN 8132 - Seminar: Motor Development (3.0 cr)
- KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
- KIN 8211 - Seminar: Perception and Action (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)
- NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
- SAPH 8173 - Principles and Methods of Implementing Research (3.0 cr)
- NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
- OT 5393 - Functional Anatomy and Kinesiology (4.0 cr)
- OTOL 5993 - Directed Studies (1.0 - 12.0 cr)
- OTOL 8244 - Seminar: Current Literature (1.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
- RSC 5841 - Applied Data Acquisition and Processing (3.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- RSC 8135 - Human Kinematics (3.0 cr)
- RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8282 - Problems in Human Movement (4.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Clinical Physiology & Movement Science PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The clinical physiology and movement science postbaccalaureate certificate program is aimed at D.N.P. and M.D. fellows in nursing and medicine, as well as professionals in clinical fields, such as physical, occupational, and speech therapy. In addition, engineers working in the area of medical technology or medical device development are potential candidates. The interdisciplinary coursework combines physiology and movement science with clinical skills for research and the diagnosis and assessment of disease conditions. Students have the option to tailor the program to their individual needs and interest. They may select from a list of more than 30 courses. Developed by faculty with a rich collective expertise from across the University, the programs offer students a choice of two tracks: clinical physiology and clinical movement science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Students wishing to pursue the certificate program must have completed a bachelor's degree, preferably in an allied health sciences or natural science field.

Special Application Requirements:
If the individual is applying for a certificate and is not currently enrolled in a graduate program at the University of Minnesota, two letters of support will be requested and a GPA of 3.0 or greater (or equivalent if there were a different student evaluation system) from a previous graduate program will be required. Submission package includes: clinical physiology and movement science application form, resume or curriculum vitae, transcripts, two letters of support, and documented language proficiency. Deadline for Fall semester admission is July 15; deadline for Spring semester admission is November 15.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

**Required Course**
This course is required for both the Clinical Movement Science track and the Clinical Physiology track:
CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

**Elective Courses**
The following courses are offered by a number of graduate programs and can be used as course electives for the certificate program in consultation with the adviser. NURS 8173 and SAPH 8173 are cross-listed.

BMEN 5201 - Advanced Biomechanics (3.0 cr)
or CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)
or CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)
or KIN 5122 - Applied Exercise Physiology (3.0 cr)
or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
or KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
or KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
or KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
or KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
or KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
or KIN 8132 - Seminar: Motor Development (3.0 cr)
or KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
or NURS 5222 - Advanced Human Physiology (2.0 cr)
or NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)
or NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
or SAPH 8173 - Principles and Methods of Implementing Research (3.0 cr)
or NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
or OT 5393 - Functional Anatomy and Kinesiology (4.0 cr)
or OTOL 5993 - Directed Studies (1.0 - 12.0 cr)
or OTOL 8239 - Otoneurology (1.0 - 2.0 cr)
or OTOL 8244 - Seminar: Current Literature (1.0 cr)
or PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
or PUBH 6342 - Epidemiologic Methods II (3.0 cr)
or PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
or PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
or RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
or RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
or RSC 5841 - Applied Data Acquisition and Processing (3.0 cr)
or RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
or RSC 8135 - Human Kinematics (3.0 cr)
or RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
or RSC 8282 - Problems in Human Movement (4.0 cr)

**Program Sub-plans**
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Clinical Movement Science**
Clinical movement science is a new, interdisciplinary field of study focusing on human movement dysfunctions due to neurological or orthopedic diseases or diminished physical activity. This new field bridges the gap between basic and clinical sciences by crossing the boundaries of traditional disciplines of neurology, neurophysiology, kinesiology, and physical and occupational therapy. The curriculum includes a required core course that covers the theory and application of clinical physiology and movement science. Elective courses are chosen from a broad list of offerings in departments such as kinesiology, public health, rehabilitation science, and otolaryngology.

The postbaccalaureate certificate requires a minimum of 12 semester credits. CPMS 5101 serves as a required core course for all students seeking a certificate. Electives are selected in consultation with the faculty adviser and approved by the director of graduate studies (DGS), in order to satisfy the requirements for the certificate. The specific courses chosen will depend on the background and goals of the individual student.
Sample Program for Clinical Movement Science Track

**Required**
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

**Electives**
- Students should register for 2 credits of OTOL 8239.
- RSC 5841 - Applied Data Acquisition and Processing (3.0 cr)
- OTOL 8239 - Otoneurology (1.0 - 2.0 cr)
- KIN 5941 - Clinical Movement Neuroscience (3.0 cr)

Clinical Physiology

This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

Clinical physiology is a branch of physiology that bridges basic physiology and clinical medicine. It joins the gap between basic and clinical sciences by crossing the boundaries of traditional disciplines of neurology, neurophysiology, kinesiology, and physical and occupational therapy. The curriculum includes a required core course that covers the theory and application of clinical physiology and movement science. Elective courses are chosen from a broad list of offerings in departments such as kinesiology, public health, rehabilitation science, and otolaryngology.

The postbaccalaureate certificate requires a minimum of 12 semester credits. CPMS 5101 is required for all students seeking a certificate. Electives are selected in consultation with the faculty adviser and approved by the director of graduate studies (DGS) in order to satisfy the requirements for the certificate. The specific courses chosen will depend on the background and goals of the individual student.

Sample Program for Clinical Physiology Track

**Required**
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

**Electives**
- KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- KIN 8122 - Seminar: Exercise Physiology (2.0 cr)

Website: http://cehd.umn.edu/ci

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (MEd)/professional studies degree programs are designed to meet the needs of practicing professionals in education and human development fields. Students admitted typically have interests in improving their current professional practice and applying their education to their present work responsibilities.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree from an accredited college or university.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a clearly written statement of career interests, goals, and objectives. Master's applications are reviewed by department faculty three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

**Arts in Education**

This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in arts in education is designed for experienced art, theater, and dance teachers, and others who want to acquire advanced knowledge and leadership skills in the arts field. The program is flexible and can be tailored to accommodate individual needs. Final project requirements include a school-based project examining a problem, issue, or topic identified by the student.

The MEd/professional studies arts in education sub-plan requires a minimum of 10 credits of core coursework, 14 credits of arts in education coursework, and 6 credits of electives for a total of 30 credits.

**Core Coursework (10 credits)**

- CI 5177 should be taken for 3 credits. CI 5186 should be taken for 1 credit.
- CI 5049 - Digital Media & Technology Integration: Arts Education Theory & Practice (3.0 cr)
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5177 - Practical Research (1.0 - 3.0 cr)
- CI 5186 - School-Related Projects (1.0 - 4.0 cr)

**Arts in Education Requirements (14 credits)**

- CI 5050 should be taken for 3 credits.
- CI 5050 - Issues in Art Education (1.0 - 4.0 cr)
- CI 5069 - Curriculum Innovations in Arts Education (3.0 cr)
- CI 5075 - The Social, Historical and Cultural Foundations of Arts Education (3.0 cr)
- CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
- CI 8079 - Research in Art Education (3.0 cr)

**Electives (6 credits)**

Courses will be selected in consultation with faculty advisor.

**Elementary Education**

This sub-plan is limited to students completing the program under Plan C.

**Core Coursework (3 credits)**

- CI 5111 - Introduction to Elementary School Teaching (3.0 cr)

**Elementary Education Requirements (15 credits)**

Courses will be selected in consultation with faculty advisor.

**Electives (12 credits)**

Courses will be selected in consultation with faculty advisor.

**ALERT:** the MEd/professional studies degree program in elementary education is currently suspended. We are not accepting applications at this time.

The MEd/professional studies program in elementary education is designed for elementary teachers who want to improve their instructional, decision-making, evaluation, and leadership skills. The program is flexible and can be tailored to accommodate individual needs.

The MEd/professional studies elementary education sub-plan requires 3 credits of core coursework, 15 credits of elementary education coursework, and 12 credits of electives for a total of 30 credits.

**Core Coursework (3 credits)**

- CI 5111 - Introduction to Elementary School Teaching (3.0 cr)

**Elementary Education Requirements (15 credits)**

Courses will be selected in consultation with faculty advisor.

**Electives (12 credits)**

Courses will be selected in consultation with faculty advisor.
**English Education**
This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in English education addresses the needs and interests of middle school, high school, and community-college English teachers. The English education program provides instruction on current developments in English/language arts curriculum theory and research, as well as methods for teaching literature, reading, composition, media, drama, and journalism. The program is flexible and can be tailored to accommodate individual needs.

The MEd/professional studies English education sub-plan requires 6 credits of core coursework, 18 credits of English education coursework, and 6 credits of electives for a total of 30 credits.

**Core Coursework (6 credits)**
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)

**English Education Requirements (18 credits)**
Take 18 or more credit(s) from the following:
- CI 5404 - Multicultural Literature for Children and Adolescents (3.0 cr)
- CI 5410 - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
- CI 5417 - Elementary literacy Instruction for ESL Students (3.0 cr)
- CI 5422 - Teaching Writing in Schools (3.0 cr)
- CI 5442 - Literature for Adolescents (3.0 cr)
- CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
- CI 5462 - Evaluating and Assessing Writing (3.0 cr)
- CI 5472 - Teaching Critical Media Analysis in Schools (3.0 cr)
- CI 5475 - Teaching Digital Writing (3.0 cr)
- CI 5541 - Language, Culture, and Education (3.0 cr)

**Electives (6 credits)**
Courses will be selected in consultation with faculty advisor.

**Environmental Education**
This sub-plan is limited to students completing the program under Plan C.

ALERT: the MEd/professional studies degree program in environmental education is currently suspended. We are not accepting applications at this time.

The MEd/professional studies degree program in environmental education is designed to develop leaders in environmental education through integrated research, outreach, and teaching. This program of at least 30 semester credits offers an interdisciplinary, integrated approach to environmental learning and leadership for school teachers, extension service educators, and environmental educators in formal and informal settings. Learning experiences allow students to integrate their work experience and academic study. Field work, evaluation methods, internships, and other practical applications of theory and method are integral parts of the program.

The MEd/professional studies environmental education sub-plan requires 13 credits of core coursework, 3 credits of coursework related to research methods/evaluation/statistics, and 14 credits of electives for a total of 30 credits.

**Core Coursework (13 credits)**
- CI 5186 and CI 5190 must each be taken for a minimum of 2 credits.
- ESPM 5202 - Environmental Conflict Management, Leadership, and Planning (3.0 cr)
- CI 5186 - School-Related Projects (1.0 - 4.0 cr)
- CI 5190 - Directed Individual Study in Curriculum and Instruction (1.0 - 6.0 cr)
- CI 5537 - Principles of Environmental Education (3.0 cr)
- CI 5747 - Global and Environmental Education: Content and Practice (3.0 cr)

**Research Methods, Evaluation, or Statistics (3 credits)**
A minimum of 3 credits, chosen in consultation with the faculty advisor, intended to provide skills or knowledge essential to the required research project.

**Electives (14 credits)**
A minimum of 14 credits of graduate-level coursework (5xxx and above) selected in consultation with faculty advisor from the following fields: natural sciences, social sciences, humanities, education, natural resources, or agriculture.

**Interdisciplinary Studies**
This sub-plan is limited to students completing the program under Plan C.
The MEd/professional studies program in interdisciplinary studies is a graduate-level, practitioner-based, coursework-only program designed for cohorts of experienced K-12 teachers of different subjects. This program is for cohorts of students and is not offered to individuals.

It integrates coursework representing a number of academic disciplines as defined in K-12 contexts with coursework emphasizing particular areas of interest. Practicing teachers complete 30 semester credits of work in two areas: a core academic program with courses representing a range of K-12 disciplines, and elective courses related to a specific focus area. The program may be combined with a certificate program offered in the Department of Curriculum and Instruction. Depending upon the cohort for which the program is designed, the program may be completed entirely online, entirely face-to-face (F2F), or as a hybrid, with a combination of F2F and online coursework.

The MEd/professional studies interdisciplinary studies sub-plan requires a minimum of 15 credits of interdisciplinary studies coursework, and 15 credits of electives for a total of 30 credits.

**MEd - Interdisciplinary Studies**

**Interdisciplinary Studies**

**Total: 30 credits**

**Interdisciplinary Requirements (15 credits)**

Students will take CI 5150 twice: once under the "Educational Inequities: Race, Class & Gender" topic, and the second under the "Teaching for Civic Engagement" topic. Each course should be taken for 3 credits.

Take 5 or more course(s) totaling 15 or more credit(s) from the following:

- CI 5361 - Teaching and Learning with the Internet (2.0 - 3.0 cr)
- CI 5540 - Special Topics: Science Education (1.0 - 4.0 cr)
- CI 5150 - Curriculum Topics (3.0 cr)
- CI 5474 - New Literacies Frameworks and Instruction: Digital Texts and Digital Reading (3.0 cr)

**Electives (15 credits)**

Elective credits around a specific focus area will be identified for specific cohorts based on their expressed interests. Elective credits may be comprised of courses leading to a particular certificate.

-OR-

**Interdisciplinary Studies - Dual Language & Immersion Education Cohort**

**Total: 30 credits**

**Interdisciplinary Requirements (15 credits)**

Students will take CI 5150 twice: once under the "Educational Inequities: Race, Class & Gender" topic, and the second under the "Teaching for Civic Engagement" topic.

Take 5 or more course(s) totaling 15 or more credit(s) from the following:

- CI 5361 - Teaching and Learning with the Internet (2.0 - 3.0 cr)
- CI 5540 - Special Topics: Science Education (1.0 - 4.0 cr)
- CI 5150 - Curriculum Topics (3.0 cr)
- CI 5474 - New Literacies Frameworks and Instruction: Digital Texts and Digital Reading (3.0 cr)

**Cohort Requirements (15 credits)**

Students will take the topic "Biliteracy Development in Dual Language and Immersion Classrooms" for the CI 5660 requirement. CI 5660 is taken for 3 credits.

- CI 5648 - Advanced Practices in Teaching Academic Language (3.0 cr)
- CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)
- CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
- CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
- CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)

**Language Immersion Education**

This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in language immersion education is designed for practicing dual language or language immersion educators, or individuals with an interest in language immersion education. Program participants have the option to add a 15 credit certificate in dual language and immersion education, which requires a separate application. Offered partially online, the program provides educators with the specific knowledge base and skill set needed for the dual language/immersion (DL/I) education setting and emphasizes practical application of concepts.

Key topics include: second language acquisition; research foundations of DL/I education; curriculum planning and assessment development that integrates subject matter content, language, literacy and culture; biliteracy development; language-focused instructional practices and strategies to bring a language focus to content-based instruction; academic language development; issues
related to language status; culturally relevant pedagogy; and tools for assessing language proficiency development. The program culminates with an independent capstone project that gives educators an opportunity to apply the knowledge and skills gained in coursework to their professional practice.

The MEd/professional studies language immersion education sub-plan requires 9 credits of core coursework, 15 credits of language immersion education coursework, and 6 credits of electives for a total of 30 credits.

**Core Coursework (9 credits)**
- CI 5186 should be taken for 3 credits.
- CI 5177 - Practical Research (1.0 - 3.0 cr)
- CI 5186 - School-Related Projects (1.0 - 4.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)

**Language Immersion Requirements (15 credits)**
- CI 5648 - Advanced Practices in Teaching Academic Language (3.0 cr)
- CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
- CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
- CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)
- CI 5676 - Biliteracy Development in Dual Language/Immersion Classrooms (3.0 cr)

**Electives (6 credits)**
- Recommended electives are included. Other elective options include University's Center for Advanced Research on Language Acquisition (CARLA) summer institutes on immersion education (options vary by year) or other courses selected in consultation with advisor.
- CI 5641 - Language, Culture, and Education (3.0 cr)
- or CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)

**Learning Technologies**
This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in learning technologies is designed for professionals interested in using technology in their organizations (especially K-12 and college educators, new media designers, and corporate trainers). This program also serves students interested in using technology to develop instructional materials for a wide range of settings. Because TEL certificate requirements are incorporated into the MEd program, students may earn a certificate while earning the MEd degree.

The MEd/professional studies learning technologies sub-plan requires 9 credits of core coursework, 12 credits of learning technologies coursework, and 9 credits of electives for a total of 30 credits.

**Core Coursework (9 credits)**
- CI 5331 - Introduction to Learning Technologies (3.0 cr)
- CI 5177 - Practical Research (1.0 - 3.0 cr)
- CI 5190 - Directed Individual Study in Curriculum and Instruction (1.0 - 6.0 cr)

**Learning Technologies Requirements (12 credits)**
- Courses will be selected in consultation with faculty advisor.

**Electives (9 credits)**
- Courses will be selected in consultation with faculty advisor.

**Mathematics Education**
This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in mathematics education is designed for experienced mathematics teachers who want to acquire advanced knowledge and leadership skills in the field of mathematics education. The program is flexible and can be tailored to accommodate individual needs. Final project requirements include a school-based project examining a problem, issue, or topic identified by the student.

The MEd/professional studies mathematics education sub-plan requires 6 credits of core coursework, 14 credits of mathematics education coursework, and 10 credits of electives for a total of 30 credits.

**Core Coursework (6 credits)**
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5177 - Practical Research (1.0 - 3.0 cr)

**Mathematics Education Requirements (14 credits)**
- MTHE 5314 - Teaching and Learning Mathematics (3.0 cr)
MTHE 5366 - Technology-Assisted Mathematics Instruction (3.0 cr)
MTHE 5993 - Directed Studies in Mathematics Education (2.0 cr)

Mathematics Education Electives
Take 2 or more course(s) totaling 6 or more credit(s) from the following:
• MTHE 5155 - Rational Number Concepts and Proportionality (3.0 cr)
• MTHE 5171 - Teaching Problem Solving (3.0 cr)
• MTHE 5172 - Teaching Probability and Statistics (3.0 cr)

Electives (10 credits)
Courses will be selected in consultation with faculty advisor. Students choose electives from MATH-designated courses (minimum 7 credits); one MTHE-designated course may be included (maximum 3 credits).

Science Education
This sub-plan is limited to students completing the program under Plan C.

ALERT: the MEd/professional studies degree program in science education is currently suspended. We are not accepting applications at this time.

The MEd/professional studies program in science education is designed for experienced science teachers who want to acquire advanced knowledge and leadership skills in the field of science education. The program is flexible and can be tailored to accommodate individual needs. Final project requirements include a school-based project examining a problem, issue, or topic identified by the student.

The MEd/professional studies science education sub-plan requires 9 credits of core coursework, 12 credits of science education coursework, and 9 credits of electives for a total of 30 credits.

Core Coursework (9 credits)
CI 5186 should be taken for 3 credits.
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)
CI 5186 - School-Related Projects (1.0 - 4.0 cr)

Science Education Requirements (12 credits)
CI 5533 - Current Developments in Science Teaching (3.0 cr)
CI 5534 - Studies in Science Education (3.0 cr)
CI 5535 - Foundations of Science Education (3.0 cr)
CI 5536 - Equity, Policy, and Assessment in Science Education (3.0 cr)

Electives (9 credits)
Courses will be selected in consultation with faculty advisor.

Social Studies
This sub-plan is limited to students completing the program under Plan C.

ALERT: the MEd/professional studies degree program in social studies education is currently suspended. We are not accepting applications at this time.

The MEd/professional studies program in social studies education is designed for experienced social studies teachers who want to acquire advanced knowledge and leadership skills in the field of social studies education. This program is flexible and can be tailored to accommodate individual needs.

The MEd/professional studies social studies education sub-plan requires 3 credits of core coursework, 15 credits of social studies education coursework, and 12 credits of electives for a total of 30 credits.

Core Coursework (3 credits)
CI 5741 - Introduction to Social Studies Education (3.0 cr)

Social Studies Requirements (15 credits)
Courses will be selected in consultation with faculty advisor.

Electives (12 credits)
Courses will be selected in consultation with faculty advisor.

Second Language Education
This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in second language education (SLE) is designed for experienced second language teachers.
who want to acquire advanced knowledge of research, best practices, and effective policies in the field of second language education. The program addresses the needs and interests of second language educators in a variety of teaching contexts, including world languages and English as a second/foreign language (ESL/EFL). While the program emphasizes instructional issues related to K-12 education, it is also relevant to teachers working with university-level or adult learners. The program is flexible and can be tailored to accommodate individual needs.

The MEd/professional studies second language education sub-plan requires 12 credits of core coursework, 12 credits of second language education coursework, and 6 credits of electives for a total of 30 credits.

**Core Coursework (12 credits)**
CI 5186 should be taken for 3 credits.
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5177 - Practical Research (1.0 - 3.0 cr)
- CI 5186 - School-Related Projects (1.0 - 4.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)

**SLE Requirements (12 credits)**
- CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
- CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
- CI 5662 - Second Language Curriculum Design (3.0 cr)
- CI 5642 - Assessing English Learners (3.0 cr)
  - or CI 5658 - Foreign Language Testing and Assessment (3.0 cr)

**Electives (6 credits)**
Courses will be selected in consultation with faculty advisor.

**Second Language Pedagogy**
This sub-plan is limited to students completing the program under Plan C.

The MEd/professional studies program in second language pedagogy is designed for practicing K-16 world language or English as a second language (ESL) teachers with an interest in enhancing their pedagogical knowledge and skills. Program participants have the option to add a 12 credit certificate in advanced practices in second language teaching, which requires a separate application. This coursework-only program is offered in conjunction with the summer institute program offered through the University’s Center for Advanced Research on Language Acquisition (CARLA).

Key topics include second language acquisition; the foundations of second language pedagogy and education; using technology to enhance language instruction; content-based curriculum development; performance assessment and issues in language testing; strategies to enhance second language literacy development and the teaching of speaking and listening skills; and integrating culture in language teaching.

The MEd/professional studies second language pedagogy sub-plan requires 21 credits of second language pedagogy coursework, and 9 credits of electives for a total of 30 credits.

**Second Language Pedagogy Requirements (21 credits)**
- LGTT 5110 - Technology in the Second Language Classroom (2.0 cr)
- CI 5621 - Culture as the Core in the Second Language Classroom (2.0 cr)
- CI 5622 - Growing Learner Language: A Hands-On Approach to Developing the Language Learners Produce (2.0 cr)
- CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
- CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
- CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
- CI 5662 - Second Language Curriculum Design (3.0 cr)
- CI 5642 - Assessing English Learners (3.0 cr)
  - or CI 5658 - Foreign Language Testing and Assessment (3.0 cr)

**Electives (9 credits)**
Take 9 or more credit(s) from the following:
- CI 5608 - CARLA Summer Institute Seminar (1.0 - 4.0 cr)
- CI 5623 - Improving Language Learning: A Practical Course in Styles- and Strategies-based Instruction (2.0 cr)
- CI 5624 - Content-based Language Instruction and Curriculum Development (2.0 cr)
- CI 5626 - Developing Assessments for the Second Language Classroom (2.0 cr)
- CI 5641 - Language, Culture, and Education (3.0 cr)

Email: olpd@umn.edu
Website: http://www.cehd.umn.edu/olpd

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Disability Policy and Services PBacc Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in disability policy and services is designed to allow graduate as well as community professionals, to study policies and services that affect the lives of children, youth, and adults with disabilities. The 12-credit program surveys the spectrum of education, health, and social services available to individuals with disabilities and their families, and examines the public and private networks of disability services from an interdisciplinary perspective. While the program addresses the needs of people with all types of disabilities, it emphasizes developmental disabilities across the lifespan. The program’s individualized learning experience (ILE) requires students to integrate theory with practice by completing a disability-related research project or working directly with people with disabilities in settings such as schools, recreation centers, or human-service agencies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.50.

Other requirements to be completed before admission:
Applicants must have completed an undergraduate degree by the time they start the program. Students must have completed a four-year college degree or equivalent coursework. Applications are reviewed on a rolling basis and may be submitted at any time.

Special Application Requirements:
Please address the following five questions below. Please answer each question listed and limit your response to 2 typed or word-processed pages, size-12 font. Upload your responses to the ApplyYourself online application in the “Program Specific Questions” upload area.

- What are your major areas of interest in the field of disability services or related to individuals with disabilities?
- What have been your past experiences in the area of disability services or related to individuals with disabilities?
- What is your current involvement in the field of disability services or related to individuals with disabilities?
- What is your anticipated or desired career interest?
- Why are you interested in the Disability Policy and Services Certificate Program?

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
A minimum GPA of 2.80 is required for students to remain in good standing.

In addition to coursework, students must participate in at least six, one-hour interdisciplinary reflection groups to discuss relevant topics and ways to integrate field experiences with coursework. Reflection groups are offered throughout the year, including the summer session.

**Required Course**
OLPD 5356 - Disability Policy and Services (3.0 cr)

**Specialized Coursework**
This component broadens the student's level of knowledge in disability policies and services. Students must choose from courses offered across the University focusing on disability policy, disability services, and/or interdisciplinary teaming, such as communication disorders, family social science, kinesiology, nursing, public affairs, or social work. The ICI Certificate Coordinator can provide students with a list of acceptable courses meeting this requirement.
6 cr to be taken with approval from the ICI Certificate Coordinator

**Individualized learning experience & Interdisciplinary reflection groups**
This component allows students to integrate and apply the information they have learned in coursework. Students work with the ICI Certf Coord to design an individualized learning experience (ILE) in which they work with persons who have disabilities in settings like schools, recreation centers, health clinics, or human-service agencies. The ILE can be completed in one or two semesters, but must total at least 3 cr and at least 200 hours. The 3 cr to be taken with approval from the ICI Certf Coord

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Dual Language Immersion Education PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This graduate-level certificate program gives students an opportunity to complete a coordinated series of courses in the area of dual language and immersion education. The program does not lead to a state teaching certificate or licensure (note that a university certificate program or certificate is distinct from a state certificate or certification).

In Minnesota and other states in the U.S., dual language/immersion teachers at the elementary level are required to hold a teaching license in elementary education, and at the secondary level a license in the subject matter they teach (e.g., science, social studies, math). The University of Minnesota offers initial teacher licensure programs for individuals not yet licensed, and additional teacher licensure programs for those individuals who already hold a MN teaching license and wish to add another.

The dual language and immersion education certificate program is designed for preK-12 teachers and other professionals to be able to work effectively in the following school-based program models:
- "One-way" foreign language immersion programs designed for native English-speaking students
- "Two-way" bilingual immersion programs designed for native English-speaking students and native speakers of the program's partner language, such as Spanish
- Developmental bilingual programs designed for minority language learners, such as native Spanish speakers
- Indigenous language immersion programs designed for Native American children in indigenous communities with the goal of revitalizing an endangered language and culture

In dual language and immersion programs, the second/foreign/minority language that students are acquiring is a vehicle to teach school subjects. In order to be considered a dual language or immersion program, the immersion language must be used for at least 50 percent of subject-matter instruction during the elementary school years. In a middle/secondary continuation program, at least two, year-long content courses must be taught in the immersion language.

These programs aim for "additive bilingualism and biliteracy," or the acquisition of another language at no expense to the first, native language. Research shows that well-implemented programs allow students to develop higher levels of language proficiency in the immersion language than in any other type of language program model.

This unique University certificate program is the first in the U.S. to incorporate a coherent set of courses designed specifically for dual language and immersion teachers, and other professionals. Offered by the college's Department of Curriculum and Instruction (C&I), the program was designed jointly by the college's Second Languages and Cultures (SLC) education faculty, and representatives of dual language and immersion programs in the Twin Cities metropolitan area.

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.
A completed bachelor’s degree is required for admission.

Students currently enrolled in a University of Minnesota graduate-level degree program may also apply.

Other requirements to be completed before admission:
Applications should either be currently practicing as dual language or immersion educators, or provide evidence of the necessary background and interest (based on a goal statement).

This certificate program is available to graduate-level students only. Coursework taken before completion of the bachelor's degree cannot be applied to the certificate program.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a goal statement (only if applicant is not a practicing dual language or immersion educator). Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Core Courses (9 credits)**
- CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
- CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
- CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)

**Elective Courses (6 credits)**
6 credits required with recommended courses listed. Other courses may be selected in consultation with the faculty advisor.
- CI 5648 - Advanced Practices in Teaching Academic Language (3.0 cr)
- CI 5676 - Biliteracy Development in Dual Language/Immersion Classrooms (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 57 to 61
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The early childhood education initial licensure/master's of education (MEd) program is offered through the Institute of Child Development in collaboration with the department of Curriculum and Instruction. The program is designed to prepare outstanding teachers of young children who will have a strong foundation in child development theory and research and developmentally appropriate methodology for educating the different ages within the early childhood years (birth to age 8). Clinical experiences in the Shirley G. Moore Laboratory School and in local urban/suburban public schools create a strong experiential base in which to apply the principles and methods learned in University courses. Emphasis is placed on understanding individual learners, working with diverse learners, using a variety of instructional strategies, providing inclusive programming for children with and without special needs, working closely with families, and creating positive classroom communities. The program includes preparation in developing and implementing professional writing and curriculum planning, authentic assessment, documentation of student learning, reflective practice, professional development, and ethics.

Master's of education/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and the MN Early Childhood Indicators of Progress adopted by the Minnesota Board of Teaching.

The 52 to 56 credit program includes major coursework, early childhood and elementary methods courses, student teaching experiences in both early childhood and elementary education, and a masters capstone project. This program includes coursework to satisfy both initial licensure requirements and the MEd degree. Upon completion of all requirements, students are eligible for recommendation for teacher licensure in early childhood education (birth to third grade). Teacher licensure is awarded through the Minnesota Department of Education. Students have five years from initial enrollment in the program to complete their MEd degree and must maintain a 2.80 GPA to be eligible for the MEd.

A 30 to 32 credit advanced standing plan is available for students who completed the University of Minnesota-Twin cities BS in early childhood education: foundations degree. Students in the advanced standing plan complete the MEd in two semesters.

Accreditation
This program is accredited by Council for the Accreditation of Educator Preparation (CAEP)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree must be completed at the time of matriculation.

Required prerequisites
Prerequisite Coursework
Prerequisite coursework is required to meet the Standards of Effective Practice for Teachers (SEPT) and the MN Early Childhood Indicators of Progress adopted by the Minnesota Board of Teaching. Prerequisites may be completed after admission to the program.

CPSY 2301 - Introduction to Child Psychology [SOCS] (4.0 cr)
CPSY 4331 - Social and Personality Development (3.0 cr)
CPSY 4343 - Cognitive Development (3.0 cr)

OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
CI 3610 - Linguistics for Teachers [SOCS] (3.0 cr)
  or LING 3001 - Introduction to Linguistics [SOCS] (4.0 cr)
  or ENGL 3601 - Analysis of the English Language (4.0 cr)
PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
  or PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Other requirements to be completed before admission:
Applicants are strongly encouraged to obtain paid or unpaid classroom experience with young children, ages birth to third grade, with multicultural and diverse populations.

Students with an undergraduate degree other than the University of Minnesota-Twin Cities BS in early childhood education: foundations are eligible to apply with the understanding that they will take approximately 30 additional credits of prerequisite coursework to meet state licensure standards.

Special Application Requirements:
Applicants who have completed the Early Childhood: Foundations degree through the University of Minnesota apply for admission to fall terms.

Applicants who have not completed their bachelors degrees at the University of Minnesota are eligible to apply for a start term in the spring, summer, or fall.

All applicants must submit the following five required application materials through the online application system:

1. Transcripts - Unofficial transcripts or academic records should be uploaded directly to the online application. International students should also upload an English translation if the transcript is not in English. Please do not mail in paper copies of your transcripts. There is no need for official transcripts or academic records for initial review. If you are admitted, the University will then request official copies of this material.

2. Resume

3. Essay

4. Two Letters of Recommendation - These letters should be written by someone who is knowledgeable about your education-related experiences, work with young children, work style, and personal attributes.

5. Application fee - This fee is charged when you submit your application and is required for each application you submit. Fees must be paid online with a credit card.

Nonnative English speakers and/or international students should also submit an official score report from the Test of English as a Foreign Language (TOEFL).

All applicants must take the Minnesota Teacher Licensure Exam [Reading (test code 001), Writing (test code 002), and Mathematics (test code 003)] prior to beginning the program, or have qualifying ACT/SAT scores.

See full application instructions and deadlines at: http://www.cehd.umn.edu/icd/futurestudents/ece/graduate/

Applicants must submit their test score(s) from the following:
- Minnesota Teacher Licensure Exam
- MTLE Basic Skills Tests

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C**: Plan C requires 57 to 61 major credits and up to null credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Early Childhood Education**

MEd required coursework

**Major Courses**

- CPSY 5251W - Social and Philosophical Foundations of Early Childhood Education [WI] (3.0 cr)
- EPSY 5001 - Learning, Cognition, and Assessment (3.0 cr)
- EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)
- EPSY 5681 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)

**CPSY Methods Courses**

- CPSY 5252 - Facilitating Social and Emotional Learning in Early Childhood Education (3.0 cr)
- CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
- CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)

**CI Methods Courses**

- CI 5425 - Reading Instruction in the Elementary Grades (3.0 cr)
- CI 5426 - Language Arts Instruction in the Elementary Grades (3.0 cr)
- CI 5502 - Social Studies Instruction in the Elementary Grades (3.0 cr)
- CI 5645 - Teaching English Learners in the Elementary Classroom (3.0 cr)
- CI 5645 - Teaching English Learners in the Elementary Classroom (3.0 cr)
- CI 5646 - Teaching English Learners in the Elementary Classroom (3.0 cr)
- CI 5647 - Teaching English Learners in the Elementary Classroom (3.0 cr)
- CI 5822 - Mathematics Instruction in the Elementary Grades (3.0 cr)

Take exactly 2 credit(s) from the following:

- CPSY 5171 - Practicum: Applying Instructional Methods in the Elementary School (2.0 cr)

**Student Teaching**

Take exactly 10 credit(s) from the following:

- CPSY 5181 - Clinical Experience in Elementary School Teaching (10.0 cr)

Take 6 - 8 credit(s) from the following:

- CPSY 5281 - Student Teaching in Early Childhood Education (6.0 - 8.0 cr)

**MEd Completion**

- CPSY 5187 - Capstone Project: Improvement of Teaching in Early Childhood Education (2.0 - 4.0 cr)

**Early Childhood Education - U of MN BS in ECE:F Degree Transitioners**

MEd required coursework

**CI Methods Courses**

- CI 5425 - Reading Instruction in the Elementary Grades (3.0 cr)
- CI 5426 - Language Arts Instruction in the Elementary Grades (3.0 cr)
- CI 5502 - Science Instruction in the Elementary Grades (3.0 cr)
- CI 5645 - Teaching English Learners in the Elementary Classroom (3.0 cr)
- CI 5702 - Social Studies Instruction in the Elementary Grades (3.0 cr)
- CI 5822 - Mathematics Instruction in the Elementary Grades (3.0 cr)

**Student Teaching**

Take exactly 10 credit(s) from the following:

- CPSY 5181 - Clinical Experience in Elementary School Teaching (10.0 cr)

**MEd Completion**

- CPSY 5187 - Capstone Project: Improvement of Teaching in Early Childhood Education (2.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 41
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By focusing on the curricular and instructional processes central to all educational endeavors, graduate programs within the Department of Curriculum and Instruction prepare students for professional roles in K-12 education, postsecondary and research settings, educational service agencies, and business and industry.

The MA degree includes formal tracks in arts in education; elementary education; learning technologies; literacy education; mathematics education; science education; second language education; social studies education; and teaching English to speakers of other languages.

Students must have an interest in research in education or a related field; students plan a program of coursework that prepares them to conduct scholarly research in an area of expertise related to a track or tracks listed above.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Generally a bachelor's degree with licensure and/or teaching experience fulfills the requirement. For some areas, however, there is no equivalent undergraduate program. In that case, 15 to 20 credits of undergraduate coursework determined acceptable by advisors and the director of graduate studies is adequate.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the GRE, scores from the TOEFL/IELTS/MELAB (if applicable), three letters of recommendation from individuals familiar with their scholarship and research potential, a resume, a clearly written statement of career interests, goals, and objectives, and a diversity statement. Some program tracks require an example of academic writing. Master's applications are reviewed by department faculty once per academic year, with December 1 as the deadline.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 15 to 25 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 to 25 major credits and 6 to 9 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: All MA students must demonstrate familiarity with the tools of research or scholarship in their major track, the ability to work independently, and the ability to present their work effectively.

Plan B paper(s) are less formal than the Plan A thesis and may build more directly from coursework; papers should involve deep engagement of the research literature. A paper done for a course may serve as one of the Plan B papers, with the understanding that it would be extended and revised under the advisor's supervision.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: For TESOL track only

A minimum GPA of 3.00 is required for students to remain in good standing.

In education, curriculum & instruction, students may pursue Plan A (with thesis) or Plan B (with one or two papers). Core and research course requirements are specified for Plan A and Plan B in accord with each track and are chosen in consultation with the advisor.

