1972

## HEALTH SCIENCES CONTINUING EDUCATION

Health Sciences Continuing Education was established as a function of the Vice President for Health Sciences' Office in January of 1972. A Coordinator was named and assigned the responsibility of carrying out, at the continuing education level, the mission of the health sciences. Each unit of the health sciences is encouraged to develop "inventive and imaginative" programs, based on the actual needs of their discipline. All units are encouraged to experiment with interdisciplinary programs and to actively assist health professionals in developing a "team" approach to patient care.

A philosophy of life-long learning and responsiveness to professional needs is now a characteristic of both "professional-in-training" and "professional-in-practice" education in the health sciences. The faculty of the health sciences is ready to assist you in meeting your educational needs as a practicing professional. If you have questions or suggestions concerning interdisciplinary continuing education in the health sciences, or if you wish to discuss any aspect of this booklet, please contact:

William J. Hodapp  
Coordinator  
Health Sciences Continuing Education  
7208 Powell Hall  
University of Minnesota  
Minneapolis, Minnesota 55455  
612-373-8973

### ABOUT THIS BOOKLET

This is the third publication which lists all of the continuing education offerings of the University of Minnesota Health Sciences. It is presented in a new, more concise format and it will be published twice each year. The new format and publishing schedule will provide you with a more current source of program announcements which will be of assistance in making your plans for continuing education attendance. You are encouraged, by the new chronological listing of programs from every professional discipline, to consider the potential which programs provided by disciplines other than your own may have for your continuing education.

## HOW TO USE THE BOOKLET

The format of the booklet features a chronological listing of all health sciences offerings in continuing education for the period of January 1, 1976, through June 30, 1976. Additional programs which are planned by any unit will be announced through special mailings. This booklet will provide advance notification of titles and dates for:

- Continuing education programs in your discipline
- Continuing education programs in other disciplines which may be of interest to you
- Interdisciplinary continuing education programs

The names and addresses of those individuals who are listed with each program as the contact person are found on page 3. If you are interested in receiving detailed information on programs in disciplines which do not mail to you on a routine basis, please write directly to the contact person who is listed for those programs. You will be sent detailed information from those sources as soon as program brochures are printed.

### Sample Program Listing

Course Date	Course Title
February 29-31	BASIC HELPING SKILLS
Site	U of M, Mpls School of Public Health Robert Veninga
Contact Person	\$58.00 -- Instructor's consent
Course Fee	Limitations for attendance (if any)

You may wish to participate in formal coursework -- either for credit or on an audit basis -- as part of your personal continuing education. Bulletins which provide information and registration instructions may be obtained from a variety of sources at the University. Some of these sources are listed on page 26.
