Introduction

Teacher education graduates are just beginning their careers and there are many choices that lie ahead of them. The first and most obvious choice for them after graduation from a teacher education program is to find a teaching job in the Pre-Kindergarten thru 12th grade school system, but that is not the case for everyone. The 2003 Minnesota Education Yearbook stated that only 5% of the 51,629 teachers were new during the 2001-02 school year (Davison, 2004) These figures dropped during the 2002-03 year with only 4% being new full-time teachers (Davison, 2005). This does not mean that only 5% of all the teacher education graduates teach. Do we know how many newly licensed teachers don't teach? This project focused on teacher education graduates and the choices they made or have been made for them.

Purpose of the Study

The purpose of this study was to determine if the University of Minnesota, Morris (UMM) teacher education graduates retention rates fall in line with the research that has previously been conducted. In regards to teacher education, retention rate is defined as the teachers that choose to remain in the teaching profession from one year to the next. It has been reported that 29% of new teachers leave the profession or moved to another school during the first three years in the workforce (Ingersoll & Smith, 2004). There are many factors that play a role in determining the retention rate for licensed teachers from UMM.

Background

For the past 11 years, the UMM education department has been sending a survey to graduates one year after they have been licensed. This has been done as a part of our

reaccreditation process with the National Council for Accreditation of Teacher Education (NCATE). Several changes will be taking place in the near future due to a change in NCATE standards. NCATE has included in one of the six standards as the target goal to track candidate performance during the first five years of practice. Currently, surveys are only being sent to the alumni that actually receive their license. The main problem with this process is that not all of our students obtain their license. To receive a more accurate picture, we should be surveying all of our graduates, not just those that receive their teaching license. All of the graduates would provide valuable information about the programs and personnel. The department would then be able to implement recommended changes and maintain the strengths.

Previous research has been conducted by the National Center for Education Statistics with both the Schools and Staffing Survey (SASS) and the Teacher Follow-up Survey (TFS). One of the findings is that “teacher turnover is related to the teaching field” (Ingersoll, 2001, p.502). The results of this study did reveal that Richard Ingersoll was correct when stating that the fields of special education, math, and science have the highest turnover rates.

Setting

The participants to be included in this project were elementary and secondary education students that graduated from 1997 to 2006. The researcher will be completing this field project with the assistance of the UMM Education and Alumni Relations offices.

Assumptions and Limitations

The researcher is a 2000 UMM alumnus which may or may not play a role in determining if graduates want to participate in this survey. UMM's teacher education experience with sending surveys to the one year graduates has not been very successful as the institution has not seen a high return rate.

This study did include the graduates from 1997-2006 that agree to participate in the field project by returning the questionnaire. The results will only represent a small sample of UMM teacher education graduates so they are not to be representative of the whole education department. Several reasons for individuals choosing to or not to respond may be that they are still teaching, they may not be licensed but are still teaching, or they are teaching on a variance or in a private school setting.

Definitions

Teacher attrition is defined for this study as educators that leave the profession.

Teacher migration is defined for this study as when the educators leave one school and go to another school.

Teacher retention rate is defined for this study as the teachers that choose to remain in the teaching profession.

Summary

Teacher attrition, migration, and retention in the K-12 classroom matters to the University of Minnesota, Morris teacher education program especially when they are our alumni. This project was designed to help the UMM education department determine which strengths they possess, areas that need improvement, and to locate past graduates in order to comply with NCATE to continue national accreditation.

Literature Review

Richard Ingersoll, Associate Professor at the Graduate School of Education at the University of Pennsylvania has written several articles on teacher retention, attrition, and migration. He has cited several reasons for teacher shortages. He states that half of the reason is that teachers seek better careers or they are not satisfied. Three categories were used when determining turnover and they are teacher characteristics, school characteristics, and organizational conditions. Other factors included in the above categories include age, size of classroom and school, and the support of school administration or the lack of. Teachers account for 4% of the civilian workforce including twice as many teachers as there are registered nurses, and five times the number of lawyers or professors (Ingersoll, 2001). Minnesota Department of Education has conducted several research studies that have focused on teacher retention. After reading *Teachers Matter: Attracting, Developing, and Retaining Effective Teachers* (Organisation for Economic Co-operation and Development, 2005) it appears that teacher turnover is present internationally as well. This review will address several themes that have been presented in the literature, beginning with low retention.

Retention Rate

According to the Minnesota Department of Education's Teacher Supply and Demand publication (2007), 32% of new teachers that were hired in 2001 left after five years and 27% of new teachers from 2003 had left after only spending three years in the classroom. Not only is this disturbing to teacher education programs and their graduates but this is also proving to be very costly to the school districts.

The supply and demand theory provides two options for trying to fix this problem. These options would be to increase the quantity supplied or decrease the quantity demanded. When looking at the last option, decreasing the demand, this can be achieved by decreasing the turnover rate.

Teacher Attrition and Migration

“Nationally, approximately 30 percent of new teachers leave teaching within three years, and 40 to 50 percent leave within five years” (Johnson, 2004, p.12). This is just one of the many statistics that refer to teacher attrition. Several of the reasons for the high attrition and migration rates could ultimately be broken down further into two categories including voluntary and involuntary. The involuntary reasons may include school closings or cutbacks. Personal reasons also play a very important role in both migration and attrition. These reasons may be health or family related and job dissatisfaction. Both poor salary and lack of administrative support can be associated with job dissatisfaction.

Summary

Mr. Ingersoll has influenced me to test his theories with a small portion of the University of Minnesota, Morris teacher education graduates. This study did show the pattern of teacher education graduates over a ten year period including the number of years in the teaching field and the reasons they left the field, when applicable. It is even possible that this project may lay the groundwork for possible future studies by the UMM Education department. The results of the survey may either agree with the findings that Ingersoll has noted in his articles or the statistics may differ from the Schools and Staffing Survey and Teacher Followup Survey.

Methodology

One of the objectives of this study was to compare the UMM teacher educator data to that from the SASS and TFS along with Richard Ingersoll's interpretations. This study was going to help UMM with their accreditation process by accounting for their alumni that are licensed educators. Below I will be describing the participants and the research process that will be used for this field project.

