Institutional Research

Report 2003-1
August, 2002

INTRODUCTION

The UMD student credit hour report is produced using end of term data extracted from the Data Warehouse. The data is presented in two ways. Table "A" displays the student credit hours summed by study field while Table "B" sums them by department.

Some things to keep in mind:

Summer 2001 data has been included in this report and is reported in the "Annual Summary" tables for the campus and for each collegiate unit.

In the case of variable credit courses, the maximum number of credits were used; therefore, student credit hours may be inflated for those courses.

If a course was taught by faculty from more than one department, the credit hours were prorated among departments. Contact minutes were used to calculate the proration.

School of Medicine data was not updated in the Electronic Course Inventory System; therefore, School of Medicine data is excluded from this report.

A difference of 372 student credit hours exists between the Student Credit Hours by Study Field tables and the Student Credit Hours by Department tables (326 SCH in Fall 2001 and 46 SCH in Spring 2002). This is due to the fact that School of Medicine faculty would be credited with these SCH in the fields of Biology and Chemistry.
