

'U' HEAT TRANSFER
EXPERT RECEIVES
HONORARY DEGREE

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 1, 1968

For further information, contact:
JEFF B. CARRUTHERS, 373-2126

(FOR RELEASE THURSDAY MAY 2, 1968)

University of Minnesota Regents' Professor Ernst R. G. Eckert has been awarded an honorary Doctor of Engineering degree by the Technische Hochschule, Munich, as a part of the German engineering institute's centennial celebrations May 1 and 2.

The degree honors the contributions Eckert, a professor of mechanical engineering, has made to the field of heat transfer (the study of the process by which heat moves from one material to another).

Eckert also will attend the Third All-Union (USSR) Heat Transfer Conference in Minsk, White Russia, from May 14 to 18. This conference is held every three years. There he will present a paper he co-authored with University Mechanical Engineering Professor Emil Pfender and attend a meeting of the International Journal of Heat and Mass Transfer editorial board, of which he is chairman.

The paper Eckert will present is titled "Heat Transfer Between an Ionized Gas and a Solid Surface Without and With an Electric Current Flowing Into the Surface." It is a general treatment of concepts of plasma research he and Pfender have been using at the University in USAF and NASA-sponsored research.

Plasma research deals with gases at temperatures so high (about 10,000 degrees Centigrade) that they are ionized and thus electrically conducting. Eckert explained that very little is yet known in the field. And plasma technology promises to be very important in the ultimate harnessing of the fantastic power of atomic fusion (the process by which energy is released when atoms combine to form heavier atoms, e.g. the sun's own energy process of combining hydrogen atoms to form helium plus energy). Welding, melting processes, electric arcs, and even space propulsion are other areas of potential application.

Plasma rockets, currently under study by NASA, would be used for interplanetary (and possibly interstellar) travel where a small but constant driving force (consisting of a stream of gas emitted from a plasma engine) could provide the required acceleration at minimal fuel expenditure and weight.

(FOR IMMEDIATE RELEASE)

"Three cheers for Mark Lane. His work is not without a trace of that stature we call heroic. Three cheers. Because the game is not yet over. Nor the echo of muffled drums. Nor the memory of the riderless horse."

-- Norman Mailer, "The Washington Post," Aug. 28, 1966

Mark Lane's film, "Rush to Judgment," a challenge to the Warren Commission, will be presented by the University of Minnesota Film Society at 3:30, 7:30 and 9:30 p.m. Monday (May 6) and at 7:30 and 9:30 p.m. Tuesday (May 7) in the Bell Museum of Natural History auditorium.

The questions posed by attorney Mark Lane in his book, "Rush To Judgment," in 1966 and the same questions asked again in the film version, produced in 1967, are a continuing topic for discussion in 1968.

Produced by Lane and Emile de Antonio, the director, the film includes interviews with witnesses to the events in Dallas on Nov. 22, 1963, and the days that followed. Excerpts from the television filming of Oswald's assassination are shown. Lane's technique is to present interviews with myriad witnesses whose testimony runs counter to the Warren Commission conclusions. The film is, essentially, a brief for the defense.

Lane, a former New York legislator and a founder of the Reform Democratic Movement in New York, twice testified before the Warren Commission and has lectured widely on the findings of his research for the book and film.

"(The film) eminently succeeds. A good courtroom drama that bombards the viewer. This dramatic materialization of witnesses before the eye and ear has much more immediacy and impact than the printed word. Vivid and forcefully presented," said Bosley Crowther, New York Times critic.

LERNER GIVES MATERIALS
TO KERLAN COLLECTION

Original art work and publishing materials for three children's books were recently given to the Kerlan Collection of the University of Minnesota Libraries by the Lerner Publications Company of Minneapolis.

The books are "I Found A Leaf," a free verse book with crayon leaf print illustrations, written by Sharon Lerner; "Widdles," a story of a childless couple who adopt several children with international backgrounds, by Pearl Augusta Harwood, and "Why Did He Die?", a children's book about death, by Susan Dalke. The Kerlan Collection is a center for research in the field of children's books and includes some 25,000 children's books.

U OF M CHEMISTRY
PROF HONORED

Izaak M. Kolthoff, professor emeritus of analytical chemistry at the University of Minnesota, today (Wednesday, May 1) received the 18th Gold Medal Award for Scientific Achievement presented by the City College Chemistry Alumni Association of the City University of New York. Professor Kolthoff presented an address and was guest at a banquet.

Professor Kolthoff joined the Minnesota faculty in 1927 and was named chief of analytical chemistry in 1951. Although he retired from active faculty work in 1962, he is still active on special research projects at the University. He is the author of 10 books and more than 700 papers on analytical chemistry. He is the winner of numerous prizes and awards for his work in chemistry and is a member of many professional organizations, including the National Academy of Sciences. He is originally a native of Holland.

POVERTY PHOTOS
ON EXHIBIT AT 'U'

(FOR IMMEDIATE RELEASE)

A compact version of the "Profile of Poverty" photo exhibition which was shown at Southdale Shopping Center this fall is back in the Twin Cities for a return engagement.

The documentary exhibit is being shown in four different sections, one section each week, in the West Bank Union common room, 110 Anderson hall, West Bank area of the University of Minnesota:

To May 3 -- Urban Poverty and Unemployment
May 6-10 -- Old Age and Rural Poverty
May 13-17 -- Rural Poverty and Migrant Workers
May 20-24 -- The War on Poverty and Hope for the Program

The photo show, prepared by the Office of Economic Opportunity at the request of Vice President Hubert Humphrey, is a vivid collection of 400 pictures by America's foremost photographers, including Edward Steichen. Four duplicate editions of the exhibition have criss-crossed the country for showings in more than 60 communities.

The dramatic photographs depict in stark detail the varying aspects of poverty in every region of the United States and among every age group. The effects of privation on children and old people are especially graphic. Migrant workers from coast to coast are shown, as well as the well-known problems of Appalachia and the lesser-known plight of Indians, Mexican-Americans and Puerto Ricans.

In suggesting the exhibit, the vice president emphasized that he wanted people to be shocked and appalled by the graphic portrayal of the facts of poverty in the United States today, in this most affluent of societies. Judging by comments and letters by many of those who have stopped to view the pictures in various exhibit areas, many Americans have reacted in just that way.

FEE SYSTEM
CHANGES AT 'U'
OUTPATIENT CLINICS

(FOR IMMEDIATE RELEASE)

Outpatients at University of Minnesota Hospitals no longer must register and pay fees before going to their clinic area or receiving a service.

In a policy change that went into effect Wednesday (May 1), outpatients may either pay their clinic and lab fees, or drug and x-ray charges, during their visit or be billed later.

John Westerman, director of University Hospitals, says the new system for the Outpatient Clinics is another step away from the old, widely held belief that outpatient care is second-rate service.

TWO POETS
TO READ AT 'U'
FRIDAY, SATURDAY

(FOR IMMEDIATE RELEASE)

Three public poetry readings are scheduled for Friday and Saturday (May 3-4) at the University of Minnesota.

Poet May Swenson will give a public reading from her works at 8:30 p.m. Saturday (May 4) in the James Ford Bell Museum of Natural History at the University of Minnesota.

She also will read her poetry Friday (May 3) from 3:30 to 5 p.m. in the Coffman Union Women's Lounge.

At 9 p.m. Friday (May 3) in The Whole in Coffman Union, Yugoslavian poet Aleksandar Nejgehaver will read his own and other Yugoslavian poetry in English translation, accompanied by folk music.

Miss Swenson was born in Logan, Utah, and received a B.A. degree from Utah State University. Rather than pursue a higher degree, she began to write poetry. She is on the editorial staff of New Directions and has published "To Mix With Time," "Half Sun Half Sleep," "Another Animal" and "A Cage of Spine."

Her poetry is a reflection of her personal interests -- in nature primarily, and also in science. She feels no conflict between science and poetry and is currently working under a Rockefeller Foundation grant on a series of poems on scientific subjects.

Nejgehaver is renowned for his translations of Yugoslavian poetry into English and has done readings in San Francisco coffeehouses. He is a professor at Novi Sad University, Yugoslavia, and is now on a Fulbright grant as a visiting professor at the University of Iowa. Nejgehaver's scholarly specialty is Shakespeare.

Miss Swenson is the eighth in a series of nine distinguished American poets brought to Minneapolis by the University's General Extension Division.

Miss Swenson's Friday reading is free; admission charge Saturday is \$1. There is a \$.25 cover charge at The Whole.

HIS MAJESTY,
KING OF NORWAY
TO VISIT 'U'

(FOR IMMEDIATE RELEASE)

His Majesty Olav V, King of Norway, will make his only public appearance in the Twin Cities at 10:10 a.m. Monday (May 6) when he visits Northrop auditorium at the University of Minnesota.

Lester Malkerson, chairman of the University Board of Regents, will greet His Majesty and the official party on the plaza in front of the auditorium.

The National Anthems of Norway and the United States will be played on the Frances Miller Brown Memorial Bells as the group walks to the lectern area.

Regent Malkerson will present the King with a citation from the University and a gift of books published by the University of Minnesota Press. His Majesty will speak briefly.

After meeting University officials, faculty and students, the royal party will leave the campus and go to the State Capitol in St. Paul where they will meet Governor Harold Levander.

LYNN MARASCO, 373-2126

Two two-day seminars in "Accounting for Non-Accountants" will be offered by the University of Minnesota General Extension Division and the School of Business Administration May 21 and 22 and June 6 and 7.

The seminars were given last year and are being repeated because of the need and demand for such a course. Both seminars are designed for businessmen who need to understand financial statements and who must be acquainted with accounting data for specialized decision making.

Enrollment is necessarily limited and applications should reach the University by Tuesday, May 7. For registration information contact the Department of Conferences and Institutes, Nolte Center, University of Minnesota, Minneapolis, Minn. 55455, telephone 373-3151.

The purpose of the May seminar, "Understanding Accounting Statements and Accounting Terminology," is to provide an understanding of income statements, balance sheets, funds statements and other basic accounting devices. This seminar prepares for the next one, but may in itself provide enough accounting background for the non-accountant's purposes.

The June seminar will assume an understanding of such basic accounting knowledge as may be gained from the first seminar, but the first is not a prerequisite for the second. "Accounting Data in Planning and Control for Management" will focus on the use of accounting information for decision making.

The seminars will be held at Nolte Center on the University's Minneapolis campus. They are being offered by the University in cooperation with the Minneapolis and St. Paul Chambers of Commerce.

UNIVERSITY SYMPHONY
TO PRESENT
CONCERTO-ARIA CONCERT

(FOR IMMEDIATE RELEASE)

A Concerto-Aria Concert will be presented by the University of Minnesota Symphony Orchestra at 8:30 p.m. Tuesday (May 7) in Northrop auditorium.

Featured soloists will be the following University students: Janice Teisberg, flute; Cathy Crouch, harp; William Cermak, piano; Rita Southworth, piano; Margaret Decker, cello, and Margaret Sexton, soprano. Richard Fischer will conduct the orchestra in the free, public concert.

The program is as follows:

Concerto for Flute and Harp in C Major, K.V.299.....Mozart
Janice Teisberg, flute
Cathy Crouch, harp

Piano Concerto No. 2 in B Flat Major, Op. 19.....Beethoven
William Cermak, piano

Prelude a l'apres-midi d'un faune.....Debussy

"Batti Batti" from Don Giovanni.....Mozart
"Je vieux vivre" from Romeo and Juliet.....Gounod
Margaret Sexton, soprano

Piano Concerto No. 1 in C Major, Op. 15.....Beethoven
Rita Southworth, piano

Cello Concerto in B Minor, Op. 104.....Dvorak
Margaret Decker, cello

N. Y. MUSEUM CURATOR
TO SPEAK AT 'U'

Nora Scott, associate curator of Egyptian art at the Metropolitan Museum of Art in New York, will speak at 8:30 p.m. Monday (May 6) in Room 250 Anderson hall, University of Minnesota, West Bank. "Egyptian Craftsmen and Their Products" will be the topic for her illustrated lecture, which is open free to the public. It is sponsored by the Minnesota Society of The Archaeological Institute of America.

U PROF TO SPEAK ON
MOTIVATION, BEHAVIOR

"Hypothalamic Mechanism of Motivation and Species Typical Behavior" will be explained by Professor Warren Roberts of the University of Minnesota psychology department at 4 p.m. Thursday (May 9). The lecture, to be held in Room 155 Ford hall, is free and open to the public. It is sponsored by the University's Center for Research in Human Learning and the department of concerts and lectures.

Warren Roberts has been at the University since 1962. He has B.A. and M.A. degrees from Stanford University and a Ph.D. from Yale.

INDIC STUDIES PROF
TO LECTURE AT 'U'

Clifford R. Jones, assistant professor of Indic studies at the University of Rochester, N. Y., will speak on the topic, "Indian Temple Architecture" at 3:30 p.m. Monday, May 13 in Room 25 Architecture building, University of Minnesota. Jones' lecture, open free to the public, is sponsored by the University department of art history and South Asia Center.

'MISS CAPITAL GAINS,'
KEATING TALK WILL

Pretty coeds and serious discussion of the socio-economic responsibilities of business in the community will highlight Business Week activities at the University of Minnesota, Friday (May 3) through Wednesday (May 8).

Stephen Keating, president of Honeywell Inc. and of the Urban Coalition, will speak on the topic, "The Business Response To Urban Problems" at the annual Business Day luncheon at noon Wednesday (May 8). The luncheon is free to all business students.

"Miss Capital Gains," selected from coeds nominated by organizations affiliated with the School of Business Administration, will be crowned at the same event.

Candidates will be introduced at noon Friday (May 3) in Room 5 Blegen hall, on the West Bank. A student-faculty talent show will officially open the week's activities.

John H. Farley, director of the Management Center at the College of St. Thomas, will discuss "Money, Motivation and Morale" at noon Monday (May 6) in 5 Blegen hall.

Voting for Miss Capital Gains will be conducted from 10 a.m. to 3 p.m. Monday in the Blegen hall basement.

The Hon. Robert J. Sheran, Minnesota Supreme Court Justice, will speak at noon Tuesday in 5 Blegen hall. "Human Rights vs. Property Rights: An Irreconcilable Problem" will be his topic.

There will be a coffee hour for students, faculty and business representatives from 9:30-10:15 a.m. Wednesday (May 8) in the third floor lounge of Coffman Union. At 10:15 round-table discussion groups will meet to talk about (1) Does Business have an obligation to help improve the current socio-economic problems of unemployment, discrimination and poverty? (2) Are young middle-management executives underemployed as a result of rigid hierarchical structures and undue centralization of authority to a small senior management? (3) What prompts students to go into the business profession today?

Classes in the School of Business Administration will be excused after the second hour Wednesday.

Business Week is sponsored by the School of Business Administration and the Business Board.

'U' CENTENNIAL HALL
TO GO COED THIS FALL

(FOR IMMEDIATE RELEASE)

Centennial hall in September 1968 will become the second University of Minnesota residence hall on the Minneapolis campus to go coeducational. Pioneer hall has been coed since it was converted to that purpose in 1961.

Don Finlayson, director of housing, says women's applications are now being accepted for up to 280 places out of Centennial's 668-person capacity. Most of the rooms are singles. Women residents will occupy four of Centennial's houses, sharing the dining facilities with the rest of Centennial and Territorial hall. They will have their own lounges (in addition to common lounges and TV rooms) and washrooms, and private use of the former Centennial party room.

Women who have already applied to another hall may arrange to transfer their application through the secretary of the other hall. Any fulltime junior, senior or graduate student is eligible to apply. Sophomores who already reside in residence halls are also eligible.

Coed housing has proven extremely popular in Pioneer hall, according to Finlayson. In a survey of opinion for and against coed housing, Pioneer voted resoundingly in its favor -- 85 to 90 per cent "for," as opposed to an average 55 per cent "for" in the non-coed residence halls. Also, Pioneer Court -- the women's section of Pioneer hall -- is always the first dorm filled at the beginning of the year, and the women on its waiting list stay on it all year and won't accept alternative housing in other residence halls.

(MORE)

Studies of coed housing in general have discovered fascinating and sometimes surprising psychological effects on both staff and students, Finlayson said, citing the following:

Staff members take more interest in serving a mixed audience; the variety represents a more challenging customer relationship. Women staff members -- in particular those who have been working in men's residences and dining halls -- seem to enjoy and to respond with a different outlook and interest to working with both men and women. And it has actually been found that cooks cook better for a mixed clientele, than for either all-men or all-women.

For students, the most dramatic effects of coed housing take place in the dining halls. It hasn't yet been proven, but students seem to dress more attractively. Meals can be served by attractive girls. A hall tends not to look like a beauty parlor or smell like a gym. A men's dining room takes on the color brought in by women's clothes. The noise level is better in a mixed dining hall: women are less inclined to shriek, or men to bellow. The overall result of these changes is that eating is made more pleasant; therefore, students take longer to eat and talk. This reduces the feeling of the room as a "bolt your food and run" atmosphere, and the change is not imposed.

In the common areas, lounges and TV rooms, the same changes are seen, resulting in students' greater inclination to frequent the lounges and study areas.

There is also a long-term physical effect of coed housing upon the residences, themselves. When refurnishing and redecorating are needed, they will now be done with an eye toward color, texture and pattern instead of toward the relatively lifeless durability presently sought for men's halls.

In the discussions which preceded the decision to make Centennial coeducational, the University Board of Residence Halls put forth the argument that a university is a learning experience -- and at the University of Minnesota, a coed learning experience. There is no reason why this coed learning experience should abruptly cease as a student enters a residence.

Another beauty of coed living is that it returns a degree of choice to the student; for if a man or woman wants to avoid the other sex, it is perfectly possible to do so in a coed dorm. Even at meals, one can simply sit at a table full of men or of women. The option remains with the individual.

SPEECH DEPARTMENT
TO HOLD SYMPOSIUM
AT 'U' SATURDAY

(FOR IMMEDIATE RELEASE)

The University of Minnesota department of speech will hold its third annual symposium on communication Saturday (May 4),

Topic of this year's symposium is "Toward an Appropriate Rhetoric (Communication Theory) for Contemporary Speech Communication." Speeches will deal with theoretical approaches to analysis of speech communication.

Guest speakers will be Professor Samuel Becker of the University of Iowa, Professor Larry Rosenfield of the University of Wisconsin, and Professor John Condon of Northwestern University.

The speakers will present formal papers on inter-personal and mass communication at 10 a.m. Saturday at Nolte Center for Continuing Education on the University's Minneapolis campus. A luncheon at Coffman Union will follow the morning program. In the afternoon there will be a panel discussion of the papers by the speakers and two University of Minnesota speech department faculty members, Robert Scott and Donald Browne.

The morning and afternoon sessions are free and open to the public without reservations. Anyone wishing to attend the luncheon should make reservations by Friday (May 3) by calling Professor Bernard Brock at 373-2570.

LYNN MARASCO, 373-2126

The University of Minnesota School of Social Work has announced a new workshop program designed to assist supervisors and administrators of social welfare agencies increase effectiveness in their programs.

The first of what is expected to be a series of workshops will be held Wednesday through Friday (May 8-10) and June 26 at Nolte Center for Continuing Education on the University's Minneapolis campus.

The workshop has been divided into three phases. In the first phase, on Wednesday (May 8), Professor Don F. Sheriff, director of the Center for Labor and Management at the University of Iowa, will focus attention on "The Leadership Role in Personnel Development," beginning at 9 a.m.

Thursday and Friday will be devoted to a study of "The concept of Management by Objectives and Goals." This part of the program will be headed by Earl J. Beatt, executive director of Family and Children's Service in Minneapolis, and Professor Jude P. West, associate director of Iowa's Center for Labor and Management.

The third part of the program will take place on June 26. At this time there will be a reevaluation of the concepts presented at the May sessions in the context of problems actually faced by the participants in the interval between the sessions. It is hoped that this unusual approach will make the workshop more useful in daily, practical situations, according to Assistant Professor William Hoffman, director of continuing education in social work.

For registration information, contact the University General Extension Division's department of conferences and institutes, which is cooperating with the School of Social Work in sponsoring the workshop. The department is located in Nolte Center, University of Minnesota, Minneapolis, Minn. 55455; telephone number is 373-3151.

REV. STANLEY KING
TO SPEAK AT 'U'

The Reverend Stanley R. King will discuss "New Concern for the City" at the University of Minnesota as the second lecture in the New Dimensions series. His talk, in Coffman Union main ballroom at 8 p.m. Sunday (May 5), is open free to the public.

Mr. King is executive director of the Twin Cities Opportunities Industrialization Center, Inc., and pastor of the Mount Olivet Missionary Baptist Church in St. Paul. Long active in civil rights, he participated in the 1963 March on Washington, the 1964 Vigil in Washington, the 1966 White House Conference "To Fulfill These Rights," and the 1967 Urban Coalition Conference in Washington.

The New Dimensions lecture series is sponsored by the Council of Religious Advisers, the Council of Student Religious Organizations and the Union Board of Governors.

CELLO RECITAL FEATURES
TAPED, LIVE MUSIC

A contemporary blending of taped and live sounds will be heard in a cello recital by Madeline Hammond at 8 p.m. Monday (May 6) in Scott hall auditorium, University of Minnesota. The recital, open free to the public, is sponsored by the University music department.

Miss Hammond, a University senior and a native of Fergus Falls, commissioned Minneapolis composer Daniel Goode, a former University faculty member, to write the work, "Music-plus-one for cello, taped and live," for the program. A student of Instructor Robert Jamieson, she has played the cello for 11 years.

The program for her recital also includes Sonata No. 2 in D Major by Bach, Sonata No. 2 in F Major, Op. 99 by Brahms, and Sonata No. 1, Op. 40 by Shostakovich.

Hans Peter Kraus, one of the world's most widely known antiquarian bibliophiles and probably the most successful bookseller in the United States, will deliver the sixth annual James Ford Bell Lecture at 8 p.m. Monday (May 6) in the St. Paul College Club, 990 Summit ave., St. Paul.

A social hour beginning at 6 p.m. and a dinner will precede the lecture.

Kraus, who was born in Vienna, first established his book business in the palace of Baron Bellegarde in 1932. He furnished his first shelves with portions of the library of Count Thun-Hohenstein. The Kraus business, specializing in old and rare books and manuscripts, as it does today, flourished for several years until Hitler invaded Austria in 1938. Kraus fled, salvaging some of his valuable reference collection.

In 1939 he set up his business in New York, where it is now located at 16 E. 46th st. His reference library today contains some 10,000 volumes and is the largest maintained by any antiquarian bookseller anywhere in the world. The collection is concentrated on the classics and learned periodicals in all languages and areas of study.

The lecture is sponsored by the Associates of the James Ford Bell Library of the University of Minnesota. The Bell Collection includes more than 7,000 books on early commerce and exploration. John Parker is curator of the collection. Directors of the Associates include Elmer L. Andersen, Regent of the University of Minnesota; T. R. Anderson, Mrs. John Stewart Dalrymple, Maynard B. Hasselquist, Mrs. Walter U. Hauser, Irving B. Kreidberg, John E. Tilton, Lyman Wakefield and H. E. Vanderboom.

- Fri., May 10 -- "Portrait of Lenin" and Russian shorts, University Film Society, 3:15, 7:30, and 9:30 p.m., Museum of Natural History auditorium. Admission.
- Fri., May 10 -- "Seelewig," German opera, 8:30 p.m., University Baptist Church, 1219 University Ave. S. E. Admission \$1; call 373-3546 for tickets.
- Sat., May 11 -- "Seelewig" see above.
- Sat., May 11 -- "King Kong" and Marx Brothers "Duck Song," University Film Society, 7:30 p.m., Museum of Natural History auditorium. Admission.
- Sun., May 12 -- Folk mass and discussion of new forms of worship, John and Amanda Ylvisaker, 8 p.m., Coffman Union main ballroom. Free.
- Sun., May 12 -- Stories of Krishna in Indian Classical Dance, lecture-performance-demonstration by Betty True Jones, University of Rochester, 8 p.m., Scott Hall. Free.

MALCOLM MOOS INAUGURATION
AS 10TH U OF M PRESIDENT
WILL COMBINE OLD, NEW

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 3, 1968

(FOR IMMEDIATE RELEASE)

For further information, contact:
NANCY PIRSIG, 373-2126

This week's inauguration of Malcolm Charles Moos as tenth president of the University of Minnesota will combine many traditions and a few innovations in a highly colorful and ceremonious occasion.

Traditional will be the slow academic procession up the grassy Mall, beginning at Walter Library, proceeding to the center of the Mall and up the steps into Northrop auditorium at about 1 p.m. Thursday (May 9). Some 1,000 persons will march, most of them dressed in colorful academic robes and hoods.

In connection with the inauguration will be a three-part symposium on Wednesday and Thursday (May 8-9) on the topic "The Race for Learning: Dreams and Deadlocks." Taking part will be three leading figures in public service, journalism and education: McGeorge Bundy, president of the Ford Foundation; Carl Rowan, columnist and former ambassador; and Kingman Brewster, Jr., president of Yale University. All the talks will be in Northrop auditorium.

Bundy will open the symposium at 8 p.m. Wednesday (May 8). He will be introduced by Regents' Professor of Economics Walter W. Heller. The stage will hold flags from the other Big Ten universities.

Rowan will speak at 9 a.m. Thursday (May 9), introduced by Regents' Professor of Physiology Maurice B. Visscher; and Brewster at 10 a.m., introduced by Regents' Professor of Anthropology E. Adamson Hoebel. On the stage will be flags representing all the foreign countries that have students now attending the University---some 75.

KUOM, the University radio station, will broadcast the Thursday morning speeches live, and will broadcast Bundy's speech at 8 a.m. Thursday, just before the other two.

Following a lunch of sandwiches served in Walter Library, the academic marchers will assemble. They will be representatives of institutions of higher learning from all over the United States and other parts of the world and of learned societies and professional organizations, Regents of the University, Regents'

(MORE)

Professors and certain other faculty members and administrative staff, Governor Harold LeVander, the top administrative officers of the University, student leaders and alumni representatives. Some of the official delegates are faculty members of institutions as far away as Sidney, Australia; Chile; Brazil; Israel, and West Berlin.

During the march, University Carillonneur William Cermak will play the Francis Miller Brown memorial bells atop Northrop. Inside, as the marchers enter the auditorium, Bandmaster Frank P. A. Bencriscutto will be leading the University Concert Band Ensemble.

Dressing the line of march from the Library to Northrop will be cadets and midshipmen from the University's three R.O.T.C. units: Army, Navy and Air Force.

