<b>Note: xc means approved but under special conditions</b>										
<b>Note: NY has no "approved list" but allows all species except piranha, grass carp and hybrid grass carp (Hulbert, personal communication).</b>										
<b>Note: OH requires species other than those listed above to have B facility classification. Div. Of Wildlife prohibits diploid carp, bighead carp, black carp, silver carp, bighead amur, walking catfish, hybrids of aforementioned species and Australian crayfishes of the genus Cherax.</b>										
<b>Note: WI has no "approved list" but allows all indigenous species except lake sturgeon. Non-natives must be approved by DNR and DATCP. DNR may require environmental assessment (Marcquenski, personal communication).</b>										
<b>Note: MI allows species that are naturally indigenous; have been naturalized; could not perpetuate in the waters of the state; species held in a confinement research facility for purposes of research that, on the basis of that research, may be recommended to be included on the list of approved aquaculture species. Also, under Act No. 451 of Public Acts of 1994 some species are prohibited.</b>										
<b>Note: PA restricted species must be reared in closed systems.</b>