Setting and Participants

The initial participant list included all of the teacher education alumni from 1997-2006 including both the elementary and secondary education programs. This list was narrowed down as individuals may have chosen not to participate in this survey or they may not have updated their personal information with UMM and no address was known. Included in the final project appendix will be the letter from the IRB granting approval, Consent Form, and copies of correspondence, including surveys that will be sent to the alumni. The UMM Division of Education Chair, had agreed that the Education budget will be able to cover the expenses associated with this project including paper, photocopying, envelopes, and postage.

Research Design

This research was to be conducted in four phases. The first phase was to compile a list of names and current addresses to send the introduction letter that includes the questionnaire. The next phase was to include a postcard reminder for those that have not returned their survey. An additional survey will be sent to those that request another in case they misplaced their original one. The third stage was to send a follow up letter

thanking the participant for their assistance in this project. The final mailing would be sending the results of the survey to those that have requested it.

This research project includes both independent and control variables similar to that of the SASS and TFS. The independent variables include the school demographics which include region, school enrollment, community type, school level, and minority enrollment. Control variables include the alumni personal demographics which consist of age, gender, and teaching license area.

Several of the questions were the same as the SASS and TFS so there are direct comparisons to results from both surveys. The survey was approved by the UMM Teacher Education faculty as several of the results may be incorporated into the next accreditation visit as evidence.

Summary

The findings from this survey will be very beneficial for multiple stakeholders and departments. UMM and the Education Department will benefit from this survey and the results may be used as evidence for the next accreditation visit. Another benefit is to improve the teacher education programs by promoting and possibly even providing services which will lead to retention for the candidates as they enter their own classrooms. There is an additional benefit to the teacher education alumni as they will have the opportunity to see the statistics and maybe even reconnect with each other.

Results and Discussion

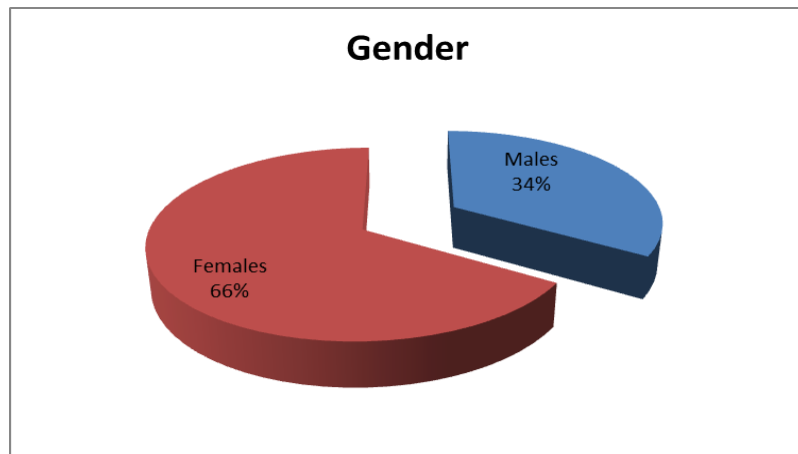

This study was about UMM teacher education rates and comparing the results to data that has previously been published. The Institutional Review Board (IRB) had approved my research study (Appendix A) so the original email containing the consent form and hyperlink to complete the online survey was sent (Appendix C). The raw data from the survey is included as Appendix D.

There was an error with the identification of alumni and all teacher education graduates were sent the information. This prompted another form to be completed and the IRB approved my change in protocol request (Appendix B).

This survey was emailed to UMM education graduates from 1963 through 2013 for a total of 1,816 recipients. The gender pie chart shows that 1,204 were female and 612 were male representing 66% and 34% respectively.

Table 1

Surveys Sent Broken Down By Gender

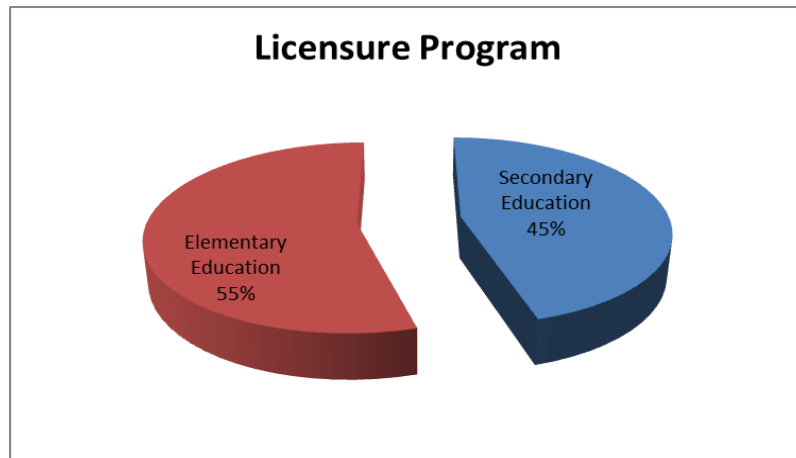

The licensure program pie chart shows that 1,040 survey recipients were elementary education and 867 were secondary education representing 55% and 45%

respectively. This data includes recipients that were counted twice if they received a license in both programs.

