

# The Minnesota Daily

VOLUME XXVII

THE WORLD'S LARGEST COLLEGE DAILY—UNIVERSITY OF MINNESOTA, TUESDAY, OCTOBER 13, 1925

No. 11

**DON'T CROWD**  
Folwell hall is a school building not a field house, and the corridors were not intended to be used as gridirons.

**GOPHERS**  
Will meet Gophers in the annual field day to be conducted next Saturday in the engineering and agricultural colleges.

## SHAY, RICE, BROWN GET PRESIDENCIES IN CLASS VOTING

Sophomore Academics Nominations Held Yesterday Under Supervision of Dean Nicholson

## LAW CHOICES UNANIMOUS

Dates Announced for Balloting in College of Engineering and Architecture

A new president for freshmen law students, and one for junior dental nurses, were developments of class elections held yesterday.

**Rice Law President**  
Walter Rice heads the law class as president, with Lincoln Kattler, vice-president; and Gilbert Erickson, secretary. Clarence Pearson will represent the freshmen as one member of the law school council, and Ulysses Santini has been chosen for the two year term.

**Brown Heads Nurses**  
Isabel Brown was elected president of the junior dental nurses; vice president, Mary Helen Kyle; secretary, Mary Helen Kyle; treasurer, Katherine Gardner; Irene Murphy, social chairman, and Margaret Mattand class reporter.

**Other Dates Announced**  
Junior and senior elections in the School of Business will be held Friday, and senior law students will meet Wednesday at 10:20 a. m.

**Academic Juniors Will Vote Wednesday, and Seniors Friday, all in the old library auditorium at 4:30.** These elections were called off because no one turned out for the meetings which were scheduled for yesterday.

**80 SELECTED IN MASQUER TRIAL**  
Candidates for Membership Placed on Waiting List of Dramatic Club

Eighty prospective members were admitted to the waiting list of the Minnesota Masquers at the recent tryouts. Donald Arbury was elected treasurer, and Joseph Chopen secretary. A stage tea was held for those admitted to the list.

The prospective members include: Jordan Blake, Virginia Collins, Theodore Davis, William Hyland, Jr., Eleanor Ibberman, Virginia Niess, Gladys Paulson, Marjane Warren, Royal Buckman, John Hummel, Bert Leck, Nathan Davies, Harriet Allen, Hermine Hurley, Eileen Kennedy, Helen Mather, Kenneth Sansone, William Sanderson, Francis Schoff, Russell Brackett, Matthew Levitt, Winifred Lynskey, Ralph Bricker, Betty Pearce, Jack Barton, Howard Woo, Eleanor Gage, Harriet Levinson, Eileen Powers, Ethel Fabian, Beatrice Zoch, Rauff Fossen, Haggerty, Lucy Day Wakefield, John Brown, Charles Burbach, John Stellwagen, Raymond K. Bergerson, Margaret Peterson, Margaret Blanford, Neil Boardman, Janet McNaught, Glidden Joseph Osborne, Gregory Thompson, Dorothy Kelley, Mary Naomi Mindrum, Katherine Fox, Betty Thompson, Melba Hurd, Myrtle Peterson, Florence Bitman, Charles Swenson, Alice Anderson, Mary Leister, Raymond Perlman, Mildred Bois, Lucille De Loy, Barayne Leonard, Mary Doyle, Grace Myles, Bernard Gagnon, Laurence Ringhofer, John Lynard, Maynard Berknes, Gladys Benson, Grace Brown, Henry Roberts, Donald Williams, Donald Bishop, Orville Quackenbush, Edw rd Holmes, Arwin Darkow, Edward Engler, Charlotte Johnson, Orville Chancellor, Bayne Cummins, Ward Dexter, Lincoln Kattler L. Johnson.

## Gopher Business News Drops Into Cellar to Expand

The office of the Gopher Business News is not to remain unmoored in the present "greater Business Building" construction that is now taking place at the School of Business building. This week the staff of the "Gopher" will be summarily deposited in their present quarters in room 111 and will be deposited in one of the basement rooms now being remodeled.

## SUBJECT DECIDED FOR FIRST DEBATE

Minnesota to Meet Illinois and Iowa in Triangular Event on Dec. 11

Final decision on the subject for the first triangular intercollegiate debate of the year to be held with the Universities of Illinois and Iowa, has been made by the debate coaches of the respective schools.

**Resolved:** That a thorough re-alignment of political forces in the U. S. is necessary, submitted by the University of Illinois, is the one which will be discussed at the intercollegiate event to take place Dec. 11.

Each of the three schools submitted a list of questions for the consideration of the others before the final question was decided upon.

**Discussions, Speeches Mark Meeting Today**  
Speeches and discussions will be features of the second meeting of the Shakespearean literary society, to be held tonight in the fireplace room of the Minnesota union at 7:45. Alfred Riedel will give an address on "Shall Universities Accept Gifts." James Hillie is scheduled to give a surprise speech, the subject of which is being kept a secret from the members of the club. The customary discussion will follow the regular program.

## 'Campus Breeze' Gives New Staff Woolworth Gifts

Hair brushes, soap, dime novels and hand mirrors were handed out as favors at a banquet held in Shevlin hall Saturday evening by the staff of the "Campus Breeze," the 'U' high school's monthly magazine, to the 25 new staff members. The 25 persons attending found their places at the table by means of humorous caricatures drawn of them on their place cards.

**Don Mathewson, editor-in-chief, presided and Rewey Belle Inglis, faculty advisor, and C. W. Boardman, principal, spoke of the plans for the convention of the Minnesota High School Press association to be held here Oct. 30 and 31.** Eleanor King, last year's editor in chief, also made a short speech. Other entertainment was provided by the reporters who acted out a skit with a regulation hero, heroine and villain.

**Stricky were in charge of the plans for the banquet.**

## Minerva Society Will Have Supper Meeting

Minerva Literary society will have a supper meeting at 5 p. m., Wednesday, at the home of Florence Kunne, 3128 Fourth street southeast. Members are requested to notify p. 99 by Tuesday afternoon, if they plan to be present.

## FACULTY GATHERS TO STUDY COLLEGE PROBLEMS WEEKLY

Measuring Student Achievement General Theme for Next Monday's Session

## JOHNSTON TALKS MONDAY

Deans Haggerty and Johnston Speakers; Coffman Will Address Final Forum

Problems of college and university education will be discussed at a series of meetings to be held every Monday evening at 7:30 in room 210 of the old library.

**Haggerty Addresses Meet**  
"Individual Differences in Students" was the subject of the address by Dean Haggerty of the College of Education at the regular meeting last night in the old library.