Plan A requires 15-26 credits in the major, depending upon the formal track chosen, and a minimum of 6 credits in one or more related fields outside the major. Plan A also requires 10 thesis credits.

Plan B requires 24-26 credits in the major and 6-9 credits in one or more related fields outside the major, depending upon formal track chosen.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Arts in Education

The MA program's arts in education track presents opportunities for students with experience in schools or other educational settings to develop their ability to work at the intersection of theory and practice. Gaining the knowledge and skills necessary to be reflective and well-informed art educators, graduates become educational leaders in many contexts—school districts, museums, community arts organizations, government agencies—or often pursue further graduate study. Students are encouraged to take courses both across the College of Education and Human Development and the University at large and typically fulfill program requirements by exploring issues of teaching, learning, curriculum, teacher education, and school reform in urban and suburban schools, several renowned art museums in the greater Minneapolis area, and within the initial teacher licensure program at the University. The course of study is planned in consultation with the adviser to meet the academic interests and background of the students; those needs are balanced with the expected foundations in research and scholarship. Independent scholarship is encouraged and typically comes in the form of a final project (Plan B) or a more formal thesis (Plan A).

Program faculty exhibit a strong commitment to curriculum innovation, issues of social justice and diversity, and life-long aesthetic and
The arts in education track (Plan A) requires 13 credits of required major coursework plus an additional 2 credits of coursework to be selected in consultation with faculty advisor, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The arts in education track (Plan B) requires 7 credits of required major coursework plus an additional 11 credits of coursework selected in consultation with faculty advisor, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

**Plan A or Plan B**

**Arts in Ed - Plan A**

Total: 31 credits

**Major Coursework**

- Required courses are listed; others selected in consultation with faculty advisor for a total of 15 credits
  - CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
  - CI 8075 - Seminar: Art Education (2.0 cr)
  - CI 8079 - Research in Art Education (3.0 cr)
  - CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
  - CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

**Minor or Related Field**

Selected in consultation with faculty advisor for a total of 6 credits

**Thesis Credits**

A minimum of 10 credits are required
  - CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Arts in Ed - Plan B**

Total: 30 credits

**Major Coursework**

- Required courses are listed; others selected in consultation with faculty advisor for a total of 18 credits
  - CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
  - CI 8075 - Seminar: Art Education (2.0 cr)
  - CI 8079 - Research in Art Education (3.0 cr)

**Research Coursework**

- CI 8095 is required and should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 6 credits
  - CI 8095 - Problems: Art Education (1.0 - 12.0 cr)

**Minor or Related Field**

Selected in consultation with faculty advisor for a total of 6 credits

**Elementary Education**

The MA program's elementary education track is designed to help professionals acquire and contribute to the advancement of knowledge and leadership so necessary to address the dynamic challenges of contemporary education at the elementary level. Emphasized within the track are, for example, the following: a focus on interdisciplinary approaches to curriculum development, the use of inquiry as a key pedagogical approach, the importance of a strong understanding of diversity and its social and educational implications, and child development and learning theories as the foundation for research and teaching elementary settings.

The elementary education track (Plan A) requires 6 credits of required major coursework plus an additional 9 credits of coursework to be selected in consultation with faculty advisor, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The elementary education track (Plan B) requires 18 credits of coursework selected in consultation with faculty advisor, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

**Plan A or Plan B**

**Elem Ed - Plan A**

Total: 31 credits

**Major Coursework**

- Required courses are listed; others selected in consultation with faculty advisor for a total of 15 credits
  - CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
  - CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

**Minor or Related Field**

Selected in consultation with faculty advisor for a total of 6 credits

Information current as of August 31, 2018
Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Elem Ed - Plan B
Total: 36 credits
Major Coursework
Courses will be selected in consultation with faculty advisor for a total of 18 credits
Research Coursework
CI 8195 (Plan B paper) should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 6 credits
CI 8195 - Problems: Improvement of Instruction (1.0 - 6.0 cr)
Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits

Learning Technologies
The learning technologies (LT) MA track prepares people for research and practice related to multimedia, design, K-12 technology integration, and online distance learning. MA graduates often conduct research and engage in LT-related practice in K-12, higher education, or business or industry, such as software companies. LT coursework includes hands-on learning and use of current technologies, development of technological solutions, consideration of theory and research, and conducting educational research.

The MA's LT track is targeted at students interested in a stronger research orientation than those who pursue the master of education degree. MA students, who often continue to a PhD program, are required to take courses in research methodology and to write a Plan A thesis or Plan B paper to complete their degree. Master's degrees extend the content in the certificate programs and include various courses taken from inside and outside the program. Students may engage in advanced media and software design and development or develop plans for technology integration for diverse educational settings.

The learning technologies track (Plan A) requires 9 credits of required major coursework plus an additional 9 credits of coursework to be selected in consultation with faculty advisor, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 34 credits.

The learning technologies track (Plan B) requires 6 credits of required major coursework plus an additional 12 credits of coursework to be selected in consultation with faculty advisor, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

LT - Plan A
Total: 34 credits
Major Coursework
Required courses are listed; others selected in consultation with faculty advisor for a total of 18 credits
CI 5331 - Introduction to Learning Technologies (3.0 cr)
CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)
Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits
Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

LT - Plan B
Total: 30 credits
Major Coursework
18 credits are required; 6 credits of required courses are listed. Recommend 12 remaining credits be taken in a technology certificate area.
CI 5331 - Introduction to Learning Technologies (3.0 cr)
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
Research Coursework
CI 8395 is required and should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 6 credits
CI 8395 - Directed Study: Learning Technologies (1.0 - 6.0 cr)
Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits
Literacy Education
The MA program's literacy track is thoughtfully designed to balance theory with practical application in a variety of educational settings. There is a deep foundation in evaluating current research and students are encouraged to contribute meaningfully to research in the field of literacy. Faculty members and students work together to study at the intersection of the strands of literacy: children's and adolescent literature, critical literacies, English education, language arts, and reading. Literacy research related to diverse learners in urban, multilingual settings is a central focus of the program. The course of study is planned in consultation with the adviser to meet the academic interests and background of the students; those needs are balanced with the expected foundations in research and scholarship. Independent scholarship is encouraged and typically comes in the form of a final project (Plan B) or a more formal thesis (Plan A).

The literacy education track (Plan A) requires 6 credits of required major coursework plus an additional 9 credits of coursework to be selected in consultation with faculty advisor, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The literacy education track (Plan B) requires 18 credits of coursework selected in consultation with faculty advisor, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Lit Ed - Plan A
Total: 31 credits

Major Coursework
- Required courses are listed; others selected in consultation with faculty advisor for a total of 15 credits. At least one course must be a Literacy Education seminar.
  - CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
  - CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

Minor or Related Field
- Selected in consultation with faculty advisor for a total of 6 credits

Thesis Credits
- A minimum of 10 credits are required
  - CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Lit Ed - Plan B
Total: 30 credits

Major Coursework
- Courses will be selected in consultation with faculty advisor for a total of 18 credits. At least one course must be a Literacy Education seminar.

Research Coursework
- CI 8495 is required and should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 6 credits
  - CI 8495 - Problems: Teaching English and Reading (1.0 - 6.0 cr)

Minor or Related Field
- Selected in consultation with faculty advisor for a total of 6 credits

Mathematics Education
The MA program's mathematics education track prepares students for research and practice related to K-12 mathematics and engineering education. The MA is targeted at students interested in a stronger research orientation than those who pursue the master of education (MEd) degree. MA students, who often continue on to a PhD program, are required to take courses in research methodology and to write a Plan A or Plan B paper to complete their degree. Graduate students participate in this work as teaching assistants, research assistants in externally funded projects, and as instructors.

The mathematics education track (Plan A) requires 15 credits of required major coursework, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The mathematics education track (Plan B) requires 15 credits of coursework selected in consultation with faculty advisor, 6 credits of required research coursework plus an additional 3 credits of research coursework selected in consultation with faculty advisor, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Math Ed - Plan A
Total: 31 credits
Major Coursework

Required courses are listed:

- CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
- CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)
- CI 8572 - Learning Theory and Classical Research in STEM Education (3.0 cr)
- MTHE 8571 - Research in Mathematics Education (3.0 cr)

Major Coursework - Additional Choice

Choose any one of the following for a total of 3 credits. Any variable credit course should be taken for 3 credits.

- MTHE 5155 - Rational Number Concepts and Proportionality (3.0 cr)
- or MTHE 5171 - Teaching Problem Solving (3.0 cr)
- or MTHE 5172 - Teaching Probability and Statistics (3.0 cr)
- or MTHE 5366 - Technology-Assisted Mathematics Instruction (3.0 cr)
- or MTHE 8591 - Seminar: Mathematics Education (1.0 - 3.0 cr)

Minor or Related Field

Selected in consultation with faculty advisor for a total of 6 credits.

Thesis Credits

A minimum of 10 credits are required

- CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Math Ed - Plan B

Total: 30 credits

Major Coursework

Selected in consultation with faculty advisor for a total of 15 credits.

Research Coursework

Required courses are listed and MTHE 8995 should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 9 credits.

- MTHE 8571 - Research in Mathematics Education (3.0 cr)
- MTHE 8995 - Problems: Mathematics Education (1.0 - 6.0 cr)

Minor or Related Field

Selected in consultation with faculty advisor for a total of 6 credits.

Science Education

The MA program's science education track is designed to prepare scholars to conduct thoughtful research in order to assume roles as university faculty members, educational leaders, policy makers, and researchers and to contribute meaningfully to the field. The field of science education is a broad one and includes science and environmental education at the K-12 levels, the college level, in informal and adult settings, and in early childhood. Focus areas of research within the science education area are the preparation of pre-service science teachers (K-12), induction and mentoring of beginning science teachers, design and implementation of curricula across the K-college spectrum, environmental education, cooperative learning, and social justice.

The science education track (Plan A) requires 15 credits of required major coursework, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The science education track (Plan B) requires 15 credits of required major coursework plus an additional 3 credits of coursework to be selected in consultation with faculty advisor, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Sci Ed - Plan A

Total: 31 credits

Major Coursework

Required courses are listed; CI 8570 should be taken for 3 credits.

- CI 5535 - Foundations of Science Education (3.0 cr)
- CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
- CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)
- CI 8570 - Advanced Topics in Science Education (1.0 - 4.0 cr)
- CI 8571 - Equity, Policy, and Social Justice in Science Education (3.0 cr)

Minor or Related Field

Selected in consultation with faculty advisor for a total of 6 credits.

Thesis Credits

A minimum of 10 credits are required

- CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Sci Ed - Plan B
Total: 30 credits

Major Coursework
Required courses are listed; others selected in consultation with faculty advisor for a total of 18 credits. CI 8570 should be taken twice for a total of 6 credits.
- CI 5534 - Studies in Science Education (3.0 cr)
- CI 5535 - Foundations of Science Education (3.0 cr)
- CI 8570 - Advanced Topics in Science Education (1.0 - 4.0 cr)
- CI 8571 - Equity, Policy, and Social Justice in Science Education (3.0 cr)

Research Coursework
CI 8595 is required and should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 6 credits
- CI 8595 - Problems: Science Education (1.0 - 6.0 cr)

Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits

Second Language Education
The second language education (SLE) track is nationally and internationally known for its programs, which focus on English as a second language (ESL) for K-12, postsecondary, and adult classrooms; bilingual and immersion education; and traditional foreign language education in both K-12 and postsecondary settings. The program’s perspective on language learning and teaching is markedly pedagogical and informed by an awareness of the role social context plays in the process of language learning and teaching. Master's students in the SLE track engage in coursework and projects that balance theory and research with practical application. Students pursue a course of study that is designed in collaboration with the faculty adviser to correspond to the interests and background of each student and to provide a solid understanding of research and best practice in the field. Independent scholarship is encouraged and typically comes in the form of a final project (Plan B) or a more formal thesis (Plan A).

The second language education track (Plan A) requires 18 credits of required major coursework, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 34 credits.

The second language education track (Plan B) requires 15 credits of major coursework, 9 credits of foundational and research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

SLE - Plan A
Total: 34 credits

Major Coursework
- CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
- CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)
- CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
  or CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
If taking CI 8650, student should register for 3 credits
- CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
  or CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)
  or CI 8689 - Language and Education Policy (3.0 cr)
  or CI 8650 - Seminar: Special Topics in Second Languages and Cultures Research (1.0 - 3.0 cr)
Take exactly 2 course(s) totaling exactly 6 credit(s) from the following:
  - CI 5628 - Analyzing Learner Language in Second Language Acquisition (3.0 cr)
  - CI 5662 - Second Language Curriculum Design (3.0 cr)
    or CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
  - CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
    or CI 5542 - Assessing English Learners (3.0 cr)
  - CI 5565 - Teaching Literacy in Second Language Classrooms (3.0 cr)
    or CI 5676 - Biliteracy Development in Dual Language/Immersion Classrooms (3.0 cr)
  - CI 5567 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
    or CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)

Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits

Thesis Credits
A minimum of 10 credits are required
- CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
SLE - Plan B
Total: 30 credits

Major Coursework
Take exactly 15 credit(s) from the following:
• CI 5628 - Analyzing Learner Language in Second Language Acquisition (3.0 cr)
• CI 5648 - Advanced Practices in Teaching Academic Language (3.0 cr)
• CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
• CI 5641 - Language, Culture, and Education (3.0 cr)
• CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
  *or CI 5676 - Biliteracy Development in Dual Language/Immersion Classrooms (3.0 cr)
• CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
  *or CI 5641 - Language, Culture, and Education (3.0 cr)
• CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
  *or CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)
• CI 5662 - Second Language Curriculum Design (3.0 cr)
  *or CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
• CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
  *or CI 5642 - Assessing English Learners (3.0 cr)

Foundational & Research Coursework
Student should take the Plan B paper course - CI 8695 - for 3 credits
CI 8695 - Problems: Second Languages and Cultures Education (1.0 - 6.0 cr)
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
  *or CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
If student takes CI 5177, it should be taken for 3 credits
CI 5177 - Practical Research (1.0 - 3.0 cr)
  *or CI 5628 - Analyzing Learner Language in Second Language Acquisition (3.0 cr)
  *or EPSY 5261 - Introductory Statistical Methods (3.0 cr)

Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits

Social Studies Education
The MA's social studies education track focuses on issues related to curriculum, instruction and assessment in K-12 social studies. Graduate students are strongly encouraged to present research papers at professional conferences, specifically the National Council for the Social Studies and the American Educational Research Association.

Faculty maintain active research agendas with several research centers at the University including the Center for Applied Research and Educational Improvement, housed within the College of Education and Human Development, and two research centers housed outside the College: the Center for Environmental Learning and Leadership and the Center for the Study of Political Psychology. Social studies faculty research interests include the areas of political socialization, political tolerance, authentic assessment, citizenship and civics education, and democratic thought. In addition, faculty members engage in research centered on the history of curricula, multicultural and gender studies, and social justice.

The social studies education track (Plan A) requires 10 credits of required major coursework plus an additional 6 credits of coursework to be selected in consultation with faculty advisor, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 32 credits.

The social studies education track (Plan B) requires 18 credits of coursework to be selected in consultation with faculty advisor, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Soc Stud Ed - Plan A
Total: 32 credits

Major Coursework
Required courses are listed; others selected in consultation with faculty advisor for a total of 16 credits. CI 8796 has to be taken for a minimum of 1 credit.
CI 5762 - Developing Civic Discourse in the Social Studies (3.0 cr)
CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)
CI 8796 - Research Internship in Social Studies Education (1.0 - 6.0 cr)

Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits

Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Soc Stud Ed - Plan B
Total: 30 credits
Major Coursework
Courses are selected in consultation with faculty advisor for a total of 18 credits
Research Coursework
CI 8795 is required and should be taken for 3 credits; other courses selected in consultation with faculty advisor for a total of 6 credits
CI 8795 - Problems: Social Studies Education (1.0 - 6.0 cr)
Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits

Teaching English to Speakers of Other Languages
The teaching English to speakers of other languages (TESOL) track focuses on the broad field of applied linguistics uniting research, teaching and service in addressing the second language learning needs of adult learners in the university and the wider community, both in the US and abroad. Independent scholarship is encouraged and typically comes in the form of a final project (Plan B) or a more formal thesis (Plan A).

The teaching English to speakers of other languages (TESOL) track (Plan A) requires 25 credits of required major coursework, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 41 credits.

The teaching English to speakers of other languages (TESOL) track (Plan B) requires 25 credits of required major coursework, and 9 credits in a minor/related field for a total of 34 credits.

Plan A or Plan B

TESOL - Plan A
Total: 41 credits
Major Coursework
CI 5654 must be taken for 6 credits.
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
CI 5653 - Methods in Teaching English as a Second Language (ESL) in Higher Education (3.0 cr)
CI 5646 - English Grammar for ESL Teachers (3.0 cr)
CI 5649 - Language Analysis for ESL Teaching in Higher Ed (4.0 cr)
CI 5654 - Practicum in Language Teaching: ESL and World Languages (1.0 - 6.0 cr)
CI 5628 - Analyzing Learner Language in Second Language Acquisition (3.0 cr)
CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
CI 5654 - Practicum in Language Teaching: ESL and World Languages (1.0 - 6.0 cr)

or
CI 5642 - Assessing English Learners (3.0 cr)

Minor or Related Field
Selected in consultation with faculty advisor for a total of 6 credits
Thesis
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

TESOL - Plan B
Total: 34 credits
Major Coursework
CI 5654 must be taken for 6 credits.
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
CI 5653 - Methods in Teaching English as a Second Language (ESL) in Higher Education (3.0 cr)
CI 5646 - English Grammar for ESL Teachers (3.0 cr)
CI 5649 - Language Analysis for ESL Teaching in Higher Ed (4.0 cr)
CI 5654 - Practicum in Language Teaching: ESL and World Languages (1.0 - 6.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By focusing on the curricular and instructional processes central to all educational endeavors, graduate programs within the Department of Curriculum and Instruction prepare students for professional roles in preK-12 education, postsecondary and research settings, educational service agencies, and business and industry.

The minor in education, curriculum and instruction may include a focus in any one of the available tracks: art education; culture and teaching (at the doctoral level); elementary education; learning technologies; literacy education; mathematics education; science education; second language education; and social studies education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students must consult with the Director of Graduate Studies in the Department of Curriculum & Instruction regarding specific coursework and committee involvement for the minor. The Director of Graduate Studies gives final approval for the minor coursework submitted on the Graduate Degree Plan or Graduate Planning & Audit System (GPAS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
A minor at the master's level requires a minimum of 6 credits of CI-designated coursework selected in consultation with the director of graduate studies.

Doctoral
Doctoral (12 Credits)
CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

Electives (6 Credits)
Courses will be selected in consultation with the director of graduate studies.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 75
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By focusing on the curricular and instructional processes central to all educational endeavors, graduate programs within the Department of Curriculum and Instruction prepare students for academic and professional roles in K-12 education, post-secondary education, research settings, educational service agencies, and business and industry.

The PhD degree includes formal tracks in the following: arts in education; culture and teaching; elementary education; learning technologies; literacy education; science, technology, engineering and mathematics (stem) education; second language education; and social studies education.

Students must have an interest in research in education or a related field; students plan a program of coursework that prepares them to conduct scholarly research in an area of expertise related to a track listed above.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A master's degree is preferred for admission to some of the tracks within the PhD program, but it is not always required.

Other requirements to be completed before admission:
Generally a bachelor's degree with licensure and/or teaching experience fulfills the requirement. For some areas, however, there is no equivalent undergraduate program. In that case, 15 to 20 credits of undergraduate coursework determined acceptable by faculty is adequate.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the GRE, scores from the TOEFL/IELTS/MELAB (if applicable), three letters of recommendation from individuals familiar with their scholarship and research potential, a clearly written statement of career interests, goals, and objectives, a diversity statement, and a resume. Some program tracks require an example of academic writing. Doctoral applications are reviewed by department faculty once per academic year.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

39 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

A total of 75 credits is required for the education, curriculum and instruction PhD program. Requirements include core coursework required by all students, major coursework in the student's selected track, research methodology coursework, and a minimum of 12 credits in a minor or supporting program. All PhD students must also complete 24 doctoral thesis credits. Specific courses and additional work vary depending upon the track and are planned in consultation with the faculty advisor.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Arts in Education

The PhD program's arts in education track presents opportunities for students with experience in schools or other informal educational settings to develop necessary philosophical, theoretical, and methodological competence to make scholarly contributions to the field. Working as researchers, scholars, policy makers, and practitioners, graduates become educational leaders in universities, colleges, K-12 school districts, museums, community arts organizations, and government agencies.

Students typically carry out dissertation inquiry in local urban and suburban schools, several renowned art museums in the Minneapolis-St. Paul area, and within the initial teacher licensure program at the University. Both qualitative and quantitative research methods have guided PhD candidates’ inquiry on the following: rightness of aesthetic-based problem solving, design thinking, and media arts theory and practice in arts classrooms; teaching critical literacy in and through the arts; innovation in culture-based arts education; and other knowledge building questions specific to art teacher development and retention.

Faculty and students are committed to understanding equity and social justice in both research and teaching. Graduate students often work closely with faculty in the development, implementation, and evaluation of national, state, and local arts education initiatives.

Arts in education students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student's faculty advisor. 24 doctoral thesis credits are also required.

Core Coursework

- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

Major Coursework

Required courses are listed; others selected in consultation with faculty advisor for a total of 15 credits. CI 8085 is a required course as well, though it may be taken as either a major requirement course or as a research elective course.

- CI 5075 - The Social, Historical and Cultural Foundations of Arts Education (3.0 cr)
- CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
- CI 8075 - Seminar: Art Education (2.0 cr)
CI 8079 - Research in Art Education (3.0 cr)

**Research Coursework**
CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

**Research Electives**
9 additional credits to be selected based upon student's research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.

Take 9 or more credit(s) from the following:
- CI 8085 - Narrative Inquiry in Education (3.0 cr)
- CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
- CI 8146 - Critical Ethnography in Education (3.0 cr)
- CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
- CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
- CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
- CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
- CI 8157 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)
- CI 8371 - Applied Social Network Analysis in Education (3.0 cr)
- CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
- CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)
- CI 8699 - Language and Education Policy (3.0 cr)
- CI 8913 - Interpretive Research (3.0 cr)
- OLPD 5056 - Case Studies for Policy Research (3.0 cr)
- OLPD 5061 - Ethnographic Research Methods (3.0 cr)
- OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
- OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
- EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
- EPSY 8224 - Performance Assessment Design and Analysis (3.0 cr)
- EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
- EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8265 - Factor Analysis (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- AMST 8289 - Ethnographic Research Methods: Research Strategies in American Studies (3.0 cr)
- ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
- LING 5462 - Field Research in Spoken Language (3.0 cr)

**Minor or Supporting Program**
12 credits outside the track, selected in consultation with faculty advisor

**Elective**
3 credits selected in consultation with faculty advisor

**Culture and Teaching**
The culture and teaching (CaT) track engages the study of education as a cultural phenomenon. Students in CaT study a range of educational processes that take place both in and beyond the borders of schools, and explore alternative epistemologies and pedagogies. Faculty and students are dedicated to seeking better understandings of issues pertaining to equity and social justice in both research and teaching. The track is interdisciplinary and collaborative, so students' work will encompass many different approaches, methods, and perspectives.

Some of CaT's courses focus on the ways in which teachers are prepared to teach; engage in ongoing professional development; and develop their own personal and professional identities within collegial communities. Other courses examine the salience of understanding white racial identity for pedagogy and social change; as well as the implications of globalization and immigration for teaching, learning, and curriculum. Still other courses explore popular culture and media in relation to contemporary critical theory and teaching practices. "Culture" in CaT includes thinking about "high" and "popular" cultures, the cultures of teaching and the cultures of learning, and how our responses to all influence and are influenced by everyday meanings and practices.

CaT students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student's faculty advisor.
advisor. 24 doctoral thesis credits are also required.

**Core Coursework**
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

**Major Coursework**
15 credits total, with 9 credits selected in consultation with faculty advisor. CI 8159 will be taken twice for a total of 6 credits.
- CI 8159 - Culture and Teaching Colloquium (3.0 cr)

**Research Coursework**
- CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
- CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

**Research Electives**
9 additional credits to be selected based upon student’s research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.
- Take 9 or more credits from the following:
  - CI 8003 - Narrative Inquiry in Education (3.0 cr)
  - CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
  - CI 8146 - Critical Ethnography in Education (3.0 cr)
  - CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
  - CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
  - CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
  - CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
  - CI 8165 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)
  - CI 8371 - Applied Social Network Analysis in Education (3.0 cr)
  - CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
  - CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)
  - CI 8689 - Language and Education Policy (3.0 cr)
  - CI 8913 - Interpretive Research (3.0 cr)
- OLPD 5056 - Case Studies for Policy Research (3.0 cr)
- OLPD 5061 - Ethnographic Research Methods (3.0 cr)
- OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
- OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
- EPSY 8222 - Performance Assessment Design and Analysis (3.0 cr)
- EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
- EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8265 - Factor Analysis (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- AMST 8289 - Ethnographic Research Methods: Research Strategies in American Studies (3.0 cr)
- ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
- LING 5462 - Field Research in Spoken Language (3.0 cr)

**Minor or Supporting Program**
12 credits outside the track, selected in consultation with faculty advisor

**Elective**
3 credits selected in consultation with faculty advisor

**Elementary Education**
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

The PhD program's elementary education track is designed to help professionals acquire and contribute to the advancement of knowledge and leadership necessary to address the dynamic challenges of contemporary education at the elementary level. Emphasized within the track are, for example, the following: a focus on interdisciplinary approaches to curriculum development, the use of inquiry as a key pedagogical approach, the importance of a strong understanding of diversity and its social and educational implications, and child development and learning theories as the foundation for research and teaching in elementary settings.
Elementary students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student's faculty advisor. 24 doctoral thesis credits are also required.

Core Coursework
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

Major Coursework
15 credits selected in consultation with faculty advisor

Research Coursework
- CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
- CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

Research Electives
9 additional credits to be selected based upon student's research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.
Take 9 or more credit(s) from the following:
- CI 8085 - Narrative Inquiry in Education (3.0 cr)
- CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
- CI 8146 - Critical Ethnography in Education (3.0 cr)
- CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
- CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
- CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
- CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
- CI 8165 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)

Minor or Supporting Program
12 credits outside the track, selected in consultation with faculty advisor

Elective
3 credits selected in consultation with faculty advisor

Learning Technologies
The PhD's learning technologies (LT) track prepares students for research and practice related to multimedia, design, K-12 technology integration, and online distance learning. PhD graduates often earn academic positions in higher education or become directors and leaders of development or research within business and industry. Coursework in LT includes hands-on learning and use of current technologies, development of technological solutions, research methods, and theory of curriculum, instruction, and learning.

The PhD degree is targeted primarily at students interested in pursuing research careers. Student research, culminating in a dissertation, typically evaluates various learning technologies issues and interventions. Common areas of study include conditions
affecting educational technology use in schools, higher education, and business settings, and tend to focus on psychological, sociological, and philosophical factors. For example, recent graduates have studied the impact of technology on learning and cognition, variables that mediate effective technology use in education, and issues related to ethical technology use.

LT students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student’s faculty advisor. 24 doctoral thesis credits are also required.

### Minor or Supporting Program
12 credits outside the track, selected in consultation with faculty advisor

### Elective
3 credits selected in consultation with faculty advisor

### Literacy Education
Within the literacy education track there are three specializations: (1) children's and adolescent literature, (2) critical literacy and English education, and (3) reading education. Students who have an interest in literacy outside of these specialization areas are able to work with faculty and advisors to develop a program that builds on their interests. Although faculty members work within these distinct
specializations, they also enjoy collaborating on teaching, research, and writing projects across the areas embedded within literacy education. Together, faculty and graduate students in the program investigate a host of issues in the field of literacy.

The literacy education track has four overarching goals. They are:
To apply multiple theoretical and research perspectives to problems and questions central to the field;
To engage in research, teaching, and outreach that supports culturally and linguistically diverse literacy learners;
To develop literacy teachers and leaders for diverse schools; and
To influence literacy policies that address inequities and benefit all learners.

Literacy students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student's faculty advisor. 24 doctoral thesis credits are also required.

Core Coursework
CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

Major Coursework
15 credits selected in consultation with faculty advisor

Research Coursework
CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

Research Electives
9 additional credits to be selected based upon student's research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.
Take 9 or more credit(s) from the following:
• CI 8085 - Narrative Inquiry in Education (3.0 cr)
• CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
• CI 8146 - Critical Ethnography in Education (3.0 cr)
• CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
• CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
• CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
• CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
• CI 8165 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)
• CI 8371 - Applied Social Network Analysis in Education (3.0 cr)
• CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
• CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)
• CI 8689 - Language and Education Policy (3.0 cr)
• CI 8913 - Interpretive Research (3.0 cr)
• OLPD 5056 - Case Studies for Policy Research (3.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
• OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8224 - Performance Assessment Design and Analysis (3.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
• AMST 8289 - Ethnographic Research Methods: Research Strategies in American Studies (3.0 cr)
• ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
• LING 5462 - Field Research in Spoken Language (3.0 cr)

Information current as of August 31, 2018
Science, Technology, Engineering, and Mathematics Education

The doctoral program's STEM education track at the University of Minnesota is interdisciplinary, focusing on science education, mathematics education, engineering education or agricultural education. Students pursuing this track will choose an area of emphasis in one of the four specializations, while simultaneously participating in scholarly work that spans all areas of STEM education. This integrated-style is one of the first in the nation, and is designed to prepare scholars to conduct thoughtful disciplinary and interdisciplinary research in STEM education in order to assume roles as university faculty members, educational leaders, policy makers, and researchers.

STEM students must take 6 credits of core coursework, 9 credits of STEM core coursework, 9 credits of focus area specific (science or mathematics or engineering or agriculture) coursework, 15 credits of research coursework, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student's faculty advisor. 24 doctoral thesis credits are also required.

Core Coursework
CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

STEM Core Coursework
CI 8571 - Equity, Policy, and Social Justice in Science Education (3.0 cr)
CI 8572 - Learning Theory and Classical Research in STEM Education (3.0 cr)
CI 8573 - Nature of Inquiry in STEM Education (3.0 cr)

STEM Focus Area Coursework
Students take 9 credits, with faculty advisor approval, in their focus area: science education or mathematics education or engineering education or agricultural education.

Science Education
3 required credits are listed; 6 additional credits must be taken in consultation with faculty advisor.
CI 8574 - History and Philosophy of Science in Education (3.0 cr)

or
Mathematics Education
9 credits required in consultation with faculty advisor

or
Engineering Education
9 credits required in consultation with faculty advisor

or
Agricultural Education
6 required credits are listed; one additional "AFEE" 3 credit course must be taken in consultation with faculty advisor.
AFEE 8090 - Seminar: Agricultural Education and Extension (1.0 - 3.0 cr)
AFEE 8094 - Research in Agricultural Education and Extension (1.0 - 6.0 cr)

Research Coursework
Students must take CI 8134 and CI 8135, as well as a minimum of 6 credits of statistics and one research elective course, for a total of 15 credits.
CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

Statistics Requirement
Students must take a minimum of 6 credits of graduate-level Statistics in consultation with their advisor

Research Electives
3 additional credits to be selected based upon student's research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.
Take 3 or more credit(s) from the following:
• CI 8085 - Narrative Inquiry in Education (3.0 cr)
• CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
• CI 8146 - Critical Ethnography in Education (3.0 cr)
• CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
• CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
• CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
• CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
• CI 8165 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)
• CI 8371 - Applied Social Network Analysis in Education (3.0 cr)
• CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
• CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)
• CI 8689 - Language and Education Policy (3.0 cr)
• CI 8913 - Interpretive Research (3.0 cr)
• OLPD 5056 - Case Studies for Policy Research (3.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
• OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8224 - Performance Assessment Design and Analysis (3.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
• AMST 8299 - Ethnographic Research Methods: Research Strategies in American Studies (3.0 cr)
• ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
• LING 5462 - Field Research in Spoken Language (3.0 cr)

Minor or Supporting Program
12 credits outside the track, selected in consultation with faculty advisor.

Second Language Education
The PhD track in second language education (SLE) focuses on the study of language use, teaching, learning, and policy across a range of educational and community settings, including programs that serve language minority and language majority learners: ESL/EFL, foreign language education, and bilingual and immersion education. The PhD track is designed to assume roles as university faculty members, researchers, policy makers, and educational leaders. Independent scholarship is the cornerstone of the PhD.

The SLE PhD track has four specializations that correspond to the program's primary focus areas and faculty expertise:
1) Second language acquisition and classroom discourse research examines language learning processes and the way language is used by learners and their interlocutors in or out of school.
2) Second language pedagogy and teacher development research examines teachers' classroom practices and strategies as well as professional identities, experiences and attitudes.
3) Language policy research involves analysis of the formation, implementation, and negotiation of language policy in national, school, community, and private spheres.
4) Languages and cultures across schools and communities research examines connections across homes, schools, and communities with an emphasis on the experience.

SLE students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student's faculty advisor. 24 doctoral thesis credits are also required.

Core Coursework
CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

Major Coursework
Required courses are listed; others selected in consultation with faculty advisor for a total of 15 credits.
CI 8161 - Research Experience I: Study Design and Planning (3.0 cr)
CI 8162 - Research Experience II: Data Analysis and Manuscript Preparation (3.0 cr)

Research Coursework
CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

Research Electives
9 additional credits to be selected based upon student's research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.

Take 9 or more credit(s) from the following:
• CI 8085 - Narrative Inquiry in Education (3.0 cr)
• CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
• CI 8146 - Critical Ethnography in Education (3.0 cr)
• CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
• CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
• CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
• CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
• CI 8165 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)
• CI 8371 - Applied Social Network Analysis in Education (3.0 cr)
• CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
• CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)

Social Studies Education

The PhD program’s social studies education track focuses on issues related to curriculum, instruction, and assessment in K-12 social studies. Full-time graduate students generally have opportunities to supervise student teachers, teach introductory social studies classes, and conduct and publish research with one or more faculty members. Doctoral students are required to complete a research internship with one or more of the faculty as part of their study for the degree. Graduate students are strongly encouraged to present research papers at professional conferences, specifically the National Council for the Social Studies and the American Educational Research Association. Recent PhD graduates have conducted research in the areas of intercultural relations, moral development, multicultural gender-fair curriculum, social studies instructional issues, and the standards movement as it relates to social studies education. Graduates have assumed positions as instructional leaders in the public schools, curriculum development specialists, social studies assessment specialists, and college/university faculty.

Social Studies students must take 6 credits of core coursework, 15 credits of major coursework, 15 credits of research coursework, 3 credits of electives, and 12 credits outside the track. Unless otherwise noted, credits need to be selected in consultation with the student’s faculty advisor. 24 doctoral thesis credits are also required.

Core Coursework
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)

Major Coursework
- 15 credits selected in consultation with faculty advisor.

Research Coursework
- CI 8134 - Foundations of Research in Curriculum and Instruction I (3.0 cr)
- CI 8135 - Foundations of Research in Curriculum and Instruction II (3.0 cr)

Research Electives
- 9 additional credits to be selected based upon student’s research methodology. If student wishes to take a course not selected below, they should first consult with their faculty advisor to make sure it will count as a research elective.

Take 9 or more credits from the following:
- CI 8085 - Narrative Inquiry in Education (3.0 cr)
- CI 8145 - Using Mixed Methods in Educational Research (3.0 cr)
- CI 8146 - Critical Ethnography in Education (3.0 cr)
- CI 8147 - Critical Discourse Analysis in Educational Research (3.0 cr)
- CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
- CI 8153 - Research Approaches to Classroom Discourse (3.0 cr)
- CI 8155 - Immigrant Families and U.S. Schools (3.0 cr)
- CI 8165 - Queer and Feminist Theories: Collective Memory Research Methods (3.0 cr)
• CI 8371 - Applied Social Network Analysis in Education (3.0 cr)
• CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
• CI 8671 - Sociolinguistic Research Approaches to Education (3.0 cr)
• CI 8889 - Language and Education Policy (3.0 cr)
• CI 8913 - Interpretive Research (3.0 cr)
• OLPD 5056 - Case Studies for Policy Research (3.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
• OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8224 - Performance Assessment Design and Analysis (3.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
• AMST 8299 - Ethnographic Research Methods: Research Strategies in American Studies (3.0 cr)
• ANTH 5056 - Research Methods in Social and Cultural Anthropology (3.0 cr)
• LING 5462 - Field Research in Spoken Language (3.0 cr)

Minor or Supporting Program
12 credits outside the track, selected in consultation with faculty advisor.

