Crowd sourced data curation playlist

Hello, my name is Wanda Marsolek (they/them). I am an Engineering liaison and Data Curation Librarian at the University of Minnesota Libraries and a Data CuRe Fellow (https://osf.io/4enct/). My personal project for the fellowship is to acknowledge and celebrate the humanness of data curation. This survey will help crowdsource a music playlist from our colleagues around the world of the music we listen to while curating data. "Music can reduce stress, improve happiness, and even increase happiness.... Music can have a positive impact on a human's performance and perception of certain tasks." Selecting one's own music to listen to can lead to an enhancing one's mood which in turn can bring more joy and less anxiety and sadness. Listening to music for at least 20 minutes helps reduce stress and don't we all need more help reducing our stress? Together we can share what helps make us happy, productive and less stressed by uniting over music and introducing others to the background sounds of data curation.

We will use the Johnston et al. definition of data curation as “the encompassing work and actions taken by curators of a data repository in order to provided meaningful and enduring access to data”

The deliverable for this survey will be a playlist shared back out the way this survey was distributed using listsrvs and tweets along with a blog post on the Data CuRe blog. There is also an opportunity for you to share your email address and receive the playlist directly. Questions may be directed to mars0215 at umn dot edu. Thank you in advance for participating!

Do you listen to music when you curate data? *

- Yes! Always!
- Yes! But only sometimes.
- No! Are you kidding me?
What kind of music do you listen to when you curate data? (Categories borrowed from Tidal Streaming Service) Check all that apply.

☐ Alternative/Indie
☐ Blues
☐ Classical
☐ Country
☐ Dance
☐ Electronic
☐ Folk/Americana
☐ Global
☐ Hip-Hop
☐ Jazz
☐ K-Pop
☐ Latin
☐ Metal
☐ Pop
☐ R&B/Soul
☐ Rap
☐ Reggae/Dancehall
☐ Rock
☐ Religious
☐ I don't listen to music when curating data
The music type(s) you selected above, do they mirror the music you listen to when you are not curating data?

- Yes
- No
- I only listen to music when I curate data
- I don't listen to music when I curate data

If you listen to music when you curate data, does it have lyrics?

- Yes
- No way
- It depends on the specific task
- I don't listen to music when I curate data
What kind of data do you curate? Check all that apply. *

- [ ] 3D Images
- [ ] 3D Printer files
- [ ] Audio Visual (video, images, sound)
- [ ] Autocad files
- [ ] DAT Files
- [ ] Database
- [ ] Discipline Specific
- [ ] Genomic Sequence files
- [ ] GIS/Geospatial
- [ ] Mass Spectrometry Data
- [ ] Matlab
- [ ] Python
- [ ] R
- [ ] Software Code
- [ ] Statistical/Survey
- [ ] Tabular
- [ ] Textual

If you do listen to music when you curate data, please share 1-3 song titles and artist names.
How does the music listed above make you feel when listening while curating data? (Check all that apply)

☐ Anxious
☐ Calm
☐ Chaotic
☐ Confident
☐ Depressed
☐ Doubtful
☐ Energized
☐ Exhausted
☐ Focused
☐ Happy
☐ I don't feel anything anymore
☐ Relaxed
☐ Unfocused
☐ I don't listen to music when I curate data
☐ Other:
