ONE RELIGION

People are segregated into different faiths because the ancestors of each accepted the faith of the community where they happened to live, and each in turn accepted the faith of the family into which each happened to be born. Why not reject segregated religion and accept inclusive One Religion which offers one religion for all?

If interested, please send name and address to Joe Arnold, One Religion, 16 Garden Street, Cambridge, Massachusetts, 02138.

Most of the people we've trained as computer programmers never thought they had the brains for the job.

Their impression of computers was the generally accepted one: that you need a Ph.D. to run them.

Actually all you need is a high school education and some professional training.

ECPI training.

It's not easy, mind you. And it's not cheap. But when you've earned your ECPI diploma you'll be in a position to command a highly respectable salary with even higher potential.

And you'll be in a field where the job comes looking for you. (This year, some 25,000 programmer jobs will remain unfilled for lack of trained personnel.)

That puts the supply and demand theory strictly in your favor.

Right now, the smartest thing you can do is to send for our free computer programmer sample aptitude test.

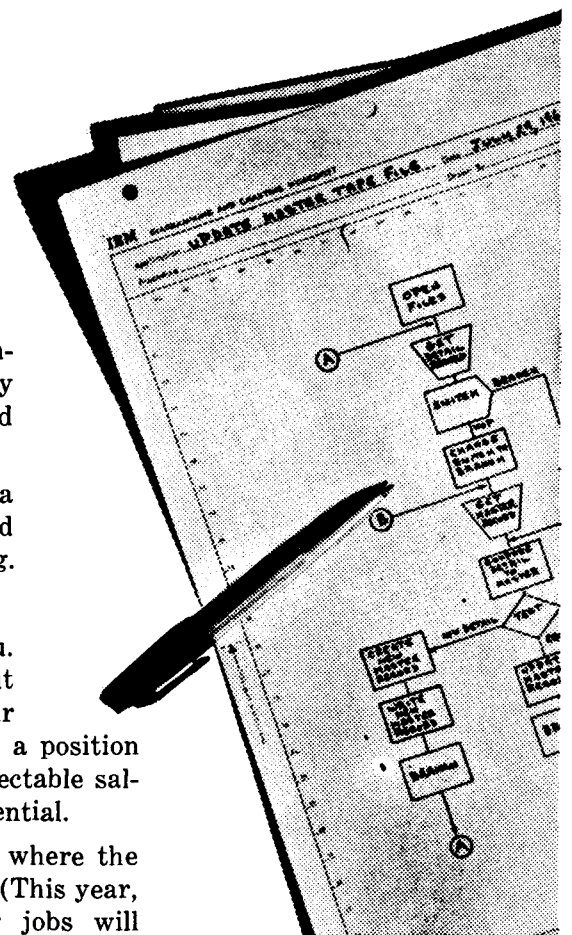

Maybe you've never thought you had the brains for the job. The test may prove otherwise.