**J. B. Johnston, dean of the College of Science, Literature and the Arts has been secured for next Monday night and will talk on "The Prediction of Student Scholarships."** W. S. Miller, professor of educational psychology, on Oct. 26, will have as his topic, "Measuring Student Achievement: Marks," on Nov. 2, G. P. Patterson, professor of psychology, will talk on "Measuring Student Achievement Methods for Improvement."

**R. M. West, registrar, at the first conference meeting, gave facts of college enrollment and student elimination and survival.**

**Advising college students will be the subject on which Mr. Patterson will talk on Nov. 9.** E. E. Nicholson, dean of student affairs and Anne D. Blitt, dean of women will treat the subject, student participation in extra-curricular activities. The conference will be held on Nov. 16. Dr. S. Chapin, professor of sociology will talk on educational significance of

## Valasek to Explain New Apparatus at M.E.A. Meet

Member of Physics Department Invents Improved Method of Measuring Electricity in Crystals

Improved apparatus for the measurement of electricity in crystals will be explained by its inventor, Joseph Valasek of the physics department at the M. E. A., which meets in St. Paul Nov. 5, 6 and 7. The study of five years on piezo-electric properties of crystals will be summarized in his speech at the meeting of the association.

The oscillograph which Professor Valasek has adopted and improved from the work of an Englishman is a very simple apparatus by which the quantity of electricity in crystals may be measured. The oscillograph consists of an apparatus by which a crystal may be held rigid at one end while the other is mounted between two needles one of which bears on its tip a tiny mirror.

**Photographs Works**  
An electric charge is then passed through the crystal causing it to change length slightly and rotate the mirror on the needle. It is by measuring the rotation of this mirror that the quantity of electricity in the crystal is measured. By using alternating currents and a photographic plate before a lens in front of the crystal, a picture of the form of the electric wave in the crystal can also be obtained.

**Professor Valasek wrote his master's thesis on "Piezo-Electric and Allied Phenomena in Rochelle Salt" and his doctor's thesis was continued of the same study entitled "Piezo-Electric Activity of Rochelle Salt Under Various Conditions."** For his work in this line he was granted a fellowship by the National Research Council from which research he produced a pamphlet on the "Properties of Rochelle Salt Related to Piezo-Electric Effect."

## Cancer Institute, Todd Memorial Hospital Units Open Doors for Public Inspection

Additions to University Hospital, Furnished by Gifts, Enable Specialists to Devote Entire Time to Research

Opening its doors for public inspection yesterday between 2 and 4 p. m., the Cancer Institute and the Todd Memorial hospital, units of the University hospital, will soon be ready to receive patients.

**Institute \$250,000 Gift**  
Financed by the Citizens' Aid society, of which Mrs. George Chase Christian is the president, the Cancer Institute is a \$250,000 memorial to the late George Chase Christian. Fifty thousand of the amount contributed will be used for technical equipment, including radium. The Howard Baker fund, which the board of regents originally accepted as a gift from the late Howard Baker of Minneapolis to be used in the department of surgery, has been set aside for the exclusive use of the Cancer Institute and some of the income has already been utilized in the purchase of radium.

**To establish and maintain a laboratory for research work regarding the cause and control of cancer is the aim of the institute.** Trained specialists in the field will here be free to devote their entire time to investigating this disease, about which comparatively little is known.

**At the laying of the cornerstone of the Cancer Institute, the American Society for the Control of Cancer sent the following message:**

**"On the occasion of the laying of the cornerstone of this institute, the American Society for the Control of Cancer desires to extend to the founder and to those through whom her noble gift has been made an expression of the appreciative interest with which regards this undertaking.**

**Best Cure Prevention**  
"There is the utmost need of such work, for there is no specific against this disease. To control cancer we must prevent it as far as that can be accomplished, diagnose it as accurately and early in its progress as possible, treat it as skillfully as may be in the hope of effecting a cure, and endeavor to lengthen the lives and ameliorate the sufferings of incurable cases by whatever means our present limited knowledge and long experience have shown are best."

## Todd Memorial Gift of Three

The Todd Memorial hospital is given over to treatment of the eyes, ears, nose, and is the combined gift of Mrs. Frank C. Todd, Mrs. E. C. Gale, and Mrs. Emory Mapes. While the board of regents furnished the balance of the required sum.

The addition of these two units brings the total capacity of the University hospital to 300 beds, while service is offered under three different provisions according to the economic status of the patient. The free service is open to residents of Minnesota only, and applicants must be certified to it by county commissioners. The second service is for those who can afford to pay for hospital expenses, but not for professional care; and the third service is open to those of professional care and hospital expenses, regardless of their place of residence.

**Special features of the new building include the X-ray and radium laboratories; the cancer out-patient department with its examining and treatment offices and rooms on the ground floor; the Frank C. Todd Memorial room for the use of the ophthalmology and otolaryngology staff, on the fifth floor; large open porches on each of three floors; and a two-story amphitheater type lecture room having a seating capacity of 154, located in the north section of the building.**

## ANNUAL MEETING PLANNED

To present to University women the opportunities for doing social service work is the purpose of the annual social service mass meeting and tea to be held in Shevlin hall 8:30 Thursday.

**SOPH ENGINEERS TO MEET**  
Sophomore engineers will hold a meeting Wednesday at 12:30 in room 335 Electrical Engineering building.

## SEATS GO RAPIDLY FOR FRENCH PLAY

Play Production Class to Present Farce Thursday and Friday Nights

Seats for "Master Pierre Patelin," to be given by the play production class of the University of Minnesota on Thursday and Friday evenings, Oct. 15 and 16, at 8 p. m. in the Music hall auditorium, have been selling rapidly, according to the business management.

**The characters appear from the audience and finally disappear into it, the court-scene is full of hilarious slapstick, with a shyster lawyer and an equally villainous shepherd who outwits him, and a burlesque judgment developer; all this is played against a background of violently lurid futurist sets at which campus artists were working for the past two weeks.**

**The audience will see the same play that convulsed King Louis XI of France five centuries ago, and echo his laughter at seeing rascals outwit one another and be outwitted in turn by a mere fool. Blue and green wigs and futurist costumes will clothe the rogues, who will all be played by prominent campus actors.**

**The leading parts will be played by Carl B. Cass, Stanley T. Vail, Kathryn Grill, Hartwell Wilkerson, K. Warren Fawcett, Joe Choape and Virginia Collins.**

## QUARTERLY WILL AWARD \$25 PRIZE

Magazine to Recognize Writer of Outstanding Literary Work of Year

A prize of \$25 in gold has been offered to the person submitting the most distinguished piece of literary work to the Minnesota Quarterly during the year, the editors announced yesterday. Anyone is eligible to apply for the prize except those on the student board of the publication. It is not necessary to be a subscriber.

## Graduate Physics Group Completes Research Work

Students Working Under Direction of John T. Tate Finish Five Problems; Papers to Be Published Soon

Five research problems have been completed during the past year by the graduate students in the physics department working under John T. Tate, and the papers are expected to appear in print in the near future.

