INTERNATIONAL QUEEN  
TO BE CROWNED  
SATURDAY AT 'U'

(FOR IMMEDIATE RELEASE)

The new International Queen at the University of Minnesota will be crowned Saturday (Jan. 7) at the second International New Year's dance in Coffman Union main ballroom.

Miss Conchita Tan, graduate student from The Philippines and the University's first International Queen, will crown the new queen during the intermission of the ball.

The semi-formal party, from 8 p.m. to 12 midnight, will be open to the public, according to Timon Bondo, publicity director for the University's International Student Council. Music will be provided by the Underbeats.

University students or wives of University students are eligible to enter the queen contest. Basis of selection will not necessarily be beauty, Bondo said. Such characteristics as poise, charm and personality will be given primary importance.

Tickets for the party may be obtained through the International Student Council, Room 349 Coffman union, or the Union ticket office, ground floor.

'U' MUSLIM STUDENTS  
PLAN ANNUAL  
RAMADAN DINNER

(FOR IMMEDIATE RELEASE)

"Islam and Its Practicability in Modern Times" will be discussed by Professor Ahmed K. Abou-el-Magd, cultural attache, Embassy of the United Arab Republic, at the annual Ramadan dinner of the Muslim Students' Association of the University of Minnesota Saturday (Jan. 7). Abou-el-Magd is a former professor in the School of Law, University of Cairo, U.A.R.

The dinner, marking the Islamic observance of the Month of Ramadan, will be given at 5:15 p.m. at Luther Hall, 1813 University ave. SE., Minneapolis, according to Amin F. El-Dirghamy, president of the organization.

The dinner, serving dishes from many countries of the world, will be open to the public, as will Professor Abou-el-Magd's talk, El-Dirghamy said. Tickets, at \$1.75 for adults and \$1 for children, may be purchased at the door. There will be no charge for the after-dinner talk.

The lunar month of Ramadan---the Islamic period for self-discipline and fasting---this year falls between Dec. 12 and Jan. 12, El-Dirghamy explained. During this time, Muslims do not eat or drink any liquids during daylight hours. The observance of this month of fasting dates back 1400/<sup>years</sup>to Mohammed, he said, and has been observed by Muslims throughout the world ever since. As it is lunar-dated, it falls 12 days earlier each calendar year.

Because the size of Luther hall's dining facilities is limited to 200, El-Dirghamy suggested that anyone interested in attending the Ramadan dinner should make advance reservations by calling 331-6494 or 331-2728.

WANGENSTEEN  
RESEARCH GRANT  
IS CONTINUED

(FOR IMMEDIATE RELEASE)

Minneapolis---Research on the physiological and therapeutic relationships of esophagus, stomach and liver will be continued for the next two years at the University of Minnesota under a grant of \$83,057 from the John A. Hartford Foundation, Inc., New York City.

Announcement of the award was made today by Ralph W. Burger, foundation president, and Dr. Robert B. Howard, dean of the University's College of Medical Sciences.

The studies will be directed by Dr. Owen H. Wangensteen, professor and chairman of surgery in the College of Medical Sciences. Dr. Wangensteen and his team of investigators have been doing research in this general area for some eight years, studying methods of treating patients with severe cases of peptic ulcer and damaged livers with gastro-esophageal cooling.

Also, under this grant, studies will be made of the use of lasers to suppress gastric secretions.

This is the second Hartford Foundation grant made to the University of Minnesota for research in gastric freezing techniques. The first, made in 1964, was for three years and amounted to \$164,787.

FISH CURATOR  
TO DESCRIBE ALASKA  
SALMON PROBLEM

(FOR IMMEDIATE RELEASE)

The curator of fishes at the Minnesota Museum of Natural History will describe the decline of red salmon in Alaska and tell of attempts to halt this decline, in this Sunday's (Jan. 8) program in the museum auditorium at 3 p.m.

The talk, which is free and open to the public, will be illustrated by slides. The speaker will be Charles W. Huver, University associate professor of zoology, whose topic will be "Research Efforts to Halt the Decline of Alaskan Salmon."

Huver, who has worked for the U.S. Fish and Wildlife Service in Alaska, points out that in the 1890's, the catch of red salmon in Alaska's Karluk river was about 5 million per year. Today, he says, that has dwindled to 200,000 or 300,000 a year. He blames the decline on overfishing, particularly the removal of parent stock after spawning.

Huver joined the Minnesota faculty in 1963. He holds a doctor of philosophy degree from Yale University, a master of science degree from the University of Wisconsin and a bachelor of science degree from Michigan State University.

COUNTY HIGHWAY  
ENGINEERS TO ATTEND  
4-DAY 'U' INSTITUTE

(FOR IMMEDIATE RELEASE)

State Highway Department officials will be among the guest speakers when the University of Minnesota holds its 22nd annual Institute for County Highway Engineers Monday through Thursday noon (Jan. 9-12).

The institute will be held in the Civil Defense and Highway Training Center, 1900 W. County Road "I", New Brighton. Some 125 persons are expected to attend, including personnel from most of the state's 87 county highway departments.

John R. Jamieson, state highway commissioner, will give the first address, at 10 a.m. Monday (Jan. 9), on "Procedural Changes Resulting From Reorganization Plan and the Department's Long-Range Goals."

He will be followed by two others from his department. John H. Swanberg, deputy highway commissioner, will speak at 10:30 a.m. on "Work Improvement Techniques" and J. M. Evans, assistant commissioner, will speak at 11 a.m. on "Acceleration of the Highway Program." Questions and answers will follow.

Monday afternoon (Jan. 9), Ralph Keyes, executive secretary of the Association of Minnesota Counties, St. Paul, will talk at 3 p.m. He will be followed by Richard Cook, executive director of Minnesota Good Roads, Inc., speaking at 4 p.m. on "Legislative Proposals."

The remaining two and a half days of talks will be somewhat more technical.

The institute is presented by the General Extension Division's department of conferences and institutes, in cooperation with the Minnesota Association of County Highway Engineers and the Minnesota Department of Highways.

LIST OF UNIVERSITY OF MINNESOTA, MINNEAPOLIS CAMPUS EVENTS  
WEEK OF JAN. 7-15

- Sat. -- Jan. 7 -- Annual Ramadan dinner, University Muslim Students' Association; speaker, Professor Ahmed K. Abou-el-Magd, cultural attache, U.A.R. embassy; topic, "Islam and Its Practicability in Modern Times," 5:15 p.m., Luther hall, 1813 University ave. SE., Minneapolis. Tickets for dinner at door; speech, free.
- Sat. -- Jan. 7 -- Second annual International New Year's dance and International Queen contest; 8 p.m.-12 midnight, Coffman Union main ballroom. Tickets at door.
- Sat. -- Jan. 7 -- Special concert---University Concert Band Ensemble and a select high school band from the Twin Cities area, 8:30 p.m., Northrop auditorium. Free.
- Sat. -- Jan. 7 -- Creative Arts Festival---One-act play productions of entries submitted in contest; 3 p.m., 320 Coffman Union. Free.
- Sun. -- Jan. 8 -- Minnesota Museum of Natural History Sunday Program: Slide-illustrated lecture on "Research Efforts to Halt the Decline of Alaskan Salmon," by Charles W. Huver, museum curator of fishes; 3 p.m., museum auditorium. Free.
- Sun. -- Jan. 8 -- Creative Arts Festival---Concert, winners of festival music competition; reception for all winners, friends and families, 4 p.m., Coffman Union main ballroom. Free.
- Sun. -- Jan. 8 -- Annual Greek Week observances---Social service projects during afternoon and evening.
- Sun. -- Jan. 8 -- M.F.A. recital, pianist Bang Sook Lee, 8 p.m., Scott hall auditorium. Free.
- Mon. -- Jan. 9 -- Greek Week: Songfest, 7:30-10:30 p.m., Scott hall auditorium. Free. Convocation---Political Science Professor Mulford Q. Sibley speaks at 12 noon, 202 Westbrook. Free. Quiz Bowl contests---3:30 p.m., 326 Coffman Union. Through Friday.
- Mon. -- Jan. 9 -- Chamber Series recital---An evening of classical music. 8 p.m., Coffman Union Gallery. Students, free. Non-students, \$1 at door.
- Tues. - Jan. 10 -- Greek Week: Boot hockey tourney; sorority and fraternity teams compete; U. hockey team members referee; 6 p.m., Williams Arena. Free.

(MORE)

- Wed. -- Jan. 11 -- Greek Week: Convocation---speaker, Edmund G. Williamson, dean of students; 12 noon, 202 Wesbrook hall. Free. Coronation Dance; King and Queen for 1967 will be crowned; Coffman Union main ballroom, 9:15 p.m. Tickets at door. Symposium: "The Value of a Continuing Education," speech by Millard Roberts, President, Parsons College; 3:30 p.m., Mayo auditorium. Free.
- Thurs.- Jan. 12 -- Greek Week---Convocation: Professor David Cooperman, Social Sciences program, speaker; 12 noon, 202 Wesbrook. Free.
- Fri. -- Jan. 13 -- Greek Week---Olympics ("Regular" and "Mock") Cooke hall, University Field House and Coffman Union. 7:30 p.m. Free. Convocation: Professor George Shapiro, speech and theatre arts; 12 noon, 202 Wesbrook. Free.
- Sat. -- Jan. 14 -- Greek Week---Annual benefit concert: Performance by the "We Five," 8:30 p.m., Northrop auditorium. Tickets.
- Sun. -- Jan. 15 -- Museum Sunday program---"Geologic History of Great Salt Lake, Utah," will be discussed by Robert C. Bright, museum curator of pleistocene paleontology; 3 p.m., museum auditorium. Free.

'U' GREEK WEEK 1967  
TO EXHIBIT ACTIVITIES  
OF SORORITIES, FRATERNITIES

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Greek Week 1967 at the University of Minnesota this year will serve as a showcase for the many activities of the University students belonging to social sororities and fraternities, according to the group's co-chairmen, Cathy Lickteig, Alpha Gamma Delta, and John Bierbaum, Phi Gamma Delta. The events begin Sunday (Jan. 8) and continue through Monday, Jan. 16.

Formerly designed to unite the Greeks on campus and to sponsor one big social service project, the Greek Week observance this year principally will present the various aspects of the Greek system to the campus and the Twin Cities area, Miss Lickteig said.

Highlights of the program will include individual sorority-fraternity social service projects in which the dozen or more groups will visit nursing and rest homes, special schools and neighborhood settlement houses in the Twin Cities Sunday (Jan. 8) afternoon; "trade" dinners Monday (Jan. 9) to which fellow-Greeks and foreign students will be invited; a week-long series of noon-time convocations by University professors and administrators; and a symposium on "The Value of a Continuing Education" by Millard G. Roberts, president of Parsons College, Fairfield, Iowa. The symposium will be held at 3:30 p.m. Wednesday (Jan. 11) in Mayo auditorium and will be open free to the public.

University faculty and administrators who will speak in the daily convocations at 12 noon in 202 Wesbrook hall include Professor Mulford Q. Sibley, Monday; no speaker as yet announced for Tuesday; Edmund G. Williamson, University dean of students, Wednesday; Professor David Cooperman, head of the social sciences program, Thursday; and Professor George Shapiro, speech and theatre arts, Friday. All of the talks will be open to the public.

(MORE)

To paraphrase an old Greek philosopher---"the Greeks had a word for it:" FUN---and Greek Week will have plenty of that, too, Bierbaum pointed out. Boot hockey teams from sororities and fraternities will work out in Williams Arena starting at 6 p.m. Tuesday (Jan. 10) with University hockey team members refereeing the matches.

The Greek Week 1967 King and Queen will be crowned at the Coronation Dance intermission Wednesday evening in Coffman Union main ballroom. Musicians for the dance will be selected from Greek members, and a Greek Chorus (what else?) will sing. Tickets may be purchased at the door.

Fun and games will include the traditional Mock Olympics, with a few "real" sports events thrown in for good measure, Bierbaum said. The events will take place in Cooke hall, the University Field House and in Coffman Union. Starting time at all of the sites will be 7:30 p.m. and all events will be free.

The annual Greek Week concert, always dedicated to improving the financial status of some social service project, this year will be presented by the We Five singing group. The concert will be given at 8:30 p.m. Saturday (Jan. 14) in Northrop auditorium. Tickets may be purchased at the door or from members of the sororities and fraternities on the University campus. Proceeds this year will go to establish a fund for Indian students.

The week's final event, the All-Greek banquet at which honors and awards for Greek Week competition will be presented, will be given at 5:30 p.m. Monday, Jan. 16, in Coffman Union main ballroom.

MUSEUM PROGRAM  
WILL EXPLAIN  
GREAT SALT LAKE

(FOR IMMEDIATE RELEASE)

Do you know why the Great Salt Lake of Utah is salt?

Take a look at the deposits in your teakettle for the answer, according to Robert C. Bright, curator of pleistocene paleontology in the University of Minnesota's Museum of Natural History.

How evaporation and lack of drainage explain these two phenomena will be shown and explained in Bright's lecture at 3 p.m. Sunday (Jan. 15) in the museum's Sunday program series. The lecture, "Geologic History of Great Salt Lake, Utah," will be given in the museum auditorium.

Bright's colored slides will show evidence of the ancient Lake Bonneville in the geologic basin---now the site of the Great Salt Lake---which has been proven, by its fossils, originally to have been a fresh-water lake. Evaporation, condensation and lack of drainage gradually dispersed the area's water, leaving the deposit of salts and minerals concentrated in the surface soil, Bright said.

With the return of substantial water deposits to the area, the salts and minerals again became liquid---Great Salt Lake.

The slides also picture the briny area as it is today, one of the largest salt-water areas in the world, Bright said.

The lectures, each Sunday afternoon during the University's fall, winter and spring quarters, are open free to the public.

DENTISTS TO GET  
NEW 'U' SHORT  
COURSE ON ARTS

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

The University's General Extension Division will score a "first" when it combines dentists and the arts this Friday (Jan. 13).

On request, a new type of program has been planned: a day's institute on "Perception in the Arts," designed specifically for dentists and their wives from all over the state. The institute will be held in Nolte Center for Continuing Education, on the Minneapolis campus.

Major speaker for the day will be Michael Church who, as assistant director of cultural activities in the University of Michigan Extension Division, has been called "Michigan's evangelist of art." Church has been the driving force behind the organization of more than 150 art clubs in communities all over Michigan, enrolling some 5,000 members, and makes more than 300 personal appearances during a year's work.

Church will speak all afternoon at the institute: on "The Newlyweds Purchase Their **F**irst Picture" at 1 p.m., and on "Living in a Fourth Dimension" at 1:30 p.m. The meeting will adjourn at 4:30 p.m.

Morning speakers will be Lauren Ekroth, University instructor in speech, communication and theatre arts, talking at 9:30 a.m. on "Art as Communication;" and Burton Dudding, a University pediatrician who has a great interest in baroque music, speaking at 10:50 a.m. on "The Contributions of the Baroque Period to Music."

The dentists and their wives will eat lunch in the Nolte Center dining room. The day's program is under the direction of Fred E. Berger, director of the Extension Division's department of conferences and institutes.

'U' STUDENTS PLAN  
PROGRAM ON BIRTH,  
CONCEPTION, ABORTION

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

"The A-B-C's of Sex---Abortion, Birth and Conception Control" will be presented in a three-day program at the University of Minnesota Monday through Wednesday (Jan. 16-18). All sessions will be held in Coffman Union main ballroom and will be open free to the public.

"This will be the first time that an entire program on this subject has been completely student-organized and sponsored at the University," according to Mary Horst, chairman of the Horizons Unlimited committee in the Coffman Union Board of Governors' social area. Miss Horst, 131 Sixth ave. S., South St. Paul, is a University junior in the College of Education.

"Discussion of the problem of sex and marriage is as compelling and fundamental to a student's growth as discussion of taxes or integration," Stanley J. Wenberg, University vice president, commented on the program.

Mrs. Pamela Veerhusen, executive director of Minneapolis Planned Parenthood, will speak on "Conception and Conception Control" and will show films on over-population problems and on birth control devices at the first session of the program at 11:15 a.m. Monday (Jan. 16).

At 3:30 p.m. Tuesday (Jan. 17) "Abortion and Abortion Laws" will be discussed by two Minneapolis gynecologists, Drs. Fred Lyon and James Bergquist.

David Torbett, University Family Studies Center instructor, will lecture on "Pregnancy and Birth" and show film of a human birth at the final session of the program at 3:30 p.m. Wednesday (Jan. 18).

CIC FAR EAST  
LANGUAGE PROGRAM  
GIVEN FORD GRANT

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---The Ford Foundation today announced a grant of \$230,000 to an organization of midwestern universities, of which the University of Minnesota is a member, to continue a summer instruction program in Far Eastern languages.

The grant, for a three-year continuation of the program, goes to the Committee on Institutional Cooperation (CIC), an association consisting of the Big Ten schools\* and the University of Chicago.

The program---the Far Eastern Language Institute---has operated for four years on an original Ford Foundation grant given in 1963. It consists of intensive instruction in Chinese, Japanese and linguistics, and rotates among the various Big Ten campuses. Host last summer (1966) was the University of Minnesota, with Associate Professor Edward M. Copeland, chairman of the University's department of East and South Asian languages, serving as institute director.

"The program so far has been very successful in accomplishing its purposes," Copeland said today. "Its goals were to attract more students of Japanese and Chinese by means of accelerated instruction, and to stimulate the CIC institutions to build up their departments."

The University of Michigan (Ann Arbor) has the best department of Far Eastern languages, Copeland said, but added that most of the other participating institutions have made great strides in the last four years, including Minnesota. Michigan was the first host of the CIC institute, in 1963; others have been Indiana University (Bloomington) in 1964 and Ohio State University (Columbus) in 1965.

(MORE)

Copeland said that the number of students enrolled in the 10-week institute reached its high mark at Minnesota last summer, with 183. Of these, almost half (91) were supported by scholarships or fellowships of some sort. Previous enrollments had been 108, 157 and 130, with far fewer fellowships awarded.

Also significant, said Copeland, was the number of Minnesota students who enrolled in last summer's institute: 55, compared with only 6 Minnesotans in the previous three institutes. This fits a pattern in which the host state always has far more students than any other state.

About two-thirds of last summer's 183 students came from CIC institutions and one-third from 34 other universities, including three in Canada. Nineteen courses were offered by a staff of 28 faculty members drawn almost exclusively from CIC institutions (except for four from other schools). Course work was expanded from previous institutes and included more graduate-level courses and linguistics classes, and new courses in Classical Chinese and Japanese, Copeland said.

One very interesting development took place in the advanced reading sections: students now can read materials in their particular fields of interest, rather than one standard selection of readings. For instance, Copeland said, an advanced student of Japanese who is a political science major can use a text made up of political science articles by various Japanese authorities. These have been prepared also in the fields of history, linguistics, language and literature, and sociology and social anthropology. They were developed by Michigan's Professor Joseph K. Yamagiwa who serves as chairman of the CIC Far Eastern Language committee and as program coordinator for every summer's institute "and is the person to whom we owe whatever success we have had in these institutes," Copeland stresses.

In the summary of his report to the CIC on last summer's institute, Copeland wrote that "the level of instruction and of student performance was uniformly high."

This summer's institute will be at the University of Michigan in Ann Arbor. Anyone who is interested in attending should contact Professor Copeland at 321 Folwell Hall, University of Minnesota.

-U N S-

\*(Big Ten universities are Illinois, Indiana, Iowa, Michigan, Michigan State, Minnesota, Northwestern, Ohio State, Purdue and Wisconsin.)

#### BACKGROUND INFORMATION

The University's department of East and South Asian languages was one of three departments created in a division of the old department of Slavic and Oriental languages (the other two being Middle Eastern languages and Slavic languages) in fall 1965, following a national trend toward separate departments in these increasingly important areas.

The faculty now numbers 13: 10 in East Asian languages and 3 in South Asian. The courses offered include 18 in Chinese, 12 in Japanese, 14 in South Asian languages, 3 in Oriental civilization, one in Tibetan and one in Thai (the language of Thailand). Other less common languages will be offered from time to time; for example, a class in Okinawan may be taught next year. The number of students currently majoring in an East or South Asian language is about 50, 20 of them graduate students.

3 'U' Researchers Find---

EARLY IRON RANGE IMMIGRANTS  
ADJUSTED QUICKLY, STRESSED EDUCATION

(FOR IMMEDIATE RELEASE)

Immigrants to the Northern Minnesota iron mining towns made "an astonishingly rapid adjustment" to the challenges and opportunities of American life, three University of Minnesota history professors found in a recent study of the region. And, they concluded, the generous investment of funds in public schools during the early years of settlement there were chiefly responsible for this outcome.

In an article published recently in "The American Historical Review," Professor Timothy L. Smith summarized the results of the study which he, Professor Clarke A. Chambers and Associate Professor Hyman Berman have recently completed. Originally inspired by President O. Meredith Wilson's recognition of the high level of educational achievement and of educational interest among Minnesota legislators and public officials from the Iron Range, their study was financed in part by Ford Foundation, in part by University of Minnesota funds.

Professor Smith's article, entitled "New Approaches to the History of Immigration in Twentieth-Century America," stresses the role of the public schools of the region in introducing children of many nationalities to a common English culture. At the same time, "remarkable well planned" measures helped to prevent "a conflict between generations." Not only the students but their immigrant parents as well developed an enthusiasm for high school and for college education which has marked the history of the Iron Range towns ever since.

(MORE)

The researchers discovered that the drive for education was not a special trait of one or another ethnic group. Families of all nationalities displayed great enthusiasm, chiefly because the opportunities the schools gave their children seemed real to them. Over 97 per cent of the youngsters of Ely, for example, were enrolled in public schools in 1910, a percentage far above national averages, and higher than any other city or town in Minnesota.

Widespread community support of the generous use of tax funds for education was evident everywhere. Mining company executives cooperated closely with school officials and the leaders of various nationalities in promoting the building of the finest school systems in the state.

Professor Smith's article indicates that the research of the three scholars ranged widely over the history of the Range towns, in the effort to comprehend the remarkable success of the first and second generations of young people there. Integrated patterns of settlement, they found, created a civic pride stronger than ethnic differences. And generally high wages were combined with excellent medical care and community welfare programs to sustain a high degree of community solidarity despite two early periods of widespread labor strife.

The scholars stressed the Americanizing role of Roman Catholic congregations, and especially of Slovene priests such as Fathers Joseph Buh of Ely and Joseph Schiffrer of Chisholm. Since these congregations usually served people of many nationalities, they seem to have functioned better as ethnic melting pots than did many of the Protestant groups which frequently served only one nationality. They also concluded that immigrant business men played an important part in leading persons of their nationality to accept American values, particularly the American commitment to free enterprise and to the idea of rapid personal advancement.

At every level of social life, they concluded, the experience of the people who settled in the Minnesota iron mining towns was one of continually facing new problems and learning new lessons. Mining captains from Cornwall, no less than single girls who came from Finland in search of a husband, contributed to the dynamic quality of Range society, to an atmosphere which put learning first.

Residents of the Range may take pride in the fact that Professors Smith, Chambers and Berman think the history of their communities may offer new insights into the general history of the Americanization of immigrants who settled in large American cities. They believe that historians have tended to concentrate too much upon individuals of each nationality who preserved their close identification with ethnic organizations. Larger numbers, they suggest, may have sought very early to identify themselves with American culture. Their history, when better known, may reveal that broadly democratic aspirations brought settlers from Eastern Europe in large numbers to the New World.

Professor Smith has recently begun work upon an even more extensive research project designed to test these conclusions. Supported in part by funds from the Ford Foundation, but principally by a grant from the United States Office of Education, Professor Smith and five graduate research associates will study comparatively the relationship between emigration, education, and social change among peoples who migrated from certain rural regions of the old Austro-Hungarian empire to cities in the Old World and the New between the years 1880 and 1920.

The purpose of the new project will be to understand more clearly the process by which old traditions and new aspirations merged, causing peasants from isolated villages of what is now Eastern Slovakia, Northern Hungary, and the Dalmatian coast of Yugoslavia, to embrace education for their children as the avenue to personal success.

BIOLOGICAL SCIENCES  
SUBJECT OF SPECIAL PROGRAM  
AND OPEN HOUSE

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---Some 120 students and faculty members from state colleges throughout Minnesota will be special guests of the University of Minnesota's College of Biological Sciences this Saturday (Jan. 14), with an open house for the public planned on Friday (Jan. 13).

The two days of tours and talks are aimed at introducing the University's newest college to persons interested in the biological sciences.

The College of Biological Sciences was established in 1964 when faculty members and curricula on the Minneapolis and St. Paul campuses in certain areas of basic biology were drawn together into one administrative unit. The staff of the college is made up of faculty members in the botany, zoology and biochemistry departments, and certain faculty members in genetics and biophysics.

Invited guests from the state colleges will tour the research facilities of the college on the St. Paul campus on Saturday, starting at 10 a.m. Special tours of the Gortner Laboratory of Biochemistry, new home for the college's department of biochemistry, will be given. Construction of the Gortner Laboratory was completed last October.

Richard S. Caldecott, dean of the College of Biological Sciences, will speak to the luncheon guests in the Northstar ballroom at noon on "The Organization of the College of Biological Sciences and Its Role at the University of Minnesota."

The afternoon program (1:45 to 3:15 p.m.) will feature four speakers who will talk on the opportunities for graduate study in biology and biochemistry in the new college. The speakers and subjects will be: Robert Jenness, professor of biochemistry, "Prerequisites for Graduate Study;" Norman S. Kerr, associate professor of zoology and assistant dean of the college, "The Graduate Program;" Stanley Dagley, professor of biochemistry, "Graduate Research and the Thesis;" and I. E. Liener, professor of biochemistry, "Stipends and Career Opportunities."

The Gortner Laboratory also will be open to the public for tours from 3 p.m. to 5 p.m. on Friday. University faculty members and students are encouraged to tour the facilities at this time.

NOTED PHARMACEUTICAL  
EXPERT TO SPEAK AT 'U'

For further information, contact:  
GERALD KNOX

William I. Higuchi, professor of pharmaceutical chemistry and dentistry at the University of Michigan, will speak at the University of Minnesota Monday (Jan. 16) on "Diffusional Models Useful in Pharmaceutical and Biological Systems." His lecture will be at 3:15 p.m. in Room 150 Appleby hall on the Minneapolis campus.

Higuchi's lecture is sponsored by the University's College of Pharmacy and is the sixth in a series by visiting lecturers.

Higuchi is a former research chemist, having worked for the California Research Corporation in the area of surface physical chemistry and kinetics of nucleation, and the Upjohn Pharmaceutical Company on the physical pharmaceutical chemistry of drug availability and transport phenomenon. He also has taught at the University of Wisconsin.

LUNDEN PRESENTS  
1966 UNIVERSITY  
FINANCIAL REPORT

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---Operating costs of the University of Minnesota for the fiscal year ending June 30, 1966, totaled \$142,557,907.62 for all campuses and stations, according to a summary of financial operations released today by L. R. Lunden, business vice president. Of this total, the State of Minnesota provided 35 per cent.

In addition to its operating expenses, the University paid out \$13,814,966.73 for the construction and remodeling of buildings and the purchase of land. In the 12-month period, to meet construction costs, the sum of \$8,217,822 was withdrawn from funds appropriated by the State Legislature for that purpose.

Largest operating outlay, Lunden reported, was the \$39,138,699.98 spent for the instruction of students at collegiate level and for departmental research on all campuses. An additional \$18,628,076.42 was expended for organized activities relating to instructional departments such as University Hospitals and libraries. Budgeted and sponsored research expenditures amounted to \$31,722,377.80. The cost of extension and public service activities such as the General Extension Division, the Cooperative Agricultural Extension Service and the Minnesota Museum of Natural History totaled \$12,236,326.45.

The University's overall operating costs were \$142,557,907.62 while transfers, increases in obligations and other adjustments added \$8,181,037.96 for a total of \$150,738,945.58, Vice President Lunden pointed out. Of this total, the State of Minnesota provided \$49,335,880.70. State support funds consisted of the Legislative maintenance appropriation of \$38,770,027, a special appropriation of

(MORE)

\$4,392,302.70 (\$2,177,889.84 of which was charged to the counties) for the care of indigent patients at University Hospitals, and a Legislative allotment of \$6,173,551 for special projects carried on by the University for the general benefit of Minnesota's citizens.

These "special projects" include agricultural extension work and research, business and economic research, medical research, operation of the Minnesota Rehabilitation Center, the Child Psychiatric Hospital, the Multiple Sclerosis Clinic, the Institute of Child Development, the schools of agriculture student aid fund, and several others.

Sources of the University's operating income other than the State, the report indicates, are: appropriations from the Federal government, \$3,684,638.62; student tuition and fees, \$15,647,291.27; self-supporting auxiliary enterprises, \$21,659,432.05; trust funds, \$38,715,201.90, of which \$30,777,551.80 represents federal contracts and grants; and intercollegiate athletics, \$1,673,200.41.

Income from intercollegiate athletics included \$1,562,312.03 from the Minneapolis campus, \$92,857.16 from the Duluth campus, and \$18,031.22 from the Morris campus. Expenditures for the operation of intercollegiate athletics and that part of physical education expenses paid from athletic receipts totaled \$1,650,818.10 for the fiscal year 1965-66. Involved was an outlay of \$1,542,348.33 in Minneapolis, \$91,473.77 in Duluth, and \$16,996 in Morris.

Other highlights of the report released by Vice President Lunden are as follows:

Overall total current fund receipts of the University for the fiscal year amounted to \$150,738,945.58. The free unencumbered balance as of June 30 was \$3,214.42.

Expenditures for building and remodeling and land purchases, totaling \$13,814,966.73, were distributed as follows: Minneapolis campus, \$9,161,604.91; St. Paul campus, \$2,583,970.97; Duluth campus, \$695,232.34; Morris campus and station, \$948,113.37; outlying schools and stations and off-campus plant, \$426,045.14.

At the close of the fiscal year, the University total endowment fund, including the Permanent University Fund, which amounted to \$47,676,794.32, totaled \$74,850,108.08.

University-owned land as of June 30, 1966, consisted of 17,617.16 acres which cost \$13,677,390, while the University's 885 buildings had an estimated value of \$154,541,605.55, representing original cost. University equipment was valued at \$70,096,190 and included \$399,867.09 in livestock and \$14,726,513.13 in books and museum collections.

IMPROVED INTER-COLLEGE  
COMMUNICATIONS URGED  
IN TV STUDY REPORT

For further information, contact:  
NANCY PIRSIG

(FOR RELEASE AT 11 A.M. FRIDAY, JAN. 13)

The University of Minnesota Board of Regents today heard a summary of the final report of the Minnesota Inter-Institutional Television Study.

Authorized by the 1965 Minnesota State Legislature and conducted under the auspices of the University, the study was undertaken to determine how television might be used among all colleges and universities in the state to more effectively support their instructional programs.

The report of the study was accepted by the Board of Regents for transmittal to the State Legislature. The study's recommendations call for an expenditure of \$2,712,134 during the next biennium.

Paul H. Cashman, director of the study, and Edward McMahon, associate director, reported that a Statewide Advisory Committee has approved the study's recommendations, which are intended to provide a basis for improved inter-institutional communication among Minnesota's colleges. (The Advisory Committee was composed of representatives of the state colleges, state junior colleges, University of Minnesota, private colleges, American Association of University Professors, State Department of Education, Minnesota Liaison and Facilities Commission, and the board of the Twin City Area Television Corp.)

Data developed by the study suggested that collegiate-level institutions in Minnesota are showing increasing interest in working with each other in the cooperative development of instructional programs and relationships. However, very few of the institutions have faculties experienced in using television for instruction, or the necessary production facilities. The study's recommendations urge the development of the experience and communications facilities necessary for inter-institutional planning and development of instructional materials.

(MORE)

Recommendations include plans for television production centers at each of the state college campuses and at each of the University's campuses. Junior colleges and private colleges also would have access to these production centers.

It is also recommended that all state junior colleges, state colleges and the University campuses be connected by a WATS (Wide-Area Telephone Service) line to enable faculty and administrators to work more closely together, that money be made available to colleges that wish to work together in developing curricular materials, and that a model interconnection be established between the University's Twin Cities campus, its Morris campus and Southwest State College at Marshall. A similar interconnection would be developed between Mankato and Southwest State College.

The report also recommends that the development of inter-institutional television for higher education be managed through the Minnesota Liaison and Facilities Commission, and that careful attention be given the protection of faculty rights in the development and revision of televised instructional materials.

The study recommendations are seen by the Advisory Committee as a partial answer to the increasing problems of offering education to large numbers of students. Use of electronic communication on an inter-institutional basis is also seen as a means of aiding institutions in providing students with improved access to library resources and sophisticated computers.

Cashman, who is an assistant vice president at the University, indicated that he believed the State of Minnesota "is on the eve of a new pattern of inter-institutional relationships among its educational institutions which will benefit students in all of higher education. The study reflects those developments and suggests the first steps to bring about significant inter-institutional educational communications."

McMahon, director of Audio-Visual Service at Mankato State College who has been on leave to work on the study, added that "Minnesota has an opportunity to support this growing interest among colleges to share valuable educational resources. The study recommendations, by adding significantly to the educational communication capacity of the state, can create a framework for these developments."

Both believe it is particularly important that the interests that faculties and administrations have in maintaining the quality of their instructional programs be recognized in planning for inter-institutional television.

In the course of the study, it was learned that many states are moving to develop comprehensive systems which provide educational institutions, as well as other state agencies, with a broad range of communication systems including television, but also including telephone or audio communications, transmission of computer data, and the sharing of special types of printed and library resources.

TERRELL TO SUCCEED  
MCDONALD AS HEAD  
OF HONORS DIVISION

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---The University of Minnesota Board of Regents today named D. Burnham Terrell, philosophy professor, as director of the College of Liberal Arts (CLA) Honors Division, beginning next fall. He will serve a three-year term.

Terrell will succeed Classics Professor William A. McDonald, completing his third year as chairman, who will spend the next academic year on a sabbatical leave as field director of the University's Messenia Expedition in Greece.

Terrell, who has long been interested in the honors program for outstanding students, currently is vice chairman of the Faculty Honors Council, the governing body of the CLA Honors Division. As vice chairman he heads the policy committee, one of the council's two standing committees.

Commenting on the appointment, CLA Dean E. W. Ziebarth said, "We believe the Honors Division to be one of the significant recent developments in the college, and are pleased to have a man of Professor Terrell's distinction to provide continuing leadership. Professor McDonald has done so much to develop the program that we need a man who will continue to provide guidance and wisdom; we believe that Dr. Terrell will do so."