Carrying the symbolic mace and leading the inaugural procession will be Regents' Professor of Chemical Engineering Neal R. Amundson, followed by a color guard of cadets and midshipmen. Last in the long procession will be Malcolm Moss.

An innovation for a University inauguration will occur during the ceremony itself. Three of Moos's former superiors will escort him to the lectern on the stage of Northrop to receive the mace. Escorting the president in this symbolic ritual will be his former teacher and adviser while he was earning a master of arts degree in political science at the University, William Anderson; the first university president he taught under, then head of the University of Wyoming and later eighth president at Minnesota, James Lewis Morrill; and the university president under whom Moos spent many of his teaching years at the Johns Hopkins University, Detlev Bronk, now president of The Rockefeller University.

Lester A. Malkerson, chairman of the University Board of Regents, will speak first in the inaugural ceremony. He will then introduce E. W. Ziebarth, dean of the College of Liberal Arts and chairman of the Inaugural Committee, who will preside.

Three citations will be given to President Moos, in another innovation. They will be presented and read by representatives of the student body (William C. Newell, CLA senior and outgoing president of the Minnesota Student Association), the

faculty (Professor David K. Berninghausen, director of the Library School and member of the Faculty Senate consultative committee), and the alumni (Albert H. Heimbach, president of the Minnesota Alumni Association).

Then Governor LeVander, acting as the highest elected representative of the people of Minnesota, will receive the mace, symbol of the president's authority. At that point Moos will be escorted to the lectern to receive the mace from LeVander---and the program states, "Upon acceptance of the mace, President Moos becomes officially the tenth president of the University of Minnesota."

As the mace is finally returned to the mace bearer, the Concert Band Ensemble will play "To the President" by Music Professor Paul Fetler, which Fetler composed for the inauguration of the ninth University president, O. Meredith Wilson.

President Moos then will deliver his inaugural address.

KUOM will broadcast the inaugural ceremony and President Moos's speech live from Northrop at about 1:30 p.m. Thursday; and channel 2, KTCA-TV, will telecast the ceremony and speech on the University of Minnesota Hour from 9 to 10 p.m. Thursday.

A president's reception will follow the ceremony, on the plaza outside Northrop. Delegates may join tours to various points of interest around the campus. A buffet supper for official delegates and some special guests will be served from 5-8 p.m., and an inaugural concert will be played at 8:30 p.m. in Northrop by the Minneapolis Symphony Orchestra. Regents' Professor of Philosophy Herbert Feigl will make introductory remarks preceding the concert.

Anyone who wishes to attend any of the various inaugural events can obtain free tickets at 220 Morrill hall.

During the inaugural events, all women in attendance are invited by the department of continuing education for women (of the General Extension Division) to relax in Nolte Center for Continuing Education, Pillsbury and Church st. (17th ave. SE.). The center's lobby will be hung with a photographic exhibit by Robert Wilcox, supplied by continuing education in art. Women may leave wraps there, can drink coffee there any time of the day, or may just wish to sit and rest.

A few biographical details of the three symposium speakers follow:

Kingman Brewster, Jr., 48, became provost at Yale in 1961, was named president in 1963. He holds a bachelor of arts degree from Yale, a law degree from Harvard, and many honorary degrees. He taught law at Harvard from 1950-61. He is a member of the American Academy of Arts and Sciences and the Century Club, among others.

McGeorge Bundy, 49, was a government official and presidential adviser before being named head of the Ford Foundation in 1966. Holder of a bachelor's degree from Yale, he taught at Harvard from 1949 to 1961, when President Kennedy named him special assistant for national security. At the Ford Foundation, he has become known for taking new directions in foundation management, particularly for paying attention to previously neglected and sometimes controversial areas such as urban decay, slum schools, experimental television and race relations.

Carl Rowan, 42, earned a master's degree in journalism at the University of Minnesota, holds a bachelor's degree from Oberlin College. He worked for the Minneapolis Tribune from 1948-61, then went to the U. S. State Department as deputy assistant secretary of state for public affairs. In 1963-64 he served as U. S. ambassador to Finland, was director of the U. S. Information Agency in 1964-65. Since 1965 he has been a syndicated columnist. He holds many awards for excellence in journalism, and the University's Outstanding Achievement Award, given to eminent alumni.

STUDENTS, FACULTY
TO PRESENT
CHAMBER RECITAL

(FOR IMMEDIATE RELEASE)

University of Minnesota music faculty and students will perform together in a chamber recital at 8 p.m. Sunday, May 19, in Mayo auditorium on the Minneapolis campus.

Works by Wickens, Ibert, Dvorak and Mozart will be in the program, which is free and open to the public. Participating faculty members are Richard Fischer, director of the University Symphony Orchestra; Carlo Minnetti, music instructor, and Franz Roehmann, assistant professor of music education.

The program is as follows:

String Quartet.....Wickens
Mark Dulac, violin
Barbara Hochberg, violin
Valerie Lane, viola
John Madura, cello

Trois Pieces Breves.....Ibert
Myra Winkler, flute
Thomas Tempel, oboe
Carlo Minnetti, clarinet
Franz Roehmann, basson
Becky Kinsman, French horn

Terzetto for Two Violins and Viola, Op. 74.....Dvorak
Suzanne Waage, violin
Steven Fagerstrom, violin
Richard Fischer, viola

Quintet in A Major, K. 581.....Mozart
Ona Morton, clarinet Mark Anderson, viola
Mark Bjork, violin Jan Worrell, cello
David Robillard, violin

ESTATE ADMINISTRATION
COURSE ENDS TOUR IN
MINNEAPOLIS SATURDAY

(FOR IMMEDIATE RELEASE)

More than 550 lawyers from all over the state have attended a University of Minnesota course in Minnesota estate administration. The course has traveled to seven Minnesota cities and will be offered for the last time Saturday (May 11) at the Museum of Natural History on the University's Minneapolis campus.

The Ramsey County Bar Association is cooperating with the University General Extension Division's department of continuing legal education to sponsor Saturday's program.

Speakers and topics will be: Fred A. Kueppers, Sr., of Kueppers, Strong & Kueppers, St. Paul, estate administration; Honnen S. Weiss of Altman, Geraghty, Leonard & Mulally, St. Paul, federal estate tax; William E. MacGregor, Jr., of Trench, Ericson, MacGregor, Lohmann & O'Brien, Minneapolis, inheritance tax; and Everett A. Drake of Faegre & Benson, Minneapolis, income taxation of estates.

"An exceptionally fine and worthwhile program," said an attending attorney. "Every lawyer with a probate practice should attend."

For more information, call the department of continuing legal education at 373-5386.

THEOLOGIAN TO GIVE
KEELER LECTURES AT 'U'

For further information, contact:
LYNN BALL, 373-2126

(FOR IMMEDIATE RELEASE)

The Rev. Eugene R. Fairweather, theologian and philosopher, will deliver the Keeler Lectures this week at the University of Minnesota Episcopal Center, 317-17th ave. SE. Minneapolis.

Mr. Fairweather, who is professor of theology at Trinity College, University of Toronto, will speak at 7:30 p.m. Wednesday and Friday (May 8 and 10), and at 10:30 a.m. Saturday (May 11). The Keeler Lectures are free and open to the public.

According to the Rev. G. R. Hatton, chaplain of the University Episcopal Center, the Keeler Lectures "will attempt to convey a sense of the integrating power that the Christian faith has in all of human life and thought, and, in particular, to demonstrate that theology is not alien to the genius of the university."

The theme of these initial Keeler Lectures is "Faith - Fact - Understanding." The subject of the Wednesday lecture will be "Theology: Its Task and Resources"; on Friday "The Theologian as Historian" will be discussed, and "The Theologian as Philosopher" will be the concluding topic on Saturday.

Mr. Fairweather has been Bishop Paddock Lecturer at General Theological Seminary in New York (1956), Hale Memorial Lecturer at Seabury-Western (1963), and DuBose Lecturer at the University of the South, Sewanee (1963). He has been an official delegate to the major world ecumenical conferences, including Vatican II.

He is a member of several committees, perhaps the most important being the Anglican-Roman Catholic Joint Preparatory Commission. Mr. Hatton has described this as a commission set up approximately a year ago by Pope Paul VI and the Archbishop of Canterbury when the latter made his historic visit to the Pope (the first such contact in 400 years). The purpose of the commission is to establish "official conversations" between the Roman Catholic and the Anglican churches. The commission has so far met twice in Italy and once in England. In the course of his lectures, Mr. Fairweather will speak of the commission.

'ROBIN HOOD'
TO OPEN AT 'U'
CHILDREN'S THEATRE

(FOR IMMEDIATE RELEASE)

"The Outlaw Robin Hood," an original drama written and directed by Moses Goldberg, will be presented at 3:30 p.m. Saturday and Sunday, May 18 and 19, in Scott Hall auditorium at the University of Minnesota.

The University of Minnesota Young People's Theatre production is planned for children age nine and over. The story is adapted from the medieval tales of the mythical hero who robbed the rich and gave to the poor.

Goldberg, who is working on his doctor of philosophy degree at Minnesota, received his master's degree in psychology from Stanford University and his master's degree in drama from the University of Washington. He formerly taught at Southwest Texas State College.

Ivar Brogger, a University High School graduate and a junior theatre student at the University, plays the title role. He appeared in the University Theatre's production of "Pajama Game" last fall and has played with the Stagecoach players and the Edina Community Theatre.

Tickets are available at the University of Minnesota Theatre Ticket Office and at Dayton's in Minneapolis, St. Paul, Southdale and Brookdale.

BETTY TRUE JONES
TO PRESENT
DANCES OF INDIA

(FOR IMMEDIATE RELEASE)

Classical Indian dances will be performed by Betty True Jones at 8 p.m. Sunday (May 12) in Scott Hall auditorium, University of Minnesota.

"Stories of Krishna in Indian Classical Dance" will be the theme for the free, public program sponsored by the University of Minnesota South Asia Center and the concerts and lectures department.

Betty True Jones was the first American to appear with the Indian dance troupe, Kerala Kalamandalam Kathakali, and has performed throughout the United States and Canada for 15 years. She was trained in dance in India for four years and studied the dances of Mohiniyattam, Kathakali and Bharata Natyam. She has made her first Indian debuts in both Mohiniyattam and Kathakali.

Clifford R. Jones, her husband and assistant professor of Indic Studies at the University of Rochester (N. Y.), will assist her in her performance with commentary on the dance. Mrs. Jones is currently teaching Indian dance at the University of Rochester.

In 1965-66 Mrs. Jones received a Fulbright Study Grant for study and research in South Indian dance. She is a graduate of the Kansas City Conservatory of music and, in addition to Indian dance, she has studied primitive and jazz forms of dance, modern dance, Spanish dance and ballet.

"She exhibited perfect artistic skill and imagination. The clarity of her mudras and complete manifestation of emotions were much praised," a South Indian newspaper commented on one of her performances in that country.

'U' GALLERY
TO EXHIBIT
RAUSCHENBERG

(FOR IMMEDIATE RELEASE)

Robert Rauschenberg's illustrations of Dante's "Inferno" will be shown in the University of Minnesota Gallery, May 13 through June 2. There will be a public opening from 4 to 6 p.m. Monday (May 13).

Rauschenberg, an avant-garde artist, spent more than two years in a study of Dante's great classic and the result is a translation of the narrative by modern symbols. Racing cars, musical instruments, athletes with bulging muscles and the abstract equivalents for sounds and smells have been used to illustrate each of the 34 cantos of the poem. He has employed the transfer technique to create the illusionary effect of collage and his use of color is expressionistic.

The artist, a Texan, designs sets and costumes for the Merce Cunningham and Paul Taylor dance companies. He has had one-man shows in New York, Los Angeles, Paris, Milan, Rome and Florence. Recently he received the first prize for painting at the "XXXII Biennale" in Venice. He has studied at the Kansas City Art Institute, the Academie Julien in Paris, Black Mountain College in North Carolina and the Art Students League in New York.

Regular gallery hours are from 8:30 a.m. to 4 p.m. Monday through Friday, and from 2 to 5 p.m. Sundays. The gallery, located on the third and fourth floors of Northrop auditorium, is also open before performances in the auditorium and during intermissions.

NELSON ROCKEFELLER TO
DISCLOSE CIVIL RIGHTS
POSITION IN 'U' TALK

(FOR IMMEDIATE RELEASE)

New York Governor Nelson A. Rockefeller will deliver a major address at the University of Minnesota Wednesday (May 8). He will speak at 12:15 p.m. in Northrop auditorium on the Minneapolis campus.

Gov. Rockefeller, as a presidential candidate, has been making known his stand on various national issues through a planned series of five "position papers" or speeches. His speech at the University will constitute his "position paper" on civil rights.

Gov. Rockefeller also will hold conferences with Minnesota Republican leaders while he is in the Twin Cities. His visit to the University is sponsored by the West Bank Union and the Minnesota Students for Rockefeller.

INTERVIEWING WORKSHOP
AT 'U' TO USE INSTANT
REPLAY FOR LEARNING

(FOR IMMEDIATE RELEASE)

Employment interviewers, like football players, will have the opportunity to see themselves in action and get pointers from expert coaches at a University of Minnesota workshop to be held May 16-17 at the University. The video tape "instant replay" familiar to television sports fans will be used to point out to interviewers the weaknesses and strong points of their approaches.

Lectures on interviewing skills, objectives, and decisions will be accompanied by demonstration interviews on video tape. Following each lecture and demonstration tape, participants will be divided into groups of three -- one interviewer, one job applicant, and one observer -- for practice sessions in which they can try for themselves ideas just presented to them. The practice sessions will be video taped and played back for comments by faculty members and observers.

Faculty for the workshop includes a psychological consultant, faculty from the University psychology department, and members of the Minneapolis and St. Paul Chambers of Commerce management committees.

The workshop is sponsored by the University's General Extension Division and School of Business Administration and the Minneapolis and St. Paul Chambers of Commerce.

Enrollment is necessarily limited, but several openings are still unfilled. Registration information is available at 373-3151.

TEACH-IN ON DRAFT
TO TAKE PLACE AT 'U'
THURSDAY NIGHT

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 7, 1968

For further information, contact:
LYNN BALL, 373-2126

(FOR IMMEDIATE RELEASE)

The selective service system -- the draft -- will be explored at an evening-long teach-in on Thursday (May 9) at the University of Minnesota.

"The Draft As an Institution in American Society?" will be the theme of the teach-in, which is co-sponsored by Students Against Selective Service and "The Resistance," a national non-violent movement for non-cooperation with the draft system. Joel Kugelmaas will begin the teach-in at 7:30 p.m. in the Coffman Union main ballroom by discussing the history of the draft and its impact on society. Kugelmaas is from the New England Resistance in Boston, which is the base out of which Dr. Benjamin Spock has worked.

Col. Robert Knight, director of Minnesota selective service, will speak on the system itself. Minneapolis attorney Douglas Hall, a member of the Minnesota Civil Liberties Union, will examine the legal aspects of the draft. Jeffrie Murphy, University assistant professor of philosophy, will then present "A Case for Resistance." Henry West will deliver "A Philosophical Critique of the Draft." West is currently a visiting assistant professor at the University from Macalester College.

Charles Liesenfelt, assistant recorder for the University, will discuss the effects of the draft laws on the student. Liesenfelt is national services adviser at the University (the individual supplying information about student status to selective service) and chairman of the local draft board.

Following the talks, the teach-in will break up into discussion groups. Draft information and counseling will be supplied by the Twin Cities Draft Information Center, Col. Knight, and Liesenfelt.

Don Olson, chairman of Students Against Selective Service, said that the general public is encouraged to attend, listen and participate. The purpose of the teach-in is to explore the relationship of the draft to society as a whole, not just to students and youth. Parents in particular might find the teach-in extremely valuable.

ENGINEERS INVITED
TO 'U' CAMPUS FOR
HUMAN RELATIONS COURSES

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 7, 1968

For further information, contact:
LYNN MARASCO, 373-2126

(FOR IMMEDIATE RELEASE)

The University of Minnesota's continuing education in engineering and science program will present two two-day seminars on engineering and human relations during May. Both will be held at Nolte Center, on the University's Minneapolis campus.

The first, entitled "Human Engineering for Better Engineering," will be held Tuesday and Wednesday (May 14-15). Designed for engineers in management positions, the workshop's aim is to develop skill in working comfortably and efficiently with individuals and groups. There will be sessions in interpersonal communication, superior-subordinate communication, management of a group, and motive analysis for persuasion.

Faculty for the workshop will include John G. Geier, director of communications and behavioral sciences, University School of Dentistry; Professor Ernest G. Bormann, University department of speech, communication and theatre arts; and Dr. Q. T. Smith, director of public communication, St. Paul-Ramsey Hospital.

The second seminar, "Optimizing the Human Resource," will be held May 28 and 29. The basic principles of human relations will be reviewed and then applied to specific problem areas in an attempt to help engineering management personnel make the most of what is normally the largest single cost in a business -- the human resource.

Leader of the human resource seminar will be Dr. Carroll I. Stein. He was manager of corporate communications and policy development at Control Data Corp. and was a member of Humber, Mundie and McClary, Consulting Psychologists. He has a wide range of experience conducting seminars of this kind in industry as well as at the University.

The continuing education in engineering and science program is a part of the University's General Extension Division. For more information on either seminar, write or call the extension division's department of conferences and institutes at Nolte Center, University of Minnesota, Minneapolis, Minn. 55455; telephone 373-3151.

'PORTRAIT OF LENIN'
TO PLAY FRIDAY

"Portrait of Lenin," a film made in the U.S.S.R. in 1966 which shows the Communist leader in his pre-1917 days, will be presented by the University of Minnesota Film Society at 3:15, 7:30 and 9:30 p.m. Friday (May 10) in the Bell Museum of Natural History auditorium on the Minneapolis campus.

The film, directed by Serge Youtkevich, shows the personal rather than the political side of the man. It has received many festival prizes in Europe but has seldom been shown in the United States. Russian shorts will also be shown.

'KING KONG,' MARX
BROTHERS FEATURED SAT.

"King Kong," the 1933 story of a loveable old gorilla who terrorizes New York City, will be shown by the University of Minnesota Film Society at 7:30 p.m. Saturday (May 11) in the Bell Museum of Natural History auditorium. At 9:30 p.m. the same night the Marx Brothers' classic, "Duck Soup," will be shown.

"King Kong," a science fiction epic, was directed by Marion Cooper and Frank Schoedsack. "Duck Soup," also a 1933 production, was directed by Leo McCarey. It features the Marx Brothers, at their zaniest, making both love and war.

CHAMBER TRIO
TO PERFORM IN KONZERT

A chamber trio will perform at the free, public Koffee Konzerts at 11:15 a.m. and 12:15 p.m. Thursday (May 9) in Coffman Union Pop-Inn University of Minnesota. Music by Bach, Ibert and Andriesen will be played by the trio which includes Tine Thevenin, flute; Mark Bjork, violin, and Karen Johnson, piano.

'U' STUDENTS, PUBLIC
INVITED TO BIOCHEMISTRY
TALKS, TOUR IN AUSTIN

BILL HAFLING, 373-2126

(FOR IMMEDIATE RELEASE)

John M. Buchanan, professor of biology at the Massachusetts Institute of Technology (MIT), will speak on viruses which attack bacteria ("Control of Protein Synthesis in E. coli Following Bacteriophage Infection") at 2 p.m. Saturday (May 11) at the Holiday Inn in Austin, Minn.

Preceding the lecture, at 11 a.m., there will be a tour of the Hormel Institute in Austin. At 3 p.m., three more short papers will be presented. Anyone interested may attend the meeting, sponsored by the graduate biochemistry clubs of the College of Biological Sciences and the College of Medical Sciences at the University of Minnesota. A special bus will be going to Austin from the Twin Cities, for anyone who wishes to attend.

Buchanan's work most recently has been with virus infection and virus development in cells, and the control of this virus development. A one-celled organism, E. coli, a bacterium present in our intestines, is used in these studies. Bacteriophages are viruses which attack bacteria. Buchanan is particularly concerned with ways of controlling the process in which bacteriophages multiply inside the bacterium.

The effect of Various drugs on normal and on cancer cells, investigations of the chemical basis of growth of cells, and the nature of changes that viruses produce in living cells are all part of Buchanan's studies.

Other speakers will be Walter Niehaus Jr. of the University of Minnesota and H. Schmid and R. Holman of the Hormel Institute.

Niehaus is a post-doctoral fellow in the department of biochemistry, College of Medical Sciences. He will tell about the research he completed at Karolinska Institute, Stockholm, Sweden.

Schmid and Holman are concerned with fats, their synthesis in the body, their structure and importance, and their breakdown in the body.

Informal discussion and a coffee hour will follow the talks. University students may obtain free bus transportation from the Twin Cities by calling 647-3962 before Friday (May 10).

CIVIL ENGINEER
GROUP TO HONOR
3 'U' SENIORS

(FOR RELEASE AT NOON THURSDAY, MAY 9)

The Northwestern section of the American Society of Civil Engineers (ASCE) will present its annual prizes to three outstanding senior students at a meeting Thursday (May 9) in the University Alumni Club, Sheraton-Ritz hotel.

The ASCE Northwestern section includes Minnesota and North Dakota. Its annual prizes have been given for more than 40 years to outstanding senior civil engineering students who have "demonstrated their potential to become successful leaders in the engineering profession and in society by their record of accomplishment in the classroom and laboratory, student activities, and services to their fellow students and the University."

First prize will be awarded to Richard L. Graupman of Gibbon, Minn. According to Walter K. Johnson, faculty adviser, student chapter, ASCE, and secretary-treasurer, Northwestern section, first prize is two years' ASCE dues and "a book of the student's selection with appropriate engraving." Second prize -- one year's dues and an engraved book -- will go to Peter J. Prusak of Golden Valley, Minn. Richard B. Peterson of Annandale, Minn., will be awarded a book of his selection with engraving as third prize. Thomas Jacobson of Hopkins, Minn., and Richard Stenstrom from Minneapolis each received honorable mention.

SYMPHONY TRUMPETER
TO BE PRESENTED
IN 'U' RECITAL

(FOR IMMEDIATE RELEASE)

Stephen Chenette, principal trumpet player with the Minneapolis Symphony Orchestra and instructor in trumpet in the University of Minnesota music department, will be presented in a recital at 8 p.m. Sunday (May 12) at Grace University Lutheran Church, SE. Harvard and Delaware sts., Minneapolis.

"The recital is designed to illustrate the use of the trumpet in church music," said Chenette.

Originally from New Mexico, Chenette has played with the Boston Pops, the Denver Symphony, the Buffalo Philharmonic and the St. Paul Chamber Orchestra and has been with the Minneapolis Symphony for eight years. He received his bachelor's degree from the Curtis Institute of Music in Philadelphia and has studied at Tanglewood and the Manhattan School of Music.

Philip Brunelle, pianist and percussionist with the Minneapolis Symphony and a Minnesota graduate, will accompany Chenette and play an organ solo.

The program, sponsored by the University music department and open free to the public, is as follows:

Sinfonia con Tromba.....Torelli
Chorale Preludes.....Krebs
Chorale Preludes.....Koch
Prayer of St. Gregory.....Hovhaness
Toccata and Fugue.....Guinaldo
Philip Brunelle, organ
Fantasy for Trumpet and Organ.....Sowerby

PSYCHOLOGIST TO SPEAK
ON CHIMPANZEE LANGUAGE

(FOR IMMEDIATE RELEASE)

Animals may have more linguistic capacity than we give them credit for. At least Psychology Professor David Premack of the University of California at Santa Barbara thinks so. Premack has been experimenting actively with language capacity for several years.

Next Tuesday (May 14), Professor Premack will speak on "Language in the Chimpanzee?" at 8 p.m. in Room 133 Physics building, University of Minnesota. The lecture -- free and open to the public -- is sponsored by the Center for Research in Human Learning at the University of Minnesota and the department of concerts and lectures.

Children with language disabilities also have been studied by Premack. Using behavior modification techniques, now becoming popular in the field of psychology, he has achieved some control of speech arrangements by rewarding certain aspects of behavior already preferred by both children and animals.

Premack received his doctor of philosophy degree from the University of Minnesota in 1955 and taught at the U in the summer of 1960.

\$20,000 DONATED TO 'U'

A new scholarship fund of \$20,000 earmarked for economically deprived students has been obtained by the University of Minnesota, for use in the 1968-69 academic year.

The money is from an anonymous benefactor. It will be used in two different projects according to Stanley J. Wenberg, University vice president for educational relationships and development, and Dean of Students E. G. Williamson.

Half of the funds will be used in an Early Identification Project, which has been operating on limited funds for the last four years. This consists of identifying needy students with high potential early in their high school years, to encourage them to plan on going to college and take the necessary high school courses they'll need to be admitted.

In 1964-65, five high school sophomores were so identified, with the help of their Minneapolis high school counselors. These five are currently in their freshman year at the University, obtaining some financial help. The anonymous gift will enable the University to increase their stipends and to aid the next group as they graduate from high school and enter the University next fall.

The other \$10,000 will be used to assist economically deprived students at whatever level they may be -- freshman, sophomore, junior or senior -- who will be enrolled at the University next year. The Bureau of Students Loans and Scholarships will administer the funds. Maximum Scholarship will be \$600.

"This is the University's first response to a resolution passed in April by the Faculty Senate, which called for special help for poor people," said Vice President Wenberg. "The administration has been working hard on this problem, and is very happy to announce this first gift devoted to helping young people who otherwise might not be able to go to college at all."

Dean Williamson noted that "This money helps us to meet problems that have been of major concern to us for many years. We're grateful for this very timely response."

'U' DEPARTMENTS
PLAN PROGRAMS FOR
STATE SOCIAL WORKERS

(FOR IMMEDIATE RELEASE)

The University of Minnesota's School of Social Work and General Extension Division often work together to provide continuing education for the state's social workers. This month they are cooperating with rural Community Action Program (CAP) agencies to sponsor a conference for personnel who deal with the problems of old people.

The purpose of the conference, to be held Monday and Tuesday (May 13-14) in Brainerd, is to bring together program coordinators and staff members of CAP and other agencies sponsoring senior citizens' programs in rural communities for training and discussion. The CAP agencies are funded by the United States Office of Economic Opportunity. John G. Geier, well-known University communications expert, will participate in the conference.

Among other programs that are now in the planning stage at the School of Social Work are a course in minority relations for social workers whose case loads are composed mainly of minority-group members; an institute for foster parents which would treat the foster parent as an extension of the agency's staff rather than as a client of the agency; a course on the legal aspects of social work; and a conference for lay counselors on alcoholism.