Elective
3 credits selected in consultation with faculty advisor.

Website: http://www.cehd.umn.edu/edpsych

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 51
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The educational psychology program has five tracks: counseling and student personnel psychology (CSPP); school psychology; special education (including applied behavior analysis); psychological foundations of education (learning and cognition/educational technology, social psychological and social developmental processes in educational psychology including human relations); and quantitative methods in education (including measurement, evaluation, statistics, and statistics education).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applications are accepted for fall admission only. Applicants must apply online submitting a department application, three letters of recommendation, and a statement of goals and interests. Applications should be accompanied by official transcripts from all colleges and universities attended. In addition, school psychology applicants must also submit a one page critical issue essay, answering the following questions: What is the role of a school psychologist? What are the most critical educational issues school psychologists can help address? How would you like to contribute to addressing these issues in your future career? An interview is required for those who make the initial cut in school psychology.

Application deadlines are November 15 for the school psychology track; December 1 for the quantitative methods and special education tracks; March 1 for the psychological foundations track, and as a second deadline for the quantitative methods track. To be considered for fellowship nominations, applications must be submitted by the November 15 (school psychology) or December 1 deadlines.

Applicants must submit the following test score(s):
GRE General Test (no subject tests are required)

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Information current as of August 31, 2018
Program Requirements

**Plan A:** Plan A requires 20 to 24 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 to 51 major credits and 0 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

The CSPP subplan requires a minimum GPA of 3.0 for students to remain in good standing.

Students must complete credits in EPSY core courses (3 credits in statistics, 3 credits in measurement/evaluation, 3 credits in learning/cognition and 3 credits social/personality). EPSY core courses must be taken on an A-F grade basis. Plan A students must take 10 thesis credits; Plan B registration varies by track. Students must have a minimum of 14 credits in EPSY. Further required credits are detailed within subplan requirements.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Counseling and Student Personnel Psychology**

This sub-plan is limited to students completing the program under Plan B.

The counseling and student personnel psychology (CSPP) track subscribes to the scientist/practitioner model, which assumes that scholarly inquiry and counseling practice are interdependent and complementary. The track's primary mission is to prepare counseling psychologists to bring a well-trained professional's attitude and interest to bear on the application of psychological and educational knowledge. In addition to becoming skilled clinicians, students learn to be critical consumers and producers of both quantitative and qualitative research. Emphasis areas: community counseling, school counseling, and student personnel psychology/higher education.

Students take 47-51 credits distributed as follows: 12 credits EPSY core courses, 23 credits in counseling theory and practice and 12-16 credits in the area of emphasis. All courses must be taken on an A-F grade basis.

The CSPP subplan requires a minimum GPA of 3.0, no more than two grades below B-, and no more than six credits of incomplete grades for students to remain in good standing.

The final exam is written; students must also submit a portfolio.

**Ed Psych Core Course Requirements**

Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits in social/personality, and 3 credits in learning/cognition.

- **EPSY 5261** - Introductory Statistical Methods (3.0 cr)
- **EPSY 5221** - Principles of Educational and Psychological Measurement (3.0 cr)
- **EPSY 8132** - Personality Development and Socialization (3.0 cr)

**Learning/Cognition**

Take 3 or more credit(s) from the following:

- **EPSY 5101** - Intelligence and Creativity (3.0 cr)
- **EPSY 5113** - Psychology of Instruction and Technology (3.0 cr)
- **EPSY 5114** - Psychology of Student Learning (3.0 cr)
- **EPSY 5119** - Mind, Brain, and Education (3.0 cr)
- **EPSY 5191** - Education of the Gifted and Talented (3.0 cr)
- **EPSY 8112** - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

Counseling Theory & Practice Requirements
EPSY 8402 - Individual Counseling: Theories, Applications & Counseling Skills (4.0 cr)
EPSY 8403 - Social/Cultural Contexts: Counseling and Skills (3.0 cr)
EPSY 8404 - Group Counseling: Theory, Applications, and Skills (3.0 cr)
EPSY 8405 - Career Development: Theory, Skills, and Counseling Applications (3.0 cr)
EPSY 8406 - Professional Ethics for Counselors and Psychologists (3.0 cr)
EPSY 8407 - Assessing and Counseling Clients With Psychological Disorders (4.0 cr)
EPSY 8431 - Master's Research Seminar: CSPP (3.0 cr)

Courses in Area of Emphasis
Students must take additional courses (12-16 credits) in their area of emphasis.

Community Emphasis
Students must take 4 credits of EPSY 8503, 4 credits of EPSY 8504 and the special topic course listed below for 4 credits.
EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
EPSY 8503 - Counseling Practicum I (1.0 - 4.0 cr)
EPSY 8504 - Counseling Practicum II (1.0 - 4.0 cr)
EPSY 5400 Wkshp:CounselPsy - Clients in Crises: Intervention and Diagnosis (4 cr)

-OR-

Student Personnel/Higher Ed Emphasis
Students must take 4 credits of EPSY 8503 and 4 credits of EPSY 8504. EPSY5421/OLPD5724 and EPSY 5451/OLPD5704 are recommended, but not required.
EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
EPSY 8503 - Counseling Practicum I (1.0 - 4.0 cr)
EPSY 8504 - Counseling Practicum II (1.0 - 4.0 cr)

-OR-

School Counseling Emphasis
Students must take 3 credits of EPSY 5435, 3 credits of EPSY 8503, and 3 credits of EPSY 8504.
EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
EPSY 5435 - Introduction to School Counseling (3.0 - 6.0 cr)
EPSY 5436 - Crisis Management and Consulting in Schools (3.0 cr)
EPSY 8503 - Counseling Practicum I (1.0 - 4.0 cr)
EPSY 8504 - Counseling Practicum II (1.0 - 4.0 cr)

Psychological Foundations of Education
Graduate study in psychological foundations of education prepares students for research and teaching positions in colleges and universities. Students have also gone on to positions in professional settings such as schools, private industry, human service organizations, health science units, and government agencies. The goal of the track is to apply and generate knowledge of psychological processes and methodological procedures involved in learning and teaching.

The psychological foundations track offers emphases in learning and cognition/educational technology or social psychological and social developmental (including human relations) processes in educational psychology. Students typically choose one of these areas in addition to achieving broad competence in all aspects of the curriculum.

Students take 33-34 credits distributed as follows: 12 credits EPSY core requirements, 3 credits research methodology, and 12 credits in an area of emphasis (PsyF Foundations requirements in the area of emphasis will satisfy EPSY core requirement for learning/cognition or social/personality). Plan A students take 10 thesis credits; Plan B students take 6 research credits and 3 additional credits.

Ed Psych Core Course Requirements
Students must take 3 credits in learning/cognition, 3 credits in social/personality, 3 credits in statistics and 3 credits in measurement/evaluation. 3 credits from the area of emphasis will satisfy learning/cognition or social/personality core requirement. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Learning/Cognition
Students in the learning area of PsyF can satisfy this requirement with required learning emphasis courses from the list below.
Students in the social area must take one of the following courses: EPSY 5101, 5112, 5113, 5114, 5115, 5119, 5191.

Take 3 or more credit(s) from the following:

• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)

Social/Personality

Students in the social area of PsyF can satisfy this requirement with required social emphasis courses from the list below. Students in the learning area must take one of the following courses: EPSY 5151, 5157 or 8157.

Take 3 or more credit(s) from the following:

• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8206 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)

Statistics

Take 3 or more credit(s) from the following:

• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Measurement/Evaluation

Take 3 or more credit(s) from the following:

• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

Research Methodology

EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)

Plan B Paper

For students completing the MA under Plan B.

Take 6 or more credit(s) from the following:

• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)
• EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

Additional 3 credits

3 additional credits are required for Plan B, preferably in either learning/cognition or social psychology/social development, but may also include other areas of educational psychology. Consult with advisor.

Psychological Foundations Emphases

Learning/Cognition Emphasis

Required Learning and Cognition Courses

Take 6 or more credit(s) from the following:

• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)

Specialization Courses in Learning and Cognition

Take 6 or more credit(s) from the following:

• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8113 - The Psychology of Scientific Reasoning (3.0 cr)
• EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)

Social Emphasis
Required social psychology course
EPSY 5157 - Social Psychology of Education (3.0 cr)

Additional social psychology or social developmental courses
Take 6 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)

Additional 3 credits
3 additional credits are required, preferably in either social psychology/social development or learning/cognition, but may also include other areas of educational psychology.

Quantitative Methods in Education
This sub-plan is limited to students completing the program under Plan B.

In Quantitative Methods in Education (QME) students explore methodologies of measurement, evaluation, and statistics to improve our understanding and use of these methods as well as explore new approaches to address educational phenomena. Students specializing in measurement study psychometric theories and methods of developing, selecting, and using measures of knowledge, skills, abilities, and non-cognitive variables. This includes item writing, test design, equating, scaling, and standard setting, techniques supporting decision making and accountability. Students specializing in evaluation study theories and models of evaluation that include quantitative and qualitative techniques for evaluating the effectiveness of educational and human services programs. Students specializing in statistics study a wide range of statistical methods, as well as their underlying statistical theories, and develop an understanding of the relationship between research design and statistical analysis, acquiring skills in using a variety of statistical techniques appropriate for specific problems in education. Students specializing in statistics education investigate issues related to teaching and learning statistics and gain experience in statistics instruction. QME students develop knowledge and skills that prepare them for a variety of positions, including test companies, colleges and universities, research and evaluation centers, public school systems, government agencies, and industry.

Students take 33 credits distributed as follows: 12 credits EPSY core requirements, 18 credits QME core requirements (6 credits may be used to satisfy EPSY core requirements, and 3 research credits (EPSY 5991) for the Plan B paper. 2 additional courses (minimum 6 credits) in the area of emphasis are determined in consultation with advisor.

Ed Psych Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits in learning/cognition, and 3 credits in social/personality. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Statistics
QME core courses EPSY 8251 or 8252 will satisfy this requirement.

Measurement/Evaluation
QME core courses EPSY 5221, 5243, 5244 or 5247 will satisfy this requirement.

Learning/Cognition
Take 3 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• EPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

Social/Personality
Take 3 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8132 - Personality Development and Socialization (3.0 cr)
• EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)
• PSY 5101 - Personality: Current Theory and Research (3.0 cr)
• PSY 5157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

QME Core Course Requirements
Courses taken to satisfy QME core requirements must be taken on an A-F grade basis.

- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Courses in area of emphasis
Students must take two additional courses (minimum 6 credits) in their area of emphasis.

Evaluation Emphasis
  OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
QME course in consultation with adviser (3 credits)

  - OR -

Measurement Emphasis
Students must take one 8xxx level measurement course (3 credits)
QME course in consultation with adviser (3 credits)

  - OR -

Statistics Emphasis
  EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
QME course in consultation with adviser (3 credits)

  - OR -

Statistics Education Emphasis
Students must take EPSY 5272 for 3 credits.
  EPSY 5271 - Becoming a Teacher of Statistics (3.0 cr)
  EPSY 5272 - Statistics Teaching Internship (1.0 - 3.0 cr)

School Psychology
This sub-plan is limited to students completing the program under Plan B.

School psychology does not offer the MA as a terminal degree; rather, the MA is required to obtain the specialist certificate or PhD in educational psychology.

Students take 30 credits distributed as follows: 12 credits EPSY core requirements, 15 credits School Psychology course requirements, and 3 research credits (EPSY 8822).

EPSY Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits in learning/cognition, and 3 credits in
social/personality. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

**Statistics**
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8251 - Statistical Methods in Education I (3.0 cr)

**Measurement/Evaluation**
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)

**Learning/Cognition**
Take 3 or more credit(s) from the following:
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5119 - Mind, Brain, and Education (3.0 cr)
- EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
- EPSY 8112 - Mathematical Cognition (3.0 cr)
- EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
- EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
- EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
- EPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- PSY 5054 - Psychology of Language (3.0 cr)
- PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

**Social/Personality**
- EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)

**Plan B Paper**
Take 3 or more credit(s) from the following:
- EPSY 8822 - Research in School Psychology (3.0 cr)

**School Psychology Course Requirements**
Take 15 or more credit(s) from the following:
- EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
- EPSY 5802 - History & Scientific Bases of Psychology (3.0 cr)
- EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
- EPSY 8811 - Assessment in School Psychology I: Foundations of Academic Assessment (3.0 cr)
- EPSY 8812 - Assessment in School Psychology II: Intellectual and Social-Emotional Domains (3.0 cr)
- EPSY 8813 - Introductory Practicum in School Psychology (2.0 cr)
- EPSY 8815 - Behavioral and Social Emotional Prevention and Intervention (3.0 cr)
- EPSY 8816 - Academic Preventive and Intervention (3.0 cr)
- EPSY 8817 - Problem Analysis and Consultation in School Psychology (3.0 cr)
- EPSY 8818 - Intermediate Practicum in School Psychology (2.0 cr)
- EPSY 8821 - Issues in School Psychology (3.0 cr)
- EPSY 8823 - Ethics and Professional Standards in School Psychology (3.0 cr)
- EPSY 8849 - Assessment in Early Childhood (3.0 cr)

**Special Education**
The special education track offers opportunities for research and specializations in autism spectrum disorder, deaf/hard-of-hearing, emotional behavior disorders, early childhood special education, specific learning disabilities, developmental disabilities, and self-injurious behaviors and applied behavior analysis. Early involvement in research projects and the development of original research programs in areas such as academic instructional strategies, social and cognitive development, behavioral/psychological management, child development, and technology are encouraged.

The special education track focuses on the attainment of core competencies required for special education professionals as well as interdisciplinary skills and goals. A complementary emphasis is placed on problem solving that is influential in the social and cultural perceptions, care, education, intervention, and support of persons with disabilities.

Students may emphasize consulting, college teaching, or research in one or more of the specializations.

Students take 30-36 credits distributed as follows: 12 credits EPSY core courses. Plan A students take 9 special ed coursework electives and 10 thesis credits; Plan B students take 12 special ed coursework electives and 6 credits in Research Problems (EPSY 8994); students with an area of emphasis in Applied Behavior Analysis (Plan B) take 15 credits required courses and 9 credits Research Problems (EPSY 8994).

**EPSY Core Course Requirements**
Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits in learning/cognition, and 3 credits in social/personality. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

**Statistics**
Take 3 or more credit(s) from the following:

• EPSY 5261 - Introductory Statistical Methods (3.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8254 - Advanced Multiple Regression Analysis (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)

Measurement/Evaluation
3 credits required in measurement or evaluation

Take 3 or more credit(s) from the following:

• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
• PSY 5865 - Advanced Psychological and Educational Measurement (4.0 cr)

or

Take 3 or more credit(s) from the following:

• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
• OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

Learning/Cognition
Students in the ABA area of emphasis should submit a petition for EPSY 5659.

Take 3 or more credit(s) from the following:

• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

Social/Personality
Take 3 or more credit(s) from the following:

• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8132 - Personality Development and Socialization (3.0 cr)
• EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)
• PSY 5101 - Personality: Current Theory and Research (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)

Special Ed Course Requirements - Plan A
For students completing the MA under Plan A.

Electives
Special Ed coursework selected in consultation with advisor (9 credits).

Thesis Credits
Take 10 or more credit(s) from the following:
• EPSY 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Special Ed Course Requirements - Plan B
For students completing the MA under Plan B.

Electives
Special Ed coursework selected in consultation with advisor (12 credits)

Research Problems
Take 6 or more credit(s) from the following:
• EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

Applied Behavior Analysis Emphasis Requirements
ABA students must complete the MA under Plan B.

Required Courses
EPSY 5623 - Ethics in Applied Behavior Analysis (3.0 cr)
EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
EPSY 5663 - Assessment and Intervention for Individuals with Autism Spectrum Disorder (3.0 cr)
EPSY 8706 - Single Case Designs in Intervention Research (3.0 cr)
EPSY 8708 - Functional Behavior Assessment (3.0 cr)
  or EPSY 5661 - Introduction to Autism Spectrum Disorder (3.0 cr)

Research Problems
9 credits required.
EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)
**Twin Cities Campus**

Website: [http://www.cehd.umn.edu/edpsych](http://www.cehd.umn.edu/edpsych)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The educational psychology program has five tracks: 1) counseling and student personnel psychology (CSPP); 2) school psychology; 3) special education; 4) psychological foundations of education (learning and cognition/educational technology, social psychological and social developmental processes in educational psychology including human relations); and 5) quantitative methods in education (including measurement, evaluation, statistics, and statistics education).

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A master's minor requires at least 6 credits of graduate-level EPSY courses. A doctoral minor requires at least 12 credits of graduate-level EPSY courses, of which at least 9 credits must be in 8xxx courses. Course selection is determined in consultation with the educational psychology committee member. Courses must be taken on an A-F grade basis.

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Master's**

A master's minor requires at least 6 credits of graduate-level EPSY courses. Course selection is determined in consultation with the educational psychology committee member. Courses must be taken on an A-F grade basis.

**Doctoral**

A doctoral minor requires at least 12 credits of graduate-level EPSY courses, of which at least 9 credits must be in 8xxx courses. Course selection is determined in consultation with the educational psychology committee member. Courses must be taken on an A-F grade basis.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 66 to 97
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The educational psychology program has four tracks: school psychology; special education; psychological foundations of education (learning and cognition/educational technology, social psychological and social developmental processes in educational psychology including human relations); and quantitative methods in education (including measurement, evaluation, statistics, and statistics education).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applications are accepted for fall admission only. Applicants must apply online submitting a department application, three letters of recommendation, and a statement of goals and interests. Applications should be accompanied by official transcripts from all colleges and universities attended. In addition, school psychology applicants must also submit a one page critical issue essay, answering the following questions: What is the role of a school psychologist? What are the most critical educational issues school psychologists can help address? How would you like to contribute to addressing these issues in your future career? An interview is required for those who make the initial cut in school psychology.

Application deadlines are November 15 for the school psychology track; December 1 for the psychological foundations, quantitative methods and special education tracks; March 1 as a second deadline for quantitative methods. To be considered for fellowship nominations, applications must be submitted by the November 15 (school psychology) or December 1 deadlines.

Applicants must submit the following test score(s):
GRE General Test (no subject tests are required)

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
42 to 73 credits are required in the major.
0 to 9 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must complete credits in EPSY core courses (6 credits in statistics, 3 credits in measurement/evaluation, 6 credits in research methods, 9 credits from at least two areas: learning/cognition, social/personality, history/systems), 9 credits EPSY electives and 24 thesis credits. Further required credits are detailed within subplan requirements.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Psychological Foundations of Education
Graduate study in psychological foundations of education prepares students for research and teaching positions in colleges and universities. Students have also gone on to positions in professional settings such as schools, private industry, human service organizations, health science units, and government agencies. The goal of the track is to apply and generate knowledge of psychological processes and methodological procedures involved in learning and teaching.

The psychological foundations track offers emphases in learning and cognition/educational technology or social psychological and social developmental (including human relations) processes in educational psychology. Students typically choose one of these areas in addition to achieving broad competence in all aspects of the curriculum.

Students take 72 credits distributed as follows: 24 credits EPSY core requirements, 9 credits EPSY electives, 18 credits in the area of emphasis in PsyF (12 PSYF credits can be used to satisfy EPSY core and elective requirements), 9 credits of coursework outside of ed psych, and 24 thesis credits.

Ed Psych Core Course Requirements
Psychological foundations students must take 3 credits in history/systems, 3 credits in learning/cognition, 3 credits in social/personality, 6 credits in research methods, 6 credits in statistics and 3 credits in measurement/evaluation. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

History/Systems
PsyF students must take EPSY 8905.
EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

Learning/Cognition
Students in the learning area of PsyF can satisfy this requirement with required learning emphasis courses from the list below. Students in the social area of PsyF must take one of the following courses: EPSY 5101, 5112, 5113, 5114, 5115, 5119 or 5191.
Take 3 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)

Social/Personality
Students in the social area of PsyF can satisfy this requirement with required social emphasis courses from the list below. Students in the learning area of PsyF must take one of the following courses: EPSY 5151, 5157 or 8157.
Take 3 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)

Research Methods
EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
EPSY 8216 - Seminar: Research Processes in Psychological Foundations of Education (3.0 cr)

Statistics
6 credits required
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Measurement/Evaluation
Take 3 or more credit(s) from the following:
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

EPSY Electives
9 credits of EPSY electives can be satisfied by additional courses in the area of emphasis.

External Courses
Psych foundations students must take a minimum of 9 credits of coursework outside of educational psychology in consultation with advisor.

Courses in Area of Emphasis
Students must take additional courses in their area of emphasis in consultation with advisor. EPSY courses will satisfy 3 credits ed psych learning or social core requirement and 9 credits EPSY electives.

Learning/Cognition Emphasis

Required Learning and Cognition Courses
Take 6 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)

Specialization Courses in Learning and Cognition
Take 12 or more credit(s) from the following:
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8113 - The Psychology of Scientific Reasoning (3.0 cr)
• EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
• EPSY 8290 - Special Topics: Seminar in Psychological Foundations (1.0 - 6.0 cr)

-SOR-

Social Emphasis

Required Social Psychology or Social Development Courses
Take 6 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)

Specialization Courses in Social Psychology or Social Development
Take 12 or more credit(s) from the following:
Quantitative Methods in Education

In Quantitative Methods in Education (QME) students explore methodologies of measurement, evaluation, and statistics to improve our understanding and use of these methods as well as explore new approaches to address educational phenomena. Students specializing in measurement study psychometric theories and methods of developing, selecting, and using measures of knowledge, skills, abilities, and non-cognitive variables. This includes item writing, test design, equating, scaling, and standard setting, techniques supporting decision making and accountability. Students specializing in evaluation study theories and models of evaluation that include quantitative and qualitative techniques for evaluating the effectiveness of educational and human services programs. Students specializing in statistics study a wide range of statistical methods, as well as their underlying statistical theories, and develop an understanding of the relationship between research design and statistical analysis, acquiring skills in using a variety of statistical techniques appropriate for specific problems in education. Students specializing in statistics education investigate issues related to teaching and learning statistics and gain experience in statistics instruction. QME students develop knowledge and skills that prepare them for a variety of positions, including test companies, colleges and universities, research and evaluation centers, public school systems, government agencies, and industry.

Students take 72 credits distributed as follows: 27 credits EPSY core requirements, 9 credits EPSY electives, 18 credits QME core requirements, 12 additional credits in the area of emphasis in QME (18 QME credits can be used to satisfy EPSY core and elective requirements), and 24 thesis credits.

Ed Psych Core Course Requirements

Students must take 9 credits in at least two of these areas: learning/cognition, social/personality or history/systems; and 9 credits in research methods. (QME core courses will satisfy EPSY core requirements for 6 credits in statistics and 3 credits in measurement/evaluation; 9 credits in EPSY electives can be satisfied by additional courses in the area of emphasis.) Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Learning/Cognition, Social/Personality, History/Systems
Take 9 or more credit(s) including 2 or more sub-requirements(s) from the following:

learning/cognition
Take 0 or more course(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

social/personality
Take 0 or more course(s) from the following:
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8132 - Personality Development and Socialization (3.0 cr)
• EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
• EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• PSY 5101 - Personality: Current Theory and Research (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8206 - Social Psychology: The Self (3.0 cr)
• SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)

• history/systems
Take 0 or more course(s) from the following:
• EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

Research Methods
QME students must take these 3 research methods courses.
EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

Statistics
6 credits of statistics will be satisfied by QME core course requirements.
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Measurement/Evaluation
3 credits of measurement or evaluation will be satisfied by QME core course requirements.
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
or EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)

EPSY Electives
9 credits of EPSY electives can be satisfied by additional QME core courses and courses in the area of emphasis.

QME Core Course Requirements
Students must take these courses, including an 8xxx level measurement course selected in consultation with advisor (minimum 18 credits total). Courses taken to satisfy QME core requirements must be taken on an A-F grade basis.
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8xxx measurement course (minimum 3 credits)

Courses in Area of Emphasis
Students must take minimum 12 credits in their area of emphasis (in consultation with advisor). EPSY courses will satisfy 9 credits ed psych elective core requirement.

Evaluation Emphasis
For other possible courses, check with your advisor.
Take 12 or more credit(s) from the following:
• EPSY 5246 - Evaluation Colloquium: Psychological Foundations (1.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
• OLPD 5056 - Case Studies for Policy Research (3.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)
• OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
• OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

-OR-

Measurement Emphasis
For other possible courses, check with your advisor.
Take 12 or more credit(s) from the following:
• EPSY 5246 - Evaluation Colloquium: Psychological Foundations (1.0 cr)
• EPSY 5271 - Becoming a Teacher of Statistics (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)

- OR -

Statistics Emphasis
For other possible courses, check with your advisor.
Take 12 or more credit(s) from the following:
• EPSY 5246 - Evaluation Colloquium: Psychological Foundations (1.0 cr)
• EPSY 5271 - Becoming a Teacher of Statistics (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8271 - Statistics Education Research Seminar: Studies on Teaching and Learning Statistics (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)

- OR -

Statistics Education Emphasis
EPSY 5271 - Becoming a Teacher of Statistics (3.0 cr)
EPSY 8271 - Statistics Education Research Seminar: Studies on Teaching and Learning Statistics (3.0 cr)
MathEd (MTHE) course (minimum 3 credits)-consult with adviser
Additional course (minimum 3 credits)-consult with adviser

School Psychology
The school psychology PhD program is fully accredited by the American Psychological Association, and the Minnesota Board of Teaching, and approved by the National Association of School Psychologists. Through coursework and practica/internships, students develop competencies in research, assessment, consultation, prevention and intervention, supervision, and higher education instruction. Graduates are employed as faculty and researchers in universities, and as psychologists in K12 schools, clinics, hospitals, community mental health centers. Graduates are eligible for the state school psychologist credential, national certification in school psychology, and most states license to practice professional psychology. Students graduate preparation focuses on the knowledge and skills necessary to develop, implement, and disseminate high quality research and to engage in provision of research-based school psychological practices within multi-tier systems of support to improve academic, social, behavioral, and emotional competence of children and youth. Students develop specific competencies through a broad range of didactic courses, research activities, teaching and supervisory experience, and field placements, including practica and a full-year internship.

Students take 97 credits distributed as follows: 24 credits EPSY core requirements, 9 credits EPSY electives, 49 credits School Psychology required courses (9 credits can be used to satisfy EPSY elective requirement), and 24 thesis credits.

Ed Psych Core Course Requirements
Students must take 9 credits in at least two of these areas: learning/cognition, social/personality or history/systems; 6 credits in research methods; 6 credits in statistics; 3 credits in measurement/evaluation and 9 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Learning/Cognition, Social/Personality, History/Systems
Take 9 or more credit(s) including 2 or more sub-requirements(s) from the following:
learning/cognition
  Take 0 or more course(s) from the following:
  • EPSY 5101 - Intelligence and Creativity (3.0 cr)
  • EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
  • EPSY 5114 - Psychology of Student Learning (3.0 cr)
  • EPSY 5119 - Mind, Brain, and Education (3.0 cr)
  • EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
  • EPSY 8112 - Mathematical Cognition (3.0 cr)
  • EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
  • EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
  • EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
  • CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
  • PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
  • PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
  • PSY 5054 - Psychology of Language (3.0 cr)
  • PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)
• **social/personality**
  School Psychology students must take EPSY 8819
  Take 1 or more course(s) from the following:
  • EPSY 5135 - Human Relations Workshop (4.0 cr)
  • EPSY 5151 - Cooperative Learning (3.0 cr)
  • EPSY 5157 - Social Psychology of Education (3.0 cr)
  • EPSY 8132 - Personality Development and Socialization (3.0 cr)
  • EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
  • EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)
  • CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
  • CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
  • PSY 5101 - Personality: Current Theory and Research (3.0 cr)
  • PSY 5135 - Psychology of Individual Differences (3.0 cr)
  • PSY 5202 - Attitudes and Social Behavior (3.0 cr)
  • PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
  • PSY 5205 - Applied Social Psychology (3.0 cr)
  • PSY 5207 - Personality and Social Behavior (3.0 cr)
  • PSY 8201 - Social Cognition (3.0 cr)
  • PSY 8202 - Close Relationships (3.0 cr)
  • PSY 8208 - Social Psychology: The Self (3.0 cr)
  • SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)

• **history/systems**
  Take 0 or more course(s) from the following:
  • EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

• **Statistics**
  EPSY 8251 - Statistical Methods in Education I (3.0 cr)
  EPSY 8252 - Statistical Methods in Education II (3.0 cr)

• **Measurement/Evaluation**
  EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)

• **Research Methods**
  6 credits required
  EPSY 8822 - Research in School Psychology (3.0 cr)
  Take 3 or more credit(s) from the following:
  • EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
  • EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

• **EPSY Electives**
  9 credits of EPSY electives can be satisfied by school psychology course requirements.

• **School Psychology Course Requirements**
  EPSY courses will satisfy 9 credits ed psych elective core requirement.
  EPSY 5802 - History & Scientific Bases of Psychology (3.0 cr)
  EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
  EPSY 8811 - Assessment in School Psychology I: Foundations of Academic Assessment (3.0 cr)
  EPSY 8812 - Assessment in School Psychology II: Intellectual and Social-Emotional Domains (3.0 cr)
  EPSY 8815 - Behavioral and Social Emotional Prevention and Intervention (3.0 cr)
  EPSY 8816 - Academic Prevention and Intervention (3.0 cr)
  EPSY 8817 - Problem Analysis and Consultation in School Psychology (3.0 cr)
  EPSY 8821 - Issues in School Psychology (3.0 cr)
  EPSY 8823 - Ethics and Professional Standards in School Psychology (3.0 cr)
  EPSY 8831 - Comprehensive School Practicum in School Psychology (3.0 cr)
  EPSY 8832 - Advanced Practicum in School Psychology (3.0 cr)

• **Introductory Practicum (4 credits)**
  Students must take EPSY 8813 twice.
  EPSY 8813 - Introductory Practicum in School Psychology (2.0 cr)

• **Intermediate Practicum (4 credits)**
  Students must take EPSY 8818 twice.
  EPSY 8818 - Intermediate Practicum in School Psychology (2.0 cr)

• **Practicum: Instruction and Supervision in School Psychology (6 credits)**
  Students must take EPSY 8841 twice.
  EPSY 8841 - Practicum: Instruction and Supervision in School Psychology (3.0 cr)

• **Internship**
  There are two options for internship registration:
  * Students completing an internship after defending their dissertation must register for EPSY 8843 both fall & spring semesters of the internship year (2 credits total).
  * Students completing an internship before dissertation defense must register for EPSY 8842 both fall & spring semesters of the internship year (1 credit each term).
EPSY 8843 - Internship - School Psychology (1.0 cr)
or EPSY 8842 - Internship: School Psychological Services (1.0 - 10.0 cr)

**Special Education**

The special education track offers specializations in deaf/hard-of-hearing, emotional behavior disorders, early childhood special education, learning disabilities, autism spectrum disorder, and developmental disabilities. Early involvement in research projects and the development of original research programs in such areas as instructional strategies, social and cognitive development, behavioral and psychological management, child development, and technology are encouraged. Special projects and training programs supplement academic studies.

The special education track focuses on the attainment of core competencies and related skills, since special education professionals share many common concerns and goals. A complementary emphasis is placed on problems unique to or extremely influential in the field, including social and cultural perceptions about disabilities; and federal, state, and local legislation regarding prevention and the care, treatment, education, training, and support of persons with disabilities.

Students take 66 credits distributed as follows: 24 credits EPSY core requirements, 9 credits EPSY electives, 18 credits special ed course requirements (9 credits can be used to satisfy EPSY elective requirement), and 24 thesis credits.

**Ed Psych Core Course Requirements**

Students must take 9 credits in at least two of these areas: learning/cognition, social/personality or history/systems; 6 credits in research methods; 6 credits in statistics; 3 credits in measurement/evaluation and 9 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

**Learning/Cognition, Social/Personality, History/Systems**

Take 9 or more credit(s) including 2 or more sub-requirements(s) from the following:

**learning/cognition**

- Take 0 or more course(s) from the following:
  - EPSY 5101 - Intelligence and Creativity (3.0 cr)
  - EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
  - EPSY 5114 - Psychology of Student Learning (3.0 cr)
  - EPSY 5119 - Mind, Brain, and Education (3.0 cr)
  - EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
  - EPSY 8112 - Mathematical Cognition (3.0 cr)
  - EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
  - EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
  - EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
  - CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
  - PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
  - PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
  - PSY 5054 - Psychology of Language (3.0 cr)
  - PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

**social/personality**

- Take 0 or more course(s) from the following:
  - EPSY 5135 - Human Relations Workshop (4.0 cr)
  - EPSY 5151 - Cooperative Learning (3.0 cr)
  - EPSY 5157 - Social Psychology of Education (3.0 cr)
  - EPSY 8132 - Personality Development and Socialization (3.0 cr)
  - EPSY 8157 - Key Topics and Issues in Applying Social Psychology to Education (3.0 cr)
  - EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)
  - CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
  - CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
  - PSY 5101 - Personality: Current Theory and Research (3.0 cr)
  - PSY 5135 - Psychology of Individual Differences (3.0 cr)
  - PSY 5202 - Attitudes and Social Behavior (3.0 cr)
  - PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
  - PSY 5205 - Applied Social Psychology (3.0 cr)
  - PSY 5207 - Personality and Social Behavior (3.0 cr)
  - PSY 8201 - Social Cognition (3.0 cr)
  - PSY 8202 - Close Relationships (3.0 cr)
  - PSY 8208 - Social Psychology: The Self (3.0 cr)
  - SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)

**history/systems**

- Take 0 or more course(s) from the following:
  - EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

**Research Methods**

EPSY 8694 - Research in Special Education (3.0 cr)
EPSY 8706 - Single Case Designs in Intervention Research (3.0 cr)

Statistics
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Measurement/Evaluation
Take 3 or more credit(s) from the following:
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
- EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
- EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
- EPSY 8265 - Factor Analysis (3.0 cr)
- EPSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
- EPSY 5865 - Advanced Psychological and Educational Measurement (4.0 cr)

EPSY Electives
9 credits of EPSY electives can be satisfied by special ed course requirements.

Special Ed Course Requirements
Students take 18 special ed credits in consultation with advisor. EPSY courses will satisfy 9 credits ed psych elective core requirement.

EPSY 8600 Special Topics: Special Education Issues - Grant Writing Seminar (3 credits)
EPSY 8701 - Doctoral Core Seminar: Special Education I (3.0 cr)
EPSY 8702 - Doctoral Core Seminar: Special Education II (3.0 cr)
EPSY 8xxx - Special Ed elective in consultation with adviser, 3 cr. (EPSY 8707 recommended, but not required)

- Requirements for this program are current for Fall 2018
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Certificate of Specialist in Educ/Sch Psych Svc

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students graduate preparation focuses on the knowledge and skills necessary to engage in provision of research-based school psychological practices within multi-tier systems of support to improve academic, social, behavioral, and emotional competence of children and youth, as well as to develop, implement, and use applied research in school settings. Students develop specific competencies through a broad range of didactic courses, research activities, and field placements, including practica and a full-year internship. The specialist certificate is designed for students who want to become practitioners. The school psychology specialist certificate is approved by the Minnesota Board of Teaching and the National Association of School Psychologists. Graduates are eligible for the Minnesota school psychologist credential, and the national certification in school psychology, as well as the school psychology credential in most states.

Accreditation
This program is accredited by National Association of School Psychologists (NASP).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must apply online submitting a department application, three letters of recommendation, and a statement of goals and interests. Applicants must also submit a one page critical issue essay, answering the following questions: What is the role of a school psychologist? What are the most critical educational issues school psychologists can help address? How would you like to contribute to addressing these issues in your future career?

Applications should be accompanied by official transcripts from all colleges and universities attended. The GRE General Test is required (no subject tests are required); an interview is also required for those who make the initial cut.

Applications are accepted for fall admission only (deadline November 15).

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

Students take 60 credits distributed as follows: 15 credits EPSY core courses, 6 credits EPSY electives, and 45 credits school psychology course requirements (6 credits can satisfy EPSY elective requirement). There is a written final exam.

Ed Psych Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits learning/cognition, 3 credits social/personality, 3 credits in research methods and 6 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Statistics
Take 3 or more credit(s) from the following:
• EPSY 5261 - Introductory Statistical Methods (3.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)

Measurement/Evaluation
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)

Learning/Cognition
School Psychology students in the Specialist Certificate program may submit a petition for EPSY 5659. Take 3 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8118 - Advanced Cognitive Psychology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

Social/Personality
EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)

Research Methods
Take 3 or more credit(s) from the following:
• EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
• EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

EPSY Electives
6 credits of EPSY electives can be satisfied by school psychology course requirements.