**"The Apparent Transmission of Velocity Through Aluminum Foil,"** a paper written by Henry E. Hartig, who took his Ph. D. here two years ago and is at present an instructor in mathematics in the College of Engineering, appeared in the August number of "The Physical Review," a journal published by the American Physical Society.

**Nelson at Duke University**  
Walter Nelson, who took his Ph. D. here last spring and is at present teaching in Duke university, North Carolina, did his research on the "Formation of Negative Ions in Mercury Vapor."

**Benjamin Knutson made a "Spectroscopic Study of the Excitation of Mercury Vapor Ions."** He is with the Western Electric Co. at present.

**Carl Nurnberger, who is at present at Ripon college, completed his study of the "Nature of the Ions Emitted by Heated Sodium Phosphate."**

**David L. Cook studied for his doctor's thesis the "Efficiency of Ionization in Mercury Vapor."** He is now teaching in a South Dakota normal school.

**J. W. Wukta of the physics department worked out a low voltage beam oscillograph, and he is at present engaged in studying its characteristics and behavior.**

## Farm Campus to See 'Torches' Given Today

'Torches' will be presented by the Minnesota Masquers in the College of Agriculture auditorium at 4:30 p. m. today as the first dramatic hour of the quarter on the Farm campus. There will be no charge as the play is being given to arouse interest in the organization.

**Tryouts will be from 7:30 to 10:30 tonight. Appointments will be made in the lobby outside the auditorium any time today. Further information will be supplied at the table in the Administration building.**

## POPULAR NUMBERS FEATURE RECITALS

Second Organ Program by Fairclough Scheduled Today at Music Hall

Popular classical numbers, combined with two or three heavier numbers will compose the second organ recital of the series to be given today at 12:45 in the Music auditorium by Prof. George Fairclough, the University organist.

**Professor Fairclough has chosen his numbers with the intention of making the recital as instructive as possible, as well as enlightening, he declared.**

**The program of the second organ recital follows:**  
I. Festival Prelude on "Ein' Feste Burg" . . . . . William Faulkes  
The composer of this vigorous treatment of the old familiar chorale of Martin Luther, is an English organist living in Liverpool.  
II. The Londonderry Air  
Arr. by Edwin Lemare  
This is an old Irish melody (Farwell to Cucullain), a great favorite at present. This is a new arrangement for the organ just recently published.  
III. March from "Leonore" symphony . . . . . Joachim Raff  
This symphony has been frequently played by the Minneapolis Symphony orchestra and this march is a very popular movement.  
IV. Ave Maria . . . . . Schubert  
One of the best loved of the many songs of this prolific composer.  
V. Fugue in G Minor  
John Sebastian Bach  
This is called the "great" G minor fugue, to distinguish it from several others of Bach in the same key. It is considered one of the big things in organ literature and possesses a freedom of virility surpassing all other works of the kind.  
VI. Minuet in G  
Ludwig Van Beethoven  
One of a set of twelve minuetts for the piano written in 1796. This one is probably the most popular of them all.  
VII. Festival Toccata in C  
Perry Fletcher  
This is a brilliant composition by a young English organist living in London.

## COLLEY TO FORM ADVERTISING CLUB

Representative of World Association Will Speak Before Alpha Delta Sigma

J. Reginald Colley of New York city, the special field representative of the Associated Advertising Clubs of the World, has been secured by Alpha Delta Sigma, international advertising fraternity, as the speaker and organizer of the first advertising club at the University of Minnesota.

**Membership in the new club will be open to all students or people connected with the University who are interested in advertising.**

**The presence of Mr. Colley was obtained by Walter B. Cole, president of Alpha Delta Sigma. The meeting will be held tomorrow at 8 p. m. in the fireplace room of the Minnesota union. All those interested are invited to attend.**

**George W. Dowrie, dean of the School of Business, will attend the meeting and will give a short speech. The business staffs of all campus publications will attend the meeting.**

**Mr. Colley has had wide experience in the field of advertising, having been in charge of the Fargo Daily Forum. While at Fargo Mr. Colley carried on a campaign of education for advertising. He left his work on the Forum to become the educational director in the New York offices of the Advertising Clubs of the World.**

**This organization has over 30,000 members and over 400 clubs in 14 countries. The meeting will be of very great importance to Minnesota advertising men as it will epitomize the start of a new era in Minnesota advertising," said Mr. Cole.**

## ADVISORY PARTY PUT OFF

Freshmen who were invited to the first of the small parties of the Senior Advisory committee are notified of its postponement until Monday, Oct. 19. The affair for the advisees of Helen McLaren's and Flossie Labarge's committees will be a Japanese tea in Shevlin hall.

## 1927 GOPHER WILL PRESENT GREATER UNIVERSITY THEME

Opening Section of Annual, Which Will Exemplify Subject Nears Completion

## TITLE ILLUSTRATES AIM

Editors Plan Innovation With Silver Embossed Paper Section Pages

A Greater University has been selected as the theme to be carried out in the publishing of the 1927 Gopher. This year's annual will be known as the Greater University Gopher.

**The theme will be carried out in these pages in an entirely new and different manner than has ever been used in a Gopher before, stated Mr. Frazee. The Bureau of Engraving has been working on this section during the summer and has practically completed the designing for this part of the Gopher. Three of the pages in this section will have colored paintings pertaining to the theme of a Greater Minnesota.**

**The theme will represent Minnesota as a greater University greater in all things pertaining to the school. The title, the Greater University Gopher, is illustrative of the theme and purpose of the book. It will be dedicated to the greater University of the future, greater in buildings, in students, in faculty, in spirit, to a University greater in all aspects.**

**The division pages in the 1927 Gopher will also be an innovation in college annuals. A colored picture will be used on each division page. This picture will be mounted in a silver embossed frame. The frame will be made by silver embossing on the dark paper used for the division page. Work of this sort has never been attempted in a college annual before.**

**Art Work Distributed**  
Another feature of the book is that the art book in the 1927 Gopher will not be placed in one section alone.

**The editors plan to distribute the art work throughout the entire book. Colored paintings and drawings will be used in the opening section, in the scenic section, and on all of the division pages.**

**Drawings have also been made of the opening pages to be used in the administration and college section. These have been designed with particular care as to the beauty and originality displayed in the book.**

**The actual work on the editorial part of the Gopher will not begin until after the major staff numbers have been selected and the entire staff organized. A meeting of staff candidates was called last week, but no announcement of any of the division editors has been made as yet.**

## Graduate Physics Group Completes Research Work

Students Working Under Direction of John T. Tate Finish Five Problems; Papers to Be Published Soon

Five research problems have been completed during the past year by the graduate students in the physics department working under John T. Tate, and the papers are expected to appear in print in the near future.