The Honors Division is set up on a parallel with the other branches of CLA's Upper Division (which consists of juniors and seniors). The Honors Division office in 115 Johnston hall contains the records of around 600 upperclassmen. Students are admitted to the Honors Division partly on their grade-point average (GPA) but also on the recommendation of an honors representative in the department they're majoring in, plus the approval of the honors director. (The honors representatives in each department and each interdisciplinary program make up the Faculty Honors Council.)

Although the program's main emphasis currently is on Upper Division students and offerings, it also provides non-credit seminars for high-ability freshmen and eventually will expand into a complete, four-year program.

(MORE)

"What the honors program is trying to do," explains McDonald, "is to combine some of the atmosphere and advantages of a small college with the tremendously rich resources of a large university and a great metropolitan area."

Terrell adds that "we are doing this without creating a separate, isolated honors college. While we think it would be a mistake to isolate these students from the rest of the campus, it also is a mistake to isolate them from one another--- which is what is likely to occur when you have no special program. We ought to provide opportunities for these students to encounter each other, to interact and create advantages for themselves as a group that they could never get one by one; in fact, their encounters with each other are probably as beneficial as their encounters with the faculty."

The Honors Division provides counseling and curriculum planning for its students, but it also does much more. It works with departments in developing certain courses designated as honors courses (marked with an H in the CLA Bulletin), which means that the course is designed for students of high ability, its instructor is interested in challenging students to excel, and assignments are tougher. It also means the section or class is likely to be smaller than others.

The Honors Division also arranges several seminars for credit, exclusively for honors upperclassmen. These consist of selected studies in a particular field, such as anthropology, planned for students who are not majoring in that field. (In connection with these seminars, the Honors Student Council has come up with the idea of awarding no grades, but instead giving a student either a P meaning Pass or an N for No-credit. The idea has gathered favor and has been approved by the University's Council on Liberal Education.)

"Our concern for the student goes beyond the setting up of honors courses, however," says Terrell, "and extends through the entire range of the student's life in the University."

Terrell, who joined the University faculty in 1949, earned his B.A. at Swarthmore College where he went through an honors program. He holds a Ph.D. from the University of Michigan. He served as chairman of the University philosophy department from 1961 to 1964, and is well known for his chess playing---he held the state chess championship in 1961.

ART LINKLETTER WILL  
TALK TO STUDENTS AT 'U'

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Art Linkletter, radio and television personality and author, will address University of Minnesota students and the general public at the University Thursday, Feb. 2.

He will speak at 3:15 p.m. in Northrop auditorium under the sponsorship of the Minnesota Student Association. A question and answer session and an informal reception on the Northrop stage will follow his talk.

On Friday, Feb. 3, Linkletter will speak to a joint meeting of students from the Colleges of St. Catherine and St. Thomas at 3 p.m. in the College of St. Catherine auditorium, St. Paul.

Linkletter, a leading broadcasting personality for 20 years and best-selling author of "Kids Say the Darndest Things," will appear in the Twin Cities under the auspices of the RC University Series. This series, in which he makes four appearances a year in colleges and universities throughout the country, is titled "Art Linkletter and the American Student: A Dialogue."

Now in its second year, the RC University Series is a public affairs program for the Royal Crown Cola Co. The series has taken Linkletter, a member of the board of directors of the organization, to 14 colleges and universities in the U.S., including the University of California, Berkeley, Loyola University, Chicago, Tuskegee Institute in Alabama and Southern Methodist University, Dallas.

(MORE)

In his formal college talks, Linkletter discusses a diversity of topics and troubles that concern today's students: the Vietnam war, student dissent and demonstrations, morals and morality, the trend of the American economic system and political trends.

However, it is in the question and answer sessions following the formal talks that provide the material for the dialogue that has become his trade mark.

"I learned very quickly that young people should be given a chance to speak," he said following a recent series. "You may not agree with all of their ideas, but the fact that they do have strong opinions means that they are thinking very strongly about life."

Linkletter's radio and television career has made him familiar to millions of television viewers and radio listeners. His programs, "People Are Funny," the "Art Linkletter House Party" and his newest, "Hollywood Talent Scouts," have rated consistently as tops in daytime radio and TV programs for more than 20 years.

He also is the author of another best-selling book, "People Are Funny." In addition, he has an active business career, serving as an official of more than 20 companies and corporations, including his post with Royal Crown Cola Co.

The son of a minister, Linkletter and his wife, Lois, have five children and five grandchildren. He was named "Grandfather of the Year" in 1962.

-U N S-

Note to editors: A news conference for Mr. Linkletter will be held at 9 a.m., Thursday, Feb. 2, at the Sheraton-Ritz hotel, Minneapolis.

3 EDUCATIONAL TV  
STATIONS TO CARRY  
'GOING TO COLLEGE' SERIES

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---"Going to College," an educational series of 13 programs for all Minnesota college-bound high school and junior high students and their parents, will be broadcast by three Minnesota educational television stations Jan. 23 through April 17.

The programs will be presented on Monday evenings at 9 p.m. starting on Monday, Jan. 23. They will be broadcast by KTCA-TV, Channel 2, St. Paul; WDSE-TV, Channel 8, Duluth, and KWCM-TV, Channel 10, Appleton.

The series, an educational presentation of the University of Minnesota's General Extension Division, will have Leonard D. Bart, assistant professor of speech, communication and theatre arts, as moderator.

Discussing each week's topic will be a faculty of experts from the various educational fields concerned---student counseling, admissions, student activities, loans and scholarships---as well as academic and administrative officers from Minnesota colleges and universities.

Opening program in the series, "After High School, What?" will present Edwin E. Stuart, coordinator of pupil-personnel services, Roseville public schools, and Professor Ralph F. Berdie, director of student life studies at the University of Minnesota.

The Jan. 30 program on "Admission to College" will have Richard E. White, assistant executive director of the State Junior College Board, and Theodore E. Kellogg, University admissions director, as speakers.

Other programs in the series are:

Feb. 6- "The College Atmosphere"	March 27- "The Honors Program"
Feb. 13- "Freshman Orientation"	April 3- "Planning College Finances"
Feb. 20- "Effective Study Habits"	April 10- "Planning Your
Feb. 27- "The College Parent"	College Program"
March 6- "Extra-Curricular Activities"	April 17- "After College, What?"
March 13- "Liberal Education"	
March 20- "The General College"

DORIS FENICK

(FOR IMMEDIATE RELEASE)

"Cedar Creek Wildlife"---or The Private Life of Br'rer Fox in the Wilderness---is the title for Sunday's (Jan. 22) Minnesota Museum of Natural History program, according to Alan Sargeant, museum biologist, who will talk about the museum's radio telemetry studies and what it is revealing about habits of the wildlife in this area.

The talk, illustrated with color slides, will be given at 3 p.m. in the museum's auditorium, and will be open free to the public.

"While we currently are working with the radio-mounted collars on some 35 varieties of wild life and birds," Sargaent said, "I will be speaking principally on our experiences with the red foxes, as we have worked with them for about five years, and our records are more complete with them than with most of the other animals."

White-tailed deer, raccoons, snow-shoe hares and owls currently are wearing the radio-transmitter collars, he added. As the animals and birds are completely free and unconfined, they cover their natural range, perform their natural functions, and unknowingly furnish complete records of their movements, daily habits, reactions to weather conditions and feeding patterns.

The battery-operated radios suspended from their collars are usually good for at least six months, Sargeant said, and often are returned to the Cedar Creek offices by hunters and nature lovers who have found them either lost in the undergrowth or on dead animals.

BRITISH LAWMAKER  
TO TALK AT 'U'

(FOR IMMEDIATE RELEASE)

"Changing Britain" will be discussed by Ivor Richard, member of parliament, in a special lecture Friday (Jan. 20) at the University of Minnesota.

The talk at 2:15 p.m. in 170 Business Administration building, on the University's West Bank area of the Minneapolis campus, will be sponsored by the department of political science and the department of concerts and lectures. It will be open free to the public.

Richard is a barrister-at-law and has been a Labour member of parliament for the London constituency of Baron's Court since 1964. He recently was appointed parliamentary private secretary to the secretary of state for defence.

A member of the British-American and the Franco-British parliamentary groups, Richard has a keen interest in Atlantic and European affairs. In 1966 he was appointed as a delegate to both the consultative assembly of the council of Europe and the assembly of the Western European Union. He is chairman of the legal committee of the former, and a member of the latter's defense committee.

He visited the United States for the first time in 1965 on a lecture tour and returned in 1966 on a U.S. Department of State foreign-leader grant.

He is a member of several organizations including the Fabian Society and the Society of Labour Lawyers.

U OF M WINTER  
ENROLLMENT SETS  
RECORD: 40,701

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---University of Minnesota enrollment for the winter quarter 1967 is larger than last winter's and shows the normal decrease from fall quarter, W. Donald Beatty, University recorder, announced.

Currently registered at the University are 40,701 fulltime students. This is a record for the winter term, exceeding last winter's enrollment by 1,067, an increase of 2.7 per cent.

The largest individual gain occurred in the College of Liberal Arts which now numbers 13,674, an increase of 6.3 per cent over last winter's 12,873.

Each of the major units of the University shows an increase over the registration for the winter term a year ago:

	<u>1967</u>	<u>1966</u>
Twin Cities campus	35,154	34,547
Duluth campus	4,344	4,135
Morris campus	1,010	952

The University Technical Institute at Crookston, which began a new two-year program in the fall quarter of 1966, has a larger enrollment now than then. Currently there are 193 students at that campus compared with 185 in September 1966.

The new students in the various colleges and divisions total 1,250, slightly fewer than the 1,290 who entered the University a year ago.

Men continue to outnumber the women on the various campuses at the usual ratio of about two to one. For the present winter term, the figures are 26,460 men and 14,241 women.

In addition to the fulltime students, there are 17,295 registered in General Extension Division evening classes and another 7,241 currently taking correspondence courses. These combined with other non-regular enrollments number 25,966.

(MORE)

## ENROLLMENT

-2-

Enrollment in the various colleges and divisions of the University for winter quarter 1967 is as follows:

COLLEGE	TOTAL	COLLEGE	TOTAL
General College	3381	School of Nursing	355
University College	47	Public Health	164
Liberal Arts	13674	School of Dentistry	388
Institute of Technology	3034	Dental Hygiene	75
Agriculture, Forestry and Home Economics	2320	College of Pharmacy	227
Law School	537	Education	2503
Medical School*	557	Business Administration	773
Medical Technology	118	Graduate School	6670
Occupational Therapy	43	Veterinary Medicine	214
Physical Therapy	55	Biological Sciences	19

\* In addition to the figures above, there are also 46 regularly enrolled medical students having a scheduled quarter of vacation. A year ago, there were 31.

ROGERS CHAIRS  
SEMINAR PANEL

Professor William C. Rogers, director of the University of Minnesota World Affairs Center, was chairman of a panel at a recent seminar for opinion leaders in the midwest on current issues confronting the United States in the United Nations. The conference, held at Wingspread in Racine, Wis., was attended by 75 businessmen, educators, professional people and representatives of other groups. It was sponsored by the Johnson Foundation, in cooperation with the Midwest University Committee of which Rogers is a member.

BRASFIELD NAMED  
ASSISTANT DIRECTOR  
OF 'U' HOSPITALS

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---McCollum E. Brasfield has been named assistant director of University of Minnesota Hospitals. Brasfield, 27, has been assistant to the director of University hospitals since joining the University staff in 1965.

He has worked principally in the areas of outpatient care, including several special projects for development in that area.

In his new post Brasfield will assume duties as assistant executive secretary of the University's Long Range Planning Committee for the Health Sciences. The committee has developed plans for a \$52-million, 10-year expansion program for the medical center and its college units. The University has gone before this session of the state legislature to request planning and land acquisition funds to begin the program.

Brasfield is a native of Missouri and graduated from Park College, Parkville, Mo., with a bachelor of arts degree in economics in 1963. He received a master of hospital administration degree in 1965 from the University of Minnesota.

He worked as a volunteer for the American Friends Committee, a service organization for the Society of Friends, in Tanzania, East Africa, from 1961 to 1963. As a community development worker, he coordinated government development projects in such areas as public roads, health, and education.

Brasfield and his wife, the former Susan Kirchen of St. Paul, live at 863 Weeks ave. SE., Minneapolis.

DADS TO HEAR TALK  
ON COLLEGE MORALITY

(FOR IMMEDIATE RELEASE)

"Morality and the College Student" will be discussed at the January meeting of the University of Minnesota Dads' Association Wednesday (Jan. 25) in Coffman Union junior ballroom.

Tickets at \$2 for the buffet dinner at 6 p.m. may be obtained through the Dads' Association office, 320-C Eddy hall on the Minneapolis campus. Reservations will close Monday (Jan. 23).

The Reverend Clyde Steckel, United Campus Christian Fellowship, and sociology professor Arthur L. Johnson will lead the discussion at 7:30 p.m. following the dinner.

CHURCHMEN, EDUCATORS  
TO DISCUSS RELIGION IN  
SCHOOLS AT 'U' CONFERENCE

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

A New York rabbi will present one of the major addresses at a University of Minnesota institute on "The Role of Religion in Public Education." The conference will be held in Mayo auditorium on the Minneapolis campus Thursday and Friday (Jan. 26-27).

The rabbi is Arthur Gilbert, director of curriculum in the Anti-Defamation League of B'nai B'rith, New York City. He will speak at 10:45 a.m. Thursday (Jan. 26) giving "A Critical Evaluation of Materials Used or Being Developed to Teach About the Bible and Religion, Being Used in Public Education in the United States."

Attending the institute will be persons from various parts of the country as well as Minnesotans who are concerned with the issue. Registration will remain open until the institute begins on Thursday morning (Jan. 26). University Vice President Stanley J. Wenberg will welcome the participants, along with Henry E. Allen, coordinator of student religious activities on the University campus.

Leading off the institute at 9:30 a.m. Thursday (Jan. 26) will be Professor William B. Lockhart, dean of the University of Minnesota Law School, talking on "Constitutional Limitations on Teaching Religion in the Public Schools." He will consider the constitutional problems that might arise in developing a public-school curriculum for instruction about religion, taking into account both the federal constitution and Minnesota's, as well as the significance of the Supreme Court decisions on religion in schools.

Following Dean Lockhart and Rabbi Gilbert, a reactor panel will discuss both their talks, will ask questions of the speakers, and will invite questions from the audience.

(MORE)

A luncheon will be served at 12:15 p.m. Thursday (Jan. 26) in Coffman Union junior ballroom.

At 1:30 p.m. Richard B. Dierenfield, associate professor of education at Macalester College, St. Paul, will present results from a just-completed survey which asked what religious activities are presently being used in Minnesota public schools. The title of the talk is "Religious Influence in Minnesota Schools."

At 3 p.m. Thursday (Jan. 26) J. Blaine Fister, staff associate for church and public education in the National Council of the Church of Christ in the U.S.A., New York City, will talk on "Neutrality and Its Limits for Public Schools." These two speakers also will be followed by a reactor panel representing diverse points of view.

Friday morning's program will consist of three speakers. Harold Bernhard of the department of religion at State College of Iowa, Cedar Falls, will lead off at 9 a.m. on "The Role of Religion in Teacher Preparation and Curriculum Development." At 10 a.m. Duane Mattheis, Minnesota state commissioner of education, will discuss "Where Do We Go From Here?" At 11 a.m. Gordon Mork, education professor at the University of Minnesota, will sum up the institute's presentations. The conference will adjourn at 11:30 a.m. Friday (Jan. 27).

The institute is being sponsored by the General Extension Division's department of conferences and institutes, the Law School, the College of Education, and the office of Coordinator of Students' Religious Activities, all of the University, with active cooperation from various church groups.

COLOR SLIDES  
ON 'NATURE'  
TO BE SHOWN

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Some 200 color slides entered in the nature division of the International Color Photo Salon's annual competition will be featured in the Sunday program presented by the Minnesota Museum of Natural History at 3 p.m. Sunday (Jan. 29) in the museum auditorium on the University of Minnesota Minneapolis campus.

The 35mm. slides that have been selected for this showing are among the top entrants of the 1,700 entered, according to Professor W. J. Breckenridge, museum director.

"They all are in gorgeous color," Breckenridge pointed out, "and, being in the nature division, will have no people or readily recognizable buildings visible." A commentator will identify the slides by title and photographer.

On Sunday, Feb. 5, Professor Breckenridge will present a program on "Island Treasure"---a color film of many facets of the natural history of the Mississippi River between Anoka and Minneapolis (including many shots of his own backyard).

All of the museum's Sunday programs are open free to the public.

SMITH NAMED  
ASSOCIATE DIRECTOR  
OF 'U' HOSPITALS

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---C. Thomas Smith, administrative associate at Baptist Memorial Hospital in Memphis, Tennessee, has been named associate director of University of Minnesota Hospitals.

Smith, 28, who will start his new position Feb. 1, will be responsible to the director of University Hospitals in several areas relating to hospital administration. University of Minnesota hospitals, one of the largest teaching hospitals in the Upper Midwest, is an 824-bed complex with more than 2,000 employees and a daily patient census of nearly 1,300.

Smith has been at Baptist Memorial Hospital since 1961, and has been administrative associate there since 1963. He now holds responsibilities in the areas of personnel, payroll, public relations, medical records and admissions. Baptist Memorial Hospital is one of the largest private hospitals in the Southeast and is one of the two prime teaching hospitals for the University of Tennessee's College of Medicine.

Smith was the personnel director of Arkansas Baptist Hospital in 1960, after being an administrative extern there in 1958.

He received a bachelor of arts degree (in psychology) in 1960 from Baylor University and a master of business administration degree (in hospital administration) in 1962 from the University of Chicago. He is a member of the American Hospital Association and the American College of Hospital Administrators, and is the immediate past president of the Memphis Hospital Council.

Smith, a native of Little Rock, Ark., is married and the father of one child.

ASSOCIATE DEAN GAULT  
OF 'U' MEDICAL SCHOOL  
JOINS HAWAII FACULTY

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---Dr. N. L. Gault, Jr., associate professor of medicine and associate dean of the University of Minnesota's College of Medical Sciences, was recently named professor of medicine and associate dean for the international program in the University of Hawaii Medical School.

Dr. Gault will leave the University of Minnesota June 30, 1967.

"Dr. Gault has had a distinguished career in teaching and working in international medical education programs," said Thomas H. Hamilton, president of the University of Hawaii. "The University of Hawaii is extremely fortunate to have him on its faculty. I know his experience will be invaluable in launching our medical program in Okinawa."

Dr. Gault's first assignment will be to direct Hawaii's new medical program in Okinawa. He will be stationed at the Central Hospital in Gushikawa.

"This program will start with the training of interns in the Central Hospital of Okinawa and the development of clinical teaching in general," said Dr. Windsor C. Cutting, dean of Hawaii's medical school. "Assistance also will be provided the University of Ryukyus in Okinawa in planning for a school of medicine."

(MORE)

Dr. Gault, 46, received his bachelor of science degree from the University of Texas in 1942. He earned his doctor of medicine degree at the University of Minnesota in 1951 and has been on the faculty since 1953. He was named assistant dean of the college in 1955 and associate dean in 1964. His work has included assignments to the three major hospitals affiliated with the University of Minnesota: Hennepin County General, Veterans Administration, and St. Paul-Ramsey.

His experience in international medicine includes work as an adviser to the College of Medicine at Seoul National University in Korea, and consultant with the Agency for International Development. He has served as a consultant for the China Medical Board in Japan, Korea, Hong Kong and the Philippines. He has also worked in medical education in Vietnam.

Dr. Sarah Jane Dickie Gault, wife of Dr. Gault and clinical instructor of physical medicine and rehabilitation at the University of Minnesota, also will be joining the University of Hawaii as chief adviser in physical medicine and rehabilitation at the Central Hospital in Okinawa.

Mrs. Gault graduated from the University of Texas in 1942 and earned her doctor of medicine degree at the University of Minnesota in 1951. She has been on the faculty since 1952.

The Gaults live at 1595 Vincent st., St. Paul, and are the parents of three children.

ROOM RATES  
AT 'U' HOSPITALS  
RAISED \$6

(FOR IMMEDIATE RELEASE)

Minneapolis---Hospital room rates at University of Minnesota Hospitals were increased \$6 a day effective last Wednesday (Jan. 18), it was announced today by Merle McGrath, fiscal services manager at University Hospitals.

The new room rates are necessary to meet rapidly increasing personnel costs in all areas of the hospitals.

The new rates are:

Multiple-bed room .....	\$34.50
Double room .....	\$36.50
Single room .....	\$38.00-42.00

The last increase in room rates at University Hospitals was on July 1, 1966, when they rose \$3 a day.

STUDENTS IN 'U' RESIDENCE HALLS  
SCHEDULE FIRST 'DORM WEEK'

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Some 4,000 students at the University of Minnesota---occupants of the University's 10 residence halls on the Minneapolis and St. Paul campuses---will construct a snow fort on the Mall, present a variety show of the talents of their groups, and conduct a symposium on "The New Morality" during their first observance of what they plan to establish as an annual part of University life, "Dorm Week."

The special week, Sunday, Jan. 29, through Sunday, Feb. 5, is being set up "to promote identification with residence-hall living on the part of 'dorm' students," said Bob Viking, College of Liberal Arts senior from Annandale and administrative vice president of the University's Board of Resident Halls (BRH---the student-administrative group serving as coordinator, representative and spokesman of the University residence system).

"BRH believes that the residence halls serve a significant educational function and the various educational activities of Dorm Week are meant to dramatically illustrate the cultural, social and educational activities available to those who live on the campus," he continued.

Dorm Week, 1967, will kick-off at 7:20 p.m. Sunday (Jan. 29) when student-loaded buses leave the Minneapolis campus for a bonfire and sing-along on the St. Paul campus athletic field. Hot cider and a "pop" music program in Bailey hall's upper lounge will thaw the Minneapolis students out before they leave at 9 p.m. to return to their residence halls.

(MORE)

The "Swiss Holiday" theme of Dorm Week will be carried out in the snow-sculpture competition that starts Monday (Jan. 30), Viking said. Each hall will enter the competition, using areas around the halls for the displays. Other snow-involved activities on Monday will include construction of a snow fort on the Minneapolis-campus Mall, and a Snow Bowl football game (men vs. women) and a people-type dog race in the Snow Olympics on the St. Paul Mall.

Each of the residence halls---Centennial, Comstock, Frontier, Pioneer, Powell, Sanford and Territorial on the Minneapolis campus, and Bailey, Brewster and Meredith at St. Paul---will take part in the Dorm Week Variety Show at 8:30 p.m. Tuesday (Jan. 31) in Comstock. The program will be free.

Films on such social service programs as the work of the American Red Cross and the VISTA program will highlight Wednesday's (Feb. 1) Dorm Week program. They will be shown in the various halls at times convenient for the residents and will be followed by interested speakers.

"The New Morality" will be discussed in an 8 p.m. symposium Thursday, Feb. 2, in Mayo auditorium. In addition to the student-led discussion, a group of students also will present "The Catcher," a take-off on the Salinger novel, "The Catcher in the Rye." Wayne Nelson, 461 E. Idaho, St. Paul, a sophomore student in engineering, wrote the parody.

Dorm Week Parent's Day will open Saturday, Feb. 4, with a discussion of "The Role of the Administration in Relation to the Individual Resident and His or Her Parents" at 10:30 a.m. in Coffman Memorial Union (C.M.U.) women's lounge. Taking part in the discussion will be Mrs. Georgia Parks and Donald Dell, Student Activities Bureau advisers; Harold Marquardt, director of the University's Student Housing Bureau; Don Finlayson, University Housing director; and Neil Bakkenist, Territorial hall head counselor.

(MORF)

Keith N. McFarland, assistant dean of the Institute of Agriculture, will address the parents at a noon luncheon Saturday in C.M.U. junior ballroom. Tickets may be purchased at the door.

The Dorm Week semi-formal dinner dance will be held Saturday evening at the University Campus Club on the fourth floor of C.M.U. Reservations for the dinner or for the dinner and dance must be made by Thursday, Feb. 2, in the BRH office, 225 C.M.U.

Final event of this first Dorm Week, Viking said, will be the presentation of "Porgy and Bess" at 3:30 p.m. Sunday (Feb. 5) in Northrop auditorium. The University department of concerts and lectures will join with BRH in joint sponsorship and profits will go to residence hall activities. Advance ticket sales for the performance of "Porgy and Bess" will be held in the various residence halls, at the C.M.U. ticket booth and at the BRH office.

-U N S-

Note to editors: We will notify you in advance of the exact time and place of the many photogenic events scheduled for Dorm Week. The condition of the snow, of course, will be important.

JANUARY 24, 1967

FOREIGN TEACHERS,  
STUDENTS AT 'U'  
FROM 81 NATIONS

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---Eighty-one nations are represented in the current directory of 1,556 nationals of foreign countries affiliated with the University of Minnesota during the present school year, according to Forrest G. Moore, director of the University's Office of the Adviser to Foreign Students. These include students, researchers and teachers, enrolled or working in 164 major fields of study.

This decrease of 50 from the 1,606 listed a year ago, Moore said, can probably be attributed to two new factors affecting foreign students who wish to continue their education in the United States. These are the \$10 credentials examination fee---a requirement passed after many of the prospective students had completed their registration---and the new rule requiring satisfactory grades on the Test of English as a Foreign Language (TOEFL).

The directory is prepared, Moore explained, as a part of the nationwide annual census of "foreign students, staff members, doctors of medicine and persons engaged in training in the United States." This census is sponsored by the Institute of International Education, the U.S. Department of State, the National Association for Foreign Student Affairs and the American Association of Collegiate Registrars and Admissions Officers.

Because it is compiled in connection with these national programs, with reporting categories established nationally, the students listed in the directory do not represent official University registration figures, Moore pointed out. Many persons listed in it may not be registered at the University if they satisfy their legal status in other ways.

The "Directory of Nationals of Other Countries" uses two types of classifications: Students Affiliated with the University (on various campuses) and Foreign Nationals Affiliated with the University on Special Programs.

(MORE)

The directory statistics show:

Foreign national students---

Minneapolis-St. Paul campus

Graduate students and medical fellows-----866

Undergraduate students-----123

Adult specials----- 34

---

 1,023

Affiliated with the Mayo Graduate

School of Medicine, Rochester-----196

Affiliated with the University

of Minnesota, Duluth----- 33

(There are no foreign students at Morris this year)

---

 229

TOTAL-----1,252

Foreign nationals affiliated with the University on special programs\*:

Honorary fellows----- 7

Faculty and staff members----- 94

Practical Trainees-----142

Special programs----- 38

Transition----- 23

Total of all foreign nationals affiliated with the 

---

 304

University of Minnesota-----1,556

\*Definition of these terms at end of article:

Of the 81 countries represented, Taiwan (Free China) again has the largest group---172; others in the top ten are India, 146; Canada, 115; The Philippines, 56; Japan, 29; United Arab Republic, 28; Germany, 26; Iran, 25; Great Britain, 24; and Israel, 20.

The 27 countries each having only one national affiliated with the University are Afghanistan, Angola, Austria, British West Indies, Burma, Central African Republic, Congo Republic, Dominican Republic, Ecuador, Haiti, Indonesia, Jordan, Macao, Morocco, The Netherlands, New Zealand, Nicaragua, Poland, Republic of South Africa, Rhodesia, Ryukyu Islands, Soudan, Syria, Upper Volta, Vietnam, West Cameroons, and Zambia.

(MORE)

Also included in the directory are lists of the 21 foreign student organizations which make up the University's International Student Council and information about international affairs representatives of both campus and off-campus groups interested in or affiliated with foreign student work at the University.

-U N S-

\*Definition of terms used under heading "Foreign nationals affiliated with the University on special programs:"

Honorary Fellows---foreign professors or other eminent scholars who have been recommended by the dean of the graduate school and the president of the University to use, temporarily, the privileges of the library, research facilities and seminars of the University.

Practical Trainees---students who have completed their academic programs and have been authorized to seek up to 18 months' work experience in their fields.

(Immigration regulations hold the University responsible for these students until completion of their training period even though the former student may no longer be residing in the immediate vicinity.)

Special Programs---persons not listed as "University students" but who are students who combine a program of work and study in special programs supervised by the Agricultural Short Courses office, the Office of International Programs, and other University departments.

Transition---foreign nationals who are not presently listed under a student status but who plan to return to school in the near future. (Individuals may drop out of school temporarily due to illness, authorized educational travel or business).

9 FINALISTS  
CHOSEN FOR 'U'  
QUIZ BOWL TEAM

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Nine University of Minnesota students have been selected as squad members of the University's G. E. College Bowl team to appear on national television on Sunday, March 26, in New York City, according to Robert L. Scott, team coach and professor of speech, communication and theatre arts.

"The nine survivors of the 103 original applicants who took the two qualifying test series MAY not be the sharpest and brightest youngsters at the University," Scott said, "but we are delighted with them, and will back them against any other group in the country. Their survival scores on the oral and written tests, when everyone scored in the high 90's, and their quick reactions to the 'Monster' (the light-buzzer machine) made it impossible for me to reduce the squad any further. Ultimately, their work with the Monster and their work on several local television shows will produce the final four squad members plus the one alternate.

"We hope to reassemble an alumni team from available members of the great unbeaten teams of the past, to help coach our squad. We hope also to have the brains and competitive skills of the Twin Cities' Newshawks team of local reporters that went to the finals in the fall-quarter CLA Quiz Bowl," Scott continued. "With this type of trained competition to work with, our group should be ready for any team that may be fielded against them."

(MORE)

Participating in and winning these brain-buster events are nothing new to the University: in the College Quiz Bowl radio competition in 1954, the University won eight consecutive times; the team came back in 1955 and established a record that still is unbeaten---12 consecutive wins. With television and the G. E. College Bowl in 1959, the University team won four consecutive games. In all, the Whiz Kids have won \$15,000 for scholarships plus national prestige for the University.

In this year's format, competition in the G. E. College Bowl is limited to five consecutive appearances of a team: one as a challenger and four as the champion. Teams will receive \$1,500 for each winning appearance, with \$500 going to the loser. Winnings will go for scholarships.

Finalists in the University's 1967 G. E. College Bowl squad are:

Clarence Anderson, 1266 E. Seventh st., St. Paul, a senior in psychology in the College of Liberal Arts (CLA).

Richard Cox, 3854 Queen ave. N., Minneapolis, a senior in history and Russian, CLA.

Craig Joines, 6434 Westchester circle, Golden Valley, a sophomore in economics in the School of Business Administration.

Joseph Klugman, 3113 Dakota, St. Louis Park, a junior in pre-medicine.

Keith Nier, 2279 Hoyt ave., Falcon Heights, a junior in sociology and physics, CLA.

Nick Neubauer, 3605 Thirty-seventh ave. NE., Minneapolis, a senior in political science, CLA.

Gary Olson, 5016 Fairview ave. N., Minneapolis, a psychology senior, CLA.

Christopher Page, 1535 Branston, St. Paul, a senior in history, CLA.

Phoebe Seillin, Route #3, Antigo, Wis., a junior in architecture, Institute of Technology.

The squad will meet this weekend, Scott said, to accustom the members to working with the Monster, made for it by Charles Vail, a graduate student in the communication sciences laboratories. The machine is similar to the one the team will work with in New York: the first to push on a button lights up bulbs on the master board and cuts contact for the opposing team.

HOW RELIGIONS VIEW  
WORLD PROBLEMS,  
TOPIC OF 'U' SERIES

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

A winter-quarter lecture series on how "World Religions View Contemporary World Problems" will open at the University of Minnesota Sunday (Jan. 29) and continue on Sunday evenings through Sunday, March 5.

The programs, sponsored jointly by the University's Council of Student Religious Organizations (CSRO), Minnesota Student Association (MSA) and Coffman Memorial Union Board of Governors (UBOG), will be held at 8 p.m. at various sites in C.M.U. These sites will be announced in advance, according to Quadir Khan, graduate student from Hyderabad, India, and a member of the committee organizing the series.

This week's program (Sunday, Jan. 29) will be held in the C.M.U. men's lounge.

Representatives of seven of the faiths of the world---Christian, Hindu, Muslim, Baha'i, Buddhist, Jewish and Sikh---will take active parts in the discussions, Khan explained, with speakers from three or four different faiths taking part in each of the programs and presenting their individual points of view.

The series programs, all of which are open to the public:

Sun., Jan. 29---"Religious Differences and Tolerances;" discussants will be from the Hindu, Muslim, Christian and Baha'i faiths.

Sun., Feb. 5---"Capitalism, Communism and Socialism;" discussants from the Christian, Buddhist, Sikh, Jewish and Muslim faiths.

Sun., Feb. 12---"Religion and Social Reform;" discussants from the Christian, Hindu, Muslim and Buddhist faiths.

Sun., Feb. 19---"Women in Society;" discussants from the Muslim, Christian, Buddhist and Baha'i faiths.

Sun., Feb. 26---"Population Control;" discussants from the Hindu, Jewish, Sikh and Buddhist faiths.

Sun., March 5---"War for Peace;" discussants from the Hindu, Muslim, Buddhist, Christian and Jewish faiths.

Minneapolis---Jacques Piccard, famed Swiss scientist and underwater explorer, will speak at the University of Minnesota on Sunday, Feb. 26, in Northrop auditorium.

He will give the annual Honeywell Engineers Lecture, sponsored by the University's Institute of Technology and the Honeywell Engineers Club, under the direction of the University department of concerts and lectures.

Jacques Piccard, 44, is the son of Auguste Piccard who was noted for his explorations of both the stratosphere and the ocean depths, and is the nephew of Auguste's twin brother, Professor Jean Piccard, stratosphere explorer who taught at the University of Minnesota for 16 years. (Auguste Piccard died in 1962 and Jean Piccard in 1963 at the age of 79.)

The Feb. 26 program will begin at 3:30 p.m. with entertainment by <sup>see attached</sup> the ~~We Five~~ vocal group. Speaking briefly will be William G. Shepherd, University vice president for academic administration, and Stephen F. Keating, president of Honeywell.

In addition, Gerry E. Morse, Honeywell vice president for employee relations, will introduce the 22 winners of the H. W. Sweatt Award for 1967. The Sweatt Awards program honors Honeywell engineers and scientists who have made technical achievements during the preceding year that represent superior ability and effort.

The program will be free and open to the public, but tickets are required. To get free tickets, simply send a request to Mrs. Olive Ling, Mail Station 118, Honeywell, Inc., 2701 - 4th ave. S., Minneapolis, Minn. 55408. Some tickets also will be available in Room 105 Northrop auditorium.

(MORE)

In December, Jacques Piccard was named as a member of the new Advisory Council on Oceanography, just formed in Florida "to develop Florida into a world center for oceanography," according to the announcement by Florida Governor Claude Kirk. Another noted member of the council is Athelstan Spilhaus, professor of geophysics and former dean of the Institute of Technology at the University of Minnesota.

On Jan. 7, Piccard announced plans for a six-week underwater journey off the Florida coast, tentatively scheduled for summer of 1968. The 120-ton "submersible" which will make the journey is now under construction in Switzerland and is called the PX15.