School Psychology Course Requirements
Students must take 36 credits required courses, 3 credits research problems and 6 credits electives.

Introductory Practicum (4 credits)
Students must take EPSY 8813 twice.

Intermediate Practicum (4 credits)
Students must take EPSY 8818 twice.

**EPSY 8818 - Intermediate Practicum in School Psychology (2.0 cr)**

**Internship (4 credits)**

Students must take EPSY 8842 twice for 4 credits total. Note: if additional electives are taken, students may enroll in one credit per semester of internship, as long as the total number of credits accrued while in the program is at least 60.

**EPSY 8842 - Internship: School Psychological Services (1.0 - 10.0 cr)**

**Additional Required Courses**

EPSY courses will satisfy 6 credits educational psychology elective core requirement.

**EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)**

**EPSY 8811 - Assessment in School Psychology I: Foundations of Academic Assessment (3.0 cr)**

**EPSY 8812 - Assessment in School Psychology II: Intellectual and Social-Emotional Domains (3.0 cr)**

**EPSY 8815 - Behavioral and Social Emotional Prevention and Intervention (3.0 cr)**

**EPSY 8816 - Academic Prevention and Intervention (3.0 cr)**

**EPSY 8817 - Problem Analysis and Consultation in School Psychology (3.0 cr)**

**EPSY 8821 - Issues in School Psychology (3.0 cr)**

**EPSY 8823 - Ethics and Professional Standards in School Psychology (3.0 cr)**

**Research Problems**

**EPSY 8822 - Research in School Psychology (3.0 cr)**

**Electives (6 credits)**

Students must take at least 6 credits electives selected in consultation with advisor.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Special education offers specializations in deaf/hard-of-hearing, emotional behavior disorders, early childhood special education, learning disabilities, autism, and developmental disabilities. Early involvement in research projects and the development of original research programs in such areas as instructional strategies, social and cognitive development, behavioral and psychological management, child development, and technology are encouraged. Special projects and training programs supplement academic studies.

The program focuses on the attainment of core competencies and related skills, since special education professionals share many common concerns and goals. A complementary emphasis is placed on problems unique to or extremely influential in the field, including social and cultural perceptions about disabilities, and federal, state, and local legislation regarding prevention and the care, treatment, education, training, and support of persons with disabilities.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

- PSY 8042 - Proseminar in Cognition, Brain, and Behavior (3.0 cr)

**Social/Personality**

Take 3 or more credit(s) from the following:

- EPSY 5135 - Human Relations Workshop (4.0 cr)
- EPSY 5151 - Cooperative Learning (3.0 cr)
- EPSY 5157 - Social Psychology of Education (3.0 cr)
- EPSY 8132 - Personality Development and Socialization (3.0 cr)
- EPSY 8819 - Emotion & Childhood Psychopathology (3.0 cr)
- PSY 5101 - Personality: Current Theory and Research (3.0 cr)
- PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)

Research Methods
EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

EPSY Electives
6 credits of EPSY electives can be satisfied by special education course requirements.

Special Education Course Requirements
EPSY courses will satisfy 6 credits Ed Psych elective core requirement.
EPSY 8694 - Research in Special Education (3.0 cr)
EPSY 8701 - Doctoral Core Seminar: Special Education I (3.0 cr)
EPSY 8702 - Doctoral Core Seminar: Special Education II (3.0 cr)
EPSY 8706 - Single Case Designs in Intervention Research (3.0 cr)
EPSY 8600 Special Topics: Grant Writing (3 cr.)
EPSY 8600 Special Topics: Math Res: Sts with Math Diff (3 cr.)
EPSY 8600 Special Topics: Reading Disabilities Research (3 cr.)

Electives
Students must take 15 credits electives from the following list. Other courses may be taken with permission of advisor.
Take 15 or more credit(s) from the following:
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
• EPSY 8600 - Special Topics: Special Education Issues (1.0 - 3.0 cr)
• OLPD 5344 - School Law (3.0 cr)

Specialist Project
Take 9 or more credit(s) from the following:
• EPSY 8993 - Directed Study: Educational Psychology (1.0 - 10.0 cr)
• EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 30 to 31  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's of education (MEd) Plan C in family education develops and strengthens professionals' competencies to work with individuals and families to enhance family life. This graduate-level, practitioner-based program is offered by the Department of Family Social Science (FSoS). The program prepares licensed teachers to further develop their knowledge and skills in the family education field, or non-licensed professionals to work with adults, youth, or children in a variety of settings. This program prepares parent educators for positions in an early childhood family education (ECFE) program in Minnesota, as well as for positions in health care, social service agencies, and religious settings in Minnesota and in other states and countries. Diversity and cultural responsiveness are integrated throughout coursework, student teaching, and observation experiences. Students may fulfill requirements for a parent educator license, parent education certificate, or community and learning certificate as part of this degree. With guidance from faculty advisors, students choose at least 30 semester credits of work that may include courses and independent study.

**Program Delivery**  
This program is available:  
- completely online (all program coursework can be completed online)  
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

**Prerequisites for Admission**  
A bachelor's degree from an accredited institution in family studies, child psychology, early childhood education, nutrition, or related fields. A 2.80 overall GPA in undergraduate work.

**Special Application Requirements:**  
Application deadline is March 1. Apply Online at  
https://app.applyyourself.com/AYApplicantLogin/fi_ApplicantConnectLogin.asp?id=UMN-GRAD

For program specific application details see http://www.cehd.umn.edu/FSoS/programs/medapply.asp

International Students: Please note, this program is not offered full-time and therefore is not intended for international students needing a visa to study in the US.

International applicants must submit score(s) from one of the following tests:  
- TOEFL  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Paper Based - Total Score: 550  
- IELTS  
  - Total Score: 6.5  
- MELAB  
  - Final score: 80

The preferred English language test is Test of English as Foreign Language
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 30 to 31 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Family education MEd requires 30 credits in consultation with the adviser.

Students complete: 15 credits in family education, including FSoS 5902 Family Education Perspectives (3 cr); 5-6 credits in coursework with a focus on educational processes that are not limited to a specific subject matter (family ed courses do not count for this (e.g., FSoS 5949)); 9-10 credits in coursework with a supporting focus on family, children, and/or youth issues; a degree completion interview/examination.

Required Coursework

FSoS 5902 - Family Education Perspectives (3.0 cr)

Recommended Coursework

Recommended courses that fulfill the major area of family education are within the department and include:

FSoS 5932 - Introduction to Parent Education (1.0 cr)

or FSoS 5937 - Parent-Child Interaction (3.0 cr)

or FSoS 5942 - Everyday Experiences of Families (2.0 cr)

or FSoS 5943 - Parent Learning and Development: Implications for Parent Education (2.0 cr)

or FSoS 5944 - Parent Education Curriculum (2.0 cr)

or FSoS 5945 - Teaching and Learning in Parent Education (2.0 cr)

or FSoS 5946 - Assessment and Evaluation in Parent Education (2.0 cr)

or FSoS 5949 - Student Teaching in Parent Education (2.0 cr)

or OLPD 5201 - Strategies for Teaching Adults (3.0 cr)

or CI 5351 - Technology Tools for Educators (3.0 cr)

or CPSY 4302 - Infant Development (3.0 cr)

or CPSY 4331 - Social and Personality Development (3.0 cr)

Educational Processes

Supporting Focus: Family/Children/Youth

FSoS 5946 - Assessment and Evaluation in Parent Education (2.0 cr)

or FSoS 5949 - Student Teaching in Parent Education (2.0 cr)

or CPSY 4302 - Infant Development (3.0 cr)

or CPSY 4331 - Social and Personality Development (3.0 cr)

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Parent Education Teaching License

A teacher of parent and family education is authorized to instruct parents in an early childhood family education (ECFE) program. A parent educator plans, coordinates, and teaches in an instructional program that addresses the intellectual, emotional, cultural, social, and physical needs of both parents and children. Parent education seeks to support respectful, reciprocal interactions between parents and their children.

In Minnesota, a parent educator license is required for employment in an ECFE program. The purpose of the license is to ensure, through scholarly preparation, that parent educators are well-prepared professionals who are qualified to deliver educational programs for parents.
Coursework for the sub plan MEd is organized by teaching license requirements.

Application deadlines are sub plan MEd are March 1 and October 1.

**MEd Required Course**
- FSOS 5902 - Family Education Perspectives (3.0 cr)

**Parenting Ed Courses**
- FSOS 5932 - Introduction to Parent Education (1.0 cr)
- FSOS 5937 - Parent-Child Interaction (3.0 cr)
- FSOS 5942 - Everyday Experiences of Families (2.0 cr)
- FSOS 5943 - Parent Learning and Development: Implications for Parent Education (2.0 cr)
- FSOS 5944 - Parent Education Curriculum (2.0 cr)
- FSOS 5945 - Teaching and Learning in Parent Education (2.0 cr)
- FSOS 5946 - Assessment and Evaluation in Parent Education (2.0 cr)
- FSOS 5949 - Student Teaching in Parent Education (2.0 cr)

**Child Development, Human Relations, & Fundamentals of Drug & Alcohol Abuse**
- CPSY 4302 - Infant Development (3.0 cr)
- CPSY 4331 - Social and Personality Development (3.0 cr)
- EPSY 5135 - Human Relations Workshop (4.0 cr)
- PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

**M.Ed. Elective Education Processes**
- OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
  or CI 5351 - Technology Tools for Educators (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 32
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Family Social Science offers a unique program of study using the insights and methods of the social sciences to examine how families work within various contexts and cultures.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Three overall criteria guide admissions decisions: 1) evidence of strong academic preparation and the ability and desire to perform graduate level scholarship, including research; 2) fit of the applicant's professional goals with family social science (FSoS) faculty scholarship and with the overall FSoS mission, that is, enhancing the well-being of diverse families in a changing world; and 3) unique contributions applicant would make to FSoS values, including social relevance, collaboration, inclusiveness, excellence, innovation, and diversity.

Special Application Requirements:
For more information about application requirements and procedures, consult the Family Social Science web page at http://www.cehd.umn.edu/fsos/.

Applicants for the master's program are reviewed only once per year. The application deadline is March 1 for admission for the following fall semester.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the
Program Requirements

Plan A: Plan A requires 14 to 19 major credits, 3 to 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 19 to 23 major credits and 3 to 7 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Students must demonstrate familiarity with the tools of research or scholarship in the field of family social science or prevention science, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project.

The project should involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The graduate faculty specifies both the nature and extent of the options available to satisfy this requirement, and whether the requirement is to be satisfied in conjunction with, or independent of, the courses in the student's program.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.50 is required for students to remain in good standing.

The MA program is offered under Plan A and Plan B. The Plan A master's is recommended for students who intend to pursue a PhD degree. The Plan B master's is for students who wish to further their education so that they may hold positions of responsibility serving families. Although the instruction is based on research, the Plan B degree is not intended to provide intensive research training. The Plan B program is understood to be a terminal degree and is not recommended for students who intend to pursue the PhD degree. Consult the department for the most current information.

Plan A
Plan A requires at least 30 credits, including at least 20 course credits, of which 6 credits are outside the department in a related field, and 10 thesis credits.

FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
FSOS 5015 - Family Research Laboratory (1.0 cr)
FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
FSOS 8200 - Orientation for Family Social Science (1.0 cr)
FSOS Elective
One FSOS course (3.0 cr)
or One PREV course (3.0 cr)

Statistical Methods
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Thesis Credits
Take 10 or more credit(s) from the following:
• FSOS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Plan B requires at least 30 credits, including at least 26 course credits, of which 3 credits are outside the department in a related field, and at least 4 credits for a Plan B project.

FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
FSOS 8200 - Orientation for Family Social Science (1.0 cr)
One of the following research methods course(s).
FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
FSOS 5015 - Family Research Laboratory (1.0 cr)
or FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
or Evaluation research methods course (3.0 cr)

Electives
FSOS/PREV courses (12-13 cr)
FSOS Elective
or PREV Elective

Statistical Methods
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)
or EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
or One course outside FSOS (3.0 cr)

**Family Science Plan B Project**
Take exactly 1 course(s) totaling exactly 4 credit(s) from the following:

### Program Sub-plans
A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

#### Prevention Science
This sub-plan is limited to students completing the program under Plan A or Plan B.

Understanding & Using What Works:

How can communities support families that have experienced trauma? What are the root causes of addictive behavior? And what strategies work best to promote the wellbeing of children and families?

Prevention Science equips students, scholars, and professionals across a range of fields to answer these questions and confront many of the daunting challenges facing today’s families and communities. The Master's in Prevention Science is grounded in the belief that our greatest hope for improving the lives of children and families is comprehensive, multi-disciplinary training and education that bridges research and practice.

The Prevention Science Plan A requires at least 32 credits, including at least 22 course credits of which 3 credits are outside the department in a related field, and 10 thesis credits.

**Plan A**
- FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
- FSOS 5015 - Family Research Laboratory (1.0 cr)
- FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- FSOS 5701 - Prevention Science: Principles and Practices (3.0 cr)
  - or PREV 8001 - Prevention Science: Principles and Practices (3.0 cr)
- FSOS 5702 - Prevention Science Research Methodology (3.0 cr)
  - or PREV 8002 - Prevention Science Research Methodology (3.0 cr)
- FSOS 5703 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)
  - or PREV 8003 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)

Take 1 or more course(s) totaling exactly 3 credit(s) from the following:
- FSOS 8193 - Directed Study in Family Social Science (1.0 - 6.0 cr)

**Thesis Credits**
Take 1 or more course(s) totaling exactly 10 credit(s) from the following:
- FSOS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan B**
- FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
- FSOS 5015 - Family Research Laboratory (1.0 cr)
- FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- FSOS 5701 - Prevention Science: Principles and Practices (3.0 cr)
  - or PREV 8001 - Prevention Science: Principles and Practices (3.0 cr)
- FSOS 5702 - Prevention Science Research Methodology (3.0 cr)
  - or PREV 8002 - Prevention Science Research Methodology (3.0 cr)
- FSOS 5703 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)
  - or PREV 8003 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)

**Independent Study in Prevention Science**
Take 1 or more course(s) totaling exactly 3 credit(s) from the following:
- FSOS 8193 - Directed Study in Family Social Science (1.0 - 6.0 cr)

**Electives**
Four additional credits of elective courses from student's area of concentration.

**Plan B Project**
Take 1 or more course(s) totaling exactly 4 credit(s) from the following:
- FSOS 8755 - Master's Paper: Plan B Project (1.0 - 6.0 cr)

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program of study for the family social science graduate minor uses methods of social science to examine family systems and their interactions with various environments. The curriculum supports study in core family social science coursework including family theories, family research methods, and core family content.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Master’s students must complete at least 6 credits of 5xxx or 8xxx coursework in family social science.

Doctoral students must complete at least 12 credits of 5xxx or 8xxx coursework in family social science.

All courses for the minor must be taken A-F and completed with a GPA of at least 3.00.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral
Required
Take 12 or more credit(s) from the following:

Required
• FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
• FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)
• FSOS 8xxx
• FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
• FSOS 5015 - Family Research Laboratory (1.0 cr)
• or FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
or FSOS 8014 - Quantitative Family Research Methods II (3.0 cr)

Masters

Required
Take 6 or more credit(s) from the following:
• FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)

FSOS Electives
• FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)
• FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
• FSOS 5015 - Family Research Laboratory (1.0 cr)
• FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
• FSOS 8014 - Quantitative Family Research Methods II (3.0 cr)
Family Social Science Ph.D.
College of Education and Human Development

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 72 to 75
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Family social science (FSoS) offers a unique program of study using insights and methods of the social sciences to examine how families work within various contexts and cultures. A doctoral degree in family social science provides a broad foundation of expertise in theory, research, and practice.

Your program of study will include research and coursework across the breadth of family social science, including child adjustment in family context; families and culture; families and financial decisions; family formation and intergenerational studies; families, loss, and trauma; and intimate family relationships. Coursework and research engagement, along with intensive mentoring from faculty, prepares students to contribute to the broader field of family science.

Accreditation
This program is accredited by Commission on Accreditation for Marriage and Family Therapy Education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Three overall criteria guide admissions decisions: 1) evidence of strong academic preparation and the ability and desire to perform graduate level scholarship, including research; 2) fit of the applicant's professional goals with family social science (FSoS) faculty scholarship and with the overall FSoS mission, that is, enhancing the well-being of diverse families in a changing world; and 3) unique contributions the applicant would make to FSoS values, including social relevance, collaboration, inclusiveness, excellence, innovation, and diversity.

Special Application Requirements:
Family Science Specialization:
Students may apply for admission to the Family Science Ph.D. specialization after completing either a Bachelor's degree or a Master's degree. If you do not already hold a Master's degree, you may apply for the combined Master's/Ph.D. Program.

Couple & Family Therapy Specialization:
The Couple & Family Therapy Ph.D. specialization features rigorous training in couple and family therapy research informed by diverse disciplines and perspectives.

This specialization is accredited by the Commission on Accreditation for Marriage and Family Therapy Education. Admission to the Couple & Family Therapy specialization is available to applicants who have already obtained a clinical Master's degree, or have achieved equivalent clinical experience as determined by the CFT Faculty.
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

48 to 51 credits are required in the major.

0 credits are required outside the major.

24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.5 is required for students to remain in good standing.

Courses in the PhD degree program must contribute to an organized program of study and research. The program requires at least 72 credits, including a minimum of 48 course credits and 24 dissertation credits. Coursework includes at least 23 credits in core family theory and research methods, 9 credits in statistics, and 7 directed research credits. In addition, students complete one of two designated specializations: family science (9 additional credits) or couple and family therapy (12 additional credits). An optional teaching internship program is recommended for students who are planning for careers in higher education.

Major field credits: Depending on previous preparation and the nature of the research undertaken, the number of credits required for individual students, even within the same major field, may vary considerably.

Core Requirements

Take the following courses for a total of 23 credits:

- FSOS 8200 - Orientation for Family Social Science (1.0 cr)
- FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
- FSOS 8002 - Advanced Family Conceptual Frameworks (3.0 cr)
- FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
- FSOS 8015 - Advanced Qualitative Family Research Methods (3.0 cr)
- FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
- FSOS 5015 - Family Research Laboratory (1.0 cr)
- FSOS 8014 - Quantitative Family Research Methods II (3.0 cr)
- FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)

Directed Research

Take FSOS 8794 during the first three years of the program, for a total of 7 credits.

Take 7 or more credit(s) from the following:

- FSOS 8794 - Directed Research in Family Social Science (1.0 - 6.0 cr)

Statistics or Methods

Take one of the following statistics/methods sequences for a total of 9 credits:

**Family Science**

- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- Advanced Statistics or Methods (3.0 cr)
  - or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
  - or EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
or EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
or NURS 8185 - Qualitative Data Analysis for Health Care Research (3.0 - 4.0 cr)
or NURS 8195 - Mixed Methods in the Social, Behavioral, and Applied Health Sciences (3.0 cr)
or Couple & Family Therapy
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)
FSOS 8036 - Couple/Marriage and Family Therapy Research (3.0 cr)

Specialization Requirements

Family Science Specialization

Family Science Electives
Take at least 6 credits in consultation with advisor.
FSOS Elective
or PREV 8001 - Prevention Science: Principles and Practices (3.0 cr)

Community/Engagement/Internship Experience
Take 3 credits of coursework to fulfill the specialization's community, engagement, or internship experience requirement, chosen in consultation with advisor.
FSOS 8193 - Directed Study in Family Social Science (1.0 - 6.0 cr)
or Elective (3.0 cr)

-COR-

Couple & Family Therapy Specialization Requirements

Family Therapy Supervision
Take 3 or more credit(s) from the following:
• FSOS 8034 - Marriage and Family Therapy Supervision (3.0 cr)

Family Therapy Practicum
Take FSOS 8295 twice for a total of 6 credits.
Take 6 or more credit(s) from the following:
• FSOS 8295 - Couple/Marriage Family Therapy Practicum (1.0 - 6.0 cr)

Family Therapy Internship
Take 3 or more credit(s) from the following:
• FSOS 8296 - Couple/Marriage Family Therapy Internship (1.0 - 12.0 cr)
Twin Cities Campus
Human Resource Development M.Ed.
Organizational Leadership, Policy and Development

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (MEd)/professional studies program in human resource development (HRD) focuses on training of human resources and organizational change issues. This graduate-level, practitioner-based program can be tailored to meet the needs of individual students. The HRD program is offered by the Department of Organizational Leadership, Policy, and Development (OLPD) in the College of Education and Human Development (CEHD). Courses at the University of Minnesota campus are offered at a variety of times, including late afternoons and evenings. Students may also enroll in courses offered during the summer and at off-campus sites.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Special Application Requirements:
In addition to Statements #1 & 2, applicants must upload or submit a résumé and personal statement describing their career goals and rationale for interest in the M.Ed. program (limit two pages) along with the application. Two letters of recommendation must also be submitted. Applications are accepted on a rolling basis with semester deadlines of March 1 (Summer), July 1 (Fall) and November 1 (Spring).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 22 major credits and 12 credits outside the major. The is no final exam.
This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Course Requirements
Students not holding an undergraduate degree in HRD must complete at least 34 credits, including the following courses listed below.

Note: For OLPD 5696 at least 4 credits are required and no more than 6 credits will count toward the program.

OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5607 - Organization Development (3.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)

Twelve (12) elective credits approved by a faculty adviser.

U of M HRD UG Degree Continuing Students
Students holding an undergraduate HRD degree from the University of Minnesota will not be required to retake courses completed during the undergraduate program. Students must still take a total of 34 credits of graduate coursework in the program. Of this, students must complete at least 16 credits in HRD-designated courses as described below. Note: For OLPD 5696 at least 4 credits are required and no more than 6 credits will count toward the program.

Required Courses (16 cr)
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)

Option 1 (6 cr)
Organization Development Specialization
OLPD 5607 - Organization Development (3.0 cr)
OLPD 8602 - Advanced Organization Development (3.0 cr)

Option 2 (6 cr)
Training and Development Specialization
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 8601 - Advanced Training and Development of Human Resources (3.0 cr)

Additional HRD Courses (6 cr)
6 additional HRD credits approved by faculty adviser

Electives (12 cr)
12 elective credits approved by faculty adviser

Program Sub-plans
A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

Rochester
Requirements for the Rochester sub-plan are the same as those listed in general description. Students may take courses on Twin Cities or Rochester campuses.
**Twin Cities Campus**

**Human Resource Development Postbaccalaureate Certificate**

Organizational Leadership, Policy and Development

**College of Education and Human Development**

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 14
- This program does not require summer semesters for timely completion.
- Degree: Human Resource Development PBacc Cert Grad

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The certificate program in human resource development (HRD) focuses on training of human resources and organizational change issues. The HRD program is offered by the Organizational Leadership, Policy, and Development (OLPD) in the College of Education and Human Development (CEHD). Courses at the University of Minnesota campus are offered at a variety of times, including late afternoons and evenings.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

**Special Application Requirements:**
Admission is open to degree-seeking or non-degree seeking students who possess a U.S. bachelor’s degree (or international equivalent). Applications are reviewed on an ongoing basis and may be submitted at any time.

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

**Required Courses**

- OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)
- OLPD 5615 - Training and Development of Human Resources (3.0 cr)
- OLPD 5607 - Organization Development (3.0 cr)

**Internship or Field Experience**

4 credits is recommended for either option below

Take exactly 1 course(s) totaling 3 - 6 credit(s) from the following:

- OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
- OLPD 5296 - Field Experience in Adult Education (1.0 - 6.0 cr)

**Electives**
The remaining credits can be selected from the following:

- OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
or Additional OLPD courses with adviser approval to make total credits earned equal at least 14 credits.
Twin Cities Campus
Infant and Early Childhood Mental Health Graduate Minor
Institute of Child Development
College of Education and Human Development

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 9 to 12
• Length of program in credits (Doctorate): 12 to 15
• This program does not require summer semesters for timely completion.
• Students will have the option to complete a field study at a location of their choosing. This will not be a requirement of the minor, however.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program will provide students across diverse disciplines and training programs with access to foundational learning from the field of Infant and Early Childhood Mental Health (IECMH). Students will gain knowledge of developmental processes related to competence, psychopathology, and resilience in the application of theory and research to early childhood and multi-generational practice and policy.

Program Delivery
This program is available:
• completely online (all program coursework can be completed online)

Prerequisites for Admission
Students must be actively pursuing a masters or doctoral degree at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Required Courses
Three foundational courses, for a total of 9 credits, are required for both the masters and doctoral minor.
CPSY 5518 - Prevention and Intervention in Early Childhood: Principles (3.0 cr)
CPSY 5503 - Development and Psychopathology in Early Childhood (3.0 cr)
CPSY 5513 - Early Childhood Assessment (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Optional Field Experience
Students pursuing the IECMH masters-level minor may take up to 3 credits of CPSY 5996 in addition to the 9 required course credits.
CPSY 5996 is an optional opportunity that not required for the minor.
CPSY 5996 - Field Experience in Applied Child and Adolescent Development (1.0 - 12.0 cr)
Doctoral

**Required Observation Courses**
Take exactly 3 course(s) totaling exactly 3 credit(s) from the following:
- CPSY 5506 - Infant Observation Seminar I (1.0 cr)
- CPSY 5508 - Infant Observation Seminar II (1.0 cr)
- CPSY 5511 - Infant Observation Seminar III (1.0 cr)

**Optional Field Experience**
Students pursuing the IECMH doctoral-level minor may take 3 credits of CPSY 5996 in addition to the 12 required course credits. CPSY 5996 is an optional opportunity that not required for the minor.
Take exactly 3 credit(s) from the following:
- CPSY 5996 - Field Experience in Applied Child and Adolescent Development (1.0 - 12.0 cr)
Twin Cities Campus
Infant and Early Childhood Mental Health Postbaccalaureate Certificate
Institute of Child Development

- Requirements for this program are current for Fall 2018
- Length of program in credits: 20
- This program requires summer semesters for timely completion.
- Online.
- Degree: Infant & Early Childhood Mental Health PBac Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota online Infant and Early Childhood Mental Health (IECMH) Certificate Program is an intensive, interdisciplinary postbaccalaureate training program for students and professionals in domains of mental health, health and early care and education.

The program serves to deepen the knowledge and skills of individuals working in birth-to-five prevention, intervention, program administration, and policy development, and to prepare individuals to provide leadership in expanding the breadth and depth of relationship-based services and policies.

The IECMH certificate program is founded on a core set of principles of infant and early childhood mental health practice, asserting that services to families should be relationship-based, culturally sensitive, grounded in an understanding of developmental theory and research with special attention to the effects of trauma, and supported by reflective practice.

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants must hold at least a baccalaureate degree from an accredited college or university in a related area (e.g., child development, social work, child psychology) or document at least two years of work experience in a related field.

The admissions model is cohort-based, with new cohorts usually admitted every other year. Admission to this program is currently suspended, but may be opened for fall 2015 at a future time. Please see our website for more details: http://www.cehd.umn.edu/CEED/certificateprograms/iecmh/admissionprocess.html

Special Application Requirements:
Applicants must have at least two years of documented experience in early childhood research or practice.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

Key to test abbreviations (TOEFL, IELTS).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Course requirements
CPSY 5996 must be taken for 2 credits
- CPSY 5501 - Foundations in Infant and Early Childhood Mental Health I (3.0 cr)
- CPSY 5503 - Development and Psychopathology in Early Childhood (3.0 cr)
- CPSY 5506 - Infant Observation Seminar I (1.0 cr)
- CPSY 5508 - Infant Observation Seminar II (1.0 cr)
- CPSY 5511 - Infant Observation Seminar III (1.0 cr)
- CPSY 5513 - Early Childhood Assessment (3.0 cr)
- CPSY 5518 - Prevention and Intervention in Early Childhood: Principles (3.0 cr)
- CPSY 5521 - Prevention and Intervention in Early Childhood: Practice (3.0 cr)
- CPSY 5996 - Field Experience in Applied Child and Adolescent Development (1.0 - 12.0 cr)

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate-level academic minor in integrative leadership (ILM) will enhance the preparation of graduate students to lead and foster collective actions across boundaries of individuals, groups, organizations, sectors, and nations to solve some of the world's most pressing and complex problems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Prior admission into an established master's, doctoral, or graduate professional degree program is required. Students interested in admission to the minor should contact the ILM director of graduate studies. Admission requires the addition of the required minor coursework to the student's graduate degree program form and the ILM director of graduate studies's signature on the form. Students must demonstrate relevant academic background and experience.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Any student in any University of Minnesota graduate or professional program, regardless of college or enrollment, is encouraged to apply for this minor. Students must already be admitted to a master's, doctoral, or professional degree program at the University of Minnesota.

Doctoral students will need to take an additional course from either the Overview of Leadership Theory or Leading Engagement Processes subgroups to total the 12 credits required of the doctoral minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral
Overview of Leadership Theory
Take 3 - 6 credit(s) from the following:
- OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
• OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)
• PA 5011 - Management of Organizations (3.0 cr)
• PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)
• Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the Director of Graduate Studies for the Integrative Leadership Minor.

Leading Engagement Processes
If student is taking PA 5990 to fulfill this requirement it should be for section called "Neighborhood Collaborative Engagement (CHANCE)."

MGMT 6035 is cross listed with LAW 6626.
Take 3 - 6 credit(s) from the following:
• MGMT 6035 - Complex and Cross-Cultural Negotiations (2.0 cr)
• MGMT 6410 - Corporate Responsibility (2.0 cr)
• OLPD 5736 - Public Engagement and Higher Education (3.0 cr)
• OLPD 6490 - Managing Civic Engagement (3.0 cr)
• PA 5145 - Civic Participation in Public Affairs (3.0 cr)
• PA 5253 - Designing Planning and Participation Processes (3.0 cr)
• PA 5990 - Topics: Public Affairs - General Topics (0.0 - 3.0 cr)
• PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
• Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the Director of Graduate Studies for the Integrative Leadership Minor.

Required Final Course
All students must take one of the following:
GCC 5023 - Grand Challenge: Leading Across Sectors to Address Grand Challenges [CIV] (3.0 cr)
or LAW 6623 - Integrative Leadership: From Theory to Practice (3.0 cr)
or MGMT 6402 - Integrative Leadership: From Theory to Practice (3.0 cr)
or OLPD 6402 - Integrative Leadership Seminar (3.0 cr)
or PA 5105 - Integrative Leadership Seminar (3.0 cr)
or PUBH 6702 - Integrative Leadership Seminar (3.0 cr)

Additional Coursework
A minimum of 3 additional credits must be selected from the list of electives below. With permission from the ILM director of graduate studies, students with sufficient background and previous course experience equivalent to one or more courses within the curriculum may apply for waiver of appropriate requirements and replace waived courses with additional electives. PA 5190 is a topics course and topic must be approved by ILM director of graduate studies prior to registering for course.
IBUS 6316 - Sustainability & Cooperative Advantage in Scandinavia (4.0 cr)
or MGMT 6004 - Negotiation Strategies (2.0 cr)
or MGMT 6032 - Strategic Alliances (2.0 cr)
or MGMT 6034 - Strategic Leadership (2.0 cr)
or MGMT 6035 - Complex and Cross-Cultural Negotiations (2.0 cr)
or MGMT 6040 - International Strategy and Organization (2.0 cr)
or NURS 7610 - System Leadership and Innovation (3.0 cr)
or OLPD 5323 - Women in Leadership (3.0 cr)
or OLPD 5332 - Personal Leadership and the Private College (3.0 cr)
or OLPD 8702 - Administration and Leadership in Higher Education (3.0 cr)
or PA 5103 - Leadership and Change (3.0 cr)
or PA 5190 - Topics in Public and Nonprofit Leadership and Management (1.0 - 3.0 cr)
or PA 5251 - Strategic Planning and Management (3.0 cr)
or PA 5405 - Public Policy Implementation (3.0 cr)
or PA 5920 - Skills Workshop (0.5 - 4.0 cr)
or PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)

Masters
Overview of Leadership Theory
Take 3 or more credit(s) from the following:
• OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
• OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)
• PA 5011 - Management of Organizations (3.0 cr)
• PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)
• Other Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the director of graduate studies for the integrative leadership minor.

Leading Engagement Processes
If student is taking PA 5990 to fulfill this requirement it should be for section called "Neighborhood Collaborative Engagement (CHANCE)."
MGMT 6035 is cross listed with LAW 6626.
Take 3 or more credit(s) from the following:
- MGMT 6035 - Complex and Cross-Cultural Negotiations (2.0 cr)
- MGMT 6410 - Corporate Responsibility (2.0 cr)
- OLPD 5736 - Public Engagement and Higher Education (3.0 cr)
- OLPD 6490 - Managing Civic Engagement (3.0 cr)
- PA 5145 - Civic Participation in Public Affairs (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 5990 - Topics: Public Affairs - General Topics (0.0 - 3.0 cr)
- PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
- Other
  Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the director of graduate studies for the integrative leadership minor.

**Required Final Course**
All students must take one course from the following:
- GCC 5023 - Grand Challenge: Leading Across Sectors to Address Grand Challenges [CIV] (3.0 cr)
- LAW 6623 - Integrative Leadership: From Theory to Practice (3.0 cr)
- MGMT 6402 - Integrative Leadership: From Theory to Practice (3.0 cr)
- OLPD 6402 - Integrative Leadership Seminar (3.0 cr)
- PA 5105 - Integrative Leadership Seminar (3.0 cr)
- PUBH 6702 - Integrative Leadership Seminar (3.0 cr)

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 9
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The interdisciplinary minor in international education is for students enrolled in any masters or doctoral program who wish to enter careers in research, consulting, administration, and teaching in an international context. The minor offers a coordinated set of courses from the Departments of Curriculum and Instruction; Educational Psychology; Organizational Leadership, Policy, and Development; the School of Kinesiology; and the Institute of Child Development.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Admission is contingent upon being admitted to a master's or a doctoral degree-granting program at the University of Minnesota. For an application form visit the international education minor website (http://www.cehd.umn.edu/olpd/grad-programs/CIDE/gradminor.html) or consult with the director of graduate studies for more information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Each program is developed in consultation with the student, the student's advisor, major director of graduate studies, and director of graduate studies for international education. Requirements include courses listed below. Electives from the University may be added with the advisor's consent and director of graduate studies approval.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Core Courses
Take 1 or more course(s) from the following:
• OLPD 5103 - Comparative Education (3.0 cr)
• OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
• OLPD 5121 - Educational Reform in International Context (3.0 cr)
• OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 8101 - International Education and Development (3.0 cr)
• OLPD 8103 - Comparative Education (3.0 cr)

**Area Specific Coursework**

Students interested in OLPD 5080 or OLPD 8087 should consult minor advisor prior to registration, as these courses can vary and may or may not be appropriate for this minor.

Take 6 or more credit(s) from the following:

- CI 5145 - Critical Pedagogy (3.0 cr)
- CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
- CI 8150 - Research Topics in Curriculum & Instruction (3.0 cr)
- CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
- CI 8650 - Seminar: Special Topics in Second Languages and Cultures Research (1.0 - 3.0 cr)
- EPSY 8403 - Social/Cultural Contexts: Counseling and Skills (3.0 cr)
- OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
- OLPD 5121 - Educational Reform in International Context (3.0 cr)
- OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
- OLPD 5612 - International Human Resource Development (3.0 cr)
- OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
- OLPD 8101 - International Education and Development (3.0 cr)
- OLPD 8842 - Comparative Systems in Organizational Leadership, Policy, and Development (3.0 cr)
- PA 5414 - Child Human Rights: Work and Education (3.0 cr)

**Doctoral Core Courses**

Students interested in OLPD 8087 should consult minor advisor prior to registration, as this course can vary and may or may not be appropriate for this minor.

Take 2 or more course(s) from the following:

- OLPD 5103 - Comparative Education (3.0 cr)
- OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
- OLPD 5121 - Educational Reform in International Context (3.0 cr)
- OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
- OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
- OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
- OLPD 8101 - International Education and Development (3.0 cr)
- OLPD 8103 - Comparative Education (3.0 cr)

**Area specific coursework**

Students interested in OLPD 5080 should consult minor advisor prior to registration, as this course can vary and may or may not be appropriate for this minor.

Take 6 or more credit(s) from the following:

- CI 5145 - Critical Pedagogy (3.0 cr)
- CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
- CI 8150 - Research Topics in Curriculum & Instruction (3.0 cr)
- CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
- CI 8650 - Seminar: Special Topics in Second Languages and Cultures Research (1.0 - 3.0 cr)
- EPSY 8403 - Social/Cultural Contexts: Counseling and Skills (3.0 cr)
- OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
- OLPD 5121 - Educational Reform in International Context (3.0 cr)
- OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
- OLPD 5612 - International Human Resource Development (3.0 cr)
- OLPD 8101 - International Education and Development (3.0 cr)
- OLPD 8842 - Comparative Systems in Organizational Leadership, Policy, and Development (3.0 cr)
- PA 5414 - Child Human Rights: Work and Education (3.0 cr)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in interpersonal relationships research provides doctoral students with a broad theoretical and methodological foundation for research on behavioral interaction patterns between two persons and the impact of these interactions.