'U' STUDENTS COLLECT
682 SIGNATURES ON
AR-15 PETITION

(FOR IMMEDIATE RELEASE)

On April 5 the University of Minnesota Student Association senate unanimously passed a resolution calling on "the students and faculty of the University of Minnesota to sit in at the office of Mayor Byrne of St. Paul....until such time as he rescinds his order for the purchase of AR-15 rifles and to take such further direct non-violent action in respect to related problems."

Subsequently, said the MSA executive committee, a petition was circulated in the Twin Cities area, calling for the following actions on the part of national and state governments:

- "1) The immediate passage and implementation of the civil rights bill presently in the U. S. Congress.
- 2) Amplified financial support for all local community development programs throughout the year.
- 3) All law enforcement agencies should be responsible to social agencies which are external to the enforcement agencies themselves to avoid the indiscriminate use of force such as we have already seen in the sending of troops to Memphis.
- 4) Immediate and systematic public presentation of the feelings of anger, helplessness, and terror endemic to the entire community -- black, white -- engendered by policies in our cities, in Southeast Asia and the rest of the world. (E.g., by means of public service television programs in each community which express all of the various groups in it.)

Finally we wish it to be known that we plan to support those candidates and only those candidates who will strongly support this program throughout their tenure."

The petitions, 43 sheets containing 682 signatures, were counted and notarized by Peter Zimmerman, Notary Public in Hennepin County, and are on file in the Minnesota Student Association offices, 214 Coffman Union on the Minneapolis campus of the University.

DRAMATIC SERIES
OPENS TODAY
IN COFFMAN UNION

(FOR IMMEDIATE RELEASE)

"Beyond The Fringe," directed by Candace Mayeron, opens at 8 p.m. today (Thursday, May 9) in the Gopher Hole in Coffman Union.

The satirical play on history and happenings is the first in a series of three dramatic programs to be presented this month by the Committee for the Advancement of the Dramatic Artist in Minnesota.

Performances will be at 3 p.m Friday (May 10) and at 8 p.m. today, Saturday and Sunday (May 9, 11 and 12). University students in the cast include Fred Anderson, Fairlie Arant, Steven Barnett and Mark Siegel.

A modern version of the classic, "Antigone," will be presented at 8 p.m. Thursday through Sunday, May 16-19, in the Shops Annex, near University and 14th ave. SE. John Champine is the director.

Gregg Neilson, a University student with a double major in theatre and Russian, will direct the third production, "Lermontov," a play of poetry and song, to be presented Thursday through Sunday, May 23-26, in room 320 Coffman Union.

The directors of the three productions are all students in the University theatre department's advanced directing class.

Tickets, priced at \$1, will be available at the door.

NATIONAL AUTHORITY TO HEAD
SPECIAL INTENSIVE CARE
UNIT AT FAIRVIEW HOSPITAL

(FOR RELEASE AT 10 A.M. FRIDAY, MAY 10)

Dr. Heinz W. Berendes, chief of the Perinatal Research Branch, National Institute of Neurological Diseases and Blindness, will direct an intensive care unit for premature, high risk and sick new-born infants at Fairview Hospital, Minneapolis, starting July 1.

Dr. Berendes, 43, a pediatrician who was on the staff of the University of Minnesota Health Sciences Center from 1954 to 1960, also will be an associate professor in the University's department of pediatrics and School of Public Health.

The announcement of Dr. Berendes' new positions was made today by H. P. Skoglund, president of the Fairview Hospital Board of Trustees, and the University's Board of Regents.

While at the University, Dr. Berendes directed the local portion of an on-going collaborative child development study and then went on to coordinate the national study at the National Institutes of Health, Bethesda, Md.

According to Dr. Berendes, the study is trying to determine relationships between factors affecting women during pregnancy and the neurological and sensory disorders of their offspring.

(MORE)

Nationally, more than 50,000 mothers-to-be were enrolled in the project at 15 collaborating medical centers starting in 1959.

During the pregnancy period socio-economic and genetic information is gathered and after the baby's birth there is a series of regular examinations starting at four months.

At age 1 the child is given a complete neurological examination. General histories are taken at 18 months and 2 years. At age 3 the child is given a speech, language and hearing test; at 5 a psychiatric test, and so on, up to age 9. There is a possibility the study may be extended through age 12.

Computers in Washington, D. C., are being used to process the data as it is collected. The information derived from this continuing analysis will be used to identify the high risk factors in pregnancy.

"Because of Dr. Berendes' special background and interest in high-risk pregnancy," Skoglund said, "Fairview Hospital is delighted he will establish and direct the first newborn special care unit in Hennepin County."

The eight bed unit will operate as a referral center for newborns with upper-respiratory distress as well as premature infants (those weighing under 5 pounds). Fairview Hospital and the University are also cooperating on an educational program for pediatrics residents.

TASK FORCE TAKES ACTION
ON FINANCIAL AID, TUTORS,
RECRUITMENT OF DISADVANTAGED

(FOR IMMEDIATE RELEASE)

Dean Warren Cheston of the University of Minnesota Institute of Technology (May 13) gave a preliminary report on the work of the Task Force on Human Rights to President Malcolm Moos. Cheston is head of the Task Force, which was appointed by Moos in mid-April.

The University announced action being taken on a number of fronts under the leadership of the Task Force, including financial aid to disadvantaged students, recruitment of such students, and special counseling and tutorial programs to help them in their studies.

Now available for direct financial aid to the disadvantaged is some \$40,000, it was announced. Pierre Meyer, coordinator of student financial aid, is receiving applications for assistance. The funds include \$20,000 from an anonymous donor, announced last week; some \$13,000 in the Martin Luther King Memorial Funds, and several other contributions.

The Task Force has decided that providing aid for disadvantaged students is not enough, and must be firmly linked with both recruitment of such students and helping them to stay at the University once they've enrolled.

Accordingly, University funds have been committed to a recruiting team made up mainly of minority-group students who will seek out potential University students in the ghetto and other poverty areas. Faculty and administrators have volunteered to speak in interracial high schools on the subject of University admission.

(MORE)

Also, the administration is now structuring a program of special counseling, advising, remedial work and tutorial work for disadvantaged students. A large number of faculty members has volunteered to tutor such students on a one-to-one basis.

Being considered by the Task Force are the possibilities of lining up part-time jobs for disadvantaged students in various University departments, and of remitting tuition in some special cases.

The student and faculty groups supporting the Martin Luther King Memorial Fund envision a sustaining three-year fund drive throughout the community, for financial aid for the disadvantaged. The two groups are the Minnesota Student Association (MSA) and the Faculty Committee of 50. Many contributors to the faculty fund pledged long-term contributions (for three to five years).

A curriculum subgroup of the Task Force is currently working with the College of Liberal Arts Intermediary Board. One of its activities has been to ascertain what courses now exist in the curriculum that are concerned with the history, culture and sociology of minority groups in America. The development of new courses and curriculum changes will be an ongoing process.

Another subgroup is considering the relationship of minority students to the University athletic program. This group is working to pinpoint allegedly unfair rules in the athletic department. No specific charges have as yet been brought before it.

A number of recommendations by the Bureau of Student Loans and Scholarships is being considered by the Task Force. These include the recommendations that the Task Force:

- * Support consideration of University of Minnesota involvement in a specially funded U.S. Office of Education project for identification of prospective students;

- * Consider support of liberalized admission requirements and of extraordinary enrollment patterns;

- * Support a philosophy of financial assistance for family expenses;
- * Support proposals to limit loans to students from low-income families. ("It is our observation that some students are often reluctant to borrow money in order to cover their expenses. Furthermore, they are understandably concerned about adding to the indebtedness incurred by their families.")

The bureau's report included proposed strategies for carrying out the above recommendations.

Reacting to demands by certain student groups for representation on University policy-making bodies, the Task Force has advised these groups on how student representatives are selected for such bodies and committees, and how they may go about applying. (A Task Force on Student Representation, dealing with the question of what groups in the University should have students represented on them, will be appointed later this week, according to the President's Office. This new task force was recommended by the Faculty Senate at a recent meeting.)

The Task Force has asked the Faculty Senate Honors Committee that it try to identify a suitable memorial to Martin Luther King on the campus -- one that would represent his ideals and the depth of his involvement. Such a memorial might be a building or might take some other form.

An inquiry into the implications of the recent campus arrest of Lester Cannon, which was requested of the Task Force by President Moos, has been postponed until after Cannon's court appearance, scheduled for Friday (May 17). It was felt that further inquiry before the trial would jeopardize the constitutional rights of the parties involved. The case is being reviewed by the Governor's Commission on Human Rights, headed by Frank Kent.

A preliminary report on the work of the Task Force will be submitted to President Moos by the end of the quarter (June 8).

Distinguished psychologists from throughout the United States will speak at the 1968 Minnesota Symposium on Child Psychology Thursday through Saturday (May 16-18) in Murphy hall auditorium at the University of Minnesota.

All sessions are open to the public. The meeting is sponsored by the University of Minnesota Institute of Child Development and supported by grants from the University Graduate School and the National Institute of Child Health and Human Development

Brian Sutton-Smith, psychology professor at Columbia University Teachers College, will speak at the opening session at 3:15 p.m. Thursday. His topic will be "The Effects of Sibling Interaction on Personality," a discussion of how placement as the youngest, oldest or middle child in a family affects personality development.

Paying attention and concentration will be discussed by the following three speakers: Eleanor Maccoby, professor in the Laboratory of Human Development at Stanford University, "The Development of Stimulus Selection," 8 p.m. Thursday; Gordon Cantor, professor in the Institute of Child Behavior and Development at the State University of Iowa, "Effects of Stimulus Familiarization on Child Behavior," 3:15 p.m. Friday, and Wendell Jeffrey, psychology professor at the University of California, Los Angeles, "The Role of Habituation of Attention in Cognitive Development," 1:30 p.m. Saturday.

Adolescent conformity, group behavior and delinquency will be discussed by Muzafer and Carolyn Sherif at 8 p.m. Friday. Mr. and Mrs. Sherif are both psychology professors at Pennsylvania State University.

Victor Denenberg, Purdue University psychology professor, will speak at 10 a.m. Saturday. His topic will be "Animal Studies in Early Experience: Some Implications for Human Development."

"The Rivals," a rollicking restoration comedy by Richard Brinsley Sheridan, will be on stage when the University of Minnesota Theatre's Centennial Showboat drops anchor for its 11th summer season at 8 p.m. Thursday, May 23.

The boat with "Captain" Frank M Whiting at the helm and a crew of 15 University Theatre students will be docked on the Mississippi River below the Minneapolis campus. Later in the season it will move downstream to St. Paul.

"The Rivals" is comedy all the way as a rich girl searches for a poor man to love and marry. Mrs. Malaprop, the originator of malapropisms, is played by Norma Jean Wood. Kenneth Albers is cast as Sir Anthony Absolute and George Ostroska plays Captain Jack Absolute. Cynthia Wells is Lydia Languish. Other members of the cast are as follows:

| | |
|--------------------------|----------------------|
| Robert Everding..... | Sir Lucius O'Trigger |
| Tom Butch..... | Bob Achers |
| William Graham..... | Faulkland |
| Cathy Albers..... | Julia |
| Jon Mezz..... | Fag |
| William Grivna..... | David |
| Michael Cain..... | Thomas |
| Linda Kelsey Grivna..... | Lucy |

The play will be presented May 23-29 and June 7-July 13. Performances will be at 8 p.m. Monday through Thursday, and at 7 and 10 p.m. Friday and Saturday. Tickets are on sale at the University Theatre Ticket Office, Scott Hall, University of Minnesota, and at Dayton's in Minneapolis, St. Paul, Southdale and Brookdale.

Frank M Whiting, director of the University Theatre, is the director of the production. Robert Moulton, professor of speech, communication and theatre arts, is directing a musical afterpiece.

BERRYMAN TO GIVE
PUBLIC POETRY
READING SATURDAY

(FOR IMMEDIATE RELEASE)

John Berryman, University of Minnesota humanities professor and Pulitzer Prize-winning poet, will read from his poetry Saturday (May 18) at 8:30 p.m. in the Museum of Natural History auditorium on the University's Minneapolis campus.

Berryman received the Pulitzer Prize in 1965 for a volume of poetry entitled "77 Dream Songs." A second volume, "His Toy, His Dream, His Rest," which completes the long poem begun in the earlier book of songs, has recently been sent to the publisher. He is also the author of a highly regarded biography of Stephen Crane and several volumes of collected poems.

He received a \$10,000 award last November from the National Endowment for the Arts "for distinguished service to American letters."

William Meredith, in a New York Times book review on Berryman's sonnets, called him "a poet who can hold in single focus the tragedy, the absurdity and the beauty of our very moment in human trouble."

The poetry reading is the last in a series sponsored by the University's General Extension Division. Tickets at \$1 will be available at the door.

Retiring University of Minnesota faculty and civil service personnel who have been at the University 10 years or longer will be honored at a reception in the Mann Court of the Architecture building on May 22 at 3:30 p.m. University President Malcolm Moos will give a farewell speech and present citations of merit.

Faculty members retiring this year are the following.

Allen Tate has been a professor of English at the University since 1951. He is a well-known poet and critic and his enduring ties to the South (he is a native of Kentucky) are reflected in much of his work. He was among the first five University professors to be given the title of Regents' Professor, the highest honor a University professor can receive.

Tate has received numerous awards and honors, both national and international. He was recently elected president of the 250-member National Institute of Arts and Letters. He is also one of 50 members of the Academy of Arts and Letters, a part of the Institute. Membership in these groups is the highest national honor given to writers, artists, and musicians.

David Briggs, professor of agricultural biochemistry, has been associated with the University since 1924. He began as a teaching assistant and received his Ph.D. from the University in 1927. He served for many years as acting head of the biochemistry department and contributed a significant number of articles to professional journals.

Santiago Cúneo, associate professor of Romance languages, is a native of Argentina. He received a master of arts degree from the University of Wisconsin, then studied at the Sorbonne in Paris and received his Ph.D. from the University of Nebraska. He began teaching at the University of Minnesota in 1940. He has for many years been devoted to the promotion of good inter-American relations.

Dr. Ambert Hall, professor of dentistry, is a lifetime resident of St. Paul. He received his D.D.S. from the University of Minnesota in 1922 and since then has been away from the University only one year, to teach at Columbia University.

(MORE)

Henry Jerabek, associate professor of mineral and metallurgical engineering, received B. S., M. S. and Ph. D. degrees from the University of Minnesota. He has been on the faculty since 1927. During World War II, he was on leave to do research for the National Defense Research Committee. He has been associated with many professional organizations and committees.

Leonard Kaercher joined the faculty in 1950 as superintendent of the University's Rosemount Research Center. University research is conducted at the center in such fields as medicine, engineering and agriculture. Kaercher holds a bachelor of business administration degree from the University.

Isabel Noble, professor of home economics, has been teaching at the University since 1936. She received a bachelor of arts degree from the University of Kansas and her M. S. and Ph. D. from the University of Chicago. She taught in a Kansas high school and at the University of Chicago before coming to Minnesota. She received several research grants and contributed numerous articles to professional journals.

Erwin Reiersgord is an associate professor and principal of the Northwest School of Agriculture, a part of the University's Institute of Agriculture. He joined the faculty in 1943. He has served as president of Rotary International and as a member of the education committee of the Chamber of Commerce.

Florence Tenney, assistant professor of physical education, received a bachelor's degree from Minnesota and a master's from Columbia University. She was a professional tennis player before she started teaching at the University in 1941.

Marjorie Thurston, professor of rhetoric, has always taught in the Institute of Agriculture. She joined the Minnesota faculty as an instructor in 1929 and later received her Ph. D. from the University. She is a member of the AAUP and the National Council of Teachers of English.

'U' THEATRE ENDS
SUCCESSFUL SEASON
IN SCOTT HALL

(FOR IMMEDIATE RELEASE)

The University of Minnesota Theatre is ending its most successfully attended season in three years.

A total of 20,652 playgoers viewed the five productions in the theatre's 1967-68 Scott Hall series. This is 82.1 per cent of capacity, an increase of 9 per cent over last year.

"Waiting for Godot," an Absurdist drama written by Samuel Beckett and directed by Maxine Klein, assistant professor of speech, communication and theatre arts, drew the largest audience -- 99.8 per cent of the theatre's capacity for nine performances.

The other productions were "Tiny Alice," 77.4 per cent; "The Pajama Game," 78.5 per cent; "Troilus and Cressida," 69.6 per cent, and "Inspector General," 85.3 per cent.

There were four sell-outs among the six plays presented by the University Theatre in Shevlin Hall -- "Cain," "Private Lives," "Ah Wilderness!", and "The Caretaker." The Shevlin productions are directed by graduate students and presented in the 95-seat arena theatre for seven performances.

U OF M ANNOUNCES
NEW PROGRAM
IN AFRICAN HISTORY

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL

(FOR IMMEDIATE RELEASE)

For further information, contact:
JUDY VICK, 373-2126

A new series of courses in African history will be offered in the University of Minnesota history department beginning next winter quarter, it was announced today.

Professor Robert S. Hoyt, chairman of the history department, announced the appointment of Mrs. Victoria B. Coifman as assistant professor of history, pending approval by the University Board of Regents.

Mrs. Coifman will teach a series of courses titled "African History -- 1000 A.D. to the Present" and will conduct a seminar on selected topics in African history. She is presently assistant professor of history in African studies and research programs at Howard University, Washington, D. C.

"This appointment and the curricular plans it implies will do much to strengthen an area of study in which the University of Minnesota is already a pioneer," said E. W. Ziebarth, dean of the College of Liberal Arts.

"This is clearly indicated by the fact that we are first 'Big Ten' University to have introduced work in Afro-American history. We are pleased to be able to build on this foundation. This expansion of our program has been under intensive discussion for two years and is part of a carefully planned program."

The University of Minnesota currently offers the following courses in Afro-American history: The Negro in American History, Race and Nationality in American History, History of Civil Liberties and Civil Rights in the United States, and seminars relating to these topics.

Mrs. Coifman's husband will join the University of Minnesota medical faculty in the fall. She received a bachelor's degree in history from Mundelein College in 1959 and a master's degree in history from the University of Wisconsin in 1961. She is a candidate for her doctorate from Wisconsin and is specializing in Comparative Tropical History.

She has held a Ford Foundation Fellowship for African research in Senegal and has just been appointed to a three-year term as a member of the Oral Traditions Committee of the African Studies Association. Her doctoral thesis was done in Africa and involved oral history research, employing taped interviews with older members of African communities. These accounts were then collected with written travelers' accounts in the Spanish, French, Portuguese and Arabic languages.

'U' DENTAL SCHOOL
HONORS SENIORS,
3 RETIRING FACULTY

(FOR RELEASE A.M.S THURSDAY, MAY 16)

The University of Minnesota School of Dentistry honored its graduating seniors and retiring faculty with a banquet and talent show Wednesday night in Coffman Union.

Some 500 persons saluted the 87 years' teaching experience of Drs. A.B. Hall, Herman Garmers, and Ainsley Thorson. All three men will retire at the end of the academic year.

Professor Hall, a St. Paul native, graduated from the University School of Dentistry in 1922 and joined the staff that same year. Over the years he acquired the reputation of being a demanding teacher.

A colleague recalled that Dr. Hall worked hard himself to get the best out of his students. "As their chief mentor, incoming freshmen probably knew Dr. Hall before they were familiar with the dean or directors of the divisions."

During his 45 years of teaching at the University (one year at Columbia University), Dr. Hall taught undergraduates, dental assistants and dental hygienists. He was also active in his local and state dental societies.

Dr. Garmers graduated in 1924 from the School of Dentistry and entered private practice. In 1946 he became a clinical teacher of dentistry on a parttime basis and for the last 13 years has been fulltime.

(MORE)

Dr. Garmers has a reputation of being a gifted clinical dentist, according to several faculty members. He has created several aids and devices in his home workshop that are used by dentists around the world. Besides his innovative approach to dental instruments, Dr. Garmers has been praised for his one-to-one work with dental students.

Dr. Thorson, a former mayor of Renville, Minn., began lecturing at the School of Dentistry in 1949.

A 1923 graduate of the school, he was one of the pioneer proponents in this state of the use of dental auxiliaries. He taught classes of dental assistants and lectured seniors on practice administration.

Dr. Thorson was one of the key organizers of a special University General Extension Division course for dental assistants, leading to certification by the American Dental Assistants Association.

He was also a strong believer in continuing education for the dental practitioner and attended many symposiums and short courses on advanced techniques.

Dr. Hall lives at 1171 Tiller Lane, St. Paul; Dr. Garmers lives at 1944 E. River Terrace, Minneapolis, and Dr. Thorson lives at 1879 Simpson, St. Paul.

WOMEN INVITED
TO 'U' CAMPUS TO
GET ACQUAINTED

(FOR RELEASE WEEK OF MAY 20)

Thursday, June 6, is women's day on campus at the University of Minnesota.

A day of talks for and by women has been planned by the women's continuing education program, a part of the University's General Extension Division.

The talks will deal with changes in contemporary society and the effect they have on what women are doing and the choices they must make. Speakers will be Elizabeth Peterson, coordinator of parent and family life education in the extension division; Mary Turpie, professor of English and assistant chairman of the American Studies program, who will speak on "The American Woman in American Literature;" Vera Schletzer, director of extension division counseling, who will speak on "Today's Woman, Tomorrow's World;" and Evelyn Hatcher, assistant professor of anthropology and sociology at St. Cloud State College.

Barbara Stuhler, associate director of the University's World Affairs Center, who was one of four members of the League of Women Voters selected to visit the Soviet Union as guests of the Soviet Women's Committee, will speak on "Women in Soviet Society."

The program is in part designed to let women know about the many kinds of education available to them at the University, according to Mrs. Louise Roff, director of continuing education for women. There will be information on the extension division's evening classes, independent study program, neighborhood seminar program, and the women's continuing education program itself.

"We hope that women from outside the metropolitan area will take this opportunity to become acquainted with the University," Mrs. Roff said. Some programs such as independent study and seminars which meet fairly infrequently are particularly suited to out-of-town study.

Cost of the June 6 program is \$5, including a noon luncheon. For further information on this or any other continuing education for women program, call 373-5166 or write to 310 Nolte Center, University of Minnesota, Minneapolis, Minn. 55455.

MINNEAPOLIS SYMPHONY,
'U' CHORUS CONCERT
TO FEATURE SOLOISTS

Members of the Minneapolis Symphony Orchestra and the University of Minnesota Chorus will perform in a free public concert at 8:30 p.m. Saturday, May 25, in Northrop auditorium.

Guest soloists will include George Kroenlein, Minnesota music instructor, baritone; Paul Knowles, assistant professor of music, tenor; Marcella Oja, music instructor, mezzo soprano; Bonita Gilbertson, master of fine arts candidate, alto; and Fredrika Herrick, Bach Festival soloist, soprano.

The works to be performed include "Magnificat" by J. S. Bach; "Utrecht Jubilate," by G. F. Handel and "To St. Cecilia" by Norman Dello Joio.

The concert will be directed by Charles Schwartz, University director of choral activities.

'U' DADS TO HEAR TALK ON
STUDENTS, PARENTS, AND SEX

"Sex: A Dilemma for College Students and Their Parents" is the topic to be discussed at Wednesday's meeting (May 22) of the University of Minnesota Dads Association. Mrs. Elizabeth Peterson, coordinator of the General Extension Division parent and family life education program, will be the speaker.

Mrs. Peterson will talk at 7:30 p.m. in the Coffman Union junior ballroom following a 6:30 dinner. Cost of the dinner is \$3; the program is free. Reservations are necessary for both dinner and program and should reach the Dads Association (at 373-4474) by noon Monday (May 20). Parking reservations in the Coffman garage also are available.

SPECIAL COURSES FOR
WOMEN TO BE OFFERED
DURING SUMMER AT 'U'

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 16, 1968

For further information, contact:
LYNN MARASCO, 373-2126

(FOR IMMEDIATE RELEASE)

For the first time, the University of Minnesota's program in continuing education for women will offer courses during the summer.

Sarah Youngblood, associate professor of English, will teach courses in modern fiction and modern poetry. The fiction course will meet Tuesday mornings and will include study of James Joyce's "Portrait of the Artist as a Young Man," Virginia Woolf's "To The Lighthouse," F. Scott Fitzgerald's "The Great Gatsby," and William Faulkner's "The Sound and the Fury."

The poetry course will follow major developments in poetry since World War II through readings from the works of contemporary poets. The class will be held Thursday mornings.

Miss Youngblood received the Alumni Association's Distinguished Teacher Award in 1963 and taught a highly praised Shakespeare course on television. She is leaving the University in the fall to go to Mount Holyoke College.

A refresher course in biology will be taught Wednesday mornings by Elizabeth Reed, assistant professor of the University's Minnesota School Mathematics and Science Center. The course will review and bring up to date materials covered in introductory biology courses. The course outline includes these topics: tools of biology, cell structure and function, genetics, chemistry, biological behavior, and new ideas on the origin of life.

Mrs. Reed taught biology at Macalester College and is co-author with her husband of a long-term genetic study, "Mental Retardation: A Family Study."

The women's continuing education program, a part of the University's General Extension Division, has initiated the summer course program because it seems that some women have more free time in the summer, according to Louise Roff, director of continuing education for women. Also, babysitters are more readily available and driving is easier in the summer.

All three courses will begin the week of June 17 on the University campus and will run for approximately six weeks. Interested women are encouraged to register as soon as possible. Call 373-5166 for registration information.

Note to newsmen: The Tri-Service Review offers good color photo possibilities.

TRI-SERVICE REVIEW
TO BE HELD
FRIDAY AT 'U'

For further information, contact:
JUDY VICK, 373-2126

(FOR IMMEDIATE RELEASE)

Some 400 University of Minnesota students who are members of the Reserve Officers Training Corps (ROTC) will participate in the annual Tri-Service Review at 1 p.m. Friday (May 17) in Memorial Stadium on the University's Minneapolis campus.

Officials taking the review will be William G. Shepherd, University vice president for academic administration, and Col. Robert H. Allyn, United States Air Force, Area Commandant of the Air Force ROTC.

Other members of the reviewing party will be Col. William D. Beard, Army, University professor of military science; Cdr. Edward O. Dietrich, Navy, professor of naval science; Lt. Col. James Suttie, Air Force, professor of aerospace studies, and Professor Rodney C. Loehr, chairman of the Faculty Senate ROTC committee.