Table 2

Surveys Sent Broken Down By Licensure Program

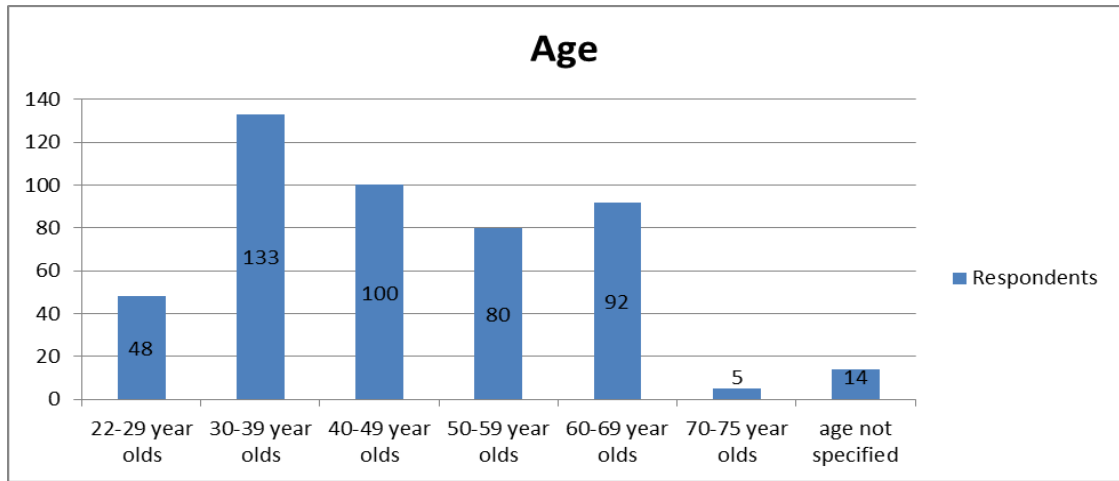

There were 459 responses through the online Google survey. There were two personal emails that clarified their survey responses and eleven emails with responses for the teaching information. This provided me with a total of 472 responses for a 27% response rate with the graduates that had a distinct email identified with the University of Minnesota, Morris Alumni Office.

Results

The first question on the survey asked the recipients their current age and below is the breakdown by age span and number of responses.

Table 3

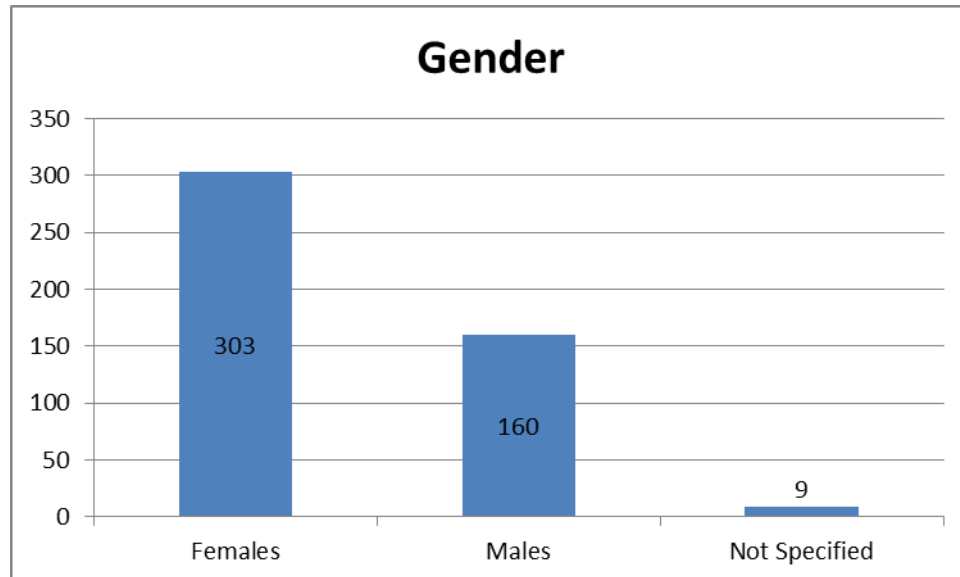

Survey Responses By Age

The second question on the survey asked the recipients their gender and below is the breakdown by gender and number of responses.

Table 4

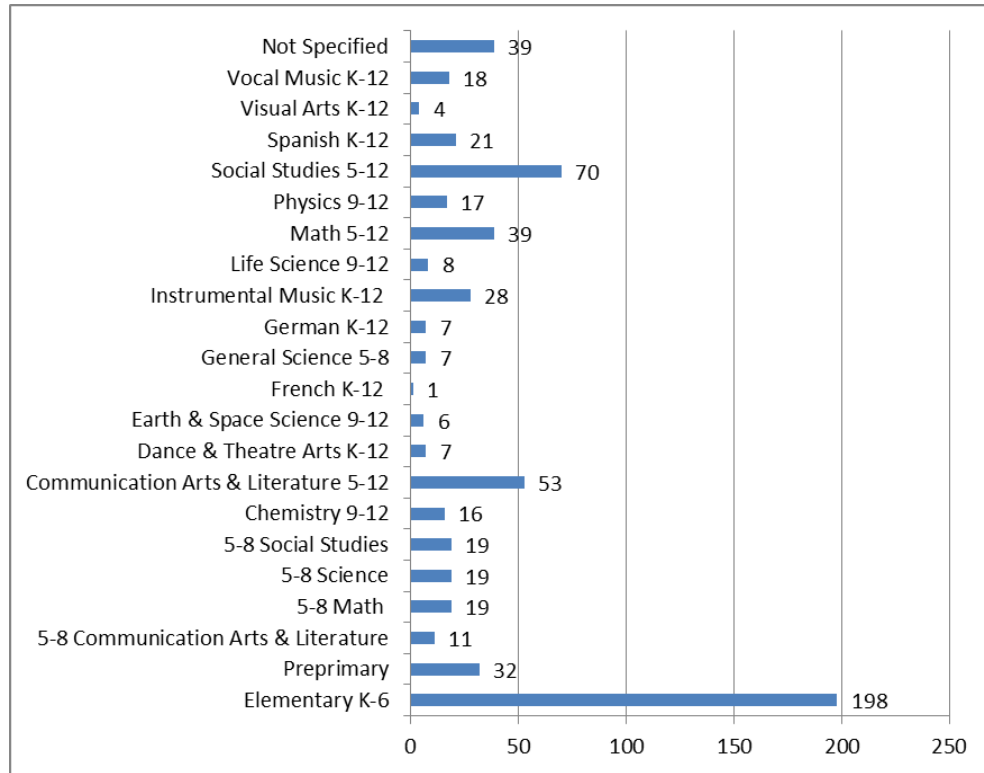

Survey Responses By Gender

The third question on the survey asked the recipients what teaching license(s) they hold and below is the breakdown by gender and number of responses.

