NIBI MIINAWAA MANOOMIN: Gaa wiijigaabawitaadiwaad (Accountable Relationships)

Join us for this 5th biennial symposium that invites tribal members and University personnel to meet, share information and learn from each other about ways to protect water and wild rice for future generations as we meet our obligations to all our relatives. This year we discuss what accountable relationships require and how we can agree to committed action that is trusting and binding.

White Earth Chairman Terry Tibbetts, University of Minnesota President Eric Kaler, Karen Diver, an elder panel and other tribal and university representatives will join us as we seek to learn what accountability means and how we can commit to a respectful, collaboratively developed agenda with agreed upon outcomes and deadlines. We will also have an update from the MPCA on sulfate standards for Minnesota lakes.

All are welcome.

Office for
Equity and Diversity