Three University coeds will serve as color girls and present awards to honored companies. Marilyn Ploof, from St. Paul Park, is the Army Queen and will present the award to the Army "C" Company, commanded by Cadet Capt. Tim Kelly. Candice Amlee, from St. Paul, will present the award to Navy "B" Company, commanded by Midshipman Lt. Robert E. Faussner. Kathy Skoog, from Roseville, is the Air Force "Little Colonel" and will present the award to Air Force Squadron "A", commanded by Cadet Col. Scott W. Madole.

The following special awards will be given to individuals: Northwest Post, American Ordnance Association Award (for top student in military aptitude and in grades), Air Force Cadet Maj. Dennis R. Rossbach, Roseville; Rodney C. Loehr Award (For top student in grades), Army Cadet Capt. James A. Davies, St. Paul; John W. Watson Award, Army Cadet Col. Herbert P. Linder, St. Paul; Twin Cities Council of the Navy League Award, Midn. Capt. Jeffrey R. Pier, Avon, S. D.; and the Ray S. Miller Trophy, Air Force Cadet Maj. John S. Kiland, Orr, Minn.

The Athletic Award will be presented to the Army ROTC.

Directing the Tri-Service Band will be Army Cadet Capt. Robert W. George.

BEST-SELLING
BIRD BOOKLETS
AVAILABLE AGAIN

(FOR IMMEDIATE RELEASE)

"Birds of the Minneapolis-St. Paul Region" and "Cultivate Your Garden Birds," booklets from the Museum of Natural History at the University of Minnesota, become "best sellers" each year at this time when they become available.

"Birds of the Minneapolis-St. Paul Region" includes a list of 285 species of birds, where to find them, and a migration chart telling what time of the year to find them. The booklet costs 31 cents including tax and postage.

"Cultivate Your Garden Birds" tells the secrets of attracting birds, all about birdhouse architecture, water and bird baths, summer feeding, and what to use in landscaping for both birds and beauty. Cost is 41 cents.

The booklets may be ordered from the James Ford Bell Museum of Natural History, University of Minnesota, Minneapolis, Minn. 55455.

FUND RAISER OF
TUITION FOR PRISONERS
TO LEAVE STATE

For further information, contact:
LYNN MARASCO, 373-2126

(FOR IMMEDIATE RELEASE)

John Donohue, who has channeled a great deal of private money into an unusual University of Minnesota scholarship fund, will leave Minnesota Friday (May 17).

The Tuition Assistance Fund (to be renamed the F. Lloyd Hansen Tuition Assistance Fund) provides tuition for state prisoners to take independent study courses from the University. The fund was created in 1959 under the late F. Lloyd Hansen, then director of the independent study program.

A dramatic example of what can come of such aid is the award-winning novel "The Riot," written by Frank Elli for a writing course he was taking while serving a term in Stillwater prison.

Donohue was chief probation officer of Ramsey County for 20 years. He has taught criminology and juvenile courts and juvenile delinquency as an instructor of night and independent-study courses at the University. He is the author of an unusual criminology text, "My Brother's Boy," which alternates chapters of stories of criminal acts with chapters of explanations of the reasons for the crimes.

The department of independent study recently presented Donohue with a plaque "for his dedication to the educational rehabilitation of prisoners on whose behalf he secured private donations which provided tuition assistance for more than 500 inmates."

He is going to New Hampshire, where he will be executive director of the North Country Mental Health Clinic and its family and community service divisions.

'U' OFFERS
FULL SUMMER
FOR STUDENTS

~~(FOR RELEASE THURSDAY, MAY 9)~~

It's that time again--the time many people think about taking a summer course at the University of Minnesota.

Summer study at the University has become a tradition for many throughout the state. The relaxed atmosphere and wide range of academic and leisure opportunities draw them back summer after summer, according to Willard L. Thompson, dean of Summer Session.

Many of the University's finest faculty members teach summer courses because they too enjoy having predominantly morning classes, with afternoons free for reading or recreation, and many University departments have special programs during the summer.

The first summer session runs from June 17 to July 20; the second session from July 22 to Aug. 24. Final registration days are June 17 and July 22.

The College of Liberal Arts, in addition to a wide selection of their regular courses, will offer a modern languages residence house program, intensive ten-week courses in Arabic, Finnish, Hebrew, Portuguese, Russian, and Swedish, an archaeological field session, and a travel course in European art.

The College of Education has scheduled workshops in educational administration and workshops for teachers of trainable or educable mentally retarded children. Special courses include instruction in teaching emotionally disturbed and culturally disadvantaged children. The Institute of Child Development, a part of the college, has scheduled a nursery school for demonstration and research.

(MORE)

The College of Agriculture, Forestry, and Home Economics and the College of Biological Sciences are cooperating to provide an opportunity to study terrestrial and freshwater biology at Itasca State Park. There will be classes for many levels of interested students.

The summer music program will again be highlighted by Music 60, a course taught by the Minneapolis Symphony Orchestra and distinguished lecturers. This year's course is not a repetition of last year's, so those who have taken it before may take it again. A high school musicians' course offers outstanding high school music students the opportunity to play with the Minneapolis Symphony.

The General Extension Division will have something for everyone. The Continuing Education for Women summer program will feature two courses in modern literature and a refresher biology course. The department of conferences and institutes will be sponsoring many technical programs as well as a family life and sex education course, a creative dramatics course for elementary-school teachers, and a five-day program on creative writing for and by children.

The Committee on Institutional Cooperation (CIC), a group made up of the Big Ten universities and the University of Chicago, has made a list of some courses of special interest available at member institutions this summer. The universities cooperate in helping each others' students get the best possible education in any given field. Unique summer courses include a folklore institute at Indiana University, a translation workshop at the University of Iowa, a course in the craft of old master drawings at the University of Wisconsin, and many others.

Summer classes also are available on the University's Duluth and Morris campuses.

For a bulletin containing complete course descriptions and registration information, write Summer Session, 6875 Johnston Hall, University of Minnesota, Minneapolis, Minn. 55455; or call 373-2925.

TALKING CLOWN HELPS
CHILD EAT, USING
'BEHAVIOR MODIFICATION'

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 17, 1968

For further information, contact:
BILL HAFLING, 373-2126

(FOR RELEASE SUNDAY, MAY 26)

A four-year-old girl who refused to eat and would not feed herself was taught to feed herself by a "talking" toy clown. Assisting the clown, with a walkie-talkie concealed in the toy's back, was Professor Gordon T. Heistad, research coordinator in the University of Minnesota department of psychiatry and neurology.

The child might not have lived had she not been force-fed or tube-fed almost all the entire four years of her life. According to Heistad, "Until we saw her, she had virtually no previous voluntary eating history. A history of medical illness had prevented her from learning to eat as an infant, and she had rarely, if ever, fed herself or willingly eaten food at any time in her life."

After a short time with the talking clown the girl began eating. In two weeks she was eating most of the food prescribed for her by the dietitian.

Professor Heistad's approach with the girl is fairly typical of a new psychological technique generally described as "behavior modification."

After a period of observation, during which time Heistad determined which things in her environment the girl liked and disliked, a step-by-step, progressive program of therapy was mapped out.

The same approach has been successful in the treatment of people with behavior problems ranging from relatively mild but generally unwanted social habits, to severely disturbed and previously "hopeless" mental patients.

In the girl's case, Heistad found that she had come to hate the sight of the soft mushy food she had been force-fed, and had also developed an aversion to food in connection with women in white. On the other hand, the little girl liked brightly colored soft toys and action toys.

Following up on these observations, Heistad put a brightly colored clown doll in the room with the girl along with a bowl of dry "Cheerios" breakfast food. The girl played in the food and looked at the clown. Whenever she put a piece of the food in her mouth, the clown would reward her by talking to her. (Heistad was watching through a one-way screen, ready to talk into the walkie-talkie.)

(MORE)

Later on, the clown "told" the little girl she could play with any of a series of wind-up toys placed in the room if she would "eat some of your food first."

Although the child was taken from this therapy, due to continued serious medical problems, before learning to feed herself enough to completely sustain her bodily needs, her case does demonstrate the type of profound behavior changes possible with the use of behavior modification techniques.

In cases of severely disturbed mental patients, behavior modification has been very useful in helping them to develop social skills and habits which a lifetime of traditional cause-oriented psychotherapy was unable to accomplish, according to Heistad.

Traditionally, attempts to cure the mentally ill have been based on the so-called "medical model." The "medical model," whose most famous practitioner was Sigmund Freud, attempts to get at the cause of mental behavior much in the same way that treatment for virus-caused disease might be approached.

The theory of the "medical model," is that the patient can't be treated for his symptoms until the cause of these symptoms is found. Unfortunately for most mental patients, these causes are rarely found, and years go by while they suffer with the symptoms.

In some cases, Heistad points out, "a cured mental patient is often similar in many ways to a person who has been congenitally blind, then given sight. Never having experienced normal behavior, the cured mental patient may have to undergo a difficult period of adjustment while getting a new frame of reference toward life."

Behavior therapy offers an effective alternative to traditional "medical model" psychotherapy.

The theory and practice of behavior therapy are grounded on knowledge of learning and conditioning. The theory holds that behavior can be understood as a response to a stimulus, and that most behavior is learned through the conditioning

process. In conditioning, links are established between certain stimuli and certain responses. Stimuli may be anything in a person's environment such as lights, sounds, smells, and the reactions of other people.

Behavior that is rewarded in some way tends to be reinforced and thus repeated. Rewarded behavior tends to become part of a person's way of life -- good or bad. Often socially irresponsible or unacceptable behavior becomes part of a person's way of life, simply because it is rewarded so often with the one thing people seek most from the time they are infants -- attention.

The goal of behavior therapy is to reinforce the positive, "good" aspects of a person's behavior and to avoid reinforcing the negative, "bad" aspects.

Although Heistad and other psychologists have great hope for behavior therapy in the future, he is quick to point out that the method is still relatively new and that many questions about its usefulness remain to be answered.

Even though results have generally been good where behavior therapy has been tried, the technique still has many years of proving itself before it will become accepted as part of the medical tradition in the way that psychotherapy has.

Heistad also warns, that "It is not in the best interests of the patient or the science for persons to attempt behavior modification techniques without adequate knowledge. If attempted unskillfully, as it has been in some cases, the acceptance of the technique can be set back both to the detriment of society and to the permanent disadvantage of the patient in question.

"You don't just pick up skill with this technique in a two-week course. We are being very cautious, therefore, about 'pushing' the technique or advocating its premature adoption."

-UNS-

Note to Editors: Materials -- such as the clown doll used in the therapy with the child -- are available to be photographed. Any reporter or photographer interested may make arrangements through the News Service. Call Bill Hafling, 373-2126.

NEW BRIDGE IS SCENE
OF STUDENT ART SALE

Washington-avenue bridge, which connects the East and West Banks of the University of Minnesota, will be the scene for the sale of student art works from 9 a.m. to 5 p.m. Wednesday (May 22).

This is the first official event to take place on the bridge which spans the Mississippi River. Paintings, drawings, sculpture, prints and ceramics, priced from \$1 up, will be shown in the roofed, glass-enclosed walkway on the top deck of the bridge.

Participating students will be from the University's studio arts and art education departments on the Minneapolis campus and the department of related arts on the St. Paul campus. The sale is sponsored by the Union Board of Governors. Public parking will be available in the Union ramp on the East River road, behind Coffman Union.

AFRICA DAY TO BE
PUBLICLY CELEBRATED
AT 'U' SATURDAY

The public is invited to attend an Africa Day Celebration at the University of Minnesota beginning at 5:30 p.m. on Saturday (May 25) in Coffman Union main ballroom. The celebration will include an African banquet, exhibits of the art and culture of Africa, a talk by an African diplomat on Africa's future and policy, and a gala dance.

Reservations must be made by Thursday (May 23) through the Foreign Student Office, 373-4094. Tickets are \$3.65 (\$3.25 for students).

This day is celebrated throughout the United States as a means of bringing together African students and affording Americans the opportunity to meet and know Africans and learn more about Africa. The African Students Association of Minnesota is sponsoring the University's celebration.

(FOR RELEASE SUNDAY, MAY 26)

Two contemporary operas in the English language will be presented by the University Opera Workshop under the direction of Paul Knowles, assistant professor of music.

"Angelique," a one-act comedy by French composer Jacques Ibert, and "The Medium" a melodrama in two scenes by Italian-American Gian-Carlo Menotti, will be staged in the Baroque Theatre of Wulling hall on the Minneapolis campus at 8 p.m. each night, Thursday through Sunday, May 30-June 2.

Reservations are necessary and can be obtained by calling 373-4061.

"Angelique" is the story of a pretty, but disagreeable young wife and her middle-aged husband who tries to sell her. The cast of University students includes Peg Sexton as "Angelique" and Dale Stone as her husband, Boniface. The various men he deals with are Rick Foss, Charlot; Lowell Benson, Italian; David Ryan, Englishman, Denis Daigler, Pifallah; and Tom Foley, the Devil. Anita Sandoval and Roxanne Trickey are the dancers and the chorus includes Pat Miller, Marsha Skeath and Cecile Schommer.

Adyline Felstad is cast as the medium, Baba, in Menotti's work. Other University students in the cast are Mary Lou Pease, Monica, her daughter; Joseph Walsh, Toby, a mute with eerie powers; Millie Bullock, Mrs. Gobineau; Marcia Ohlhausen, Mrs. Nolan; and Denis Daigler, Mr. Gobineau.

Both operas will be accompanied by pianist Nancy Robillard and organist Susan Fossum.

Jon Barkla, a University graduate student who designed the Baroque Theatre, also designed the sets for the current productions.

Nancy Martin, a graduate student, is the stage director and costume designer.

'U' TO PRESENT
ACHIEVEMENT AWARD
TO TELEVISION STAR

(FOR IMMEDIATE RELEASE)

Peter Graves, star of the Emmy-award-winning dramatic television series, "Mission: Impossible," will receive the University of Minnesota's Outstanding Achievement Award Sunday (May 26) in ceremonies on the University of Minnesota Theatre's Centennial Showboat.

The award will be presented to Graves, on behalf of the University Board of Regents, following a special 2 p.m. performance of "The Rivals," an 18th-century restoration comedy written by Richard Brinsley Sheridan and directed by Frank M Whiting, director of the University Theatre. University officials, theatre directors from the community and state colleges and Graves' classmates will attend the performance.

Graves, who attended the University as Peter Arness from 1945 to 1949, will be recognized for his achievements as a television and motion picture actor.

Saturday (May 25) at 3 p.m. Graves and his wife, the former Joan Endress of St. Paul and also a former University student, will meet with students for an informal coffee hour on the terrace at Coffman Union on the Minneapolis campus. The coffee hour is open free to the public.

Graves, his wife and their three daughters live in Santa Monica, Calif.

(MORE)

GRAVES

-2-

A native of Minneapolis, Graves began working as a musician at the age of 15 and at 16 he became an announcer for a local radio station. Following two years in the Air Force he enrolled at the University as a theatre major and played in a number of University Theatre productions, including "Of Thee I Sing," "The Dream Play," "The Merry Wives of Windsor" and "The Wild Duck."

As a motion picture actor, Graves has appeared in some 30 films, including "Rogue River," "Fort Defiance," "Stalag 17," "The Raid," "Black Tuesday," "The Court Martial of Billy Mitchell," and recently in "The Ballad of Josie" with Doris Day.

Graves began his television career in the "Fury" series, which was followed by "Whiplash." on "Mission: Impossible" he plays Jim Phelps, an expert in behavioral psychology and head of the Impossible Missions Force.

James Arness, Graves' brother, is the star of television's "Gunsmoke" series.

Medals, trophies and awards will be presented to University of Minnesota Navy R.O.T.C. midshipmen at Navy Awards Day ceremonies Tuesday (May 21) at 3:15 p.m. on Northrop Field.

The honored students and their awards are:

Midn. Jeffrey R. Pier, Avon, S.D.; Order of Polaris (trophy).

Midn. David E. Cyrus, Grand Rapids: General Dynamics Award (plaque).

Midn. John D. Overhouse, East Lansing, Mich; and Midn. Thomas P. Traugher, Minneapolis: honorary membership in the United States Naval Institute.

Midn. Donald A. Beaufait, Grosse Pointe Woods, Mich.: honorary membership in the Marine Corps Association.

Midn. Harry F. O'Neil, Walker: Reserve Officers' Association Gold Medal.

Midn. Ross T. Petersen, Excelsior; and Midshipman Peter A. Misslin, Garrison, N.D.: American Legion ROTC General Military Excellence Award (gold and silver medals).

Midn. Robert G. Stender, Pensacola, Fla.: North American Aviation Corporation Award (plaque).

Midn. Dennis A. Behm, Grand Rapids: Sons of the American Revolution Award (gold medal and plaque) and Tom Hastings Navigation Trophy.

Midn. Robert E. Faussner, Chicago, Ill.; and Midn. Michael B. Sellman, St. Paul: American Legion Scholastic Excellence Award (gold and silver medals).

Midn. Gordon E. Lipsy, Hill City: Society of American Military Engineers Award (gold medal).

Midn. Lloyd G. Kepple II, Albert Lea: the Freshman Award ("Chief's Trophy").

Midn. Walter W. Kanauss II, Wheeling, W. Va: Minute Man Navy Award (bronze medal).

Midn. Daniel M. Rau, Roseau: Norman J. Garvey Military Rifle Award (trophy).

Midn. Robert A. Smutka, Rochester: Twin Cities Council of the Navy League Pistol Trophy.

Company B, Midn. Lt. Faussner commanding: Color Company Trophy and Gymkhana Trophy

Special awards "for appreciation of their continuing support" will be presented to Professor Rodney C. Loehr and William L. Nunn, director of the department of University Relations.

PSYCHOLOGIST
TO SPEAK
ON MONKEYS, APES

Psychologist William Mason, head of the Behavioral Sciences Section of the Delta Regional Primate Center, Covington, La. will speak on "Social Deprivation in Monkeys and Apes," at 4 p.m. Thursday (May 23) in Room 155 Ford hall, University of Minnesota. The lecture, free and open to the public, is sponsored by the Center for Research in Human Learning and the department of concerts and lectures.

OVERBEEK TO TALK ON
SIGNIFICANCE OF BIOLOGY

Professor J. van Overbeek, director of the Institute of Life Science at Texas A. & M College will speak on "The Social Significance of Biology" at 8 p.m. Thursday (May 23) in Room 10 Palmer Classroom Building on the St. Paul campus of the University of Minnesota. The lecture is free and open to the public.

HONORS STUDENTS
TO EXHIBIT ART

Three honors students in the University of Minnesota studio arts department will exhibit their works in Coffman Gallery Wednesday (May 22)-June 10.

The "Honors Thesis Exhibition" by seniors Virginia Wirt, Vicki Godosch and Margaret Ponsford will include photography, sculpture, paintings and drawings. There will be a public opening from 4 to 6 p.m. Wednesday (May 22).

ALUMNAE TO SPONSOR
SHOWBOAT EVENING

"An Evening with the University Showboat," on Monday (May 27) will be sponsored by the Minnesota Alumnae Club.

A 5:45 p.m. dinner in the Campus Club of Coffman Union will precede the 8 p.m. performance of the 18th-century comedy, "The Rivals," on the University of Minnesota Theatre's Centennial Showboat. The play, written by Richard Brinsley Sheridan, is directed by "Captain" Frank M Whiting.

THREE COURSES IN SPECTROSCOPY
OFFERED AT 'U' THIS SUMMER

(FOR IMMEDIATE RELEASE)

Professor T.M. Dunn, internationally known for his spectroscopic studies of chemical compounds, will be the 3M Visiting Lecturer for 1968 at the First Summer Session of the University of Minnesota. Dunn will lecture in Room 100 Chemistry building, June 18 - July 19.

His subject will be "A Spectroscopic View of the Electronic Structure of Molecules." Dunn's work at the University of Michigan with spectroscopy led to the discovery of a new molecule, titanium nitride.

Two chemistry short courses are also scheduled for this summer. They are "Techniques of Infrared Spectroscopy" July 9-13, and "Chemical Interpretation of Infrared Spectra" July 15-19. Both courses will be conducted by the molecular spectroscopy lab of the chemistry department, at the Nolte Center for Continuing Education.

Further information about the 3M lectures is available by writing to Dean of Summer Session, 135 Johnston Hall, University of Minnesota, Minneapolis 55455.

Information about the two short courses is available from the Department of Conferences and Institutes, Nolte Center, University of Minnesota, Minneapolis 55455.

Enrollment for these courses is limited so applications for registration should be returned as soon as possible.

CHILEAN AGRICULTURAL
PROJECT GRANT
RENEWED FOR U OF M

(FOR IMMEDIATE RELEASE)

A two-year renewal grant of \$675,000 has been received by the University of Minnesota from the Ford Foundation for continuation of agricultural production training education in Chile.

The grant provides for specialists and consultants from Minnesota to advise the program in Chile, fellowships for Chileans to study abroad and also within Chile, study tours abroad, plus support for Chilean institutions with regard to supplies, equipment and library materials for use on the program.

The original grant was awarded the University in 1964. The grant has provided for the establishment of a system for transmitting technical production information from the Chilean research centers to the farmers.

During the past year of the program, according to Dr. John Blackmore, director of international agricultural programs, the work has demonstrated that a clear working relationship between research centers and farm production advisory organizations is necessary.

"It also demonstrated that the key ingredient in a production education program for farmers is a team of intensively trained production specialists functioning as the first link in the chain of communication from the research center to the farmer," he commented.

The next two years of the program will provide the time needed to complete the team of specialists and to begin to help the Chileans establish a staff of provincial production officers.

YOUNG PEOPLE'S
ORCHESTRA TO
HOLD AUDITIONS

(FOR IMMEDIATE RELEASE)

The MacPhail Center for the Performing Arts, a part of the University of Minnesota General Extension Division, will hold auditions for its Young People's Orchestra Saturday, June 8, from noon to 4 p.m.

The orchestra, now in its second year and recently expanded from a string orchestra to a full orchestra, rehearses weekly and gives several concerts a year. This spring the orchestra made a short tour to several Minnesota cities. Its director is Anthony Gilombardo.

Junior and senior high school students are eligible to join the orchestra. Those who play any string, woodwind, brass or percussion instrument are invited to call Mark Swanson, 332-4424, to make an appointment to audition.

NATIONAL TEACHER EXAMS
TO BE GIVEN AT U OF M

(FOR IMMEDIATE RELEASE)

The University of Minnesota has been designated as a test center for administering the National Teacher Examinations this July 6, Associate Professor Dallis K. Perry announced today.

College seniors preparing to teach and teachers applying for positions in school systems which encourage or require applicants to submit their scores on the National Teacher Examinations along with their other credentials are eligible to take the tests. The examinations are prepared and administered by Educational Testing Service, Princeton, N. J.

The designation of the University of Minnesota as a test center for these examinations will give prospective teachers in this area an opportunity to compare their performance on the examinations with candidates throughout the country who take the tests, according to Professor Perry, who is assistant director of the Student Counseling Bureau.

At the one-day session a candidate may take the Common Examinations, which include tests in professional education and general education, and one of the 13 Teaching Area Examinations which are designed to evaluate his understanding of the subject matter and methods applicable to the area he may be assigned to teach.

Bulletins of Information describing registration procedures and containing registration forms may be obtained from 101 Eddy Hall, University of Minnesota, or directly from the National Teacher Examinations, Educational Testing Service, Box 911, Princeton, N. J. 08540. Prospective teachers planning to take the test should obtain their Bulletins of Information promptly, Perry advised.

U OF M 'STOREFRONT'
PROGRAM ANNOUNCED;
CLASSES SET FOR PILOT CITY CENTER

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 23, 1968

For further information, contact:
JUDY VICK, 373-2126

(FOR RELEASE: NOON THURSDAY, MAY 23, 1968)

Minneapolis----A "storefront" program of cooperation between the University of Minnesota and the community was announced today by Professor David Cooperman, one of the coordinators of the Office of Community Programs in the University's Center for Urban and Regional Affairs.

"The program, in accord with President Moos' plans for a 'communiversity,' is designed to make the resources of the University available to the community and to enable the University to learn from the community it serves," said Cooperman.

The Urban Learning Cultures program, the major operation of the overall "storefront" program, will be conducted initially at the Pilot City Center, 1108 W. Broadway, Minneapolis. Cooperman said the office is currently planning to open similar projects in other areas of the Twin Cities.

Several types of education for various groups of disadvantaged people will be involved in the Urban Learning Cultures.

To begin with, the program will be directed to two groups -- housewives, and high school students and college dropouts. The housewives will be trained to act as aides in all types of emergency situations and will receive consumer education, regular University classwork and training in office procedures.

The program for high school students and college dropouts is planned to generate or revive their interest in education. Material taught in regular University classes will be "translated" into the language of everyday life and taught to these students in classes at the Pilot City Center or nearby suitable locations. Calvin Appleby, instructor in the University social science program, has been hired to begin teaching June 15. Other University faculty members will be added to the program staff in the near future.

(MORE)

Two women have been hired to work as tutors at Pilot City Center, teaching basic skills to housewives, college dropouts and high school students and other individuals who require assistance. They are Sherrill Hooker, a recent Minnesota graduate who is now teaching in Hopkins, Minn., and Catherine Kornhauser, a graduate of the University of Wisconsin who is now a public school teacher in inner-city New York.

Operation: College Bound, another aspect of the overall "storefront" program, will be conducted in cooperation with the Minneapolis Urban League, the Minneapolis Public Schools and several state colleges, and is designed to aid 60 low-income high school students from three inner-city Minneapolis schools who have accepted scholarships to attend Minnesota colleges next year.

The primary objective of this program is to provide remedial instruction and enrichment in the area of English composition and related basic skills. Students will meet for three hours each Tuesday and Thursday, June 17 through Aug. 9, at a location to be announced.

A secondary aim of the program is to provide the disadvantaged students with a modicum of the social skills necessary to cope on the college campus. Approximately half-way through the program the students will meet for a recreational weekend retreat and several mixers will be held throughout the summer.

The third purpose of the program is to give the college instructors and counselors, who will be working with the students, a greater insight into teaching disadvantaged students.

The Small Business Insurance Advisory Service is a "storefront" operation designed to aid and advise the inner-city businessman. The purpose of the project is to aid in the development of a viable economic base within urban core areas and to facilitate private ownership of small business in these areas. The center will conduct courses for area businessmen and make a continuous flow of information available to them. The location of the first advisory service has not been designated.

The Interdisciplinary Program for Applied Social Research in Urban Areas

will be conducted, June 15 to Aug. 14, at the Guadalupe Neighborhood House for Mexican-Americans in St. Paul. Seven University of Minnesota sociology students with varied backgrounds have been selected to teach disadvantaged students and report back to their University classes on the problems of the poor.