"This will be man's first opportunity to observe marine life in its environment from a silent, undersea vantage point for a prolonged period of time," Piccard said in connection with the announcement of the voyage. He explained that the hull of the craft will be unlike conventional submarines in that it will be less compressible than water, and thus able to remain at the same depth without using any mechanical means such as ballasting.

Piccard was last in Minnesota in 1960, when he visited his famous uncle and aunt, Jean and Jeanette. (Mrs. Jeanette Piccard still resides at 1445 E. River road, Minneapolis.)

Jacques Piccard was born in Belgium and educated first in Brussels, then in Switzerland, receiving a degree from the University of Geneva in 1946 and from the Graduate Institute of International Studies in 1947. In June 1962 he received a doctor of science degree from American International College, Springfield, Mass.

He began work with his father, Auguste, when he was 15, and together they designed the bathyscaph, the first deep-sea exploration vessel not attached in any way to a "mother ship." This vessel, the FNRS-2, was turned over to the French Navy.

The father-son team subsequently built the "Trieste," a bathyscaph which Jacques Piccard piloted on 65 successive dives. The last of these, on Jan. 23, 1960, made a record-breaking descent to 35,800 feet beneath the surface of the ocean in the Marianas Trench, off Guam in the Pacific. The vessel was then purchased by the U. S. Navy.

In 1963, Piccard built the mesoscaph "Auguste Piccard," the first civilian submarine, which carried 30,000 people into the depths of Lake Geneva, Switzerland, over a two-year period.

Piccard has received numerous awards for his work, including the Distinguished Public Service Award by President Dwight Eisenhower; the Theodore Roosevelt Distinguished Service Award; the Richard Hopper Day Memorial Award of the Philadelphia Academy of Sciences; life membership in the National Geographic Society; and the Drexel Institute Engineers' Day Award.

Piccard, who speaks French, English, German and Italian, resides in Lausanne, Switzerland, with his wife, Marie Claude, and their three children.

-U N S-

Note to editors: A news conference for Dr. Piccard will be held at 2 p.m. Thursday, Feb. 23, in the Regents' Room, 238 Morrill Hall.

C O R R E C T I O N

In a news release sent out last Thursday concerning the appearance of Jacques Piccard giving the Honeywell Engineers Lecture in Northrop auditorium on Feb. 26, the name of the group which entertains at the beginning of the program was erroneous.

Entertainment will be provided from 3:30 to 4 p.m. Feb. 26 by the Manhattan Singing Six, a self-accompanied singing group with a repertoire ranging from folk songs to Broadway show tunes.

Please make this correction on the original news release if you have kept it. Thank you.

4 LECTURES SET ON  
'PROBLEMS OF DECADE'

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Four University of Minnesota professors will talk about "Problems of the Decade" in a one-a-month series to be held at 7:45 p.m. beginning Monday (Jan. 30). The talks will be given in Room 309 Aeronautical Engineering.

The series is open to the public for \$5. Anyone interested in attending should send a check, payable to the University of Minnesota, to "Problems of the Decade" Lecture Series, 254 Nicholson hall, University of Minnesota, Minneapolis 55455. Tickets for individual lectures will not be sold.

James E. Holte, director of continuing education in engineering and science, will serve as moderator. The series is a presentation of the University's General Extension Division.

The speakers, their subjects and dates are:

David Cooperman, chairman of the social sciences division, "Cultural Hang-ups in Proposals for Solving Social Problems," Monday (Jan. 30).

William C. Rogers, director of the World Affairs Center, "Twenty Years of the Cold War," Feb. 27.

Athelstan Spilhaus, professor of physics, "The Experimental City," March 27.

John Turnbull, associate dean of the College of Liberal Arts, "Some Aspects of the New Economics," April 24.

The lecture series will be telecast via closed circuit to Rochester for viewing at the International Business Machines Corp. plant by IBM managerial and executive staff. Room 309 Aeronautical Engineering---the only room on the campus equipped for such two-way TV transmission of classes---has a seating capacity of only 50.

BAHA'I CLUB  
AT 'U' PRESENTS  
LECTURE SAT.

(FOR IMMEDIATE RELEASE)

"A Negro's Thoughts on Life in a Non-Prejudiced Society" will be discussed at the University of Minnesota Saturday (Jan. 28) by John Berry, a Rochester, Minn., engineer, in a special lecture presented by the Baha'i Club of the University.

The talk, open to the public, will be presented at 8 p.m. in Coffman Memorial Union men's lounge.

An open discussion and refreshments will follow Berry's talk, according to Vida Ditter, Baha'i Club president.

LIST OF UNIVERSITY OF MINNESOTA MINNEAPOLIS CAMPUS PUBLIC EVENTS  
WEEK OF JAN. 28-FEB. 5

- Sat. -- Jan. 28 -- Religious lecture: The University Baha'i Club presents John Berry, Rochester, Minn., engineer speaking on "A Negro's Thoughts on Life in a Non-Prejudiced Society," 8 p.m., Coffman Union men's lounge. Refreshments and discussion. Free.
- Sun. -- Jan. 29 -- Minnesota Museum of Natural History Sunday Program---35mm. slides from "International Color Photo Salon," 200 top pictures from nature division of this annual exhibition; 3 p.m., Museum auditorium. Free.
- Sun. -- Jan. 29 -- Winter Quarter Religious Lecture Series, "World Religions View Contemporary World Problems;" today's lecture, "Religious Differences and Tolerances," discussants from Hindu, Muslim, Christian and Baha'i faiths; 8 p.m., Coffman Union men's lounge. Free.
- Sun. -- Jan. 29 -- Student-Faculty Chamber Music recital, 8 p.m., Mayo auditorium. Free.
- Mon. -- Jan. 30 -- Special lecture series, School of Architecture and Landscape Architecture "New Town Design---Its Past, Present and Potential;" Reston and Tapiola present two outstanding examples of quality urban design in this illustrated lecture on "U.S.A. and Scandinavia" by Professor Roger D. Clemence. 4:15 p.m., Room 25 Architecture. Free.
- Mon. -- Jan. 30 -- Special lecture---Dr. Dwight J. Ingle, professor and chairman, department of physiology, University of Chicago, speaks on "Parameters of Biomedical Research, With Special Reference to Some Unsolved Problems of Experimental Diabetes;" 12:30 p.m., 178 Jackson. Free.
- Mon. -- Jan. 30 -- Special lecture series, "Problems of the Decade," by four University professors: "Cultural Hang-Ups in Proposals for Solving Social Problems," Professor David Cooperman, chairman, social sciences division; 7:45 p.m., Room 309 Aeronautical Engineering. Series ticket, \$5, 254 Nicholson.
- Wed. -- Feb. 1 -- University Film Society---"Triumph of the Will," Hitler's Germany---3:15 p.m., Museum auditorium. Tickets.
- Wed. -- Feb. 1 -- Special lecture: Anne M. Treisman, psychological research division, Bell Telephone laboratories, Murray Hill, N.J., speaks on "Selective Attention," 4:15 p.m., 155 Ford hall. Free.

(MORE)

- Thurs.- Feb. 2 -- University Theatre---Opening, George Sklar's "And People All Around," through Saturday, 8 p.m., Scott hall auditorium. Tickets.
- Thurs.- Feb. 2 -- University Gallery---"Balthus;" gallery 305, Northrop auditorium. Open school hours, weekdays. Free.
- Thurs.- Feb. 2 -- Special lecture---Art Linkletter speaks on "The Pill and the Bomb" in a public appearance in the M.S.A.-Royal Crown University series; 3:15 p.m., Northrop auditorium. Free.
- Thurs.- Feb. 2 -- Dorm Week: Public symposium on "The New Morality" and presentation of parody of Salinger's "Catcher in the Rye;" 8 p.m., Mayo auditorium. Free.
- Fri. -- Feb. 3 -- University Film Society---"Man With A Movie Camera" (1929, USSR) and "Joli Mai" (1963, France); 7:30 p.m., Museum auditorium. Tickets.
- Sat. -- Feb. 4 -- Dorm Week---Parents' Day: discussion, "The Role of the Administration in Relation to the Individual Resident and His or Her Parents," by University administrative officials, 10:30 a.m., Coffman Union women's lounge; noon luncheon, Dean Keith N. Farland, speaker; lunch tickets at door of Coffman Union junior ballroom.
- Sun. -- Feb. 5 -- Minnesota Museum of Natural History Sunday Program: "Island Treasure," color film of natural history of Mississippi River between Anoka and Minneapolis. 3 p.m., Museum auditorium. Free.
- Sun. -- Feb. 5 -- Winter quarter religious lecture series, "World Religions View Contemporary World Problems;" this program---"Capitalism, Communism and Socialism," discussed by Christians, Buddhists, Sikhs, Jews and Muslims. 8 p.m., Coffman Union women's lounge. Free.

NURSES AT  
'U' HOSPITALS  
GET RAISE

(FOR IMMEDIATE RELEASE)

Florence Julian, director of nursing services at the University of Minnesota, has announced a temporary salary arrangement to cover registered nurses working in University Hospitals.

The salary arrangement, developed in cooperation with the Minnesota Nurses Association, raises all nurses at University Hospitals to the top level of pay for their individual classifications. The Minnesota Nurses Association is the sole bargaining representative of nurses in University Hospitals.

The classifications and the new pay levels are:

General Staff Nurses .....	\$547 per month
Assistant Head Nurse .....	\$592 per month
Head Nurse .....	\$641 per month

The temporary salary arrangement is retroactive to Dec. 1, 1966, and will be in effect until a new University civil service salary plan is implemented by the Minnesota State Legislature, expected by July 1, 1967.

There are some 345 registered nurses employed at University Hospitals.

'U' CONCERT BAND ENSEMBLE  
TO GIVE 6 CONCERTS ON TOUR

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

The University of Minnesota Concert Band Ensemble will give concerts in four states and will be one of nine musical groups to perform at the national convention of the College Band Directors Association, when it goes on tour Saturday (Feb. 4).

The 55 men and women members of the University's concert band group will present concerts in Minnesota, Wisconsin, Illinois and Michigan, according to their director, Bandmaster Frank P. A. Bencriscutto.

Highlights of the trip will be the concert Wednesday, Feb. 8, in Chicago's Orchestral Hall, home of the Chicago Symphony Orchestra, and the appearance Thursday, Feb. 9, before the national band directors in Hill auditorium at the University of Michigan, Ann Arbor.

Several new works will be premiered on this trip, Bencriscutto said. Among them will be "Rocky Point Holiday," a piece by Ron Nelson commissioned by the University's Concert Band Ensemble; "Sensemaya," by Silvestra Revueltas; and the finale from Peter Mennin's "Symphony No. 5."

The tour itinerary will include these concerts:

Rochester, Minn.-Central Junior High School auditorium, 8 p.m. Sat., Feb. 4  
Racine, Wis.-Horlick auditorium, 8 p.m. Sun., Feb. 5  
Kenosha, Wis.-Bradford auditorium, 8 p.m. Mon., Feb. 6  
Park Ridge, Ill.-Maine Township High School auditorium, 1:25 p.m. Tues., Feb. 7  
Chicago, Ill.-Orchestral Hall, 8:30 p.m. Wed., Feb. 8  
Ann Arbor, Mich.-Hill auditorium, 8:30 p.m. Thurs., Feb. 9

The band will return to the University campus on Saturday, Feb. 11.

DARRELL LEWIS TO HEAD STATE  
COUNCIL ON ECONOMIC EDUCATION

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---Darrell R. Lewis, an economics teacher at Luther College, Decorah, Iowa, Wednesday (Feb. 1) will become executive director of the Minnesota State Council on Economic Education (MSCEE) and director of the Center for Economic Education at the University of Minnesota.

He will succeed Professor Roman F. Warmke, who was the first executive director of the MSCEE. Last fall, Professor Warmke became director of the Ohio Council on Economic Education. Professor Rufus Logan of Gustavus Adolphus College, St. Peter, has been acting director since Warmke's departure, but submitted his resignation early in January when he was named commissioner of taxation by Governor Harold LeVander.

Lewis also will have a joint appointment in the College of Education and the department of economics as an assistant professor of economic education.

Since 1963 Lewis has been an assistant professor of economics at Luther College, from which he received a bachelor of arts degree magna cum laude in 1960. Since last September he has been a visiting professor of economics at Louisiana State University, Baton Rouge, teaching and doing research. He received a doctor of philosophy degree with high honors from LSU in 1963.

The MSCEE board of directors, as well as members of the University committee responsible for Lewis' selection, were reported extremely pleased to secure the talents of the 30-year-old native Minnesotan for the most important job in the state's economic education program.

The MSCEE is a non-profit organization which is operated in concert with the University's Center for Economic Education. The council's major goal is the promotion of a better understanding of the American economy and its relation to international developments and economic problems.

(MORE)

The council works with the Minnesota State Education Department, colleges and universities throughout the state, local school systems and professional organizations of teachers and administrators---all in the interest of greater economic literacy. MSCEE offices are at 1169 Business Administration building, on the University's West Bank.

During a recent visit to the campus, Lewis expressed pleasure with his appointment and stated that "In my opinion, this is one of the top economic education programs in the country. Certainly a good portion of the credit for its high national standing belongs to Dr. Warmke, who has left his enthusiastic mark indelibly on the Minnesota economic education scene."

"It probably goes without saying," Lewis added, "that I'm extremely anxious to get on the job and become involved in what I consider to be one of the most dynamic and on-going programs in the United States."

The executive director indicated he hopes to teach one or two University courses a year, and plans to visit all the state's economic education centers as soon as possible. "I'm very anxious to meet the leaders of these programs," he said. He has already scheduled visits to Mankato, St. Cloud and Duluth.

While an undergraduate at Luther College, Lewis was a member of the Senior Honor Society and received the Outstanding Student Award in economics. He was a National Defense Doctoral Fellow and Honorary Woodrow Wilson Fellow at LSU, where he received awards from both Omicron Delta Epsilon and Delta Sigma Pi. He declined a Fulbright Research Award that would have taken him to Spain this year.

In the mid-50's, Lewis spent three years in Europe with the U. S. Army as a finance specialist.

A native of Chatfield, Minn., Lewis was married in 1960. He and his wife, Marilyn, of Rushford, Minn., met in college and have two girls, aged five and one.

BROADCASTERS TO ATTEND  
NEWS SEMINAR AT 'U'

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

The Northwest Broadcast News Association (NBNA) and the School of Journalism and Mass Communication, University of Minnesota, will present the nineteenth annual Radio-TV News Seminar Friday and Saturday (Feb. 3-4) in Murphy hall on the Minneapolis campus, with a focus on the current "free press-fair trial" issue.

Approximately 100 newsmen from a six-state area will attend.

Grant Price, of WMT-AM-TV, Cedar Rapids, Iowa, will preside over the Friday-morning session at which Associate Professor Donald Gillmor of the School of Journalism and Mass Communication will describe the what and why of the "free press-fair trial" issue and Robert M. Shaw, manager of the Minnesota Newspaper Association, will voice proposals offered by journalists on the issue.

Tom Read, NBNA president, will emcee the luncheon meeting which will feature Bruce Dennis, president of the Radio-TV News Directors Association and news manager of WGN-AM-TV, Chicago. Dennis will speak on the "Challenge of the Free Press-Fair Trial Issue for Broadcast Newsmen."

The afternoon session, headed by Journalism Associate Professor Robert Lindsay, will feature four NBNA spokesmen who will offer their views on the "Free Press-Fair Trial Issue in the Eyes of Bench, Bar, City Hall and State House." The four are Lyle Huseby, Fargo, N. D., attorney; Bronson C. LaFollette, Wisconsin attorney general; Robert Johnson, mayor of Cedar Rapids, Iowa; and Judge Donald Barbeau, Hennepin county district court.

(MORE)

A reception hosted by United Press International will be held at the Minnesota Press Club Friday evening followed by a banquet at which Robert L. Jones, director of the School of Journalism and Mass Communication, will preside.

Following the banquet, four women who pioneered the female "invasion" into NBNA radio and television newsrooms will tell "how they did it and why they're glad they did." They are Barbara Beerhalter, WCCO radio, Twin Cities; Jackie Heuser, WKBT, La Crosse, Wis.; Myra Scott, WCCO-TV, Twin Cities; and Betty Wolden, KSTP-TV, Twin Cities. The NBNA 1966 Awards for excellence in news broadcasting will also be made during the evening session.

Following a screening and playback of contest-winning films and tapes critiqued by John Lively, radio and television publicist for the 3M Co., and a final business session, the seminar will adjourn at noon Saturday (Feb. 4).

ASSISTANT DIRECTOR  
OF 'U' HOSPITALS  
TAKES IOWA POST

(FOR IMMEDIATE RELEASE)

Minneapolis---Ames Early, assistant director of the University of Minnesota Hospitals, recently was named administrator of the Mary Frances Skiff Memorial Hospital in Newton, Iowa.

Early, 29, will take responsibility for the 130-bed non-profit community hospital on March 1. Newton, 35 miles east of Des Moines, is the national headquarters for the Maytag Corporation, with a population of 16,000.

Early joined the University Hospitals staff in 1962 as an administrative assistant, principally in charge of the 80-bed Masonic Memorial Hospital, a chronic care unit for cancer and other long-term illnesses. He became assistant director of University Hospitals in 1964 and coordinated the planning of the \$1.1-million addition to the Masonic hospital, now complete. Early also carried administrative responsibility for central supply, pharmacy, nutrition, central transportation and student-staff housing for the entire Medical Center.

A native of Iowa, Early received a bachelor of arts degree from Drake University in 1959. He earned a master of hospital administration degree in 1961 from the State University of Iowa.

CIVIL RIGHTS IN THE THEATRE  
TO BE DISCUSSED AT 'U'

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Two groups of University of Minnesota students---one representing civil rights interests and the other from the cast of the current play at University Theatre---will conduct a forum on "The Civil Rights Issue: Does It Belong in the Theater and Does It Belong in Minnesota?"

The discussion, open free to the public, will be held at 12:15 p.m. Tuesday (Feb. 7) in Coffman Memorial Union (CMU) main ballroom, according to Kathy Keleher, student program director of the fine arts area of the Union Board of Governors.

"With the strongly civil rights-motivated play, 'And People All Around,' now playing in Scott hall," Miss Keleher explained, "the opportunity for this discussion seemed too good to miss."

From the cast of "And People All Around" and expressing the theater's point of view will be the forum moderator, Lonnie Morgan, University Theatre graduate student and former member of the University football team; Katheryn Coram, James Alexander and Patricia Brock.

Presenting the point of view of the civil rights workers will be Scotty Stone, Minnesota Student Association senator; Sandy Wilkinson, Ida Elam and Napoleon Crutchfield.

LOCAL MISSISSIPPI  
WILDLIFE TO BE  
SHOWN AT MUSEUM

(FOR IMMEDIATE RELEASE)

An intimate camera's-eye view of a famous Minnesota backyard---the Mississippi River bank and island area belonging to Professor W. J. Breckenridge, director of the Minnesota Museum of Natural History---will be shown and described in the Sunday afternoon program at the museum (Sunday, Feb. 5).

The illustrated lecture, "Island Treasure," at 3 p.m. in the museum auditorium, will show views of the Breckenridge property on the river between Minneapolis and Anoka---from soft-shelled turtles to wood ducks in their nests---according to Professor Breckenridge.

The museum Sunday-afternoon programs, open free to the public, are given each Sunday during the winter on the University of Minnesota's Minneapolis campus.

The program for Sunday, Feb. 12, will include "A First-hand Report on Eskimo Culture and Language" by Thomas Correll, a graduate student in anthropology at the University.

CALIFORNIA SURGEON  
URGED AS HEAD OF  
U OF M SURGERY DEPT.

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---Dr. John S. Najarian, professor of surgery at the University of California's Medical Center at San Francisco, has been officially recommended to the University of Minnesota's Board of Regents as the new head of the department of surgery, according to Dr. Robert B. Howard, dean of the University's College of Medical Sciences.

He would succeed Dr. Owen H. Wangensteen, noted surgeon-educator who has been head of that department since 1930, and who will retire on June 30, 1967. Dr. Najarian's name will be submitted to the Board of Regents at its next meeting (Feb. 10), with the appointment to be effective July 1, 1967.

Dr. Najarian, 39, is well known professionally as a tissue transplant surgeon. He has been on the faculty of the San Francisco Medical Center since 1959, and he started the transplant service there in 1963. Since the start of this service, some 57 kidney transplant operations have been performed, with a 75 per cent patient survival rate.

Dr. Najarian's selection is the result of an intensive search of surgeon-educators throughout the country, made by a select medical-school faculty committee headed by Dr. Robert A. Good, professor of pediatrics and microbiology at the University of Minnesota. Dr. Najarian received the unanimous approval of this committee.

"I am delighted to concur with the recommendation of the committee in the selection of Dr. John S. Najarian as our new head of surgery," said Dr. Howard. "I am confident Dr. Najarian will carry on the excellent tradition of surgical education and research built over these many years by Dr. Wangensteen, and add even further vigor and direction to what is already one of the finest surgery departments in the nation."

(MORE)

A graduate of the University of California with a degree in medicine in 1952, Dr. Najarian was an intern in 1952-53 and did his surgical residencies from 1955-59, both at the University of California. From 1953 to 1955 he served in the U. S. Air Force. He is a native of Oakland, Calif.

In addition to his contributions as a teacher, Dr. Najarian has directed an active research program aimed at determining basic mechanisms involved in the tissue rejection process. He and his group have shown how antibodies participate in the rejection process, and have explored methods of blocking these antibodies.

Dr. Najarian received special research fellowships from the U. S. Public Health Service in 1960 and 1961, first in pathology at the University of Pittsburgh and then in experimental pathology at Scripps Clinic and Research Foundation, La Jolla, California.

Dr. Najarian was named a John and Mary Markle Scholar in 1964. He was the recipient of the California Trudeau Society Award in 1962. He is a fellow in the American College of Surgeons, and holds memberships in the following professional societies: American Society for Experimental Pathology, Transplant Society, Halsted Surgical Society, Hagfish Society (Immunology), American Association of Immunology, Pan Pacific Surgical Association, San Francisco Medical Society, Northern California Chapter of the National Kidney Foundation, California Medical Association, and other local and national groups.

He is a consultant to the National Institutes of Health, Clinical Research Training Committee, and the U. S. Bureau of the Budget, Committee on Chronic Kidney Disease. He also is a member of the Scientific Advisory Committee of the Northern California Kidney Foundation.

Dr. Najarian and his wife, Mignette, are the parents of four sons, John, Paul, David and Peter, and live in San Francisco.

FACULTY FROM ALL MINNESOTA  
COLLEGES TO HOLD APRIL MEET

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Faculty members from public and private colleges throughout Minnesota will participate in a new type of meeting, a Minnesota Intercollegiate Faculty Conference, April 14-16 at Sugar Hills Resort, Grand Rapids, Minn.

Purpose of the conference will be to allow faculty members from the various institutions to discuss problems and other areas they have in common, and ways in which they can cooperate with each other.

Invitations have been sent to people at every college and junior college in the state on behalf of a nine-man steering committee, according to Philosophy Professor D. Burnham Terrell of the University of Minnesota and Chemistry Professor Clarence Perisho of Mankato State College, conference co-chairmen.

Terrell explained that teachers in each academic discipline, such as history, genetics and physics, form a fairly close-knit community, in communication with their colleagues throughout the state, the country and sometimes even the world. Also, schools of the same general size and kind---small private colleges, state colleges, etc.---hold state and regional meetings to compare notes. Yet never has there been a statewide conference among all types and sizes of Minnesota colleges involving faculty from a wide variety of fields.

"We hope this conference will generate among Minnesota's faculties some awareness of their actual and potential relationships to each other as a community of scholars and teachers," Terrell said.

(MORE)

The conference will be conducted around the theme "Forms of Inter-faculty Cooperation," with Paul A. Miller as keynote speaker. Miller is assistant secretary for education in the Department of Health, Education and Welfare, and former president of West Virginia University. He will speak after dinner on April 14.

After-dinner speaker on April 15 will be David Fellman, Vilas professor of political science at the University of Wisconsin and former president of the American Association of University Professors (AAUP). The conference will begin with a social hour before dinner on Friday, April 14, and adjourn with a noon dinner on Sunday, April 16.

Each college has been asked to send one faculty delegate for approximately every 50 faculty members, up to a maximum of 10 delegates. Some 100 delegates in all are expected, from 45 schools.

The conference will be the first in a series to be held yearly, sponsored by the AAUP (Minnesota conference) and the University of Minnesota Senate (faculty governing body). The first three in the series will be financed by a grant from the Hill Family Foundation of St. Paul.

LECTURE SERIES  
ON CHRIST SLATED  
FEB. 13-17 AT 'U'

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

A week-long lecture series on "Who Is Jesus Christ?" will be presented Feb. 13-17 by University of Minnesota student members of the Inter-Varsity Christian Fellowship.

Speaker for the week's daily lectures will be Glen Zumwalt, member of the aeronautical engineering faculty of Oklahoma State University, Stillwater, Okla.

Opening event in the week-long lecture series will be a lecture-debate between Zumwalt and Douglas Lewis, assistant professor of philosophy at the University. The two will debate the topic "Jesus Christ: Demented or Divine?" from 12:15 to 1 p.m. Monday Feb. 13, in Northrop auditorium. The event, jointly sponsored by the department of concerts and lectures, will be open to the public.

For the remainder of the week, according to Peter Clift, president of Inter-Varsity Christian Fellowship, Zumwalt will continue to consider the person of Christ: on Tuesday, Feb. 14, as He was seen by the prophets, in a lecture titled "Suffering Servant or Divine King?"; on Wednesday, Feb. 15, as He saw himself, in "Self-centered or Other-centered?"; on Thursday, Feb. 16, as He was seen by His followers, in "Savior or Sincere Demagogue?"; and on Friday, Feb. 17, as seen by His enemies, in "Frustrated Revolutionary?"

The lectures will be at 12:15 p.m. each day and will be held in Coffman Memorial Union main ballroom on Tuesday, Thursday and Friday. The Wednesday lecture will be given in Mayo auditorium. All are open to the public.

The week's program will be concluded on Friday, Feb. 17, with a banquet at the Hotel Lowry, St. Paul. Banquet speaker will be Paul Little, Chicago, national director of evangelism for the Inter-Varsity Christian Fellowship - U.S.A. He will speak on "Jesus Christ: Relative or Relevant?"

BROADCAST AWARDS  
PRESENTED AT  
'U' CONVENTION

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Robert L. Jones, director of the School of Journalism and Mass Communication, University of Minnesota, presented the 1966 Northwest Broadcast News Association (NBNA) awards for excellence in news broadcasting on behalf of NBNA at a banquet held Friday evening (Feb. 3) at the Minnesota Press Club.

The banquet was part of the first day's session of the 19th Annual Radio-TV News Seminar that is being co-sponsored by the NBNA and the University's School of Journalism and Mass Communication.

The award for spot news coverage of radio went to station WRIT, Milwaukee, Wis., for imaginative and skillful interview techniques, reporting and scripting in its coverage of spot news for radio.

A special citation went to station KOLT, Scottsbluff, Neb., for the creative transformation of a routine local news operation into an enterprising regional news service, elevating radio journalism to a new prominence in western Nebraska and eastern Wyoming.

In the documentary category, an award was presented to KSTP radio, Minneapolis-St. Paul, Minn., for reporting skill, outstanding use of natural sound and exceptional editing on "The Road from Sugar Hills"---a thorough, swiftly paced radio documentary recapping the political events of 1966 in Minnesota.

A second documentary award went to station KDSN, Dennison, Iowa, for reportorial initiative and artistic editing of recorded interviews and random voices to enhance human interest for "A College Is Born," a documentary of the first, trying days of a newly opened college.

(MORE)

In the radio editorial category, the award went to station WOKY, Milwaukee, Wis., for an outstanding series of dramatic and concise radio editorials which alerted its community to the spreading use of LSD and other drugs and helped to prompt drug-control legislation.

The television award for spot news coverage went to WDAY-TV, Fargo, N.D., in recognition of outstanding use of available facilities and manpower to provide consistently professional coverage of spot news for television.

The TV documentary award went to KXBJ-TV, Valley City, N.D., for outstanding documentary production technique on "War Comes to the Valley"---a program skillfully blending audio and visual material to demonstrate that the story of the Viet Nam war is not only in the jungles and rice paddies.

A special citation went to Les Solin, WCCO-TV, Minneapolis, Minn., for his inventive use of the newsfilm camera in a sensitive visual presentation of Minnesota servicemen in Viet Nam.

The editorial award went to KCMT-TV, Alexandria, Minn., for outstanding achievement in television editorials through perceptive, accomplished scripting, reinforced by illustrative film.

A special citation went to KWVL Radio and Television, Waterloo, Iowa, for thorough research and documentation in support of its disclosure of "The Marriage Mill"---a public service program which led to the conviction of two public officials for perjury with charges pending against two others.

John Lively, radio and television publicist for the 3M Co., and his staff served as judges for the annual contest.

'U' DADS' ASSOCIATION  
TO HEAR STUDENT  
PANEL DISCUSSION

(FOR IMMEDIATE RELEASE)

"The International Commitment of University Students" will be discussed by a panel of students and members of the Office of the Dean of Students at the February meeting on Wednesday, Feb. 15, of the University Dads' Association.

The meeting will be held at 7:30 p.m. in Coffman Memorial Union men's lounge, with refreshments served in the C.M.U. international lounge after the discussion.

Reservations for the meeting and program must be in the Dads' Association office, 200 Eddy hall, by Monday, Feb. 13.

Panel members will be four students actively concerned with and working on international student problems---Mrs. Linn Aakhus, Minnesota Student Association (MSA) vice president for international affairs; Miss Lori Palmer, MSA American Life seminars chairman; M. J. Abhishaker, graduate student from India who is vice president of the University's International Student Council; and Greg Delin, administrative fellow in the office of the adviser to foreign students and chairman of the MSA's student exchange program.

Representatives of Dean Williamson's office will be Miss Anne Marie Thomas, student personnel worker, and Earl Craig, student personnel worker from the Student Activities Bureau.

UNIVERSITY OF MINNESOTA LECTURE SHORTS

(FOR IMMEDIATE RELEASE)

ANIMAL BEHAVIOR TOPIC  
OF 'U' LECTURE MONDAY

For further information, contact:  
DORIS FENICK

The behavior of birds and animals on the Galapagos islands in the Pacific ocean off the coast of Ecuador will be discussed by a distinguished German ecologist, Professor Irenaus Eibl-Eibesfeldt, at the University of Minnesota Monday (Feb. 13).

The lecture, illustrated by color film, will be given at 8 p.m. in the Minnesota Museum of Natural History auditorium and will be open free to the public.

Professor Eibl-Eibesfeldt is a member of the staff of the Max Planck Institute, Seewiesen, Germany. Currently he is a Hill Foundation visiting professor in the University Institute of Child Development, where he is working on the adaptations of animals to their habitat.

ART EVENTS AT 'U'  
TO RAISE FUNDS FOR  
ITALIAN ART RESCUE

For further information, contact:  
DORIS FENICK

(FOR ART PAGES OR COLUMNS)

"Italiano dell' Arte,"---a program of art-connected events ranging from concerts to an art sale, a theater production and film showings---will be presented at the University of Minnesota the week of Feb. 12-17.

The series of programs is sponsored by the Coffman Union Board of Governors (UBOG) for the purpose of raising funds for the restoration of art works destroyed by floods in Florence, Italy, last fall, according to Tim Marrinan, chairman of UBOG's Italiano dell' Arte committee.

"This effort is a part of the endeavor undertaken on a national scale by the Committee for the Rescue of Italian Art (CRIA)," Marrinan emphasized. "All of the donations received at these events will be sent to the Florence Citizens' Council through the United States CRIA.

"University faculty and student artists, musicians and Film Society members are joining forces with such groups as the Firehouse Theatre and the Minneapolis Civic orchestra in making this art-filled week possible," he continued. "It is our hope that the voluntary donations at the various events plus receipts from the art sale will total well over \$2,000 for the fund. With many of the professional artists from the Twin Cities joining our art faculty members in contributing examples of their work, the sale proceeds alone could easily raise this sum."

"Italiano dell' Arte" will open Sunday (Feb. 12) with a performance of Eugene Ionesco's drama "Victims of Duty," at the Firehouse Theatre, 3010 Minnehaha ave., Minneapolis. Admission will be \$2 minimum.

A film, "The Brig," that received the grand prize at the Venice Documentary Film Festival in 1964, will be shown at 12:15 and 3:15 p.m. Tuesday (Feb. 14) in C.M.U. main ballroom. Admission will be 50 cents.

(MORE)

A panel of three noted Twin Cities professors will discuss the Florence art treasures involved in the November flood. Making up the panel, which will speak at 2:15 p.m. Monday (Feb. 13) in C.M.U. Gallery, will be The Reverend Richard Schuler, College of St. Thomas, and two University professors, Irving Godt, music, and Hylton Thomas, art history.

The exhibition and sale of art works donated by local artists will open at 5 p.m. Monday in the C.M.U. Gallery on the main floor. All pieces will be marked with prices established by the artist, Marrinan said. Because purchasers will be allowed to take their art works home with them, the exhibit should be seen early in the week. The show and sale will continue throughout the entire week.

Wednesday's program will include a Kaffee Konzert with the University Madrigal Singers at 11:15 a.m. and 12:15 p.m. in the main ballroom plus two showings of two Fellini films, "Nights of Cabiria" and "Love in the City." The films will be shown at 2:15 and 7 p.m. in C.M.U. main ballroom for \$1 admission. The Musica Collegium, a choral group under the direction of Professor Godt, also will present a concert of medieval and Renaissance music at 1:15 p.m. in C.M.U. main ballroom Wednesday.

The Italian film "Seduced and Abandoned" will be shown twice, at 2:15 and 4:15 p.m., Friday (Feb. 17) in C.M.U. main ballroom. Admission will be charged.

Members of the University Concert Band Ensemble, who will just have returned from a four-state tour, will present a concert at 8:30 p.m. Friday in Northrop auditorium. Donations to the art-restoration fund will be accepted.

While not actually a part of the University, members of the Minneapolis Civic orchestra have indicated their desire to join the "Italiano dell' Arte" program, Marrinan said, and will dedicate their concert at 8 p.m. Tuesday, March 7, to the cause. Donations will be taken at the concert which will be held in C.M.U. main ballroom.

NAVY ARTISTS' WORKS  
TO BE DISPLAYED AT 'U'

For further information, contact:  
DORIS FENICK

(FOR ART PAGE OR COLUMN)

U. S. Navy combat artists' paintings and on-the-scenes drawings will be exhibited at the University of Minnesota Feb. 13-24.