A recently recognized and rapidly advancing interdisciplinary field of scientific inquiry, interpersonal relationships research has its roots in psychology, sociology, family studies, communication, and nursing. The program brings together faculty and students from eight University departments and schools.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the interpersonal relationships research graduate minor is contingent upon prior admission to a doctoral program in a degree-granting department. Admission to the minor program is limited and only by permission of the director of graduate studies in interpersonal relationships research.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctrinal
Required Coursework
IREL 8001 - Proseminar in Interpersonal Relationships Research (2.0 cr)
IREL 8021 - Seminar: Statistical and Methodological Issues in Research on Dyadic Relationships (3.0 cr)
PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
or PSY 8202 - Close Relationships (3.0 cr)
6 additional credits selected in consultation with minor adviser.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: T E L: K-12 Technology Integration PBacc Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The K-12 Technology Integration certificate program prepares students to use technology (computers and the web) to develop instructional materials for use in a wide range of educational contexts (note that a university certificate program or certificate is distinct from a state certificate or certification).

The program is designed for K-12 teachers or administrators interested in using technology in the classroom.

Program Delivery
This program is available:
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A completed bachelor’s degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn’t earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page goal statement. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Courses (12 credits)
Required courses are listed; students will also take one additional CI 5xxx course for 3 credits that complements content area, elementary/secondary focus, and individual interests.
CI 5330 - Special Topics in Learning Technologies (3.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)
CI 5361 - Teaching and Learning with the Internet (2.0 - 3.0 cr)
Twin Cities Campus  
Kinesiology M.S.  
College of Education and Human Development

Website: http://cehd.umn.edu/kin

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Kinesiology spans a wide range of inquiry connected by the common thread of the study of human movement. Graduate programs reflect a broad study of physical activity ranging from exercise science, movement science, and human performance, to physical activity and sport science and sport management. Much of the research conducted in the school is interdisciplinary in nature and involves collaborative partnerships with life science disciplines such as medicine, neuroscience, and epidemiology and fosters links with business, education, and social sciences. MS students pursue an individualized program with an emphasis in one of the following areas: behavioral aspects of physical activity; biomechanics and neuromotor control; exercise physiology; perceptual-motor control and learning; physical activity and health; sport and exercise psychology; sport sociology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Although prospective masters students generally have an undergraduate degree in kinesiology or the health sciences, others with a baccalaureate degree who have related preparation and a significant background and interest in the scientific study of physical activity may be admitted.

Special Application Requirements:
Applicants must submit a University of Minnesota Graduate Admissions application which includes a written statement of academic interests, goals, and objectives; scores from the General Test of the GRE (verbal, quantitative, and analytical writing) that are less than five years old; three letters of recommendation from persons familiar with their scholarship and research potential; a scholarly writing sample; and transcripts.
Priority deadline for submission of all application materials is December 1 for the following fall admission. Students generally are admitted for the fall semester only.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 18 major credits and 12 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is an independent research project with the advisor that meets the following guidelines: Involves a total of approximately 120 hours of work; demonstrates familiarity with the tools of research and scholarship in the field of kinesiology; demonstrates the ability to work independently; and demonstrates the ability to effectively present the results of the investigation.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MS is offered under Plan A and Plan B. Plan A requires 30 credits, including at least 14 course credits in kinesiology, 6 course credits in a minor or related field (either of which must include a minimum of 3 credits in statistics as determined by faculty advisor) and 10 thesis credits (8777). Plan B also requires 30 credits, including at least 14 major course credits in kinesiology, a capstone project of 4 credits in KIN 8995, at least 6 course credits in a minor or related field (either of which must include a minimum of 3 credits in statistics as determined by faculty advisor), and 6 additional credits in any of these areas.

For both Plan A and Plan B, students must take KIN 5981 (3 cr), KIN 8980 (1 cr), and in the related field or minor, at least 3 credits of statistics or equivalent as defined by the faculty advisor. A GPA of at least 3.00 is required to maintain good academic standing and to graduate.

A maximum of 9 credits of 4xxx-level courses is allowed at the discretion of the faculty advisor.

Required courses

Students must complete the following courses and an area of emphasis listed below.

KIN 5981 · Research Methodology in Kinesiology and Sport Management (3.0 cr)
KIN 8980 · Graduate Research Seminar in Kinesiology (1.0 cr)

Plan A

Plan A students must take 10 credits of KIN 8777.

Plan B

Plan B students must take 4 credits of KIN 8995.

KIN 8995 · Research Problems in Kinesiology (1.0 - 12.0 cr)

Emphasis Areas

Kinesiology MS students concentrate their studies in one of the following areas: behavioral aspects of physical activity, biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, physical activity and health, sport and exercise psychology, or sport sociology.

Behavioral Aspects of Physical Activity

This emphasis examines behavioral interventions for physical activity adoption and maintenance; the epidemiology of physical activity; psychosocial theories related to physical activity promotion; understanding sedentary behavior; and the objective and subjective
assessment of physical activity. In addition to the MS requirements, students choose courses from the following lists with advisor consultation.

**Recommended courses**
Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list. Registration for KIN 5720 is limited to 3 credits.

- KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
- KIN 5125 - Advances in Physical Activity and Health (3.0 cr)
- KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
- KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- KIN 5371 - Sport and Society (3.0 cr)
- KIN 5375 - Youth Sport Science (3.0 cr)
- KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- KIN 5511 - Sport and Gender (3.0 cr)
- KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
- KIN 8126 - Sports Medicine Psychology (3.0 cr)
- KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)

**Minor or Related Field**
Either minor or related field is chosen, Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed below.

Recommended minor is public health, child psychology or psychology.

- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- PUBH 6094 - Obesity and Eating Disorder Interventions (2.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 6636 - Qualitative Research Methods in Public Health Practice (2.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)
- PUBH 6914 - Community Nutrition Intervention (3.0 cr)

-OR-

**Biomechanics and Neuromotor Control**
The study of human biomechanics with its focus on the mechanical and electrophysiological analysis of human motion is combined with the study of movement neuroscience. This emphasis area provides advanced knowledge for understanding how the human nervous system controls movement and how the neurological disease affects motor function.

**Recommended Courses**
A minimum of 10 major course credits (not including KIN 8777) are needed outside of the requirements and may be chosen from the following list.

- KIN 4441 - Movement Neuroscience (3.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
- KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
- KIN 8132 - Seminar: Motor Development (3.0 cr)
- KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
- KIN 8211 - Seminar: Perception and Action (3.0 cr)
- KIN 8995 - Research Problems in Kinesiology (1.0 - 12.0 cr)

**Minor or related field**
Either minor or related field is chosen, Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed below. Recommended minor is clinical physiology and movement science.

- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5303 - Designing Experiments (4.0 cr)
Exercise Physiology

Exercise physiology is the study of issues related to acute and chronic effects of physical activity on human physiological systems and health, and how fundamental concepts of human energetics and mechanics apply to exercise, sport, physical exertion, and health promotion. In addition to the MS requirements, students choose courses from the following lists with advisor consultation. Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list.

Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list.

KIN 5122 - Applied Exercise Physiology (3.0 cr)
KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
KIN 5142 - Applied Nutrition for Sport Performance and Optimal Health (3.0 cr)
KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
KIN 5435 - Advanced Theory and Techniques of Exercise Science (3.0 cr)
KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)
KIN 8122 - Seminar: Exercise Physiology (2.0 cr)

Minor or related field

Either minor or related field is chosen. Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed below.

Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list.

KIN 4133 - Perceptual-Motor Control and Learning (3.0 cr)
KIN 4134 - The Aging Motor System (3.0 cr)
KIN 4136 - Embodied Cognition (3.0 cr)
KIN 4441 - Movement Neuroscience (3.0 cr)
KIN 4520 - Current Topics in Kinesiology (2.0 - 4.0 cr)
HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
KIN 5992 - Readings in Kinesiology (1.0 - 9.0 cr)
KIN 8132 - Seminar: Motor Development (3.0 cr)
KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
KIN 8211 - Seminar: Perception and Action (3.0 cr)

Minor or related field

Either minor or related field is chosen. Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed below.

EPSY 5261 - Introductory Statistical Methods (3.0 cr)
-OR-
EPSY 5261 - Introductory Statistical Methods (3.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Physical Activity and Health

The emphasis area in Physical Activity and Health is intended to provide students with advanced study in physical activity and health promotion and disease prevention, as well as study designs from an epidemiological approach. The emphasis area provides a solid foundation sufficient to understand and conduct research in this field. In addition to the MS requirements, students choose courses from the following lists with advisor consultation.

**Recommended Courses**

A minimum of 10 semester course credits with KIN prefix. 4xxx level courses can only be taken at the discretion of the advisor.

- KIN 4214 - Health Promotion (3.0 cr)
- or KIN 5202 - Current Issues in Health (2.0 cr)
- or KIN 5203 - Health Media, Consumerism, and Communication (2.0 cr)
- or KIN 5122 - Applied Exercise Physiology (3.0 cr)
- or KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
- or KIN 5125 - Advances in Physical Activity and Health (3.0 cr)
- or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- or KIN 5142 - Applied Nutrition for Sport Performance and Optimal Health (3.0 cr)
- or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- or KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
- or KIN 8211 - Seminar: Perception and Action (3.0 cr)

**Minor or related field**

Either minor or related field is chosen, Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed.

- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- or EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- or PUBH 6450 - Biostatistics I (4.0 cr)
- or PUBH 6451 - Biostatistics II (4.0 cr)

-OR-

**Sport and Exercise Psychology**

The Sport and Exercise Psychology emphasis focuses on the thoughts, feelings, and actions of participants and professionals within physical activity contexts such as competitive sports, sports medicine and rehabilitation, exercise, and physical education. Scholars seek to understand the cognitive, affective, behavioral, and social mechanisms underlying interactions between the psychology of individual participants and influences of psychological climates within physical activity settings.

**Recommended Courses**

For Plan A and Plan B, a minimum of 10 major course credits are needed outside the requirements and may be chosen from the following list:

- KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
- or KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
- or KIN 5136 - Psychology of Coaching (3.0 cr)
- or KIN 5375 - Youth Sport Science (3.0 cr)
- or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
- or KIN 5723 - Psychology of Sport Injury and Rehabilitation (3.0 cr)
- or KIN 8126 - Sports Medicine Psychology (3.0 cr)
- or KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)
- or KIN 8696 - Internship: Applied Sport Psychology (3.0 - 6.0 cr)

**Minor or related field**

Either minor or related field is chosen, Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed.

Recommended minor is educational psychology.

- CPSY 5301 - Advanced Developmental Psychology (3.0 cr)
- or CPSY 5302 - Cognitive and Biological Development (3.0 cr)
- or CSPH 5706 - Lifestyle Medicine (2.0 cr)
- or CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
- or EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- or EPSY 8404 - Group Counseling: Theory, Applications, and Skills (3.0 cr)
- or EPSY 8406 - Professional Ethics for Counselors and Psychologists (3.0 cr)
- or GRAD 8101 - Teaching in Higher Education (3.0 cr)
- or GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
- or KIN 5371 - Sport and Society (3.0 cr)
Sport and Gender (3.0 cr)
Sport Management Ethics and Policy (3.0 cr)
Organization and Management of Physical Education and Sport (3.0 cr)
Prevention Science: Principles and Practices (3.0 cr)
Prevention Science Research Methodology (3.0 cr)
New Topics in Prevention: Implementation and Dissemination (3.0 cr)
Personality and Social Behavior (3.0 cr)
Social Psychology: The Self (3.0 cr)
Professional Standards and Ethics in Clinical Psychology (3.0 cr)
Fundamentals of Social and Behavioral Science (2.0 cr)
Injury Prevention in the Workplace, Community, and Home (2.0 cr)
Fundamentals of Epidemiology (3.0 cr)

OR-

Sport sociology is the scientific study of human behavior and social organization in the sport context, focusing on behavior patterns and social processes that occur in the organizational and management systems in which sport exists. The program is housed in the Tucker Center for Research on Girls & Women in Sport, an interdisciplinary research institute. In addition to the MS requirements, students choose courses from the following lists with advisor consultation.

Recommended Courses
For Plan A and Plan B, a minimum of 10 major course credits are needed outside the requirements and may be chosen from the following list:
- Motivational Interventions in Physical Activity (3.0 cr)
- Social Psychology of Sport & Physical Activity (3.0 cr)
- Psychology of Coaching (3.0 cr)
- Sport and Society (3.0 cr)
- Sport and Gender (3.0 cr)
- Organization and Management of Physical Education and Sport (3.0 cr)
- Legal Aspects of Sport and Recreation (4.0 cr)
- Developmental Sport and Exercise Psychology (3.0 cr)

Minor or related field
Either minor or related field is chosen. Plan A and Plan B students must take one statistics course with the consultation with their advisor. Plan A students take an additional 3 related-field (other emphasis areas of KIN or outside programs) credits and Plan B students take an additional 9 related-field credits in consultation with the advisor. Recommended courses for related fields are listed below.
- Comparative Indigenous Feminisms [GP] (3.0 cr)
- Media, Race, and Identity (3.0 cr)
- Qualitative Methods in Educational Psychology (3.0 cr)
- Introductory Statistical Methods (3.0 cr)
- Statistical Methods in Education I (3.0 cr)
- Statistical Methods in Education II (3.0 cr)
- Transnational Feminist Theory (3.0 cr)
- Topics: Theory, Knowledge, and Power (3.0 cr)
- Black Feminist Thought in the American and African Diasporas (3.0 cr)
- Intellectual History of Feminism (3.0 cr)
- Advanced Studies in Sexuality (3.0 cr)
- Feminist Theories of Knowledge (3.0 cr)
- Sport Management Ethics and Policy (3.0 cr)
- Research Methods in Social Psychology (3.0 cr)
- Sport, Culture & Society (3.0 cr)
- Sociological Research Methods (4.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Master's students can choose a kinesiology minor in the following emphasis areas: behavioral aspects of physical activity, biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, physical activity and health, sport and exercise psychology, and sport sociology. Doctoral students can pursue a kinesiology minor in these same emphasis areas, with the addition of the sport management emphasis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A master's minor requires at least 6 credits of graduate-level kinesiology courses. A doctoral minor requires at least 12 credits of graduate-level kinesiology courses. Courses should be chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
Minor Courses
Minor requires at least 6 credits of graduate-level kinesiology courses. Courses should be chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

Doctoral
Minor Courses
Minor requires at least 12 credits of graduate-level kinesiology courses. Courses should be chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Kinesiology spans a wide range of inquiry connected by the common thread of the study of human movement. Graduate programs reflect a broad study of physical activity ranging from exercise science, movement science, and human performance, to physical activity and sport science and sport management. Much of the research conducted in the school is interdisciplinary in nature and involves collaborative partnerships with life science disciplines such as medicine, neuroscience, and epidemiology and fosters links with business, education, and social sciences. MS students pursue an individualized program with an emphasis in one of the following areas: behavioral aspects of physical activity; biomechanics and neuromotor control; exercise physiology; perceptual-motor control and learning; physical activity and health; sport and exercise psychology; sport sociology.

PhD students pursue an individualized program with an emphasis in behavioral aspects of physical activity, biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, physical activity and health, sport and exercise psychology, sport management or sport sociology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

It is preferred that applicants have completed a master's degree in the field of kinesiology or a related field and achieved an overall minimum GPA of 3.50.

Other requirements to be completed before admission:
Applicants must have completed a baccalaureate degree, generally in the following areas: kinesiology; exercise science; sport management; sport psychology/sociology; movement science; or related preparation and significant background and interest in the scientific study of physical activity.

Special Application Requirements:
Applicants must submit a University of Minnesota application which includes a written statement of academic interests, goals, and objectives; scores from the General Test of the GRE (verbal, quantitative, and analytical writing) that are less than five years old; three recommendations from persons familiar with their scholarship and research potential; a scholarly writing sample; and transcripts. Submission of all application materials by December 1 ensures priority consideration for admission and for teaching and research assistantships awarded for the next academic year. Students are admitted for the fall semester only.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4.5
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

24 to 29 credits are required in the major.
12 to 19 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The PhD requires 36 to 48 course credits and 24 thesis credits. A minimum total of 60 credits and a maximum total of 72 credits are required to complete the program. Course credits include a minimum of 15 major program credits (including 3 credits of KIN 8980 Graduate Research Seminar), 6 credits in a supporting program or 12 credits in a doctoral minor, 6 research skills course credits, and 9 credits of mentored research experience. At least 6 major course credits, 6 research skills course credits, and 6 mentored experience course credits must be taken as a U of M enrolled student. A GPA of at least 3.00 is required to maintain good standing and to graduate.

**Required Kinesiology Courses**

A minimum of 3 credits of KIN 8980 and a minimum of 9 credits of KIN 8995 are required over the course of the program for all emphasis areas listed below.

- **KIN 8980** - Graduate Research Seminar in Kinesiology (1.0 cr)
- **KIN 8995** - Research Problems in Kinesiology (1.0 - 12.0 cr)

**Emphasis Areas**

Kinesiology PhD students pursue an individualized program with an emphasis in behavioral aspects of physical activity, biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, physical activity and health, sport and exercise psychology, sport management or sport sociology.

**Behavioral Aspects of Physical Activity**

Behavioral Aspects of Physical Activity examines behavioral interventions for physical activity adoption and maintenance; the epidemiology of physical activity; psycho-social theories related to physical activity promotion; understanding sedentary behavior; and the objective and subjective assessment of physical activity. Interdisciplinary research is conducted with other departments including medicine, nursing, public health, epidemiology, physiology, nutrition, psychology, etc.

**Emphasis courses**

A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx.

- **KIN 5123** - Motivational Interventions in Physical Activity (3.0 cr)
- **KIN 5125** - Advances in Physical Activity and Health (3.0 cr)
- **KIN 5126** - Social Psychology of Sport & Physical Activity (3.0 cr)
- **KIN 5141** - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- **KIN 5371** - Sport and Society (3.0 cr)
or KIN 5375 - Youth Sport Science (3.0 cr)
or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 8126 - Sports Medicine Psychology (3.0 cr)
or KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)

Research skills courses
A minimum 6-9 research skills courses credits are required, selected from the following list or in consultation with the advisor. Courses taken to fulfill the research skills courses requirement cannot be double counted to fulfill the supporting program requirement.

KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or EPSY 8251 - Statistical Methods in Education I (3.0 cr)
or EPSY 8252 - Statistical Methods in Education II (3.0 cr)
or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 6636 - Qualitative Research Methods in Public Health Practice (2.0 cr)
or PUBH 6673 - Grant Writing for Public Health (1.0 cr)
or PUBH 6810 - Survey Research Methods (3.0 cr)
or PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
or PUBH 7405 - Biostatistics: Regression (4.0 cr)
or PUBH 7406 - Advanced Regression and Design (4.0 cr)

Minor
Choose either minor or supporting program. A minimum of 12 course credits is required for a University of Minnesota doctoral minor. Recommended minor is: CSPH, PSY or PUBH.

Supporting program
Recommended supporting programs and courses include combining 6-13 credits of advisor-approved selections from other emphasis areas of kinesiology (KIN), such as (but not limited to) sport sociology or sport and exercise psychology.

PUBH 6025 - Designing e-Interventions for Public Health (2.0 cr)
or PUBH 6094 - Obesity and Eating Disorder Interventions (2.0 cr)
or PUBH 6102 - Issues in Environmental Health (2.0 cr)
or PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6914 - Community Nutrition Intervention (3.0 cr)
-OR-

Biomechanics and Neuromotor Control
The study of human biomechanics with its focus on the mechanical and electrophysiological analysis of human motion is combined with the study of movement neuroscience. This emphasis area provides advanced knowledge for understanding how the human nervous system controls movement and how the neurological disease affects motor function.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx.

KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
or KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
or KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
or KIN 8211 - Seminar: Perception and Action (3.0 cr)
or KIN 8132 - Seminar: Motor Development (3.0 cr)
or KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
or RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
or NSC 5661W - Behavioral Neuroscience [WI] (3.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor. Courses taken to fulfill the research skills courses requirement cannot be double counted to fulfill the supporting program requirement.

EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 7405 - Biostatistics: Regression (4.0 cr)
or PUBH 7406 - Advanced Regression and Design (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)
Minor
Choose either minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: CGSC, CPMS, GERO, HUMF, NSC, or PREV.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the advisor. Recommended kinesiology emphasis areas for supporting courses include exercise physiology, perceptual-motor control and learning, physical activity and sport science, or sport management. Recommended program areas for supporting courses include: BMEN, ME, NURS, OT, OTOL, PUBH, NSC and RSC.

KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
or KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)

-OR-

Exercise Physiology
Exercise physiology is the study of issues related to acute and chronic effects of physical activity on human physiological systems and health, and how fundamental concepts of human energetics and mechanics apply to exercise, sport, physical exertion, and health promotion. Doctoral students learn to apply principles of physiology to solving problems related to functional responses and adaptations involved in human skeletal muscular activity.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx. KIN 8122 may be taken multiple times.

KIN 5122 - Applied Exercise Physiology (3.0 cr)
or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
or KIN 5142 - Applied Nutrition for Sport Performance and Optimal Health (3.0 cr)
or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
or KIN 5435 - Advanced Theory and Techniques of Exercise Science (3.0 cr)
or KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
or KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
or KIN 5641 - Scientific Theory and Application of Training and Conditioning in Sport (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)
or KIN 8122 - Seminar: Exercise Physiology (2.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor. It is recommended to take a statistical sequence in either EPSY, STAT, or PUBH. It is not recommended to switch courses between departments unless agreed to by the advisor. Courses taken to fulfill the research skills courses requirement can't be double counted to fulfill the supporting program requirement.

EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 7405 - Biostatistics: Regression (4.0 cr)
or PUBH 7406 - Advanced Regression and Design (4.0 cr)
or PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
or PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)

Minor
Choose either a minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: CGSC, CPMS, GERO, HUMF, NSC, or PREV.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the advisor. Recommended kinesiology emphasis areas for supporting courses include biomechanics and neuromotor control, perceptual-motor control and learning, physical activity and sport science, or sport management. Recommended areas for supporting program include: BIOC, FSCN, OT, PHSL, PUBH, NSC, and RSC.

-OR-

Perceptual-Motor Control and Learning
Perceptual-motor control and learning includes related areas of movement behavior inquiry. Motor learning is the study of the learning of movement skills and the factors that mediate learning, such as practice, perceptual guidance, or knowledge of results. Although a lifespan approach is emphasized, students may focus on one or more specific age periods, such as early childhood, adolescence, adulthood or aging.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx.
KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
KIN 5643 - Applied Motion Capture and Movement Analysis Technology (3.0 cr)
KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
KIN 8211 - Seminar: Perception and Action (3.0 cr)
KIN 8132 - Seminar: Motor Development (3.0 cr)
KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor. It is recommended to take a statistical sequence in either EPSY, STAT, or PUBH. It is not recommended to switch courses between departments unless agreed to by the advisor. Courses taken to fulfill the research skills courses can't be double counted to fulfill the supporting program requirement.

EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 7405 - Biostatistics: Regression (4.0 cr)
PUBH 7406 - Advanced Regression and Design (4.0 cr)
STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
STAT 5302 - Applied Regression Analysis (4.0 cr)
STAT 5303 - Designing Experiments (4.0 cr)
STAT 5601 - Nonparametric Methods (3.0 cr)

Minor
Choose either a minor or supporting program. All University of Minnesota doctoral minors require a minimum of 12 credits. Recommended minors include CGSC, CPMS, GERO, HUMF, NSC, or PREV.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the advisor. Recommended kinesiology emphasis areas for supporting courses include biomechanics and neuromotor control, exercise physiology, physical activity and sport science, or sport management. Recommended programs for supporting courses include: BMEN, ME, NURS, OT, OTOL, PubH, NSC, and RSC. Specific KIN course recommendations include:
KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)

Physical Activity and Health
The emphasis area in Physical Activity and Health is intended to provide students with advanced study in physical activity and health promotion and disease prevention, as well as study designs from an epidemiological approach. The emphasis area will provide a solid foundation sufficient to understand and conduct research in this field.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx.

KIN 5202 - Current Issues in Health (2.0 cr)
KIN 5203 - Health Media, Consumerism, and Communication (2.0 cr)
KIN 5122 - Applied Exercise Physiology (3.0 cr)
KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
KIN 5125 - Advances in Physical Activity and Health (3.0 cr)
KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
KIN 5142 - Applied Nutrition for Sport Performance and Optimal Health (3.0 cr)
KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)
KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
KIN 8211 - Seminar: Perception and Action (3.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor. Courses taken to fulfill the research skills courses can't be double counted to fulfill the supporting program requirement.

KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 7405 - Biostatistics: Regression (4.0 cr)
PUBH 7406 - Advanced Regression and Design (4.0 cr)
or STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)

**Minor**

Choose either minor or supporting program, may include only 5xxx level courses or higher. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: CGSC, CPMS, GERo, CSPH, NSC, PREV, or PUBH.

**Supporting program**

Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the advisor. Recommended kinesiology emphasis areas for supporting courses include biomechanics and neuromotor control, exercise physiology, physical activity and sport science, or sport management. Recommended programs for supporting courses include: NURS, PUBH, NSC, RSC, CSPH, or PREV.

-OR-

**Sport and Exercise Psychology**

The Sport and Exercise Psychology emphasis focuses on the thoughts, feelings, and actions of participants and professionals within physical activity contexts such as competitive sports, sports medicine and rehabilitation, exercise, and physical education. Scholars seek to understand the cognitive, affective, behavioral, and social mechanisms underlying interactions between the psychology of individual participants and influences of psychological climates within physical activity settings.

**Emphasis courses**

A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx.

- KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
- KIN 5136 - Psychology of Coaching (3.0 cr)
- KIN 5375 - Youth Sport Science (3.0 cr)
- KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
- KIN 5723 - Psychology of Sport Injury and Rehabilitation (3.0 cr)
- KIN 8126 - Sports Medicine Psychology (3.0 cr)
- KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)
- KIN 8696 - Internship: Applied Sport Psychology (3.0 - 6.0 cr)

**Research skills courses**

A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor. Courses taken to fulfill the research skills courses requirement can't be double counted to fulfill the supporting program requirement.

- KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8265 - Factor Analysis (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)

**Minor**

Choose either minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: CPSY, EPSY or PSY.

**Supporting Program**

Recommended supporting program courses include combining 6-13 credits of advisor-approved selections from other emphasis areas within kinesiology (KIN), such as (but not limited to) behavioral aspects of physical activity (e.g.KIN 5123), sport sociology (e.g.KIN 5371 or KIN 5511) or sport management (e.g.KIN 5601 or KIN 5725) and/or from other graduate programs [e.g., CPSY, EPSY, PSY, CSPH, GRAD, PREV, or PUBH.]

- CPSY 5301 - Advanced Developmental Psychology (3.0 cr)
- CPSY 5302 - Cognitive and Biological Development (3.0 cr)
- CPSH 5706 - Lifestyle Medicine (2.0 cr)
- EPSY 8402 - Individual Counseling: Theories, Applications & Counseling Skills (4.0 cr)
- EPSY 8404 - Group Counseling: Theory, Applications, and Skills (3.0 cr)
- EPSY 8406 - Professional Ethics for Counselors and Psychologists (3.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
- KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
- KIN 5371 - Sport and Society (3.0 cr)
- KIN 5511 - Sport and Gender (3.0 cr)
- KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
- KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
- PREV 8001 - Prevention Science: Principles and Practices (3.0 cr)
- PREV 8002 - Prevention Science Research Methodology (3.0 cr)
- PREV 8003 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)
PSY 8208 - Social Psychology: The Self (3.0 cr)
PSY 8542 - Professional Standards and Ethics in Clinical Psychology (3.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (2.0 cr)
PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)

-OR-

Sport Management
This emphasis concentrates on the theoretical and practical dimensions of the management of athletic events, sports teams and facilities, and the sporting process. The management areas studied include those in the public sector (interscholastic and intercollegiate sport) as well as fitness and facility management. Sport management policy and ethics are also a focus of this emphasis area and research agenda.

Required courses
KIN 8128 - Doctoral Sport Management Seminar (3.0 cr)

Program courses
A minimum of 9 credits must be selected from the following list:
KIN 5375 - Youth Sport Science (3.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5371 - Sport and Society (3.0 cr)
or KIN 5421 - Sport Finance (3.0 cr)
or KIN 5461 - Issues in the Sport Industry (3.0 cr)
or KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
or KIN 5631 - Programming and Promotion in Sport (3.0 cr)
or KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
or KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor. Courses taken to fulfill the research skills courses requirement can't be double counted to fulfill the supporting program requirement.
KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
or OLPD 5056 - Case Studies for Policy Research (3.0 cr)
or OLPD 5061 - Ethnographic Research Methods (3.0 cr)
or OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
or EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or EPSY 8251 - Statistical Methods in Education I (3.0 cr)
or EPSY 8252 - Statistical Methods in Education II (3.0 cr)
or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8265 - Factor Analysis (3.0 cr)
or EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
or FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
or SOC 8801 - Sociological Research Methods (4.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)

Minor
Choose either a minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: public policy, COMM, EPSY, BA, or CI.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the advisor. Recommended kinesiology emphasis areas for supporting courses include biomechanics and neuromotor control, exercise physiology, physical activity and sport science, and perceptual-motor control and learning. Recommended program areas for supporting program courses include: OLPD, PA, COMM, marketing, and management.

-OR-

Sport Sociology
Sport Sociology is the scientific study of human behavior and social organization in the sport context with the primary objective to attempt to identify, describe and explain the role and relationship of sport in society. It focuses on the behavior patterns and social processes that occur in the sporting domain and explores the organizational and management systems and structures in which sport exists.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 3 credits must be KIN 8xxx.
KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
or KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
or KIN 5136 - Psychology of Coaching (3.0 cr)
or KIN 5371 - Sport and Society (3.0 cr)
or KIN 5375 - Youth Sport Science (3.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 5723 - Psychology of Sport Injury and Rehabilitation (3.0 cr)
or KIN 8126 - Sports Medicine Psychology (3.0 cr)
or KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)
or KIN 8696 - Internship: Applied Sport Psychology (3.0 - 6.0 cr)

**Research skills courses**

A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the advisor.

Courses taken to fulfill the research skills courses requirement can't be double counted to fulfill the supporting program requirement.

- AMST 8250 - Popular Culture and Politics in the 20th Century: Research Strategies (3.0 cr)
- AMST 8289 - Ethnographic Research Methods: Research Strategies in American Studies (3.0 cr)
- COMM 8211 - Critical Communication Studies: History, Theory, Method (3.0 cr)
- COMM 8451 - Seminar: Intercultural and Diversity Research (3.0 cr)
- COMM 8502 - Seminar: Communication Theory Construction (3.0 cr)
- EPSY 5247 - Research Methodology in Kinesiology and Sport Management (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- GWSS 8997 - Dissertation Seminar (1.0 - 3.0 cr)
- PSY 8209 - Research Methods in Social Psychology (3.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- SOC 8801 - Sociological Research Methods (4.0 cr)
- SOC 8811 - Advanced Social Statistics (4.0 cr)
- SOC 8890 - Advanced Topics in Research Methods (2.0 - 3.0 cr)

**Minor**

Choose either minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: AMST, COMM, CPSY, CSPH, EPSY, GWSS, PUBH, PSY or SOC.

**Supporting program**

Recommended supporting programs and courses include selections from EPSY, PSY, and CPSY minor programs as well as from other emphasis areas of kinesiology (KIN), such as behavioral aspects of physical activity, sport sociology, or sport management. Other relevant supporting program courses can be found in public health (PUBH), sociology (SOC), center for spirituality and healing (CSPH), or prevention science (PREV).

- AMST 5412 - Comparative Indigenous Feminisms [GP] (3.0 cr)
- AMST 8202 - Theoretical Foundations and Current Practice in American Studies (3.0 cr)
- AMST 8240 - Gender, Race, Class, Ethnicity, and Sexuality in the United States: Topical Development (3.0 cr)
- COMM 5221 - Media, Race, and Identity (3.0 cr)
- COMM 8210 - Seminar: Selected Topics in U.S. Electronic Media (3.0 cr)
- COMM 8211 - Critical Communication Studies: History, Theory, Method (3.0 cr)
- GWSS 5104 - Transnational Feminist Theory (3.0 cr)
- GWSS 5190 - Topics: Theory, Knowledge, and Power (3.0 cr)
- GWSS 5406 - Black Feminist Thought in the American and African Diasporas (3.0 cr)
- GWSS 8101 - Intellectual History of Feminism (3.0 cr)
- GWSS 8102 - Advanced Studies in Sexuality (3.0 cr)
- GWSS 8103 - Feminist Theories of Knowledge (3.0 cr)
- GWSS 8107 - Feminist Pedagogies (3.0 cr)
- GWSS 8108 - Genealogies of Feminist Theory (3.0 cr)
- GWSS 8109 - Feminist Knowledge Production (3.0 cr)
- GWSS 8201 - Feminist Theory and Methods in the Social Sciences (3.0 cr)
- GWSS 8220 - Seminar: Cultural Criticism and Media Studies (3.0 cr)
- GWSS 8220 - Seminar: Race, Representation and Resistance (3.0 cr)
- GWSS 8270 - Seminar: Theories of Body (3.0 cr)
- SOC 4451 - Sport, Culture & Society (3.0 cr)
- SOC 5455 - Sociology of Education (3.0 cr)
- SOC 8001 - Sociology as a Profession (1.0 cr)
- SOC 8011 - Teaching Sociology: Theory & Practice (3.0 cr)
- SOC 8211 - The Sociology of Race & Racialization (3.0 cr)
- SOC 8221 - Sociology of Gender (3.0 cr)
or SOC 8290 - Topics in Race, Class, Gender and other forms of Durable Inequality (3.0 cr)
or SOC 8701 - Sociological Theory (4.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (MEd)/professional studies program in leadership in education, offered jointly by the Department of Organizational Leadership, Policy, and Development (OLPD) and the Department of Curriculum and Instruction (C&I) in the College of Education and Human Development (CEHD), builds leadership skills and facilitates analysis of K-12 school culture, policies, and practice.

This program develops educational leaders who can serve in schools that foster continuous learning and improvement. Program participants are prepared to advance team, school-wide, and district-wide reform initiatives for coherent educational systems and programs. This program addresses formal and informal leadership methods, emphasizing the roles and contributions of teachers as leaders of instructional improvement, including ways that teachers and principals work together to promote collaborative school cultures.

This 30-semester credit program emphasizes the essential components of leadership, including collaboration, group dynamics, continuous professional learning, school policy, school culture, design and facilitation of improvement initiatives, innovations in teaching and assessment practice, creation of coherent learning experiences, cross-cultural education, and technology.

Students are encouraged to begin the program with other educators from the same school or district. Most students complete the degree in two to three years while continuing to teach full time. Some degree coursework is offered at convenient, off-campus sites in the Twin Cities area.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have teaching experience.

Special Application Requirements:
Applications are reviewed on an ongoing basis, but students are advised to submit application materials by the following preferred dates: November 1 (Spring), March 1 (Summer), July 1 (Fall). International students must apply six weeks earlier than those dates listed.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Course Requirements**

- OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)
- OLPD 5374 - Leadership for Professional Development (4.0 cr)
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
  - or OLPD 5387 - Leadership for Teaching and Learning (3.0 cr)
- CI 5177 - Practical Research (1.0 - 3.0 cr)
  - or OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
- OLPD 5361 - Project in Teacher Leadership (3.0 cr)

**Electives**

14 or more credits of elective courses with adviser approval. Students often choose elective credits aligned with certificates in staff development, school technology, reading, and school administration.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**Rochester**

This sub-plan is not accepting new students at this time. Course requirements are the same as the Twin Cities program.

**Singapore**

Course requirements are the same as the Twin Cities program.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (MED)/professional studies program in literacy education is designed to improve the quality of literacy education in K-12 schools. The program aims to address the growing state and national emphasis on pupils' reading skills and achievement.