A primary purpose of the program will be to develop an answer to the question, "How can the University best respond to the needs of the urban poor?" The courses taught will be in the areas of social problems, practical nursing, community organization and involvement, school guidance and counseling, dealing with social service agencies and consumer behavior.

The Community Fine Arts Program is a "storefront" approach to culture: making the resources of the University theatre department available to the community and creating opportunities for University theatre graduate students to practice actual play direction.

The University students are currently advising drama groups at the Upper Midwest American Indian Center, Plymouth Youth Center, Loring Nicollet center, Phyllis Wheatley Settlement House, Thee Whole and Cooper and Motley schools.

A 5-week course in filmmaking for Twin Cities youth will be offered through the Fine Arts program this summer. The purpose of the program is to teach the young people to use the motion picture camera as a means of self-expression and environmental examination. University faculty members will be the instructors.

The Office of Community Programs, established in March, operates under Assistant Vice President Fred Lukerman, acting director of the Center for Urban and Regional affairs.

SIX 'U' PROFESSORS
HONORED FOR CONTRIBUTIONS
TO UNDERGRADUATE EDUCATION

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455

LYNN BALL, 373-2126

Six University of Minnesota faculty members today (Thursday, May 23) were given special recognition in the annual Cap and Gown Day ceremonies in Northrop auditorium when they were named as the recipients of Standard Oil (Indiana) Foundation-Horace T. Morse Awards.

The awards, in recognition of outstanding contributions to undergraduate education, were presented to R. Glen Berryman, professor of accounting; Paul A. Cartwright, associate professor of electrical engineering; James C. Gremmels, assistant professor of English; David W. Noble, professor of history; Robert Ronald Randleman, associate professor of industrial education; and Lawrence H. Smith, professor of agronomy and plant genetics.

Each of the six honored faculty members received a University citation and a \$1,000 grant provided by the Standard Oil (Indiana) Foundation.

During the awards ceremonies which concluded the Cap and Gown Day convocation, the six recipients, selected and cited by the All-University Council on Liberal Education, were presented to University President Malcolm Moos by the Council chairman, Donald K. Smith, associate vice president for academic administration.

In making the presentation to President Moos, Smith said: "...These awards combine the generosity of the Standard Oil (Indiana) Foundation, which is greatly concerned with achieving the highest possible standards in undergraduate education, with the name of the late Dean Horace T. Morse, whose contributions to undergraduate education at the University of Minnesota were highly significant."

(MORE)

A native of Freeport, Illinois, Professor Berryman holds degrees from Northwestern University and the University of Illinois. He has researched fields of law as well as accounting.

Associate Professor Cartwright is also assistant dean and placement director of the Institute of Technology and counselor to numerous student organizations. Born in Pasadena, Calif., Cartwright received his B.E.E. and M.S.E.E. degrees from the University.

Assistant Professor Gremmels joined the University of Minnesota/Morris in 1960. Gremmels, who was born in Chicago, holds a B.A. from Augustana College in Sioux Falls, South Dakota, and an M.A. from Minnesota.

Professor Noble was born and raised in Princeton, N.J. receiving his B.A. from Princeton University in 1947. He holds a Ph.D. from the University of Wisconsin. Noble's special areas of teaching and research are American intellectual history and the American South. He is author of "The Paradox of Progressive Thought."

An Appleton, Minn., native, Associate Professor Randleman received his B.S. (with distinction) and Ph.D. degrees from the University. In 1966-67 Randleman was project director of the Upper Midwest Regional Educational Laboratory in addition to his teaching position. He is co-author of "Related Arts" (with R. E. Even and Helen K. Stephens).

Professor Smith joined the University faculty in 1959. A native of Jackson, Mich., he received a B.S. degree from Michigan State College and a Ph.D. in plant physiology from Michigan State University. Smith is active as a scientist and researcher as well as teacher, and also as an adviser to the student body.

'URBAN RIVER' TO BE SUBJECT
OF ART INSTITUTE CONFERENCE

(FOR IMMEDIATE RELEASE)

Urban experts and interested citizens will be brought together for a critical look at the Mississippi River in the context of its urban surroundings at a one-day conference to be held Friday, June 7, at the Minneapolis Institute of Arts.

The public is invited to attend. The conference, entitled "The Urban River," is jointly sponsored by the University of Minnesota General Extension Division's program of continuing education in urban affairs and the Upper Midwest Research and Development Council.

Short talks on the present uses of the river and possibilities for its future will stress the fact that the river serves, and must continue to serve, many different purposes. According to Mrs. Dorothy Anderson, program coordinator for the continuing urban affairs education program, this means that the utilitarian as well as the beautiful has a rightful claim to the river. They might, however, coexist more happily than at present.

A Minneapolis Planning Department booklet lists the present uses of the river as the source of water for almost all of the city's domestic, commercial and industrial needs; commercial shipping, docks, and storage; recreational boating, hiking, bird watching, picnicing, and fishing; scenic open space, home sites and pleasure-driving on its banks; and receiver of storm water drainage, some raw sewage, and some industrial effluent.

(MORE)

Representatives of groups with these different kinds of interests in the river, who previously might not have had the opportunity to discuss each other's concerns, will be brought together at the conference. For example, said Mrs. Anderson, pollution-control people will not be talking to other pollution-control people, as is frequently the case, but to a group representing a very wide range of interests, thus completing a part of the broad view of the river necessary for a well-coordinated plan for the river's future.

Among the speakers will be Lewis Crutcher, formerly of Portland, Ore., and now director of planning and research for the Minneapolis Park Board. He came to Minneapolis a year ago to participate in a Minneapolis beautification conference and his outspoken views were well aired at that time. He joined the park board staff this winter. Crutcher will speak on recreation and beautification at the conference.

Also speaking on recreation and beautification will be Barbara Flanagan, Minneapolis Star columnist; William Sumner, editor of the St. Paul Pioneer Press and Dispatch; Hugh Peacock, University of Minnesota planner; and Ralph Quiggle of the Minneapolis Planning Department.

Representatives of the Metropolitan Council, the St. Paul Port Authority, Northern States Power Company, the Federal Water Pollution Control Administration, the Minneapolis Industrial Development Commission, and the Upper Mississippi Waterways Association will talk about who is using the river and how they are using it.

Cost of the conference is \$5, including a luncheon to be served in the Institute galleries. Tickets are available from Mrs. Dorothy Anderson, 122 Social Sciences Building, University of Minnesota, Minneapolis, Minn. 55455; telephone 373-3977.

UNIVERSITY OF MINNESOTA EVENTS

(FOR IMMEDIATE RELEASE)

KROENLEIN, 'U' CHORUS
TO APPEAR WITH SYMPHONY

Baritone George Kroenlein and the University of Minnesota Women's Chorus will be featured in the University of Minnesota Symphony Orchestra's final concert of the season at 8:30 p.m. Tuesday (May 28).

Richard Fischer, assistant professor of music, will conduct the orchestra in the free public performance in Northrop auditorium.

Kroenlein, formerly the leading baritone of the Bern (Switzerland) Opera House, is an instructor in the University music department. He has made more than 300 operatic appearances abroad. In the Tuesday concert he will sing "Kindertoten-leider" by Gustav Mahler.

The University Chorus, directed by Charles Schwartz, University director of choral activities, will sing three songs by Francis Poulenc -- "La Petite Fille Sage," "La Chien Perdu" and "Le Herisson."

The orchestra will play "Metamorphosis for Orchestra" written by Franz Roehmann, assistant professor of music education at Minnesota, and "Nocturnes" by Claude Debussy.

POPULATION EXPLOSION
TO BE DISCUSSED AT 'U'

"The Population Explosion: The Question of Quality vs. Quantity of Population" will be the topic of Professor Carl J. Bajema, at 8 p.m. Tuesday (May 28) in Murphy hall auditorium at the University of Minnesota.

Professor Bajema is a human geneticist and research associate in population studies at the Harvard University School of Public Health. The lecture, free and open to the public, is sponsored by the international programs committee on science, technology and development, headed by Dr. Allyn Bridge, associate professor in the School of Public Health at the University.

The current central focus of the committee is the field of population dynamics. Bajema's visit is the first program on this topic this year. In the fall a major colloquium is scheduled with prominent population scholars invited to speak. One long-range goal of the committee, in the field of population, is to provide consultative services for already established population study programs in the United States and overseas.

BRITISH EXPERT TO
DISCUSS CREATION
OF NEW CITIES

(FOR IMMEDIATE RELEASE)

"New Towns in Great Britain" will be the subject of a lecture accompanied by color slides to be given by Richard McDougall, British consultant on new town development, urbanization, and local government.

The lecture, free and open to the public, will be given Tuesday (May 28) in Room 125 Architecture building on the University of Minnesota's Minneapolis campus.

The lecture is sponsored by the Minnesota Experimental City Project, which hopes to build a city, starting from scratch, within the next 10 years.

McDougall was from 1957 to 1967 general manager of the Stevenage New Town Development Corporation, a government agency whose nine board members are appointed by the Minister of Housing and Local Government on a part-time basis. Stevenage, in 1946, was the first New Town to be designated by the British government. It was a small country town of 5,000 people, and now has a population of 60,000; present plans will bring the population to 105,000 before the end of the century.

McDougall, as general manager, was chief executive of the town. His staff included planners, architects, engineers, sociologists, estates officers, housing managers, financial executives and lawyers.

The corporation is entirely financed by the British treasury and now yields a profit of over 300,000 pounds a year.

The Minnesota Experimental City Project was put on its feet economically late in 1966 by a \$248,000 planning grant to the University from three federal agencies and additional contributions from local companies.

The purpose of an experimental city would be to put modern technology to maximum use in planning a problem-free urban environment. Among problems now being studied are air and water pollution, sewage disposal, transportation, education, and public health.

SAMUEL POPPER,
'U' PROF, HEADS
STATE AAUP

(FOR IMMEDIATE RELEASE)

Samuel H. Popper, University of Minnesota professor of educational administration in the College of Education, has been elected president of the Minnesota State Conference of the American Association of University Professors (AAUP).

Popper will serve a one-year term as head of the academic organization which includes 22 campus chapters in the state.

A native of Hungary, Popper, 52, received his bachelor's degree from Brooklyn College of the City of New York and his master's degree from New York University.

In 1958 Popper received the Valley Forge Classroom Teachers' Medal from the Freedoms Foundation for his "exceptional classroom work in behalf of responsible patriotic citizenship and the American Way of Life."

Following teaching experience in the New York City and St. Paul public schools and at Queens College in New York, Popper joined the Minnesota faculty in 1958 as an associate professor in general education. He was community relations consultant for the Minnesota Jewish Council from 1952-55 and director of public relations and publicity for the Fisher Amusement Company in Minneapolis from 1952-54.

Popper lives at 2816 Glenhurst ave., St. Louis Park.

ENGINEERING STUDENT GIVEN
AWARD FOR NEW DEVELOPMENT

Thomas W. Petrie, a candidate for a doctoral degree in mechanical engineering at the University of Minnesota, was recently given a \$400 cash award by the Rosemount Engineering Company of St. Paul.

Petrie was given the award for developing a new method, and the required instrumentation, for the measurement of local heat transfer coefficients in ionized high temperature gases.

The Rosemount Engineering Company gives the award to a graduate or undergraduate student in the School of Mechanical and Aerospace Engineering judged to have the greatest potential for the design and development of industrial aircraft or space instrumentation.

Pierre Beynet, a graduate student from France, received the same award. Beynet has developed a Moire Technique for measuring the dynamic displacement in plates subject to transverse impact.

'U' STUDENTS TO RECEIVE
KING GUSTAV AWARDS

Three University of Minnesota students have been named as recipients of the 1968-69 B'nai B'rith Hillel Commission Scholarship in honor of King Gustav of Sweden. They are David Doi, president of the Newman Foundation; Nancy Day, human relations coordinator of the Union Board of Governors, and Ellen Adams of the Wesley foundation.

The King Gustav Scholarship is awarded annually to a junior (or juniors) for participation in interfaith, interreligious activities or human-relations activities. The award is in the nature of an honor rather than financial aid, carrying a small stipend of \$300 which will be divided among the recipients.

The scholarship will be presented Tuesday (May 28) at a luncheon in the Hillel foundation at 11:45 a.m.

RACIAL CENSUS REQUIRED AT 'U';
COMMITTEE PROPOSES NEW FORM

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 27, 1968

(FOR IMMEDIATE RELEASE)

For further information, contact:
LYNN BALL, 373-2126

Next fall, for the first time, the University of Minnesota will compile a racial census of students in order to demonstrate compliance with Title VI of the U. S. Civil Rights Act of 1964.

Title VI of this act, entitled "Nondiscrimination in Federally Assisted Programs," provides that there shall be no discrimination under any program or activity receiving federal financial assistance.

The U. S. Department of Health, Education and Welfare (HEW), which is responsible for determining whether an institution has complied, issued regulations to implement the above provisions, and has provided forms which must be filed by November of every year. The 1967 report was allowed to be submitted to HEW with estimated information.

But beginning in September, 1968, exact data must be collected and submitted to HEW if the University is to receive any kind of federal financial assistance (including federal funds for student loans and federal research grants).

A University committee of students and staff members (of various racial and ethnic backgrounds) has been discussing ways by which the required information on the racial composition of the student body might best be collected. The committee's proposal, just completed, is to use a statistical survey card as a part of the fall quarter registration process. Each student will be required to turn in this card but should not identify himself and will not be required to fill the card out.

The statistical survey card contains sections for indicating residence; status as undergraduate, graduate, or professional-school student; type and amount of financial aid; full or part time; and predominant ethnic background. The card is brief, requesting that you simply check an answer in each section and enter a figure for amount of aid. The ethnic background section specifies American Indian, American Negro, Oriental American, Spanish American, Caucasian, Foreign Student, or Other.

The committee hopes that the use of this registration card will be so well accepted that students will fill it out and that it will allow for the accurate collection of numerical information concerning the racial composition of the student body.

Comments and suggestions on the proposed procedure are welcomed. People who may be contacted are Lester Cannon, president, Afro-American Action Committee, 225-3053; Theodore Massey, executive committee, Afro-American Action Committee; Diane Rotnem, chairman, MSA Human Relations Commission, 373-6028; or Matthew Stark, coordinator, Human Relations Programs, Office of the Dean of Students, 373-4182.

UNIVERSITY STARTS
NEW SECTION OF
PEDIATRIC SURGERY

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
MAY 27, 1968

ROBERT H. LEE, 373-5830

(FOR IMMEDIATE RELEASE)

A section of pediatric surgery has been established at the University of Minnesota Health Sciences Center, it was announced today by Dr. John S. Najarian, professor and chairman of the surgery department.

Dr. Arnold S. Leonard, associate professor of surgery, is the section chairman and will direct the activities of an intensive care unit with some 20 beds for premature and sick newborn infants.

Dr. Leonard, who just returned to the University after a year's special training in pediatric surgery at Ohio State University, said the national average infant mortality rate is 25 per 1,000 live births, while in some Minnesota communities the rate is 30 per 1,000. He added that the mortality rate for infants having major surgery during their first month of life has been about 30 per cent.

The 24-hour intensive care facility in University Hospitals will be monitored and computerized to aid in the care of infants and other newborns with major birth defects or surgical and medical needs.

"The entire effort will be directed toward decreasing the mortality rate as well as gathering basic information," Dr. Leonard explained.

The unit will also be involved in the specialized training of nurses, residents, interns, medical students and auxiliary personnel.

Consultants for the pediatric surgery section will be Drs. Tague C. Chisholm, Bernard J. Spencer, John F. Waldron, and Felix A. McParland, all of Minneapolis.

Dr. Leonard also pointed out that rapid transportation to an intensive care facility such as the University's is an important factor in reducing the infant mortality rate.

He has arranged a coordinated four-state (Minnesota, the Dakotas and Wisconsin) transportation network involving airplanes, helicopters, and ambulances specially equipped with incubators.

In an emergency a helicopter would land on top of the Union Parking Ramp, less than 100 yards from the Health Sciences Center.

Dr. Leonard, a Minneapolis native, received his doctor of medicine degree from the University in 1955 and received his Ph. D. in surgery under Dr. Owen H. Wagenseen in 1963. His research interests have been in gastro-intestinal physiology.

'U' DEAN ELECTED
TO NATIONAL OFFICE

Robert J. Keller, dean of the University of Minnesota College of Education, has just been elected vice president and president-elect of the American Association for Higher Education (AAHE). The AAHE, a department of the National Education Association, has a membership of 24,000 educators throughout the country.

Keller has been active in Minnesota education since 1931, when he was a rural teacher in Washington county. He joined the University faculty permanently in 1947 and has served as director of the Bureau of Institutional Research and director of the University High School. He will assume his national office in August.

MINNESOTA WOMAN APPOINTED
TO UNESCO COMMISSION

Barbara Stuhler, associate director of the University of Minnesota World Affairs Center, has been appointed to the United States National Commission for the United Nations Educational, Scientific and Cultural Organization (UNESCO) as the representative of the League of Women Voters of the United States.

The 100-member commission advises the government on UNESCO matters and is a link between U. S. organizations and individuals and UNESCO.

'U' SENIOR WINS
LOYAL LEGION PRIZE

Leon A. Hennen of Shakopee, Minn., is the winner of the 1967-68 Loyal Legion prize. Hennen is a senior history student at the University of Minnesota. The prize was awarded for Hennen's paper on "The German Influence on the Development of Comal and Gillespie Counties in Texas."

The Loyal Legion, a military order founded at Lincoln's death by officers of the Union Army and Navy, is pledged to uphold the Constitution and the laws of the United States. Its current members are descendants of Civil War military officers.

JONAS SCHWARTZ
HUMAN RELATIONS SCHOLARSHIP
TO BE AWARDED AT 'U'

(FOR IMMEDIATE RELEASE)

The newly established annual Jonas G. Schwartz Scholarship in Human Relationships will be awarded at the University of Minnesota for the first time Wednesday (May 29). It will be presented during the All-University Recognition Reception at 7:30 p.m. in Coffman Union main ballroom.

In memory of the late Jonas G. Schwartz, lawyer and civil rights leader, the scholarship is intended for an undergraduate, graduate or law school student who has demonstrated humanitarian interests. The fall quarter 1968 scholarship will be divided between William Horns and Stephan Mann, both sophomores in the College of Liberal Arts.

During the past year Mann has served as a member of the Panel of Americans, said Matthew Stark, assistant professor and University coordinator of human relations programs. The panel is a University student human relations group of multi-racial and -- religious composition acting under the auspices of the Dean of Students Office. Of the 50 members, five students at a time give panel presentations to student organizations and off-campus groups.

Mann has worked with the Minnesota Student Association (MSA) human relations commission as chairman of the Milwaukee Marches, and has helped to put on several programs in the residence halls concerning open housing in Milwaukee. He is currently a member of the University Task Force on Human Rights.

Horns is chairman of the University's Project Awareness, an American Indian educational and vocational program. During the summer of 1967, he was a volunteer in an eight-week program at Pine Point on the White Earth Indian Reservation. As chairman of Project Awareness, he has helped to plan

(MORE)

and supervise the Thanksgiving, Christmas and Easter vocational field trips of fifth through seventh grade Indian students from Pine Point to the Twin Cities. He has recruited and trained University students to serve as volunteers during the coming summer program.

Jonas Schwartz, whose legal specialty was bankruptcy and corporate reorganization, was a long-standing member of the National Association for the Advancement of Colored People, a board member of the Minneapolis Urban League and the Minneapolis United Negro College Fund, and past chairman of the Zionist Organization of America.

He was a leader in many civil rights battles, including the integration of the armed forces. He led a delegation from Minneapolis to Washington, D. C., to argue this cause. Schwartz was also an author of the State Fair Employment Practices Act.

After receiving his law degree from the University of Minnesota, Schwartz began practicing law in 1927. He was admitted to practice before the U. S. Supreme Court on the motion of a classmate and old friend, Sen. Wayne Morse of Oregon. One of his favorite legal battles was a suit against Harold Stassen, then governor of Minnesota, aimed at integrating the state National Guard during World War II. The case was dismissed, but Gov. Luther Youngdahl later issued an executive order accomplishing the same purpose.

The author Saul Bellow once lived in the Schwartz home and later portrayed Schwartz in his novel "Herzog."

MINNESOTA MEDICAL
FOUNDATION GIVES
15 SCHOLARSHIPS

(FOR IMMEDIATE RELEASE)

Fifteen Minnesota college students who will be entering the University of Minnesota's Medical School this fall have been named winners of Minnesota Medical Foundation scholarships.

Eivind Hoff, executive director of the foundation, said the \$500 scholarships were awarded on the basis of scholastic performance and financial need. Approximately 90 of the entering class of 160 participated in the scholarship competition.

The winners and the school they are currently attending are Patricia M. Rueter, daughter of Mr. and Mrs. Peter Rueter of Mazeppa, University of Minnesota; Arlys E. Kelly, daughter of Mr. and Mrs. Stanley E. Kelly of Hector, St. Cloud State College;

James Tandias, son of Mr. and Mrs. John Tandias, of Medan, Sumatra, Indonesia, Gustavus Adolphus; Gene Kallsen, son of Mr. and Mrs. Louis B. Kallsen of Jasper, University of Minnesota; David G. Bue, son of Mrs. Adeline Bue of Granite Falls, South Dakota State University;

Stephen J. Schultenover, son of Mrs. Frances Schultenover of St. Cloud, St. John's University; Donald P. Braun, son of Mrs. and Mrs. John Braun of Pierz, St. John's University; Peter O. Mjos, son of Mrs. Paul Mjos of Willmar, St. Olaf College;

James A. Mohs, son of Mr. and Mrs. Edward R. Mohs of Belgrade, St. John's University; Randal D. Bjerke, son of Mr. and Mrs. Marshall Bjerke of Hoffman, University of Minnesota at Morris; Margaret A. Jacobson, daughter of Mr. and Mrs. James N. Jacobson of Minneapolis, University of Wisconsin;

Barry G. Welge, son of Mr. and Mrs. B.G. Welge of St. Paul, Macalester College; Monica A. Nothnagel, daughter of Mr. and Mrs. Ervin A. Nothnagel of Bloomington, University of Minnesota; Burnell J. Mellema, son of Mr. and Mrs. John Mellema of Reading, Dordt College, Iowa; and Robert R. Steuer of Minneapolis, University of Minnesota.

The Minnesota Medical Foundation is a nonprofit organization providing various types of private aid to the Medical School.

'U' THEATRE NAMES
DIANA DEVLIN
'OUTSTANDING GRAD ACTRESS'

(FOR IMMEDIATE RELEASE)

Diana Devlin, granddaughter of British actress Dame Sybil Thorndike and niece of actor-director Douglas Campbell, has been named "Best Graduate Actress" for 1967-68 at the University of Minnesota.

Miss Devlin, whose home is in London, made her debut on the American stage as Amanda in the University Theatre's production of Noel Coward's "Private Lives." Miss Devlin is a teaching assistant in the University's department of speech, communication and theatre arts.

William Grivna, a McKnight fellow from Minneapolis, was voted "Outstanding Graduate Actor" for his portrayal of Davies in the University production of "The Caretaker." Grivna, who teaches acting at the University, will join the Minnesota Theatre Company in the spring of 1969.

Both Miss Devlin and Grivna are members of the University Theatre's Showboat crew this summer.

Mark Donicht, a senior from St. Louis Park, Minn., received the "Best Undergraduate Actor" award for the role of Richard in Eugene O'Neill's comedy, "Ah, Wilderness!" Donicht is also the recipient of the Enza Zeller award, given annually to the graduating theatre arts senior with the highest grade point average for the year.

Jeanette Price, a senior from St. Paul, who played the male role of Lucky in "Waiting for Godot," was named "Best Undergraduate Actress."

(MORE)

The awards were presented, May 23, in ceremonies on the University Theatre's Centennial Showboat.

David Feldshuh, a McKnight Fellow from New York who is now working with the Minnesota Theatre Company, received the directing award for "The Caretaker" by Harold Pinter.

The Young People's Theatre Award was presented to Ivar Brogger, a freshman from Minneapolis, who played the title role in "The Outlaw Robin Hood."

The Charles Nichols Service Award, for seniors who have contributed the most outstanding service to the University Theatre, went to Thomas Butsch from Albert Lea, Minn. and Thomas Houde from Minneapolis.

Heather MacDonald, a sophomore from St. Louis Park, received the new Eastside Theatre scholarship for an undergraduate student who has demonstrated interest in the technical aspects of theatre.

James Jorgenson, Elk Horn, Neb., is the recipient of the Oscar W. Firkins Fellowship for the outstanding graduate student in theatre.

The Michael Swifka Memorial Scholarship was awarded to Pamela Nice, a freshman from New Orleans, La.

Technical awards went to the following University Theatre students: Allan Plath, scenery and properties; James Shearon, costumes, and Michael Hyblack, lighting and sound.

MAY 31, 1968

For further information, contact
JUDY VICK, OR LYNN MARASCO, 373-2126

(FOR RELEASE SATURDAY, JUNE 1)

A leading Minnesota educator and a top Twin Cities business executive will receive Outstanding Achievement Awards at the 64th annual meeting of the Minnesota Alumni Association (MAA) to be held Tuesday (June 4) at the Pick-Nicollet Hotel in Minneapolis (International Ballroom).

President Malcolm Moos will present the awards, following a 6 p.m. dinner, on behalf of the University Board of Regents. They will go to William O. Nilsen, who will retire this summer after 25 years as superintendent of the Minnetonka Public Schools, and John Edward Carroll, president of the American Hoist and Derrick Co. of St. Paul.

Three Alumni Service Awards also will be presented at the meeting. They will go to Carroll Kinsey Michener, retired journalist; Edwin A. Willson, executive vice president of Northern States Power Co., and Constance Malmsten, home economics teacher at St. Cloud Technical High School.

The Alumni Service Awards are reserved for former students who have made signal contributions to the welfare and renown of the University by outstanding service to the Minnesota Alumni Association. The Outstanding Achievement Awards are presented to former students who have been recognized as outstanding in their fields.

William O. Nilsen received his master's degree in educational psychology and administration from Minnesota in 1935. A native of Brooklyn, N. Y., and a 1924 graduate of St. Olaf College, he has served in Minnesota and Wisconsin schools as an administrator for 44 years, the last 25 at Minnetonka. Previously he was employed by the school systems in Browns Valley, Buffalo Lake and Spring Grove, Minn.