Table 5

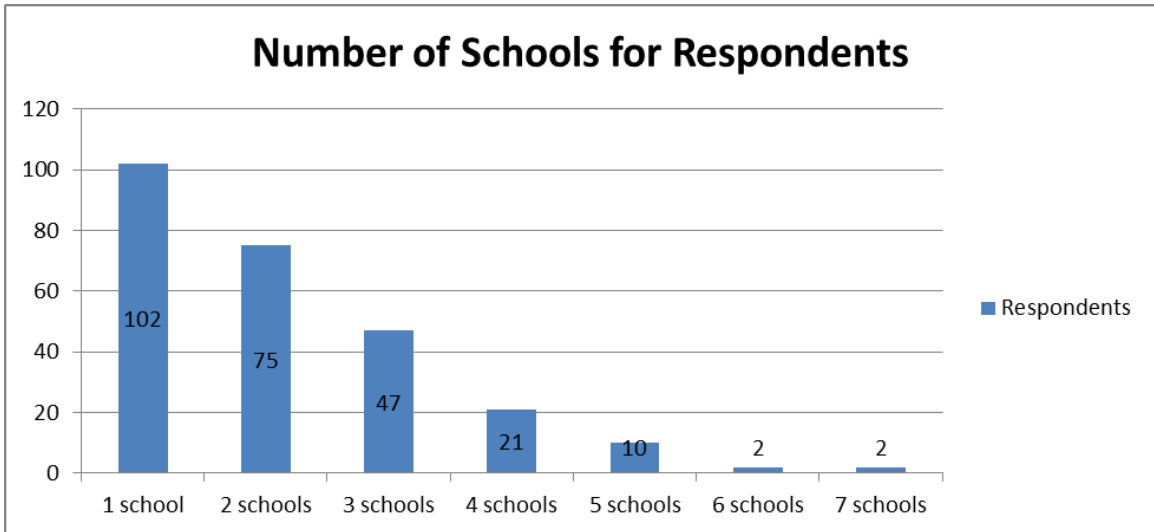

Survey Responses By Licensure Areas

The final question on the survey asked the recipients to list the school they taught at, how many years they were there, and the reason for leaving. There were 259 responses where individuals taught for their entire career and this includes 46 that are now retired. The graph below illustrates the number of schools that these 259 individuals identified.

For the individuals that responded for more than one school, I analyzed the number of years they spent at each school and below is the breakdown.

Discussion

This study was about UMM teacher education rates and comparing the results to the research that was referenced earlier which stated that 29% of new teachers leave the profession or moved to another school during the first three years in the workforce (Ingersoll & Smith, 2004). This teacher education retention survey shows that 66% of the teachers that were surveyed spent one, two, or three years at a school before moving to another school or leaving the profession which exceeds the data that Ingersoll & Smith reported in 2004. This survey also reveals that 39% have spent their entire teaching career at one school. This survey illustrates that 131 of the 508 individual license areas were in the math and science areas. It was identified that teacher turnover is related to the teaching field (Ingersoll, 2001, p.502).

When analyzing the reasons that UMM graduates left the teaching field, it was determined that approximately 53% left for personal or family reasons and 25% left for job dissatisfaction. The research that was published indicated that half left for better careers or they were not satisfied (Ingersoll, 2001).

Summary

The survey response percentage for genders is also aligned with the percentage of surveys sent out. The results of both the outlined initial research and this survey are consistent with each other. My initial analysis did not involve the relationship between license area and the number of years spent teaching at each school.

Summary and Conclusion

The purpose of this survey was to compare and contrast retention rates of teacher education graduates from the University of Minnesota, Morris to research that has been previously conducted. The initial participant list was to include all of the teacher education alumni from 1997-2006 but there was a misunderstanding and the survey was emailed to all teacher education alumni. One of the initial questions that I posed was, “do we know how many newly licensed teacher don’t teach?”. After compiling the results of this survey, it was noted that there were 47 responses that indicated that they never taught in a classroom.

Significant Findings

As referenced earlier, one option to improve the retention of teachers would be to decrease the turnover rate. This survey demonstrates that half of the teachers left their teaching position for family or personal reasons. Teacher education programs may not be able to prevent these voluntary variables. I found the gender data to be interesting as the response rate percentages were very similar to the recipient percentages.

Educational Implications

The teacher education department at the University of Minnesota, Morris could implement an annual survey regarding their graduates and share with current and prospective students. This could assist with preparation of their entry into the field and reasons for alumni leaving the field. There are options available to inform current and prospective students about these statistics so individuals can be mentally prepared if they were to find themselves in this position.

Recommendations for Future Research

A recommendation to assist the University of Minnesota, Morris teacher education department with identifying valuable information about the programs and personnel would be to survey every student that completes the program not just the students that are licensed. This would allow the faculty the opportunity to review the survey results and implement recommended changes or enhance the identified strengths.

Summary

The survey, like many, are useful and meaningful when they can be implemented and executed over a period of time and finally analyzed consistently. This survey was a very basic inquiry into teacher education retention at the University of Minnesota, Morris. Looking back at the conception of this idea, it would have been more beneficial to include a faculty member from the education office. It would have added a statistical and experienced faculty member's knowledge and provide a direct connection to the department upon my departure. The usefulness of this survey with the accreditation process was not executed as I took another position at the university. Retention is such an important topic in a variety of field even outside of higher education.

Overall, I was satisfied with my survey, the responses, and the results. However, the mistake in the original solicitation forced me to improvise on reporting the results and comparing them to the original research outlined. There were also other factors that played a role in the delay of this project including staffing changes in the education department as well as my personal career change and family life.

This e-mail confirmation is your official University of Minnesota HRPP notification of exemption from full committee review. You will not receive a hard copy or letter.

This secure electronic notification between password protected authentications has been deemed by the University of Minnesota to constitute a legal signature.

The study number above is assigned to your research. That number and the title of your study must be used in all communication with the IRB office.

Research that involves observation can be approved under this category without obtaining consent.