The literacy education program provides instruction on current developments in literacy theory and research, as well as teaching methods for reading, writing, language, speech, and media studies. Students will learn to develop instructional units, evaluate and assess K-12 pupils' literacy skills, and develop technology tools to teach them. The program also encourages students to become "literacy leaders" in their schools and school systems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree from an accredited college or university.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a clearly written statement of career interests, goals, and objectives. Master's applications are reviewed by department faculty three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. The is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Coursework (6 credits)
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)

Literacy Education Requirements (18 credits)
Take 18 or more credit(s) from the following:
- CI 5402 - Introduction to Special Collections (3.0 cr)
- CI 5403 - Writing For and By Children (3.0 cr)
- CI 5404 - Multicultural Literature for Children and Adolescents (3.0 cr)
- CI 5410 - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
- CI 5417 - Elementary literacy Instruction for ESL Students (3.0 cr)
- CI 5422 - Teaching Writing in Schools (3.0 cr)
- CI 5431 - Introduction to Instructional Leadership in K-12 Reading (3.0 cr)
- CI 5432 - Instructional Leadership in Reading in Kindergarten and the Elementary Grades (3.0 cr)
- CI 5433 - Instructional Leadership in Reading for the Middle and Secondary Grades (3.0 cr)
- CI 5434 - Professional Development and Evolving Practice in K-12 Reading (3.0 cr)
- CI 5435 - Instructional Leadership in Preventing Reading Difficulties (3.0 cr)
- CI 5441 - Teaching Literature in the Secondary School (2.0 - 3.0 cr)
- CI 5442 - Literature for Adolescents (3.0 cr)
- CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
- CI 5461 - Teaching Composition in the Secondary School (3.0 cr)
- CI 5462 - Evaluating and Assessing Writing (3.0 cr)
- CI 5472 - Teaching Critical Media Analysis in Schools (3.0 cr)
- CI 5475 - Teaching Digital Writing (3.0 cr)

Electives (6 credits)
Courses will be selected in consultation with faculty advisor. Students are advised to select courses that reflect learning issues faced in their classroom, including special education, secondary language, or cultural diversity issues.

Take 6 or more credit(s) from the following:
- CI 5331 - Introduction to Learning Technologies (3.0 cr)
- CI 5361 - Teaching and Learning with the Internet (2.0 - 3.0 cr)
- CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
- CI 5641 - Language, Culture, and Education (3.0 cr)
- CI 5642 - Assessing English Learners (3.0 cr)
- CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
- CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
- CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
- YOST 5952 - Everyday Lives of Youth (3.0 cr)
- YOST 5954 - Experiential Learning: Pedagogy for Community and Classroom (3.0 cr)
- ENGL 5090 - Readings in Special Subjects (1.0 - 4.0 cr)
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5151 - Cooperative Learning (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of arts in multicultural college teaching and learning offered by the Department of Organizational Leadership, Policy, and Development (OLPD) provides an opportunity for intensive study of a transformative approach to teaching and learning to promote access to and success for traditionally underserved students. The program is multidisciplinary and a broad understanding of multiculturalism is employed that includes race, ethnicity, class, gender, sexual orientation, disability, age, and religion, so as to acknowledge that personal identity is complex and intersectional. Students engage in a critical examination of contemporary frameworks in educational theory, as well as the study of best practices for addressing them, such as multicultural education, critical pedagogy, assessment, and classroom research. Students are required to complete a semester-long supervised practicum and a one-semester supervised internship.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must submit two letters of recommendation from persons familiar with their scholarship and research potential, transcripts, a current résumé, and answer to two essay questions found within the University’s online application. The GRE is not required for EPL and MCTL M.A. applicants but is required for application to other M.A. program tracks (CIDE, ES, HE, and HRD). International students must also submit a TOEFL or IELTS score, but international applicants to the M.A. program are exempt from the GRE. All applications for admission are reviewed once a year. All new students begin in fall semester unless permission to start earlier is granted by the track coordinator. The annual deadline is February 1 for the two-year M.A. program. The annual deadline is February 1 for one-year M.A. program options (not available for the HRD or MCTL tracks).

Letters of recommendation, résumé, essays, and other department application materials are submitted via the University online application system. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may also be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer.

Applicants must have completed appropriate undergraduate and graduate study. In some cases, where previous coursework or degrees are marginally related, otherwise qualified applicants will be asked to complete additional background courses after admission. Applications are encouraged from individuals who may have completed undergraduate and/or master's programs in social science, liberal arts, public affairs, and business fields. The department offers study opportunities for professionals who are employed full time as well as for those who wish to pursue graduate studies full time.

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

IELTS
- Total Score: 6.5
MELAB
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 15 major credits, 9 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 18 major credits and 12 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B master's degree requires students to complete a capstone project. Students must demonstrate familiarity with the tools of research or scholarship in multicultural college teaching and learning, the ability to work independently, and the ability to present the results of their investigation effectively. The capstone project will involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The OLPD graduate faculty will specify the nature and extent of the options available to satisfy this requirement. In conjunction with the capstone project, students must enroll in the 3 credit OLPD 5087 MA Research Seminar.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Plan A master's requires a minimum of 34 credits. Students must complete a minimum of 15 credits in the major field (including practicum and internship), a minimum of 6 elective credits outside, one additional 3 credit research methods course, as well as 10 thesis credits and a master's thesis. The Plan B master's degree requires a minimum of 30 credits. Students must complete 15 credits in the major field, the 3 credit MA Research Seminar, and a capstone project, as well as a minimum of 12 elective credits.

Required core courses (15 cr minimum)

The following courses are required for both the Plan A and the Plan B. Student must take 3 credits of OLPD 8796. Additional credits of OLPD 8796 may be taken with advisor approval.

- CI 5106 - Multicultural Teaching and Learning in Diverse College Contexts (3.0 cr)
- OLPD 5796 - Supervised Practicum in Multicultural Postsecondary Teaching and Learning (3.0 cr)
- CI 5116 - Action Research in Educational Settings (3.0 cr)
- OLPD 5712 - Multicultural Theories of College Student Development Applied to Teaching and Learning (3.0 cr)
- OLPD 8796 - Supervised Internship in Postsecondary Teaching and Learning (3.0 - 12.0 cr)

Electives (Plan A 6 cr) (Plan B 12 cr)

To be determined with advisor; used to reach total of 34 credits Plan A or 30 credits Plan B. Options include:

- CI 5145 - Critical Pedagogy (3.0 cr)
- CI 5323 - Online Learning Communities (3.0 cr)
- CI 5325 - Designing and Developing Online Distance Learning (3.0 cr)
- CI 5331 - Introduction to Learning Technologies (3.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)
- CI 5367 - Interactive Multimedia Instruction (3.0 cr)
- CI 5536 - Equity, Policy, and Assessment in Science Education (3.0 cr)
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8461 - Sociocultural Theory, Education, and Literacy (3.0 cr)
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
Plan A and Plan B requirements

Plan A
All Plan A students must take 10 thesis credits and 6 elective credits and one research methods course to be selected in consultation with advisor.

OLPD 8777 - Thesis Credits: Master’s (1.0 - 18.0 cr)

-OR-

Plan B
All Plan B students must take the MA Research Seminar and elective credits to be selected in consultation with advisor to reach required total of 30 credits.

OLPD 5087 - MA Research Seminar (1.0 - 3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development's (OLPD) graduate minor in multicultural college teaching and learning is designed for current University of Minnesota graduate students who want to study innovative strategies to increase access and success of diverse undergraduate students.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
To obtain a minor, graduate students should work with the MCTL director of graduate studies (DGS) to map out coursework that will enhance their ability to teach in diverse postsecondary contexts.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Courses (Select 6 cr)
Coursework planned with MCTL director of graduate studies to total 6 credits.
CI 5105 - Increasing Access and Success in Undergraduate Classrooms (3.0 cr)
CI 5106 - Multicultural Teaching and Learning in Diverse College Contexts (3.0 cr)
CI 5116 - Action Research in Educational Settings (3.0 cr)
OLPD 5712 - Multicultural Theories of College Student Development Applied to Teaching and Learning (3.0 cr)

Doctoral
Courses (12 cr)
Coursework planned with MCTL director of graduate studies to total 12 credits.

CI 5105 - Increasing Access and Success in Undergraduate Classrooms (3.0 cr)
CI 5106 - Multicultural Teaching and Learning in Diverse College Contexts (3.0 cr)
CI 5116 - Action Research in Educational Settings (3.0 cr)
OLPD 5712 - Multicultural Theories of College Student Development Applied to Teaching and Learning (3.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: T E L: Multimedia Design & Dev PBacc Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This certificate program in multimedia design and development prepares students to use technology (computers and the Internet) to develop instructional materials for use in a wide range of educational and training contexts (note that a university certificate program or certificate is distinct from a state certificate or certification).

The program is designed for K-12 teachers, higher education instructors, corporate trainers, and other professionals interested in using technology to support instruction.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preffered undergraduate GPA for admittance to the program is 2.80.

A completed bachelor's degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page goal statement. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Courses (12 credits)
Take 4 or more course(s) totaling 12 or more credit(s) from the following:

- CI 5336 - Planning for Multimedia Design and Development (3.0 cr)
- CI 5362 - Foundations of Interactive Design for Web-based Learning (3.0 cr)
- CI 5363 - New Media and Interaction Design for Online and Mobile Learning (3.0 cr)
- CI 5365 - Contemporary Software Development Issues and Tools (3.0 cr)
- CI 5367 - Interactive Multimedia Instruction (3.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Online Distance Learning Postbaccalaureate Cert.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The online distance learning certificate is designed to prepare educators and other professionals to design and deliver distance learning opportunities in academic or business settings (note that a university certificate program or certificate is distinct from a state certificate or certification). Technology experience is not required, and courses are designed for learners with a wide range of experience.

This 12-credit certificate program will prepare students to successfully design, develop, and deliver curriculum on the Internet; use interactive online media; and create online learning communities for business and K-12 and postsecondary schools. As schools and businesses embrace online education, a variety of instructional design guidelines and pedagogical approaches have been developed to effectively guide online education and enhance learning.

Goals of the distance learning certificate include:
- Developing knowledge and skills in the best practices for designing and delivering online distance learning
- Engaging with current research about distance learning, current practices, and learning theory
- Providing opportunities to practice designing, developing, and delivering online distance learning
- Creating learning communities where students can reflect on their own teaching, reading, designing, and writing
- Allowing students to learn from each other

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A completed bachelor's degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page goal statement. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 58 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Admission to the Education Policy and Leadership track, the Higher Education track, and the Human Resource Development track of the Ed.D. are currently suspended.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Its research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the EdD programs choose from one of three complementary but distinct program tracks: education policy and leadership (EPL), higher education (HE), and human resource development (HRD). The department offers M.A. and Ph.D. degrees in the tracks mentioned above, as well as comparative and international development education (CIDE) and evaluation studies (ES). Undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A master's degree is required. The preferred graduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Applicants must submit scores from the General Test of the GRE, two letters of recommendation from persons familiar with their scholarship and research potential, a complete set of academic transcripts, and a current résumé, as well as answer required essay questions via the University's online application system. International students must also submit a TOEFL or IELTS score. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer. Applicants to the international cohorts should have at least three years of experience in international education.

Special Application Requirements:
Admission to the Education Policy and Leadership track, the Higher Education track, and the Human Resource Development track of the Ed.D. are currently suspended.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
Program Requirements
34 credits are required in the major.
12 to 14 credits are required outside the major.
12 to 24 thesis credits are required.
This program may not be completed with a minor.
Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 3.00 is required for students to remain in good standing.
The doctor of education (Ed.D.) is a professionally oriented degree program for those who will provide leadership in educational institutions and work and community education environments. Students combine study and related experiences to develop, apply, analyze, synthesize, and evaluate knowledge of the purposes, practices, issues, and problems of their program area. The Ed.D. is offered in 3 OLPD tracks: EPL (pre-K-12 schools), higher education and HRD. Cohorts for the EPL and higher education tracks include those in the metropolitan area, out state Minnesota, and international schools. Those two Ed.D. degree tracks are offered only in the context of cohort programs of 20-30 students each. All Ed.D. cohort programs include department core courses, program core courses, inquiry and research courses, supporting program or minor, and field research project credits. Through courses, seminars, and independent study, students learn to apply the products of disciplined inquiry to educational policy issues and practical situations in various educational environments and conduct types of research that contribute and/or apply that knowledge to the specialization. Within the overall framework (some credits may be brought in from previous graduate work), specific course requirements are developed for each program area and cohort when applicable. See the department website for requirements in specific cohorts. Preliminary written and oral exams are required. Students must complete a professional field project that contributes to the improvement of policy or practice.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Education Policy and Leadership
The EPL EdD track is not accepting new students at this time. Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Higher Education
The higher education EdD track is not accepting new students at this time. Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Human Resource Development
The HRD EdD track is not accepting new students at this time. Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Research Courses
Students should consult with advisers about the appropriate time to register for each course.
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
a 3 credit statistics course to be determined by student and adviser (3 cr inside or outside department)
a qualitative course to be determined by student and adviser (3 cr; inside or outside department)
a quantitative course to be determined by student and adviser (3 cr inside or outside department)
OLPD 8890 - Research Seminar (1.0 cr)
Additional Rsch Course
a 3 credits qualitative course taken with adviser approval
    or OLPD 8812 - Quantitative Research in Education (3.0 cr)
Skills and Special Topics
19 credits minimum. OLPD 8011 must be taken during the first year of the program.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)
18 credits of HRD elective coursework jointly determined by student and adviser based around the student's professional role
Specialization
Must total 12 credits.
A 3 credit OLPD 8xxx level theory seminar course as determined by the adviser
9 additional credits of appropriate coursework as determined by the faculty adviser

Rochester
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

Same as general program description.

This sub-plan is not accepting new students.
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Our research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the MA and PhD programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and human resource development (HRD). Our undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, two letters of recommendation from persons familiar with their scholarship and research potential, transcripts, a current résumé, and answer to two essay questions found within the University's online application. The GRE is not required for EPL and MCTL M.A. applicants but is required for application to other M.A. program tracks (CIDE, ES, HE, and HRD). International students must also submit a TOEFL or IELTS score, but international applicants to the M.A. program are exempt from the GRE. All applications for admission are reviewed once a year. All new students begin in fall semester unless permission to start earlier is granted by the track coordinator. The annual deadline is February 1 for the two-year MA program. The annual deadline is February 1 for one-year MA program options (not available for the HRD or MCTL tracks).

Letters of recommendation, résumé, essays, and other department application materials are submitted via the University online application system. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may also be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer.

Applicants must have completed appropriate undergraduate and graduate study. In some cases, where previous coursework or degrees are marginally related, otherwise qualified applicants will be asked to complete additional background courses after admission. Applications are encouraged from individuals who may have completed undergraduate and/or master's programs in social science, liberal arts, public affairs, and business fields. The department offers study opportunities for professionals who are employed full time as well as for those who wish to pursue graduate studies full time.

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5
**MELAB**
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A**: Plan A requires 15 to 26 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B**: Plan B requires 24 to 28 major credits and 6 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Comparative and International Development Education**

**Plan A**
Total Plan A CIDE Credits: 34 credits

**Plan A or Plan B**

**Plan A**
Total Plan A CIDE Credits: 34 credits

**Program Core**
Offered only in the fall term and normally taken during the year in which the student is writing the masters thesis. Student must take 3 credits of OLPD 5087

**OLPD 5087 - MA Research Seminar (1.0 - 3.0 cr)**

**Program Specialization**
Select one of the specializations below and choose two of its three core courses.

**Comparative and international development education**

**OLPD 5103 - Comparative Education (3.0 cr)**
**OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)**
**OLPD 5121 - Educational Reform in International Context (3.0 cr)**

**or Intercultural/international education**

**OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)**
**OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)**
**OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)**

**Research Design and Methods**
3 credits to be selected in consultation with advisor.

**Related Fields (6 cr outside CIDE)**
The master's degree requires 6 semester credits taken outside the CIDE program track that directly relate to the student's area of study. These credits should be selected in consultation with the advisor and should constitute a solid coursework foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

**Electives**
Take 6 or more credit(s) from the following list with advisor approval as needed to reach 34 credits total in the program:
Note: 8xxx courses should be taken only with the consent of the instructor.

OLPD 5044 - Introduction to the Economics of Education (3.0 cr)

or
OLPD 5056 - Case Studies for Policy Research (3.0 cr)

or
OLPD 5061 - Ethnographic Research Methods (3.0 cr)

or
OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)

or
OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

or
OLPD 5107 - Gender, Education, and International Development (3.0 cr)

or
OLPD 5128 - Anthropology of Education (3.0 cr)

or
OLPD 8022 - Education and Globalization: Anthropological Perspectives (3.0 cr)

or
OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

or
OLPD 8101 - International Education and Development (3.0 cr)

or
OLPD 8103 - Comparative Education (3.0 cr)

or
OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)

or
OLPD 8302 - Educational Policy Perspectives (3.0 cr)

Thesis Credits
Take 10 or more credit(s) from the following:

OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Total Plan B CIDE Credits: 30 credits

Program Core
This is a course (OLPD 5087) or an independent study under the adviser (OLPD 5095) to prepare Plan B paper. Students pursuing the degree as a one-year program must take a total of 6 cr of OLPD 5087 over 3 semesters (three of those credits will count towards the electives requirement). Students pursing the degree as a two-year program must take a minimum of 3 credits of OLPD 5087 or OLPD 5095.

OLPD 5087 - MA Research Seminar (1.0 - 3.0 cr)

or
OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Program Specializations
Select one of the specializations below and choose two of its three core courses.

Comparative and international development education

OLPD 5103 - Comparative Education (3.0 cr)

OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)

OLPD 5121 - Educational Reform in International Context (3.0 cr)

or
Intercultural/international education

OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)

OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)

OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)

Research Design and Methods

3 credits to be selected in consultation with advisor.

Electives
Take 12 or more credit(s) from the following list with advisor approval as needed to reach 30 credits total in the program:

OLPD 5044 - Introduction to the Economics of Education (3.0 cr)

or
OLPD 5056 - Case Studies for Policy Research (3.0 cr)

or
OLPD 5061 - Ethnographic Research Methods (3.0 cr)

or
OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)

or
OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

or
OLPD 5107 - Gender, Education, and International Development (3.0 cr)

or
OLPD 5128 - Anthropology of Education (3.0 cr)

or
OLPD 8022 - Education and Globalization: Anthropological Perspectives (3.0 cr)

or
OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

or
OLPD 8101 - International Education and Development (3.0 cr)

or
OLPD 8103 - Comparative Education (3.0 cr)

or
OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)

or
OLPD 8302 - Educational Policy Perspectives (3.0 cr)

Related Fields (6 cr outside CIDE)
The master's degree requires 6 semester credits taken outside the CIDE program track that directly relate to the student's area of study. These courses should be selected in consultation with the advisor and should constitute a solid coursework foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

Education Policy and Leadership
Plan A or Plan B

Plan A

Program Core (Minimum 6 cr)
Take from the following including subgroup 1:
- OLPD 5041 - Sociology of Education (3.0 cr)
  - OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
  - OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
  - OLPD 5344 - School Law (3.0 cr)
  - OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)
  - OLPD 8302 - Educational Policy Perspectives (3.0 cr)
  - Subgroup 1
    Take OLPD 5001 if it is being offered or one of the two alternatives if OLPD 5001 is not being offered. Note: OLPD 5011 should be taken only with advisor approval.
    - OLPD 5001 - Formal Organizations in Education (3.0 cr)
    - OLPD 5011 - Leading Organizational Change: Theory and Practice (3.0 cr)
    - OLPD 5607 - Organization Development (3.0 cr)

Research Design and Methods (6 cr)
Selected in consultation with advisor.

Related Fields (6 cr outside EPL)
The master's degree requires 6 credits taken outside of the EPL program track that directly relate to the student's area of study. These courses should be selected in consultation with the advisor.

Electives (2-8 cr)
Selected in consultation with advisor.

Thesis Credits (10 cr)
OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Research Project
Plan A students will develop and carry out an empirical research project under the supervision of their advisor.

Total = 30 - 36 credits

-OR-

Plan B

Required Coursework (Minimum 6 cr)
Take a minimum of 6 credits from the following including subgroup 1:
- OLPD 5607 - Organization Development (3.0 cr)
  - OLPD 8302 - Educational Policy Perspectives (3.0 cr)
  - Subgroup 1
    Take OLPD 5001 if it is being offered or the alternative if OLPD 5001 is not being offered. Note OLPD 5011 should only be taken with advisor approval.
    - OLPD 5001 - Formal Organizations in Education (3.0 cr)
    - OLPD 5011 - Leading Organizational Change: Theory and Practice (3.0 cr)

Program Core (6 cr)
Choose one course from each of the following two areas:

Leadership courses
Choose one of the following:
- OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
  - OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)

Other Coursework
Choose one of the following:
- OLPD 5041 - Sociology of Education (3.0 cr)
  - OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
  - OLPD 5128 - Anthropology of Education (3.0 cr)
  - OLPD 5324 - Strategic Financial Planning and Policy for Educational Leaders (3.0 cr)
  - OLPD 5344 - School Law (3.0 cr)
  - OLPD 5346 - Politics of Education (3.0 cr)

Research Design and Methods (3 cr)
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

Related Fields (6 cr outside EPL)
6 additional credits outside of the EPL program track, selected in consultation with advisor. These usually include additional courses from the program core or other OLPD courses.

Electives (3-8 cr)
Selected in consultation with advisor to meet required 30-32 total credit requirement for this track.

Colloquium Paper (3-6)
Students prepare a paper on an issue of relevance in school administration or revise and expand three course papers. Total of 120
hours of work required. Students in the two-year program must take 3 or more credits of OLPD 5095. Students in the one-year program must take a total of 6 cr of OLPD 5087 or OLPD 5095 over 3 semesters with advisor approval (three of those credits will count towards the electives requirement).

OLPD 5087 - MA Research Seminar (1.0 - 3.0 cr)
or OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Evaluation Studies

Plan A or Plan B

Plan A
Total Plan A ES Credits: 31-32 credits

Program Core (6 cr)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
- OLPD 5502 - Theory and Models of Evaluation (3.0 cr)

or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

Research Design and Methods (Minimum 6 cr)
Two qualitative methods courses selected in consultation with advisor for a minimum of 6 credits.

Related Fields (6 cr outside ES)
The master's degree requires 6 semester credits taken outside the ES program track that directly relate to the student's area of study. These courses should be selected in consultation with the advisor. These courses may include additional methods courses taught outside the department such as:
- EPSY 5261- Introductory Statistical Methods (3 cr) or comparable stats course required
- One additional EPSY measurement or methods course

Electives (Minimum 3 cr)
At least 3 cr selected in consultation with advisor to meet required 31-32 total credit requirement.

Thesis Credits (10 cr)
- OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Total Plan B ES Credits: 30-32 credits

Program Core (9 credits)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
- OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)
- OLPD 5502 - Theory and Models of Evaluation (3.0 cr)

or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

Research Design and Methods (Minimum 6 cr)
Two qualitative methods courses selected in consultation with advisor.

Related Fields (6 cr outside ES)
The master's degree requires 6 semester credits taken outside the ES program track that directly relate to the student's area of study. These courses should be selected in consultation with the advisor and should constitute a solid coursework foundation for the student's thesis.

Electives (6-7 cr)
Coursework related to the student's specialization, selected in consultation with the advisor. This will total 6-7 credits for students in the one-year or two-year program. These may be OLPD or outside courses.

Colloquium Paper (3-6 cr)
Total of 120 hours of work required. Students in the two-year program must take 3 or more credits of OLPD 5095. Students in the one-year program must take a total of 6 cr of OLPD 5087 or OLPD 5095 over 3 semesters with advisor approval (three of those credits will count towards the electives requirement).

OLPD 5087 - MA Research Seminar (1.0 - 3.0 cr)
or OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Higher Education

Plan A or Plan B

Plan A
Total Plan A HE Credits: 34 credits

Required Coursework (6 cr)
- OLPD 5701 - U.S. Higher Education (3.0 cr)
- OLPD 5709 - Critical Issues in Higher Education (3.0 cr)

Program Area (9 cr minimum)
From the following with advisor consultation and approval. Other courses as offered by HE program track faculty may also meet this requirement.
OLPD 5001 - Formal Organizations in Education (3.0 cr)
or OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
or OLPD 5704 - College Students Today (3.0 cr)
or OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
or OLPD 5724 - Leadership and Administration of Student Affairs (2.0 - 3.0 cr)
or OLPD 5732 - The Law and Postsecondary Institutions (3.0 cr)
or OLPD 5734 - Institutional Research in Postsecondary Education (2.0 - 3.0 cr)
or OLPD 5736 - Public Engagement and Higher Education (3.0 cr)

Related Fields (6 cr outside HE)
The master's degree requires 6 semester credits taken outside the HE program track that directly relate to the student's area of study. These courses should be selected in consultation with the advisor and should constitute a solid coursework foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

Research Design and Methods (3 cr minimum)
Select courses in consultation with their advisor.
CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
or EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or EPSY 5261 - Introductory Statistical Methods (3.0 cr)
or EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
or OLPD 5056 - Case Studies for Policy Research (3.0 cr)
or OLPD 5061 - Ethnographic Research Methods (3.0 cr)
or OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
or OLPD 8812 - Quantitative Research in Education (3.0 cr)
or CI 5116 - Action Research in Educational Settings (3.0 cr)

Thesis Credits (10 cr)
Take 10 or more credit(s) from the following:
OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Total Plan B HE Credits: 30 credits

Required Coursework (6 cr)
OLPD 5701 - U.S. Higher Education (3.0 cr)
OLPD 5709 - Critical Issues in Higher Education (3.0 cr)

Program Area (12 cr minimum)
Selected from the following with advisor consultation and approval. Other courses as offered by HE program track faculty may also meet this requirement.
OLPD 5001 - Formal Organizations in Education (3.0 cr)
or OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
or OLPD 5704 - College Students Today (3.0 cr)
or OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
or OLPD 5724 - Leadership and Administration of Student Affairs (2.0 - 3.0 cr)
or OLPD 5732 - The Law and Postsecondary Institutions (3.0 cr)
or OLPD 5734 - Institutional Research in Postsecondary Education (2.0 - 3.0 cr)
or OLPD 5736 - Public Engagement and Higher Education (3.0 cr)

Related Fields (6 cr)
The master's degree requires 6 semester credits taken outside the HE track that directly relate to the student's area of study. These courses should be selected in consultation with the advisor and should constitute a solid coursework foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

Methods Course (3 cr minimum)
Select courses in consultation with advisor for a minimum of 3 credits. It is strongly recommended that students in the one year program take a methods course with a course designator other than OLPD.
CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
or EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or EPSY 5261 - Introductory Statistical Methods (3.0 cr)
or EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
or OLPD 5056 - Case Studies for Policy Research (3.0 cr)
or OLPD 5061 - Ethnographic Research Methods (3.0 cr)
or OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
or OLPD 8812 - Quantitative Research in Education (3.0 cr)
or CI 5116 - Action Research in Educational Settings (3.0 cr)

Colloquium Paper (3 - 6 cr)
Plan B paper is prepared under the guidance of advisor and committee. The final paper must represent no fewer than 120 hours of work. Students in the two-year program must take 3 or more credits of OLPD 5087 or 5795. Students in the one-year program must
take a total of 6 cr of OLPD 5087 or OLPD 5795 over 3 semesters with advisor approval (three of those credits will count toward the related fields requirement).

OLPD 5087 - MA Research Seminar (1.0 - 3.0 cr)
or OLPD 5795 - Plan B Research Design (3.0 cr)

Human Resource Development

Plan A or Plan B

Plan A
The masters degree requires 6 credits taken outside the program track that directly relate to the students area of study. Courses totaling 6+ credits should be selected in consultation with the advisor. These courses may include additional methods courses taught outside the department.

General Aspects (3 cr)
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)

Research (7 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)
OLPD 8815 - Ethics and Responsible Research (1.0 cr)
an 8xxx qualitative or quantitative research course (3 cr)

Program Core (16 cr minimum)
Student must take 4 credits of OLPD 5696. Advisor can substitute courses as appropriate.
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5667 - Organization Development (3.0 cr)
OLPD 5201 - Strategies for Teaching Adults (3.0 cr)

Thesis Credits (10 cr)
OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Electives
Credits to total a minimum of 36 graduate-level coursework credits
Total = 36 cr

OR

Plan B
The masters degree requires 6 credits taken outside the program track that directly relate to the students area of study. Courses totaling 6+ credits should be selected in consultation with the advisor. These courses may include additional methods courses taught outside the department.

General Aspects (3 cr)
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)

Research (7 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)
OLPD 8815 - Ethics and Responsible Research (1.0 cr)
an 8xxx qualitative or quantitative research course (3 cr)

Program Core (16 cr minimum)
Student must take 4 credits of OLPD 5696. Advisor can substitute courses as appropriate.
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5667 - Organization Development (3.0 cr)
OLPD 5201 - Strategies for Teaching Adults (3.0 cr)

Plan B Project Paper (3 - 6 cr)
Plan B project/paper is prepared under the guidance of advisor & committee - must represent no fewer than 120 hours of work. Students should register for between 3-6 credits
OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Electives
With approval of advisor as needed to total a minimum of 34 graduate-level coursework credits overall for this plan.
Total = 34 cr
Twin Cities Campus
Organizational Leadership, Policy, and Development Ph.D.
Organizational Leadership, Policy and Development
College of Education and Human Development

Email: olpd@umn.edu
Website: http://www.cehd.umn.edu/olpd/

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 70 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Its research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the MA and PhD programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and human resource development (HRD). Undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have completed appropriate undergraduate and graduate study. In some cases, where previous coursework or degrees are marginally related, otherwise qualified applicants will be asked to complete additional background courses after admission. Applications are encouraged from individuals who may have completed undergraduate and/or master's programs in social science, liberal arts, business, and education fields. The department offers study opportunities for professionals who are employed full-time, as well as for those who wish to pursue graduate studies full-time.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, two letters of recommendation from persons familiar with their scholarship and research potential, a complete set of academic transcripts, and a current résumé; as well as answer required essay questions via the University online application system. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer.

The GRE is required for all tracks in the doctoral degree programs (Ed.D. and Ph.D.). International students must also submit a TOEFL or IELTS score. All applications for admission are reviewed once per year for Fall admission. Submission of all application materials for all tracks by December 1 is strongly encouraged to ensure priority consideration for assistantships awarded for the next academic year. All new students begin in fall semester unless special permission to start earlier is granted by the program coordinator.

International applicants must submit score(s) from one of the following tests:
- TOEFL
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
30 to 48 credits are required in the major.
0 to 18 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Credits required by the major vary by track. The PhD is available in five program tracks: education policy and leadership, evaluation studies, higher education, comparative and international development education, and human resource development. All PhD programs include 16 credits in department core courses (which include 15 credits of research methodology courses), 18 or more credits in program core courses, 12-14 credits program approved electives, and 24 thesis credits. The minimum total of course credits varies by track (see the student handbook on the department website for details). Preliminary written and oral exams are required. Students must complete a dissertation. Within the general framework for PhD requirements, the degree program is developed by the student and his or her advisor and is subject to approval by the department's director of Graduate Studies and the University.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Comparative and International Development Education
The doctor of philosophy (PhD) degree with a program emphasis in comparative and international development education (CIDE) is offered by the Department of Organizational Leadership, Policy, and Development (OLPD). CIDE uses an interdisciplinary approach to the study of education's role in economic, political, and sociocultural development; international educational exchange; and the internationalization of education. The two specializations within CIDE are comparative and international development education and intercultural/international education.

Department Core (16 cr)
Professional socialization seminar
Taken fall term of first year.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)
Research courses
Take OLPD 8015 spring term of first year.
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
Quantitative course to be determined by student and adviser (3 cr in or outside of department)
Qualitative course to be determined by student and adviser (3 cr in or outside of department)
8 credits of additional methods courses to be determined by student and adviser (in or outside of department)

Doctoral Seminars in CIDE (6 cr)
Students take 6 credits; 2 credits in each of 3 semesters starting in the spring term of the first year in the program; course numbers are listed as OLPD 8121, section 002; OLPD 8121, section 003; and OLPD 8121, section 004.

Specialization Courses (6 cr minimum)
Students choose two courses, with a minimum of one 8xxx course for specializations. Any specialization core course not being used as core class can become a CIDE elective.

Comparative and International Development Education
Take 6 or more credit(s) from the following:
OLPD 5103 - Comparative Education (3.0 cr)
or OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
or OLPD 5121 - Educational Reform in International Context (3.0 cr)
or OLPD 8101 - International Education and Development (3.0 cr)
or OLPD 8103 - Comparative Education (3.0 cr)

Intercultural/international education
Take 6 or more credit(s) from the following:
OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
or OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
or OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
or OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

CIDE Elective Courses (8 cr minimum)
OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
or OLPD 5056 - Case Studies for Policy Research (3.0 cr)
or OLPD 5061 - Ethnographic Research Methods (3.0 cr)
or OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
or OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
or OLPD 5107 - Gender, Education, and International Development (3.0 cr)
or OLPD 5128 - Anthropology of Education (3.0 cr)
or OLPD 8022 - Education and Globalization: Anthropological Perspectives (3.0 cr)
or OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
or OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)
or OLPD 8302 - Educational Policy Perspectives (3.0 cr)

Additional Coursework (12 cr minimum)
These credits can be used to meet the requirement that a minimum of 12 credits be taken outside the CIDE track or for a minor. Courses not specifically listed should have advisor approval.

Education Policy and Leadership
The doctor of philosophy (PhD) degree with a program emphasis in education policy and leadership (EPL) provides an opportunity for intensive study of the field of education. It is especially suitable for students who wish to pursue careers in policy, research, or college and university teaching. It is also available to students who are interested in careers in school, district, and statewide administration, though it is more theory and research-oriented than the doctorate of education (Ed.D.) degree, which is also offered by OLPD. Educational administration offers coursework and research opportunities for those interested in making a difference in educational systems and settings that involve PreK-12 children and youth. The program is committed to supporting the development of leaders and scholars who work to continuously improve educational quality and effectiveness so that young people graduate from secondary education well prepared to continue their learning and to contribute to their communities. The program promotes understanding of schools as organizations and emphasizes application of knowledge and research to varied contexts of educational practice.

Department Core (16 cr)
Professional socialization seminar
Taken fall term of first year.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)
Research courses
Take OLPD 8015 spring term of first year.
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
3 credit quantitative course (in or outside of department) in consultation with adviser
3 credit qualitative course (in or outside of department) in consultation with adviser
6 credits of additional methods courses in consultation with adviser

Program Core: Education Policy and Leadership (18 cr)
OLPD 5346 - Politics of Education (3.0 cr)
OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)
OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)
OLPD 8302 - Educational Policy Perspectives (3.0 cr)
Subgroup 1
Take OLPD 5001 if it is being offered or one of the two alternatives if OLPD 5001 is not being offered.
OLPD 5001 - Formal Organizations in Education (3.0 cr)
or OLPD 5011 - Leading Organizational Change: Theory and Practice (3.0 cr)
or OLPD 5607 - Organization Development (3.0 cr)
OLPD Electives (Minimum 3 cr)
Electives selected with approval of advisor.

Additional Coursework (12 cr minimum)
These credits can be used to meet the requirement that a minimum of 12 credits be taken outside the EPL track or for a minor. Courses not specifically listed should have advisor approval. Students who have successfully completed enrollment in the University of Minnesota's Principals Academy may use transfer credits to fulfill this requirement.
Evaluation Studies
The doctor of philosophy (PhD) degree with a program emphasis in evaluation studies (ES) provides an opportunity for intensive study of the techniques and process of evaluation and policy research and of the social and political context within which program evaluation occurs. Graduates leave with a portfolio filled with evidence of their expertise with the tools of the evaluation trade—qualitative and quantitative inquiry methods, communication skills, and computer database analysis experience. Evaluation knowledge and skills are gleaned not only from time in the classroom but also from internships and collaboration with evaluation professionals in real-world settings. Evaluation studies students have access to some of the best evaluators in the field.

Department Core (16 cr)
Taken fall term of first year.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)

Research Courses
Take OLPD 8015 spring term of first year.
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
3 credit quantitative course (in or outside of department) in consultation with adviser
3 credit qualitative course (in or outside of department) in consultation with adviser
6 credits of additional methods courses in consultation with adviser

Program Core: Evaluation Studies (15 cr)
Student must take OLPD 8595 for 3 credits. Student must take OLPD 8596 twice in two different semesters for 3 credits each time.
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
OLPD 8595 - Evaluation Problems (1.0 - 6.0 cr)
OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)

Additional Coursework (17 cr minimum)
These credits can be used to meet the requirement that a minimum of 12 credits be taken outside the ES track or for a minor. Courses not specifically listed should have advisor approval.

Higher Education
The doctor of philosophy (PhD) degree with a program emphasis in higher education (HIED) provides an opportunity for intensive study of the policies and organizational issues in higher education institutions and systems. HIED focuses on the experiences, practices, and decisions of those involved in postsecondary education, as well as on the sociopolitical contexts in which higher education exists. Areas of specialization include administration and organization, policy, college students, external relations, equity-oriented change, and research integrity.