Nilsen saw the Minnetonka school district merge from six small districts into one large one. Since 1949, the district has grown from 78 teachers, 1,317 students and six buildings to a teaching staff of 412, an enrollment of 7,840 and a plant consisting of nine schools, an administration building and a supply warehouse.

(MORE)

The Minnetonka schools are recognized throughout the country for the success of their graduates -- about 70 per cent pursue higher education. Over the years Nilsen has emphasized the importance of the student as the ultimate product of education.

Nilsen is the recipient of the Silver Beaver Award from the Boy Scouts of America. He has served as president of the Minnesota Alumni Association of the College of Education and secretary of the Minnesota chapter of Phi Delta Kappa. He is a life member of the National Education Association and the Minnesota Education Association. He is a past president of the University of Minnesota Educational Research and Development Council; and for the last eight years he has served on the State Advisory Committee on Teacher Education, representing the Minnesota Association of School Administrators.

Nilsen and his wife live at Christmas Lake, Excelsior.

John E. Carroll, a native of Hibbing, received a bachelor's degree in chemical engineering from the University in 1933. He received an honorary doctor of laws degree from St. Mary's College in 1966.

Carroll became associated with American Hoist and Derrick in 1937 and in 1953 was elected president. He served as district manager in Texas, Chicago, and on the West Coast, and became sales manager in 1949.

An important force in Twin Cities business life, Carroll is a member of the board of directors of American Hoist and Derrick and many other firms, as well as St. Joseph's Hospital, St. John's University and Junior Achievement. He is a member of the National Export Expansion Council and Beta Gamma Sigma, honorary business fraternity.

From 1965-67 he headed the Minnesota Liaison and Facilities Commission for Higher Education. Carroll and his wife live in St. Paul.

Carroll Michener, retired editor and journalist, received a B. A. degree from the University in 1907. He was a member of the Minnesota Alumni Association board of directors from 1937 to 1946 and became chairman of the Advisory Editorial Committee in 1941.

(MORE)

In 1959 he was a member of the committee formed to plan a College of Liberal Arts Alumni Association. It was particularly difficult to organize a liberal arts association, according to Ed Haislet, MAA executive director, because there was no single professional purpose involved, as in most of the other colleges of the University. Michener became first president of the liberal arts association.

Michener's professional career includes positions as city editor of the Minneapolis Tribune, reporter and city editor of the Duluth News-Tribune, reporter for the Denver Republican and San Francisco Chronicle, cable editor for the China Press in Shanghai, and editor and chairman of the board of the Miller Publishing Company of Minneapolis. He retired in 1957, and is now living in Minneapolis.

Edwin Willson, who received a bachelor of electrical engineering degree from the University in 1930, was national president of the MAA from July, 1965, to June, 1966. In 1955 he was on the board of directors of the Institute of Technology Alumni Association representing electrical engineering. He became president of the IT group in 1959.

From 1961-67 Willson served on the board of directors of the MAA. He has served as chairman of the University of Minnesota Alumni Fund, as a member of the President's Advisory Committee for the Alumni Fund, and as alumni representative on the University Senate Committee on Intercollegiate Athletics. Willson lives in Minneapolis.

Constance Malmsten received a home economics degree from the University in 1926. She has been a home ec teacher at St. Cloud Technical High School since 1938.

Miss Malmsten was instrumental in the reorganization of the St. Cloud chapter of the MAA in 1952 and served on its board and as secretary-treasurer, vice president and president between 1952 and 1957. She was the St. Cloud representative of the fund drive for the new student union on the St. Paul campus and received the "Little Red Oil Can," a St. Paul campus service award.

She has served twice on the Alumni Association's scholarship committee in the St. Cloud area.

WILBUR COHEN SPEECH
TO BE TELECAST
THROUGHOUT STATE

UNIVERSITY OF MINNESOTA

MINNEAPOLIS, MINNESOTA 55455
MAY 31, 1968

(FOR IMMEDIATE RELEASE)

For further information, contact:
LYNN MARASCO, 373-2126

"The Emerging World of 1976," a speech by Wilbur Cohen, new U.S. secretary of health, education, and welfare, will be broadcast Wednesday, June 12, at 8:30 p.m. by four Minnesota educational television stations.

The program can be seen in the Twin Cities area on KTCA-TV, channel 2; in the Duluth area on WDSE-TV, channel 8; in Morris and west central Minnesota on KWCM-TV, Channel 10, Appleton; and in the Fargo-Moorhead area over KFME-TV, channel 13.

The speech was given as the 1968 Sidney Hillman Lecture May 18. The lecture series honors the memory of the late Sidney Hillman, labor leader and member of the Franklin D. Roosevelt administration. Sponsoring the lecture along with the University were the Sidney Hillman Foundation, New York, and the Amalgamated Clothing Workers of America (AFL-CIO).

In his speech, Cohen discusses the economy, poverty, housing, health, education, work and leisure, and freedom of choice in a world 200 years removed from the signing of the Declaration of Independence. He portrays current problems realistically, but speaks optimistically of solving them.

Cohen began a 20-year career with the Social Security system in 1936, after graduation from the University of Wisconsin. From 1956 to 1961 he was professor of public welfare administration at the University of Michigan. In 1961 he became assistant secretary of health, education and welfare and was named undersecretary in 1965. When John Gardner resigned early this year, Cohen became acting head of HEW and was sworn in as secretary May 16.

222 CLA HONORS STUDENTS
GRADUATE FROM 'U' THIS YEAR

(FOR IMMEDIATE RELEASE)

Among the seniors graduating from the University of Minnesota Saturday (June 8) are approximately 155 in the College of Liberal Arts (CLA) who are graduating "with honors" -- that is, designated as cum laude, magna cum laude, or summa cum laude.

These students plus those honors students who have already graduated this year (in the four commencements since last June) total 222. The cum laude graduates have grade-point averages of 3.0 to 3.25 (an all-A average would be 4.0); magna cum laude graduates have grade-point averages of 3.25 to 3.40; 3.40 or above and a thesis are required of the summa cum laude graduates. All honors grads have taken part in the CLA honors program.

The CLA honors program is designed to provide a number of academic opportunities to students with high ability and strong motivation, according to Michael C. Mann, administrative assistant for the honors program. The students have special honors advisers and much of their course work is done in honors classes and in special seminars set up exclusively for them.

Seventy-two of this year's 222 honors students are summa cum laude graduates, the highest academic achievement possible. These 72 equal 31 per cent of the honors graduates, and they represent about four per cent of the year's total CLA graduates. Each of the 72 has written a special "summa thesis" to qualify for this honor. Mann said

(MORE)

he considers the summa theses generally superior to the average master's-degree thesis and indicated that some of the summa theses submitted this year will be published.

Two summa graduates in the performing arts satisfied their thesis requirements with live productions. Music major William J. Cermak submitted a "Performance of Beethoven's Second Piano Concerto -- First Movement and an Analysis of Its Harmonic Aspects." Gregg D. Neilson in the theatre arts department directed "Lermontov -- An Evening of Russian Poetry and Music."

Seventy of this year's honors students are magna cum laude graduates (33 per cent) and 80 are cum laude (36 per cent).

Some other miscellaneous facts about the 72 "summas:" they have majored in 25 different fields, the most popular being psychology (13 majors), then English (11 majors), then sociology and political science (eight and seven respectively). They are evenly divided by sex: 35 are men, 37 are women. About one quarter of them plan to do graduate or professional work at the University next year. One unusual summa graduate is 43-year-old Frankie Mae Paulson who did most of her work through the General Extension Division while commuting approximately 125 miles from Aitkin, Minn. She has an overall grade point average of 3.99. The summa group also includes one married couple.

SUMMER LANGUAGE PROGRAMS
OFFERED ON 3 BIG 10 CAMPUSES

Bengali, Sanskrit, Japanese, Chinese, Russian, Spanish, Serbo-Croatian: these are just a few of the many language courses being offered this summer in special programs conducted by 11 midwestern universities.

Sponsor of the language programs is the Committee on Institutional Cooperation (CIC), a voluntary association of the Big Ten universities and the University of Chicago. The CIC seeks new ways of strengthening higher education by pooling the resources of the member universities and thereby eliminating unnecessary duplication.

According to University Vice President Stanley J. Wenberg, Minnesota's representative to the CIC, four separate language programs will be held on three campuses and in Mexico this summer. Three of these are institutes. "Each institute will provide intensive language study in one particular language or family of languages. Cultural studies of the native land of each language will also be available to the students," he said.

Host of the 1968 CIC Slavic Language and Area Studies Institute is the University of Michigan. Russian, Czech, Polish, Serbo-Croatian, Macedonian and Lusatian will be offered. Michigan State University, as the site of the South Asian Language and Area Studies Institute, will provide instruction in South Asian languages such as Bengali, Persian and Sanskrit, as well as in anthropology, art, history, literature and other fields related to the South Asian area.

As a result of a 1967 Ford Foundation grant, the Far Eastern Language Institute -- for the first time in its five-year history -- will be split into two sections. Basic courses in Japanese and Chinese languages are to be conducted at the University of Wisconsin, while advanced courses will be held at the University of Michigan.

CIC's second annual summer program in Spanish at the Universidad Ibero-Americana in Mexico City will accept about 50 students. This program provides highly qualified undergraduates the opportunity to improve their facility in the Spanish language while enriching their special fields of concentration.

Further information may be obtained through the appropriate University language departments: Slavic and East European languages, East and South Asian languages, and Romance languages.

'U' TO HOLD CONTEMPORARY
WEAVING AND CRAFTS SHOW

The public is invited to a comprehensive student show of contemporary weaving and crafts at the University of Minnesota from 6 to 9 p.m. Wednesday (June 5) or from 10 a.m. until 4 p.m. Thursday (June 6). The displays will be located on the first floor of Wulling hall.

Included will be both loom and hand weaving, rugs, macrame knotting, wall hangings, silver and bronze work, stoneware ceramics, plastics and wood. The show is being held in conjunction with the scheduled meeting of the Minnesota Weavers Guild.

HINDI FILM TO
BE SHOWN AT 'U'

"Sujata," the story of an "untouchable" girl in India, will be shown at 7:15 p.m. Friday (June 7) in the Museum of Natural History auditorium at the University of Minnesota.

Sponsored by the University Indo-American Club, "Sujata" was written by Subodh Ghosh and directed by Bimal Roy. The cast includes Nutan, Sunil Dutt, Shashikala, Lalita Pawar, Tarun Bose and Sulochana. Admission is \$1.25 for members of the Indo-American Club, \$1.50 for nonmembers and guests and 50 cents for children under 12.

BILL HAFLING, 373-2126

Professor James E. Lawver, director of the Mines Experiment Station at the University of Minnesota, will present a paper, "A Technical and Economic Appraisal of Methods of Beneficiating Mesabi Range Iron Ore," to the 8th International Mineral Processing Congress in Leningrad, Russia, June 10-15.

Co-author of the paper is Ronald M. Hays, a graduate student at the experiment station who holds a National Science Foundation fellowship.

Lawver plans to visit several research centers in Moscow, particularly the Institute of Earth Physics, after speaking in Leningrad. He will then visit the Royal Institute of Technology in Finland, the Royal Institute of Technology in Sweden, and the Warren Springs Laboratories in London, England.

Lawver's major interest is in extractive metallurgy. At the University he has been involved in a new process for producing high-grade iron from taconite and iron-ore tailings. The process is of great significance to the Mesabi Range mining district of northern Minnesota.

The paper Lawver will present in Leningrad presents a state-of-the-art review of the various types of commercial flowsheets used to produce concentrates from Mesabi Range wash ores, gravity ores, and magnetite taconites. It also presents a review of the various methods that have been proposed for beneficiating the feebly magnetic ores of the Mesabi Range, often referred to as semitaconite. It states that the best process for concentrating semitaconite ores appears to be one involving preconcentration of semitaconites by high-intensity wet magnetic separation. With this process, semitaconites which are not amenable to flotation alone can then easily be treated by flotation.

Lawver has a doctor of science degree from the Colorado School of Mines. He is a member of the American Institute of Mining, Metallurgical and Petroleum Engineers, National Society of Professional Engineers, and the American Association for the Advancement of Science. He has been director of the Mines Experiment Station since April 1962.

DEAN WILLIAMSON
TO BE HONORED
BY XAVIER UNIVERSITY

Professor Edmund G. Williamson, dean of students at the University of Minnesota, will receive an honorary doctor of law degree Wednesday (June 5) in commencement exercises at Xavier University, Cincinnati, Ohio.

A long-time leader in educational organizations, Dean Williamson completed a one-year term as president of the American Personnel and Guidance Association in April. In 1966-67 he served as president of the National Association of Student Personnel Administrators. He has authored numerous books and articles on personnel and guidance topics, including "Vocational Guidance: A Recent History and Philosophy," published by McGraw-Hill in 1965.

Dean Williamson joined the Minnesota faculty in 1926 and has been dean of students since 1941. During the next academic year he will play a significant role in a major study of University of Minnesota student program and services. He will retire in 1969.

'U' PROF RECEIVES
ANOTHER DOCTOR'S DEGREE

Ernst R. G. Eckert, University of Minnesota Regents' Professor of Mechanical Engineering, will be awarded another doctor of engineering degree at the 116th commencement exercises at Purdue University, Lafayette, Ind., Sunday (June 9). Earlier this year, Eckert was awarded an honorary doctor of engineering degree by the Technische Hochschule, Munich, Germany.

Eckert, director of thermodynamics and heat transfer in the University's mechanical engineering department, has also been a visiting professor at Purdue since 1955. He is considered the world's foremost figure in the field of heat transfer. Eckert's original doctor of engineering degree was earned at the German Institute of Technology in Prague, Czechoslovakia in 1931.

U OF M ALUMNI ASSOC.
ELECTS OFFICERS

(FOR RELEASE AT 7 P.M., TUESDAY, JUNE 4)

The Minnesota Alumni Association (MAA) elected officers, executive committee members and new board members at its 64th annual meeting today (Tuesday, June 4) in the Pick-Nicollet Hotel.

Kenneth C. Glaser, president of Lend Lease Transportation Co. (Minneapolis), was elected president replacing Albert H. Heimbach, vice president of Farmers & Mechanics Savings Bank (Minneapolis).

First vice president and second vice president are, respectively, James A. Watson, president of Red Owl Stores (Hopkins), and Harry Heltzer, president of Minnesota Mining & Manufacturing (St. Paul). New secretary is Miss Florence M. Lehmann of the Minneapolis School Board, and Wallace L. Boss was elected treasurer. Boss is vice president, bank and bankers division, First National Bank (St. Paul).

The following persons were elected members of the executive committee: Oscar R. Knutson of St. Paul, Howard F. Woo of Minneapolis, Otto W. Quale of Edina, J. Roscoe Furber of Edina, Maynard A. Speece of Minneapolis, and Richard E. Kyle of White Bear Lake. Furber and Speece were simultaneously elected to four-year terms as board members. In addition to them, other new board members are Herman J. Arnott and Violet Rosacker Graf, both of Minneapolis, and Charles H. Withers of Rochester.

The meeting also included presentation of Outstanding Achievement Awards and Alumni Service Awards.

SEX EDUCATION COURSE
FOR TEACHERS TO BE
OFFERED AT 'U' IN JUNE

(FOR IMMEDIATE RELEASE)

The majority of communities and boards of education in the United States are now requesting that sex education and family life be taught in elementary and secondary schools. The demand for teachers trained in these areas is rising.

In view of the need for such teachers, the University of Minnesota General Extension Division, in cooperation with the College of Education and state departments of education and public health, will offer a course for elementary and secondary teachers and administrators this summer.

The course -- Health 120: Family Life and Sex Education -- will be held on the University's Minneapolis campus from 1:30 to 4:30 p.m. Monday through Friday, June 18 to July 1. Three degree credits are offered for the course, with graduate credits available to qualified participants.

The course will include discussions of current problems of stability of home and family, teenage pregnancies, and early marriages and will deal with the specifics of family life and sex education programs in elementary and secondary schools and the concepts and methods of teaching in such programs.

(MORE)

SEX EDUCATION

-2-

Faculty for the course includes Helen M. Starr, consultant-director to a special project of family life and sex education for the Minnesota Department of Education and recipient of the University's Outstanding Achievement Award; Harlan Norem, speaker, teacher, writer, pastor, and designer of a course for senior high youth entitled "Created Male and Female;" Helen M. Slocum, University professor of physical education for women, coordinator of the course; and representatives from the Minnesota departments of health, welfare, education and the public school systems.

Registration for the course is limited and applications should be received by the University at least a week before the course begins. Fee for the course is \$50.

Further information is available from the Department of Conferences and Institutes, Nolte Center, University of Minnesota, Minneapolis, Minn. 55455; telephone 373-3151.

4,031 TO RECEIVE DEGREES
IN 'U' EXERCISES SATURDAY

(FOR IMMEDIATE RELEASE)

Some 4,031 graduate and undergraduate students on the University of Minnesota's Minneapolis-St. Paul campus will receive their diplomas in commencement exercises to be held at 7:30 p.m. Saturday (June 8) in Memorial Stadium.

One hundred sixteen uniformed cadets and midshipmen -- graduating senior members of the U. S. Army, Navy and Air Force Reserve Officers Training Corps (ROTC) units at the University -- will take part in the annual Tri-Service Pre-Commissioning ceremonies at 2 p.m. Saturday in Northrop auditorium.

Dr. Finn Larsen, U. S. assistant secretary of defense, will address the senior students and present their commission certificates. Taking part in the ceremonies will be Stanley J. Wenberg, vice president for educational relationships and development, representing the University, and the three military unit commanding officers -- Colonel William D. Beard, USA, Commander Edward O. Dietrich, USN, and Lieutenant Colonel James Suttie, USAF -- who will present the candidates for commissioning.

At the commencement exercises on Saturday evening, President Moos will give a Charge to the Graduates, as is traditional at the June exercises.

Flags of 87 countries throughout the world representing the native lands of the foreign students now attending the University will flank the outdoor platform on which the ceremonies will be held. The combined

(MORE)

Concert Band Ensemble and Symphony Band Ensemble, directed by University Bandmaster Frank Bencriscutto, will play for the opening academic procession -- led by History Professor Rodney C. Loehr serving as mace bearer -- as the graduating class marches in and is seated.

President Moos will confer certificates and degrees upon the members of the graduating class after they have been presented by the deans of the several colleges or their representatives. An innovation in this year's commencement will be a farewell from the outgoing president of the Minnesota Student Association, William Newell. Diplomas then will be presented, followed by the conferring of doctor of philosophy degrees.

The Saturday night commencement exercises are open to the public. In case of hard rain, the commencement will be held in Northrop auditorium. Then only the graduates will enter the auditorium, without any procession. Each graduate has been issued two rain guest cards in his packet which will entitle that number of persons to go to designated rooms on campus and listen to the exercises being piped in by loudspeaker. Extra rain guest cards are available for several rooms and auditoriums, and may be picked up at 220 Morrill hall through Saturday.

The ceremonies will be broadcast, whether out -- or indoors, over KUOM (770) beginning at 7:30 p.m.

In case of light rain, rain gear will be issued and the commencement will be held in the stadium. In case of threatening weather, KUOM will carry frequent announcements of any change that may have been decided upon.

'U' SUMMER SCHOOL FOR
LAWYERS TO START IN JULY

(FOR IMMEDIATE RELEASE)

Lawyers from a seven-state region will be attending the 1968 University of Minnesota Summer school for lawyers to be conducted July 22-Aug. 2 in the air-conditioned Nolte Center for Continuing Education on the University's Minneapolis campus.

The school is jointly sponsored by the department of continuing legal education, a part of the University's General Extension Division, and the Minnesota State Bar Association. Lawyers from Iowa, North and South Dakota, Nebraska, Montana and Wyoming, as well as Minnesota, will be enrolling in the school.

Eight elective courses, each lasting two and a half days, will be offered.

The courses, dates and instructors are:

July 22-23-24

Farm Tax, Business Planning and Estate Planning Problems -- Neil E. Harl
Buying and Selling Small Businesses -- John H. McCord

July 24-25-26

Estate Planning -- Raymond A. Reister and Norton L. Armour
Federal Taxation of Estates, Gifts and Trusts -- Thomas L. Waterbury

July 29-30-31

Selected Problems in the Sale and Development of Real Estate -- David L. Graven
Workmen's Compensation -- Richard P. Mahoney

July 31-Aug. 1-2

Evidence -- Hon. Leonard J. Keyes
Law Office Management -- Kline D. Strong and Ross A. Sussman

An exceptionally fine faculty has been recruited for the program," said Austin Anderson, director of the continuing legal education program. "The faculty possesses the ideal blend of professional talent -- experienced practicing attorneys and legal scholars."

(MORE)

To encourage a closer student-instructor relationship, enrollment is limited to 30 lawyers for each of the courses. It is possible to enroll in two courses during one week, or a total of four courses during the entire two-week program.

Tuition for each course is \$100, which includes all study materials. These materials will be mailed to registrants for advance review and study upon acceptance of their enrollment application.

The University's law library will be open to those attending the summer school.

The faculty for the school has been drawn from a four-state area. Professor Neil E. Harl is from Iowa State University, Professor John H. McCord from the University of Illinois, and Kline D. Strong from the Salt Lake City, Utah, law firm of Strong, Poleman & Fox.

The following faculty members are from Minnesota: Hon. Leonard J. Keyes, judge of the district court, second district, St. Paul; Professors Thomas L. Waterbury and David L. Graven, University of Minnesota Law School; Norton L. Armour, William Mitchell College of Law; and Raymond A. Reister, Richard P. Mahoney, and Ross A. Sussman, Minneapolis attorneys.

A catalogue containing complete course descriptions and a registration form is available from the Department of Continuing Legal Education, 338 Nolte Center, University of Minnesota, Minneapolis, Minn. 55455; telephone (612)373-5386.

Ample parking, hotel and motel accommodations are available. Upon request, the department will furnish the names of hotels and motels near the campus.

2 U OF M MEDICAL
FACULTY MEMBERS
WIN TEACHING AWARDS

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
JUNE 5, 1968

(FOR IMMEDIATE RELEASE)

For further information, contact:
ROBERT LEE, 373-5830

Two University of Minnesota College of Medical Sciences faculty members have been named the 1968 winners of the Minnesota Medical Foundation's Distinguished Faculty Teaching Awards.

Dr. William Knobloch, assistant professor of ophthalmology, and Donald Robertson, instructor of anatomy, will receive their certificates and cash prizes of \$1,000 Friday (June 7) at the Medical School's annual Recognition Day program.

Both men were selected in a poll of the University's medical students. The awards will be presented by Dr. O. L. Norman Nelson, president of the Minnesota State Medical Association, which contributed the funds for the cash prizes.

Dr. Knobloch, 41, 1609 Innsbruck parkway, Minneapolis, received his doctor of medicine degree from the University of Oklahoma in 1952 and first came to the University of Minnesota as a resident in 1960. In 1963 he received a special fellowship to study retinal diseases and surgery at Washington University School of Medicine. He has been an assistant professor at the University of Minnesota since 1964.

Robertson, 35, 2085 E. Highway 36, North St. Paul, received a bachelor of science (biology) degree in 1956 from the University of Minnesota at Duluth and his doctor of philosophy degree in anatomy in 1966 from the University. He has been an instructor for two years. His research interest is in fetal metabolism and birth defects.

Previous recipients of the Distinguished Teaching Award were Dr. Carl B. Heggstad, 1962; Dr. W. Albert Sullivan, 1963; Dr. M. John Murray and Dr. Kenneth A. Osterberg, 1964; Dr. George C. Flora and Jack W. Miller, 1965; Dr. Aldo Casteneda and Morris Smithberg, 1966; and James F. Koerner and Dr. James H. Moller, 1967.

ENROLLMENT OPEN
IN 'U' HIGH
SUMMER SCHOOL

(FOR IMMEDIATE RELEASE)

Enrollment in University high school's summer school program is open to all students who are entering grades 7 through 12 in the fall, Dwight Lindbloom, University high school principal, announced today.

Classes will meet in two-hour blocks, Monday through Friday mornings, June 17-July 19. The deadline for enrollment is Monday, June 17.

Enrichment and remedial offerings will include courses in advanced art, developmental reading, better writing, field biology, computer applications in mathematics and science, remedial arithmetic, remedial algebra, personal typewriting and "World Trouble Spots and American Foreign Policy," a class in which students will select current areas of international conflict and examine them in light of concepts and generalizations drawn from the social sciences.

The summer school faculty will be made up of regular University high school staff members.

Tuition will be \$20 for one course and \$35 for two courses, plus a \$2 materials charge for each course. Credit is available, but must be approved by the school where the student is regularly enrolled.

Applications and further information are available by calling 373-4177 or writing to Summer School Principal, University High School, University of Minnesota, Minneapolis, Minn., 55455.

Four University of Minnesota Law School graduates who have achieved national recognition will be honored at 8 p.m. Friday (June 7) at the Law School Senior Recognition Exercises in Northrop auditorium.

President Malcolm Moos will present Outstanding Achievement Awards, on behalf of the University Board of Regents, to Carl M. Anderson, Merck Company executive; Frank S. Farrell, vice president and general counsel of Northern Pacific Railway; Frank B. Hubachek, retired chairman of the executive committee of Household Finance Company, and Lee Loevinger, commissioner of the Federal Communications Commission.

Loevinger will be the main speaker. The 155 members of the 1968 Law School class will be honored.

Carl M. Anderson, secretary of the Merck Company, Rahway, N. J., and president of its foundation, will be honored as a "resourceful executive combining legal knowledge and managerial skill." He is national campaign chairman of the United Negro College Fund and treasurer of the Lutheran Church in America.

A 1927 cum laude graduate of Minnesota, Anderson received his law degree in 1930. He is president of the University of Minnesota Alumni Association of New York.

Frank S. Farrell, vice president and general counsel for the Northern Pacific Railway in St. Paul, will be honored for his significant role in the Supreme Court's historic reapportionment (one man-one vote) decision.

"He was the imaginative leader of a group of young lawyers who devised the strategy and underlying legal arguments that led to the Supreme Court's historic decision. The result has been to remake the political face of the nation," said Dean William B. Lockhart of the University Law School.

(MORE)

A 1947 graduate of Minnesota, Farrell received his law degree in 1948. He has served as president of the Minnesota chapter of the American Civil Liberties Union and chairman of the Minnesota State Bar Association's Civil Rights Committee.

Frank B. Hubachek, Chicago, Ill., will be recognized for his efforts in calling for legal controls over abuses in consumer financing and as a pioneer in the development of wilderness research. He retired in 1967 after 33 years as chairman of the executive committee of the board of directors of Household Finance Corporation. He was with the firm from its beginning in 1925 and was a pioneer in the development of legal controls over consumer financing.