**"The Apparent Transmission of Velocity Through Aluminum Foil,"** a paper written by Henry E. Hartig, who took his Ph. D. here two years ago and is at present an instructor in mathematics in the College of Engineering, appeared in the August number of "The Physical Review," a journal published by the American Physical Society.

**Nelson at Duke University**  
Walter Nelson, who took his Ph. D. here last spring and is at present teaching in Duke university, North Carolina, did his research on the "Formation of Negative Ions in Mercury Vapor."

**Benjamin Knutson made a "Spectroscopic Study of the Excitation of Mercury Vapor Ions."** He is with the Western Electric Co. at present.

## THE STARTER'S GUN

Inter-fraternity sporting circles have been interested in two major events in the last week. One was the announcement of the winner of the participation cup for the year '24-25. The other was the official start of the competitive events for the fall quarter.

The inter-fraternity athletic program has been the object of much attention from both within and without the University. There are persons who survey these activities joyfully, and there are other persons who watch the whole scheme with a dubious eye. Regardless of the attention of the dubious, the inter-fraternity athletic council has gone forward this year, and making use of added facilities, increased the already strenuous program.

There is, no doubt, a certain utility in trying to impress upon fraternities the wisdom of entering only the events in which the chapter strength is greatest, as against entering teams in every possible event. It is not unreasonable to suppose that the increased program is provided merely for the purpose of allowing each fraternity to choose a few from the greater number of events, despite the contrary evidence offered by a participation cup. Certainly an effort on the part of each fraternity to enter a team in every event, without any regard for the qualifications of the team, will result in farcical proceedings the like of which the fraternity world witnessed last year.

It is possible that sportsmanship is not sufficient ground upon which to base a plea for selective participation. Last week a list of fraternities was published and after each name was set the number of participation points earned. Within a few weeks another list of fraternities will be published, and after each name there will be found the scholastic standing for the year 1924-25. A comparison of the two will result in a strong argument for moderation in all things.

There is no truth in the rumor that a little competition each day will keep the doctor away and bring a shiny new cup to grace the yule-post. Fraternities will be fortunate if it does not bring long periods of probation, beside developing a generation of men trained to the starter's gun—trained to such a point that any sharp detonation near a group of fraternity men will result in the start of a two-mile race, a game of hockey, a horseshoe match, or perhaps a dive off the curbstone.

## WHEN SPEAKERS EAT

The annual public speaking banquet which will be held tomorrow evening at six o'clock in the banquet room of the Minnesota Union is an event worthy of praise. Attendance is not limited to any particular group; all students and faculty members interested in Minnesota forensics and dramatics have been invited to meet together on this occasion to discuss problems of mutual interest.

We often hear the criticism that there is a regrettable lack of the element of personal contact between students and instructors. The public speaking faculty, attempting in some degree to minimize this unfortunate situation, arranges each fall for the banquet. The occasion affords an opportunity to discuss with the students, outside of the classroom environment, the aims and purposes of Minnesota public speaking activities.

No other department in the University, so far as The Minnesota Daily is able to discover, makes this effort. Students who have elected extensive work in public speaking or dramatics may congratulate themselves in having this opportunity to gain further contact with their instructors.

## THE MINNESOTA QUARTERLY

As an undergraduate magazine with pretensions to literary merit, the Minnesota Quarterly has won wide recognition in the two years it has been presented to the students of the University. Impartial and competent critics have traced a gradual improvement in style and content and predict for this year a continuation of its customary success.

The present editorial board intends to continue the policy of previous managements in maintaining a strictly literary type of content. They do, however, plan to inaugurate one change. Some criticism has been

directed against the two volumes already produced because of the obviously "heavy" matter included. This year a great deal of attention will be paid to humorous sketches, accounts of travel, light essays, and verse, and it is the belief of those who are in charge of the editorial policy of the magazine, that the change will be welcomed by the readers.

The Minnesota Quarterly will be larger in size this fall than it has been in previous years. Contributions from all sources within the University will be solicited in order that authorship may be representative of the student body. The editors deserve support in their conduct of the publication.

Yale college will abandon its strict custom of daily compulsory chapel this year after more than a century of traditional services. The increasing number of undergraduates, and the limited seating capacity of Battell chapel, forced the change. All upperclassmen will be required to attend three times a week, however, and the freshmen must attend daily as in the past.

Somehow the co-ed rifle team at Indiana University, which received so much publicity in the past, has failed to materialize this year. Perhaps the girls have decided not to marry after all.

We wonder just how many freshman classes in the University will consider it necessary to elect a sergeant-at-arms. Somehow the frosh always rate this office above the presidency.

A news story tells us that the robber who recently visited the Gamma Phi house entered by way of the fire escape "while the girls were having dinner on the main floor." We've heard rumors about that gang before, of course, but nothing as definite as this.

We respectfully direct the attention of all students to the fact that a program of interpretative dances will be presented on the Knoll some evening next spring. (One has the right to be warned in advance, you know.)

Mankind continues to develop. Over in the Chemistry building they have discovered a new way to make soap.

If the campus pole continues to warp, it may yet come into use as an Arc de Triomphe for our campus soldiers.

Have you seen the baby squirrels playing on the Knoll? There are three of them, and each one is about two inches long.

"If knowledge is virtue," says the Columbia Spectator, "this campus must be a den of vice."

Still another two books have been returned to the Library from the bindery. Will wonders never cease?

There are 43 daily papers in the state of Minnesota.

**paltry prattle**  
By the Hired Hand  
P. O. 8803

Well Inez,

I was down to the weekly meetin of the inter Frat. council which is held at a Charleston parlor on Grant and Nicollet ever Saturday an I guess all of the boys had sort of a good time on acct. that every time you would see 1 of them why he would look at you an laugh an then they would sort of saddle up to me an tell me I was a swell guy an then they would ast me to not put anything in the paper about there bein present at the meetin. The place is kind of a inter-collegiate race like for inst. if you want a dance why you have got to run against an engineer or may be a medic an they have got the edge on the rest of us on acct. that the regular customers get the best draws. They was 1 girl says to me whilst we were dancin she says listen baby I promote a mean piazza an I guess that is the slang for how would you like to take me home an another 1 says throw your sprinters into high gear an I guess that is the genteel way of tellin you to slide off the bunions. I don't think I will go there any more then I can help.

After the ft. ball game Saturday 1 of my best friends who is dead now dragged me over to what they call open Hse. which is where they move all of the chairs an etc. out of the sittin rm. an dance. Well I walks in an they was a Lima met me at the door with smiles all over her face playin the part of the little mirth machine an she says would I like to dance. Well, if she had of ast me that three minutes later I would of told her to go out an chop some dynamite. Finely after we had gone about 12 rounds an they wasn't any relief in sight I says to her after I had felt in my pocket Gee I'm sorry but I guess I must of lost my jack knife an I start it looking all over on the floor an when I got right next to the door I oozed out an I have been in a prayerful attitude every since. If I am ever caught in an other squeeze like that I will take a long a movin stair way so as I can get rid of them easier by settin them down on an it push the button.