SURVEY OR INTERVIEW RESEARCH APPROVED AS EXEMPT UNDER THIS CATEGORY IS LIMITED TO ADULT SUBJECTS.

This exemption is valid for five years from the date of this correspondence and will be filed inactive at that time. You will receive a notification prior to inactivation. If this research will extend beyond five years, you must submit a new application to the IRB before the study's expiration date.

Upon receipt of this email, you may begin your research. If you have questions, please call the IRB office at (612) 626-5654.

UMM Teacher Education Retention Survey

CONSENT FORM

Teacher Education Retention Survey

You are invited to be in a research study of retention in the teacher education field. You were selected as a possible participant because you completed the University of Minnesota Morris Teacher Education Program between 1996-2007. We ask that you read this form and ask any questions you may have before agreeing to be in the study.

This study is being conducted by: Jana Koehler, University of Minnesota Duluth Masters of Education student and University of Minnesota Morris Financial Aid Administrator.

Background Information

The purpose of this study is to determine if the University of Minnesota, Morris (UMM) Teacher Education graduates' retention rates fall in line with the research that has previously been conducted.

Procedures:

If you agree to be in this study, we would ask you to do the following things:

Complete the online survey. By completing and submitting the survey, you are providing your consent to participate.

Risks and Benefits of being in the Study

This study has no risks or benefits involved for the participants.

Compensation:

There will be no compensation for completing this survey.

Confidentiality:

The records of this study will be kept private. In any sort of report we might publish, we will not include any information that will make it possible to identify a subject. Research records will be stored securely and only researchers will have access to the records via Google Drive and the storage is not encrypted as the responses are not tied to a name, student ID, or any other personal identifier.

Voluntary Nature of the Study:

Participation in this study is voluntary. Your decision whether or not to participate will not affect your current or future relations with the University of Minnesota. If you decide to participate, you are free to not answer any question or withdraw at any time without affecting those relationships.

Contacts and Questions:

The researcher conducting this study is: Jana Koehler. You may ask any questions you have now. If you have questions later, you are encouraged to contact her at 105 Behmler Hall, 320-589-6056, koehlerj@morris.umn.edu. You can also contact her advisors and directors of the program, Julia Williams, 218-726-8630 or jwillia1@d.umn.edu, and/or Diane Rauschenfels, 218-726-8547 or djrausch@d.umn.edu.

If you have any questions or concerns regarding this study and would like to talk to someone other than the researcher(s), you are encouraged to contact the Research Subjects' Advocate Line, D528 Mayo, 420 Delaware St. Southeast, Minneapolis, Minnesota 55455; (612) 625-1650.

36	Female		<p>I completed the Education Program but never became licensed because I knew after student teaching at Park High School in Cottage Grove, MN, that it wasn't the best fit for me. My reasons for never certifying were that I didn't feel that I was creative enough to be an effective teacher and keep students engaged. I also found both No-Child Left Behind and the bureaucratic/budgetary restrictions to be disheartening. I instinctively knew that teaching in a traditional classroom would have been okay for me but not truly the best fit for me or for students.</p> <p>However, I DO still work in education, as a librarian and associate professor at Minnesota State University, Mankato. This is my first (and current) job in the education field and I absolutely love it. Teaching at the reference desk is a great deal of fun and</p>

39	Female	Communication Arts & Literature 5-12	Albert Lea Area Learning Center, 2 years, 28 at-risk students in one of my classrooms was almost double the student teacher/adult/para ratio recommended by the state at the time. I had no paras. I requested special ed. assistance since two of my students were considered I.d. / sp. ed. The dept. did not support the request. I did a diagnostic and many of my students were reading between 2nd and 3rd grade reading levels while others were at an 11th grade level in the same classroom. At that time I don't believe that EBD was falling under special education.	After several years, I have returned to working as a para and am now working as a para at Minnewaska Area Day Treatment School. I am a current employee. My license lapsed in 2005. Since then I have completed graduate work in creative writing which does not apply for CEU since I graduated in 2007. The cut-off was 2008. My studies in theology may not apply and I have not investigated that. I am bi-vocational, serving a rural church part time.

66	Female	Elementary K-6	I never did teach. I wanted to go with the airlines for a couple. Years before starting my teaching career ; to 'see the world' first . After two interviews, I was told I had too much education to be a stewardess'. By that time; January, it was too late to get a teaching job so I began my career in the investment business and worked there for ten years, my last position being Asst. Mgr. of the Syndicate Dept.

28	Female	Social Studies 5-12	Quest Academy - less than a year. Reason for leaving: position was cut due to budget and enrollment.			Since graduating UMM I never worked or was hired full-time at a school. I worked as a substitute teacher for charter schools in MN for two years, with two long-term placements that lasted several months each. I feel that my degree did not prepare me for that job as I was teaching all grades, and encountered demands & behaviors that I had never been prepared for.
67	Female	Elementary K-6	Lucerne MN Public Schools year 1968-69...left because husband was serving in the military and moved to Florida	Duval County Public Schools, Jacksonville FL. 1969-1972.. Taught in 3 different buildings...was transferred in the middle of the school year to an inner city school as part of court ordered integration of schools. Took several months of maternity leave at the beginning of the next school year and then was placed in a third school	Substitute taught Burnsville MN public schools 1973-1975 because full time teaching jobs were not available. Schools were laying off teachers. Left teaching. Did serve later on Hopkins MN School Board. Went back to school, got a nursing degree and retired in 2011	
58	Male	5-8 Communication Arts & Literature	Discovery Middle School, Alexandria, MN 22 years-will retire from the school. Very satisfied with the school system. They have given me a chance to grow share with other staff. Education has proven to be a very rewarding occupation.			
34	Male	Instrumental Music K-12	Humboldt HS St. Paul I was there for four years. I left for another position.	Brooklyn Center HS I was there for 1 year. I left to return to graduate school.		
31	Male	Communication Arts & Literature 5-12	North View Junior High. I was a .4 teacher (3 sections of 9th grade) and augmented my income with in-house subbing. Unfortunately due to budget cuts they could not hire me back (no tenure).	Armstrong Senior High. I was 1 of 2 new teachers hired to fill a void by one teacher on sabbatical. However, after another successful year of teaching (and high marks on observations), one position was cut due to budget cuts and the sabbatical teacher came back. So despite a lack of tenure, both of us lost our spots.	Prairie Seeds Academy '08-present. My current employment has remained consistent because I am no longer at the beckon call of teacher unions, tenure, and other systems that protect mediocrity in teaching. In my current charter school we have no union, and therefore no tenure. So people only lose their job if they are ineffective at it. Since this is rule, I have yet to lose my position.