Department Core (16 cr)
Professional socialization seminar
Taken fall term of first year.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)

Research Design and Methods
Take OLPD 8015 spring term of first year.
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
3 credit quantitative course (in or outside of department) in consultation with adviser
3 credit qualitative course (in or outside of department) in consultation with adviser
6 credits of additional methods courses in consultation with adviser

Program Core: Higher Education (12 cr)
OLPD 5701 - U.S. Higher Education (3.0 cr)
OLPD 5704 - College Students Today (3.0 cr)
OLPD 8702 - Administration and Leadership in Higher Education (3.0 cr)
OLPD 8703 - Public Policy in Higher Education (3.0 cr)

Electives (9 cr)
Focused on issues relevant to the HE track with advisor approval.

Additional Coursework (11 cr minimum)
These credits can be used to meet the requirement that a minimum of 12 credits be taken outside the HE track or for a minor. Courses not specifically listed should have advisor approval.

Human Resource Development
The doctor of philosophy (PhD) degree with a program emphasis in human resource development (HRD) is offered by the Department of Organizational Leadership, Policy, and Development (OLPD). Students in HRD combine study and related experiences to develop, apply, analyze, synthesize, and evaluate knowledge of the purposes, practices, issues, and problems of work and community education; social, economic, historical, political, cultural, educational, technological, and psychological contexts within which work and community education exist; and types of research that contribute to or apply that knowledge to the specialization.

Department Core (16 cr)
Professional socialization seminar
Taken fall term of first year.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)

Dept Research Courses
Take OLPD 8015 spring term of first year.
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
3 credit quantitative foundations course (in or outside of department) in consultation with adviser
3 credit qualitative foundations course (in or outside of department) in consultation with adviser
6 credits of additional methods courses in consultation with adviser

Specialization (9 cr)
Courses must have advisor approval.
One 8xxx level theory seminar (3 cr)
2 or 3 8xxx level seminars offered by various HRD faculty (2-3 credits each for a total of 6 cr)

Additional Research Courses (9 cr)
In addition to the research/methodology courses mentioned in the department core, the following are required for students in HRD:
- 3 credit statistics course selected in consultation with advisor
- The Capstone Research Experience Course (OLPD 8603) is offered every other year. When it is offered take six credits over two semesters, three credits to be taken in fall semester and three credits to be taken in spring semester. Is usually taken during the second year if student is full time.

OLPD 8603 - HRD Capstone Research Experience (3.0 cr)

Additional Coursework (14 cr minimum)
These credits can be used to meet the requirement that a minimum of 12 credits be taken outside the HRD track or for a minor. Courses not specifically listed should have advisor approval.

- This program requires summer semesters for timely completion.
- Degree: Parent Education PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The parent education certificate program is designed to prepare professionals to plan, coordinate, and teach parent education programs and services for families with children from early childhood through adolescence.

The 16-credit program prepares professionals who are well qualified to deliver programs designed to address the intellectual, emotional, cultural, social, and physical needs of parents and children. In addition to educational settings that may include public-school parent education programs, preschools, child care centers, and Head Start programs, parent educators may also work in health care and social-service agencies and institutions, and faith-based settings.

Certificate courses are offered online. Online coursework is designed to meet the needs of local and distance learners in Minnesota, around the country and the world.

Students participate in live online chat sessions and weekly reflections with their course instructors. They interview parents, read the latest research, and view presentations by University of Minnesota faculty and noted experts in the field.

The capstone course (FSOS 5949 - Student Teaching in Parent Education) allows students to teach and interact with parents in a parent education setting under the supervision of a licensed or highly qualified parent educator approved by core faculty. This individualized student teaching allows each program participant to integrate and apply what they have learned to parent education experiences, preparing them for professional work in the field.

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
Special Application Requirements:
Apply online at https://app.applyyourself.com/AYApplicantLogin/I1_ApplicantConnectLogin.asp?id=UMN-GRAD

For program specific application details see http://www.cehd.umn.edu/FSoS/programs/cert.asp

Complete the equivalent of six semester undergraduate or graduate credits in child development courses before entering the parent education certificate program, completed within 10 years of admission to the certificate program. If these credits have not been completed at the time of application, the applicant may be admitted conditionally until they are completed and recorded on a transcript. The following CEHD courses are examples of child development courses that may meet this requirement:

- CPSY 4302 - Infant Development
- CPSY 4331 - Social and Personality Development
- CPSY 4343 - Cognitive Development
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to [test abbreviations](TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Required Courses**

Note: FSOS 5943 through FSOS 5949 must be taken in the sequence listed. FSOS 5932, FSOS 5937, and FSOS 5942 can be taken in any sequence.

- **FSOS 5932** - Introduction to Parent Education (1.0 cr)
- **FSOS 5937** - Parent-Child Interaction (3.0 cr)
- **FSOS 5942** - Everyday Experiences of Families (2.0 cr)
- **FSOS 5943** - Parent Learning and Development: Implications for Parent Education (2.0 cr)
- **FSOS 5944** - Parent Education Curriculum (2.0 cr)
- **FSOS 5945** - Teaching and Learning in Parent Education (2.0 cr)
- **FSOS 5946** - Assessment and Evaluation in Parent Education (2.0 cr)
- **FSOS 5949** - Student Teaching in Parent Education (2.0 cr)

Physical Activity and Health M.Ed.
Kinesiology, School of
College of Education and Human Development

Link to a list of faculty for this program.

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.Ed. in physical activity and Health relates to the M.P.H. in community health promotion in the School of Public Health in the following ways:

1. The ultimate goals of the programs are to promote health and prevent chronic diseases;
2. Both programs study the distribution and determinants of health-related states or events in specified populations; and
3. Both programs adopt population-based interventions.

However, they are essentially different in that the M.P.H. in community health promotion focuses on designing community-based program and policy interventions that improved the health of communities while the proposed M.Ed. in physical activity and health focuses on applied training of physical activity professionals to increase physical activity in various populations.

There are limited prerequisites for this program. Students with a background in kinesiology, exercise science, public health, biology, and/or psychology will be able apply for the program. There is minimal overlap with the existing M.Ed. programs at School of Kinesiology and the existing M.P.H. programs at School of Public Health.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Kinesiology, exercise science, public health, biology, psychology

Master degree

Other requirements to be completed before admission:
There are no course requirements for admission except for a Bachelor degree and acceptance to the University of Minnesota Graduate School.

Special Application Requirements:
The School reviews applications on an ongoing basis. Application reviews for specific academic terms begin by the following dates:
  • November 1: spring semester admission
  • March 1: summer session admission
  • July 1: fall semester admission

Admission requirements for this program include the following criteria:
A bachelor's degree, preferably in kinesiology, exercise science, public health, biology, psychology, with a 3.0 minimum grade point average (GPA) from an accredited institution.

All applicants must submit the following items:
- Online application from Apply Yourself
- Application fee ($75 for U.S. applicants; $95 for international applicants)
- Unofficial transcripts of all previous post-secondary academic study must be downloaded to the application (official transcripts will be
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 26 major credits and 4 credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** Students will enroll in 3 hrs of KIN 5995 Research Problems in Kinesiology to complete their Capstone project. The requirement is a literature review on a particular topic approved by their advisor. Below are the details for the literature review.

1. Research Question Development: (20% of Capstone grade)
2. Literature Review Matrix: (20% of Capstone grade)
3. Literature Review Final Draft: (60% of Capstone grade)

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

**Required Courses**

Students are required to take at least 9 credits in this category. Students need to take at least 3 credits of KIN 5995 after the majority of the coursework is completed.

KIN 5181 - Understanding Kinesiology Research (3.0 cr)
KIN 5125 - Advances in Physical Activity and Health (3.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)

**Selected Courses**

Students must take at least 21 credits for selected courses, of which a minimum of 17 credits from KIN and 4 credits from PUBH courses.

KIN 4385 - Exercise Physiology (4.0 cr)
KIN 5122 - Applied Exercise Physiology (3.0 cr)
KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
KIN 5202 - Current Issues in Health (2.0 cr)
KIN 5203 - Health Media, Consumerism, and Communication (2.0 cr)
KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (2.0 cr)
PUBH 6025 - Designing e-Interventions for Public Health (2.0 cr)
PUBH 6074 - Mass Communication and Public Health (3.0 cr)
PUBH 6094 - Obesity and Eating Disorder Interventions (2.0 cr)
PUBH 6905 - Nutrition for Public Health Promotion and Disease Prevention (2.0 cr)
or PUBH 6914 - Community Nutrition Intervention (3.0 cr)
or PUBH 6950 - From Kid to Community: Personal, Social and Environmental Influences on Youth Obesity (2.0 cr)

Department of Organizational Leadership, Policy, and Leadership, 206 Burton Hall, 178 Pillsbury Dr. SE, Minneapolis, MN 55455 (612-625-9087; fax: 612-624-3377)
Website: http://www.cehd.umn.edu/olpd/grad-programs/Adm-Licensure/default.html

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 22 to 23
- This program requires summer semesters for timely completion.
- Degree: PK-12 Administration PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Housed within the University of Minnesota’s Department of Organizational Leadership, Policy, and Development (OLPD), the PK-12 Administration certificate offers aspiring educational administrators an individualized program to prepare them for the following licenses:
- K-12 principal
- Superintendent
- Director of special education
- Director of community education

The PK-12 Administration certificate program offers a variety of courses specifically designed to address the competencies required by the state for the various licenses.

Accreditation
This program is accredited by Minnesota Board of School Administrators and the NCATE.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applications are reviewed on a rolling basis.

Please visit http://www.cehd.umn.edu/OLPD/apply/certificate/administrative-licensure/ for information about application process and related fees.

Applications to the doctoral and licensure programs are separate processes. Only three-credit licensure courses that have been approved by the candidate’s adviser may be counted toward an Ed.D. or Ph.D. If you are considering doing both the certificate and a doctoral program, contact our program office.

Please note: This program is not offered full-time and therefore is not intended for international students needing a visa to study in the United States.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Further requirements for K-12 principal, superintendent, or director of special education:
Possess or complete three years of teaching experience
60 credits beyond a bachelor's degree to include a graduate degree
320 hours of field experience

Further requirements for director of community education:
A bachelor's degree plus 20 credits
320 hours of field experience

Exit requirements
Complete all coursework with a grade of S or C or better.
An electronic portfolio presented to a review panel made up of representatives from the University and licensed practitioners is required as the last step to earning licensure.

Required for All Licenses

Note: OLPD 5391 is not required for the director of special education license. OLPD 5387 and 5391 are not required for the director of community education license.

- OLPD 5324 - Strategic Financial Planning and Policy for Educational Leaders (3.0 cr)
- OLPD 5344 - School Law (3.0 cr)

Website: http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp) section of the catalog website for requirements that apply to all major fields.

Prevention science is defined for the purposes of this program as the scientific study of systematic efforts to reduce the incidence of unhealthy or maladaptive behavior, and to promote health and adaptive behavior in populations across the life span through designing and evaluating interventions, and utilizing knowledge about them more strategically.

The fundamental assumption of this free-standing minor is that future researchers and scholars will be most able to meet the challenges and changes occurring in society and in their chosen professions and disciplines if their training is comprehensive and transdisciplinary.

Prevention science is a rapidly expanding interdisciplinary field and this program will increase opportunities for the University's academic researchers to partner with communities to address the complex issues facing society.

Six areas of concentration will be offered. Students will be expected to select one as a major emphasis. Areas of concentration are: 1) promotion of mental health and well being across the life span; 2) interventions in education, health, and social services; 3) social policy; 4) family and community studies (early stage research, needs assessments, action research); 5) methodology; 6) individualized concentration.

For more information about these areas of concentration, visit [http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp](http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp)

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
- Students must have gained admission to a doctoral degree-granting program, and have prepared a minor program of coursework approved by the director of graduate studies in prevention science. Students are required to make formal application to the program.
- Doctoral students must apply prior to submitting their graduate degree program in the Graduate Planner and Audit System (GPAS) for approval. Instructions and form can be found at [http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp](http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp)

For an online application or for more information about graduate education admissions, see the [General Information](http://www.cehd.umn.edu/FSoS/programs/minor-ps.asp) section of the catalog website.

**Program Requirements**
Use of 4xxx courses towards program requirements is not permitted.

The doctoral minor is developed in consultation with, and should be approved in advance by, the director of graduate studies for prevention science.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
The purpose of the minor is to provide students with interdisciplinary training in prevention science; therefore, all students will be required to fulfill the elective requirements for the minor by taking courses outside their major. Courses counting toward a student's major may not be counted toward the minor.

**Required Courses**
- PREV 8001 - Prevention Science: Principles and Practices (3.0 cr)
  - or FSOS 5701 - Prevention Science: Principles and Practices (3.0 cr)
- PREV 8002 - Prevention Science Research Methodology (3.0 cr)
  - or FSOS 5702 - Prevention Science Research Methodology (3.0 cr)
- PREV 8003 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)
  - or FSOS 5703 - New Topics in Prevention: Implementation and Dissemination (3.0 cr)

**ELECTIVE**
- Elective course from area of concentration (3.0 cr)

**Program Sub-plans**
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

- This program does not require summer semesters for timely completion.
- Degree: Professional Development PBAcc Certificate Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in professional development is designed to prepare leaders in designing, implementing, and evaluating learning opportunities for preK-12 educators and related staff.

This 12- to 15-credit graduate-level program offers professional development opportunities for teachers, administrators, and others involved in school improvement initiatives. Throughout the program, students are required to reflect on their learning, make explicit connections between theory and practice, and design staff development processes and materials for use in their own work contexts.

Through the program, participants will:
Learn to apply research-based standards for staff development,
Be prepared for the multifaceted roles and competencies of staff developers,
Identify organizational and leadership capacities for effective staff development policies and practices,
Be able to articulate effective staff learning principles, designs, and strategies,
Evaluate staff development, including its effects on students, staff, and systems,
Learn to work effectively with groups, including both facilitation and training models of learning,
Identify and access staff development resources, including current research and best practices literature,
Gain awareness of individual strengths and areas for continuous improvement as a professional educator and leader of staff learning.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Special Application Requirements:
Admission to the professional development certificate is open to both degree-seeking or non-degree seeking students. Students may pursue the certificate alone or concurrently with a UM masters or doctoral degree. Applicants must have at least three years of experience working as education or related professionals in preK-12 education. Please note that this program is not offered full-time and therefore is not intended for international students needing a visa to study in the United States. Admission for this program is done on a rolling basis.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 2.80 is required for students to remain in good standing.

**Required Courses**
- OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
- OLPD 5374 - Leadership for Professional Development (4.0 cr)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

**Additional Coursework**
- With certificate coordinator approval, students choose and complete 2-5 credits of coursework focusing on a topic that interests them.
- Students can complete this requirement in one of two ways.
- Independently designed study or project [OLPD 5095]
- Focused elective coursework

**Take 2 - 5 credit(s) from the following:**

**Independently designed study or project: OLPD 5095**
- OLPD 5095 Problems: OLPD (1-3 cr). Students submit a proposal for an independently designed study or project to the certificate coordinator for approval by submitting the Proposal for Independent Study or Project as Elective Option [PDF].
- Examples of independently designed studies or projects include:
  - Comprehensive site-level design for staff development, including learning, implementation, and evaluation components.

**Independently designed study or project: OLPD 5095 Cont’d**
- Evaluation of a current staff development or curricular initiative
- Internship focused on staff development research, policy, or practice with personnel in school districts, state departments, or higher education
- Individualized study or research review of a staff development-related topic
- Attendance at a national conference with documentation, reflection on learning, and specified follow-up application

**Focused elective coursework**
- In consultation with the certificate coordinator, students can choose elective coursework that aligns with individual interests and best practices in the staff development field. Students may choose from the wide range of offerings at the University of Minnesota, including coursework with the following course designators:
  - Curriculum and Instruction (CI)
  - Educational Psychology (EPSY)
  - Organizational Leadership, Policy, and Development (OLPD)
  - Public Affairs (PA)
  - Sociology (SOC)

**Please Note:**
- The certificate coordinator must approve elective coursework. Courses taken before formal admission into the program may be accepted as program credits at a later date. Relevant graduate coursework from other graduate institutions may be approved to fulfill the elective requirement after review of relevant course syllabi. However, all coursework must have been taken within five years from the date of acceptance into the certificate program.
Program Evaluation Minor
Organizational Leadership, Policy and Development
College of Education and Human Development

Link to a list of faculty for this program.

Contact Information:
Department of Organizational Leadership, Policy, and Development, 178 Pillsbury Dr S E, Minneapolis, MN 55455 (612-624-1006; fax: 612-624-3377)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Program evaluation is an area of inquiry that uses both quantitative and qualitative methods to address questions of concern to policy makers, administrators, managers, and, in some cases, program participants. In this era of competing developments—increased accountability and the democratization of research activity—knowledge of program evaluation is a useful and valuable commodity. The program evaluation minor is an interdisciplinary effort providing intensive study of the techniques and process of evaluation and policy research, in addition to the social and political context within which program evaluation occurs. The graduate minor in program evaluation offers a coordinated set of courses designed for students who wish to have the knowledge and skills necessary to conduct evaluations combined with their graduate majors or professional fields of study. Courses include readings, discussions, and assignments designed to develop the skills essential to professionals intending to use or conduct evaluation in nonprofit and for-profit organizations.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Prior admission into an established MA or PhD is required. Students in the existing evaluation-related concentrations in organizational leadership, policy, and development or educational psychology are not allowed into the minor. Admission to the minor program will therefore be contingent upon enrollment in good standing within a recognized University of Minnesota degree-granting program.

Special Application Requirements:
Students interested in admission to the minor should contact the minor’s Director of Graduate Studies. Students must demonstrate relevant academic background and experience.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Use of 4xxx courses towards program requirements is not permitted.

The program for an individual student will be developed by the student, the major advisor, and the director of graduate studies (DGS) of the program evaluation minor. With permission of the program evaluation minor DGS, students with sufficient background and previous course experience equivalent to one or more courses within the minor field curriculum may apply for a waiver of appropriate requirements, and replace waived courses with additional electives to meet the minimum number of credits required for the minor.
Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Minor Requirements
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

or An alternative course approved by program evaluation steering committee

OLPD 5502 - Theory and Models of Evaluation (3.0 cr)

or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)

Doctoral
Minor Requirements
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

or or an alternative course approved by program evaluation steering committee

OLPD 5502 - Theory and Models of Evaluation (3.0 cr)

or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)

OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)

Additional coursework
Additional coursework must be selected in conjunction with, and approved by, the minor adviser.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12 to 13
- This program does not require summer semesters for timely completion.
- Degree: Program Evaluation Postbaccalaureate Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program evaluation certificate program offers intensive study of applied methods of evaluating programs and services in school, health, government, nonprofit agencies and market research settings. This interdisciplinary program surveys program evaluation techniques and processes, and examines the social and political contexts of the studies. The program allows working professionals from a variety of disciplines to formalize their training in program evaluation by earning a certificate in this area. Demand for trained professionals in program evaluation has increased steadily to meet the reporting needs of funding agencies, policy makers, and program managers in the public and private sectors. Graduates of evaluation studies programs have found employment in county government, social service agencies, state departments, and research consulting firms and businesses.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A completed graduate-level degree, master of education (MEd) or master of arts (MA), in an appropriate content area, including education, social work, public health, or public policy.

Other requirements to be completed before admission:
Students must demonstrate relevant academic background, including research methodology and experience in a field in which program evaluation is practiced (e.g., public health, social work, or education). Admission will be based on an assessment of the applicant’s advanced knowledge and level of professional experience in the field of program evaluation. Applications are reviewed on a rolling basis.

Special Application Requirements:
Enrollment in the certificate program will be limited to a maximum of 10 students per calendar year.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

Required Coursework
8-9 credits required. The following courses (or equivalents approved by the certificate coordinator) are required.
Foundations of evaluation
Take 1 course from the following:
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
PA 5311 - Program Evaluation (3.0 cr)
PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
SW 8603 - Program Evaluation (2.0 cr)

Evaluation theory
OLPD 5502 - Theory and Models of Evaluation (3.0 cr)
or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

Internship in evaluation
Only 3 credits of this course can count towards this certificate.
OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)

Elective Coursework
Students may choose 3-4 credits of elective coursework from the following list to meet the overall program minimum of 12 credits. Additional courses may be approved by the certificate coordinator.
Take 3 or more credit(s) from the following:
• CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
• CI 8914 - Critical Science Research (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
• OLPD 5056 - Case Studies for Policy Research (3.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)
• OLPD 8595 - Evaluation Problems (1.0 - 6.0 cr)
• PUBH 8724 - The Health Care System and Public Health (3.0 cr)
• SW 8602 - Direct Practice Evaluation (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 34 to 53
- This program does not require summer semesters for timely completion.
- Degree: Master of Social Work

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MSW prepares students for advanced social work practice. A 53-credit program and a 34-credit advanced standing program are available. The curriculum offers concentrations in clinical mental health; community practice; families and children; and health, disabilities and aging.

Accreditation
This program is accredited by Council on Social Work Education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
A foundation in the liberal arts and one year of work experience in human services is preferred. Work experience may include paid, volunteer, and intern positions.

Special Application Requirements:
In order to apply, applicants are required to submit a specified personal statement, writing sample, resume, transcripts, and three letters of recommendation. All application instructions are posted on the School of Social Work website.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 34 to 53 major credits and up to null credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.
The MSW requires 53 credits; a 34-credit advanced standing program is available to graduates of undergraduate social work programs accredited by the Council on Social Work Education. All credits for the MSW can be completed in two years of full-time study, or three years to four years of part-time study, and must be completed within five years of the date of the earliest coursework taken for the degree.

The 53-credit program includes a set of required foundation courses (19 cr), courses from a selected concentration, two field internships, and social work electives.

A maximum of 26 credits may be transferred from the following sources with School of Social Work approval: up to 8 credits as a non-degree-seeking student registered for social work graduate credit at the University of Minnesota; up to 26 credits from another regionally and professionally accredited school of social work if the student was registered as a graduate student in the program.

The 34-credit advanced standing program includes courses from a selected concentration, one field internship, and social work electives. A maximum of 14 credits may be transferred from the following sources with School of Social Work approval: 14 credits completed as a graduate student in another accredited MSW program; up to 6 credits as a non-degree-seeking student registered for social work graduate credit at the University of Minnesota.

**Foundation Curriculum for Full Program Students**

The 19-cr foundation curriculum is required for full program students. The foundation curriculum is waived for advanced standing students, unless required in a student’s conditions of admission. Advanced standing students who receive a grade of B- or less in a BSW class that is comparable to one of our foundation classes may be asked to repeat that content in our MSW program. Students should take 8010 for 3 cr in fall; 3 cr in spring or 6 cr in summer.

Take exactly 19 credit(s) from the following:

- SW 5051 - Human Behavior and the Social Environment (2.0 - 3.0 cr)
- SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0 - 4.0 cr)
- SW 8151 - Social Work Methods: Practice With Individuals and Systems (2.0 cr)
- SW 8152 - Social Work Practice Methods: Families and Groups (2.0 cr)
- SW 8153 - Social Work Practice Methods: Macro Practice and Organizations (2.0 cr)
- SW 8841 - Social Work Research Methods (2.0 cr)
- SW 8010 - Seminar: Field Practicum I (1.0 - 8.0 cr)

**Concentration Areas**

**Clinical Mental Health Concentration**

Prepares students for advanced clinical social work practice with children, adults and families across diverse settings and populations. Students learn contextually based approaches to mental health diagnostic assessment, treatment and practice evaluation, with a strong focus on client systems experiencing significant mental health risk.

**Anchor and Boost**

SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)
SW 8452 - Core Concepts in Clinical Social Work Practice (3.0 cr)

**Concentration Electives**

Take 2 or more course(s) totaling 6 or more credit(s) from the following:

- SW 8352 - Intervention Methods with Families (3.0 cr)
- SW 8461 - Advanced Clinical Social Work Practice with Adults (3.0 cr)
- SW 8462 - Advanced Clinical Practice With Children and Adolescents (3.0 cr)
- SW 8463 - Social Work Practice With Severe and Persistent Mental Illness and Severe Emotional Disturbance (3.0 cr)

**Diversity**

SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

**Advanced Policy**

SW 8806 - Health and Mental Health Policy (3.0 cr)

or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

**2nd Focus Anchor**

Students must choose one course from this list. Dual degree students may substitute a course from their other degree program with approval from the MSW program director.

- SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
- SW 8351 - Assessment and Engagement with Families and Children (3.0 cr)
- SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

**Concentration Field Practicum and Seminar**

Students complete 6 credits of SW 8020. The credits are either split between fall and spring semesters, or 6 credits are taken during summer. Advanced Standing students take SW 8030.

Take exactly 6 credit(s) from the following:

- SW 8020 - Field Practicum II (1.0 - 6.0 cr)

**Advanced Research**

Students must complete 3 credits of SW 8842. The credits are split between fall and spring semesters, or 3 credits are taken during
the summer. Dual degree program students may substitute PA 5311 or PUBH 6034. This course must be taken concurrently with SW 8020 or 8030.

Take exactly 3 credit(s) from the following:
- SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)
- PA 5311 - Program Evaluation (3.0 cr)
- PUBH 6034 - Evaluation (3.0 cr)

Free Electives
Students must complete at least 5 credits of 5000-level or 8000-level courses not used for another program requirement.

-OR-

Community Practice Concentration
Concentration prepares students to improve the effectiveness and responsiveness of human service systems to mobilize groups for social change, and to serve as catalysts for sustainable development and social justice. Students are prepared to fill a variety of community practice roles—leaders, planners, policy advocates, community organizers, mediators, evaluators and agency administrators in a range of settings.

Anchor and Boost
SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)
SW 8552 - Advanced Community Practice: Leadership, Planning, and Program Development (3.0 cr)

Concentration Electives
Take 2 or more course(s) totaling 6 or more credit(s) from the following:
- PA 5101 - Management and Governance of Nonprofit Organizations (3.0 cr)
- SW 5562 - Global Social Work and Social Development (3.0 cr)
- SW 8563 - Advanced Policy Advocacy (3.0 cr)

Diversity
SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

Advanced Policy
SW 8804 - Child Welfare Policy (3.0 cr)
or SW 8805 - Aging and Disability Policy (3.0 cr)
or SW 8806 - Health and Mental Health Policy (3.0 cr)
or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

2nd Focus Anchor
Students must choose one course from this list. Dual degree students may substitute a course from their other program with approval of the MSW Program Director.

SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
or SW 8351 - Assessment and Engagement with Families and Children (3.0 cr)
or SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)

Concentration Field Practicum and Seminar
Students complete 6 credits of SW 8020. The credits are split between fall and spring semesters, or 6 credits are taken during summer. Advanced standing students take SW 8030.
Take exactly 6 credit(s) from the following:
- SW 8020 - Field Practicum II (1.0 - 6.0 cr)

Advanced Research
Students must complete 3 cr of SW 8843. The credits are split between fall and spring semesters. Dual degree students may substitute PA 5311 or PUBH 6034.
Take 3 or more credit(s) from the following:
- SW 8843 - Social Work Program Evaluation (1.0 - 2.0 cr)
- PA 5311 - Program Evaluation (3.0 cr)
- PUBH 6034 - Evaluation (3.0 cr)

Free Electives
Students must complete at least 5 credits of 5000-level or 8000-level courses not used for another program requirement.

-OR-

Families and Children Concentration
Prepares students to work with families and children in a range of settings and organizations, as well as influence relevant organizational structures and policies. Students will be able to identify protective supports and develop interventions that mediate risk and promote resilience.

Anchor and Boost
SW 8351 - Assessment and Engagement with Families and Children (3.0 cr)
SW 8352 - Intervention Methods with Families (3.0 cr)

Concentration Electives
Students must take two courses (6 cr) from the list of concentration electives.
Take 6 or more credit(s) from the following:
- SW 8361 - Identification and Assessment of Family Violence (3.0 cr)
- SW 8363 - Social Work in Child Welfare (3.0 cr)
- SW 8462 - Advanced Clinical Practice With Children and Adolescents (3.0 cr)

The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Diversity
SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

Advanced Policy
SW 8804 - Child Welfare Policy (3.0 cr)
or SW 8805 - Aging and Disability Policy (3.0 cr)
or SW 8806 - Health and Mental Health Policy (3.0 cr)
or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

2nd Focus Anchor
Students must complete one course from this list. Dual degree students may substitute a course from their other degree program with approval from the MSW program director.
SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
or SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)
or SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

Concentration Field Practicum and Seminar
Students complete 6 credits of 8020. The credits are either split between fall and spring semesters or 6 credits are taken during summer. Advanced standing students take SW 8030
Take exactly 6 credit(s) from the following:
• SW 8020 - Field Practicum II (1.0 - 6.0 cr)

Advanced Research
Students must complete 3 credits of SW 8842. The credits are split between fall and spring semesters, or all 3 credits are taken during summer. Dual degree program students may substitute PA 5311 or PUBH 6034. This course must be taken concurrently with SW 8020 or 8030.
Take exactly 3 credit(s) from the following:
• SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)
• PA 5311 - Program Evaluation (3.0 cr)
• PUBH 6034 - Evaluation (3.0 cr)

Free Electives
Students must take at least 5 credits of 5000-level or 8000-level courses not used for another program requirement.

-OR-

Health, Disability and Aging Concentration
Prepares students to work with people affected by distinct and interconnected issues related to health, disability and aging. Students are prepared to work in a variety of settings such as hospitals, primary care clinics, residential care facilities, hospice, community-based programs, and in policy and advocacy organizations.

Anchor and Boost
SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
SW 8261 - Advanced Social Work Practice in Health Care (3.0 cr)

Concentration Electives
Students must take two courses (6 cr) from this list.
Take 6 or more credit(s) from the following:
• SW 8262 - Empowerment Practice With Persons With Disabilities (3.0 cr)
• SW 8263 - Advanced Direct Practice and Community-Based Interventions in Gerontology (3.0 cr)
• SW 8463 - Social Work Practice With Severe and Persistent Mental Illness and Severe Emotional Disturbance (3.0 cr)

Diversity
SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

Advanced Policy
SW 8805 - Aging and Disability Policy (3.0 cr)
or SW 8806 - Health and Mental Health Policy (3.0 cr)
or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

2nd Focus Anchor
Students should choose one course from this list. Dual degree students may substitute a course from their other degree program with approval from the MSW program director.
SW 8351 - Assessment and Engagement with Families and Children (3.0 cr)
or SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)
or SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

Concentration Field Practicum and Seminar
Students complete 6 credits of SW 8020. These credits are either split between fall and spring, or 6 credits are taken during summer.

Advanced Standing students will take SW 8030.
Take 6 or more credit(s) from the following:
• SW 8020 - Field Practicum II (1.0 - 6.0 cr)

Advanced Research
Students must complete 3 credits of SW 8842. The credits are split between fall and spring, or all 3 credits are taken during summer. Dual degree students may substitute PA 5311 or PUBH 6034.
This course must be taken concurrently with SW 8020 or 8030.
Take 3 or more credit(s) from the following:
• SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)
• PA 5311 - Program Evaluation (3.0 cr)
• PUBH 6034 - Evaluation (3.0 cr)

Free Electives
Students must complete at least 5 credits of 5000-level or 8000-level courses not used for another degree requirement.

Joint- or Dual-degree Coursework: MSW/MPH, MSW/MPP, and MSW/MURP
Student may take a total of 22 credits in common among the academic programs.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 64
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD program in social work prepares students to provide intellectual leadership for the social work profession through advanced levels of scholarship, research, theory development, and policy analysis. Students are expected to acquire skill in research design and statistics and to develop a comprehensive knowledge of social work and social welfare history, theory, and policy.

The PhD program does not focus on the development of advanced skills for clinical practice. However, students gain knowledge of practice theory and research related to social work practice. Many graduates assume positions as university faculty. Consequently, the program offers opportunities for students to acquire skills in teaching and curriculum development.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A master's degree is required.

Special Application Requirements:
Priority application deadline is early January in the appropriate year. Final deadline is early March. Applications received by second deadline will be reviewed and applicants accepted on a space-available basis.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
28 to 32 credits are required in the major.
8 to 12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The PhD program emphasizes mastery of student and program determined objectives rather than an accumulation of course credits. Degree requirements vary according to the student's background and educational goals. A minimum of 40 credits plus 24 required thesis credits beyond the MSW are required. Required courses include core seminars in social work research, social welfare history, social welfare policy, and theory and model development; a teaching course; a supervised research practicum and practicum seminar (two-semester sequence); supporting program courses (12 credits of supporting program course work is required - eight credits must be taken outside of social work while four credits may be taken in social work); and statistics courses. Students must also have teaching experience in the School of Social Work while in the program. Students are expected to attend PhD Colloquia and research colloquia for at least the first two years of their participation in the program.

Required Courses
SW 8875, Research Practicum, must be taken two semesters for a total of four credits.
SW 8871 - Social Work Research Seminar I (3.0 cr)
SW 8872 - Social Work Research Seminar II (3.0 cr)
SW 8875 - Research Practicum (2.0 cr)
SW 8861 - Theory and Model Development in Social Work (3.0 cr)
SW 8855 - Social Policy Formulation and Analysis (3.0 cr)
SW 8851 - Social Welfare History and Historical Research Methods (3.0 cr)
GRAD 8101 - Teaching in Higher Education (3.0 cr)

Required Statistics Courses
6 credits of graduate level statistics coursework, as approved by the Program Director.

Supporting Program Coursework
Students must take 12 credits of supporting course work in consultation with their advisor. 8 credits must be taken outside of social work while 4 credits may be taken in social work.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The sociocultural studies in education (SCSE) minor (previously known as the social and philosophic studies of education minor) provides a multidisciplinary foundation for the study of social and cultural phenomena that shape educational ideologies and practices. The minor enables students to take courses from a variety of social science, humanities, and interdisciplinary fields in order to generate a particular perspective, lens, or optic that can illuminate problems or processes of interest to them.

The SCSE minor program is shaped to suit the particular needs and interests of the student at either the master's or doctoral level. Courses at either the 5xxx or 8xxx level are selected in consultation with an SCSE faculty member and approved by the SCSE director of graduate studies (DGS). Courses are generally of two types: those that explicitly draw upon a disciplinary or interdisciplinary perspective to examine educational processes (e.g., economics of education); and those that provide an in-depth exploration of a disciplinary or interdisciplinary perspective itself (e.g., contemporary political thought).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the SCSE minor is contingent upon prior admission to a University masters or doctoral degree-granting program. Interested students should consult with a SCSE faculty member to develop a proposed course of study, then formally declare the minor when they file their degree plan. Students who declare the minor are required to include a member of the SCSE faculty on their masters or doctoral committee. Students may apply to this minor throughout the year.

Special Application Requirements:
The director of graduate studies (DGS) of the SCSE minor must approve the applicant's proposed course of study by signing the student's degree program form in addition to the student's major DGS.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters

Minor Requirements

Master’s students complete at least 9 graduate credits from the list of approved courses below. These must include a minimum of 3 OLPD course credits and 3 credits from courses outside of OLPD (these courses may be within CEHD). Additional courses may be approved by SCSE faculty in consultation with the SCSE minor DGS.

OLPD Courses

Must take at least 3 credits from the list below.

Take 1 - 2 course(s) from the following:

- **OLPD 5041** - Sociology of Education (3.0 cr)
- **OLPD 5044** - Introduction to the Economics of Education (3.0 cr)
- **OLPD 5103** - Comparative Education (3.0 cr)
- **OLPD 5107** - Gender, Education, and International Development (3.0 cr)
- **OLPD 5323** - Women in Leadership (3.0 cr)
- **OLPD 5128** - Anthropology of Education (3.0 cr)
- **OLPD 5132** - Intercultural Education and Training: Theory and Application (3.0 cr)
- **OLPD 5346** - Politics of Education (3.0 cr)
- **OLPD 5721** - Race and Ethnicity in Higher Education (3.0 cr)
- **OLPD 8022** - Education and Globalization: Anthropological Perspectives (3.0 cr)
- **OLPD 8103** - Comparative Education (3.0 cr)

Non-OLPD Courses

Must take at least 3 credits from the list below.