The Public Speakin dept. is throwin a big lunch Wednesday nite over to the Union an bein acquaint it with the facilities over there that they have got for feedin the populace why if sort of looks like as if about the only thing they will be able to talk on is an Empty Stomach. They are attemptin to get co-operation between the instructors an the students threw this banquet so I will give them mine now an on the bottom of my examination paper why I will remind them it is there turn to co-operate an that way I will see if they are shootin square or if they are like the rest of these departments.

I see a piece in the paper about the Board of Regents taken a boat trip down the river an if their boat trip is any thing like the old Dent trips why I guess I will go over an see them when they get back as it would probly be easy to get a appointment on acct. of the condition they would be in. But may be they are different.

The engineers is havin their annual mutilation contest next Saturday an all of the survivin members in the evening adjourn to a certain downtown burlesque theater which I cant give you the name of on acct. that Pa would probly come up for the weekend if he knew about it an I have all ready warned them that if any of their confetti comes my way I am not responsible for the return of some. A good time will probly be had by all if they are able to remember it.

Well as the co-ed says remarking about her waistline I just cant keep this up so I will quit this point.  
—The Hired Hand.

## 18 ROOM ADDITION BUILT IN SANFORD

Increase in Applications Causes Change; 246 Girls Live in Hall, Annex

Eighteen new rooms have been finished in Sanford hall, according to Miss Lila G. Hainer, social director. Six of these are on East Sanford and 12 on West Sanford. All of the new rooms are on the fourth floor.

At present, 220 girls live in Sanford hall, and 26 in the Sanford annex, a total of 246. About one-third of the total number of girls were here last year. There are more freshmen than students of any college class. Juniors are next in number, owing to the large number of transfer students that come in each year. The number of seniors is always smaller than that of other classes.

"Each year," Miss Hainer said, "more girls apply for admission to Sanford than can be accommodated. During the summer, especially during September, we always have to turn away some students. We always have a waiting list of from 20 to 25."

Mrs. Ora C. Gayle is business director. Eva Butters is president of West Sanford; Dorothy Boise, president of East Sanford; and Mabel Fitch, president of Sanford annex.

## Wolverine School Has Building for Sport Supervision

Ann Arbor, Oct. 9.—University of Michigan intercollegiate athletics are now being administered from a new office building, especially designed for the administration of major sports. It is the first of its type in college athletics, and the staff took possession October 1.

The building includes private offices for the coaches, a suite of offices for the business manager and the 35 people composing the ticket staff during the gridiron season. Space has been reserved for expansion purposes for class and consultation rooms for members of the four year course in Physical Education, athletics and school health. One feature of the building is the lobby, which is decorated in Spanish oak, with trophy cases on its walls and with a red Spanish tile floor bordered by rough, varnished slate.

Five students at the University of Indiana were suspended for driving automobiles on the campus without permission from the committee on student affairs.

## Do You Know? "HOW TO STUDY"

The Students' Hand-Book of Practical Hints on the Technique of Effective Study  
by  
**WILLIAM ALLAN BROOKS**  
A GUIDE containing hundreds of practical hints and short cuts in the economy of learning, to assist students in securing MAXIMUM SCHOLASTIC RESULTS at a minimum cost of time, energy, and fatigue.  
ESPECIALLY RECOMMENDED for overworked students and athletes engaged in extra curriculum activities and for average and honor students who are working for high scholastic achievement.

Some of the Topics covered  
Scientific Shortcuts in Effective Study. Diet During Athletic Training.  
Preparing for Examinations. How to Study Modern Languages.  
Writing Good Examinations. How to Study Science, Literature, etc.  
Brain and Digestion in Relation to Study. Why Go to College?  
How to Take Lecture and Reading After College, What?  
Notes. Developing Concentration and Efficiency.  
Advantages and Disadvantages of Cramping. etc., etc., etc., etc., etc.

Why You Need This Guide  
"It is safe to say that failure to guide and direct study is the weak point in the whole educational machine. Prof. G. M. Whipple, U. of Michigan.  
"The successful men in college do not seem to be very happy. Most of them, especially the athletes, are overworked." Prof. H. S. Canby, Yale.  
Among the most important things for the student to learn is how to study. Without knowledge of this his labor may be largely in vain." Prof. G. F. Swain, M.I.T.  
"To students who have never learnt 'How to Study,' work is very often a chastisement, a flagellation, and an insuperable obstacle to contentment." Prof. A. Ingle, Harvard.  
"HOW TO STUDY" will show you how to avoid all misdirected effort. Get a good start and make this year a highly successful one by sending for this hand-book and study NOW.

You Need This Intelligent Assistance

## Y.W.C.A. TO OPEN EDUCATION WORK

Organization to Instruct Students in Work Before Membership Drive

To give all new students a better idea of the purpose and the work of the University Y.W.C.A. will be the aim of annual Education Week, starting today and ending with the beginning of the membership drive next Monday.

"To unite in the determination to live Jesus' law of love in every relationship and so to know God" is the stated purpose of the Y.W.C.A. It is the policy of the social committee to promote this purpose through social and recreational activities and through hospitality.

The members of this committee are divided into three departments; those working on large parties, those on small parties at students' homes, and those who plan the "at home" teas held every Thursday afternoon for all University women at the Y.W.C.A. parlors.

The first of the informal "mixers" which the committee will give in cooperation with the Y.M.C.A. will be a Halloween party in charge of Flossie La Barge. About 550 students attended the first affair given; there will be a total of six this year.

This Thursday, the tea committee will entertain from 3:30 to 5:30 in the Y.W.C.A. office. Many girls are needed to work on the social part of the organization.

## Alumnus Loses Life in Kennicott, Alaska

Stanley G. Olson, former student, died Thursday of last week at Kennicott, Alaska, as a result of an accident which occurred three weeks ago. Mr. Olson fell from an ore bucket which was being lifted from the Kennicott corporation mine, where he was employed, and suffered serious internal injuries.

He graduated from the School of Mines in June, 1924, and since that time had been with the Kennicott Co., where he was recently promoted to the position of resident engineer. He was a member of Sigma Rho.

**AQUATIC LEAGUE MEETS**  
Members of the Aquatic League will meet in the large private dining room of Shevlin hall at 12:30 today.

It has been proposed to unearth and reconstruct part of the famous Circus Maxima in Rome.

## Laboratory Sheets Put in Manual Form

Laboratory sheets for engineers have been compacted into "Exercises in Chemistry for Engineering Student" for the first time by R. E. Kirk, assistant professor of inorganic chemistry, and by G. E. Heisig, instructor in chemistry.