The exhibit, sponsored by the Naval ROTC unit at the University and sent here from the Navy Exhibit Center, Washington, D. C., will hang in the third floor main corridor in Coffman Memorial Union (C.M.U.) It will be open to the public from 9 a.m. to 11 p.m. weekdays, according to Captain James M. Marshall, USN, professor of naval science and commanding officer of the University NROTC unit.

The 35 original works, selected from the multi-million dollar Navy art collection, depict highlights of the Navy's activities in the Pacific, the Atlantic, Korea, Normandy and the Philippines.

Works in oil, watercolor, charcoal, inkwash, scratchboard and gouache are in the collection to be shown here.

Typical of the artists whose work will be on view is that of Lt. Mitchell Jamieson, USNR, and portraitist Albert K. Murray, Capt. Marshall pointed out. Jamieson has received two Guggenheim Fellowships plus the Award of Merit from the American Academy of Arts and Letters; Murray is a nationally recognized portraitist.

Of the assigned artist-spokesmen of the Navy Art Cooperation Liaison Committee, Paul B. Fay, Jr., Under Secretary of the Navy under President John F. Kennedy, says, "---to this artist we give a difficult task: 'articulate the Navy image, express it so there be no misunderstanding, do it explosively or when need be, gently, but say it with all the power of color and line.'"

University officials and top-ranking Navy personnel from the area will join Capt. Marshall in opening the show at 3 p.m. Monday (Feb. 13).

U OF MINNESOTA WEEK  
SLATED FEB. 19-25;  
SPEAKERS AVAILABLE

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Exhibits and speeches throughout the Twin Cities metropolitan area and elsewhere will mark the observance of University of Minnesota Week, 1967, to be celebrated from Feb. 19-25.

The annual observance, sponsored by the Minnesota Jaycees, the Minnesota Alumni Association and the University, serves to bring University activities and programs to the attention of the general public.

Speakers will be available from many different departments of the University, to talk to any kind of club or group. Any group interested in obtaining a speaker should call the University Relations department, 373-2126. The speakers will be available not only during the actual University week, but for the rest of the month.

Some of the topics available from high-ranking faculty members are "Engineering Education," "The United States and Latin America," "Community Nursing," "Radio and Television Here and Abroad," "Scandinavian Runic Inscriptions," "The James Ford Bell Library Collection," "U. S. Foreign Policy Toward China" and many others.

Exhibits from dozens of University departments will be installed in banks, stores and business places throughout the metropolitan area. Some of these will be a three-dimensional display of architectural designs; art works by faculty members from the studio arts department and others from the University Gallery; a display from the electrical engineering department on space science and Minnesota's electronic industry; textbooks, costumes and other articles pertaining to Hebrew and Arabic, from the Middle Eastern languages department; and an exhibit on Dutch elm disease and air pollution, from the Minnesota Museum of Natural History.

'U' ANTHROPOLOGY STUDENT  
TO TALK ON ESKIMO CULTURE

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

A missionary-translator, who spent eight years in the Canadian Arctic and who now is completing work on a doctor of philosophy degree in anthropology at the University of Minnesota, will give "A First-hand Report on Eskimo Culture and Language" at the Minnesota Museum of Natural History Sunday (Feb. 12).

Thomas Correll, who lived in igloos "only when traveling about the area" and in houses "just like everyone else up there does if they aren't traveling," confesses that he really isn't "too fond of blubber!" "You eat it, the Eskimos eat it, everyone does, if you get hungry enough---but it will never replace the TV dinner."

Correll, with his wife and family that grew from two to five children in the Arctic, originally went to the Canadian Arctic as representative of Continental Missionaries, Inc. While working with this small inter-denominational group as teacher-missionary-translator, he became interested in anthropology and decided to go into that field.

In 1959 he left the base camp on the west shores of Hudson's Bay to teach the Eskimo language at the University of Alberta, Edmonton, Alberta. The language of the Eskimos, he says, is phonetically simple, but becomes increasingly complex in word structure. "It tends to follow the Germanic pattern of adding ideas onto one word," he said. "The results can become staggering."

Correll will speak at 3 p.m. in the museum auditorium. His lecture is one in the regular Sunday-afternoon program of the museum during the winter, and will be open free to the public.

MED FRATERNITY  
ELECTS 25 TOP  
'U' STUDENTS

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---Twenty-five medical students at the University of Minnesota were elected into Alpha Omega Alpha, national medical fraternity, last week.

The students, either juniors or seniors in the University's medical school, were cited in "recognition of their academic achievement and high personal qualifications."

Alpha Omega Alpha, a medical fraternity similar to Phi Beta Kappa in its annual recognition of academic excellence, also confers the award to alumni and faculty for distinctive achievements in medicine and to eminent leaders in medicine and the allied sciences.

Its aim and purpose is to attain the highest ethical and professional standards within the field of medicine by exemplifying its motto: "To be worthy to serve the suffering."

Electees from Minneapolis were:

Joseph H. Greenberg, 9145 W. Highway 55, senior  
Stuart Westburg, 3501-47th ave. N., senior  
Sheldon P. Block, 4319 Cedarwood rd., senior  
David S. Cannon, 6224 Hamilton, senior  
Mrs. Carolyn Levitt, 93 Orlin ave. SE., senior  
Paul B. Batalden, 2801 S. 8th st., senior  
Mark W. Mahowald, 2312 S. 6th st., junior  
John Zurek, 3006 James ave. N., junior  
John C. Keohane, Jr., 5156-30th ave., junior  
Richard S. Gregory, 2315 Oliver ave. S., junior  
Thomas C. White, 2716 Irving ave. N., junior  
Richard J. Kostick, 6111 Halifax ave. S., junior

(MORE)

Electees from St. Paul were:

Andre J. Nelson, 805 Holton ave., senior  
Victor H. Tschida, 115 S. Victoria ave., senior  
Bruce Zimmerman, 1956 Portland ave., senior  
Lee R. Wales, 325 Brimhall st., junior  
Keith W. Johnson, 1480 Iowa W., junior

Other electees were:

David G. Nielson, Evanston, Ill., senior  
A. Todd Davis, Sparks, Nev., senior  
Joseph M. Vigneri, Decatur, Ill., senior  
John F. Greden, Rolling Stone, Minn., senior  
George S. Eugster, Mound, Minn., senior

NATIONAL TEACHER  
EXAM REGISTRATIONS  
DUE SOON

(FOR IMMEDIATE RELEASE)

Minneapolis---Prospective teachers who plan to take the National Teacher Examinations at the University of Minnesota on Saturday, March 18, are reminded that their registrations for these tests must be received not later than Friday, Feb. 17, according to Professor Theda Hagenah, assistant director of the University's Student Counseling Bureau.

Registration to take the tests must be sent to the Educational Testing Service, Box 911, Princeton, N.J., Professor Hagenah advised. Bulletins of information describing registration procedures and containing registration forms may be obtained from the Student Counseling Bureau, 101 Eddy hall, University of Minnesota, Minneapolis, 55455, or can be requested directly from the Princeton office.

The University of Minnesota does not require prospective teachers to take this examination.

At the one-day session of examinations, a candidate will take the Common Examinations which include tests in professional and general education, and one of the 13 Teaching Area examinations which are designed to evaluate the prospective teacher's understanding of the subject matter and methods applicable to his particular area.

- Mon. -- Feb. 13 -- Religious lecture series, "Who Is Jesus Christ?" Today's lecture-debate by Glen Zumwalt, Oklahoma State University, and Douglas Lewis, assistant professor of philosophy, University of Minnesota, on "Jesus Christ: Demented or Divine?" 12:15 p.m., Northrop auditorium. Free.
- Mon. -- Feb. 13 -- Special lecture---"Language and Nationality in Yugoslavia" by Professor Thomas F. Magner, Pennsylvania State University; 3:30 p.m., 201 Folwell. Free.
- Mon. -- Feb. 13 -- Illustrated lecture---"Fakes and Forgeries in Oriental Archaeology and Art;" Professor Millard B. Rogers, director, Center for Asian Arts, University of Washington; 8:30 p.m., Murphy auditorium. Free.

(MORE)

- Mon. -- Feb. 13 -- "Italiano dell' Arte"---Opening, art sale of works of University faculty, students and local professional artists' donations. 5-7 p.m. Coffman Union gallery. Show open through Friday. Free. Film;"The Brig," two performances, 12:15 and 3:15 p.m., C.M.U. main ballroom, 50 cents or more admission at door. Panel discussion between three local art professors of Florence art treasures damaged by the floods; 2:15 p.m., Coffman Union gallery. Donation.
- Tues. - Feb. 14 -- University Theatre---Opening, "A Handy Girl to Have Around," 8 p.m., Shevlin Arena theatre. Through Saturday. Tickets.
- Tues. - Feb. 14 -- Religious series. "Who Is Jesus Christ?" today's lecture by Oklahoma State Professor Glen Zumwalt, "Suffering Servant or Divine King?" 12:15 p.m., Coffman Union main ballroom. Free.
- Wed. -- Feb. 15 -- University Film Society---"Entreact," (Rene Clair) and "Smiling Madame Beudet" (Germaine Dulac), French '20's avant garde; 3:15 p.m., Museum of Natural History auditorium. Tickets.
- Wed. -- Feb. 15 -- University Dads' Association monthly meeting; "The International Commitment of University Students" will be discussed by a panel of students and Dean of Students Office advisers; 7:30 p.m., Coffman Union men's lounge. Reservations required for refreshments following meeting.
- Wed. -- Feb. 15 -- Religious series. "Who Is Jesus Christ?" today's lecture by Oklahoma State Professor Glen Zumwalt, "Self-centered or Other-centered?", 12:15 p.m., Mayo aud. Free.
- Wed. -- Feb. 15 -- "Italiano dell' Arte" Kaffee Konzert, Madrigal Singers, 11:15 a.m. and 12:15 p.m., Coffman Union main ballroom. Donation. Fellini Film Festival: "Nights of Cabiria" and "Love in the City;" 2:15 and 7 p.m., Coffman Union main ballroom, \$1 admission at door.
- Thurs.- Feb. 16 -- Convocation---Jose Molina Bailes Espanoles---a program of 15 dancers, singers and instrumentalists in a program of songs and dances from all of the Spanish provinces and all ages of Spanish history; two performances, 2:15 and 3:15 p.m., Northrop auditorium. Free.
- Thurs.- Feb. 16 -- Religious Series. "Who Is Jesus Christ?" today's lecture by Oklahoma State Professor Glen Zumwalt, "Savior or Sincere Demagogue?" 12:15 p.m., Coffman Union main ballroom. Free.
- Fri. -- Feb. 17 -- "Italiano dell' Arte" Film, "Seduced and Abandoned," 2:15 and 4:15 p.m., Coffman Union main ballroom. Donation, 50 cents. Concert: University's Concert Band Ensemble, Northrop auditorium, 8:30 p.m. Donations will be accepted.
- Fri. -- Feb. 17 -- University Film Society---"Lotna" and "The Lady Vanishes;" 7:30 p.m., Museum auditorium. Tickets.
- Fri. -- Feb. 17 -- University Theatre---"A Handy Girl to Have Around," two performances, 3:30 and 8 p.m., Shevlin Arena Theatre. Tickets.
- Fri. -- Feb. 17 -- Religious Series. "Who Is Jesus Christ?" today's lecture by Oklahoma State Professor Glen Zumwalt, "Frustrated Revolutionary?" 12:15 p.m., Coffman Union main ballroom. Free.
- Sat. -- Feb. 18 -- University Theatre---"A Handy Girl to Have Around," 8 p.m., Shevlin Arena theatre. Tickets.

BOTANY PROF 22 YEARS,  
DAHL TO LEAVE U OF M

(FOR RELEASE AT 10 A.M. FRIDAY, FEB. 10)

For further information, contact:  
NANCY PIRSIG

Minneapolis---A. Orville Dahl, botany professor at the University of Minnesota for 22 years and former chairman of the botany department, has resigned to take a post at the University of Pennsylvania. He will become professor of botany and director of the Morris Arboretum connected with the University of Pennsylvania, beginning April 1.

Professor Dahl is well known in Minnesota for his work on allergy pollens. He developed the annual "pollen count" which was carried out for many years by Miss Agnes Hansen, and he has worked closely with other University allergists in connection with various problems involving pollen-induced allergies.

At Pennsylvania, Dahl will continue work on a research project for the National Aeronautics and Space Administration (NASA) involving a biosatellite series. The project was begun in 1963 by Dahl and Professor Allan H. Brown, chairman of biology at Pennsylvania who was then at the University of Minnesota.

The pair plans to send up the first of two biosatellites sometime in 1968. They will be measuring the effects of a completely weightless environment on the development of organisms, "a unique opportunity to gather totally new information," says Dahl. The satellite will go into orbit for three weeks and then will be brought back to earth for study.

In 1957-58 Professor Dahl spent a year in Denmark doing research on pollen grain structure, and "was a pioneer in research on the fine structure of pollen grains," according to Professor Ernst Abbe, botany department chairman. "He also has done excellent work in cytology, or the study of cells and chromosomes."

Abbe added that Dahl is "an outstanding teacher whose classes are always over-subscribed. His value to the department is beyond description."

Dahl served as chairman of the botany department for nine years, until 1957, and has been active on various University committees, including those which reorganized biology into the College of Biological Sciences and which formed the Council on Liberal Education. From 1946 to 1956 he served on the pollen committee of the American Academy of Allergy, and he has participated in numerous international botany meetings.

He also is well known as a lecturer, especially for his talks to men's garden clubs, and is active in Torske Klubben, a Norwegian dining club. A native of Minneapolis, Dahl, 56, lives at 3909 Fourteenth ave. S.

ECOLOGY, BEHAVIORAL  
BIOLOGY DEPARTMENT  
SET UP AT U OF M

For further information, contact:  
GERALD KNOX

(FOR RELEASE AT 10 A.M. FRIDAY, FEB. 10)

Minneapolis---Alan J. Brook, professor of botany in the University of Minnesota's College of Biological Sciences, today was named by the Board of Regents to head a new department of ecology and behavioral biology, the first of its kind in the nation.

Brook, 43, will begin formation of the new department to be effective spring quarter, 1967. He presently is chairman of the ecology program in the college.

The faculty and office of the department will be centered in the Minnesota Museum of Natural History on the Minneapolis campus. Some of the research activities of the museum, recently added to the college, will become closely integrated with those of the new department. There also will be strong ties between the new department and the Lake Itasca Forestry and Biological Station and the Cedar Creek Natural History area.

The department will be staffed with a select faculty from both within and without the college, and as such will be strongly interdisciplinary. Initially only degree programs on the graduate level will be offered, but considerable emphasis also will be placed on offering basic courses in ecology for students in the biological sciences. Later it is planned to offer ecology courses to students in education, anthropology, economics, engineering, political science and public health. "This area of biology, above all others," said Brook, "should constitute a part of the 'general education' of all students."

(MORE)

Ecology is the science concerned with the interrelations of organisms (plants and animals, including man) and their environments. The environment may be defined as the sum of all external forces or conditions (such as sunlight, rainfall) which act upon an organism, or a group of organisms.

Communities of plants and animals, living together in the environment which controls them, are termed ecosystems. Ecosystems can be of any size, from a test tube containing a pure culture of bacteria or algae to a tropical rain forest, but independent of its size an ecosystem operates as a whole unit with its biological and physical aspects intimately bound together. It is this "web of life" which forms the substance of ecology.

Behavioral biology is closely related to ecology because of its concern with the effects of the environment on animals. Behavioral biologists are especially interested in learning about the environmental factors responsible for animal movements, be it within a limited territory or the long-range migration of birds. They also are interested in other behavioral patterns, such as courtship and aggression. The significance of all these actions must be measured in relation to the ecology of the animals.

"Alan Brook comes to the head of this department with a distinguished career in the field of ecology," said Richard S. Caldecott, dean of the College of Biological Sciences. "He was the unanimous choice of the faculty of the college to lead the development of this new department, and I am pleased to concur with their choice."

"We anticipate that this department will become a most important focal point," continued Caldecott, "for the bringing together of faculty members interested in environmental science."

(MORE)

Brook joined the University of Minnesota in 1964 as an associate professor of botany and associate curator of algae. He received a bachelor of science degree (with honors) in 1942 and a doctor of philosophy degree in 1949, both from the University of Durham, Scotland. He also received a doctor of science degree in 1960 from the University of Edinburgh, where he taught before coming to Minnesota.

Brook also taught at the University of Khartoum, Sudan, from 1949 to 1952, and was senior botanist at Scotland's Freshwater Fisheries Laboratory from 1952 to 1958.

Brook is a fellow of the Royal Society of Edinburgh, and was executive secretary of the Tenth International Botanical Congress held in Edinburgh in 1964. He is a member of numerous national and international scientific societies, and at the University he is chairman of the Cedar Creek Natural History area advisory committee and a member of advisory committees concerning the Water Resources Research Center and the Limnological Research Center.

Brook has written more than 40 scientific papers, mainly on the ecology and other aspects of the biology of freshwater algae. He is the author of a textbook, "The Living Plant," published in 1964 by Aldine Press of Chicago and the University of Edinburgh.

PROF KWIAT LECTURES  
IN INDIA, JAPAN

Joseph J. Kwiat, professor of English and American studies at the University of Minnesota, recently returned from a five-week around-the-world trip during which he lectured, participated in conferences on American literature and American studies, and observed the "tremendous interest" in these subjects in various countries.

Professor Kwiat addressed the plenary session of the All-India English Teachers' Conference on the topic "America's Cultural Coming of Age: A View From an American Studies Bridge." The conference was held at Osmania University, Hyderabad, India, with which the University of Minnesota has an exchange program. Also at Hyderabad, he presented a paper on American literature and directed a symposium on "Indian Interpretations of American Literature" for invited senior professors and scholars; and served as a consultant for the active American Studies Research Centre, set up at Osmania University.

In January, he presented two papers and directed a week-long Seminar in American Literature planned by the English department of Delhi University for English faculties of its affiliated colleges. Earlier, he had lectured at Tsuda College, Tokyo, Japan, and participated in the annual dinner of Japanese professors of American literature. On his way back to the United States, Kwiat observed the academic interest in American literature and American studies in Greece and Iran. Everywhere, he commented, he found "a very sophisticated response to American literature."

NEWSPAPER GUILD'S  
INTERNATIONAL ROLE EXPLORED

The role of the American Newspaper Guild in international affairs is the subject of an article in the winter issue of Journalism Quarterly. Author is Sam Kuczun, assistant professor of journalism at the University of Colorado, whose doctoral dissertation at the University of Minnesota was on this subject. Kuczun points out that the guild's contributions to international journalism were insignificant during its early years, but have expanded greatly since World War II, ranging from educating newsmen of emerging nations to feeding starving newsmen.

HOW-TO-LEARN PROGRAM  
SET UP FOR WOMEN  
RETURNING TO COLLEGE

UNIVERSITY OF MINNESOTA  
NEWS SERVICE-220 MORRILL HALL

TELEPHONE: 373-2137  
FEBRUARY 13, 1967

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Women who are planning to return to college now can sign up for a special program designed to reorient them toward classroom learning.

Titled "New Modes of Learning," the seminar will be offered at the MacPhail Center, Twelfth and LaSalle, Minneapolis, by the Continuing Education for Women program of the University of Minnesota's General Extension Division. The sessions will be held five Thursday mornings and two Thursday afternoons, beginning Feb. 23.

Subjects to be taken up at the seven sessions will include listening and note taking, written communication, results of study skills research, memorizing, and test taking, and will emphasize improvement in reading skill. Seminar coordinator is Assistant Professor David Wark of the University's Reading and Study Skills Center.

Meeting dates and times will be 9:30 a.m. to noon Feb. 23; 1 to 2 p.m. Feb. 23; 9:30 a.m. to noon March 2; 9:30 a.m. to noon March 9; 9:30 a.m. to noon March 16; 9:30 a.m. to noon March 30; and 1 to 2 p.m. March 30. (No session on March 23 because of spring vacation.)

Applications for "New Modes of Learning" must be received by Monday (Feb. 20). Those interested should write to Mrs. Louise Roff at 310 Nolte Center, University of Minnesota, Minneapolis 55455, or call her at 373-5166.

"This seminar would be a particularly good introduction for people who are planning to take one of our Women's Seminars next year," said Mrs. Roff, director of Continuing Education for Women. The Women's Seminars, designed to reacquaint women who are returning to college with the world of ideas, include five year-long seminars, usually held once a week.

The five now being planned for next year are Arts and Reading, Worlds of Knowledge, Culture and Society, Ideas in America, and Art and Perception. (The first four are offered for credit.) Registration is now open for these and anyone who wants more information can write to Mrs. Roff.

DR. LILLEHEI TO PRESENT  
CARDIOLOGY COLLEGE AWARD  
TO PRESIDENT JOHNSON

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---Dr. C. Walton Lillehei, professor of surgery at the University of Minnesota and president of the American College of Cardiology, will present the first Distinguished Service Award of the college to President Johnson on Thursday (Feb. 16) in Washington, D. C.

Dr. Lillehei, noted Minnesota heart surgeon and educator, will make the presentation to President Johnson in a brief ceremony for his support of programs in the fields of diagnosis, treatment and research in heart disease.

The presentation will be part of the sixteenth annual scientific session of the college which will meet in Washington, D. C., Wednesday through Sunday (Feb. 15-19). The annual session will consist mostly of scientific sessions devoted to presenting new findings in research and clinical cardiology to members of the college, in order to help them keep abreast of new developments in heart disease diagnosis and treatment.

The college also will honor Vice President Hubert H. Humphrey with the presentation of its annual Gold Medal. Mr. Humphrey will deliver the convocation lecture Saturday evening (Feb. 18), prior to the installation of the college's new president.

At the convocation Saturday evening, Dr. William Likoff of Philadelphia, Pa., will be installed as college president. Dr. Likoff is professor of medicine at Hahnemann Medical College and director of its cardiovascular institute. Dr. Lillehei will become past president of the college.

The annual session is one of the many activities supported by the college, which was founded in 1949 to further the education of physicians who are specialists in the diagnosis and management of diseases of the heart and blood vessels. Membership in the college now consists of 3,000 physicians and scientists.

MELENDY LECTURE  
TO BE GIVEN BY  
LOCAL PHARMACIST

(FOR IMMEDIATE RELEASE)

Henry H. Gregg, a leading local pharmacist of national repute, will give the annual Samuel W. Melendy Memorial Lecture in pharmacy at the University of Minnesota this week, sponsored by the University's College of Pharmacy.

Gregg's lecture, titled "Serendipity in Pharmacy," will be given at 6:30 p.m. on Wednesday (Feb. 15) in the Campus Club of Coffman Memorial Union, Minneapolis campus. Invited guests also will have dinner in the Campus Club.

Gregg, who operates his own pharmacy in Edina, has had a long and active career in pharmacy organizations. He was secretary of the Minneapolis Retail Druggists Association in 1927 and president in 1930; chairman of the interprofessional relations committee of Hennepin county and later of the Minnesota Pharmaceutical Association; vice president of the American Pharmaceutical Association (APhA) in 1940; member of the APhA Council from 1940 to 1950; and president of APhA in 1950-51, serving 16 months.

He also served in various offices of the American College of Apothecaries, becoming president in 1960 and serving 18 months. He recently received the highest award of that college, the J. Leon Lascoff Award, given in recognition of exceptional and outstanding accomplishments for the advancement of pharmacy.

(MORE)

The Melendy Memorial Lecture was established in 1942, in memory of the owner of the Minneapolis drug firm of Melendy and Lyman. Melendy, a moving spirit in the establishment of the College of Pharmacy at the University in 1892, also has provided scholarships and fellowships for students in pharmacy through the Melendy Memorial Fund.

The Melendy lectureship brings to the campus a pharmacist of national repute who, through experience in many national organizations, has acquired an overview of the pharmacy profession and the steps the profession is taking to meet the increasing demands for better health care.

One of the early lecturers, Frederick J. Wulling, former dean of the college, made a fitting tribute to Mr. Melendy in these words: "The benefits of the Melendy bequests reach not only to the University, the College of Pharmacy, and the Melendy scholars and fellows; but, through advancement of standards, through these as a leaven and through their creative influences, to pharmacy at large, especially to the ethical and professional aspects of pharmacy."

'U' PRESIDENT NOMINATES 3  
FOR U.S. NAVAL ACADEMY

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---Three University of Minnesota Naval Reserve Officers Training Corps (NROTC) midshipmen have been nominated for appointment to the United States Naval Academy by University President O. Meredith Wilson, according to Captain James M. Marshall, professor of naval science and commanding officer of the NROTC unit.

Midshipmen James L. Blakesley, Alan D. Kunkel and Frederick J. Leach earned the nominations by outstanding performances in the NROTC unit, Capt. Marshall said.

Midshipman Leach, son of Mr. and Mrs. Howard F. Leach, 1040 E. Fifth st., St. Paul, is a 1966 graduate of Hill high school and a freshman in the University's Institute of Technology majoring in aeronautical engineering.

Midshipman Blakesley is the son of Mr. and Mrs. Leo J. Blakesley, Little Pine route, Aitkin. A 1965 graduate of Aitkin high school, he is a freshman in the Institute of Technology majoring in mechanical engineering.

Midshipman Kunkel, son of Mr. and Mrs. Elmer F. Kunkel, route #1, Adrian, is a 1966 graduate of St. Adrian high school and a freshman in the Institute of Technology, majoring in mathematics.

Annually, Capt. Marshall said, the presidents of each of the 52 colleges and universities sponsoring Naval ROTC units may nominate a limited number of students to compete for appointment by the Secretary of the Navy to the Naval Academy. Ten of this year's nominees will be appointed to enter the academy next June.

The three University midshipmen were recommended to President Wilson on the basis of their outstanding grades and their aptitude for naval service.

WISCONSIN PROF  
TEACHING AT 'U'  
JOURNALISM SCHOOL

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Bruce H. Westley, professor of journalism at the University of Wisconsin, is now serving as a visiting professor in the School of Journalism and Mass Communication at the University of Minnesota. He began his stay Feb. 1 and will remain through spring quarter.

Westley is a specialist in editing, mass communication theory and communication research methods. He holds a bachelor of philosophy degree from the University of North Dakota (1938) and a master's degree from Columbia University (1941). He completed several additional years of advanced study in social psychology at the University of Michigan.

From 1957 to 1959 Westley served as chairman of the Council of Communications Research for the Association for Education in Journalism, and from 1961 to 1962 was chairman of the research committee of the National Association of Educational Broadcasters.

Westley is the founding editor of "Journalism Monographs" and is currently associate editor of the "Journalism Quarterly."

According to Professor Robert L. Jones, director of the School of Journalism and Mass Communication, Westley "will offer seminars in mass communication theory and research methods, will assist the school in a general review of its graduate program and will advise the school in a reorganization of its communications research division."

ARLE HAEBERLE  
FELLOWSHIP OPEN  
FOR GRADUATE WORK

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---Applications for the Arle Haeberle Fellowship in Speech, Journalism and Theatre Arts at the University of Minnesota are due in the University's Graduate School Fellowship office by Wednesday, March 1, according to Paul O. Marschke, fellowship adviser.

The fellowship will pay a stipend varying from \$200 to \$600 per year to a senior women student for graduate study in speech, theatre arts or journalism at the University, Marschke explained. The recipient should be preparing for a career in broadcasting.

The Arle Haeberle Fellowship has been established by WCCO television and by friends and relatives of the late Miss Haeberle, well-known television and radio personality associated with WCCO-TV and WCCO Radio until her death in 1962.

A pioneer in Twin City broadcasting, Miss Haeberle had been employed by Midwest Radio-TV, Inc., since 1937 and had served the last 14 years as director of women's activities for the organization. Her "Around-the-Town" television program began in 1949 and was the longest-running continuous program on Twin City television.

Mary Margaret Sweitzer, 1347 Shryer ave. W., Roseville, was named as first recipient of the Arle Haeberle Fellowship in 1966 and currently is attending the University as a graduate student.

U OF M MEDICAL SCHOOL FORMS DIVISION  
OF FAMILY PRACTICE, COMMUNITY HEALTH

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---A division of family practice and community health has been formed in the University of Minnesota's College of Medical Sciences, it was announced today by Dr. Robert B. Howard, dean of the college.

The new division, in the department of medicine in the college, will concentrate its activities on providing medical doctors trained to treat and understand the needs of patients searching for general medical help. The division was officially created by the administrative committee of the college on Feb. 1, and was explained to the full house appropriations committee of the Minnesota State Legislature on Feb. 6.

A director for the division has not yet been named.

"It has become apparent that there is a public demand---both locally and nationally---for the medical profession to reevaluate its methods of educating physicians," said Dr. Howard. "The expectations of the public are clear. The formation of our new division is one step toward meeting that expectation."

The problem of declining general-practice physicians serving the public has concerned the medical community for a number of years. According to the U. S. Public Health Service, physicians considered to be in general practice have declined from 71.7 per cent in 1931 to 34.7 per cent in 1959. In Minnesota, as cited in the 1966 Hill Family Health Manpower Study for the Upper Midwest, general practitioners declined from 95 per cent in 1910 to 41 per cent in 1960.

The Hill report went on to say: "While the University of Minnesota has supplied an increasing proportion of all of Minnesota's doctors, its contribution to general practice has been more striking. The proportion of the State's general practitioners who are Minnesota graduates has risen steadily from about 25 per cent in 1910 to 65 per cent in 1960, and even slightly higher in 1965."

(MORE)

"Yet," said Dr. Howard, "the decrease in physicians in general practice, both in proportion and number, has created an issue of deep and complex implications. At the center of the issue is the increased tendency of physicians to specialize in their practice of medicine, for a wide variety of reasons."

"This trend toward specialization is neither enforced nor arbitrary," said Dr. Howard, "but rather it stems principally from a basic human urge to understand as much as possible about the work one has chosen to call his own."

Dr. Richard V. Ebert, head of the department of medicine and chairman of the educational policy committee of the college, said, "We are considering broad changes in the curriculum of the medical school, and one aspect to receive immediate attention is the education of physicians to become family and community doctors. The committee is now hearing all the voices of change."

"We feel the University of Minnesota's medical school," continued Dr. Ebert, "has a responsibility to respond to the needs of the community, and we must examine very closely recommendations of various groups to meet those needs."

The University has asked the current State Legislature for \$50,000 a year for a two-year study into the problems associated with the establishment of a family practice program. If it is passed by the Legislature, a director will be appointed from among the ranks of Minnesota's practicing physicians to lead this study.

The establishment of the new division forms the administrative framework in which a study can be started to determine the needed facilities, personnel and programs. Factors slated for consideration include problems of the practicing physician, especially those of the family physician; a careful study of the experience of other states with incentive programs, preceptorship programs, and programs of general or family practice; the determination, in concert with national activities of a similar nature, of the appropriate curriculum for modern-day family practice; and, finally, education of medical students toward a specialization in general medicine designed to provide treatment of the "whole man."

"This new type of physician," said Dr. Howard, "will be responsible for the treatment of common medical ailments, patients of any age, family problems, and preventive medicine. He would embody elements of practice now considered part of internal medicine, pediatrics, psychiatry, obstetrics and gynecology. He also would render emergency care in case of injury, but would practice surgery on a very limited basis."

The community-health activities of the new division will provide avenues for research into social and economic aspects of personal, family and community health problems.

The comprehensive clinic in the University's medical school, now a part of the undergraduate program of medical education, is designed to give medical students experience with patients seeking help for a wide range of ailments, from the merely inconvenient to the crippling and fatal. This clinic, started in 1960 and directed by Dr. Richard Magraw, is a type of general-practice service certain to be important in the development of the new division.

Dr. Magraw is a nationally recognized physician in the field of comprehensive medical care, and is the author of the award-winning book, "Ferment in Medicine," which deals with problems of modern general practice.

Two reports by the American Medical Association (AMA) and one by the National Health Council and the American Public Health Association (NCHS) have recommended that greater emphasis should be placed on the education of family (or primary) doctors. The AMA reports are the Report of the Citizens Commission on Graduate Medical Education (Millis report) of Aug. 1, 1966, and the Report of the Ad Hoc Committee on Education for Family Practice, September 1966. The NCHS report, "Health Is a Community Affair," was published in early 1966.

HIGH SCHOOL PRESS  
GROUP TO MEET  
AT 'U' FEB. 22

(FOR IMMEDIATE RELEASE)

Minneapolis---The annual conference of the Minnesota High School Press Association (MHSPA) and the Journalism Advisers of Minnesota (JAM) will be held Wednesday, Feb. 22, at the School of Journalism and Mass Communication, University of Minnesota.

Student delegates from high schools throughout the state will attend six hours of workshop sessions conducted by JAM members and a number of the faculty members in the School of Journalism and Mass Communication. The sessions will consist of instruction in newspaper and yearbook writing, layout, typography and photography. In addition, WCCO-TV will hold its annual broadcast conference during the morning sessions, featuring WCCO's radio-TV newscasting team.

William Sanders, president of the National Association of Editorial Cartoonists and chief editorial cartoonist for the Kansas City Star, will be the feature speaker at the awards banquet which will wrap up the conference Wednesday evening. Also at the banquet, WCCO will announce the winner of its television scholarship.

HOLT NOMINATED  
TO DIRECT NEW  
'U' RESEARCH CENTER

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Dean Willard W. Cochrane, University of Minnesota dean of International Programs, recommended to President O. Meredith Wilson and the Board of Regents today the appointment of Professor Robert T. Holt as director of the Center for Research in Technological Development and Social Change.

A Center for Technological Development and Social Change is being established at the University of Minnesota with funds provided by a grant from the Ford Foundation. The center is designed to be a focal point for interdisciplinary research involving scholars from the University in several departments and colleges working on related problems of social change.

Although the research program has not yet been developed in full detail, a number of projects are in the planning stage that will be conducted through the auspices of the new research center.

Holt is a University professor of political science and will retain his affiliation with the political science department on a half-time basis. He has done research and writing in the area of international politics and totalitarian political systems and for the last few years has been centering his attention on problems of political and social development.

He is primarily interested in the interaction between theoretical development and empirical field research. His most recent publication reflecting these interests is "The Political Basis of Economic Development," a book co-authored with Professor John E. Turner.

ROMANIAN FILES, RECORDS  
GIVEN TO MINNESOTA ARCHIVES

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---An important new Romanian gift to the Immigrant Archives of the University of Minnesota was announced today by Professor William E. Wright, director of the University's Center for Immigration Studies.

The Union and League of Romanian Societies of America, Inc., of Cleveland, Ohio, has designated the University's Immigrant Archives as the depository for permanent preservation of all its early records and publications. Included are a complete file of the newspaper Amerika, a large quantity of miscellaneous pamphlets and books, and inactive files of historical records pertaining to the history of the Union and League and its parent and affiliate organizations.