Hubachek, who graduated from Minnesota in 1915 and received his law degree in 1922, received an honorary doctor of law degree from Cornell College in 1962. He created and still supports the Quetico-Superior Wilderness Research Center. In 1957 he received a Distinguished Service Award from the American Forestry Association.

Lee Loevinger, commissioner of the Federal Communications Commission, will be honored as a public official on the state and national levels and as the author of numerous significant works on law and jurisprudence.

Loevinger graduated from Minnesota in 1933 and received his law degree in 1936. He began his career as trial and regional attorney for the National Labor Relations Board. He was a partner in a Minneapolis law firm from 1946 to 1961 and in 1960 was named associate justice of the Minnesota Supreme Court. In March 1961 he became assistant attorney general in charge of the antitrust division of the U. S. Department of Justice. He was appointed to his present position with the Federal Communications Commission in 1963. His published works include "The Law of Free Enterprise" and Jurimetrics."

ROBERT KNOPKE TO RECEIVE
WALL STREET JOURNAL AWARD

Robert T. Knopke, a senior in the University of Minnesota School of Business Administration will receive the Wall Street Journal Student Achievement Award at 8 p.m. Friday (June 7) at the School of Business Administration Reception for Recipients of School Awards in room 130, Business Administration.

Knopke, who is from New Ulm, Minn., will be honored as the senior with the highest scholastic average who has expressed a particular interest in the field of finance.

'U' PROF THURSTON GIVEN
WESLEYAN ALUMNI AWARD

Marjorie H. Thurston, professor of rhetoric at the University of Minnesota, received special recognition at Dakota Wesleyan University's annual Alumni Day Banquet in Mitchell, S. D., recently.

Professor Thurston, who delivered the 1968 Cap and Gown Day address at the University of Minnesota, is a 1922 Wesleyan graduate and is being cited for outstanding service to Wesleyan. She has served as secretary to the Minnesota chapter of Wesleyan alumni for a number of years and helped raise the "Minnesota Good Neighbor Gift" for construction of a campus center at Wesleyan.

Professor Thurston has taught in the College of Agriculture, Forestry and Home Economics on Minnesota's St. Paul campus since 1929. She retires from the University this month.

SEMINAR IN POST-LARENGETOMY
REHABILITATION TO BE HELD AT 'U'

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
JUNE 6, 1968

(FOR IMMEDIATE RELEASE)

For further information, contact:
LYNN MARASCO, 373-2126

A professional speech pathologist is usually and logically called in to direct the rehabilitation of a person whose larynx has been removed.

Ernest Henrikson, University of Minnesota professor of speech, would like to see more speech pathologists throughout the country trained in helping such persons. For this reason, he obtained a federal grant from the vocational Rehabilitation Administration, a part of the U. S. Department of Health, Education and Welfare, to hold a seminar in Minneapolis. Its purpose is to encourage the development of programs to prepare teachers of the larengectomized.

The seminar will be held Monday through Friday (June 10-14) in Nolte Center on the University's Minneapolis campus.

A small group of trainees from the staffs of universities which have graduate programs in speech pathology and have indicated interest in including this special training in their regular curricula has been chosen to participate.

Henrikson, himself a national authority on teaching larengectomized persons, has obtained as faculty four people whom he considers tops in the field in the country. They are from the University of Kansas Medical Center, the Indiana University Medical Center, the University of California at Santa Barbara, and the Veterans' Administration hospital in San Francisco.

Also on the seminar faculty are three local people -- two University of Minnesota faculty members and one staff member from the Veterans' hospital.

Evening sessions Monday through Thursday at 7:30 p.m. at Nolte Center will be open to the public. Each of the four out-of-state faculty members will speak one evening.

The University General Extension Division's department of conferences and institutes is cooperating with Henrikson in the presentation of the seminar.

GRAD BUSINESS SCHOOL
TO OFFER FELLOWSHIP
IN BANKING, FINANCE

(FOR IMMEDIATE RELEASE)

A new graduate fellowship in banking and finance for the 1968-69 academic year was announced today (Thursday) by Dean Paul V. Grambsch of the University of Minnesota School of Business Administration.

The \$2,000 fellowship is financed by the Central States Graduate School of Banking at Madison, Wis., and presented to the University by the Minnesota Bankers Association.

The award is available to a graduate of a Minnesota college or university with an undergraduate major in business, economics, banking or finance. The recipient is expected to begin his graduate studies in the fall and secure a master of business administration degree during the coming academic year.

Applications for the fellowship should be made to the Associate Dean, Programs and Administration, School of Business Administration, University of Minnesota, Minneapolis 55455, by July 1, 1968.

ORIGIN OF ZENITH MINE
ORE DEPOSITS DISCUSSED
IN GEOLOGIC REPORT

(FOR IMMEDIATE RELEASE)

A geologic report on the iron ore deposits of the Zenith mine, Vermilion district, St. Louis county, Minnesota, has just been published by the Minnesota Geological Survey, University of Minnesota Professor Paul K. Sims, survey director, announced today.

The report describes the geology and discusses theories for the origin of the iron ore deposits, which in past years were a source of premium-grade hematite deposits.

"Although the mine has closed and it is improbable that the district will ever again be a substantial source of iron ore, the geology described in the report will be extremely useful to mining geologists and engineers," said Sims. He added that "a broad region, which includes the Zenith mine, now is being examined by the mining industry as a potential source of base-metal sulfide ores, and this report adds substantial detail to our knowledge of the local geology."

In addition to the descriptive text, the report contains geologic maps of two underground mining levels and cross sections of the ore bodies.

The Survey's Special Publication 2 (SP-2), is entitled "Geology and Origin of the Iron Ore Deposits of the Zenith Mine, Vermilion District, Minnesota." It may be purchased from the Minnesota Geological Survey, 220 Pillsbury Hall, University of Minnesota, Minneapolis, Minn., 55455, at \$2 per copy.

(MORE)

The report, adapted from a thesis submitted as part of the requirements for a Ph.D. degree at Pennsylvania State University, is by Jerome F. Machamer. Machamer's parents, Mr. and Mrs. Jerome E. Machamer of Duluth, provided most of the financial support for the study.

MAPS AVAILABLE

Preliminary geologic maps of a part of Duluth Gabbro, in Cook county, are now available for examination or purchase. They are the following 7 1/2-minute quadrangles:

1. Hungry Jack Lake quadrangle, Cook county
2. South Lake quadrangle, Cook county
3. Gunflint Lake quadrangle, Cook county

The maps, prepared by H. D. Nathan, may be examined at the Minnesota Geological Survey office in 220 Pillsbury hall on the University's Minneapolis campus; or copies can be purchased at 50 cents each by writing to the survey, 220 Pillsbury, University of Minnesota, Minneapolis, Minn. 55455.

'U' ASTRONOMER WILL
RECEIVE SOCIETY OF PACIFIC
BRUCE GOLD MEDAL

(FOR IMMEDIATE RELEASE)

University of Minnesota astronomer Willem J. Luyten has been awarded the Catherine Wolfe Bruce Gold Medal for 1968 by the Astronomical Society of the Pacific.

The award is for "distinguished services to astronomy" and carries with it a life membership in the society. The medal will be presented at a banquet held at San Diego State College on June 18.

The Bruce telescope at Harvard University, donated by Miss Bruce, was one "on whose plates I cut my teeth, so to speak, in the proper motion program," according to Professor Luyten. Proper motion is a term given to movement of stars, determined by comparing photographic plates with corresponding plates taken 7 to 10 years earlier. The term came into being around 1800 when people discovered that stars actually move.

Luyten is one of only a few astronomers now studying proper motion through the use of photography. Most astronomers now use radio astronomy or satellite studies, while Luyten's work is in the more traditional type of "star gazing" that came into use with the development of photography in 1900.

Luyten is the discoverer of more than 400 of the some 500 known White Dwarfs, the smallest known stars. He retired from the faculty of the University in 1967, but since then has been active in research with astronomical devices and techniques as a professor emeritus.

GENETICS, CELL BIOLOGY

(FOR RELEASE AT 10 A.M., SATURDAY, JUNE 8)

Dr. Frederick Forro, Jr., 44, associate professor of biophysics at Yale University, New Haven, Conn., was named professor and head of the department of genetics and cell biology in the College of Biological Sciences by the University of Minnesota Board of Regents today (Saturday, June 8).

According to Richard Caldecott, dean of the College of Biological Sciences, "Fred Forro is one of the best trained men in his field and certainly one of the most respected."

Immediately after receiving his M. D. degree in 1949 from Yale, Forro began work with Ernest Pollard in the formation and development of the Yale Biophysics department. Thus, he was one of the original group of researchers in this country to embark on a molecular approach to the solution of biological problems.

Forro's research efforts have involved biophysical studies on the replicating mechanism of DNA. DNA, deoxyribonucleic acid, is considered to be the master chemical of all life, determining the heredity of every living thing.

"The aim of our research is not really to find something of immediate practical value -- for example, of use in medicine," Dr. Forro explains, "but is instead a continuing search to better understand nature itself. Our primary emphasis lies in understanding what cells are, as viewed in a physical and chemical context."

(MORE)

When such understanding exists, it will be applied in solving the major medical and agricultural problems which confront man, such as disease and aging. It was pointed out that the large land-grant university, which includes Colleges of Medicine and Agriculture, provides an excellent environment for the immediate application of new findings such as will come out of the laboratories in the College of Biological Sciences.

"As head of our genetics and cell biology department, Dr. Forro along with his colleagues will have a free hand to develop a renowned faculty and program in the areas of genetics, cell biology, and the basic biophysical sciences essential for further progress in these fields," Dean Caldecott said.

Caldecott believes that the key to the success of the expanding program in this area of biological science, and new faculty appointments being made in line with this program, lies in the construction of a new building on the St. Paul campus. At the last session of the State Legislature \$400,000 was appropriated to plan such a building. It is hoped that the \$8,000,000 needed to construct the building will be provided at the next legislative session.

Note to Editors: A photo of Forro is available.

HELLER TO LECTURE
AT RUTGERS UNIVERSITY

Walter W. Heller, University of Minnesota Regents' Professor of Economics, will deliver the Stonier Memorial Lecture Friday, June 14, at the Stonier Graduate School of Banking, Rutgers -- The State University, New Brunswick, N. J.

"Prosperity, Inflation and Gold" will be his topic.

Heller served as chairman of the Council of Economic Advisers to Presidents Kennedy and Johnson.

PITTSBURGH 'U' HONORS
MINNESOTA PROF

Gisela Konopka, University of Minnesota professor of social work, is the first recipient of the Annual Distinguished Alumnus Award of the University of Pittsburgh Graduate School of Social Work. Professor Konopka accepted the award Tuesday, May 28 at the annual meeting of the Pittsburgh School of Social Work alumni association in San Francisco, Calif.

Mrs. Konopka graduated from Pittsburgh in 1943 and has been a member of the faculty at Minnesota since 1947. She is a widely known specialist in the problems of youth and is a coordinator in the Office of Community Programs in the University of Minnesota Center for Urban and Regional Affairs.

'U' BUSINESS DEAN
TO HEAD AACSB

Paul V. Grambsch, Dean of the University of Minnesota School of Business Administration, was recently named vice president and president-elect of the American Association of Collegiate Schools of Business (AACBS) at the group's annual meeting in Miami Beach, Fla.

Dean Grambsch will head the organization, which includes 130 colleges and universities, in 1969-70. The AACSB serves as an accrediting agency for schools of business administration.

'U' GRAD STUDENT IS
1968 SHINNER SCHOLAR

(FOR IMMEDIATE RELEASE)

Gretchen M. Chesley of the University of Minnesota will gain practical experience in natural history museum work beginning this month (June), by assisting scientists at Field Museum of Natural History in Chicago under a summer scholarship-work program set up by the Ernest G. Shinner Foundation of Chicago and Field Museum.

Miss Chesley, a graduate student in anthropology, is one of nine national Shinner Scholars for 1968, selected by Field Museum from 62 applicants studying at 39 different universities and colleges. Each will receive a stipend of \$300 a month for two or three months, depending on when the student elects to start at the museum.

Under the guidance of Field Museum scientists in the field of anthropology, Miss Chesley will have an opportunity to apply laboratory and classroom techniques to practical problems related to her area of concentration. Other Shinner Scholars will follow similar programs in botany, geology, paleontology and zoology.) The program provides science students with summer employment necessary for continuation of their studies.

The Shinner Foundation was established in 1966 by Chicagoan Ernest G. Shinner with the aim of helping deserving young people. Including this year's winners, 28 young men and women have been named Shinner Scholars of Field Museum since the program began.

'U' STUDENTS
GET GRANTS FOR
POLITICAL STUDY

(FOR IMMEDIATE RELEASE)

LYNN MARASCO, 373-2126

Three University of Minnesota political science graduate students will soon be starting special projects financed by grants from national foundations. All have been working for the past year at the Center for Comparative Studies in Technological Development and Social Change at the University.

Betty Sherman leaves this week for India, where she will spend eight to 12 months. She is the recipient of two grants which will support her work there.

A National Science Foundation program designed to support doctoral dissertation research will pay her travel expenses to and from New Delhi and will cover expenses for technical research work. She will be studying two new towns created by the Indian government in the 1950's in their relationship to district, state and federal governments, and the role of political parties in these relationships.

Her second grant is from the Woodrow Wilson Foundation. The dissertation fellowship program of the foundation provides money to enable graduate students to get their doctor of philosophy degrees as soon as possible after they have finished their undergraduate work. This program will pay her living expenses for 15 months and will help make her stay in India possible. (Victor Gecas, sociology graduate student, and Otani Yoshihiko, economics graduate student, also received Woodrow Wilson Foundation dissertation fellowships, the Graduate School recently announced.)

Charles Mundale will spend a year in Mexico studying local political institutions. His work is to be financed by the Doherty Foundation. The town in which he will be doing his work is a new industrial town with three new factories. Some of the workers are from other areas and one of his interests will be the leadership that is or is not provided by these workers.

John Richardson has received a post-doctoral training fellowship from the Social Science Research Council. He will be spending another year working through the Center for Comparative Studies in Technological Development and Social Change at the University. He will investigate the application of determinant mathematical models to organization theory, focusing on political development.

Among his continuing interests is the need for the development of precise theories to provide a common theoretical basis for work in the social sciences. His doctoral thesis, which will be published next year by the Michigan State University Press, is a study of the use of American land-grant universities and overseas technical assistance programs.

FULBRIGHT COMPETITION
OPEN AT U OF M

(FOR IMMEDIATE RELEASE)

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL

JUNE 7, 1968

For further information, contact:
LYNN BALL, 373-2126

Competition is officially open for 1969-70 U. S. Fulbright full grants and travel grants, and foreign graduate grants for academic study or research abroad, and for professional training in the creative and performing arts.

Grants are open to more than 950 American graduate students for study in any of 50 countries. Candidates must be U. S. citizens at the time of application, have a bachelor's degree or its equivalent before the beginning date of the grant and, in most cases, be proficient in the language of the host country. Selections will be made on the basis of academic and/or professional record, the feasibility of the applicant's proposed study plan, language preparation and personal qualifications. Preference is given to applicants between the ages of 20 and 35.

Creative and performing artists will not be required to have a bachelor's degree but they must have four years of professional study or equivalent experience. Applicants in social work must have at least two years of professional experience after the master of social work degree. Applicants in the field of medicine must have an M. D. at the time of application.

Full awards provide tuition, maintenance for one academic year in one country, round-trip transportation, health and accident insurance and an incidental allowance. A limited number of Fulbright travel grants is available to supplement maintenance and tuition scholarships granted to American students by foreign governments, universities and private donors.

University of Minnesota students may obtain application forms and information from the campus Fulbright adviser, Graduate Fellowship office, 307 Johnston hall. The deadline for filing applications through the Fulbright adviser on this campus is October 15, 1968.

'U' PROF NAMED
FULBRIGHT SCHOLAR

Professor Scott G. McNall of the University of Minnesota sociology department has been selected as a Fulbright Scholar for the academic year beginning in September.

In an international educational exchange program conducted by the Department of State under the Fulbright-Hays Act, the Board of Foreign Scholarships each year selects faculty members for lecturing assignments abroad and for postdoctoral research. Professor McNall has been chosen to lecture on sociology at Pierce University College in Athens, Greece.

'U' MUSIC EDUCATORS ATTEND
NATIONAL CONFERENCE

Several University of Minnesota music department faculty members participated in the Music Educators National Conference held recently in Seattle, Wash.

Professor Johannes Riedel, director of graduate studies in music, addressed the American String Teachers Association on the topic, "The Research Problem." Theodore C. Russell, a graduate student, presented a demonstration on "Action Research" to the same group. Edgar M. Turrentine, associate professor of music education, and Arnold F. Caswell, professor of music education, participated in a series of discussions on Training Sessions on Experimental Research. Robert L. Borg, associate professor of music education, was resource consultant for the Tanglewood Symposium panel.

(MORE)

FORMER 'U' PROF NAMED
ASPA MAN OF THE YEAR

Dale Yoder, founder and former director of the University of Minnesota Industrial Relations Center, has been named Man of the Year by the American Society for Personnel Administration (ASPA).

The award is not given every year, but only when a candidate of sufficient stature is found.

Yoder joined the University faculty as an associate professor of economics in 1934 and in 1946 became a full professor and director of the Industrial Relations Center. He went to Stanford University in 1958 and is currently director of the Bureau of Business Research at California State College at Long Beach.

SIGGELKOW HEADS
COLLEGE UNIONS ASSN.

Edwin O. Siggelkow, director of Coffman Memorial Union, University of Minnesota, was named President of the Association of College Unions-International at its annual conference held in Chicago recently.

Siggelkow has served in the various positions with the association. From 1950-1954 he was with the University Student Activities Bureau; and he was coordinator of student activities and Kirby Student Center at the University of Minnesota, Duluth, from 1954 to 1967.

AUSTIN DOCTOR
NAMED TREASURER

Dr. Tracy E. Barber, of Austin, Minn., has been named treasurer of the Industrial Medical Association, the international association of physicians in industry. The announcement was made at the Association's 53rd annual meeting held recently in San Francisco. Dr. Barber is medical director of the George A. Hormel Co., and is visiting lecturer in industrial medicine at the University of Minnesota. He received his medical degree from Temple University in 1943.

FAMILY PLANNING INSTITUTE
FOR SOCIAL WORKERS TO BE
HELD AT 'U' IN JUNE

(FOR IMMEDIATE RELEASE)

An institute on family planning designed for social workers who are involved in or responsible for the implementation of family planning programs in their agencies will be held at the University of Minnesota June 26-28.

The institute is made possible through a grant from the U. S. Children's Bureau and the Minnesota Department of Health, and is presented by the University's School of Social Work and General Extension Division.

The grant covers full tuition costs for all registrants. Applications will be accepted in the order they are received, from now through a registration hour beginning at 8:30 a.m. June 26. The institute is limited to approximately 80 participants.

There has been a significant lack of attention to family planning in social work education, according to William Hoffman, director of continuing education in social work at the University, and the importance of the social worker as contact between client and family planning agencies cannot be overestimated.

Several recent studies indicate a close correlation between a lack of family planning information and infant mortality, illegitimate births, inadequate education, poverty, and many poverty-related problems.

The primary interest of the institute is not population control, but physical, mental and social health and the opportunity to choose the size of one's family. Other areas to be covered are the specific role of social workers in family planning, hereditary implications, medical aspects, and special consideration of the unmarried mother and adolescent.

For registration information contact Hoffman at 321 Nolte Center, University of Minnesota, Minneapolis, Minn. 55455; telephone 373-5831.

'U' GALLERY SEEKS
TO PURCHASE
AMERICANA PAINTING

(FOR IMMEDIATE RELEASE)

A scenic Americana painting by David Johnson, on display in the lobby of the First National Bank building in Minneapolis through June, will be purchased by the University Gallery if enough public contributions are received, Charles Savage, gallery director, said today.

"West Cornwall, Connecticut, 1875" is the title of the work valued at \$2000. Johnson, a turn-of-the-century American painter, was a member of the Hudson River Valley school of painting.

"The painting will greatly enrich the gallery's study and teaching collection," Savage said. "It has the best characteristics of the artist and his school: good coloring, fine draftsmanship, a didactic fascination with nature. There are aspects in this painting that even the naked eye could not have discerned without mental effort and romantic inspiration."

The University Gallery is a study collection of art works for the enrichment and enjoyment of the Twin Cities public, as well as University students. It is located on the third and fourth floors of Northrop auditorium on the University of Minnesota's Minneapolis campus.

Contributions for the purchase of the Johnson painting can be given to a First National bank teller or mailed to Special Projects Program, 220 Morrill Hall, University of Minnesota, Minneapolis, Minn. 55455.

Last year public contributions made possible the gallery's purchase of "Countdown" by Robert Goodnough.

SYMPHONY MEMBERS TO
PERFORM IN PIANO TRIO
RECITALS AT 'U'

(FOR IMMEDIATE RELEASE)

Two piano trio recitals featuring Isidor Saslav, concertmaster of the Minneapolis Symphony Orchestra, Ann Heiligman Saslav, concert pianist, and Robert Jamieson, principal cellist of the Minneapolis Symphony Orchestra, will be given Tuesday, June 18, and Monday, July 1, at the University of Minnesota.

The program for the first recital includes Hayden's "Trio in G Major," Brahms' "Trio No. 3 in C Minor," and Schubert's "Trio No. 2 in E Flat Major." The recital will begin at 8 p.m. in Scott Hall auditorium.

The July 1 recital will be given in the Bell Museum of Natural History auditorium at 8 p.m. The program includes Beethoven's "Trio No. 6 in E Flat Major," Bloch's "Three Nocturnes," and Mendelssohn's "Trio No. 1 in D Minor."

Saslav has performed as soloist and concertmaster with many orchestras throughout the country. At Indiana University he met and married the former Ann Heiligman, with whom he has appeared many times as a piano-violin duo. For seven seasons Saslav has been among those invited to participate in the Festival Casals Orchestra of Puerto Rico. He is a member of the University of Minnesota faculty in addition to his position with the symphony.

Mrs. Saslav studied with a full scholarship at Curtis Institute of Music in Philadelphia, and during her final year was on tour with the Nova Arte Trio. She was awarded a Fulbright scholarship for study in Austria in 1959-60. She went to Indiana University in 1960 to teach and study and then joined the faculty of the State University of New York at Buffalo. She is now living in Minneapolis with her husband and their two children.

Jamieson has been the Minneapolis Symphony Orchestra's principal cellist since 1951 and appears often as a soloist with the orchestra. From 1962 to 1966 he taught summers at the Congress of Strings at Michigan State University. Last summer he played in the Mozart Festival at Lincoln Center in New York.

Tickets for both concerts will be available at the door for \$1.50.

The recitals are sponsored by the University of Minnesota Summer Session and departments of music and music education, and the Minnesota unit of the American String Teachers Association.

MEMO

To: Editors and newsmen

From: Mrs. Nancy Pirsig, director, University News Service

Many of you have been aware of some changes in the News Service staff over the past year. As a matter of fact, with the exception of myself, we have a completely different staff from a year ago at this time.

Following are our names, areas of coverage, and home phone numbers, which you may want to keep someplace handy:

Mrs. Lynn Ball, 331-3837: covers students, student-sponsored events, student organizations, and offices dealing with students such as the Student Activities Bureau. (She replaced Mrs. Doris Fenick.)

Mr. Bill Hafling, 469-2215: covers all non-health science fields, including the entire College of Biological Sciences and Institute of Technology, as well as scientific areas within the College of Liberal Arts and other schools. (He replaced Glenn Ickler.)

Mr. Bob Lee, 724-5742: Bob is located in Mayo Hospital and handles all news and information in the health-science field, including the hospitals, the College of Medical Sciences, the College of Pharmacy, the School of Dentistry and the College of Veterinary Medicine. His office phone number, unlike the rest of ours, is 373-5830. (He replaced Gerry Knox last summer.)

Mrs. Lynn Marasco, 781-0873: covers primarily the many departments and activities of General Extension Division and the Summer Session. (She replaced Mrs. Beth Kent.)

Mrs. Nancy Pirsig, 644-3184: directs general operations of the News Service, is present at Regents' meetings and Faculty Senate meetings, and covers major administration news. Also handles complaints and special requests for information. (Will be on vacation June 24-Aug. 2, 1968.)

Miss Judy Vick, 824-3544: handles everything else, including entertainment and cultural events (concerts, theatre, art) and news from the schools or colleges of liberal arts, education, business administration, law, library, graduate, etc. An addition to the staff last summer, Judy will be in charge while Nancy Pirsig is away.

Secretary is Miss Cassandra Thompson, who replaced Lynnette Taylor.

DATA PROCESSING
INSTRUCTION TO BE
TAUGHT AT 'U'

UNIVERSITY OF MINNESOTA

The University of Minnesota, recognizing the need for teachers trained to help their students understand computers, will offer a course in data processing instruction this summer. The course -- Curriculum and Instruction (Ed CI) 130: Instruction in Business Data Processing -- will run from July 22 through Aug. 2.

The course is open to teachers and administrators interested in data processing instruction. Three degree credits are offered for the course and graduate credit is available to eligible participants.

The program includes an introduction to data processing and the social and economic implications of automation, the current status of data processing instruction in the secondary and post-secondary school business program, concepts of data processing, elements of an electronic data processing system, arithmetic of computers, control-programming concepts, elements of problem solving, stored program concept, functions of the analyst (programmer), implementation in the school curriculum, and selection and evaluation of instructional materials. Tours of computer installations are also planned.

The University's General Extension Division and College of Education will cooperate with the Minnesota State Department of Education and the Northwest Chapter of the Data Processing Management Association in sponsoring the course.

Faculty for the course will be representatives of the Data Processing Management Association.

Classes will be held in Nolte Center on the University's Minneapolis campus 1-4 p.m. Monday through Friday.

Tuition for the course is \$60. Registration inquiries may be directed to the extension division's Department of Conferences and Institutes, Nolte Center, University of Minnesota, Minneapolis, Minn. 55455; telephone 373-3151.

BEERS TO APPEAR
IN NORTHROP
SUMMER SERIES

(FOR IMMEDIATE RELEASE)

Folk musicians Bob and Evelyne Beers will perform at 8 p.m. Tuesday (June 18) in Northrop auditorium on the University of Minnesota's Minneapolis campus.

The concert, open free to the public, is sponsored by the University Summer Session in cooperation with the department of concerts and lectures.