This manual was completed last summer. Many of the experiments in it are being tried for the first time and a small number of them have been used by students before.

The book attempts to give the engineering aspect illustrated by the fundamentals of chemistry to engineering students. Laboratory sheets have been used previously, but not in compact form.

## Faculty Gathers to Study College Needs

(Continued from page 1)  
extra curricular activities. At the conference the following week H. S. Diehl, director of the University Health service will have as his subject the mental hygiene of college students. A. W. Morrison, associate professor of nervous and mental diseases will also be a speaker at this meeting.

**Coffman to Speak**  
At the last conference on Dec. 7 L. D. Coffman, president of the University, will talk on methods of promoting the study of college education.

Although these meetings are intended primarily for the regular members of the faculty, graduate students in any department may attend. By doing a certain amount of prescribed work in addition to attending the conferences, they may earn a credit toward an advanced university degree.

The sophomore class of Stanford ford university must pay \$1,500 for damages done to the freshman dormitory during hazing proceedings.

## Roughs Lose Day When Old Derbies Win at Stanford

Horsemanship and prancing steeds will come out of the limbo of memory and reign again for a day at Leland Stanford university when the junior class inaugurates the first of what is expected to be an annual "Derby Day." The event is to be substituted for the Junior Rough's Day.

On Derby Day, juniors will appear on the campus arrayed in derbies of various sizes and shapes, presenting as "horsey" an appearance as possible, while the fair junior girls chosen to ride in one of the rigs will wear costumes that were the "dernier cri" when equestriennism was at its height.

Each dormitory is expected to enter a rig in the afternoon derby. The winning driver will be presented with a gilded derby with suitable inscriptions, while the lady of the winning chariot is to be crowned, "Queen of the Derby."

In the meantime, the cod-ed not invited to go buggy-riding will have to be content with the carriage nature gave them.

## Chess, Checker Club Elects Rudolph Head

Joseph Rudolph, 1924 chess champion of the University, was elected president of the Chess and Checker club at the meeting held in Minnesota Union Friday, Oct. 9. Edward Karp was elected secretary, and committees were appointed to arrange the details for the chess and checker tournaments which will take place soon.

Players of either game who wish to enter the tournament are asked by Mr. Rudolph to sign their names on the list posted in the chess room of the Union. Request is made that these names be posted as soon as possible in order that arrangements for the meet may be completed at once.

**TATE SPEAKS AT MADISON**  
Dr. John T. Tate of physics department will speak at the National Academy of Sciences which meets at Madison, Wis., November 8, 9 and 10, on the "Spectroscopic Study of Excitation of Mercury Vapor by Positive Ions."

The University of Kansas lists a unique sorority in Tau Sigma, honorary dancing organization.

## Wales University Student Engages in Research Work

Thomas Jones, Winner of Commonwealth Scholarship, Is One of 20 British Selected to Study in U. S.

Thomas Jones, of the University of Wales, in University of Minnesota engaged in atomic structure research as the result of his winning the Commonwealth scholarship.

Mr. Jones, who is 26 years old, was the only one chosen from Wales for the scholarship. In all there were 202. One from Wales, one from Ireland and the remainder from Scotland and England. Two women were included.

**Reply to Rhodes System**  
The scholarship, which is made up of funds from New York City, is a reply to the Rhodes scholarship of Great Britain, which enables students from this country to study in England.

Mr. Jones, together with the other winners, was given a choice of attending any university or college in the United States, and selected Minnesota because of the reputation of the department of atomic research, he said. The scholarship requires that the candidates spend two years of study in some college of this country and includes four months travel in order that the persons may become better acquainted with the people, country and customs and in that way promote better relationship between Great Britain and the United States.

Mr. Jones expressed astonishment at the great number of students attending American universities and also at the great size of the buildings.

**Surprised at Money**  
"American universities seem to have lots of money for development," he stated, "but I was greatly surprised at the great number of students who are working their way through college and for a person to work his way through the School of Medicine would seem an incredible thing to them."

The strangest thing that Mr. Jones found here was the system of credits, the football team and the stadium. The stadium, he said, surpasses anything that he had ever seen and not even Oxford and Cambridge, the two biggest universities of Great Britain, had such a place for athletic events. He saw his first football game when Minnesota played North Dakota. He was surprised at the commotion with which the two teams played and the great piling up of the players every few minutes.

Mr. Jones lived at Swansea, Wales and has never attended high school. All his studying with the exception of the elementary grades have been done by himself. He was on a destroyer guarding the North Sea during the World war and soon afterwards passed the examinations at the University of Wales.

Soon after his arrival at Minne-

## Agriculture Division of Union Opens This Week

Union will be opened on the agriculture campus in the old Dairy building sometime this week, according to Minton Anderson, manager.

Assistants will be needed in the branch so that any student who would be willing to work during his vacant hours should leave his name and a copy of his program in box 221 of the farm postoffice.

## UPSON COLLECTION GETS NEW BOOKS

Japanese Color Prints, Modern Painting, Fantastical Works Added

Several beautiful volumes of Japanese color prints, modern paintings, fantastic works, and books on the theater, have been added recently to the Arthur Upson Room in the new Library.

Amy Lowell's last book, "What's O'Clock"; essays by J. B. Cabell; several volumes on "Modern French Painters," by Jean Gordon; "The History of French Etching," by F. L. Leipink, and "Degas," by Meier-Graefe, are some of the noteworthy acquisitions.

Two books on "The Queen's Doll House" are also in the collection. The latter volumes were written about a model house presented to the Queen of England. The house was on exhibition in London recently, and the book contains pictures, and reprints of stories about it.

Additional volumes of the novels of H. G. Wells may also be obtained in the pleasure room now, as well as several new volumes of essays by Cabell, Huxley, Montague, and others. The newest modern plays by Susan Glaspell and Eugene O'Neill and several fantastic volumes including "Zuleika Lobson," by Max Beerbohm are others of the new collection.

**THETA EPSILON MEETS**  
Theta Epsilon, literary society, will meet today at 4:30 p. m. in the Jean Martin Brown room, Shevlin hall, according to Izetta W. Robb, temporary president. A new president will be elected to succeed Mary Howard who is not returning to school.

sota he received a telegram of congratulation from the Prince of Wales, who is chairman of the scholarship in England.

Mr. Jones will attend scientific lectures at Madison, Wis., and during his Christmas vacation will go to Kansas City. In the summer vacation he plans to travel for three months in the West.

He is working for a Ph. D. degree and spends his entire time doing research work.

## Library Adopts New Book Binding System

An improved system of binding, the "cut flush," so-called because the edges do not project, has been adopted by the bindery in the new Library building, for books which are seldom used. This binding is a cheaper and quicker process, and makes the book stand firmer on the shelves.