Bishop Valerian Trifa of the Romanian Orthodox Episcopate of America has recently presented to the Archives a nearly complete file of all the publications issued by his diocese since 1929, including the newspaper Solia, as well as the file of an important early newspaper, Steaua Romana, published in New York City. Bishop Trifa is at present gathering and putting in order for preservation at the Minnesota Center the inactive manuscript archives of his diocese, as well as papers and publications of many congregations.

Meanwhile, Monsignor George Babutiu, pastor of the Most Holy Trinity Catholic Church in Cleveland and a leader in both the American Romanian Catholic Association and the Romanian Catholic Priests' Conference, has assembled extensive sets of the publications of these two organizations for the Archives. And the Reverend Vasile Pascu, pastor of the Romanian Baptist Church in Cleveland, is doing the same for Romanian Protestants in America.

(MORE)

Professor Timothy L. Smith, of the University's Center for Immigration Studies, who negotiated the transaction with the Union and League, and Professor Wright have announced that the University will establish a Romanian Room to house the section of the archives devoted to this nationality. The collection thus will bring together for permanent safety and for important historical research the records of a complete cross section of the Romanian people in the United States.

The Center for Immigration Studies is engaged in preserving on microfilm the crumbling newspaper files of American foreign-language newspapers of many nationalities as well as gathering manuscript and other records of immigrant organizations in America. Some progress also has been made in the photo-duplication of archives in European depositories.

The operations of the center are financed in part by University funds, in part by grants from the Hill Family Foundation of St. Paul, and in part by research awards and contracts from the United States Office of Education and other private foundations. A committee of seven historians and social scientists, led by Professor Wright, are responsible for the promotion of the enterprise.

MINABLE TACONITE  
LIMITS EXTENDED  
BY 'U' TEST DRILLING

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

The first drill hole was recently completed in a University of Minnesota program of investigation and exploration of the deep-lying taconite formations on state-owned mineral reserves along the southern edge of the Mesabi range.

According to Eugene P. Pfleider, professor of mineral and metallurgical engineering and principal investigator of the project, and Professor Paul K. Sims, director of the Minnesota Geological Survey, this hole proves the down-dip extension of the iron formation in this section of the range, and extends the potential for minable taconite some two to three miles south of the previously drilled limits.

The entire project, estimated to cost \$322,000 over a four-year period, is being conducted by the School of Mineral and Metallurgical Engineering, the Minnesota Geological Survey, and the Mines Experiment Station of the University of Minnesota, who are requesting the additional \$222,000 from the Legislature this session.

The initial hole, located a mile and a half south of Keewatin, had a total depth of 1,437 feet and passed through 591 feet of taconite formation. The geologists' log showed the following rock strata:

	Glacial Drift	0 - 213
	Virginia Slate - possibly upper slaty	213 - 790
MESABI IRON FORMATION	Upper Cherty, Horizon	790 - 917
	Lower Slaty, Horizon	917 - 1061
	Intermediate Slate	1061 - 1068
	Lower Cherty Horizon	1068 - 1302
	Red Basal Taconite	1302 - 1381
	Pokegama quartzite	1381 - 1437

(MORE)

The drilling was done by the E. J. Longyear Co. of Minneapolis, who obtained the contract on a bid basis from the University to complete some three to four deep holes by April of this year. This phase of the project was financed by a \$100,000 appropriation by the Department of Iron Range Resources and Rehabilitation on the recommendation of A. M. DeYoannes, commissioner. This represents the first phase of a long-range research program involving the drilling of ten deep holes on state-owned mineral reserves along the 100-mile length of the Mesabi.

The project was initiated during the last legislative session, when a group of state senators (including Henry T. McKnight, Thomas D. Vukelich and Donald Wright) and state representatives (including Fred Cina, Jack Fena, Peter Fugina and Loren Rutter) sponsored companion bills in the Senate and House to determine the full extent of Minnesota's taconite resources. The measure, known as the "deep hole bill," was based on a recommendation in the mineral task force section of a 1962 study by the Minnesota Natural Resources Council, appointed by former Governor Elmer L. Andersen.

Senator McKnight, who served as chairman of the council, declared that the bill would serve to implement the Taconite Amendment by initiating a program to determine the full extent of Minnesota's ore resources.

"The Mesabi is a mystery below depths of 1,000 feet," said McKnight, "but there is enough data to indicate that deep-lying formations to the south offer a taconite reserve of tremendous proportions." A 2,745-foot hole drilled south of Biwabik in 1909 passed through 547 feet of taconite formation, but no records remain of the grade of magnetic iron content.

The bill provided funds for the study of the cores from earlier deep holes, the drilling of new holes to depths of 1,000 to 3,000 feet, the study of these new cores, and the preparation of a report, but the Legislature failed to take action on the bill. The project was delayed until June, 1966, when the Iron Range Resources and Rehabilitation Commission provided the funds.

LIST OF UNIVERSITY OF MINNESOTA MINNEAPOLIS CAMPUS PUBLIC EVENTS  
WEEK OF FEB. 18-25

- Sat. -- Feb. 18 -- University Theatre---"A Handy Girl to Have Around,"  
Shevlin Arena theatre, 8 p.m. Tickets.
- Sun. -- Feb. 19 -- University Theatre---Final performance, "A Handy Girl  
to Have Around," 3:30 p.m. Shevlin Arena. Tickets.
- Sun. -- Feb. 19 -- Concert---University Symphony Bands, 4 p.m., Northrop  
auditorium. Free.
- Sun. -- Feb. 19 -- Minnesota Museum of Natural History Sunday Program: Dr.  
Theodore Olson, professor of public health biology,  
discusses "The World's Quest for Water;" 3 p.m.  
Museum auditorium. Free.
- Sun. -- Feb. 19 -- Religious lecture series---"World Religions View  
Contemporary World Problems;" today's discussion, "Women  
in Society," discussants from Muslim, Christian,  
Buddhist and Baha'i faiths; 8 p.m., Coffman Union men's  
lounge. Free.
- Mon. -- Feb. 20 -- University Gallery---Two shows---Balthus: "La Toilette  
de Cathy" and M.F.A. Thesis show of work by Donald  
Schule. Third-floor galleries, Northrop auditorium.  
Open school hours weekdays. Free.
- Wed. -- Feb. 22 -- Washington's Birthday---University holiday.
- Thurs.- Feb. 23 -- University Theatre---Opening, "Macbeth;" through Sat-  
urday, 8 p.m., Scott hall. Tickets.
- Fri. -- Feb. 24 -- University Film Society---"Italian Straw Hat" (1927,  
France) plus second film to be announced. 7:30 p.m.,  
Museum auditorium. Tickets.

New Field Develops---  
MEASURING DUST SPECKS IS SCIENCE  
IN 'U' PARTICLE TECHNOLOGY LAB

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---Measuring a speck of dust might seem an idler's dream to many, but at the University of Minnesota a group of scientists have made it a science.

The Particle Technology Laboratory in the University's Institute of Technology, under the direction of Kenneth T. Whitby, professor of mechanical engineering, is one of only a handful of such laboratories in the nation. Whitby's associates are Benjamin Y. H. Liu and Andrew R. McFarland, assistant professors of mechanical engineering.

Its purpose: to measure and understand the nature of tiny particles wherever they may be found.

The emergence of this relatively new field of technology has been spurred by a number of developments: for example, concern over the pollution of air; contamination of the atmosphere by radioactive fallout; cleansing of equipment to assure its proper operation in ultra-critical situations in space-age technology; and numerous industrial applications ranging from flour milling to air conditioning.

The laboratory Whitby directs deals with the sources, physical properties, sampling, and measurement of solid and liquid particles suspended in a gas. Solid or liquid particles in a gas are generally called aerosols, with the three most common being dusts, smokes and fogs.

Dusts are solid particles. Fogs are formed by liquid particles. Smokes are considered to contain both solid and liquid particles.

(MORE)

While it may seem fairly easy to define these particles (and when one digs even deeper the definitions get more difficult), it is another story finding out where they come from, what they are really like, and how they are dispersed. The key to these questions is measurement---accurate, reliable, and understandable measurement of these particles in their natural environment.

The laboratory has developed a number of devices for measuring particles---several of which have since become commercially available. One device, called a particle size analyzer, is now a standard tool in particle technology.

The laboratory was started by Whitby in the late 1940's, under a grant to study the particle size of flour dust. Today the laboratory supports 10 persons engaged in a wide variety of research, including one project aimed at determining the electrical properties of particles suspended in the air.

The laboratory also is now starting a program into the use of "clean rooms," to determine microcontamination of equipment. A new clean room---designed to be nearly particle-free---has recently been completed under a grant from the Donaldson Company, Inc., of Minneapolis, an air-cleaning equipment manufacturer.

The research work of this laboratory, at the frontier of knowledge in particle technology, promises significant advances in the future.

-U N S-

Note to Editors: There will be an open house for the news media at 2 p.m. on Tuesday, Feb. 21, with demonstrations and the dedication of the Donaldson clean room. Demonstrations will include a ring-of-fire generator; exploding aerosol generators; and cigarette smoke filters. The laboratory is located in room 257 of the Mechanical Engineering building on the Minneapolis campus.

U OF MINN. DOCTOR  
REPORTS ON SHOCK TO  
COLLEGE OF CARDIOLOGY

For further information, contact:  
GERALD KNOX

(FOR RELEASE AT 7 A.M. SATURDAY, FEB. 18)

Minneapolis---Shock, often called the "quiet killer" by physicians who have seen their patients slip into it quickly and with little notice, still remains an almost fatal condition.

But new methods have been developed to both prevent the onset and reduce the death toll of shock, it was reported Friday (Feb. 17) by Dr. Ronald H. Dietzman of the University of Minnesota's Medical Center.

Dr. Dietzman, speaking before physicians at the sixteenth annual meeting of the American College of Cardiology in Washington, D. C., reported a successful method of making sure persons will survive what otherwise would be lethal heart attacks.

The method---"immunize" patients against shock, using certain agents and drugs.

Dr. Dietzman reported the successful immunization of dogs with endotoxin, a common bacterial poison associated with shock caused by severe infections. Dr. Dietzman's studies indicate that while 75 per cent of the cases of shock caused by heart attacks are normally fatal, 100 per cent tolerance to this killer may be achieved through gradual immunization of the patient using the agent endotoxin. (About 3 per cent of heart attack patients go into shock.)

Earlier Dr. Dietzman and his associates (the University of Minnesota group engaged in this research includes Drs. Richard C. Lillehei, Dietzman, Samuel Movsas, John A. Feemster, Jack H. Block, all surgeons, and Phillip Zappa and James Van Cleave, technicians) reported 100 per cent survival of dogs given repeated injections of epinephrine (adrenalin) to shock brought on by heart attacks, 80 per cent survival for shock induced by bleeding, and 70 per cent survival for shock caused by gram negative bacterial infections.

This method of preventing shock could have important practical applications for high-risk surgical patients and, perhaps, for persons certain to be engaged in duty where they may receive severe wounds (for example, combat soldiers).

(MORE)

So far, only animals have been used in this research to prevent shock, but the same principles underlying this research are now being clinically used at the University of Minnesota Medical Center to treat patients in shock. A mobile shock unit, capable of being moved to the bedside of the victim, is now in use to diagnose and treat shock patients.

The prevention and treatment---and even the definition---of shock is a matter of hot debate within the medical community. A working definition of the ailment is that shock is a state in which the circulation of the blood in the human body is unable, for some reason, to supply the needs of human tissues for oxygen and nutrients (food). When this happens, parts of the body begin to die and, usually within a few days, vital organs (kidneys, liver) in the body cease to function, bringing on death.

One sign of a patient in shock is a sudden decrease in blood pressure. Nature counteracts this symptom by an intense constriction of peripheral blood circulation, thereby increasing blood pressure toward normal.

But, while blood pressure is critical in the treatment of shock, and constriction of peripheral circulation---whether natural or induced---assures this, the flow of blood through the arteries and veins of the body to the vital organs must be maintained.

Therefore, treatment of shock by the Minnesota group emphasizes restoring effective circulating blood volume, while maintaining normal blood pressure.

With safer treatment and, in the future, even prevention of shock, the lethal effects of this "silent killer" will be drastically reduced.

HEW GRANT TO U OF M CONTINUES  
TRAINING CENTER FOR COMMUNITY PROGRAMS

(FOR IMMEDIATE RELEASE)

Minneapolis---A federal grant of \$166,000 to the University of Minnesota was announced today in Washington, D. C. The grant will finance the University's Training Center for Community Programs for the next 15½ months, according to Richard J. Clendenen, professor of criminal law administration in the University's Law School.

The federal agency supplying the funds is the Office of Juvenile Delinquency and Youth Development, of the Department of Health, Education and Welfare.

The grant, running from Feb. 15 through May 31, 1968, is the fourth for this project, which previously was known as the Training Center for Delinquency Prevention and Control. The center's new office will be Room 219 Clay School on the University's West Bank.

The center's staff will include a director and 14 other full- or part-time persons. Its projects will include four major and several minor ones. The major projects will be:

- (1) Establishing career training for unskilled persons to serve as aides to professional people such as social workers;
- (2) Training people in the education of Indian youth;
- (3) Job training for disadvantaged youth with the help of Twin Cities labor unions; and
- (4) Developing educational programs for board members of social welfare agencies.

(MORE)

The first of these projects, says Professor Clendenen, will be carried out in cooperation with the University's General Extension Division and General College. "Many professions make use of aides," Clendenen says, "of whom the best-known are nurses' aides. These are extremely useful but usually dead-end jobs."

He points out that many of those who work in the "human service" field---social workers, psychologists, welfare workers, psychiatrists---are burdened with small tasks that do not require lengthy professional training. They could use aides for many of these tasks if they were available.

"Our purpose, then, is to establish the field of 'human-service aides,'" says Clendenen. "But we want it to be a genuine career line which might become a point of entry into these career fields at a lower level than college training, and definitely more than a dead-end job."

The second project, on the education of Indian youth, will involve the University's College of Education and General Extension Division. "As everyone knows, we're confronted with a tremendous dropout rate among Indian young people," says Clendenen. Miss Ada Deer, community services coordinator in the district office of the Bureau of Indian Affairs, will be in charge of this project, with the cooperation of the University's Committee on Indian Affairs.

The third project will be undertaken in cooperation with the Labor Education Service of the General Extension Division. Its aim is "to enlarge the opportunities for disadvantaged youth to participate in job-training programs, including those sponsored by labor unions," says Clendenen. The project will involve the active cooperation of many labor unions in the Twin Cities area. John O'Connell, director of community programs in the Labor Education Service, will spend one-third time as project coordinator.

The fourth project is one that has been requested by various social welfare agencies, particularly those in the health and welfare fields. Their board members, when appointed, frequently do not know the way their agency works or its responsibilities, and are also unaware of the particular social problems it is supposed to deal with.

Thus it is difficult for these people to make decisions or become active board members until they have sat on the board a long time. This program will serve to educate new board members about their field of responsibility.

The director of the Training Center for Community Programs will be announced soon. Other staff members will include Mrs. Esther Wattenberg as assistant director, Mrs. Sally Flax as public information specialist, and Associate Professor George L. Shapiro as a part-time education specialist.

Professor Clendenen joined the University Law School faculty in September 1965, replacing Professor John R. Ellingston who retired. For the preceding five years, Clendenen had been commissioner of child welfare in Kentucky.

Previously, he had taught social work at Ohio State University; been co-director of National Consultants on Youth Welfare, Washington, D. C.; served as director of the U. S. Senate subcommittee to investigate juvenile delinquency; been consultant to and chief of the Juvenile Delinquency Branch of the U. S. Children's Bureau; and been active in a Milwaukee children's center and an Indiana boys' school.

He is currently an adviser to the President's Committee on Juvenile Delinquency and Youth Crime; and serves as adviser or committee member of many professional groups concerned with delinquency and youth training, including the Child Welfare League of America, the National Council on Crime and Delinquency, and the American Public Welfare Association.

A native of LaPorte, Indiana, Clendenen earned a bachelor of arts degree in sociology at Indiana University and a master of social work degree at Western Reserve University, Cleveland.

Clendenen and his wife live at 1928 Glen Paul ave., Arden Hills, with three children of their own: Barry, 22, Charles, 5, and Kathleen, 3; and a niece and two nephews: Marsha, 16, Steven, 15, and Jack, 10.

'U' COACH NAMES  
COLLEGE BOWL TEAM  
TO COMPETE ON TV SHOW

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

One girl and four men students at the University of Minnesota have been selected as members of the University's G.E. College Bowl team, according to team coach Robert L. Scott, professor of speech, communication and theatre arts.

"Making that selection, from the squad of nine that has been working together since the first of the year, is one of the most difficult decisions I have ever had to make," Scott added.

"I still don't know who will be the regular team members and who will be the alternate," he continued. "All five will go to New York City for the television show on Sunday, March 26, and we may not know until the last minute exactly who will go on the air."

G.E. College Bowl team members are:

Phoebe Seilin, Route #3, Antigo, Wis., a junior in architecture.  
Clarence Anderson, 1266 E. Seventh st., St. Paul, a senior in psychology.  
Richard Cox, 3854 Queen ave. N., Minneapolis, a senior in history and Russian.  
Craig Joines, 6434 Westchester circle, Golden Valley, a sophomore in economics.  
Keith Nier, 2279 Hoyt ave., Falcon Heights, a junior in sociology and physics.

The team will appear on local television on Monday, March 6, challenging the wits of The Newshawks, a team of Minneapolis reporters, Scott said. "The live competition, outside of their own group, and the experience of working with the cameras and microphones will be marvelous practice for the real thing."

Making up The Newshawks team are Bob Lundegaard, captain, Lewis Cope, Peter Altman and Peter Vaughan, with Jonathan Friendly as alternate. All are on the staff of the Minneapolis Star and Tribune.

The program will be aired live on the University of Minnesota Hour, 9:30 p.m. Monday, March 6, over KTCA, Channel 2.

U OF M GALLERY  
APPEALS FOR FUNDS  
TO BUY 'COUNT DOWN'

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

"Count Down," Robert Goodnough's heroic-sized painting on loan to the University of Minnesota Gallery, will be "counted out" of the local picture if Minnesota residents don't "count up" the funds so that it can be "counted in" the gallery possessions, according to University Gallery Director Charles C. Savage, III.

The 6 x 9-foot oil, now on display during University Week, 1967, in the lobby of the First National Bank, Minneapolis, has been offered to the University Gallery at \$1,000, which Savage called "a fraction of its true market value."

"The Gallery, in an effort to broaden its small collection, takes this opportunity to ask the citizens of Minnesota for help," Savage continued. "The gallery must ask for gifts because acquisition funds are limited, and this picture---on loan to us---now must either be purchased or returned.

"The University Gallery needs this significant painting. It not only is an excellent example of Goodnough's work but a fine example of the Abstract Expressionist or New York School and therefore valuable in a small study collection."

Robert Goodnough's work is in many good private and public collections, Savage pointed out. The Albright-Knox Art Gallery in Buffalo, N.Y., the Art Institute of Chicago, the New York Museum of Modern Art, the New York University Collection, the Wadsworth Atheneum in Hartford, Conn., and the Whitney Museum of American Art all own his paintings or drawings.

"The University Gallery is making a direct appeal to Minnesotans to give us this painting," Savage concluded. "If you respond, you will aid the University to fulfill its constantly broadening commitment to provide Minnesotans of all ages with a thorough education."

Checks may be made payable to the University Gallery, University of Minnesota, Minneapolis, 55455.

UNION LEADERSHIP  
CLASSES TO START  
NEXT WEEK

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Registration is now open for spring classes in the Union Leadership Academy, according to Associate Professor John J. Flagler, director of the Labor Education Service at the University of Minnesota which sponsors the academy.

Spring classes start next week: Feb. 27 and 28 and March 1. Eight different courses will be offered, five in Minneapolis and three in St. Paul. Each course will be held from 7 to 9 p.m. one night a week, for 10 weeks. This term, all Minneapolis classes will be held in the Minneapolis Public Library, Hennepin ave. and Fourth st. S., and all St. Paul classes will be in the Dairy Industries building on the St. Paul campus.

The Union Leadership Academy is a long-range program of liberal studies "which offer the trade unionist knowledge in the areas of labor law and economics, a deeper understanding of himself, and an appreciation of his own part in changing the world in which he lives," Flagler said.

The eight classes being offered during spring term are as follows:

Minneapolis

St. Paul

"Effective Communications," Mondays

"Logic and Problem Solving," Mondays

"National and World Issues," Mondays

"Understanding the American Economy,"

"The Human Side of Union Leadership," Tuesdays

Tuesdays

"Labor Law and History," Tuesdays

"Union Administration," Wednesdays

"Fine Arts," Wednesdays

"The Human Side of Union Leadership," which deals with the psychology of the individual and his motivations, is suggested as an introductory class, and is a pre-requisite for the course in "Union Administration."

Classes are open to all trade unionists in the Twin Cities area, with the \$15 fee payable either by the individual or by his union. Those who wish to attend may sign up at the first class session, or may register in advance through the Labor Education Service, 423 Business Administration building, University of Minnesota. The Labor Education Service is a unit of the University's Industrial Relations Center and its General Extension Division.

FILM ON DUCKS  
TO BE SHOWN  
AT 'U' SUNDAY

(FOR IMMEDIATE RELEASE)

"The Black Duck," a color sound film produced by Ducks Unlimited, will be shown at the University of Minnesota Sunday (Feb. 26) on the Minnesota Museum of Natural History's regular Sunday-afternoon program.

The programs are presented at 3 p.m. in the museum auditorium each Sunday during the winter quarter and are open free to the public.

The black duck is often called a "black mallard" locally, according to Professor W. J. Breckenridge, museum director, and is not as common here as it is on the East Coast.

The film covers the annual cycle of these ducks, showing their nesting habits and habitats and the raising of the ducklings, and offers suggestions on conservation and hunting of the birds.

'U' DADS' ASSOCIATION  
TO MEET FEB. 28

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

The February meeting of the University of Minnesota Dads' Association, postponed because of the blizzard on Wednesday, Feb. 15, has been rescheduled for Tuesday, Feb. 28, according to the association office on the Minneapolis campus.

The meeting will be held at 7:30 p.m. in Coffman Memorial Union junior ballroom, with refreshments served in the C.M.U. international lounge after the program.

"The International Commitment of University Students" will be discussed by a panel of students and members of the Office of Dean of Students at the meeting.

Reservations for the meeting and program should be in the Dads' Association office, 200 Eddy hall, by Friday (Feb. 24).

Panel members will be four students actively concerned with and working on international student programs: Mrs. Linn Aakhus, Minnesota Student Association (MSA) vice president for international relations; Miss Lori Palmer, MSA American Life seminars program chairman; M. J. Abhishaker, graduate student from India who is vice president of the University's International Student Council; and Greg Delin, administrative fellow in the office of the adviser to foreign students and chairman of MSA's student exchange program.

Representatives of Dean of Students E. G. Williamson's office will be Miss Anne Marie Thomas and Earl Craig, both student personnel workers.

A.R. VERNES  
OF 'U' POLICE WILL  
ATTEND FBI ACADEMY

(FOR IMMEDIATE RELEASE)

Minneapolis---Andrew R. Vernes, assistant director of the University of Minnesota Department of Police, will attend the three-month special training course at the F.B.I. National Academy, Washington, D. C., March 20 through June 20.

Vernes will be the first member of the University's police department to attend this highly specialized training school, according to Police Chief C. B. Hanscom.

At the academy, Vernes said, special emphasis is given on training the law-enforcement officers in such subjects as records, identification, investigation, the use of scientific laboratories and current interpretations of the law.

About 90 law-enforcement officers from the United States and foreign countries attend each of the training sessions at the academy, he said.

STATE TAX ASSESSORS  
TO ATTEND 'U' COURSE

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---About 300 Minnesota tax assessors are expected to attend the 28th annual Tax Assessors School to be held next Tuesday through Friday (Feb. 28-March 3) at the Pick-Nicollet hotel, Minneapolis.

The school, conducted by the University of Minnesota's department of conferences and institutes of the General Extension Division, is held in cooperation with the Minnesota Assessors Association, the Minnesota Association of Assessing Officers, the League of Minnesota Municipalities and the State Department of Taxation.

Minnesota Assessors Association tests for basic, advanced and certified certificates will be given on Monday (Feb. 27), according to Fred E. Berger, conference director for the University.

In response to many suggestions for resumption of classes for the beginning assessor, Berger said, all the clinic sessions on Tuesday will be of a fundamental nature.

Scheduled highlight of last year's school---the "mock trial"---was snowed out. Berger trusts that it will be able to go on this year as scheduled. Robert T. Locky, Duluth city assessor, is planning this finale of the school, titled "The Assessor on the Witness Stand," for 1:30 p.m. Friday, March 3.

SCHOLARSHIPS, AWARDS  
GIVEN HIGH SCHOOL  
STUDENTS AT CONFERENCE

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---Scholarships and awards were presented to Minnesota high school journalists at the recent day-long conference of the Minnesota High School Press Association (MHSPA) hosted by the School of Journalism and Mass Communication at the University of Minnesota.

The Broadcast Journalism conference, held at the same time, featured a behind-the-scenes look at Twin Cities radio and television coverage.

At the awards banquet Wednesday evening, Rollie Johnson of WCCO-TV presented the eighth annual WCCO Television scholarship to Daniel Holland, Caledonia high school, Caledonia, Minn.

Robert L. Jones, director of the University's School of Journalism and Mass Communication, presented awards to the following students: MHSPA scholarships to Susan Mauer, Johnson high school, St. Paul, and Carolyn Juntunen, East high school, Duluth; the School Publications scholarship to Robert O. McKinney, Jr., John Marshall high school, Rochester; and the Journalism Alumni scholarship to Catherine McKee, Robbinsdale high school.

First-place winners in the newspaper division of the MHSPA publications contest were Sue McCone, feature writing, Johnson high school; Mary McKee, critical review, Robbinsdale high school; Steve Silha, sports, Edina-Morningside; Ann Scheidel, editorial, Loyola high school, Mankato; James Meko, cartoon, Cretin high school; Dave Brewster, photography, Austin high school; and Jim Haefemeyer, straight news, Washington high school, Brainerd.

(MORE)

First-place winners in the yearbook division of the MHSPA publications contest were: John Kline, academic photograph, (Gianteens), LeSueur; Larry Bloomberg, sports action shot, (Anokan), Anoka; John Kline, student life photograph, (Gianteens), LeSueur; Kris Linner, academic writeup, (Whigrean), Edina-Morningside; Mary Pawleyn, organization or activity writeup, (Viking), Golden Valley; Bill Fehlow, sports writeup, (Echowen), St. Louis Park; "Tiger," academic layout, Albert Lea; "Gianteens," student life layout, LeSueur; "Whigrean," sports layout, Edina-Morningside; "The Buzzette," front page makeup, Edina-Morningside; "The Echo," editorial page makeup, St. Louis Park; "Tiger-Herald," inside page makeup, Marshall; "Loyolan," sports page makeup, Loyola high school, Mankato; and Tom Messerli, advertising, Fairmont senior high school.

'HOSPITAL PHARMACY'  
TO BE TOPIC OF 'U' TALK

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

"The Challenges of Hospital Pharmacy" will be discussed by Don E. Francke, Washington, D. C., in a special lecture in the visiting lecturer series presented by the University of Minnesota's College of Pharmacy.

Francke, presently editor of a new international journal of hospital pharmacy, "Drug Intelligence," and secretary of the Drug Information Association, Washington, D.C., will speak at 3:15 p.m. Monday (Feb. 27) in Room 150 Appleby hall.

The lecture will be open to the public.

Winner in 1953 of hospital pharmacy's highest award, the Harvey A. K. Whitney Lecture award, Francke for 20 years was director of pharmacy service at the University of Michigan's Medical Center. He left this position in 1963 when the headquarters of the American Society of Hospital Pharmacists was moved to Washington and has been with this group until recently.

He has been editor of the "Bulletin of the American Society of Hospital Pharmacists," president of the American Pharmaceutical Association and editor of the "American Journal of Hospital Pharmacy," the "American Hospital Formulary Service" and the "International Pharmaceutical Abstracts."

Active in international pharmacy activities since early in his career, Francke has been a member of the council of the International Pharmaceutical Federation since 1952 and a delegate to the Assembly of the association for many years. He also has been a delegate to the Pan-American Congress of Pharmacy and Biochemistry, the British Pharmaceutical Congress and the French Pharmaceutical Congress.

'U' STUDENT ACTIVITIES  
DIRECTOR TO HEAD  
UNIVERSITY UNIONS

For further information, contact:  
DORIS FENICK

(FOR RELEASE FRIDAY, FEB. 24)

Donald R. Zander, director of the Student Activities Bureau (SAB) of the University of Minnesota's Dean of Students' Office, today (Friday, Feb. 24) was nominated to fill the new position of Director of University Unions at the University.

Zander's appointment will be brought before the University Board of Regents for approval at the March 10 meeting. He will split his time between the new position with the unions and his current position with SAB until June 1, he said.

Establishment of the position of Director of University Unions in place of the current set-up of individual directors of each of the Twin Cities campus unions (now, Coffman Memorial Union on the Minneapolis campus and the St. Paul Student Center) was strongly recommended last year in the report of the Union Study committee. Paul H. Cashman, University assistant vice president for educational relationships and development, heads this committee. A search committee has been working with student, union and academic groups in selecting the new over-all director.

When a student union is established on the West Bank area of the Minneapolis campus, its director too will be under Zander's direction.

Currently, the responsibilities for policies and operation of Coffman Union rests in the Union Board of Governors (predominantly a student organization) and the director of student unions, Gordon L. Starr. They, in turn, are responsible to the University Regents through the vice president for educational relationships and development, Stanley J. Wenberg. The St. Paul Student Center policies and operation are the responsibility of its own Board of Governors and of its director, Paul W. Larson, who have

(MORE)

reported to Starr. The present union program on the West Bank is the responsibility of the Coffman Union Board of Governors and of Starr.

Regarding the new position of Director of University Unions, Cashman said, "The director will furnish leadership to all segments of the union program in their contribution to the educational mission of the University. He will conduct long-range planning and research and will guide the development and operation of the union programs within the University structure to relate the unions to other educational units of the University."

Zander said his initial thought and plan is to bring the unions much closer to the academic program of the University.

U OF M JOURNALISM  
SENIOR, ALUMNUS  
RECEIVE FELLOWSHIPS

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

A Russell Sage social science reporting fellowship at the University of Wisconsin has been awarded to David L. Miller, a 21-year-old senior in the University of Minnesota's School of Journalism and Mass Communication.

Another Sage fellowship has been awarded to Howard Seeman, a 1959 graduate of the Minnesota journalism school.

The fellowship program, financed by a grant from the Russell Sage Foundation in New York City, provides \$7,000 fellowships to professional journalists and \$3,300 to students. Sage fellows pursue individually planned course programs in the social sciences while participating in graduate writing seminars at the University of Wisconsin School of Journalism.

Miller is one of two outstanding journalism students who will participate in the 10-month graduate program which begins in August at the Madison campus. A native of Lake Park, Iowa, he is currently working part-time for the news department of WCCO-TV while he completes his undergraduate work at the University of Minnesota.

Seeman is one of four professional journalists to be named Sage fellows. After graduating from the School of Journalism and Mass Communication in 1959, he worked as news editor for the Daily American in Rome, Italy. From 1961 to 1963 he worked in European public relations before returning to the U. S. for a two-year stint with the Royal Oak, Mich., Tribune. Seeman has been with the Milwaukee Sentinel since 1965.

LIST OF UNIVERSITY OF MINNESOTA MINNEAPOLIS CAMPUS PUBLIC EVENTS  
WEEK OF FEB. 25-MARCH 4

- Sat. -- Feb. 25 -- University Theatre---"Macbeth," 8 p.m., Scott hall. Tickets.
- Sun. -- Feb. 26 -- Honeywell Engineers lecture---Jacques Piccard, Swiss scientist and underwater explorer, speaks on "Underwater Exploration;" 3:30 p.m., Northrop auditorium. Admission by free tickets.
- Sun. -- Feb. 26 -- Minnesota Museum of Natural History Sunday Program---Color sound film, "The Black Duck," produced by Ducks Unlimited. 3 p.m., Museum auditorium. Free.
- Sun. -- Feb. 26 -- Religious lecture series, "World Religions View Contemporary World Problems;" today's program, "Population Control," discussants from the Hindu, Jewish, Sikh and Buddhist faiths; 8 p.m., Coffman Union men's lounge. Free.
- Sun. -- Feb. 26 -- Concert: University Chamber Singers, Concert Choirs and Wind Ensemble, 4 p.m., Grace Lutheran church. Free.
- Sun. -- Feb. 26 -- Concert, MacPhail Center Young People's Orchestra, assisted by University Student-Faculty Woodwind Octet, 2 p.m., Coffman Union main ballroom. Free.
- Mon. -- Feb. 27 -- Special lecture series, "Problems of the Decade;" today's lecture, "Twenty Years of the Cold War," by William C. Rogers, director, World Affairs Center; 7:45 p.m., 309 Aeronautical Engineering. Series tickets only.
- Mon. -- Feb. 27 -- Special lecture, College of Pharmacy special-lecture series: "The Challenges of Hospital Pharmacy," by Don E. Francke, secretary, Drug Information Association, Washington, D. C. 3:15 p.m., 150 Appleby. Free.
- Mon. -- Feb. 27 -- Illustrated lecture of his work by editorial cartoonist Karl Hubenthal; 3:15 p.m., Murphy hall. Free.
- Tues. - Feb. 28 -- University Theatre---"Macbeth," matinee, 3:30 p.m., Scott hall. Tickets.
- Tues. - Feb. 28 -- Dads' Association February meeting (pcstponed from Feb. 15). Panel discussion on "The International Commitment of University Students," 7:30 p.m., Coffman Union junior ballroom. Reservations.
- Wed. -- Mar. 1 -- Lecture, "Trade With the East and Its Effect on English 18th-Century Taste," by Helen Lowenthal, educational director, National Trust of Great Britain; 3:30 p.m., Museum auditorium. Free.
- Wed. -- Mar. 1 -- University Theatre---"Macbeth," 8 p.m. through Saturday. Scott hall. Tickets.
- Wed. -- Mar. 1 -- University Film Society---"Faust;" 3.15 and 7 p.m., Museum auditorium. Tickets.
- Fri. -- Mar. 3  
and -- University Film Society---"Band of Outsiders;" Jean-Luc Godard;
- Sat. -- Mar. 4 7:30 p.m., Museum auditorium. Tickets.

MUSCULAR DYSTROPHY  
GROUP SUPPORTS  
'U' RESEARCHER

For further information, contact:  
GERALD KNOX

(FOR IMMEDIATE RELEASE)

Minneapolis---A grant for \$11,000 to Mary E. Dempsey, assistant professor of biochemistry at the University of Minnesota, was made today by the Muscular Dystrophy Associations of America, it was announced by David Elder, district director of the associations.