43	Female	Communication Arts & Literature 5-12, Spanish K-12	Encampment School. 2 years. I applied for and accepted a teaching job in another larger district and community. Encampment is a very small community (<500 people) in a rural mountain area. I taught six different classes each day with one prep period. There was very little opportunity for socialization for a young, single teacher.	Sheridan High School. 19 years. I am still here.		
54	Female	Elementary K-6, 5-8 Math, 5-8 Social Studies	Cedar Mountain Elementary School in Franklin, MN as a Title I Math/Reading teacher --- there 3 years --- left for a full time teaching position	Redwood Area Schools --- 1 year - non-renewed as the district moved more veteran title I teachers to classrooms	Gibbon- Fairfax - Winthrop --14 years --- lack of administrative support	Worthington -- 2 years --- left to become a union representative at Education Minnesota
44	Male	Social Studies 5-12	New Berlin Eisenhower High School 2 years laid off.	Cedarburg High School 2 years and only 80% of a job was available, I left and took a sales job, and I have not returned to teaching since.		
34	Female		<p>Not sure how to complete the previous question - I attended UMM while secondary licenses were 7-12, so none of the licensure areas are correct. My licensure areas are English/Language Arts (7-12) - licensure attained from work at UMM. Additional licensure obtained after leaving UMM includes Library Media Specialist (K-12).</p> <p>I did not obtain my first licensed school position in the licensure area of English/Language Arts obtained from UMM. It was difficult to find a job in my license area and I was not sure I really wanted to be an English teacher, so I sought other job opportunities and returned to school and attained a teaching license as a Library Media Specialist - this has been my only licensed position for all my school work experience.</p> <p>School #1: 0.5 FTE Osseo Elementary / 0.5 FTE Brooklyn Junior High Position: Library Media Specialist</p> <p>The position was 1.0 FTE split between two buildings. I left Osseo Elementary for a full-time position in my other building, Brooklyn Junior High, so that I would be in a single building. I also preferred a position working with secondary level students. I am currently still at Brooklyn Junior High.</p>

43	Female	Earth & Space Science 9-12, German K-12	Shakopee, Prior Lake, Chaska, Eden Prairie, and Orono School Districts, Jr. & Sr. high schools. Substitute teacher for 2 years (1993-1995). Left when I received a full-time teaching position in Hawaii.	Waimea Elementary and Intermediate School, Kamuela, Hawaii. 8th grade Earth Science teacher for 1 semester, Fall 1995. Left due to complete lack of discipline in 8th grade class, lack of current science textbooks (dilapidated incomplete classroom set was dated 1985) and other science classroom materials, and lack of administrative support.		
30	Female	Elementary K-6, 5-8 Math	Bemidji Middle School, 1, cutbacks - my position was created to allow release time for the union president and was no longer needed when release time was eliminated	Horace May Elementary, 2, cutbacks - I was the only non-tenured teacher at the school and student numbers dropped low enough that one classroom teacher needed to be let go.		
67	Female	Elementary K-6	Hancock Public School. I taught 6th grade and 1st grade music the first year. The second year I taught music and physical education K-6 and was the librarian. I was exposed to all the illness in the school, and was overscheduled. I didn't have even 1 minute in my schedule to shower and change clothes between phys ed and music classes, but was expected to be in street clothes for music. The stress weakened my immune system, so I was sick all year, but couldn't take that many sick days. So I took a clerical job at UM-Morris thinking it would be just for one year. But that was my alma-matter and I enjoyed working there. After 8 years at UMM, I became Registrar and stayed for a total of 34 years. I never looked back. Although I enjoyed working with children, the many skills needed to be an elementary teacher proved to be easily transferable into another profession.			
33	Female	Elementary K-6, 5-8 Communication Arts & Literature				I never actually taught using my license. I did however teach at the MN Literacy Council's NE Mpls site as a voluntary Intermediate Adult ESL teacher from 2009 to 2010.
48	Male	German K-12, Social Studies 5-12	St. Francis Public High School; 8 years; Moved to Walker, MN to teach German, Social Studies, and coach soccer.	Walker-Hackensack-Akeley Public High School; 16 years; I am still at WHA High School. I no longer teach though. Now I am the guidance counselor.		
67	Female	Social Studies 5-12, Spanish K-12	Watertown-Mayer Public Schools I was there from Fall of 1968 until the spring of 2002. I retired			
42	Female		Last question- I have none of these licenses. I have the Language Arts license and Theater Arts license. Henry Sibley-2-Budget cuts	Park High School-8 years-lack of admin support (transferred to a new school)	Woodbury high School-3- Opportunity to open a brand new high school and run the theater department	East Ridge High School-4-Still there