Other binderies have used this system for several years, but the experiment is practically a new one, although it is entirely successful so far, according to Frank K. Walter, librarian.

Practically all of the books being bound in the library at present are having buckram covers instead of leather, in colors corresponding to the leather formerly used. This is a considerable saving in money as well as time, Mr. Walter said.

**CHI SIGMA PHI HAS OPENING**  
Chi Sigma Phi, academic fraternity, formally opened its new house at 900 Fifteenth avenue southeast Friday evening with an autumn dance. Chaperones were Mr. and Mrs. C. M. Way and Alice Hall. George Townsend's orchestra played.

Forensics have been added to the list of interfraternity contests at Syracuse university.

# HUSKY WABASH ELEVEN HERE SATURDAY

## COOPER INJURED, HANSON DECLARED ELIGIBLE TO PLAY

Coach Spears Seeks Capable Pivot Man—MacKinnon May Get the Call

**By Mike Fadell**  
The work of preparing for the third early season game with Wabash College here Saturday began in earnest yesterday when Dr. Spears Gopher coach sent his men through several new play formations. This afternoon the regulars will meet the reserves who have been tutored in Wabash plays by coaches Finger and Harris.

Although the varsity had never before rehearsed the plays given them by Coach Spears last night, they snapped through the new formation in mid-season style. Preceding the formation drill, Coach Spears addressed his men, pointing out the defects in their play Saturday, and complimenting good work against Grinnell.

**Art Mulvey Returns**  
With the real opening of the hardest portion of the Minnesota schedule starting with the Notre Dame game a week from Saturday, Dr. Spears is taking no chances on using only one team in his afternoon practice sessions. All men on the squad are being given an opportunity to show their worth.

The return to the squad of Art Mulvey, guard, was welcomed by Coach Spears yesterday. Mulvey has been absent from scrimmage for over a week with a charley horse. Harold Hanson, likely tackle candidate, has been declared eligible and will probably take part in a portion of Saturday's game. Conrad Cooper, who was forced to leave the Wabash game with an injured knee, took part in yesterday's practice. It is not yet certain whether or not he will play against Wabash.

It is evident that Wabash, Minnesota's next opponent, possesses one of the most powerful eleven in the West. The "Little Giants" from the corn fields of Indiana, carry plenty of punch. The Wabash coach had enough confidence in his team this season to schedule four Big Ten games. Purdue the first conference opponent which the Little Giants met were sent down to a crushing defeat at the hands of the Wabash team and then last Saturday the Muncie Normal eleven was swamped under a 63 to 0 score by the roaring Giants.

**Wabash Powerful Eleven**  
Coach Finger scouted Wabash last Saturday and came back with the report that the Little Giants are powerful and that the Gophers will meet the hardest opposition of the season against this little Hoosier team. Among the men who make up the husky Wabash team are Gipson, Crite and Parr, all crack backfield performers who made it rough going against the Purdue team which defeated DePauw last Saturday by a lop-sided score. Two of Wabash's linesmen stand out over the others, one of which is Don Sherman, captain and mainstay of Wabash and the other Paynter, guard who intercepted a Purdue pass and went 35 yards for the touchdown which beat the Boiler-makers a week ago last Saturday.

Coach Spears is still going through the process of applying polish to his men for the toughest game on the schedule tilt so far and then the game with Notre Dame a week from Saturday. With two of the preliminary games out of the way, the Gopher machine will get even harder workouts than they have been having before they will be ready to meet the opposition set before them.

The line met some real opposition against Grinnell and will get the attention of Dr. Spears this week. The most brilliant part of the Gopher playing against Grinnell came in the last quarter where the Maroon and Gold scored three touchdowns. The first of these came after Wheeler had recovered a Grinnell fumble on the Minnesota 46 yard line, and a series of short passes, Graham to Peplaw, and Peplaw to Arndsee mixed in with Murrell's line gains. The former Cedar Rapids player carried the ball over on a drive through center from the one yard line. Peplaw kicked goal.

Walsh Scores  
Leonard Walsh, Minnesota guard turned a Grinnell pass into another touchdown when he brought down the oval on the 13 yard line and went the full distance to the goal line. Mason kicked goal, bringing the score to 28-6. The last bit of scoring for the Gophers came on a brilliant pass Mason to Joe Gordon. Murrell had intercepted another Grinnell pass on the

## 'M' Club Will Meet in Minnesota Union Friday

There will be a meeting of the "M" Club Friday noon according to an announcement by Everett Van Dusee, president of the organization. All members of the club are requested to be on hand as some very important matters will come up for discussion at that time. The meeting will probably be held in the Minnesota Union. There will be another notice concerning the meeting later in the week.

35 yard Grinnell line and went 20 yards before he was stopped. Here Mason passed to Gordon who tore over the goal line for the last score, as Mason's attempted place kick was blocked.

Minnesota held a 14 to 6 lead over Grinnell up to the last period, while the visitors were outpointing the Gophers during most of this time. The Grinnell score came on Moran's beautiful 80 yard run after going through the whole Minnesota team on the first kickoff. Not disheartened by this score, the Gopher backfield made up of Almqvist, Peplaw, Ascher and Joesting began to assault the enemy line and though a series of brilliant end runs by Almqvist and Peplaw and line smashes by Joesting, soon had the ball on the four yard line before Joesting fumbled and Grinnell, recovering, punted out of danger.

The driving Gopher backs, again started the offensive from the Grinnell 30 yard line, and assisted by two offside penalties on Grinnell, the driving Joesting carried the first touchdown over from the two yard line and Peplaw put Minnesota in the lead by a successful try of the extra point.

**Backfield Work Pleased**  
In the second quarter Graham, Peplaw and Joesting took turns at advancing the ball to the five yard line, Malby Nydahl was then sent in at Peplaw's position. A two yard gain by Joesting and Nydahl went over the second score, boosting the count to 14 soon afterwards with a Nydahl also kicked goal, giving the Maroon and Gold a 14 to 6 lead.

The outstanding feature of the game with Grinnell was the work of the backfield performers. Peplaw, Graham and Almqvist assure Doc. Spears of three of the speediest backfield stars in the middle west while Joesting and Murrell also figured in the role of first rate backs. Joesting's powerful line smashing promised to come up to the work of Carl Lidberg of last year, while Murrell had his first real day since he has donned a Maroon uniform. He hit the line, gained ground, and played the defense just as he was expected to when he came here with his national reputation on the Cedar Rapids eleven.

George Tuttle's first game for Minnesota was filled with many bright spots and the former South high gridder's work made its impression of Dr. Spears.

