Dear Concerned Citizen:

Nuclear power is one of the most important social/environmental issues we need to deal with in the coming years. Will Minnesota and the rest of the country continue to develop nuclear power with its problems of radioactive waste, the threat of nuclear sabotage and terrorism, and the possibility of devastation through a nuclear power plant accident? Or, will Minnesotans push for an energy system based on conservation techniques and the use of alternative energy sources like solar power?

Learn more about this important topic by attending Ralph Nader's speech and the rest of the Citizen's Conference on nuclear power on Saturday, May 20, 1978 in Coffman Union.