Substituted at Red Rock Central School, Sanborn, MN and Jeffers, MN campuses and St Anne's Catholic School, Wabasso, MN, 1981 until 2000. Quit substituting to take a full time job with the University of Minnesota Southwest Research and Outreach Center in Lamberton, MN.		
40	Male	Social Studies 5-12	Pine River-Backus High School in 14th year and still working in district.			
49	Male	5-8 Science, Life Science 9-12, Math 5-12	Only completed student teaching - went into actuarial science career instead of teaching. Mainly because of lack of math teaching openings near the metro area when I graduated.			
37	Female	Social Studies 5-12	Blaine High School- in my 14th year of teaching at BHS - I've taught at the same school my entire career Also, my licensure is as follows: 7-12 Social Studies All K-12 English as a second Language * These were not listed as possible choices above.			
61	Female	Elementary K-6	Headstart - Madison MN One year and left because I moved to Oregon	Robbinsdale schools for 22 years and still there. I did go on and get my ECSE Licensure and that is what I have been doing for the 22 years.		
27	Female	Elementary K-6, Preprimary	Primrose School of West Plymouth, 2 years, Preschool teacher - Reason for leaving: Not the grade I wanted to teach. I used this job as a stepping stone for gaining experience to find a full time elementary teaching job.			
35	Male	Elementary K-6, 5-8 Social Studies	Raleigh Hills, Beaverton Oregon. 1 year. Administration transfer due to low enrollment.	Kinnaman elementary, Beaverton Oregon. 8 years - currently teaching.		
56	Male	Social Studies 5-12	Buffalo Lake Hector Schools, 21 years, Better opportunity (higher salary, escape coaching, AD, Tech Coordinator, yearbooks, school photographer and other duties that had ground me up!) and a terrible superintendent (during that same year 11 or 35 teachers left the district)	Apple Valley High School. Still here. You've left out Media Specialist from your list of teaching positions)		
35	Female	Elementary K-6	Windy Hill School - Colby-Sawyer College, 2 years, had a baby.			
46	Female	Math 5-12	Tracy High School, Tracy, MN 5 years I left to pursue my master's.	Cheyenne East High School, Cheyenne, WY 8 years I left because my husband took a job in ND. I would have left that job anyway due to the septic conditions.		
32	Female	Social Studies 5-12	North View Junior High, 3 years, cutbacks	Central Middle School, 1 year, cutbacks	Simley High School, 1 year, cutbacks	Inver Grove Heights Middle School, 4 years, presently teaching

47	Female	Social Studies 5-12	Morris Area High School. I've been here 17 years. I was given a leave of absence for one year because of teacher cuts. I've been back for 7 years and don't plan on going anywhere unless I meet a wealthy man who is crazy about me!			
34	Male	Instrumental Music K-12	I never actually entered the field. After a wonderful student teaching experience, I was very excited about getting out into the classroom for real on my own. Happily, I found a job on campus in Morris and have been here since 2003. Hi Jana, this is Mike V :) It's been tough to hear so many of my teaching friends struggle with keeping a full time position giving the cuts to the arts in so many districts. There are some days I miss my classroom experiences, but when I hear so many tough stories of people going year to year on 1 yr contracts...I count my blessings for what I've found at UMM.			
44	Female	Elementary K-6	Substitute in many districts for 1 year St. Anthony's Middle School, 1 year, husband got a job in another city	Bemidji Area Schools, paraprofessional for 1 1/2 year Teacher for 1/2 year got a full time job in another district	Red Lake Elementary, 2 years, personal	Cass Lake Elementary, 16 years, still here
65	Male		Hastings Junior High, grades 7-9. I was at this school for 7 years. I left to take a job where pay is tied to performance. My certification was not mentioned above. I had a triple major, and was certified in Health, Physical Education, and Coaching in grades K-12. I taught Health and Physical Education, Coached Boy's Golf, Girl's Golf, and Boy's Swimming.			
31	Female	Elementary K-6, Preprimary	I was never employed by a school, but contracted through the company I worked for, Computer Explorers. Computer Explorers provided the teacher, curriculum and software, if necessary, to small schools that couldn't afford to hire a full or part time technology teacher. I taught K-8 computer classes. The first school I started at was King of Kings Lutheran School. I taught there two days a week for 5 years. I left because the director of Computer Explorers wanted me for other responsibilities within the company and we had another teacher take over.	I also taught at St. Michael's Catholic School one day a week for 2 years (these overlapped the years at King of Kings). They could no longer afford to have me.	The last school I taught at was Sacred Heart Catholic School. This was twice a week for 6 years. This also overlapped with the schools above. The reason I left was because my boss cut my hours and I chose to find another full time job rather than teach twice a week. We hired another teacher to take my place.	
57	Male	5-8 Social Studies, Social Studies 5-12	Heron Lake-Okabena (2 yrs) (low salary)	Pierz (33 yrs) still teaching...will retire in the spring of 2015		
56	Male	Math 5-12	Wabasha-Kellogg School presently on year #34. First and only school. FYI I went through the UMM program in 1976-1980 not 1996-2007.

45	Male	Instrumental Music K-12	West Central Area Schools; Elbow Lake/Hoffman/Barrett, MN 3 years: 1992-1995 After building the new school in Barrett they cut my position. I moved on to graduate school.	University of Minnesota Since 2000		
31	Female	Math 5-12	Saint Agnes School, 4 years, lack of administrative support and wanted to be closer to family.	Shanley High School, 5 years, currently still working here		
42	Male		Minnewaska Area High School - Glenwood, MN - 3 month (+-) Long-Term Sub position ended.	Discovery Middle School, Alexandria, MN - 6 mo. Long-Term Sub position ended.	Maple Lake Public Schools - Maple Lake, MN - 2 years - poor salary/career change opportunity, dissatisfaction with overall educational system focus on standardized testing	
33	Male	Social Studies 5-12	Benson High School 3 years. personal	St. James High School 1 year. Cutbacks	Belle Plaine High School...7 years...still here	
37	Female		I never intended to teach in the classroom., but found jobs I was interested in looking for some formal education background. I got my permanent sub license in the State of WA but have been doing informal science education up to this year. I found value in the secondary education program at UMM in helping me in the informal setting and the program opened some doors for me that otherwise would not have been available.