**The Lineup:**  
Minnesota— Position Grinnell—  
Tuttle left end Marlin  
Drill left tackle Seelin  
Kaminski left guard Peterson  
Coper center Peterson  
Walsh right guard Cathcart  
Gard right tackle Howarth  
Wheeler right end Nible  
Peplaw quarterback Stoots  
Ascher (C) left half Moran  
Almqvist right half Sweet (C)  
Joesting fullback Joesting  
Minnesota 7 7 0 0—6  
Grinnell 6 0 0 0—6

Minnesota scoring—Touchdown: Joesting; Nydahl, Murrell, Walsh, Gordon; points after touchdowns: Peplaw 2 by placement, Nydahl by dropkick, Mason 1 by placement.  
Grinnell Scoring—Touchdown, Moran.  
Substitutions for Minnesota—Murrell for Ascher, Graham for Almqvist, Hanson for Kaminski, Nydahl for Peplaw, Walder for Drill, Arndsee for Murrell, Morris for Wheeler, Mason for Nydahl, Almqvist for Mason, Peplaw for Murrell, Walsh for Joesting, Graham for Almqvist, O'Brien for Tuttle, MacKinnon for Coper, Koppin for Wheeler, Hyde for Harry, Allison for Kaminski, Mason for Peplaw, Hanson for Allison, Gordon and Graham.

Grinnell substitutions—Second period, Meyer for Sweet, Davis for Howarth, Carlin for Cathcart; third period, Peterson for Meyer, Sweet for Moran; fourth period, Meyer for Peterson, Egan for Sweet.  
Wolf for Egan, Rose for Nible, Wertz for Marshall, Fays for Wolf.  
Referee—Meyer; Umpire—Albert; Benchmarks—Michigan; C. F. McCormick; Illinois; field judge Clyde Williams; Iowa.

## POPKIN CAPTURES FIRST HONORS IN HARRIER TRYOUTS

Coach Iverson Disappointed With Results as Shown in Trial Heats Saturday

Trial heats in the initial cross country tryouts were held over the new hill and dale course last Saturday afternoon. Captain Popkin easily outdistanced the other harriers and captured first place in the trial heat.

Wexman came in second with Swanson following a close third. No records of the time made by the runners were kept, but Coach Iverson was dissatisfied with the speed of his hill and dale.

**Two Performers Out**  
Much better time can be made by the cross country runners when they are competing against another team and when weather conditions are more favorable according to Coach Iverson. He expects the cross country team this year to make a much better showing than the teams of former years because his men are in better condition than they have ever been.

Mathews and Hubbard, two star performers, did not run in the trial heats. The race was run over the new cross country course beginning at the north tower of the Stadium, around the north end of the campus to the Franklin bridge, and returning around the south end of the campus. The total distance is five miles.

**Dickinson Strains Tendon**  
The runners finished in the following order: Popkin, Wexman, Swanson, Bernhagen, Holland, Katter, Elling, Miles, Hall, Murvies, Solustrum, Powers, Longer and Kelley.  
Dickinson who was expected to make a strong bid for a place on the cross country squad strained a tendon in Saturday's tryouts and did not finish. His injury will keep him out of the running for some time. There will be a meet with Ames here next Saturday.

## Saturday's Grid Scores

**BIG TEN**  
Minnesota, 34; Grinnell, 6.  
Michigan, 63; Indiana, 0.  
Purdue, 39; DePauw, 0.  
Chicago, 3; Ohio State, 3.  
Northwestern, 17; Carleton, 0.  
Iowa, 41; St. Louis, 0.  
Illinois, 16; Butler, 13.  
Wisconsin, 35; Franklin, 0.  
**West**  
Notre Dame, 13; Beloit, 3.  
Cornell of Iowa, 21; Hamline, 0.  
Wabash, 67; Muncie Normal, 0.  
**East**  
Navy, 19; Marquette, 0.  
Pennsylvania, 9; Brown, 0.  
Yale, 38; Georgia, 7.  
Georgia Tech, 16; Penn State, 7.  
Harvard, 68; Middlebury, 0.  
Princeton, 15; Washington and Lee, 6.  
Army, 26; Knox, 7.

## Carte du Jour

Now, Phideas Krinkle, early in his college course, would have no difficulty either as regards scholarship and studies, or equipment. Hence, we found him (that is, some one did) buying a pen for \$1.37—today only—and putting the difference between that and the price of a Parker Duofold in books—good books, too, let it be understood. And passing charitably over some profane lapses, he got along with it till graduation, and then some. We're liberal—it would make a mark when you pressed it, frequently. But Krinkle, with this penny-grasping trait, went bankrupt three years after graduation. And he never did amount to much after.

Jack Free, on the other hand, had an eye to quality, beauty, and—oh yes—quality. His second week in college found him with a Parker Duofold. Makes no difference if he did steal it—he knew what sort of steel, and the victim bought another Parker, anyway. Well, to coin a phrase, that was just like Jack, and he graduated and signed his first check with a flourish and a Parker. And, due, it must be admitted in fairness by all, to this belief and insistence on quality at all costs, he went stony broke in two years. So there really was little advantage in the Parker Duofold over the orphan-pen, except having something decent to write with during the period mentioned.

## Dartmouth Game Homecoming for Maroon Alumni

Chicago, Oct. 12.—Alumni of the University of Chicago will stage their first football homecoming this fall on Nov. 14, the date of the Chicago-Dartmouth game at Stagg field.

The old grads of the Midway stage their annual jubilee on the campus in the spring, the homecoming during the football season being an innovation this year.

The cornerstone of the new field house, will be laid with appropriate ceremonies.

## FROSH GRIDMEN GIVEN STIFF DRILL

Relief from the frigid blasts of last week was felt when the freshman football men took to Northrop Field yesterday for their daily workout.

Much of the afternoon was devoted to fundamentals of the grid-iron game, tackling being stressed in particular. The entire squad was given a lively session in an effort to improve their form in the latter phase of the game. The coaches emphasized the necessity of hitting the runner hard, and after a short time a decided impact was heard as the tackler nailed the man with the ball.

## Diamond Artists Will Engage in Seven Inning Practice Game on Varsity Field Today

Although somewhat overshadowed by gridiron activities, baseball will claim the spotlight for a brief space today when Coach Watrous will have his diamond artists engage in a seven inning practice game on the varsity ball field at 11:45. Every man who has been out for baseball practice this fall will get a chance to show his wares.

Redding, Emerson, and Anderson will do the mound work for the varsity. Smith will be at first, Moss at second, Norgorden at third with the shortstop position still open. The Ross brothers have been showing up exceptionally well in practice and today they will get a chance to show what they can do in actual competition.

Coach Watrous is looking for several good backstop men to fill the shoes left vacant by the graduation of Ruf Christgau, varsity catcher of last season.

QUALITY—SERVICE—SATISFACTION

### We've got the right university styles for young men

In England, Cambridge and Oxford set the styles in young men's clothes; the same thing happens here—our universities set our styles. Young business men, young men in college have the same style ideas. Yale blue in suits and overcoats is a big favorite right now. Especially strong values at