Take 1 - 2 course(s) from the following:

- **AFRO 5103** - World History and Africa (3.0 cr)
- **AFRO 5120** - Social and Intellectual Movements in the African Diaspora (3.0 cr)
- **AFRO 5854** - Seminar: Gender, Race, Nation, and Policy – Perspectives from Within the African Diaspora (3.0 cr)
- **AMIN 5890** - Readings in American Indian and Indigenous History (3.0 cr)
- **AMST 8288** - Working in the Global Economy: Readings (3.0 cr)
- **ANTH 8001** - Ethnography, Theory, History (3.0 cr)
- **ANTH 8002** - Ethnography: Contemporary Theory and Practice (3.0 cr)
- **ANTH 8207** - Political and Social Anthropology (3.0 cr)
- **ANTH 8215** - Anthropology of Gender (3.0 cr)
- **CI 5136** - History of the American Curriculum (3.0 cr)
- **CI 5137** - Multicultural Gender-Fair Curriculum (3.0 cr)
- **CI 5156** - Popular Culture, Teaching, and Learning (3.0 cr)
- **CI 5541** - Language, Culture, and Education (3.0 cr)
- **CI 8111** - Representations of Knowledge in Curriculum and Culture (1.0 - 3.0 cr)
- **CL 8362** - Modernity and Its Others (4.0 cr)
- **COMM 5451W** - Intercultural Communication Processes [WI] (3.0 cr)
- **CPSY 5251W** - Social and Philosophical Foundations of Early Childhood Education [WI] (3.0 cr)

Doctoral

Minor Requirements

Doctoral students complete at least 12 graduate credits from the list of approved courses below. These must include a minimum of 6 OLPD course credits and 3 credits from courses outside of OLPD (these courses may be within CEHD).

OLPD Courses

Must take at least 6 credits from the list below.
Take 2 - 3 course(s) from the following:
• OLPD 5041 - Sociology of Education (3.0 cr)
• OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
• OLPD 5103 - Comparative Education (3.0 cr)
• OLPD 5107 - Gender, Education, and International Development (3.0 cr)
• OLPD 5128 - Anthropology of Education (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 5323 - Women in Leadership (3.0 cr)
• OLPD 5346 - Politics of Education (3.0 cr)
• OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
• OLPD 8022 - Education and Globalization: Anthropological Perspectives (3.0 cr)
• OLPD 8103 - Comparative Education (3.0 cr)

Non-OLPD Courses

Must take at least 3 credits from the list below.
Take 1 - 2 course(s) from the following:
• AFRO 5103 - World History and Africa (3.0 cr)
• AFRO 5120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
• AFRO 8554 - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
• AMIN 5890 - Readings in American Indian and Indigenous History (3.0 cr)
• AMST 8288 - Working in the Global Economy: Readings (3.0 cr)
• ANTH 8001 - Ethnography, Theory, History (3.0 cr)
• ANTH 8002 - Ethnography: Contemporary Theory and Practice (3.0 cr)
• ANTH 8207 - Political and Social Anthropology (3.0 cr)
• ANTH 8215 - Anthropology of Gender (3.0 cr)
• CI 5136 - History of the American Curriculum (3.0 cr)
• CI 5137 - Multicultural Gender-Fair Curriculum (3.0 cr)
• CI 5156 - Popular Culture, Teaching, and Learning (3.0 cr)
• CI 5641 - Language, Culture, and Education (3.0 cr)
• CI 8111 - Representations of Knowledge in Curriculum and Culture (1.0 - 3.0 cr)
• CI 8461 - Sociocultural Theory, Education, and Literacy (3.0 cr)
• CL 8382 - Modernity and Its Others (4.0 cr)
• COMM 5451W - Intercultural Communication Processes [WI] (3.0 cr)
• CPSY 5251W - Social and Philosophical Foundations of Early Childhood Education [WI] (3.0 cr)
• CSSL 5555 - Introduction to Semiotics (3.0 cr)
• CSSL 5833 - Marx, Freud, Nietzsche: Intellectual Foundations (3.0 cr)
• SDS 8001 - Basic Research Seminar: Comparative Studies in Discourse and Society I (3.0 cr)
• SDS 8002 - Basic Research Seminar in Comparative Studies in Discourse and Society II (3.0 cr)
• SDS 8910 - Advanced Topics in Comparative Studies in Discourse and Society (3.0 cr)
• SDS 8920 - Advanced Topics in Comparative Studies in Discourse and Society (3.0 cr)
• DSSC 8111 - Approaches to Knowledge and Truth: Ways of Knowing in Development Studies and Social Change (3.0 cr)
• DSSC 8310 - Topics in Development Studies and Social Change (1.0 - 3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• GLOS 5403 - Human Rights Advocacy (3.0 cr)
• GLOS 5602 - Other Worlds: Globality and Culture (3.0 cr)
• GWSS 5190 - Topics: Theory, Knowledge, and Power (3.0 cr)
• GWSS 8101 - Intellectual History of Feminism (3.0 cr)
• GWSS 8103 - Feminist Theories of Knowledge (3.0 cr)
• GWSS 8107 - Feminist Pedagogies (3.0 cr)
• GWSS 8108 - Genealogies of Feminist Theory (3.0 cr)
• GWSS 8109 - Feminist Knowledge Production (3.0 cr)
• GWSS 8201 - Feminist Theory and Methods in the Social Sciences (3.0 cr)
• HIST 5871 - Readings in U.S. Intellectual History: 19th-20th Centuries (3.0 cr)
• HIST 5932 - The Production of Knowledge, Negotiating the Past, and the Writing of African Histories (3.0 cr)
• HIST 8239 - Readings in Gender, Race, Class, and/or Ethnicity in the United States (3.0 cr)
• HIST 8630 - Seminar in World History (3.0 cr)
• HIST 8961 - Research Seminar: Intellectual History (3.0 cr)
• KIN 5371 - Sport and Society (3.0 cr)
• PA 5001 - Intellectual Foundations of Public Action (1.5 cr)
• PA 5414 - Child Human Rights: Work and Education (3.0 cr)
• PHIL 5601 - History of the Philosophy of Science (3.0 cr)
• PHIL 8130 - Seminar: Epistemology (3.0 cr)
• PHIL 8131 - Epistemology Survey (3.0 cr)
• PHIL 8133 - Feminist Theories of Knowledge (3.0 cr)
• POL 8101 - Introduction to Political Science (3.0 cr)
• POL 8215 - Philosophy of Political Inquiry (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 51
- This program requires summer semesters for timely completion.
- All instruction and practica related to the residency-based sub-plan in EBD are delivered off-campus. Traditional course instruction is delivered in a meeting room in one of the partner district buildings one night per week. Practica are located in public school settings of our partner districts in Federal Setting III and IV EBD classrooms and take place during regular school hours.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduates of the University of Minnesota special education teacher licensure programs are student-centered, collaborative professionals who deliver robust, high-quality, and specialized educational services, adding value to the learning and development of infants, children, and adults with disabilities from diverse cultural backgrounds.

Program graduates are knowledgeable in the following areas:
- Engaging in collaborative problem solving with families and professionals to meet the academic, social, behavioral, and life skills needs of individuals with disabilities;
- Implementing and supporting others' implementation of evidence-based instruction and intervention with fidelity to improve student outcomes;
- Using reliable and valid assessment data to make individualized educational decisions;
- Systematically selecting and adapting instructional supports to meet individual needs, based on data and knowledge of individual learning, developmental, and cultural differences;
- Maximizing expectations and learning opportunities for individuals with disabilities in the Least Restrictive using the full continuum of services; and
- Upholding principles of professionalism and ethics in their practice.

Accreditation
This program is accredited by NCATE/BOT, Council of Exceptional Children (CEC) and Council on Education of the Deaf (CED).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
Experience in working with children and/or people with disabilities is preferred.

Special Application Requirements:
The application deadline is March 1 for summer or fall admission.

Upload the following additional materials into the appropriate areas of the online application:
- One to two page applicant statement outlining goals, interests, experiences, etc.
Résumé
- Two letters of recommendation [.pdf], preferably from individuals in the education field (for the online application, applicant's will be asked to enter recommenders' information into the online application; a message will be automatically sent to those recommenders with further instructions on how to submit their letters)
- MLTE Basic Skills Tests
- Unofficial transcripts from all collegiate institutions attended (Students who are accepted will need to send official transcripts in a sealed envelope. University of Minnesota graduates need not submit University of Minnesota transcripts to Student Services.)
- International applicants should submit a foreign transcript evaluation from an accredited reviewer (ECS http://www.ece.org/ or WES http://www.wes.org/students/index.asp)

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
**Plan C:** Plan C requires 30 to 51 major credits and 0 credits outside the major. The is no final exam. A capstone project is required.
**Capstone Project:** A portfolio and integrated paper/mini research project/comprehensive exam is required in conjunction with registration for EPSY 5690. The student and advisor will develop the individual's MEd graduate plan.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Program Sub-plans**
Students are required to complete one of the following sub-plans.
Students may complete the program with more than one sub-plan.

**Academic Behavioral Strategist**
Professional development in special education offers a program of study that leads to K-12 licensure as an Academic Behavior Strategist (ABS) and an MEd degree. This degree is designed to prepare teachers to work in a variety of educational settings with students who have mild to moderate disabilities. Graduates of the program are student-centered, collaborative professionals who implement evidence-based instructional interventions with fidelity to improve learner outcomes. The program incorporates maximizing learner expectations and learning opportunities including cultural and social diversity. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with disabilities and their families.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

**Required Courses**
EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)
Electives
Take 12 or more credit(s) from the following:
• OLPD 5005 - School and Society (2.0 cr)
• CI 5307 - Technology for Teaching and Learning (1.5 cr)
• OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
• EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
• EPSY 5617 - Academic and Social Interventions for Students with Mild to Moderate Disabilities (3.0 cr)
• EPSY 5619W - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities [WI] (3.0 cr)
• EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
• EPSY 5704 - Practicum: Special Education Field Experience in Middle and Secondary School Classrooms (1.0 - 2.0 cr)
• EPSY 5705 - Practicum: Special Ed Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
• EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
• EPSY 5741 - Student Teaching: Academic and Behavioral Strategist (3.0 - 6.0 cr)
• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Autism Spectrum Disorder
Professional development in special education offers a program in Autism Spectrum Disorder (ASD) that leads to Birth-12 licensure and an MEd degree. This degree is designed to prepare teachers to work in a variety of educational settings including home- and school-based programs with children who have been identified with ASD and their families. Graduates are prepared to assess, analyze, and provide intervention and remediation of academic, social, and communicative challenges for students with ASD. This program focuses on the implementation of evidence-based practices, specialized educational services, and outcomes that add value to the learning and development of infants, children, and adults with ASD from diverse cultural backgrounds.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses
EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 12 or more credit(s) from the following:
• OLPD 5005 - School and Society (2.0 cr)
• CI 5307 - Technology for Teaching and Learning (1.5 cr)
• OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
• EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
• EPSY 5619W - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities [WI] (3.0 cr)
• EPSY 5632 - Module 2: Evidence-based Methods for AAC Assessment and Intervention (2.0 cr)
• EPSY 5661 - Introduction to Autism Spectrum Disorder (3.0 cr)
• EPSY 5663 - Assessment and Intervention for Individuals with Autism Spectrum Disorder (3.0 cr)
• EPSY 5681 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)
• EPSY 5701 - Practicum: Field Experience in General Education - Inclusive Classrooms (1.0 - 2.0 cr)
• EPSY 5704 - Practicum: Special Education Field Experience in Middle and Secondary School Classrooms (1.0 - 2.0 cr)
• EPSY 5705 - Practicum: Special Ed Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
• EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
• EPSY 5742 - Student Teaching: Autism Spectrum Disorders (6.0 cr)
• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Deaf and Hard of Hearing
The deaf education program within special education leads to an M.Ed degree with potential for MN Licensure with additional coursework. It is designed to prepare reflective educators to work with students (and their families) with diverse linguistic and cultural backgrounds. Our program philosophy focuses on providing students with an in depth understanding of advocacy, identity development, language and literacy development, and how to facilitate and assess development across ages and curricular areas giving equal value to ASL and English. The program will prepare graduates to have bilingual and bicultural competence along with the ability to demonstrate best practices and effective instructional strategies to meet the needs of individual learners; in addition, to engage
in and value partnerships with deaf adults, parents, community and professional organizations.

For the M.Ed degree, students complete 30 credits: 15 credits required courses and 15-16 credits electives. Those interested in being prepared to apply for licensure, teaching children who are deaf and hard of hearing (Birth-Grade 12) need to take additional credits (25-30).

**Required Courses**
- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5641 - Foundations of Deaf Education (3.0 cr)
- EPSY 5654 - Current Research, Issues Trends in Deaf Education (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

**Electives**
Take 15 - 16 credit(s) from the following:
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5642 - Early Intervention for Infants, Toddlers and Families: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5643 - Seminar: Identity, Culture and Diversity in Deaf Education (2.0 cr)
- EPSY 5644 - Early Childhood Language and Literacy Development and Best Practices: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5645 - Deaf Plus: Educating and Understanding Deaf Students with Disabilities (1.0 cr)
- EPSY 5646 - Best Practices Teaching Reading and Writing for School Age: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5647 - Spoken Language Practices and Assistive Technology: Deaf and Hard of Hearing (2.0 cr)
- EPSY 5651 - Best Practices Teaching Content Areas: Deaf Education (3.0 cr)
- EPSY 5652 - Incorporating Academic ASL in the Classroom: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5653 - ASL/English Structure and Application (3.0 cr)
- EPSY 5654 - Early Intervention for Infants, Toddlers and Families: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5657 - Technology for Teaching and Learning (3.0 cr)
- EPSY 5658 - Multicultural Literature for Children and Adolescents (3.0 cr)
- EPSY 5659 - Elementary literacy Instruction for ESL Students (3.0 cr)
- EPSY 5660 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)
- EPSY 5661 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)
- OLDP 5005 - School and Society (2.0 cr)

**Developmental Disabilities**
The professional development program in special education specializing in developmental disabilities leads to K-12 classroom licensure and a MEd degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who have developmental disabilities. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with developmental disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

**Required Courses**
- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

**Electives**
Take 12 or more credit(s) from the following:
- OLDP 5005 - School and Society (2.0 cr)
• CI 5307 - Technology for Teaching and Learning (1.5 cr)
• OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
• EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
• EPSY 5619W - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities [WI] (3.0 cr)
• EPSY 5621 - Assessment and Instructional Design for Students with Developmental Disabilities (3.0 cr)
• EPSY 5622 - Programs and Curricula for Students with Developmental Disabilities (3.0 cr)
• EPSY 5624 - Biomedical and Physical Impairments of Students with Developmental Disabilities (2.0 cr)
• EPSY 5632 - Module 2: Evidence-based Methods for AAC Assessment and Intervention (2.0 cr)
• EPSY 5636 - Sensory Impairments of Students With Developmental Disabilities (2.0 cr)
• EPSY 5701 - Practicum: Field Experience in General Education - Inclusive Classrooms (1.0 - 2.0 cr)
• EPSY 5705 - Practicum: Special Ed Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
• EPSY 5756 - Student Teaching: Developmental Disabilities, Moderate/Severe (1.0 - 6.0 cr)
• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Early Childhood Special Education

The professional development program in special education specializing in early childhood special education (ECSE) leads to teaching licensure for work with children from birth through age five as well as a M.Ed. This program is designed to prepare teachers to work in a variety of educational settings, including home and school, with children who have a variety of developmental delays and disabilities.

The ECSE program philosophy focuses on cultural and social diversity and meeting the needs of individual children who have disabilities. Further, the ECSE program emphasizes the delivery of evidence-based practices within the natural routines of families and preschools when addressing the individualized needs of children. Graduates are prepared to assess, analyze, monitor, and problem solve the developmental and educational needs of young children and their families. With that, graduates of the ECSE program are prepared to be leaders in the field for the identification intervention needs, provision of research-based services, and facilitation of successful transitions to kindergarten.

Students complete 30 credits: 17 credits required courses and 13 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses
• EPSY 5609 - Family-centered Services (2.0 cr)
• EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
• EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
• EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
• EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
• EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
• EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 13 or more credit(s) from the following:
• CPSY 5252 - Facilitating Social and Emotional Learning in Early Childhood Education (3.0 cr)
• CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
• CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)
• OLPD 5005 - School and Society (2.0 cr)
• CI 5307 - Technology for Teaching and Learning (1.5 cr)
• OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
• EPSY 5619W - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities [WI] (3.0 cr)
• EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)

Learning Disabilities

The professional development program in special education specializing in learning disabilities leads to K-12 classroom licensure and a M.Ed degree. It is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity, and meeting the needs of individual students who have learning disabilities. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with learning disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses

- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives

Take 12 or more credit(s) from the following:

- OLPD 5005 - School and Society (2.0 cr)
- CI 5307 - Technology for Teaching and Learning (1.5 cr)
- OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5514 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
- EPSY 5617 - Academic and Social Interventions for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5619W - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities [WI] (3.0 cr)
- EPSY 5627 - Seminar: Advanced issues in Learning Disabilities (3.0 cr)
- EPSY 5628 - Characteristics of Moderate to Severe Learning Disabilities (3.0 cr)
- EPSY 5629 - Strategic Instructional Methods for Students Academically At-Risk (3.0 cr)
- EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
- EPSY 5701 - Practicum: Field Experience in General Education - Inclusive Classrooms (1.0 - 2.0 cr)
- EPSY 5704 - Practicum: Special Education Field Experience in Middle and Secondary School Classrooms (1.0 - 2.0 cr)
- EPSY 5705 - Practicum: Special Ed Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
- EPSY 5707 - Practicum in Moderate to Severe Learning Disabilities (3.0 cr)
- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- EPSY 5752 - Student Teaching: Learning Disabilities (1.0 - 6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Emotional and Behavioral Disabilities

Note: New student applications to Emotional and Behavioral Disorders are not being accepted.

The professional development program in special education specializing in emotional and behavioral disorders leads to K-12 classroom licensure and a M.Ed. degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who have emotional and behavioral disorders. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with emotional and behavioral disorders and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses

- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)
Electives
Take 12 or more credit(s) from the following:
- OLPD 5005 - School and Society (2.0 cr)
- CI 5307 - Technology for Teaching and Learning (1.5 cr)
- OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)

- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- EPSY 5754 - Student Teaching: Social and Emotional Disabilities (1.0 - 6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Emotional and Behavioral Disabilities Residency-Based
The professional development program in special education specializing in emotional and behavioral disorders leads to K-12 classroom licensure and a M.Ed. degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who have emotional and behavioral disorders. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with emotional and behavioral disorders and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete required courses for a total of 30 credits. Additional credits (5-6) are required for adding licensure to degree.

Required Courses
Students take the following courses including one credit of EPSY 5991.
- EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5619W - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities [WI] (3.0 cr)
- EPSY 5629 - Strategic Instructional Methods for Students Academically At-Risk (3.0 cr)
- EPSY 5637 - Core Practices in Special Education: Foundations of Special Education (1.0 cr)
- EPSY 5638 - Core Practices in Special Education: IEP Writing (1.0 cr)
- EPSY 5656 - Advanced Issues in Emotional Behavior Disorders (3.0 cr)
- EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
- EPSY 5658 - Characteristics of Moderate to Severe Emotional/Behavioral Disorders (3.0 cr)
- EPSY 5708 - Practicum in Moderate to Severe Emotional/Behavioral Disorders (3.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 51
- This program requires summer semesters for timely completion.
- All instruction and practica related to the residency-based sub-plan in EBD are delivered off-campus. Traditional course instruction is delivered in a meeting room in one of the partner district buildings one night per week. Practica are located in public school settings of our partner districts in Federal Setting III and IV EBD classrooms and take place during regular school hours.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduates of the University of Minnesota special education teacher licensure programs are student-centered, collaborative professionals who deliver robust, high-quality, and specialized educational services, adding value to the learning and development of infants, children, and adults with disabilities from diverse cultural backgrounds.

Program graduates are knowledgeable in the following areas:
- Engaging in collaborative problem solving with families and professionals to meet the academic, social, behavioral, and life skills needs of individuals with disabilities;
- Implementing—and supporting others’ implementation of—evidence-based instruction and intervention with fidelity to improve student outcomes;
- Using reliable and valid assessment data to make individualized educational decisions;
- Systematically selecting and adapting instructional supports to meet individual needs, based on data and knowledge of individual learning, developmental, cultural differences;
- Maximizing expectations and learning opportunities for individuals with disabilities in the Least Restrictive using the full continuum of services; and
- Upholding principles of professionalism and ethics in their practice.

**Accreditation**

This program is accredited by NCATE/BOT, Council of Exceptional Children (CEC) and Council on Education of the Deaf (CED).

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
- Experience in working with children and/or people with disabilities is preferred.

**Special Application Requirements:**

The application deadline is March 1 for summer or fall admission.

Upload the following additional materials into the appropriate areas of the online application:
- One to two page applicant statement outlining goals, interests, experiences, etc.
- Résumé
- Two letters of recommendation [.pdf], preferably from individuals in the education field (for the online application, applicant's will be asked to enter recommenders' information into the online application; a message will be automatically sent to those recommenders with further instructions on how to submit their letters)
- MLTE Basic Skills Tests
- Unofficial transcripts from all collegiate institutions attended (Students who are accepted will need to send official transcripts in a sealed envelope. University of Minnesota graduates need not submit University of Minnesota transcripts to Student Services.)
- International applicants should submit a foreign transcript evaluation from an accredited reviewer (ECS http://www.ece.org/ or WES http://www.wes.org/students/index.asp)

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

---

**Program Requirements**

**Plan C:** Plan C requires 30 to 51 major credits and 0 credits outside the major. The is no final exam. A capstone project is required.

**Capstone Project:** A portfolio and integrated paper/mini research project/comprehensive exam is required in conjunction with registration for EPSY 5690. The student and advisor will develop the individual's M.Ed. graduate plan.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

---

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

**Academic Behavioral Strategist**

Professional development in special education offers a program of study that leads to K-12 licensure as an Academic Behavior Strategist (ABS) and an M.Ed. degree. This degree is designed to prepare teachers to work in a variety of educational settings with students who have mild to moderate disabilities. Graduates of the program are student-centered, collaborative professionals who implement evidence-based instructional interventions with fidelity to improve learner outcomes. The program incorporates maximizing learner expectations and learning opportunities including cultural and social diversity. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with disabilities and their families.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Deaf and Hard of Hearing
The deaf education program within special education leads to an M.Ed. degree with potential for MN Licensure with additional coursework. It is designed to prepare reflective educators to work with students (and their families) with diverse linguistic and cultural backgrounds. Our program philosophy focuses on providing students with an in depth understanding of advocacy, identity development, language and literacy development, and how to facilitate and assess development across ages and curricular areas giving equal value to ASL and English. The program will prepare graduates to have bilingual and bicultural competence along with the ability to demonstrate best practices and effective instructional strategies to meet the needs of individual learners; in addition, to engage in and value partnerships with deaf adults, parents, community and professional organizations.
For the M.Ed degree, students complete 30 credits: 15 credits required courses and 15-16 credits electives. Those interested in being prepared to apply for licensure, teaching children who are deaf and hard of hearing (Birth-Grade 12) need to take additional credits (25-30).

**Required Courses**

- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5641 - Foundations of Deaf Education (3.0 cr)
- EPSY 5654 - Current Research, Issues Trends in Deaf Education (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

**Electives**

Take 15 - 16 credit(s) from the following:

- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5611 - Research-based Practices in Academic and Behavior Disabilities (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5642 - Early Intervention for Infants, Toddlers and Families: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5643 - Seminar: Identity, Culture and Diversity in Deaf Education (2.0 cr)
- EPSY 5644 - Early Childhood Language and Literacy Development and Best Practices: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5645 - Deaf Plus: Educating and Understanding Deaf Students with Disabilities (1.0 cr)
- EPSY 5646 - Best Practices Teaching Reading and Writing for School Age: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5647 - Spoken Language Practices and Assistive Technology: Deaf and Hard of Hearing (2.0 cr)
- EPSY 5651 - Best Practices Teaching Content Areas: Deaf Education (3.0 cr)
- EPSY 5652 - Incorporating Academic ASL in the Classroom: Deaf and Hard of Hearing (3.0 cr)
- EPSY 5653 - ASL/English Structure and Application (3.0 cr)
- EPSY 5701 - Practicum: Field Experience in General Education - Inclusive Classrooms (1.0 - 2.0 cr)
- EPSY 5704 - Practicum: Special Education Field Experience in Middle and Secondary School Classrooms (1.0 - 2.0 cr)
- EPSY 5705 - Practicum: Special Ed Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- EPSY 5751 - Student Teaching for Deaf Education (1.0 - 6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)
- CI 5307 - Technology for Teaching and Learning (1.5 cr)
- CI 5404 - Multicultural Literature for Children and Adolescents (3.0 cr)
- CI 5417 - Elementary literacy Instruction for ESL Students (3.0 cr)
- OLPD 5005 - School and Society (2.0 cr)
- OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)

**Developmental Disabilities**

The professional development program in special education specializing in developmental disabilities leads to K-12 classroom licensure and a M.Ed. degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who have developmental disabilities. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with developmental disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

**Required Courses**

- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

**Electives**

Take 12 or more credit(s) from the following:

- OLPD 5005 - School and Society (2.0 cr)
- CI 5307 - Technology for Teaching and Learning (1.5 cr)
Early Childhood Special Education
The professional development program in special education specializing in early childhood special education (ECSE) leads to teaching licensure for work with children from birth through age five as well as a M.Ed. This program is designed to prepare teachers to work in a variety of educational settings, including home and school, with children who have a variety of developmental delays and disabilities.

The ECSE program philosophy focuses on cultural and social diversity and meeting the needs of individual children who have disabilities. Further, the ECSE program emphasizes the delivery of evidence-based practices within the natural routines of families and preschools when addressing the individualized needs of children. Graduates are prepared to assess, analyze, monitor, and problem solve the developmental and educational needs of young children and their families. With that, graduates of the ECSE program are prepared to be leaders in the field for the identification early intervention needs, provision of research-based services, and facilitation of successful transitions to kindergarten.

Students complete 30 credits: 17 credits required courses and 13 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses
- EPSY 5609 - Family-centered Services (2.0 cr)
- EPSY 5615 - Foundations of Special Education I [DSJ] (3.0 cr)
- EPSY 5614W - Assessment and Due Process in Special Education [WI] (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5631 - Module 1 (3.0 cr)
- EPSY 5680 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 13 or more credit(s) from the following:
- CPSY 5252 - Facilitating Social and Emotional Learning in Early Childhood Education (3.0 cr)
- CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
- CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)
- OLPD 5005 - School and Society (2.0 cr)
- CI 5307 - Technology for Teaching and Learning (1.5 cr)
- OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)

- EPSY 5682 - Education of Infants and Toddlers with Disabilities: Methods and Materials (3.0 cr)
- EPSY 5701 - Practicum: Field Experience in General Education - Inclusive Classrooms (1.0 - 2.0 cr)
- EPSY 5705 - Practicum: Special Education Field Experience in Middle and Secondary School Classrooms (1.0 - 2.0 cr)
- EPSY 5705 - Practicum: Special ED Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
- EPSY 5706 - Practicum in Moderate to Severe Developmental Disabilities (2.0 cr)
- EPSY 5707 - Practicum: Special Ed Field Experience in Early Childhood SpEd (ECSE) & Elementary School Classrooms (1.0 - 2.0 cr)
- EPSY 5755 - Student Teaching: Developmental Disabilities, Mild/Moderate (1.0 - 6.0 cr)
- EPSY 5756 - Student Teaching: Developmental Disabilities, Moderate/Severe (1.0 - 6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)
Learning Disabilities

The professional development program in special education specializing in learning disabilities leads to K-12 classroom licensure and a M.Ed. degree. It is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity, and meeting the needs of individual students who have learning disabilities. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with learning disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30 credits: 18 credits required courses and 12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Certificate of Specialist in Educ/Genl Educ/Admin

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Applications to this certificate currently are not being accepted.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Our research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the MA and PhD programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and Human Resource Development (HRD). Our undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Note: Applications to this certificate currently are not being accepted.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

This program's structure is currently under review. In the past, it has been customized based on the student's prior coursework. A final paper is required for completion.

- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The sport and exercise science M.Ed. is a practitioner-oriented, graduate-level program designed to prepare students for or advance students in careers related to physical activity, such as sport coaching, athletic training, health promotion, fitness leadership, strength and conditioning coaching, personal training, and physical education teaching.

With guidance from faculty advisers, students choose at least 30-semester credits, which may include coursework, independent study, internships, workshops, and professional, site-based experiences. Students must maintain a minimum 3.0 GPA.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.50.

A bachelor's degree, preferably in kinesiology or physical education.

Special Application Requirements:
The department reviews applications on an ongoing basis. Application reviews for specific academic terms begin by the following dates:

- November 1: spring semester admission
- March 1: summer session admission
- July 1: fall semester admission

Admission requirements for this program include the following criteria:

A bachelor's degree, preferably in physical education or kinesiology, with a 2.50 minimum grade point average (GPA) from an accredited institution. Applicants who do not hold a degree in physical education or kinesiology may need to take some undergraduate prerequisite courses after admission.

All applicants must submit the following items:
- Online application from Apply Yourself
- Application fee
- Unofficial transcripts of all previous post-secondary academic study must be uploaded to the application (official transcripts will be required if accepted)
- Personal statement describing career goals and rationale for interest in the program
- Resume

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21

Program Requirements

Plan C: Plan C requires 20 major credits and 10 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: See department for more details.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Required Courses

Students must consult with their advisor to determine their appropriate coursework. Students register for 3 credits of KIN 5995 and must consult with their advisor before registering for the course.

KIN 5181 - Understanding Kinesiology Research (3.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)

Elective Courses

Students take a minimum of 14 credits of KIN electives from the list below, and a minimum of 10 additional credits from KIN or non-KIN courses. Students consult with their advisor before registering for electives. Up to 9 4xxx level credits are allowed to meet M.Ed. requirements.

KIN 4214 - Health Promotion (3.0 cr)
or KIN 4385 - Exercise Physiology (4.0 cr)
or KIN 4641 - Training Theory & Analytics I for Sport Performance (3.0 cr)
or KIN 4741 - Training Theory & Analytics 2 for Sport Performance (3.0 cr)
or KIN 5122 - Applied Exercise Physiology (3.0 cr)
or KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
or KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
or KIN 5136 - Psychology of Coaching (3.0 cr)
or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
or KIN 5142 - Applied Nutrition for Sport Performance and Optimal Health (3.0 cr)
or KIN 5202 - Current Issues in Health (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of arts in sport management provides academic excellence by combining theoretical instruction and practical experience to prepare tomorrow's leaders for success in the sports industry and marketplace. Students develop the tools of research and learn core concepts through an interdisciplinary curriculum with an emphasis on cultivating new ideas and improving operations in the sport industry.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must submit a University of Minnesota application which includes a written statement of academic interests, goals, and objectives; scores from the General Test of the GRE (verbal, quantitative, and analytical writing) or the GMAT (verbal, quantitative, and analytical writing) that are less than five years old; three letters of recommendation from persons familiar with their scholarship and research potential; a scholarly writing sample; and transcripts. Submission of all application materials by December 1 is strongly encouraged to ensure priority consideration for admission and for teaching and research assistantships awarded for the next academic year. Students are admitted for the fall semester.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4.5
- GMAT
  - Verbal section score: 33
  - Quantitative section score: 44
  - Analytical writing assessment score: 5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 26 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 36 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is an independent research project with the advisor that meets the following guidelines: involves a total of approximately 120 hours of work; demonstrates familiarity with the tools of research and scholarship in the field of sport management; demonstrates the ability to work independently; demonstrates the ability to effectively present the results of the investigation.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with advisor approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Core Coursework (16 Credits)

KIN 5421 - Sport Finance (3.0 cr)
KIN 5631 - Programming and Promotion in Sport (3.0 cr)
KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Required Research Course (3 Credits)

KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)

Required Research Analysis Course (3 Credits)

Take one research analysis course for 3 credits from the following list, or consult with advisor for an alternative course.

CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
EPSY 5261 - Introductory Statistical Methods (3.0 cr)
EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
FSOS 8013 - Qualitative Family Research Methods (3.0 cr)

Electives (4 to 10 Credits)

Plan A students take at least 4 credits, and Plan B students take at least 10 credits from the following list, in consultation with the advisor. Registration for KIN 5992, KIN 5995, and KIN 5720 is limited to 3 credits.

KIN 5371 - Sport and Society (3.0 cr)
KIN 5375 - Youth Sport Science (3.0 cr)
KIN 5461 - Issues in the Sport Industry (3.0 cr)
KIN 5511 - Sport and Gender (3.0 cr)
KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
KIN 5992 - Readings in Kinesiology (1.0 - 9.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)
MKTG 6088 - Strategic Marketing (2.0 cr)

Plan Options

Plan A

Take 10 master's thesis credits.

KIN 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Take KIN 8995 for 4 credits.

KIN 8995 - Research Problems in Kinesiology (1.0 - 12.0 cr)

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The sport management master of education (MEd) is a practitioner-oriented, graduate-level program designed to prepare students for advanced study or careers in sport administration, sport management, or sport and fitness related professions. With guidance from professional program advisers, students choose at least 30 semester credits, which may include coursework, independent study, internships, workshops, and professional site-based experiences. Required courses will provide students with a well-balanced perspective of the industry; multiple options in elective courses allow students to focus on topics they find applicable and interesting in relation to the sport and physical activity industry. Students must maintain a minimum 3.0 GPA.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.50.

A bachelor's degree, preferably in kinesiology or physical education.

Special Application Requirements:
The college reviews applications on an ongoing basis. Application reviews for specific academic terms begin by the following dates:
- November 1: spring semester admission
- March 1: summer session admission
- July 1: fall semester admission

Admission requirements for this program include the following criteria:

A bachelors degree, preferably in physical education or kinesiology, with a 2.50 minimum grade point average (GPA) from an accredited institution. Applicants who do not hold a degree in physical education or kinesiology may need to take some undergraduate prerequisite courses after admission.

All applicants must submit the following items:
- Online application from Apply Yourself
- Application fee ($75 for U.S. applicants; $95 for international applicants)
- Unofficial transcripts of all previous post-secondary academic study must be downloaded to the application (official transcripts will be required if accepted)
- Personal statement describing career goals and rationale for interest in the program
- Resume

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Program Requirements

Plan C: Plan C requires 22 major credits and 8 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: Students work with teaching faculty on this final project. It is recommended that students complete the project during the final semester of the program.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Departmental Core Courses

Students will complete a total of 30 credits, including 22 credits of core course requirements.

KIN 5421 - Sport Finance (3.0 cr)
KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
KIN 5631 - Programming and Promotion in Sport (3.0 cr)
KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)

Take either KIN 5181 or KIN 5981 in consultation with adviser.

  KIN 5181 - Understanding Kinesiology Research (3.0 cr)
  or KIN 5981 - Research Methodology in Kinesiology and Sport Management (3.0 cr)

Elective Courses

In consultation with advisor, students select elective courses for a minimum of 8 credits. It is highly recommended that electives be selected from the following list. One course may be selected from outside kinesiology, such as from the Department of Organizational Leadership, Policy and Development, or Carlson School of Management. KIN 5461 is required for students without baseline knowledge of sport management. KIN 5720 is limited to 3-4 credits.

KIN 5371 - Sport and Society (3.0 cr)
or KIN 5461 - Issues in the Sport Industry (3.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 5804 - National Collegiate Athletic Association (NCAA) Compliance (2.0 cr)
or KIN 5992 - Readings in Kinesiology (1.0 - 9.0 cr)
or MBA 6240 - Competing in a Data-Driven Digital Age (2.0 cr)
or MBA 6300 - Strategic Management (3.0 cr)
or PA 5101 - Management and Governance of Nonprofit Organizations (3.0 cr)

- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

**Prerequisites for Admission**

**Special Application Requirements:**
Applicants to this post-baccalaureate certificate must have completed a bachelor's degree from an accredited institution. Student applications will be reviewed by a committee of individuals affiliated with the program. Detailed application instructions are available at the Educational Psychology website under the certificates link. Applications are accepted year-round.

Applicants must submit the following application materials:
- Unofficial transcripts from all post-secondary institutions attended or currently attending, including the University of Minnesota. Transcripts can be uploaded directly into the Apply Yourself online application system (see Educational Psychology's program website).
- For coursework completed outside of the United States, transcripts must be evaluated by a professional credential evaluation center. Request a "course-by-course" evaluation. This process can take 4-6 weeks; please plan accordingly. Students can use any provider that is an accredited member of the National Association of Credential Evaluation Services (NACES). A suggested provider is Educational Credential Evaluators (ECE), P.O. Box 514070, Milwaukee, WI 53203-3470 (414-289-3400, fax: 414-289-3411).
- Answer the following certificate-specific questions on a separate sheet of paper and upload into the online application system: 1) Why are you interested in the talent development and gifted education certificate program? 2) What are your primary areas of interest related to talent development and gifted education?

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
