DULUTH--UMD enrollment has reached an all-time high of 3,152 undergraduate students, Provost Raymond W. Darland announced today.

The fall quarter figure is eight per cent higher than one year ago and the eighth year in a row that a new enrollment mark has been set at UMD, Darland said.

Thirty-seven students enrolled in graduate school bring the overall UMD total to 3,189, he added.

The Provost said there are 269 more undergraduates and four more graduate students enrolled than in 1961.

Air Force ROTC enrollment at UMD totals 172 as compared with 160 a year ago, an increase of 7.5 per cent. Three of the four Air Science classes showed gains in attendance.

"Naturally, we are pleased that so many students are taking advantage of the opportunities afforded them on the UMD campus," Darland said. "Earlier this year, we predicted 2,950 and made plans accordingly. However, with an extra 200 students we are finding all facilities overcrowded. So much so that the urgency of a favorable vote on amendment number two was never more apparent than during the past week. Should the amendment fail, there is no question but what limitations would have to be placed on enrollments."

The overall University of Minnesota attendance reached 33,616, an increase of 2,770 or nine per cent higher than one year ago, according to True E. Pettengill, University recorder.

Included in the number of day students attending the University are 29,942 on the Minneapolis-St. Paul campus, 3,152 at Duluth and 522 at Morris, which added a junior class this year.

Of the total number of University students, 22,806 are men, 10,810 are women, a ratio of men to women of about seven to three.

Graduate school students, including the Mayo Foundation, total 5,647 compared with 4,539 a year ago.

In addition to the record day-time enrollment, Pettengill disclosed the University general extension evening class attendance has climbed eight per cent to a new high mark of 12,233, including 1,050 at Duluth.

Pettengill said freshman enrollment in 1964 is expected to increase significantly because of the record number of students currently attending the 11th grade in Minnesota high schools.