33	Female	Elementary K-6, 5-8 Social Studies	I student taught and then subbed for a year at various schools in various capacities including elementary classrooms, middle school classrooms, and special education classrooms. I decided not to pursue a career in teaching as during my student teaching 1/3 of the teachers at that school were pink slipped and I thought to myself, how can I put my family through this? Never knowing if I had a job from year to year, and having to move all the time. At the time I graduated most schools were cutting back and many were not hiring.			
30	Male	Social Studies 5-12	International Falls High School, 7 Years, I'm still teaching here			
35	Female	Elementary K-6	Orono Public Schools (Schumann Elementary), Orono, MN 10 years I left because I wanted a shorter commute (I switched schools, to a school 4 minutes from my house; my commute had been 25-30 minutes). 29	Female	Communication Arts & Literature 5-12	Shared teacher between Chokio-Alberta and Herman-Norcross - 2 years. Reasons for leaving: job dissatisfaction and stress (I WAS the 7-12 English department in each school, had no administrative support, and was harassed by the school counselor so much that I had to get my union representative involved.)	Princeton High School - 1 year. Reason for Leaving: Contract non-renewal after speaking up about bullying and harassment from other staff (informed of my non-renewal two days before the end of the year, after making plans for the next year with the administration. EVERYONE that I worked with was caught off-guard and shocked).	Heritage Academy of Science & Technology, Minneapolis contract alternative - currently working here (since June). I am desperately looking to go somewhere else - school or otherwise. Reasons for wanting to leave: major dissatisfaction, no organization, no administrative support, no parental support, horrendous student behavior, low pay, dangerous location, and an overwhelming work load (including being forced to "volunteer" on committees, with tutoring non-English speaking parents, and with extra-curriculars)	After my horrible experience in Princeton, I stopped teaching, vowing to not return. I may have only had three years of teaching at that point, but they were three years of pure and utter hell - so bad that they actually led to me being sick. However, I was unable to make my student loan payments without working - literally - 12 hours/day, so I took the job at Heritage. While I love actually teaching, so little of what I am expected to do as a teacher is teaching. The stress and emotional and mental exhaustion of this profession in today's schools - without any support from anyone - and the insane workload (at school for 10-11 hours, then 4-5 hours of schoolwork at home) makes me seriously consider if it's worth it, and if I want to put myself through this for the rest of my life.

39	Female	Elementary K-6	Benson Public Schools I have been working here since I graduated from UMM in 1997. I have moved to several different grade levels because of budget reductions, but have always been employed here as an elementary teacher.			
48	Male	Math 5-12	Houston Public Schools, MN 1 year Location.	Morris Area High School, Morris, MN 11 years No suitable employment for my spouse in the area.	ROCORI Area Schools, Cold Spring, MN 13 years Currently employed here....I will retire before I reaching retirement age. This profession is a nice way to raise a family, but as a mathematics major, the compensation and general lack of respect for teachers by the public is hard to stomach. Not very professionally satisfying...suffering through cuts every year, working with apathetic students, peers and administration. I have, however, enjoyed helping my children navigate the school systems and being involved in their education. My children understand how vital education is and have been successful. That

36	Male	Math 5-12	White Bear Lake High School 14 years I have been at this school my entire career.			
60	Female	Elementary K-6	Melrose Public School; one year; reason for leaving was that I was hired as a Title 1 teacher and the district would only keep their Title 1 teachers for 2 years and then let them go (to avoid Title teachers from being able to obtain a job from a regular classroom teacher that had been hired that would only have one year of teaching). I wanted to find a regular classroom teaching job and work on building seniority.	Brownston Public School (Hired in 1976); Brownston paired and then eventually consolidated with Stewart Public School --- becoming McLeod West; McLeod West then did a consolidation with 3 school districts (Glencoe-Silver Lake, Buffalo Lake-Hector, and Gibbon-Fairfax- Winthrop). I taught for a total of 36 years within the Brownston Public School system and through these two consolidations it was involved in.

66	Male		University of Minnesota, Morris 1966-1970 Had a teaching degree in Physical Education and Health, it covered K-12 at that time. Graduated in 1970 I don't see Physical education or Health in your selections.			
30	Female	Elementary K-6, 5-8 Math	After applying for several teaching jobs and not receiving a position, I did substitute teaching for a few months with the Fergus Falls school district. I then chose to open my own child care business. My decision was based on personal reasons. I did not want to have to move for a teaching job. I wanted to "be my own boss." My passion was caring for children.			
51	Female		I am a little offended that you don't have physical education listed. I graduated in 1985 from UMM with a Physical Education and Health major and a coaching minor. I have taught in Dist. 206 - the Alexandria school system since 1987 and am still there and enjoy teaching every day!

48	Female		Browerville High School (MN), 5 yrs, wanted to move to larger city. License held: Spanish 7-12	MN Center for the Arts: one year; I only had a one-year contract while a teacher was on sabbatical. I would have looked for another position anyway because I just wasn't comfortable with the philosophy of the school, the student attitudes, and the grading system--letter grades were not used, but rather words like deficient, satisfactory, good, and excellent, check marks and plus signs used instead of points. It was too subjective for me, plus the grade terms translated into grades for students' transcripts anyway. License held: Spanish 7-12	Chisago Lakes HS (MN): one year; not re-hired, but I was moving out of state anyway after I got married. I did not feel supported by the principal, and I don't think he liked that I held students accountable and graded accordingly. He observed me in the classroom twice during the year for 1/2 hour each session and provided favorable feedback. At the end of the year he told me that I was not being re-hired for the next year. I think this is partly because of personality conflicts between us, and also because he knew I was getting married to someone from out of state. License held: Spanish 7-12	Mt. Eden High School (CA), two years; took a semester off for maternity leave and then did not return because we moved to a different state. License held: Spanish 7-12

31	Female	Instrumental Music K-12 , Vocal Music K-12	Barranca Mesa Elementary, Los Alamos, NM 7 years Moved to North Carolina	Metcalf Junior High and Nicollet Junior High in BES District, MN 1 year Got married and moved to New Mexico	Not a "school" but a youth theater company. I am opening Right On Cue Kids Theater in Cary, North Carolina right now. Instead of jumping back into a teaching job, I felt my time and talents were better suited pursuing an educational path with the least resistance. I have found nothing more educational than providing students with as full of a musical theatre experience as possible, and it took me 7 years to get a group of teachers to work on a big project like this in a school. I have been directing Atomic City Children's Theater for 5 years, and what the kids get from the experience provided are not easily replicated in a school environment. Instead of fighting the system, which I feel is failing, I am trying to provide new educational platforms that model excellence in education in hopes of being a catalyst and model for the future of education.
