Description of tables in the database: 1936 USFS_Survey_Database_All_Covers	
Includes all units, and all cover types *(includes non-forest types Grassland, Brush land, Marsh or Bog, Wooded pasture, and shelterbelt in addition to forested cover types)*	
Name	**Description**
Ac_Cov	Acres of each cover type in each unit
Ac_Ownshp	Acres of each ownership group in each cover type in each unit
Ac_SzCov	Acres of each size class in each cover type in each unit; includes the "all" size class associated with non-forested cover types
Ac_Unit	Acres and unit name of each 1936 Survey unit
BA_Sp	Average basal area per acre by species, size class and cover type; includes the "all" size class associated with non-forested cover types
BA_SzCov	Average basal area per acre by size class and cover type; all species combined; includes the "all" size class associated with non-forested cover types
Lookup_Ac_County	Proportion of 1936 Survey units made up by counties
Lookup_Cover	1936 Survey cover type names
Lookup_Sp	1936 Survey species and species groups
Lookup_Sz	1936 Survey size classes and corresponding FIA stand size classes; includes the "all" size class associated with non-forested cover types
Lookup_UnitName	1936 Survey units
PerAc_Vol_Calc	Per-acre volume data calculated to include unit 4 per-acre values; VolTable_Ttl/Ac_SzCov; Scrib BF (Scribner Thousand Board Foot) and Int'l BF (International ¼-inch Thousand Board Foot)
StandStock_PerAc	Per-acre data from original stand and stock tables; shown as original actual values
TtlTr_SpSzCov	Total tree counts by DBH (Diameter at breast height), species, size class, cover, and unit
VolTable_Ttl	Per unit data from original volume tables; shown as actual values converted from abbreviated values (e.g. 1,000,000 BF for 1000 MBF)