The one-year grant is for studies on the enzyme and the reaction role it plays in muscle contraction. It is the second such grant from the associations to Professor Dempsey. The first, in 1966, was for \$8,000.

Professor Dempsey's work is in the basic biochemistry of the muscle, in an attempt to discover how the specific enzymes---responsible for causing the normal muscle to contract in response to nerve action---act.

Muscular dystrophy is a chronic disease, manifested by gradual weakening of the voluntary muscles. Most victims are children between the ages of 3 and 13. Of these, few reach adolescence and almost all die before reaching maturity. The exact cause of the disease is unknown.

Enzymes are specialized proteins used by the human body as catalysts. While it is known that muscle enzymes are vitally important in muscle action, it is not known precisely how they participate in the contraction process.

A coenzyme called ATP---a naturally occurring molecule present in all cells---acts as an energy mediator in the cells of the human body, and its central role in muscle action is "very characteristic," said Professor Dempsey.

(MORE)

"Muscles break down ATP according to their need for it during contraction," she said. The precise charting of this "breaking down" of ATP is the aim of Professor Dempsey's work.

She has discovered, for example, that relaxed muscle molecules act very differently from the same molecules during contraction, and that the entire molecular basis of muscle contraction is much more complicated than previously believed.

Further work will involve investigations into the stages of change that muscle molecules go through during muscle contraction and an attempt to learn more about the apparent change in the shape of these enzymes during contraction.

MEDICAL SCIENCES DAY  
SLATED SATURDAY AT 'U'  
FOR MINN. COLLEGE STUDENTS

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---About 200 Minnesota college students interested in the field of medical sciences will attend the 13th annual Medical Sciences day Saturday (March 4) at the University of Minnesota, according to Dr. Raymond N. Bieter, director of the medical school's special education service.

The annual affair is jointly sponsored by the Medical Student Council and the University's medical school, according to David Cannum, council president.

The council will present a program in Mayo auditorium followed by tours of the University's medical center to acquaint the visiting students with the disciplines in medicine and the medical-biological sciences. Planned are discussions of admission requirements and policies; study, loan and scholarship opportunities; and practice, research, and teaching in medicine.

"Since 90 per cent of each year's freshman class are Minnesota residents, it is very likely that a large majority of the new students each year have attended Medical Sciences day before applying for admission to the College of Medical Sciences," Dr. Bieter said.

Following registration at 9:15 a.m. Saturday in Mayo auditorium foyer, Dr. Robert B. Howard, dean of the College of Medical Sciences, will welcome the prospective medical students. Cannum will give them "A Glimpse of Medical Student Life at Minnesota" and, at 9:50 a.m., Dr. Richard C. Lillehei, associate professor of surgery, will speak on "Medicine in the 1970's."

(MORE)

The prospective students will be taken on a tour of the University medical center by members of the council.

After a coffee break hosted by members of the council and their wives, Michael Yablonski, a senior medical student who has just returned from a year's work in Israel, will give them a glimpse of "An American Medical Student Abroad."

Eivind O. Hoff, executive director of the Minnesota Medical Foundation, will discuss "Financial Aids for Medical Students" at 11:45 a.m., and the morning's program will wind up with a talk by Dr. Horatio P. (Ray) Van Cleve, Jr., family physician from the Austin Clinic, Austin, on "The Physician and His Work in the Community."

The visiting students and faculty guests will share a complimentary sandwich lunch in Mayo foyer, Cannum said. Following the lunch, members of the council will be joined by Associate Dean H. Mead Cavert and Assistant Dean R. J. McCollister in a question-and-answer period in Mayo auditorium.

The story of the life and studies of "Mark Catesby, Colonial Naturalist," will be shown in a color film at the Minnesota Museum of Natural History Sunday (March 5).

Catesby, one of the earliest ornithologists to live and work in North America, made his home in Colonial Williamsburg. The film, produced by Colonial Williamsburg, Inc., the group in charge of the restoration and preservation of the town, will be shown at 3 p.m. in the museum auditorium.

As a part of the museum's regular Sunday-afternoon program, the film will be shown free to the public.

'U' BIRTHDAY CELEBRATION  
MARCH 10 TO BE TELEVISED  
THROUGHOUT STATE

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---The University of Minnesota will observe its 116th birthday on Friday, March 10, at the annual Charter Day convocation which will begin at 11:15 a.m. in Northrop auditorium.

For the first time in the University's history, its birthday party will be televised live. "This will enable about 80 per cent of the citizens of the state to sit in on this happy ceremony at their University," said William L. Nunn, director of University relations.

The program will be telecast beginning at 11:20 a.m. over KTCA-TV, channel 2, Minneapolis-St. Paul; WDSE-TV, channel 8, Duluth; and KWCM-TV, channel 10, Appleton.

Principal speaker at the convocation will be James Gray, noted author, University alumnus and historian, and winner of the University's Outstanding Achievement Award in 1964.

Seated on the stage will be Governor Harold LeVander, members of the University Board of Regents, a few legislators, University faculty members, and representatives of the Alumni Association and the Minnesota Student Association.

President O. Meredith Wilson, who will be attending his last University birthday party as president of the institution, states that because March 10 is a study day when no classes are held, "I hope that the many students who are studying on or near the campus will take a break to attend the celebration. Since it occurs during the lunch hour, we invite anyone who wishes to bring a bag lunch into Northrop to be eaten during the ceremonies."

(MORE)

They needn't carry dessert, however, for the traditional huge birthday cake will be brought onto the stage following Professor Gray's talk, and served to members of the audience. Miss Jan Jacobson, Austin, University Homecoming Queen for 1966-67, will be assisted by Army ROTC Cadet David M. Lazorik, Pershing Rifles representative, in cutting and serving the cake.

Music for the University's birthday party will be provided by the Concert Band Ensemble under the direction of University Bandmaster Frank P. A. Bencriscutto. The band recently returned from a concert tour through four Midwestern states highlighted by appearances at Orchestra Hall in Chicago and at the annual convention of the College Band Directors National Association in Ann Arbor, Mich.

Gray, who was graduated from the University in 1920, taught English there from 1949 to 1956. One of his well-known books is the history of the University, prepared for its centennial celebration, titled "The University of Minnesota: 1851-1951." He is the author of other histories, of novels, and of volumes with local historical interest, and he currently is writing a personal recollection of three memorable teachers at the University: Joseph Warren Beach, E. E. Stoll, and Oscar W. Firkins.

Gray was literary and drama editor of the St. Paul newspapers from 1920 to 1946 and literary editor of the Chicago Daily News from 1946-48. In 1939 he received an honorary doctor of literature degree from Hamline University, St. Paul.

'U' ART FACULTY  
TO EXCHANGE EXHIBITS  
WITH OTHER SCHOOLS

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---A program of exchange shows of work by art faculty members of Midwest institutions will be initiated during the month of March when the work of 15 members of the studio art department of the University of Minnesota is placed on exhibition at Stout State University, Menomonie, Wis., according to Malcolm H. Myers, chairman of studio art at the University.

The program, jointly sponsored by the studio art department and the fine arts area of the Coffman Memorial Union Board of Governors (UBOG), is designed to bring to public attention throughout Minnesota, Wisconsin, Iowa and the Dakotas the current art work being done in educational institutions and to familiarize area residents with the many nationally recognized artists now teaching here.

Members of the studio art department and of the fine arts area make up the program's advisory committee, said Tom Stark, Coffman Union program consultant. Miss Kathy Keleher, 621 Ninth ave. SE., Minneapolis, heads the committee which will advise on the selection of shows to be exhibited in the Union's Fine Arts gallery.

"An art department faculty show from Stout will be hung in the Union Fine Arts gallery March 29-April 5," Myers said, "and we are setting up the machinery to run exchange shows with a number of area institutions. We now are in contact with the art faculty at Carleton College and are scheduling their work for an early fall showing. Other local schools already interested in the program include the College of St. Catherine and Macalester."

(MORE)

The University's department of studio art is arranging a series of meetings and discussions with the committee to develop and improve the relationships regarding the producing and teaching of art in the area. Chairmen of the art departments and faculty representatives of the institutions will meet semi-annually to exchange ideas and discuss manners of cooperation, he added.

The Stout exhibition, containing the work of such nationally and internationally recognized artists as Walter Quirt, Peter Busa, Warren MacKenzie, Katherine Nash, Herman Rowan and Myers, includes at least two examples of each artist's work. Several styles of work---ranging from realism to hard-edge abstractions---are included, and media will include sculpture, prints, painting, ceramics and photography.

The University faculty show will be exhibited at the Union gallery when it returns from Wisconsin, Stark said, opening on Wednesday, March 29.

PROGRAM AT 'U' FOR  
PRACTICAL NURSES TO  
STRESS PATIENT SELF-HELP

For further information, contact:  
BETH KENT

(FOR IMMEDIATE RELEASE)

Teaching the patient how and when to care for himself will be the emphasis of the fourth annual Educational Conference for Licensed Practical Nurses, to be held March 13 and 14 at Mayo auditorium on the University of Minnesota campus.

Licensed practical nurses will receive tips in determining when a patient is ready to redevelop such skills as walking, feeding and bathing himself, in assessing the patient's progress, and in psychologically preparing the patient and his family for the learning process.

Fee for the conference is \$12.50 and includes two scheduled luncheons. Registrations must be received by March 10, or by March 6 if reserved on-campus parking is desired. To obtain further information or to register, write to the department of conferences and institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455.

The program was developed in cooperation with Margaret Schmidt, president of the Minnesota Licensed Practical Nurse Association, Etta Furlow, education chairman of the association, the University School of Nursing, and the department of conferences and institutes of the University's General Extension Division.

The conference will be presented with the assistance of the Minnesota Board of Nursing and the vocational education division of the State Department of Education. Faculty for the program is drawn from the department of special education in the University's College of Education and from the School of Nursing.

RENOWNED ARABIC  
SCHOLAR TO TEACH  
AT 'U' SPRING QUARTER

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---A distinguished Arabic scholar will be a visiting professor in the University of Minnesota's department of Middle Eastern languages during spring quarter, according to Professor Anwar Chejne, department chairman.

He is Philip K. Hitti, professor emeritus of Semitic literature at Princeton University and "internationally acclaimed as one of the leading Arabic scholars, historians and Near East authorities in the world," Professor Chejne said.

Professor Hitti will teach one course on "The History of the Arabs," for both undergraduate and graduate students, and will be invited to lecture in other courses.

He also will give four lectures during spring quarter, open free to the public. These will be on the following topics:

"Islam As a Religion," April 10, Murphy hall auditorium.

"Sufism in Islamic Piety," April 12, Minnesota Museum of Natural History.

"Islam As a Culture," April 17, Murphy hall auditorium.

"Islam As a Polity," April 24, Murphy hall auditorium.

Born in a village on the slopes of Mt. Lebanon in 1886, Hitti was one of many children in a poor family. Only when he broke his arm at the age of 8 was it decided that he could not help with the family farming, and must become a teacher. From his village elementary school, he went to a nearby American high school, then the American University in Beirut where he earned a bachelor of arts degree. He first came to the United States in 1913 and received a doctor of philosophy degree from Columbia University in 1915.

(MORE)

After several years of teaching at Columbia and Beirut, he joined the Princeton faculty in 1926 where he served until his retirement in 1954. At Princeton, he founded a program in Near Eastern studies and was its chairman until he retired. He also has served as visiting professor at many institutions, including Harvard, as well as lecturing throughout the country on Near Eastern subjects.

Professor Hitti is the author of some 500 books, articles and reviews, perhaps the best known of which is his "History of the Arabs" which first appeared in 1937 and is currently in its ninth edition. He was general editor of the massive Princeton Oriental Texts, 15 volumes, from 1930 to 1954, and editor of numerous works in Arabic, as well as contributing editor to various publications including the Americana and Britannica encyclopedias.

He also is the recipient of many honors and awards, was the founder and president of the Syrian Education Society and has served on the Board of Trustees of the American University of Beirut, among many positions. Professor Hitti's former students now occupy numerous academic positions throughout this country and abroad, as well as key posts in industry and government.

PARENT AND FAMILY  
LIFE TO BE TOPIC  
OF 4 STATE MEETINGS

(FOR IMMEDIATE RELEASE)

Minneapolis---The crucial role of the family will be explored at four two-day conferences sponsored by the University of Minnesota at Moorhead, Minneapolis, Mankato and Virginia during April and May.

The four Institutes for Leaders in Parent and Family Life Education, sponsored by the department of conferences and institutes of the University's General Extension Division, will attempt to meet the needs of parents, teachers, social workers, doctors and others concerned with problems of youth.

Demonstrations, practice sessions and information about children and family life will be presented through the use of films, tapes, skits, lectures, case studies and printed materials. A symposium on parent and family life programs that have worked in the past will be conducted, and techniques for successful application of the programs will be explained.

Planning for the institutes was done under the direction of Mrs. Elizabeth Peterson, coordinator of parent and family life education at the University.

Features of the two-day sessions include a talk, "What is Parent and Family Life Education?"; "A Father Looks at Discipline," a lecture with audience participation; and viewing and discussion of the film "Jamie," an examination of sibling rivalries.

Sessions will be held at Moorhead State College, Dahl hall, 630 - 14 st., on April 6 and 7; the University of Minnesota, Minneapolis, Mayo Auditorium and Coffman Union on April 26 and 27; Mankato, Wilson Campus school on May 3 and 4; and Virginia, Our Savior's Lutheran church, 11 S. 8 $\frac{1}{2}$  st., on May 11 and 12.

A newly revised "Manual for Leaders in Parent and Family Life Education" will be distributed, along with information about children and about resources and techniques for leaders. Preregistration is urged, since packet materials are limited.

To register or obtain further information, write to Mrs. Peterson, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455. Fee for the institute is \$10 and does not include the cost of meals or lodging.

The institute is held in conjunction with the Minnesota Congress of Parents and Teachers, with financial support from the Minnesota Department of Health.

TRAINING OF FUTURE  
ENGLISH TEACHERS IS  
SUBJECT OF 6 CONFERENCES

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Minneapolis---A series of six conferences that ultimately will help upgrade the teaching of English in Minnesota high schools is being held this winter and spring in Minneapolis under the direction of Harold B. Allen, English professor at the University of Minnesota.

The conferences are on the general subject of what to teach students who are going to become English teachers. Persons attending the first five conferences represent all 23 Minnesota colleges which prepare teachers. Because each conference is on a different aspect of teacher preparation, a different group of delegates attends each one. All are being held at the Curtis hotel.

The series of conferences was planned, according to Professor Allen, because of new regulations adopted in 1965 and 1966 by the Minnesota Department of Education which change the requirements for the preparation of English teachers. The new rules will go into effect in fall 1968, and "the teacher-training institutions must prepare now to be ready for the change," says Allen. He is chairman of the State Language Arts Advisory Committee which recommended the changes after four years of study.

The changes, in general, will require would-be English teachers to take more courses in English subject matter such as expository writing, the history and the new grammars of the English language, and literature of the 20th century; and fewer "how-to-teach" courses.

The series of conferences has been financed by a \$19,000 grant from the Upper Midwest Regional Educational Laboratory (UMREL). It is considered a pilot project by UMREL officials---that is, it is being observed by educators from the other four states that UMREL serves (Wisconsin, Iowa and the Dakotas), with the idea that each of these states can apply the techniques to its own teacher-education problems.

(MORE)

"Because it is the first of this type of thing being done anywhere in the country, the series is nationally significant," says Professor Allen. "We are trying to help our colleges do the best job they can to get ready for the new regulations. In many cases, this will involve planning and presenting courses they've never offered before. What we are doing here will serve as a national guideline for other states with similar problems."

The third in the series of conferences will take place March 10 and 11 on the subject of "The English Language." Keynote speaker will be Professor Albert H. Marckwardt who teaches English and linguistics at Princeton University and who is president of the National Council of Teachers of English.

Professor Marckwardt will speak following the opening luncheon of the meeting, at noon Friday, March 10. He will be followed by Mrs. Jean Olson, head of the English department at Jefferson junior high school, Minneapolis, speaking on "The English Language in the High School Program." The group then will break up into three discussion sessions.

After a 6:30 p.m. dinner, F. E. Heinemann, director of teacher personnel in the Minnesota Department of Education, will talk on "The State Department of Education and the New Regulations."

More meetings will be held most of Saturday, March 11. The final session will be on "The Role of UMREL in Raising Teacher Competence in the Upper Midwest," with Stanley J. Kegler, associate dean of the University's College of Education, as moderator.

Previous conferences were held in January on "Advanced Speech" and in February on "Advanced Composition." The fourth, on "Literature," will be held March 31 and April 1; the fifth, on "Methods in English," on April 28-29.

The last conference, on May 20, is titled "The Concerned Public" and will be quite different in format from the previous five. It will be an attempt, says Allen, to inform certain key groups of citizens of what has taken place at the five earlier meetings. The "concerned public" to be invited will include persons from such groups as the Minnesota Congress of Parents and Teachers and the American Association of University Women, educators from the State Department of Education, school officials and school board members, and certain legislators and newsmen.

LIST OF UNIVERSITY OF MINNESOTA MINNEAPOLIS CAMPUS PUBLIC EVENTS  
WEEK OF MARCH 4-11

- Sat., Mar. 4---University Theatre---"Macbeth," 8 p.m., Scott hall aud. Tickets.
- Sat., Mar. 4---University Film Society---"Band of Outsiders," (1964, France) 7:30 p.m., Museum aud. Tickets.
- Sun., Mar. 5---Minnesota Museum of Natural History Sunday Program: "Mark Catesby, Colonial Naturalist," color sound film produced by Colonial Williamsburg, Inc.; 3 p.m., Museum auditorium. Free.
- Sun., Mar. 5---University Theatre---"Macbeth;" final performance: 3:30 p.m., Scott hall auditorium. Tickets.
- Sun., Mar. 5---Religious lecture series, "World Religions View Contemporary World Problems;" final talk, "War for Peace," by persons of the Hindu, Muslim, Buddhist, Christian and Jewish faiths. 8 p.m., Coffman men's lounge. Free.
- Mon., Mar. 6---University's G.E. College Bowl team will meet Twin City "Newshawks" in practice session on television: 9:30 p.m., Channel 2, KTCA-TV.
- Mon., Mar. 6---Art show opening---M.F.A. Thesis work by Claudia Peacock, 4:30-6 p.m., Coffman Union Gallery. Show will run through March 18. Free.
- Mon., Mar. 6---University Gallery: Two shows---"The Ambiguous Group Sculpture," Room 305; and show of photogravures in memory of Alvin Langdon Coburn, Room 309, Northrop aud. Open school hours weekdays through March 21. Free.
- Tues., Mar. 7---Concert---Civic Orchestra; 8:30 p.m., Coffman Union main ballroom. Free.
- Tues., Mar. 7---Recital---Pianist Nancy Whipkey, 8 p.m., Scott hall. Free.
- Thurs., Mar. 9---Special lecture: Dr. Glen McBride, professor of psychology, University of Queensland, Brisbane, Australia; "The Social Control of Space in Animals;" 3:45 p.m., Museum auditorium. Free.
- Thurs., Mar. 9---Special Theatre Hour lecture: Elia Kazan, New York director and author; 3:15 p.m., Scott hall. Free.
- Thurs., Mar. 9---Theatrical presentation, "Spoon River Anthology," by Creative Society of Coffman Union. 8 p.m., 320 Union. Tickets at door. Runs through Sunday.
- Thurs., Mar. 9---Concert---"An Evening with Vaughan Williams," presented by the Women's Chorus, the St. Paul Chorus and the Resident Oratorio Choir; 8 p.m., Union main ballroom. Free.
- Fri., Mar. 10---Charter Day---The University celebrates its 116th Birthday. Special convocation: James Gray, author, will speak: state officials and University faculty and students will honor President O. Meredith Wilson; Homecoming Queen will cut birthday cake for the audience. 11:15 a.m., Northrop auditorium. Free.
- Fri., Mar. 10---Winter Quarter study day. No classes. Offices open.

5 AUTHORITIES ON  
MYSTICISM TO SPEAK  
AT 'U' THIS SPRING

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

"Studies of the Mystical Experience" will be the subject of five public lectures to be given at the University of Minnesota during spring quarter by five authorities on various aspects of the topic.

The authorities will be Joseph Campbell, professor of literature at Sarah Lawrence College; Philip K. Hitti, noted Arabic scholar and professor emeritus of Semitic literature at Princeton University; Alan Watts of the Society for Comparative Philosophy and author on Zen Buddhism; Abraham Kaplan, University of Michigan professor of philosophy; and John Ferguson, professor of classics formerly at the University of Ibadan, Nigeria, and currently Hill Foundation Visiting Professor at the University of Minnesota this year.

All the lectures will be at 8 p.m. Wednesdays in the Minnesota Museum of Natural History auditorium. Topics and dates will be as follows:

- March 29: "The Serpent Power (Kundalini Yoga)," Joseph Campbell
- April 12: "Sufism in Islamic Piety," Philip K. Hitti
- April 26: "Science and Mystical Experience," Alan Watts
- May 10: "Martin Buber and the Hassidic Tradition," Abraham Kaplan
- May 24: "Modern Nigerian and Ancient Classical Religions,"  
John Ferguson

In addition, the five experts will teach a special humanities seminar for a maximum of 20 students. The seminar will meet on Tuesday and Thursday afternoons, and each speaker will conduct the two sessions on his special subject.

(MORE)

The seminar and lecture series are being sponsored by the University's humanities program, under the direction of Professor Robert J. Ames, with the cooperation of the departments of classics and Middle Eastern languages. George Kliger, humanities instructor, is coordinator of the seminar.

Professor Joseph Campbell, the first speaker, has been on the faculty of Sarah Lawrence College since 1934. An authority on world myths, he has discovered similar themes or stories in myths from many different cultures. The myth of the hero who leaves home for the unknown, faces trials and temptations, and eventually returns home with a great gift for his people is such a universal theme, described in one of his best-known books, "The Hero With a Thousand Faces." The topic he will discuss in his seminar meetings at the University is "The Mystical Experience and the Hero's Journey."

Professor Campbell has been described as both a great scholar and a great adventurer. He has traveled in many parts of the world, including India, where he did research in order to edit and rewrite the notes of a great Sanskrit scholar, Heinrich Zimmer, who died before completing his work. Campbell completed four of Zimmer's books in this way, including "Myths and Symbols in Indian Art and Civilization" and "Philosophies of India."

Other of Campbell's own books are "A Skeleton Key to Finnegans Wake" and a four-volume work (three of which have been published) titled "The Masks of God." Campbell holds bachelor and master of arts degrees from Columbia University, and has studied at the Universities of Paris and of Munich.

BEHAVIORAL SCIENTISTS  
TO SPEAK AT 'U'  
IN BUSINESS SERIES

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Two distinguished behavioral scientists will deliver the March and April addresses in the lecture series on "Behavioral Science Contributions to Business Management," being presented by the University of Minnesota's Graduate School of Business Administration. The talks, followed by discussions, are open to anyone interested.

George Katona, professor of psychology and economics at the University of Michigan since 1949 and program director of that university's Survey Research Center, will speak on "Interdisciplinary Analysis of Consumer Behavior" at the Tuesday, March 14, lecture at 3:15 p.m. in Room 5 Classroom Building, West Bank area. He is the author of "Psychological Analysis of Economic Behavior" and of "Powerful Consumer."

Paul F. Lazarsfeld will deliver the series' final address at 3:15 p.m. Thursday, April 13, in Room 10 Classroom Building.

Lazarsfeld received a doctor of philosophy degree from the University of Vienna and currently is professor of social science at Columbia University. His particular areas of interest are mathematical models, attitude changes and research methodology.

The lecture series on the behavioral sciences' contributions to business management was created because of the belief of the business school faculty that these sciences constitute one of the major disciplinary sectors contributing to better understanding and more effective performance of the management functions.

Professor Frederick H. Harbison, Princeton University, spoke on "The Generation of Employment in Modern Societies" at the November meeting; Professor Jacob Marschak, University of California, Los Angeles, on "Some Experiments in Simple Decision-Making," at the December meeting.

MANAGEMENT SEMINAR  
SLATED FOR  
BUSINESS EXECUTIVES

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

An intensive program stressing the growth and development of business executives and their organizations will be conducted this spring by the University of Minnesota.

The "Management Development Seminar" will be presented by the School of Business Administration and the University's General Extension Division in cooperation with the management development committees of the Minneapolis and St. Paul Chambers of Commerce. It will consist of two half days of sessions each week for five weeks, beginning April 4, and will be held at the Thunderbird Motel in Bloomington.

Purpose of the seminar is to aid in the growth and change of both organizations and the management of organizations. The emphasis will be on managers as people--- on helping them to understand the people within the organization and some frameworks in which to achieve maximum growth and development.

The topics to be covered are considered applicable to businesses of any size and type, and are designed for middle and upper-echelon managers or those about to assume increased managerial responsibilities.

Applicants must be nominated and recommended by their company, and are expected to attend all five sessions.

Fee for the program is \$220 and includes instruction, books and supplies and 11 meals.

Applications and fees should be received by March 24 by Peter Rosko, director, Continuing Business Education, School of Business Administration, University of Minnesota, Minneapolis, Minn., 55455. For further information contact Mr. Rosko, 373-3680.

'U' PROF ALLEN  
RECEIVES GRANT FOR  
LINGUISTIC ATLAS

(FOR IMMEDIATE RELEASE)

University of Minnesota English Professor Harold B. Allen today announced that he has received a grant of \$18,000 from the National Endowment for the Humanities to work on a "Linguistic Atlas of the Upper Midwest."

The atlas---on which he started work in 1947---is a long-term, major study of the basic speech language patterns in the Upper Midwest (in which he includes Minnesota, Iowa, Nebraska and the Dakotas).

Allen will take a leave of absence from the University for the next academic year to work on the atlas. He will begin with a trip to England to study the editorial procedures used for the British Dialect Survey at the University of Leeds and the Scottish Dialect Study at the University of Edinburgh, both of which are comparable to his study. Then he will spend the remainder of the year editing several filing cabinets full of notes, maps and other materials.

SPRING-QUARTER  
EVENING CLASSES BEGIN  
THIS MONTH AT 'U'

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

More than 400 courses in business, engineering and liberal arts will be offered as spring-quarter evening classes at the University of Minnesota.

Subject matter will range from Robert Frost to the Vikings and the Kensington Rune Stone to contemporary labor issues to real estate. Several courses are geared for increasing job opportunities.

Classes begin Monday, March 27, and generally meet one evening a week.

Registration opens Monday, March 13, and extends through Wednesday, March 22.

Registration centers are located at 150 Nicholson hall, Minneapolis campus; MacPhail Center, 1128 LaSalle ave., downtown Minneapolis; St. Paul Extension Center, Ninth and Exchange, downtown St. Paul; and Robbinsdale high school, 5214 - 37th ave. N. Classes will be taught at all locations.

Office hours at the Minneapolis campus and at the St. Paul Extension Center will be from 8 a.m. to noon, and from 1 to 8 p.m. Monday through Thursday; both offices will close at 5 p.m. on Friday. The Robbinsdale office will be open from 8 a.m. to 4 p.m., Monday through Friday. MacPhail Center will be open from 8 a.m. to 1 p.m., and from 1:45 to 4:45 p.m., Monday through Friday.

Courses leading to a bachelor of arts degree and to a master of business administration degree will be offered.

Advisers are available to help students select programs, determine prerequisites, evaluate transcripts and handle other academic matters. The counseling office is located at 153 Nicholson hall, telephone 373-3905.

A bulletin of complete class listings for spring quarter can be obtained by calling the University Evening School at 373-3195.

MODULAR CURRICULUM  
TO BE EXPLAINED  
IN CONFERENCE FOR EDUCATORS

(FOR IMMEDIATE RELEASE)

A new concept in the use of time in high schools---flexible scheduling---will be explored next month during "A Working Clinic in Modular Curriculum," sponsored by the University of Minnesota.

The clinic, to be held April 13, 14 and 15 at the Pick-Nicollet hotel in Minneapolis, will be presented by the department of conferences and institutes of the University's General Extension Division.

The basic idea of modular curriculum is to break time into appropriate units for study and course work, rather than into the conventional 50 or 60-minute class period. A pupil's achievement, rather than the amount of time he spends in class, then becomes the criterion for successful completion of a course.

Work in the area of modular curriculum, already implemented in a few suburban schools, was prompted by the lack of flexibility in previous methods of scheduling. Attempts to enlarge high school curricula began to hinge on the question, "Can it be scheduled?" Frequently, students were forced to choose between equally desirable courses which were necessarily offered at the same time.

One ramification of the new scheme is the availability of wider curricular alternatives, since class periods could last anywhere from 15 minutes to three hours. Size could vary from 5 to 350 pupils per teacher, with about 30 per cent of the pupil's time programmed for independent study.

(MORE)

The clinic will not be a series of theoretical talks. It is specifically designed as an in-depth, paper and pencil problem-probing series of sessions.

Planning was done in cooperation with the College of Education, the Minnesota Department of Education, the Minnesota Association of Secondary School Principals and the Minnesota Association of School Administrators.

School superintendents, principals, assistant principals, curriculum developers, teachers, counselors and other high school and college personnel are eligible to attend the conference.

Enrollment is not limited, but early advance registration is necessary to insure adequate facilities. Write to Director, Conferences and Institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455.

Fee for the three days is \$45 and includes two scheduled luncheons, coffee breaks and study materials.

PSYCHOLOGIST TO DISCUSS  
ANIMAL BEHAVIOR STUDIES

Two lectures on animal behavioral studies will be given this week by Glen McBride, professor of psychology at the University of Queensland, Brisbane, Australia, and a fellow at the Center for Advanced Study in the Behavioral Sciences, Stanford, Calif.

McBride will discuss "Social Stress in Animal Management" at 3:45 p.m. Wednesday (March 8) in Peters hall auditorium on the St. Paul campus. "The Social Control of Space in Animals" will be his topic at 3:45 p.m. Thursday (March 9) in the Minnesota Museum of Natural History auditorium.

McBride's lectures are sponsored by the College of Biological Sciences and the departments of animal science, psychology and concerts and lectures.

EUROPEAN ART  
TRAVEL COURSE  
OFFERED BY 'U'

UNIVERSITY OF MINNESOTA  
NEWS SERVICE-220 MORRILL HALL  
MINNEAPOLIS, MINNESOTA 55455  
TELEPHONE: 373-2137  
MARCH 7, 1967

(FOR IMMEDIATE RELEASE)

For further information, contact:  
DORIS FENICK

A University of Minnesota travel course in European art again will be offered as part of the regular Summer Session program at the University, according to Donald Torbert, art history professor and this summer's tour conductor.

This year the class will visit Crete and Greece in addition to the regularly scheduled countries of Switzerland, Liechtenstein, Austria, Italy, Germany, Denmark, England and France.

"This course surveys the cultural and artistic traditions of Europe in terms of a wide range of masterworks of architecture, sculpture, painting and the decorative arts," Torbert said. "It presents these great original works within the landscapes---the cultural and geographic settings for which they were created---and relates them to the social and political conditions which helped to shape them."

New also this year for the six-weeks' course, now in its 14th season at the University, is the accreditation that it carries---six undergraduate credits instead of the five previously awarded. Arrangements can be made for graduate credit. The course is listed as Art 59.

Participants will leave New York City June 29 and return there August 11. Trans-oceanic transportation and longer laps of the trip will be made by regular economy-class Swissair jet; a privately chartered motorcoach will be used for shorter trips.

"Art 59 is not restricted to art students and does not take for granted extensive previous acquaintance with the techniques of the history of art," Torbert said. "This travel course is subjected to the same general admission policies as other University Summer Session courses. Due to the size limit---25 students is the absolute limit--- applicants will be screened by the art history department faculty and those selected will be notified immediately."

Cost of the course is \$1,475, which includes University fees, jet air passage and all travel in Europe, accommodations in good hotels, breakfasts and dinners, but not travel within the United States.

Requests for information and registration forms should be addressed to Professor Donald Torbert, Department of Art History, 106 Jones Hall, University of Minnesota, Minneapolis 55455.

'U' TO GRADUATE  
1,000 AT WINTER  
QUARTER COMMENCEMENT

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---Approximately 1,000 University of Minnesota undergraduate and graduate students will receive degrees at the annual winter-quarter commencement exercises at 7:30 p.m. Saturday, March 18, in Northrop auditorium.

One highlight of the ceremonies will be the naming of this year's Regents' Professors. This highest faculty recognition awarded by the University will go to five professors who will receive a silver medallion imprinted with the Regents' Seal and the phrase "IN RECOGNITION OF ACADEMIC DISTINCTION."

The newly named recipients then will join the first five professors so honored--Ernst Eckert, E. Adamson Hoebel, Alfred O. C. Nier, Allen Tate and Owen H. Wangensteen---who also will be on the stage. The first five Regents' Professors were named in June, 1966.

One of the first of the University faculty so honored, Allen Tate, Regents' Professor of English, will deliver the March 18 commencement address.

Dr. Tate is a noted poet, critic, novelist and teacher who holds membership in the American Academy of Arts and Letters and the American Academy of Arts and Sciences. He currently is on leave, serving as Visiting Professor of English at Vanderbilt University, Nashville.

About 80 per cent of the people in Minnesota will be able to "attend" the March commencement exercises via television this year. The program will be broadcast directly from Northrop auditorium at 7:30 p.m. via the facilities of KTCA-TV, channel 2, Minneapolis-St. Paul; WDSE-TV, channel 8, Duluth; and KWCM-TV, channel 10, Appleton.

Following the commencement exercises, a president's reception for the graduates, their families and friends will be held in Coffman Memorial Union main ballroom.

SUMMER IN MEXICO  
OPEN TO TOP CIC  
SPANISH STUDENTS

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Academically qualified students of Spanish at the University of Minnesota may apply for the "CIC Summer Program in Mexico," sponsored by the Universidad Ibero-Americana and the Committee on Institutional Cooperation (CIC), according to Professor Walter T. Pattison, chairman of the University's Romance languages department.

The CIC (the universities of the Big Ten plus Chicago) offers the program to provide a limited number of students---50 at the most---with an opportunity not only to enhance their facility in the use of Spanish but also to enrich their special fields of concentration.

Participants will enroll in a full program of three courses of eight credit-hours, according to Professor Pattison. The courses are grammatical and stylistic analysis, Mexican literature of the 20th century, and Spanish-American civilization.

The program, to be held at the Universidad Ibero-Americana in Mexico City from June 19 to August 11, is open to undergraduate students from various disciplines, Pattison said. Main requirements are that the applicant have the equivalent of third-year college-level competence in Spanish; demonstrate an over-all "B" average, with a 3.5 average in his major field; and arrange for a personal interview with and letter of recommendation from the faculty representative of his home department.

