

Developing Foresight Leadership through Horizon Scanning:
The Future of Nursing and Health

June 12, 2018

8:30-12pm

University of Minnesota School of Nursing
Katherine J Densford International Center for Nursing Leadership
Bentson Healthy Communities Innovation Center
4-130 Weaver Densford Hall
308 Harvard Street SE
Minneapolis, MN

The purpose of this workshop is to introduce participants to a number of horizon scanning resources available through the University of Minnesota Library System. Horizon scanning supports the development of foresight leadership. The objectives of this three hour work shop are to:

- Discuss the concept of futures literacy for nursing and healthcare innovation.
- Describe competencies that support the development of foresight leadership.
- Explore horizon scanning library resources to identify trends and consequences that support the development of healthcare innovation in practice, education, research and product development.
