Definitions and Methods

Student Credit Hour Report

1. Sources of Data

- A. day school - end of quarter data taken from Table IV course inventory. As section 90 student credit hours were incorrectly reported, those student credit hours were subtracted from the the Table IV totals.
- B. CEE - student credit hours are taken from CEE end of 2nd week course inventory.

2. Courses taught abroad are included in day school.

3. All SSP Math courses are taught only via CEE so much of the Math CEE can be attributed to those courses.

4. For CEE, department budgeted and study field are assumed to be the same. Instructor names for CEE were not readily available.

5. CEE day student credit hours are students registered through day school in CEE courses. CEE student credit hours are students registered through CEE. Inloaded courses, except weekend seminars, are included in these tabulations.

6. Credit hours taught by teachers with primary appointments outside of academic departments were included in calculating the student credit hour report for 1988-89. This group includes deans, associate/assistant deans, directors.

7. If a course was taught by faculty from more than one department, the credit hours were prorated to departments according to the percent of time each faculty member spent on the course as reported as instructor hours on the course inventory questionnaire.

8. Percent paid by CEE = $\frac{(\text{CEE:Day Students} + \text{CEE:CEE Students})}{\text{Total}}$
9. Percent CEE taken by Day = $\frac{\text{CEE:Day Students}}{(\text{CEE:Day Students} + \text{CEE:CEE Students})}$
10. Women's Studies content courses are also taught by other departments. For the 88-89 Academic Year, these courses generated 1,691 credit hours. In this report, these credit hours were attributed to the Study Field offering the course and the department to which the faculty member belonged.