Fee for this CIC summer program is \$600. This includes transportation (round trip between Mexico City and either Chicago or St. Louis), room and board, tuition and other scheduled activities.

For further information, University of Minnesota students should contact Professor Pattison at 200 Folwell hall on the Minneapolis campus.

PROF. TO DISCUSS  
PESTICIDES IN 'U'  
SUNDAY PROGRAM

"Natural Controls vs. Pesticides" will be discussed by Professor Edwin Cook of the entomology, fisheries and wildlife department of the University of Minnesota in this Sunday's (March 19) Minnesota Museum of Natural History program.

The Sunday programs at 3 p.m. in the museum auditorium are open free to the public.

In his lecture, Professor Cook will explain the use of biological and cultural controls to promote reduction in the use of pesticides.

In addition, an English color film on a wood-borer parasite infecting alder trees will be shown.

The museum will be open on Easter Sunday, March 26, but no program will be presented.

MINN. MULTIPHASIC  
TO BE SUBJECT  
OF CONFERENCE AT 'U'

For further information, contact  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

A national conference for psychologists and clinicians familiar with the Minnesota Multiphasic Personality Inventory (MMPI) will be held on the University of Minnesota campus Thursday and Friday (March 16 and 17).

Recent Developments in the Use of the MMPI, the second conference of its type, will be concerned with issues in the teaching of MMPI interpretation techniques, programmed interpretation, and some recent clinical and research developments.

The program will be sponsored by the University's department of psychology and its department of conferences and institutes of the General Extension Division. All sessions will be held in Mayo auditorium.

Lecture topics will include Marital Interaction as Reflected in MMPI Profiles, conducted by Professor Gerhard Neubeck, chairman of the University's family studies program, and John P. Brantner, associate professor of clinical psychology; and MMPI Characteristics Associated with Outcomes in Group Psychotherapy with Prisoners, conducted by Professor Robert D. Wirt, director of the University clinical training program, and James L. Jacobson, research fellow of the Mayo Foundation for Education and Research in Rochester, Minn.

Some discussion of where, when and to whom to administer the test is expected to take place.

Registration is open to psychologists who have training in the use of the MMPI. Fee for the conference is \$30 and includes two scheduled luncheons and a banquet. Application for registration and further information can be obtained from the Department of Conferences and Institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455.

U.S. OCEANOGRAPHIC RESEARCH  
REPORT AIDED BY SPILHAUS

For further information, contact:  
GLENN ICKLER

(FOR IMMEDIATE RELEASE)

Minnesota was the only land-locked state represented on a National Academy of Sciences committee which has published a report on United States oceanographic research programs.

Serving on the committee, which was organized in 1957 to study the national ocean program, was Athelstan Spilhaus, University of Minnesota professor of geophysics. Chairman was Milner B. Schaefer, director of the Institute of Marine Resources, Washington, D. C., and its nine other members were from institutions along the Atlantic and Pacific coasts and in Hawaii.

The report, entitled "Oceanography 1966---Achievements and Opportunities," identifies three important areas of oceanographic activity as a framework for determining levels of future National Academy of Sciences support within the national ocean program.

The three areas are studies of fundamental oceanic phenomena for the sake of advancing ocean science as a field of knowledge; basic research with the expectation of long-term payoffs, carried out by such mission-oriented agencies as the U. S. Navy, the Environmental Science Services Administration and the Bureau of Commercial Fisheries; and short-term research related to the immediate practical goals of these agencies.

Spilhaus, who formerly was dean of the University of Minnesota Institute of Technology, has been a long-time advocate of increased oceanographic research.

(FOR RELEASE WEDNESDAY, MAR. 15)

Minneapolis---Eleven University of Minnesota seniors today (Wednesday, March 15) received Woodrow Wilson National Foundation Fellowships in a presentation ceremony at 3 p.m. in the University Regents' Room. President O. Meredith Wilson made the presentations.

The fellowships are awarded to graduating seniors in the United States, Canada, Puerto Rico, Panama and the Canal Zone to finance a year of graduate study for outstanding students who plan to become college teachers.

Throughout the nation, 1,259 students (out of 13,596 nominated by their schools) won the coveted awards for the 1967-68 academic year, according to Sir Hugh Taylor, president of the Woodrow Wilson National Foundation.

Woodrow Wilson fellows receive one academic year of graduate study in the school of their choice (never in the institution in which they have done their undergraduate work) and a living stipend of \$2,000 plus allowances for any dependent children. The graduate school they choose to attend receives an additional grant of \$2,000 per student from the foundation.

In addition to the 11 Woodrow Wilson Fellowship winners, invited guests at the presentation ceremonies included Bryce Crawford, Jr., dean of the University's Graduate School; each of the student's major advisers; John D. Hurrell, associate dean for humanities in the College of Liberal Arts; two former members of the Woodrow Wilson selection committee: Professor Franz Montgomery, assistant chairman of the English department, and Professor G. Robert Stange, English; and Hyman Berman, associate professor of history, presently a member of the selection board. Parents of the honored students also were invited to attend.

(MORE)

University of Minnesota Woodrow Wilson Fellowship winners, their fields of study and their addresses are:

Jeanne L. Barnes, Spanish; Howard Lake  
Margaret M. Comer, English; Hutchinson  
Joan A. Enerson, geography; 977 Manvel st., St. Paul  
Mrs. Judith A. Galt, English; 2103 Twenty-second ave. S., Minneapolis  
Nicholas D. Halpern, English; 4408 Edmund blvd., Minneapolis  
Christine E. Isenman, Spanish; 611 Eighth ave. S., South St. Paul  
Gary M. Olson, psychology; 5016 Fairview ave. N., Crystal  
Richard A. Rinke, anthropology; 2451 Holton N., Roseville  
David S. Rosenberg, philosophy; New York City  
Michael J. Ryan, history; 5141 Fifteenth ave. S., Minneapolis  
David P. Walker, American studies; Tyler

The Woodrow Wilson National Foundation fellowships were established 10 years ago by a Ford Foundation grant of \$24,500,000 to launch students in college teaching careers. Students who accept the fellowships "assume a moral obligation to complete at least one year of graduate studies and to give serious thought to a career in college teaching," the foundation president said.

Fellowship winners who have selected the University of Minnesota for their year of graduate work will not be known until after the 1967 fall-quarter registration is completed, according to the Graduate School office.

AUTHORITY ON EAST EUROPEAN PRESS  
TO TEACH JOURNALISM AT U OF M

A noted Polish journalist who fled from the Gomulka regime in 1957 and is now a French citizen and leading researcher on the East European press will be visiting professor at the University of Minnesota during spring quarter.

Georges Henri Mond, member of the faculty of the French Press Institute, University of Paris, and research attache at the National Center of Scientific Research, Paris, will help teach two courses in the University's school of journalism and mass communication.

He will lecture in "Communications in Authoritarian Society" and will assist Professor Raymond Nixon in the International Communications seminar.

Mond, who speaks five languages, was born in Zloczow, Poland, in 1921. He holds bachelor and master of arts degrees from Jagellons University, Cracow. He also earned a law degree and was admitted to the bar in Poland. In 1963 he received a doctor of philosophy degree from the University of Paris (Sorbonne), his dissertation being a comparative study of mass communications systems in European Communist countries.

Since entering France, Mond has worked on "L'Express," a French news magazine, from 1960-64; in the cultural department of the Polish Press Agency, Warsaw, in 1959-60; and as editor and co-founder of a weekly Paris magazine, "Semaine Polonaise," from 1957-59.

He has written extensively on the press of East Europe and has contributed articles in the United States to "Journalism Quarterly" and "Problems of Communism."

In Poland, he served from 1955-57 as general secretary of the Polish Journalists' Association and also as vice chairman of the Polish Press Institute, as visiting professor at the Professional Center for Training of Journalists, Warsaw, 1954-57, and during 1954-56 also as visiting professor at the Professional Center for Training of Publishing Administrators, Warsaw.

-U N S-

Note to Editors: A news conference for Dr. Mond will be held upon his arrival in Minneapolis, at 2 p.m. Wednesday (March 15) in the Regents' Room, 238 Morrill Hall.

NONDESTRUCTIVE METAL TESTING  
TO BE TOPIC OF 'U' SHORT COURSE

(FOR IMMEDIATE RELEASE)

Practical applications of theory and research findings in the field of nondestructive metal testing will be presented in a two-day seminar at the University of Minnesota.

The course, Radiography in Nondestructive Testing, will be held April 6 and 7 in Nolte Center for Continuing Education on the Minneapolis campus. It is designed for engineers and others engaged in casting, welding, machining and repair of metals and metal products.

Sponsors are the department of conferences and institutes of the University's General Extension Division and the Minnesota section of the Society for Nondestructive Testing.

Lectures and demonstrations will be presented by two international authorities in their fields. Professor Roy B. McCauley, chairman of the department of welding engineering, is director of welding research at Ohio State University. Merle L. Rhoten is a research associate in the department of welding engineering at the same university, specializing in the field of nondestructive testing.

Fee for the seminar is \$50 and includes two luncheons. To obtain registration blanks and further information, write to Director, Department of Conferences and Institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455.

GRADS OF AREA HIGH SCHOOLS  
MAKE U OF M DEAN'S LIST

(FOR IMMEDIATE RELEASE)

For further information, contact:  
DORIS FENICK

Minneapolis---Twenty-two Twin City and suburban high schools placed five or more of their former students on the Fall 1966 Dean's List of first-quarter freshmen in the College of Liberal Arts (CLA) at the University of Minnesota, according to Roger B. Page, CLA associate dean.

One hundred and seventy smaller schools outside of this area each placed between one and five students on the list.

In reporting these honor alumni to the high schools, Dean Page noted that the qualifying academic standard this year has been raised from "better than a 3.0 grade point average (GPA)" as it has been in the past, to a "3.5 or better GPA."

"Good academic work reflects the background and attitudes learned from former teachers as well as the abilities and application of the student," Page continued in his letter to high schools. "Please let your staff know how much we appreciate the opportunity to further the education of students who come so well prepared."

St. Paul's Highland Park high school had the most students on the Dean's List--- 23. St. Louis Park senior high was second, with 20. Two Minneapolis schools, Southwest and Washburn senior high, placed third and fourth with 14 and 13 respectively.

Schools with 5 or more students on Dean's List:

Minneapolis

St. Paul

Suburban

Academy of Holy Angels, 6  
De La Salle, 6  
Edison high, 6  
Henry high, 5  
Roosevelt high, 10  
St. Anthony of Padua, 5  
Southwest high, 14  
University high, 6  
Washburn senior high, 13

Cretin, 5  
Highland Park, 23  
Hill, 5  
Mounds View, 9

Lincoln senior, Bloomington, 7  
Edina-Morningside, Edina, 8  
Minnetonka senior, 9  
Hopkins senior, 12  
Richfield senior, 10  
Robbinsdale senior, 12  
Alexander Ramsey, Roseville, 8  
Frank B. Kellogg senior, Roseville, 10  
St. Louis Park senior, 20

RESEARCH ADVENTURES  
TO BE HIGHLIGHTED  
WEDNESDAYS ON TV

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

Adventures in Research, title of the nineteenth annual Public Discussion Series sponsored by the University of Minnesota Graduate School Research Center, begins Wednesday, March 22.

The half-hour television program will be broadcast from 9 to 9:30 p.m. each week until July 5 over KTCA-TV, channel 2. Robert Lindsay, associate professor of journalism and mass communication, will act as host-coordinator.

The series will be presented during the University of Minnesota Television Hour by the research center and the Advisory Council for the Social Sciences in cooperation with the General Extension Division.

Lectures and panels will be conducted by University faculty members.

The following is a brief description of program topics:

- March 22 - Research: Human Dimension; a general explanation of science research and its relationship to social, economic and political problems; discussion of problems encountered in moving from scientific research and knowledge to political action.
- March 29 - Psycho-Physiological Stress While Driving; auto safety and physiological research.
- April 5 - Crash Program for Auto Safety; auto safety, mechanical improvements in automobiles, systems research.
- April 12 - What's Your Line?; discussion of development of the Strong Vocation Interest Blank at Minnesota, interests of famous people and interest profiles of models and army generals.
- April 19 - How Humans Learn; cognitive process development in children, attention and short term memory, programmed learning.
- April 26 - Communication Between Cultures; cross cultural communication among American, Colombian, Japanese and Lebanese businessmen.

(MORE)

- May 3 -- A Researcher's Road to Morocco; discussion of how two faculty authors are testing hypotheses set forth in their book, "The Political Basis for Economic Development."
- May 10 - Computers in Paradise; computer simulations of seafarers of the South Pacific.
- May 17 - We Dig the Ancient Greeks; Minnesotans in Mycenae (Ancient Greece), excavations.
- May 24 - Modern Urban Transportation; studies on solving transportation problems in urban areas.
- May 31 - We Explore a Man's Life; how to research a man's life.
- June 7 - Research: Ethos and Ethics; ethical considerations in doing research with humans and animals.
- June 14 - White Dwarfs in the Heavens; astronomy.
- June 21 - We Cover the Lively Arts; press coverage of the performing arts, a special project financed by the Twentieth Century Fund.
- June 28 - Family Crisis Periods; studies of family decision making during times of stress in the United States, India and Puerto Rico.
- July 5 - Research is an Adventure; overview, perspective, role of a university in doing research.

CONFERENCE ON STANDARDS  
SET FOR ENGINEERS  
APRIL 13-14 AT 'U'

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

An intense two-day seminar for engineers and professionals concerned with product and systems design will be held on the University of Minnesota campus Thursday and Friday, April 13 and 14.

The Fifth Midwest Regional Conference on Standards will be conducted by the department of conferences and institutes of the University's General Extension Division in cooperation with the Minnesota and Wisconsin sections of the Standards Engineers Society, Inc.

Those interested are asked to register by April 6.

Opening session of the conference will define and give examples of what standards are. Discussion of the kinds of standards used in industry will follow, with an attempt to explain why and how they are implemented.

Other topics will include the relationship of standards to creativity, configuration control, and new materials and processes. Two optional sessions, one on component standards and another on automated drafting and related graphics, will be offered.

Fee for the conference is \$50 and includes two scheduled luncheons and a dinner. Applications or requests for further information should be addressed to Director, Department of Conferences and Institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455.

WHERE TO FIND  
INFORMATION ON CHINA  
LISTED IN NEW BOOKLET

(FOR IMMEDIATE RELEASE)

The World Affairs Center, a public-service organization of the University of Minnesota, announces the recent publication of "CHINA: Sources of Information in Minnesota."

The 20-page pamphlet brings together readily accessible resources on the China mainland and concludes with a short historical background of China and United States-Chinese relations.

The compilation includes speakers available in Minnesota, with an indication of their fee, and an annotated list of paperbacks, pamphlets, films and tapes.

The World Affairs Center, a part of the University's General Extension Division, was assisted on the publication by the League of Women Voters of Minnesota.

The pamphlet is available at no cost from the center's offices, 122 Social Science Building, West Bank, University of Minnesota, Minneapolis, Minn., 55455.

NANCY PIRSIG

(FOR RELEASE AT 8 P.M. SATURDAY, MARCH 18)

Minneapolis---Five new Regents' Professors were announced tonight (Saturday, March 18) by the University of Minnesota at winter-quarter commencement exercises in Northrop auditorium.

The Regents' Professorship, created in 1965, is the highest honor the University can bestow upon its most distinguished professors, and carries with it a \$5,000 annual gift for as long as the faculty member remains on the University staff. The gift is given by the University of Minnesota Foundation.

The five new award winners and their titles are as follows:

Neal R. Amundson, Regents' Professor of Chemical Engineering;

Herbert Feigl, Regents' Professor of Philosophy;

Walter W. Heller, Regents' Professor of Economics;

Wesley W. Spink, Regents' Professor of Medicine; and

Maurice B. Visscher, Regents' Professor of Physiology.

The winners were introduced by University President O. Meredith Wilson, who handed each a citation. Carlyle E. Anderson, chairman of the board, and Arnulf Ueland, president, both of the University of Minnesota Foundation, plus members of the University Board of Regents placed around the necks of the recipients a maroon-and-gold ribbon bearing a heavy silver medallion. The medallion carried the words, "In Recognition of Academic Distinction" and the seal of the Board of Regents on one side; on the other was engraved the name and new title of each professor.

The honored five thus joined five of their colleagues who were the first Regents' Professors ever named (at June 1966 commencement exercises): Ernst R. G. Eckert, Regents' Professor of Mechanical Engineering; E. Adamson Hoebel, Regents' Professor of Anthropology; Alfred O. C. Nier, Regents' Professor of Physics; Allen Tate, Regents' Professor of English; and Owen H. Wangensteen, Regents' Professor of Surgery.

(MORE)

BIOGRAPHICAL DATA ON THE FIVE NEW RECIPIENTS

Neal R. Amundson, Regents' Professor of Chemical Engineering, is also an applied mathematician whose contributions in chemical engineering are extensive and unique. He has used applied mathematics to formulate new tools, techniques and insights into the handling of problems in industrial and engineering chemistry.

Through his research at the University and by active implementation through industrial consultantships, he has pioneered the area of chemical reactor stability and sensitivity; has achieved a breakthrough in the method of handling continuous mixtures by putting practical distillation problems on large computers; and has achieved detailed analyses regarding solid-fluid interactions in fixed and fluidized beds so that the mathematical techniques for analysis are manageable.

Professor Amundson has been head of the chemical engineering department in the University's Institute of Technology since 1951, after two years as acting head. He joined the University faculty in 1939 as a teacher of mathematics and mechanics, switching to the chemical engineering department in 1947. A native of St. Paul, Amundson holds a bachelor of chemical engineering degree, a master of science degree and a doctor of philosophy degree in applied mathematics, all from the University of Minnesota. He was a post-doctoral fellow at Brown University in 1944-45 and was a Fulbright scholar and visiting faculty member at Cambridge University, England, in 1954-55.

Active in professional societies and author of many papers, Professor Amundson has been the recipient of a number of prestigious awards, including the American Chemical Society Award in Industrial and Engineering Chemistry for 1959, and the 1961 William H. Walker Award of the American Institute of Chemical Engineers.

Married and the father of three children, Professor Amundson lives at 2297 Folwell st., Falcon Heights.

BIOGRAPHICAL DATA

Herbert Feigl, Regents' Professor of Philosophy, has been director of the Minnesota Center for Philosophy of Science since its beginning in 1953. The center is devoted to Feigl's life-long interest, exploring the philosophical foundations of modern science. It has specialized in the fields of physics and psychology; its aim is to achieve a better understanding of modern science, i.e., its basic concepts, assumptions and methods.

Born in 1902 in Austria-Hungary, Feigl was a member between 1925 and 1930 of the famed Vienna Circle of philosophers where the doctrine of logical positivism was born. He studied at the Universities of Munich and Vienna, concentrating in mathematics, physics, psychology and philosophy and earning a doctoral degree magna cum laude from the University of Vienna with a dissertation on the foundations of probability and induction in the exact sciences.

In 1930, Professor Feigl went to Harvard University with a Rockefeller research fellowship to work on the logical foundations of physics; later, with another Rockefeller fellowship, he did research at Columbia and Harvard Universities on "The Methodology of Scientific Explanation." He was named professor of philosophy at the University of Minnesota in 1941.

Professor Feigl is a titular member of the International Academy of the Philosophy of Science, and a director of the American Humanist Association, has served as president of the American Philosophical Association and of the Minnesota Philosophical Society, and is a trustee of the Institute for the Unity of Science, of the American Academy of Arts and Sciences. He has been a visiting professor at numerous universities throughout the world as well as in the United States, including the Institute for Advanced Studies and Scientific Research in Vienna, Austria. He has written and edited numerous articles and journals, and last spring was honored by a book published by the University of Minnesota Press titled "Mind, Matter and Method: Essays in Philosophy and Science in Honor of Herbert Feigl."

Feigl and his wife reside at 5601 Dupont ave. S., Minneapolis.

BIOGRAPHICAL DATA

Walter W. Heller, Regents' Professor of Economics, is nationally known for his four years as chairman of the President's Council of Economic Advisers, which he held under Presidents Kennedy and Johnson from 1961 to 1964. In late 1964 he returned to his position as professor of economics at the University of Minnesota while continuing to serve as a consultant to the Office of the President.

Once called "Mr. Tax Cut" for his authorship of the tax-cut bill of 1963, in more recent days Heller has called for a tax increase to pay for the war in Vietnam. He also is chief author of a plan whereby the federal government would share its tax revenues with the states.

Born in 1915 in Buffalo, N.Y., Heller received a bachelor of arts degree from Oberlin College, and master of arts and doctor of philosophy degrees in economics from the University of Wisconsin. He joined the Minnesota faculty in 1946 and served as chairman of the economics department from 1957 to 1960.

His service with the federal government began early and continues today. Heller served as a fiscal economist and a consultant to the U. S. Treasury Department for various periods beginning in 1942 and was chief of internal finance for the U. S. Military Government in post-war Germany. In addition, he has been fiscal adviser to the Governor of Minnesota; tax adviser to King Hussein of Jordan; and fiscal consultant to the United Nations, the Committee for Economic Development; Brookings Institution; and the U. S. Census Bureau, among others.

Heller is a member of the American Academy of Arts and Sciences and of numerous economic and finance organizations, and serves as a director of a number of corporations including the National City Bank of Minneapolis; Northwestern National Life Insurance Co., Minneapolis; International Milling, Inc.; and the National Bureau of Economic Research. He is a trustee of Oberlin College.

His latest book and his first since leaving Washington is the recently published "New Dimensions of Political Economy," based largely on the Godkin Lectures which he delivered at Harvard University in the spring of 1966. Professor Heller is on a leave of absence from the University this year on a Carnegie Corp. fellowship.

Heller, who is married and the father of three children, lives at 2203 Folwell st., Falcon Heights, Minn.

(MORE)

BIOGRAPHICAL DATA

Dr. Wesley W. Spink, Regents' Professor of Medicine, is a world authority on infectious diseases and is especially known for his pioneering work on the sulfa drugs and antibiotics, for investigations on shock due to infections, and for research on the disease brucellosis, or undulant fever.

Brucellosis is transmitted from animals to man and Dr. Spink spearheaded the successful control of the disease not only in Minnesota but also on a national level. He has been chairman of the Committee on Brucellosis of the National Research Council and of the World Health Organization (WHO). He has been an expert WHO consultant in many countries. In 1948 he first described the present-day treatment of human brucellosis with the antibiotic tetracycline. He is the author of the definitive book on brucellosis published by the Minnesota Press.

Dr. Spink is a member of the Committee on Shock of the National Research Council and a member of the advisory board of the Food and Drug Administration. He is past president of the Minnesota Medical Foundation, American College of Physicians, and American Society for Clinical Investigation. He is president-elect of the Harvard Medical Alumni Association.

Dr. Spink was born in Duluth and graduated from Duluth Central high school, Carleton College and Harvard Medical School. He has been a member of the University faculty since 1937.

He has been an outstanding teacher and many of his past graduate students are in leading academic positions in this country.

Dr. and Mrs. Spink live at 1916 East River Terrace, Minneapolis. They have two children.

(MORE)

BIOGRAPHICAL DATA

Dr. Maurice B. Visscher, Regents' Professor of Physiology, is an internationally recognized leader of medicine who is known as a devoted researcher, exceptional educator, and courageous statesman.

His work in the area of cardiac energy metabolism is a foundation for the modern techniques of cardiovascular surgery. His studies of the mechanisms of the production of pulmonary edema in various situations have been highly significant. A pioneer in the use of isotopic tracers, Dr. Visscher demonstrated the active transport of materials between the intestinal lumen and the circulation, a work which has been hailed as one of the greatest advances in this field in the past two decades.

Dr. Visscher's dedication to medical and graduate education has had a profound influence. Many of his former students have achieved distinction in medicine and the basic sciences.

Dr. Visscher has had considerable impact on the entire scientific community, both national and international, through his dynamic leadership in education and in such professional organizations as the International Union of Physiological Sciences, the American Association for the Advancement of Science, and the National Society for Medical Research.

Of Dutch descent, Dr. Visscher was born in Holland, Michigan, on August 25, 1901, and is a graduate of Hope College there. He came to the University of Minnesota for his medical training and graduate degrees in physiology 45 years ago. He then headed departments of physiology in Universities of Tennessee, Southern California and Illinois, returning in 1936 to Minnesota and his present position as professor and head of the department of physiology.

In 1956 he was elected to the National Academy of Sciences and, in 1960, was named Distinguished Service Professor at the University. He was elected to the American Academy of Arts and Sciences in 1964.

INDIAN YOUNGSTERS  
TO BE GUESTS OF  
U OF M STUDENTS

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Eleven Indian students from the seventh grade of Pine Point school, White Earth Indian Reservation, will spend three days of their spring vacation as guests of Project Awareness members at the University of Minnesota.

The five boys and six girls will spend Wednesday, Thursday and Friday (March 22, 23 and 24) touring the University and Twin Cities industries, stores, museums and noted sites, according to David Harmann, Rte. #3, Litchfield, a freshman student in the Institute of Technology and student coordinator for the project.

The project is the University-American Indian educational enrichment and vocational motivation program jointly sponsored by the Minnesota Student Association and the Office of the Dean of Students, according to Matthew Stark, project director and assistant professor of the Student Activities Bureau.

Since 1964 University students have spent eight weeks of each summer on the White Earth Indian Reservation working with the Chippewa Indian students in the Pine Point, White Earth and Jack Pine communities. These students will be reunited with the same Indian students they worked with last summer.

Thirty sixth-grade students made the Twin Cities visit during the recent Christmas vacation period.

(MORE)

On Wednesday (March 22) the students will arrive at Coffman Memorial Union at 2 p.m.; tour St. Paul-Ramsey County hospital at 3 p.m., have dinner and attend a movie in downtown St. Paul.

The girls will spend the night with project member Karen Ostenso, 860 Sixteenth ave. SE., Minneapolis, while the boys will be the guests of Harmann and Ken Gilcrest at Territorial hall.

Thursday's (March 23) sightseeing tour will start off at 8:30 a.m. with a tour of the Minneapolis Grain Exchange and will include visits to the Minneapolis Star and Tribune and the Minneapolis Court House and Police Department. Dinner at the Sweden House and a trip to the Metropolitan airport will wind up this day.

Visits to the St. Paul Science Museum, the St. Paul Fire Department headquarters and the Minnesota Museum of Natural History on the University campus are scheduled for Friday (March 24) before the youngsters board their bus for home at 2 p.m.

--UNS--

Note to Editors: Excellent picture possibilities will be found when the kids visit the Police or Fire departments or the Museum of Natural History.

(FOR IMMEDIATE RELEASE)

Mrs. Edvick Shayboub, women's program director for Radio Lebanon and producer and script writer for Voice of America, will be the honored guest at the University of Minnesota Arab American Club meeting Tuesday (March 28).

She will speak on "Women's Role in the Arab Countries," at 8 p.m. Tuesday in the women's lounge of Coffman Memorial Union.

Lebanese people from the Twin Cities area are cordially invited to attend, according to Khalid Ishaq, Iraqi graduate student at the University and vice president of the Arab American Club.

Mrs. Shayboub is one of three international women broadcasters visiting the United States this year under the auspices of American Women in Radio and Television (AWRT) and the U. S. Department of State, and her local visit is sponsored by the North Star chapter of AWRT.

In addition to her radio work in Lebanon, Mrs. Shayboub serves as chief editor of a monthly magazine for women. She also has been a producer and script writer for Radio Lebanon, and has conducted book reviews and panel discussions for Voice of America and BBC. A writer of note in her country, she has many published works to her credit, among them several books of poetry, a book of memories and a children's story, "The Little Doctor," which won the Friends of the Book Society's prize in 1964. She has translated several books from Arabic into English for use by the U. S. Information Service.

AREA MUNICIPAL  
SUPERVISORS GIVEN  
10-WEEK TRAINING

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

One hundred first-level municipal supervisors in the Twin City area are currently learning how to get their work done more efficiently and effortlessly.

The supervisors, mostly street maintenance, park and recreation or public utilities foremen, are attending a University of Minnesota short course entitled Effective Supervisory Practices. It is the first course of this kind designed particularly for such a group.

The ten-week course is sponsored by the department of conferences and institutes of the University's General Extension Division in cooperation with the League of Minnesota Municipalities, and is part of the League's regular training program. Planning committee members include University Professor Orville Peterson, executive secretary of the league and director of the Municipal Reference Bureau, and Lloyd Graven, training coordinator for the league.

Two general sessions which dealt with communication techniques were held in the early part of March. These are being followed by eight weeks of small-group instruction, held at five centrally located sites.

Lectures and group discussion of practical supervisory problems will be held, along with examination of relevant case studies. Such topics as training and motivating employees, improving work methods, and the supervisor as a leader will be covered in the remaining weeks.

Course participants represent the following areas: Minneapolis and St. Paul proper; Burnsville; North, South and West St. Paul; Crystal Bay; Cottage Grove; Golden Valley; Edina; Hugo; Stillwater; Anoka; Crystal; Robbinsdale; Brooklyn Park and Roseville.

VIOLENCE WILL BE  
SUBJECT OF 1-DAY  
CONFERENCE AT 'U'

(FOR IMMEDIATE RELEASE)

The Rising Tide of Violence, subject of a one-day conference to be held on the University of Minnesota campus April 11, will examine violence in terms of its person-to-person, group-to-group and international implications.

The program, open to anyone who is concerned about violence as it affects society, will be presented by the department of conferences and institutes of the University's General Extension Division in cooperation with the Women's International League for Peace and Freedom.

Guest speaker for the day will be Rabbi Robert Marx, director of the Union of American Hebrew Congregations in Chicago, Ill. Rabbi Marx is considered an authority on violence within communities and has recently completed a study on violence between ethnic groups.

Violence and the individual will be discussed by Dr. Richard Anderson, professor of psychiatry at the University. Valdemar N. L. Johnson, a foreign-service officer and visiting professor in the department of political science, will speak on international violence. Reactor panels will follow each speaker.

5 SEMINARS FOR WOMEN  
OFFERED AT 'U' NEXT YEAR;  
APPLY BY MARCH 31

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

The program in continuing education for women, offered by the University of Minnesota's General Extension Division, will present five year-long seminars in the liberal arts in 1967-68.

Because the size of the seminars will be limited, first consideration will be given to applications which are received by the University by Friday, March 31.

Those accepted will be notified in April.

The seminars are designed to help women attain competence and personal satisfaction in their various activities, Mrs. Louise Roff explained recently. She is director of continuing education for women. The program serves a variety of aims, said Mrs. Roff, such as work toward a degree, preparation for a new career, and intellectual revitalization.

Although most seminars have no specific prerequisites, they are taught at the upper-division and beginning graduate level and assume that the women participating have the ability to do independent study. Four of the courses will carry nine credits for the year, and will demand at least one major paper.

The one seminar not offered for credit, "Art and The Problems of Perception," will deal with great works of art in an attempt to sharpen visual perception. Painting, sculpture and architecture from a variety of periods and styles will be discussed.

(MORE)

Purpose of the "Arts of Reading" course is to develop critical understanding of the written word. The first half of the course will be an analysis of various types of writing and the second will be the study of imaginative literature.

"Culture and Society" will study a number of different groups in order to help clarify the meaning of the terms "culture" and "society" and to give a better perspective for judgments about current problems.

"Ideas in America" will examine basic American concepts which condition this country's political thought, art and literature. Old controversies and issues will be discussed in the light of their effect on current discussions.

"New Worlds of Knowledge" will cover topics ranging from the physical and biological sciences to art, music and literature. Primary emphasis will be on new developments in these fields in the past 15 to 20 years.

The seminars generally will meet once every other week from late September to June. Sessions will start at 9:30 a.m. and last until noon, with a few all-day meetings.

Some of the comments from participants in previous liberal arts seminars help to illuminate the sorts of goals sought by women who have enrolled in the program.

One 37-year old woman, with a bachelor of arts degree in English, married to a local attorney, commented, "I feel that my college major does not correlate with my present interests in social and educational problems, history, and political science."

Another, married and with three children ranging in age from 13 to 18, said, "Because of a major in chemistry in both undergraduate and graduate schools, my college programs contained a maximum of science and mathematics and a minimum of courses in the humanities ... My children are now entering the college period and I think it is of utmost importance to be in touch with developments in subjects that they will be studying."

The 42-year-old wife of a personnel manager, who also had three teenage children, said her main purpose in returning to school was for self-enrichment. "However," she added, "when my family no longer requires my main energies, I wish to be ready for a parttime position."

One student, with a bachelor of arts degree, many years behind her, explained that she enrolled to prepare to work toward a master's degree in her undergraduate field.

In general, the women who sign up for the seminars have a college degree, but many have only two years of advanced schooling, and some have only a few credits beyond high school. Most have several children and are married to men with executive or professional positions.

The typical seminar student is not working at the present, but does plan to---at least parttime---sometime in the future. Several are taking more than one course and are active in community work.

For further information on the liberal arts seminars, write or call Mrs. Roff at 310 Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455; telephone 373-5166.

ANTIQUES TO BE SUBJECT  
OF 6-WEEK PUBLIC  
LECTURE SERIES AT 'U'

For further information, contact:  
Beth Kent, 373-5166

(FOR RELEASE SUNDAY, MARCH 26)

The antique---and particularly antiques produced in the midwest in the 19th century---will be the subject of the 1967 University of Minnesota spring lecture series which begins this week.

American Antiques, a weekly program of illustrated lectures by authorities in the field, will be presented at 8:30 p.m. Wednesdays in Mayo auditorium on the Minneapolis campus for six weeks, March 29 through May 3.

The series is sponsored by the University's General Extension Division in cooperation with the department of art history and the Division of Related Arts.

According to program chairman Melvin Waldfogel, associate professor of art history, the credentials of the lecturers speak for their excellence.

Leading off Wednesday (March 29) will be Marvin D. Schwartz, curator of decorative arts and the industrial design laboratory of The Brooklyn Museum, New York City. His topic is "American Decorative Arts---A General Definition."

The April 5 lecture will be delivered by Carl Christian Dauterman, who will speak on "American Silver in European Perspective." He is associate curator of the department of western European arts of the Metropolitan Museum, New York City.

(MORE)

The third and fourth lectures will be presented by authorities in the field of glass. William G. Keener, curator of history of the Ohio Historical Society, will speak April 12 on "Midwestern Blown Glass." A. Christian Revi, managing editor of Spinning Wheel magazine, will follow on April 19 with "American Art Nouveau Glass."

Alice Winchester, speaking fifth on the program on April 26, is the editor of Antiques magazine, and is considered the most knowledgeable person in this country on the subject. Her topic is "American Furniture--- Major Trends and Regional Tastes."

The concluding lecture, on May 3, will be delivered by Associate Professor Marion Nelson from the University's department of art history. Nelson, director of the Norwegian-American Museum at Luther College in Decorah, Iowa, will speak on "Scandinavian Decorative Arts in America."

Each talk will be illustrated with colored slides, and the audience will be encouraged to attend local museums where some of the actual objects are on display.

Tickets for the series may be purchased at 254 Nicholson hall on the Minneapolis campus, or at the door on the first night. Admission for the entire six weeks is \$12.50 for the general public and \$7.50 for University staff and students. Single admissions will be sold at the door for \$3.

BIRD PAMPHLETS  
AVAILABLE FROM  
NATURAL HISTORY MUSEUM

(FOR IMMEDIATE RELEASE)

A pamphlet full of suggestions on attracting birds and another containing scorecards for birdwatchers are again available at the Minnesota Museum of Natural History.

The pamphlets, written by Museum Director W. J. Breckenridge and members of his staff, are offered to bird lovers each spring. They are titled "Cultivate Your Garden Birds" and "Birds of the Minneapolis-St. Paul Region."

"Cultivate Your Garden Birds," which sells for 35 cents, contains chapters on bird-house building, bird feeding and watering, controlling less desirable species and developing bird habitats. Decorative plants and shrubs which will provide food and nesting sites for birds in city and suburban yards are listed.

"Birds of the Minneapolis-St. Paul Region" contains field check lists and migration charts for every kind of bird, from robin to semipalmated plover, which can be seen within a 20-mile radius of the Twin Cities. This pamphlet costs 25 cents.

People desiring copies of the pamphlets may send cash or checks (payable to the University of Minnesota) to the Minnesota Museum of Natural History, Minneapolis, Minn., 55455. Five cents extra per copy should be included to cover the cost of mailing.

2-FLOOR MASONIC HOSPITAL ADDITION  
TO BE DEDICATED AT U OF M WEDNESDAY

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

Two new floors of the Masonic Memorial Hospital, part of the University of Minnesota Hospitals, will be dedicated in a brief ceremony Wednesday (March 29).

Following the ceremony, hundreds of Masons from throughout the state who will be attending a statewide Masonic convention in St. Paul will tour the new space that has been provided by their contributions, and then will attend a reception and dinner in the University's Coffman Memorial Union (CMU).

The dedication ceremony will be held at 4:30 p.m. Wednesday (March 29) just outside the main entrance to the Masonic Memorial Hospital. A plaque has been installed in the wall above the building's cornerstone commemorating the \$1.1-million addition. Participating in the brief ceremony will be University President O. Meredith Wilson; Masonic Grand Master Mortimer B. Miley, St. Paul attorney; Clyde E. Hegman, president of Masonic Memorial Hospital Fund, Inc., which raised the money; and three Masons who will apply Masonic construction implements---the level, the square and the plumb line---to the plaque. Miley, Hegman and Wilson each will say a few words.

Tours will be conducted through the hospital's addition, as busloads of Masons are brought to the campus from St. Paul. This open house will last roughly from 4:30 to 6 p.m.

At 5 p.m. a reception will begin in the CMU Campus Club. Dinner will be served at 6:30 p.m. for all the visiting Masons and their wives and a number of University staff members. A short program after dinner will include the introduction of four high school students who have won Masonic scholarships in an essay contest; a history in slides of the Masonic Memorial Hospital; a formal charge from the Masons presenting the University with the hospital addition (delivered by Hegman) and a reply from President Wilson.

(MORE)

Construction of the two new floors was begun almost exactly two years ago, on March 17, with a ceremony conducted symbolically on top of the original two floors of the hospital and termed a "roof-raising" as opposed to a ground-breaking. It just happened that the rooftop observance took place in late afternoon on the day of the worst March snowstorm of 1965.

The fund drive among the state's Masonic Lodges, which was begun in 1963, had by then climbed close to its goal of \$1.1 million. A year later---in April 1966---a Victory Jubilee was held in Northrop auditorium featuring a solid-gold check made out for \$1.1 million and presented by Masonic officials to President Wilson and Dr. Charles W. Mayo, chairman of the University's Board of Regents.

The first two floors of the Masonic Memorial Hospital---believed to be the only cancer hospital in a teaching setting in the United States---were completed in 1958 with the help of a million dollars donated by the state's Masonic Lodges. The hospital features not only patient care but also laboratories where extensive cancer research is carried on. The hospital also holds the University Cancer Detection Center which seeks to discover improved methods for early cancer detection.

Another feature of the hospital is its rehabilitation program, through which many cancer patients have returned to productive lives while undergoing periodic treatment. The basic intention of the hospital, which originally had been to provide care for "terminal" cancer patients, has over the years changed to the much brighter aim of providing hope and rehabilitation in the control of cancer.

Thus, the plaque commemorating the two-story addition reads "To Dispel Darkness, To Light the Way: The Masons of Minnesota have added to the Masonic Memorial Hospital two additional floors dedicated to the end that man's afflictions may one day be conquered."

LIST OF UNIVERSITY OF MINNESOTA MINNEAPOLIS CAMPUS PUBLIC EVENTS  
WEEK OF MARCH 26-APRIL 2

- Sun. -- Mar. 26 -- G. E. College Bowl---University of Minnesota team meets with Boston College team on nationwide television broadcast; 4:30 p.m., NBC. See it on KSTP, channel 5.
- Mon. -- Mar. 27 -- University Gallery---"Photographs by Nicholas Dean," visiting professor, department of studio art; opening, 7-9 p.m. Mon.; show runs through April 26. M.F.A. Thesis shows---Don Schule, sculptor, and James Sahlstrand, photographer; third floor, Northrop auditorium. Gallery open school hours weekdays. Free.
- Mon. -- Mar. 27 -- Coffman Union Gallery---Stout State University Faculty Exchange Show; "Selected Lithographs by Zigmunds Priede," University art faculty; gallery open 9 a.m.-8 p.m. Monday through Saturday. Free.
- Mon. -- Mar. 27 -- Special lecture series---"Problems of the Decade;" March lecture, "The Experimental City," by Athelstan Spilhaus, professor of geophysics; 7:45 p.m., Room 309 Aeronautical Engineering. Admission by series ticket only.
- Tues. - Mar. 28 -- Lecture, "Women's Role in the Arab Countries," by Mrs. Edvick Shayboub, women's program director for Radio Lebanon and writer for Voice of America; guest speaker at Arab American Club meeting, 8 p.m., Coffman Union women's lounge. Free.
- Wed. -- Mar. 29 -- Special lecture series---"Studies of the Mystical Experience;" Joseph Campbell, professor of literature, Sarah Lawrence College, speaks on "The Serpent Power," 8 p.m., Minnesota Museum of Natural History auditorium. Free.
- Wed. -- Mar. 29 -- Spring Lecture Series: "American Antiques"---this week's lecture, "American Decorative Arts---A General Definition," by Marvin D. Schwartz, curator, decorative arts, Brooklyn Museum; 8:30 p.m., Mayo auditorium. Series or individual lecture tickets.
- Thurs.- Mar. 30 -- Convocation---William Clauson, troubadour, singer of folk songs and ballads; 12:15 p.m., Coffman Union main ballroom. Free.
- Thurs.- Mar. 30 -- Special lecture---"Byzantine Churches in Cyrenaica," by Richard G. Goodchild, formerly from Department of Antiquities of Libya; 3:15 p.m., Room 50, Architecture. Free.
- Fri. -- Mar. 31 --  
and University Film Society---"Shadows of Forgotten Ancestors;"
- Sat. -- April 1 -- 7:30 and 9:30 p.m., Friday; 8 p.m., Saturday. Museum of Natural History auditorium. Tickets.
- Sat. -- April 1 -- Concert---Phi Mu Alpha (music fraternity) 8 p.m., Scott hall. Tickets.

CIC PILOT PROGRAM  
TO MAKE FILMS FOR  
GEOLOGY CLASSES

For further information, contact:  
GLENN ICKLER

(FOR IMMEDIATE RELEASE)

The University of Minnesota department of geology and geophysics will share in the benefits of a new pilot program devised to improve, and to reduce the cost of, teaching basic college geology.

A grant of \$50,335 has been awarded by the National Science Foundation (NSF) to the University and ten other institutions working together under the Committee on Institutional Cooperation (CIC). The CIC is composed of the Big Ten universities plus the University of Chicago.

The grant will be used to support a feasibility study of the use of modern visual-aid techniques in the teaching of undergraduate courses in geology.

The new program is expected to cut down the number of costly field trips ordinarily needed to give students a chance for close observation of geologic processes. Movie films, color slides and videotapes of geologic features will be used as classroom substitutes for some field trips.

University of Minnesota beginning geology classes, which consist of about 3,000 students a year, now are taken on one or two field trips each quarter of their first year, according to Professor Tibor Zoltai, chairman of the University department of geology and geophysics and a member of the CIC geology committee.

Zoltai said enrollment in these classes has been increasing steadily each year, making field trips more costly and difficult.

Minnesota faculty members who helped plan the pilot project are Donald L. Graf, professor of geology and geophysics on the Minneapolis campus, and Professor R. L. Heller, head of the geology department at the University of Minnesota, Duluth.

First films for the study will be made at the Two Creeks Forest Bed at Manitowoc, Wis., on the shore of Lake Michigan. The site is famous for the evidence it shows of late glacial advances and the recent geologic history of the Great Lakes.

In addition to the films and photos, samples of soils, till, sediments and vegetation will be gathered for classroom observation.

TAPE OF FINANCIAL DATA  
WILL AID 'U' BUSINESS  
RESEARCH, TEACHING

UNIVERSITY OF MINNESOTA  
NEWS SERVICE-220 MORRILL HALL  
MINNEAPOLIS, MINNESOTA 55455  
TELEPHONE: 373-2126  
MARCH 27, 1967

(FOR IMMEDIATE RELEASE)

For further information, contact:  
NANCY PIRSIG

A valuable computer tape containing financial data will be presented to the University of Minnesota School of Business Administration Wednesday (March 29) by Standard Statistics Company, Inc., New York City, a subsidiary of Standard & Poor's Corp.

The gift will mark "a substantial step forward in computer financial analysis research" at the University, according to Harold W. Stevenson, professor of finance.

The presentation will be made at 2 p.m. Wednesday in Room 415 Business Administration building. Stanley Levine, associate director of research and development for Standard Statistics, will present the Compustat tape to Paul Grambsch, dean of the School of Business Administration. Then Levine will discuss the use of the tape with faculty, students and members of the financial community.

The tape contains annual data on around 1,000 companies---900 industrials and 100 utilities---for a 15-year period.

"Compustat tapes permit financial analysts to retrieve balance-sheet and income-statement data and ratios for companies," Stevenson explained, "to make comparisons of companies, to screen for companies with certain growth rates or other attributes, to simulate portfolio selection and capital-requirement projections, and various correlation analyses. The Compustat service does away with the tedious task of extracting information 'by hand' and allows analysts to perform more detailed and sophisticated analysis than was formerly practical."

Subscribers to Standard & Poor's investment service receive manuals containing investment data. The Compustat service is a way of updating these data annually and quarterly by use of computer tape. A commercial subscription to this service costs around \$11,000, plus \$5,000 for annual updating and \$3,800 for quarterly updating. The gift to the University includes not only the initial copy of a tape, but also will provide for future updating. "Therefore, we regard this as a very substantial gift," said Stevenson.

Minnesota's application for the gift was accepted, according to Stevenson, "because of a demonstrated interest in financial analysis research and in classroom applications." A graduate class in investment management will use the tape this quarter.

6 LECTURES  
SET AT 'U'  
ON RETARDATION

For further information, contact:  
GLENN ICKLER

(FOR IMMEDIATE RELEASE)

A series of six lectures on recent advances in the understanding and treatment of mental retardation will be sponsored by the University of Minnesota special education department in April and May.

The lectures will be given by six nationally known experts on Monday evenings, beginning April 3, in the Minnesota Museum of Natural History on the Minneapolis campus. Each talk will begin at 8 p.m.

The series will be open free of charge to professional workers, parents and laymen interested in mental retardation, according to James E. Turnure, assistant professor of special education.

Turnure said that the number of mentally retarded children and adults in the United States is estimated to be 5.5 million. Until recently, he said, the immensity of the problem was virtually ignored and little attention was given to its causes, treatment and prevention.

Presidents John F. Kennedy and Lyndon B. Johnson both appointed national committees on mental retardation and their work has resulted in such rapid development in the knowledge of mental retardation that it is difficult to remain informed of the current status of such developments, Turnure said.

The lecture schedule:

April 3 --- Dr. Harry H. Gordon, dean of the Albert Einstein College of Medicine, Yeshiva University, New York City, "A Multidisciplinary University Approach to Mental Retardation."

(MORE)

April 10 --- Mrs. Cynthia Deutsch, associate research professor of psychiatry, New York Medical College, New York City, "Socio-cultural Factors in Mental Retardation."

April 24 --- Robert Levy, University of Minnesota law professor, "Legal Controls and Protection for the Mentally Retarded."

May 1 --- Edward F. Zigler, Yale University associate professor of psychology, "Psychological Approaches to Mental Retardation."

May 8 --- Dr. Gerald LaVeck, director of the National Institute of Child Health and Human Development, "Mental Retardation Activities at the National Institute of Child Health and Human Development."

May 15 --- Samuel A. Kirk, director of the Institute for Research in Exceptional Children at the University of Illinois, "Mental Retardation vs. Learning Disabilities."

The series was planned by Turnure; Professor Harold W. Stevenson, director of the Institute of Child Development, and Maynard C. Reynolds, director of special education.

FOREIGN STUDENTS AT 'U'  
PLAN ALL-NEW INTERNATIONAL  
SPRING FESTIVAL APRIL 7-9

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

An entirely new format will be employed this year when the foreign students at the University of Minnesota present their ninth annual International Spring Festival Friday, Saturday and Sunday, April 7, 8 and 9, at the University, according to Seshadri Velamoor, an Indian graduate student in industrial engineering who is this year's festival chairman.

For the first time, the festival will vary its pattern, Seshadri said, introducing foreign games outdoors at noon, a closing banquet for Model U.N. participants, a group of international plays and an International Fête in Coffman Memorial Union (CMU).

Such foreign-to-the-University campus games as cricket, rugby and a nameless Indian ball game will be introduced to noontime crowds on the Mall in front of CMU during the weekdays (Monday through Friday, April 3-7) preceding the festival, according to Seshadri. "It is our hope that we can persuade some of the University's sports teams to compete with us," he added. "The baseball team might find cricket interesting, or some of us might tangle with the freshman football squad in soccer or rugby."

On Friday, April 7, three plays will be presented at 8:30 p.m. in Scott hall auditorium. The Arab American Club will give a modern Egyptian satire, "The Lady and the Thief," and the Indo-American Club will enact a 7th-Century Indian Sanskrit play, "The Saint and the Courtesan." The African Student Association will give "The Trials of Brother Jero." Tickets at \$1.75 for adults and \$1.25 for students may be purchased now from International Student Council (ISC) members at the ISC office, Room 349 CMU, and at other places on the campus that will be announced soon, Roger Prestwich, festival plays chairman, said.

(MORE)

The plays will be repeated at 8:30 p.m. on Saturday, April 8, as a part of the program observing the closing of the Model U.N.

"This year we are taking into consideration that there is a natural affinity between the annual Model U.N. program of the Union Board of Governors and the festival," Seshadri explained. "For the first time, we are combining our resources and our programs and the ISC will give the closing banquet and program for the Model U.N. group of students from the Midwest. We understand that U.S. Senator Walter F. Mondale (D.F.L.-Minn.) has accepted our invitation to address the combined groups and interested public after the dinner."

The menu for the dinner at 5:30 p.m. Saturday, April 8, will be truly international with Thai chicken-velvet corn soup; French filet of steak, Bernaise; African Congo breast of chicken; Chinese sweet and sour pork; Scandinavian au gratin potatoes; an Asian fresh fruit platter and a European cheese tray. Tickets for the dinner and for Senator Mondale's speech may be bought now from the same sources as those for the plays. Dinner prices are \$2.85 for adults and \$1.75 for youngsters under 12.

"Since the second performance of the plays will be given in Scott hall immediately after the banquet," Prestwich said, "we hope that many of the banquet guests will attend both affairs. We will have a 'package deal' available---tickets for both the banquet and the plays will be sold in advance for \$4.35 for adults and \$4 for the youngsters."

Three floors of Coffman Union will be commandeered by the ISC on Sunday, April 9, for the festival's third major innovation---the International Fête. From 12 noon until 5 p.m. the lounges, corridors and public rooms of CMU will be filled with games, displays, slide shows of foreign lands and members of the 23 ISC member clubs costumed in their native dress.

Further information about this year's International Student Festival may be obtained by calling the ISC office, 373-5247, during school hours.

'U' PIANIST'S WORKS  
TO BE PRESENTED  
IN CONCERT APRIL 9

For further information, contact:  
DORIS FENICK

(FOR SUNDAY MUSIC PAGE OR COLUMN)

A concert of new works by pianist Paul McIntyre, assistant professor of music at the University of Minnesota, will be presented Sunday, April 9, at the University.

Sigma Alpha Iota, professional music sorority at the University, will sponsor the program at 8:30 p.m. in Scott hall auditorium. Members of the sorority plus Twin Cities-area professional musicians will perform McIntyre's compositions.

McIntyre, a pianist of international note who did most of the work on these new pieces during a Huntington Hartford Foundation resident fellowship in the summer of 1963 and on a University Graduate School research grant during the summer of 1966, will appear in the concert only as accompanist in a one-act comic opera, "This Is Not True."

The first number on the program, "Permutations on a Paganini Caprice" for string quartet, was written for the famous Paganini Quartet, McIntyre said, and was suggested to him by the quartet's leader, Henri Temianka, Los Angeles.

Taking part in the Paganini piece, which the composer refers to as "variations on the logical variations," will be four University music department students: Nancy Muehr, first violin; Barbara Hochberg, second violin; Helen Lovestedt, viola; and Kathy Winckler, 'cello.

A poem by Walt Whitman provided the idea for the second number, "Out of the Cradle Endlessly Rocking," McIntyre said. This cantata for voice, flute, viola, 'cello and harpsichord will feature Marguerite Gignac-Hedges, vocal teacher at the College of St. Catherine, St. Paul, as soloist. Roberta Zietlow, flautist, and Carol McCarthy, harpsichordist, will join Misses Hochberg and Winckler in this number.

(MORE)

James Schevill, head of the poetry center at San Francisco City College, wrote the libretto for the comic opera, "This Is Not True," while McIntyre was in California at the Hartford Foundation. Loyce Houlton, director of the Contemporary Dance Playhouse, Minneapolis, will be stage and costume director for the production.

The plot of "This Is Not True," McIntyre said, consists of a love scene played as it would be done, first, by a contemporary couple, then as it would have been done in the 19th Century, the 17th Century, and finally, by Adam and Eve.

Soloists for the comic opera include Connie Barnett, Carol Bober, Leroy Lehr, Sharron Rome, Eugene Bartlett, David Graham, Donald Rodvold, Marcia Wunderligh and Robert Bergman.

Tickets for the program at \$1.50 (\$1 for students) are available at the University music department, 107 Scott hall, or at the door.

CLERGY TO EXPLORE  
'HIGHER EDUCATION TODAY'  
IN CONFERENCE AT 'U'

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

An experimental attempt will be made by the University of Minnesota to acquaint clergy and religious leaders of all faiths with the issues, needs and resources of higher education.

A three-day program, The Local Congregation and Public Higher Education Conference, will be held on the Minneapolis campus Monday through Wednesday (April 3-5). It is sponsored by the department of conferences and institutes of the University's General Extension Division.

The program will provide an opportunity for clergy and laity to learn from university and college persons the issues discussed by administration, students and faculty.

The opening speech, "Overview of Higher Education Today," will be delivered by Paul Cashman, assistant vice president for educational relationships and development at the University. Other lectures will include "Ethical Decisions Necessary in Light of Developments in the Natural and Social Sciences," presented by the Rev. Duane Addison, a Lutheran minister at the State University of Iowa; and "An Ethical Response to Student Culture," presented by Newman Chaplain John Kervin of Wayne State University, Detroit.

Conference participants will spend both evenings actively involved in campus life and will have a chance to observe first hand the type of leisure and organized activity available to students.

The conference is designed primarily for clergy---both Jewish and Christian---and laymen who live and work in college and university communities in Minnesota, western Wisconsin and northern Iowa.

Fee for the program is \$5. For further information contact the director, Department of Conferences and Institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis.

CURATOR TO DISCUSS  
BYZANTINE CHURCHES

"Byzantine Churches in Cyrenaica" will be discussed by Richard G. Goodchild, visiting associate curator at the Kelsey Museum, Ann Arbor, Mich., in a special lecture at the University of Minnesota Thursday (March 30).

The illustrated lecture, at 3:15 p.m. in Room 50 Architecture, will be open free to the public. It is jointly sponsored by the University's departments of art history and concerts and lectures.

Goodchild has been in the department of antiquities of Libya since 1953 and next year will be professor of the archaeology of the Roman Provinces at the University of London.

BIRD FILM SET  
AT 'U' MUSEUM

A color sound film, "Birds of the British Countryside," will be shown at the Minnesota Museum of Natural History in the museum's Sunday afternoon program April 2.

The program, at 3 p.m. in the museum auditorium, is open free to the public and is part of the regular Sunday program presented during the winter and spring months.

The final program in this year's series will be presented Sunday, April 9, according to Professor W. J. Breckenridge, museum director, who will show his own film, "Sand Country Wildlife."

NSF GRANT  
TO HELP REMODEL  
SNYDER HALL

For further information, contact:  
GLENN ICKLER

(FOR IMMEDIATE RELEASE)

A \$58,500 grant to help finance the remodeling of Harry Snyder hall on the University of Minnesota's St. Paul campus has been presented to the University by the National Science Foundation.

Several areas of the 39-year-old building will be remodeled at an estimated cost of \$168,000 to provide a modern small-animal genetics research area, office space and expanded molecular genetics laboratory space, according to Professor Ralph E. Comstock, head of the University genetics department.

Remodeling work will be done in the basement and on the second and third floors, Comstock said. It is the first major construction project begun by the College of Biological Sciences since it began operating about 18 months ago.

A major feature of the work will be the construction of a 1,400-square-foot area in the basement for small-animal genetic research. Such research is now scattered about the campus in small laboratories in Peters hall and the Plant Science Research building.

"One thing we're very happy about is that we'll have a dual air conditioning system in the new lab," Comstock said. "This means there will be a back-up system to take over in case of a breakdown in hot weather."

He said temperature control is important because some of the subjects under study are very valuable specimens which could not be replaced if lost. A population of mice that he is working with, for example, has been under selected breeding for 35 generations over a 10-year span.

(MORE)

A genetics laboratory for undergraduate students also will be built in the basement for the use of students on the St. Paul campus. Comstock noted that the growing number of students has exceeded the capacity of the present laboratory in the Zoology building on the Minneapolis campus.

On the second floor, an equipment room to house "moderately sophisticated" analysis equipment, a 600-square-foot enzyme laboratory and some office spaces will be built, Comstock said.

A third-floor area will be remodeled to provide more space for a molecular genetics research laboratory.

Work is to be completed in January 1968.

Snyder hall was built in 1928 as the Plant Industries building. It was renamed in 1938 in honor of Harry Snyder, an agricultural chemistry and soils professor at the University for 18 years and chief of the agricultural chemistry and soils division when he left the University in 1909.

The building also houses organic chemistry facilities and the offices of the College of Biological Sciences.

UNION MEMBER UNREST  
TO BE ONE TOPIC AT  
LOCAL NLRB CONFERENCE

For further information, contact:  
Beth Kent, 373-5166

(FOR IMMEDIATE RELEASE)

Following the recent local strike at Honeywell Inc., union members rejected a settlement offer described by a management spokesman as "the most generous in the history of the company."

Similarly, last year's nationwide strike of airline mechanics was considered the result of failure on the part of local lodges to ratify an agreement recommended by the union bargaining committee.

These examples of rank and file union membership unrest are part of a relatively new phenomenon in the field of labor relations which will be discussed at a National Labor Relations Board (NLRB) Conference scheduled for April 6 and 7 at the Pick-Nicollet Hotel in Minneapolis.

The program also will serve as the 18th annual conference of the University of Minnesota's Industrial Relations Center, and will be conducted by the University's Labor Education Service in cooperation with the department of conferences and institutes of the University's General Extension Division.

The conference will explore the causes and consequences of employe dissatisfaction from several viewpoints. Robert Haveman, labor relations director at Honeywell, will discuss the implications for management, and Harold Seavey, assistant regional director of the AFL-CIO, will present a labor view of the challenges the unrest presents to trade union leadership.

The relationship of government policy and programs to employe dissatisfaction will be examined by Charles LaVallee, commissioner of the Federal Mediation and Conciliation Service; Alan Bruce, assistant to the regional director of the NLRB; and John Beaty, Minneapolis area director of the Office of Labor-Management Welfare and Pension Reports.

(MORE)

The top legal appeal officer in the nation, Arnold Ordman, general counsel of the NLRB, Washington, D.C., will keynote the conference and speak on its theme, "The Role of the NLRB in Modern Labor Relations."

The NLRB itself will come under fire in another session. Richard Felhaber, a leading industrial relations attorney with the St. Paul firm of Felhaber, Larson, Fenlon and Vogt, will question the possible erosion of management rights by NLRB rulings. Laurence Gold, associate general counsel of the AFL-CIO, will discuss the adequacy of remedies in unfair labor practice cases.

A panel of respondents will reply to the critique of the NLRB. Members include Professor Cyrus Smythe, Jr., of the University's industrial relations department, and Clarence Meter, Region 18 director of the NLRB.

Concurrent workshops will be conducted both days of the conference. Some topics to be covered include election procedures, unfair labor practices, free speech rights and labor and management, and organizational activity. The workshop staff will include Julius Serot, assistant general counsel, District Court branch, NLRB, Washington, D.C.; Don R. Sheriff, director, Center for Labor and Management, University of Iowa; and Jack Flagler, director, University of Minnesota Labor Education Service.

The program is open to industrial relations officers, trade union representatives and specialists in labor law, and is designed to update their knowledge on NLRB rulings, policies and procedures.

Fee is \$15 and includes two luncheons. For registration materials or further information, write or call the Director, Department of Conferences and Institutes, Nolte Center for Continuing Education, University of Minnesota, Minneapolis, Minn., 55455; telephone 373-3151.

A clinic for school board members, superintendents, legislators and local government officials will be held on Thursday (March 30) at Jax Cafe, 1928 University ave. NE., Minneapolis, from 2 to 10 p.m.

The clinic, designed to promote understanding of the problems of education in Minnesota, will consider two major topics related directly to Minnesota and to metropolitan education: "Financing Education in Metropolitan Areas" and "The Statewide Study of Elementary and Secondary Education in Minnesota."

Speakers who will address the group in the afternoon program, on finance, are Paul V. Grambsch, dean of the University's School of Business Administration, on the "Twin Cities Metropolitan Area Tax Study" and Professor Allen Campbell, Maxwell Graduate School, Syracuse University, on "Financing Public Services in Metropolitan Areas." Campbell's presentation will concentrate on the problems related to competing demands for support of public services and some strategies employed nationally for solving the problems.

The evening program will explain the scope and nature of the statewide study with emphasis on the metropolitan area. Participants will be Duane J. Mattheis, Minnesota commissioner of education; Otto Domian, director of the University's Bureau of Field Studies and Surveys, and study director; W. K. Flesher, president of Cooperative Educational Enterprises, Inc., Columbus, Ohio, and general project consultant; Herbert L. Coon of Ohio State University and consultant in educational programs; W. Monfort Barr, director of the Bureau of School Studies, Indiana University, and consultant in finance; and Stanley Niehaus, superintendent of schools in East Peoria, Ill., and consultant in professional personnel.

The clinic is sponsored by the Minnesota School Boards Association and the Educational Research and Development Council of the Twin Cities Metropolitan Area.

SEN. JAVITS WILL SPEAK  
AT U OF M MONDAY

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Minneapolis---U.S. Senator Jacob K. Javits, (R-N.Y.) will speak in Minneapolis Monday (April 3) at a University of Minnesota convocation.

The senator will talk at 12:15 p.m. in Coffman Memorial Union main ballroom. His talk will be open free to the public and is being presented by the convocations committee and the department of concerts and lectures at the University.

Javits, who has been mentioned as a candidate for the Republican party's nomination for vice president in 1968, is senior U.S. Senator from New York and a law partner in the firm of Javits, Trubin, Sillcocks, Edelman & Purcell, of New York City.

The son of immigrant parents, Javits was born in a tenement on New York City's Lower East Side on May 18, 1904.

He was educated in New York's public schools, attended night classes at Columbia University, was graduated from New York University Law School in 1926, and was admitted to the bar the following year.

During World War II, he served with the Chemical Warfare service, U.S. Army, in both the European and Pacific theaters, attaining the rank of Lieutenant Colonel.

Javits first ran for public office in 1946 as the Republican Liberal candidate for the House of Representatives in New York's 21st District. He was elected the first Republican representative from that district since 1923 and was reelected three times. After eight years in Congress, he ran for attorney general of New York state in 1954, and was the only Republican on the state ticket to win that year.

(MORE)

In 1956 he was elected to the U.S. Senate, and was reelected in 1962.

During his service in the House of Representatives, Javits was a member of the foreign affairs committee. In the Senate, he is the ranking Republican on the committee on labor and public welfare, and a member of the judiciary and the government operations committees, and the select committee on small business. He was chairman for seven years of the economic committee of the NATO parliamentarians' conference and is now chairman of a special committee on the economic development of less-developed NATO nations.

The senator is best known in his legislative career for his work in civil rights, civil liberties and foreign economic policy. He has been active also in legislation dealing with housing, education, public welfare, immigration, labor, health, travel, small business and the arts and culture.

-U N S-

Note to Editors: A news conference for Sen. Javits will be held at 10 a.m. Monday, April 3, in the Minneapolis-St. Paul International Airport press room.

NEWSWEEK FOREIGN  
CORESPONDENT  
TO SPEAK AT 'U'

For further information, contact:  
NANCY PIRSIG

(FOR IMMEDIATE RELEASE)

The senior foreign correspondent for "Newsweek" magazine, Arnaud de Borchgrave, will give a free, public talk at 3:15 p.m. Thursday (April 6) in Mayo auditorium on the University of Minnesota Minneapolis campus.

His topic will be "American Globalism 1967."

De Borchgrave, 39, a native of Belgium, has studied in five countries and speaks Flemish, French, English, German and Spanish. During World War II he escaped to England on the last boat that left Bordeaux during the Nazi invasion of France.

He joined Newsweek as a correspondent in 1951. He has served twice as the magazine's international affairs editor, from 1955-59 and from 1962-63. In between he was senior roving correspondent, covering Western Europe, the Middle East and Africa. He has reported from 60 nations.

De Borchgrave operates from headquarters in Paris. He covered the Israeli-Pakistan border dispute and was the only correspondent covering the original French air drop into Dienbienphu, where he parachuted into the midst of the fighting while paratroopers were still dropping from the sky.

He covered the fighting in the Congo in 1964, reporting from both government and rebel camps.

In 1966, de Borchgrave moved to the battle fronts of Vietnam, where he was wounded in the battle for Hill 400. He had previously been wounded twice while serving with the British Navy in World War II.

De Borchgrave's appearance at the University is sponsored by the School of Journalism and Mass Communication.

NOTED LANDSCAPE DESIGNER  
TO HAVE EXHIBIT AT 'U'

For further information, contact:  
GLENN ICKLER

(FOR IMMEDIATE RELEASE)

A collection of the designs, writings and memorabilia of Frederick Law Olmsted, noted 19th-century landscape architect and land planner, will be exhibited at the University of Minnesota April 3-23.

The collection will be displayed in the central court of the Architecture building on the Minneapolis campus. The exhibit will be open from 8 a.m. to 6 p.m. Mondays through Fridays and from 1 to 5 p.m. on Sundays.

Two lectures about Olmsted are scheduled in conjunction with the exhibit.

Roger Martin, associate professor of architecture and landscape architecture, will discuss "Frederick Law Olmsted: Open Space Designer With a Vision" at 3:30 p.m. Monday, April 10, in Room 130 Architecture building.

"Olmsted Concepts Extended: Landscape Corridors" will be discussed by Professor Phil Lewis of the University of Wisconsin Environmental Design Center at 3:30 p.m. Friday, April 21, in Room 130 Architecture building.

Olmsted, a native of Hartford, Conn., was the designer of New York's Central park and Boston's coordinated system of parks and parkways. His work ranged from urban and community planning to designing the grounds of the Chicago World's Fair in 1893. He died in 1903 at the age of 81.

A pioneer in the national parks movement, Olmsted was head of the commission which established Yosemite National park and was instrumental in the establishment of the Niagara Falls reservation.

Olmsted's interest in social problems led him to organize the Civil War Sanitary commission, which later became the American Red Cross.

SWEDISH EDITOR  
STUDYING AT U OF M  
SPRING QUARTER

(FOR IMMEDIATE RELEASE)

A newspaper editor from Sweden has been named an "honorary fellow" for the spring quarter at the University of Minnesota's School of Journalism and Mass Communication, according to Director Robert L. Jones. He is Nils Gunnar Nilsson, cultural editor of "Kvallsposten," a daily newspaper in Malmo, Sweden.

Nilsson holds a scholarship from the Swedish Publicists' Club for the purpose of studying press research methods in the U.S.

He received his M.A. degree from Lund University where he served as assistant in the department of history and literature from 1959 to 1962.

Nilsson has traveled to Africa, Iceland, Greenland and England for journalistic study and reporting missions.

USIA OFFICER  
TO VISIT  
UNIVERSITY CAMPUS

For further information, contact:  
DORIS FENICK

(FOR IMMEDIATE RELEASE)

Burnett F. Anderson, special assistant to the director of the United States Information Agency (USIA), will visit the University of Minnesota Tuesday and Wednesday (April 4 and 5) to discuss with students the work of the agency.

Anderson's discussion topic will be "The Role of USIA in World Affairs." He will also tell students about Washington, D.C., and overseas employment opportunities in the USIA.

Four classroom talks and an informal coffee hour session with interested students and faculty members/ are planned. The open session will be at 2 p.m. Tuesday in Room 170 of the Business Administration building on the West Bank.

A native of Grantsburg, Wis., Anderson joined the USIA as director of press relations in 1954. He had previously worked as press secretary for Minnesota Governors Harold E. Stassen and Edward J. Thye, a staff writer and political columnist for the "Minneapolis Daily Times," a foreign correspondent in the Scandinavian countries and press officer for the Marshall Plan in Germany.

Anderson became director of planning for the USIA in Washington in 1961. He was appointed assistant deputy director in 1962, associate director in 1964 and deputy director for policy and plans in 1965. He became a special assistant to the director in February and is awaiting assignment overseas.

Anderson's visit is sponsored by the Public Administration Center.