Beers, the grandson of a champion fiddler in New Freedom, Wis., is a music graduate of Northwestern University and a trained violinist. He and his wife, Evelyne, a soprano, include old ballads, reels, ditties, jigs and riddle songs in their song bag.

A variety of unusual instruments are used for accompaniment by the duo. They play the psaltery, dulcimer, fiddle, banjo, guitar and drums, and employ the instruments in unique ways.

The Beers have appeared on the "Today" and "Tonight" network television shows and have recorded eight albums of folk music.

MUSIC 60 TO BE TAUGHT
AGAIN AT 'U' THIS SUMMER

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
JUNE 13, 1968

(FOR IMMEDIATE RELEASE)

For further information, contact:
LYNN MARASCO, 373-2126

Once again, Music 60 will be taking music lovers "Behind the Sound" with the Minneapolis Symphony Orchestra during Summer Session at the University of Minnesota.

Classes will start Monday (June 17) and will be held at 6:30 p.m. every Monday and Thursday through July 18.

The course consists of a series of lectures by George Trautwein, associate conductor of the symphony, Arnold Caswell, University professor of music education, and Paul Fetler, composer and University professor of music, and demonstrations by the symphony, soloists, and the Contemporary Dance Playhouse.

Main topics to be covered by the lectures and demonstrations are symphonic music, chamber music, and music for the dance.

The course is open to anyone who likes music and wishes to understand it better. This summer's course will not repeat the works studied in previous years, so anyone who has enjoyed the course in the past may want to take it again.

The schedule for 1968 Music 60 is:

- June 17 -- "How the Orchestra Grew," George Trautwein lecturing and conducting early baroque to late romantic.
- June 20 -- "The String Quartet," woodwind soloists and Arnold Caswell lecturing.
- June 24 -- "Music and the Dance," Contemporary Dance Playhouse and the symphony, Arnold Caswell lecturing.
- June 27 -- "Pop Music of Early Times," Early Music Consort and Musica Varia, Arnold Caswell lecturing.
- July 1 -- "Woodwind and Brass Chamber Music," Arnold Caswell lecturing.
- July 4 -- holiday
- July 8 -- "Musical Form," selected high school students, soloists, the symphony, Richard Sieber conducting and Arnold Caswell lecturing.
- July 11 -- "Drums Away," Bartok concerto for two pianos and percussion, Arnold Caswell lecturing.
- July 15 -- "Twentieth Century Orchestral Innovations," Paul Fetler lecturing and conducting his newest symphony.
- July 18 -- examination

There is a \$25 tuition fee for the course. It may be taken for two credits or audited. An auditor attends all of the lecture-demonstrations but is not required to take the final examination. Registration information is available at 373-2925.

NATION'S HEALTH
TO BE EXAMINED
IN 'U' LECTURE SERIES

(FOR IMMEDIATE RELEASE)

UNIVERSITY OF MINNESOTA
NEWS SERVICE-220 MORRILL HALL
MINNEAPOLIS, MINNESOTA 55455
JUNE 13, 1968

For further information, contact:
ROBERT LEE, 373-5830

This country's health care system will be critically examined this summer by a series of national speakers at the University of Minnesota Health Sciences Center.

Health professionals from Twin Cities hospitals and state agencies have been invited by University Hospitals to attend the lectures.

According to John Westerman, hospitals director, "The Health of the Nation series is another example of the Hospitals' responsibility to the health professionals of the region.

"Never in the history of the health field has there been so much attention focused on the health care system of the country. Governmental commissions, health educators, consumers' representatives, and health writers have flooded the market with findings and facts, recommendations and righteousness, information and indignation, and programs and proposals.

"The University is providing a first-hand opportunity to hear some of the gifted people who have participated in this effort."

University Hospitals is sponsoring the series along with St. Paul-Ramsey and Miller Hospitals in St. Paul, and Hennepin County General, Mount Sinai, and the Veterans Administration Hospital in Minneapolis, local members of the Council of Teaching Hospitals of the American Association of Medical Colleges.

Among the authorities scheduled to speak are John Barr, chairman of the Health, Education and Welfare Department Secretary's Advisory Committee on Hospital Effectiveness; Walter J. McNerney, president of the Blue Cross Association; and Mrs. Ann R. Somers, co-author of a recent book criticizing the Medicare system.

The complete schedule:

July 5 -- Dr. Raymond D. Pruitt, director of the Mayo Graduate School of Medicine, "The Teaching Hospital."

(MORE)

July 12 -- Dr. Richard M. Magraw, assistant director for extramural relations for the U. S. Public Health Service's bureau of health services, "Medicine and Society: Professional Roles in Retrospect and Prospect."

July 19 -- Walter J. McNerney, president of the Blue Cross Association, "The Organization and Financing of Health Services."

July 26 -- Dr. Robert L. Berg, professor and chairman of the department of preventive medicine and community health, University of Rochester, N. Y., "Priorities in Health Care."

Aug. 2 -- Mrs. Ann R. Somers, research associate, industrial relations section, Princeton University, "Community Areawide Health Planning."

Aug. 9 -- Mrs. Rosemary Stevens, research associate, health care research division, Brookings Institute, Washington, D. C., "Medical Specialization and Public Policy."

Aug. 23 -- Dr. Vernon Wilson, executive director of health affairs, University of Missouri, "Future Patterns in the Provision of Health Care."

Aug. 30 -- John Barr, dean of the Graduate School of Business, Northwestern University, "Report of the Secretary's Advisory Committee on Hospital Effectiveness."

Sept. 6 -- Dr. James G. Haughton, first deputy administrator, Health Services Administration, New York City, "Can the Poor Use the Present Health Care System?"

Sept. 13 -- Dr. John G. Freyman, general director, Boston Hospital for Women, "The Role of the Affiliated Community Hospital in a University Teaching Program."

COMIC SKETCHES
TO BE PRESENTED
BY DRAMA DUO

(FOR IMMEDIATE RELEASE)

"Scenes Along the Cynic Route: A Hodgepodge of Hilarity" will be presented by the Drama Duo, Bob and Nancy Leonard, at 8 p.m. Tuesday, June 25, in Northrop auditorium on the University of Minnesota's Minneapolis campus.

The Leonards will present scenes and sketches from classic and contemporary comedies in the free public program sponsored by the University of Minnesota Summer Session under the direction of the department of concerts and lectures.

Mrs. Leonard won the Sarah Siddons scholarship to Chicago's Goodman Theatre in 1960 and played Mrs. Winemiller in the world premiere of Williams' "Eccentricities of a Nightingale." Leonard graduated from the Pittsburgh Playhouse School of Drama and has worked at the Goodman Theatre. Married in 1962, the Leonards wrote and produced "A Portrait of Joan of Arc" which they presented 600 times on a national tour.

During the last year Leonard directed "Dark of the Moon" and "Skin of Our Teeth" at Purdue University.

Following their current summer tour, the Leonards will join the resident company at the Alley Theatre in Houston, Texas.

1969 LEGISLATIVE ISSUES WILL
BE DISCUSSED AT 'U' WORKSHOPS

(FOR IMMEDIATE RELEASE)

Major issues facing the 1969 Minnesota Legislature will be discussed at this year's workshop on Minnesota government and politics at the University of Minnesota.

Five sessions will be held on successive Wednesday afternoons, starting next Wednesday (June 19), at 1:30 p.m. in 270 Anderson hall on the West Bank of the University's Minneapolis campus. They are open to anyone who is interested in Minnesota public affairs.

Each session will begin with a background lecture by the chairman. A panel of four experts will give their views and the audience will then be invited to participate.

Wednesday's session -- entitled "Modernizing State Government" -- will be highlighted by an opening address by Governor Harold LeVander. George Warp, director of the University's Public Administration Center, will be chairman of the session and is general chairman of the series.

Following sessions will be:

June 26, "Crime and Law Enforcement," David Ward, associate professor of sociology, chairman, with Douglas Head, Minnesota attorney general, and Theatrice Williams, director of the Phyllis Wheatley Settlement House, as two of the panel members;

(MORE)

July 3, "Education -- The Domian Report," Otto E. Domian, director of the Bureau of Field Studies and Surveys in the College of Education, chairman, with Duane J. Mattheis, Minnesota commissioner of education, as a panel member;

July 10, "Control of the Environment," Professor Richard Bond, director of environmental health, School of Public Health, chairman;

July 17, "Urban Problems," James Hetland, Jr., professor of law and chairman of the Metropolitan Council, chairman.

Graduate students who wish to receive credit may register for Public Administration 214: Current Issues of Public Administration and Political Development in Minnesota, a regular University Summer Session course. They will attend Thursday seminars in addition to the Wednesday sessions.

The workshop is sponsored by the University General Extension Division's department of conferences and institutes, the Public Administration Center, and the summer session.

There is a \$2 charge for each session, or \$7.50 for all five. Registration information is available at 373-3151 and tickets will also be available at the door.

'U' EDUCATORS
COOPERATE WITH
AREA SCHOOLS

(FOR RELEASE: Thursday, June 20, 1968)

Cooperative efforts between the University of Minnesota College of Education and the elementary and secondary schools of the Twin Cities metropolitan area are increasing.

A report issued today (Thursday, June 20) by the dean's office in the College of Education details some 70 cooperative projects in educational research, curriculum development and the preparation of all types of educational personnel.

While many of these projects have been developed within the last three years, a number have been in operation for longer periods.

"This is a specific application of the 'communiversity' concept," said Stanley B. Kegler, associate dean of education.

"Community problems often -- almost invariably -- center around the local schools, their problems and their potential. We believe we can best solve these problems by applying the resources of the University and by working with the schools as full partners in the process of teacher education. The schools have much to offer us in the way of practical situations where teachers can be prepared to meet real problems," Dean Kegler said.

Some of the newer programs described in the report are the following:

1) Marshall-University High School -- a joint effort of the Minneapolis Public Schools and the University of Minnesota, will open in September utilizing staff and facilities of the former University and Marshall High Schools.

(MORE)

2) Minnesota Center for Curriculum Studies -- established in 1966, for the purpose of liaison and cooperative curriculum development efforts among subject matter specialists, teacher education personnel and elementary classroom teachers.

3) Bureau of Field Studies and Surveys -- annually conducts some 20 studies on school district reorganization, curricular programs, facilities and building programs, administrative structure and educational finance. The most recent comprehensive study was "Education, 1967," also known as the "Domian Report," which was conducted for the Minnesota Department of Education in 1967.

4) Carnegie Pilot Program for Student Teaching in English -- student teachers are placed with Minneapolis cooperating teachers and supervised by senior faculty members of the public schools. The main objective of the program is to search out the possibilities of a new pattern for the preparation of teachers, better utilizing public school personnel.

5) Urban Areas Student Teaching Project -- University of Minnesota student teachers are placed in inner city schools in St. Paul and Minneapolis.

6) The Triple T Project -- a program currently being planned under the Education Professions Development Act, in which 20 public school personnel and 20 college faculty members will participate in a long-term internship program in Minneapolis and St. Paul Schools, aimed at improving programs that prepare teachers for central city schools.

7) University of Minnesota Training Center for Community Programs -- Education 90 Project: University students are bussed to inner city schools where they meet with teachers, parents and students.

ASIAN FILMS
TO BE SHOWN AT 'U'

Three Asian films will be shown at 8 p.m. Thursday (June 20) in Murphy hall auditorium at the University of Minnesota.

"Tagore," the career of Rabindranath Tagore -- writer, musician, poet and educator; "The Buddha," the life of the Buddha as depicted in the sculpture of the Borodudur temple in Java, and "Glory of Pratishtan," featuring the folk art of the Godavari region in South India, will be shown free to the public sponsored by the University's South Asia Center.

FILMS ON PREJUDICE
TO BE SHOWN AT 'U'

A film program on the theme of prejudice is being presented at the University of Minnesota this summer by the Summer Session and the Audio-Visual Education Service.

A film will be shown free every Wednesday in Nicholson auditorium at 12:20 p.m. beginning today (June 19). Today's film is "Raisin in the Sun." Films to follow will be "Crisis in Levittown" (July 10), "Sixteen in Webster Groves" (July 24) and "A Time for Burning" (July 31). All showings are open free to the public.

SUMMER SESSION STUDENTS
TO BE GUESTS OF SYMPHONY

University of Minnesota summer session students will be admitted free to a series of Friday evening concerts to be given by the Minneapolis Symphony Orchestra. The symphony will perform at 7:30 p.m. in Northrop auditorium Friday evenings, June 21-July 26. Tickets for the public will be available at the door for \$1.

This Friday's program will include Gershwin's "Porgy and Bess" and Tchaikovsky's "Caprizio Italiano." A dance on Northrop plaza will follow the concert.

WILLEY TO TEACH NEXT YEAR
AT MARYVILLE COLLEGE

Malcolm Willey, former University of Minnesota vice president for academic administration, has been appointed visiting professor of sociology at Maryville College, Maryville, Tenn., for the 1968-69 academic year.

Willey came to the University in 1927 as an associate professor of sociology and later became a full professor and acting chairman of the sociology department. He was for many years assistant to the president and University dean, and in 1943, became vice president for academic administration.

For the past five years he has been an educational consultant for the Ford Foundation at the University of Calcutta in India.

DR. JAMES HOUSE
RECEIVES HONOR

Dr. James House, senior resident in orthopedics at the University of Minnesota Health Sciences Center, has been honored by the American Orthopedic Association.

Dr. House, 530 Ryan Av. W., St. Paul, was one of five orthopedic senior residents in the country to receive an expense-paid trip to the group's recent meeting in Florida.

In July, Dr. House will become an instructor in the departments of anatomy and orthopedics at Minnesota.

FORMER 'U' PROF
HONORED AT SCRIPPS

Ralph Ross, professor of philosophy at Scripps College in Claremont, Calif. and former professor of philosophy and humanities and chairman of the humanities program at the University of Minnesota, has been appointed Hartley Burr Alexander Professor of Humanities at Scripps College, beginning in the 1968-69 academic year.

Ross is the author of "Symbols and Civilization," "Scepticism and Dogma" and "The Nature of Communism." He received the Distinguished Teacher Award at Minnesota in 1963.

WILD FARCE
TO OPEN SEASON
FOR 'U' THEATRE

(FOR IMMEDIATE RELEASE)

"A Flea In Her Ear," a wild comedy by Georges Feydeau, will be the first play in the University of Minnesota Theatre's 1968-69 Scott hall series.

The play, with an intricate plot based on mistaken identity, will be presented, Nov. 1-10, under the direction of Lee Adey, associate professor of speech, communication and theatre arts.

The 1968-69 season, announced this week by Frank M Whiting, director of the University Theatre, will also include a Shakespeare history, a comic opera, a contemporary drama and an historical chronicle.

"A Man for All Seasons," written by Robert Bolt and directed by Theodore Herstand, associate professor of speech, communication and theatre arts, will play, Nov. 22-Dec. 1. The movie "A Man for All Seasons," which deals with the life of Sir Thomas More, received an Academy Award in 1967.

"Henry IV, Part I" by William Shakespeare will run, Jan. 31-Feb. 9. Kenneth Graham, chairman of the University department of speech, communication and theatre arts, will direct the Scott hall production.

Robert Moulton, professor of speech, communication and theatre arts, will direct "Beggar's Opera" by John Gay to be presented, Feb. 21-March 2.

The Tennessee Williams drama "Camino Real," will be presented, April 18-27, under the direction of Charles Nolte, assistant professor of speech, communication and theatre arts.

Season tickets for the Scott hall series go on sale, Sept. 15, at the University Theatre Ticket office in Scott Hall.

'U' TO OFFER
ARCHEOLOGICAL
TRAINEESHIPS

(FOR IMMEDIATE RELEASE)

The University of Minnesota, with 18 other American and Canadian colleges and universities, will participate in a \$1.5 million Ford Foundation program to train doctoral students in archeology at excavation sites throughout the world.

Because few excavation projects can afford the training expenses of a significant number of students, the problem of providing graduate students with needed field training in distant lands is critical, said W. McNeil Lowry, vice president of the Ford Foundation's Division of Humanities and the Arts.

The graduate traineeships, to be offered over a five-year period, will pay students' transportation and living expenses at sites in Europe, Africa, the Middle East, Southeast Asia and Latin America. Each institution will be responsible for allocating the traineeships at its own excavations but will make traineeships available to qualified students from other institutions. Inquiries about a particular excavation should be addressed to the institution sponsoring it.

The University of Minnesota sponsors excavations in Guatemala, Yugoslavia and Greece. Apply to Ford Foundation Traineeships in Archeological Excavation, Selection Committee, 208 Johnston hall.

WOMEN TO DISCUSS
RETURN TO SCHOOL
AT 'U' SEMINAR

(FOR IMMEDIATE RELEASE)

A special seminar for women who have given some thought to returning to school but are unsure of their interests and capabilities will be given by the University of Minnesota's program in continuing education for women starting Tuesday, July 9.

The purpose of the seminar is to assist the participants in making plans for their educational future through interest, personality and verbal ability tests, and through discussions with Vera Schletzer, director of counseling in the University's General Extension Division and leader of the seminar.

The seminar will consist of these sessions, all to be held in Coffman Union on the University's Minneapolis campus:

Tuesday, July 9 -- 9:30 a.m. to 12 noon and 1 to 2:30 p.m. -- "The Changing Scene"

Thursday, July 11 -- 9:30 a.m. to 12 noon -- "The Social Climate"

Tuesday, July 16 -- 9:30 a.m. to 12 noon -- "Family Roles and Career Requirements"

Friday, July 19 -- 9:30 a.m. to 12 noon -- "Directions for the Future"

Textbook for the seminar is "Choice and Challenge for the American Woman."

It is hoped that the seminar will be the first step back to education for the participants, said Mrs. Schletzer. She pointed out that the time is ideal for making plans for the fall.

Tuition for the seminar is \$30, which includes the fee for testing. Enrollment will be limited to approximately 25 participants.

For registration information contact Women's Continuing Education, 310 Nolte Center, University of Minnesota, Minneapolis, Minn. 55455 or telephone 373-5166.

'U' PROF RECEIVES
MS RESEARCH GRANT

Dr. Milton Alter, associate professor of neurology at the University of Minnesota, has received a \$21,960 research grant from the National Multiple Sclerosis (MS) Society.

Dr. Alter will spend a year in Mexico City studying some 75,000 government employees and their families. Based on a 10-year study of MS patients in Israel, he has tentatively concluded that some environmental factor helps determine the frequency with which MS appears.

'U' PROF RECEIVES
GUGGENHEIN FELLOWSHIP

Benjamin Liu, associate professor of mechanical engineering at the University of Minnesota, has received a Guggenheim Fellowship for 1968.

Liu, a graduate of the University of Nebraska, received his doctor of philosophy degree at Minnesota in 1960 and joined the faculty the same year. His research activities have been primarily in the fields of fine particle technology, aerosol physics and terrestrial and space applications of solar energy.

SPEECH ASSOCIATION
HONORS BROWNE

Don R. Browne, associate professor of speech, communication and theatre arts at the University of Minnesota, has been named one of six outstanding young teachers in speech education by the Central State Speech Association.

Browne, who teaches graduate and undergraduate courses in radio and television, joined the Minnesota faculty in 1966. He formerly was on the faculty at Purdue University and Boston University.

MEMORY EXPERT
TO SPEAK AT 'U'

Irv Wermont, a memory expert, will present a lecture-demonstration at 8 p.m. Tuesday, July 2, in Northrop auditorium at the University of Minnesota.

Extrasensory perception, mental telepathy and thought projection will be demonstrated by Wermont, a graduate of Northeastern University School of Law, who now works as a public relations director for a New England firm.

Wermont is the author of "Here's How To Remember." His appearance is sponsored by the University Summer Session under the direction of the department of concerts and lectures.

SPANISH GUITARIST
TO PLAY WEDNESDAY

Spanish guitarist Arnold Lackram will perform at the University of Minnesota Wednesday (June 26). He will be heard in Coffman Union main lounge at 11:30 a.m. and 12:30 p.m.

Lackram will play pieces from the classical composers such as Bach and Tarrega on the Spanish guitar and classical Flamenco selections. The concerts are free and open to the public.

SWANSON TO GIVE
MYTHOLOGY SEMINAR
FOR WOMEN AT 'U'

(FOR IMMEDIATE RELEASE)

Roy Swanson, former University of Minnesota professor of classics, will return to the University this summer to give a special seminar in mythology.

The seminar is presented by Women's Continuing Education, a part of the General Extension Division, and is open to all women.

There will be four sessions, July 15, 18, 22 and 25, from 9:30 a.m. to noon, all to be held in Coffman Union.

The first two sessions will be devoted to a survey of Greek mythology, to be followed by discussions of myth in ancient Greek and Latin literature and myth in 20th century literature.

Seminar participants will read materials on Greek mythology, Ovid's "Metamorphoses," and two contemporary novels.

Swanson gave a seminar for women on existentialism at the University last summer and later said he had found it one of his "most satisfying and enjoyable academic experiences." He is now a professor of classics and comparative literature at the University of Wisconsin at Milwaukee.

Tuition for the seminar is \$20. There will be a special rate for mothers and daughters who enroll together.

Registration information is available from Women's Continuing Education, 310 Nolte Center, University of Minnesota, Minneapolis, Minn. 55455. Telephone 373-5166.

U OF M SPONSORS
FIRST NATIONAL
STROKE CONFERENCE

(FOR IMMEDIATE RELEASE)

The first University of Minnesota Conference on Strokes is being presented by the neurology division of the University's Health Sciences Center today through Friday (June 24-28) at Ruttger's Pine Beach Lodge near Brainerd, Minn.

Dr. A. B. Baker, professor and director of the division, will host the meeting and report on the progress of the stroke intensive care unit at the center since it was established in March as the first such unit in the United States.

Dr. George C. Flora, associate professor of neurology, explained that the conference will introduce the physicians to the newest methods in stroke care.

The 35 participants include representatives from the newly formed Regional Medical Programs of the National Institute of Health and cerebrovascular research directors from universities throughout the country.

(FOR IMMEDIATE RELEASE)

The University of Minnesota is hosting the 1968 Annual Summer Course in College Unions Sunday through Friday, (June 23-28). The course is being presented in cooperation with the Professional Development Committee of the Association of College Unions International (ACU-I).

Coffman Memorial Union, the new West Bank Union and the St. Paul Student Center are among the facilities being utilized. In addition, course participants will visit unions at five private colleges and universities in the area.

According to Gordon L. Starr, director of planning in the department of University Student Unions and summer course director, the course is designed to provide participants with a core program including up-to-date knowledge of all areas of college union administration and programming. The course features talks by authorities in their fields, laboratory experiences and the opportunity to discuss and exchange information. The curriculum includes trends in college unions and student life, management and operation problems, program techniques and resources, food and auxiliary services, financing and building plans.

Some highlights of the program will be -- June 25: Walter E. Kaul of civil service personnel on union staff, "After They're Hired -- What?"; Professor Clyde A. Parker, director of counselor education, "Making Out in the Living Room"; William S. Howell, professor of speech, communications and theatre arts, "Winning Willing Participation Through Effective Communication" -- June 26: "Building the Building" by Gordon L. Starr -- June 28: "The College Union -- A Model for Student Power" by Ed Siggelkow, director of Coffman Memorial Union and president of the ACU-I; and "The Faculty, the Curriculum and the Union" with a faculty panel including Paul Cashman, who will become University vice president for student affairs July 1; Norman Kerr, assistant dean of biological sciences; Samuel H. Popper, professor of educational administration, and Frank M Whiting, director of the University Theatre.

CUHCC PROVIDES
COMPLETE CARE
FOR IMPOVERISHED

(FOR IMMEDIATE RELEASE)

The 82 year-old apartment building may look drab and grey on the outside, but to approximately 1,500 children from some 500 families in an impoverished Minneapolis area, the building has a transplanted heart of gold. The Community University Health Care Center (CUHCC), within its walls, provides the surrounding community with sorely needed health treatment and preventive care.

The center's four-story building sits half a block south of Franklin Av. on 16th Av. S. at the approximate geographical center of an area defined as impoverished by the City of Minneapolis. Its halls echo with the sounds of Negro, Indian and white children awaiting or receiving health care treatment. The staff of nurses and University of Minnesota professional specialists serve what is thought by some to be the largest Indian population in the country. Up to 9,000 Indians live in the area at certain times during the year.

Children from area families with a limited income (i.e. \$5,100 for a family of four) are eligible for care at the CUHCC. An integrated team of nurses and specialists currently treats or supervises the health of approximately one-half of the children eligible for complete health care. It is hoped that this teamwork will eradicate the significant lack of medical and dental care uncovered in the area's children in a 1966 survey. A concerted effort is being made by the center to treat medical ailments and social-psychological ills together -- that is, to attack the problems of overall health and not just medical ailments, according to the project director, Dr. Edward Defoe.

(MORE)

The CUHCC is a pilot project with many interdependent functions for those involved. For the federal agency that supplies 75 per cent of the supporting funds, the center is just one of more than 50 pilot health care centers across the country, all of them different and all treating only children in poverty areas.

For the City of Minneapolis, it is an outpost for a Public Health Department nursing substation (located on the fourth floor) and a potential means for solving many medical and social problems and thus indirectly saving taxpayers' money that otherwise would be spent in other municipal programs, particularly the school systems.

For the many welfare agencies serving the area, CUHCC provides a focal point for their many and diverse resources.

For the University of Minnesota, the center provides a real-life training opportunity for its students and a veritable gold mine of experience and data on how to operate such a community health center and coordinate the various disciplines for maximum efficiency. Minneapolis, the welfare agencies and the University supply matching funds and a portion of staff salaries.

Of course, for the residents of the community, the Community University Health Care Center means peace of mind and body knowing that the care is available for their children.

The interdisciplinary approach of the center focuses on health, as opposed to merely medical and dental problems. A coordinated staff of professionals includes University specialists from the pediatrics department, the School of Dentistry, the School of Social Work, the psychology department, the School of Nursing, and the School of Public Health, the division of audiology and speech, plus medical students and volunteers from the community and the University.

Children brought in for treatment of a particular ailment are treated and then put through an all-purpose screening process by a team of health specialists. Medical, social and psychological problems are identified and treated. Those

(MORE)

patients who pass the screening with no need for care and those already treated are then placed under preventive care supervision that includes intermittent checkups followed by necessary attention. Children needing hospital care are sent to the neighboring Fairview and St. Mary's hospitals; there they remain under the supervision of their center doctor to insure personal and continuous attention.

Dr. Defoe, an associate professor of pediatrics at the University, says that the nurse has been given the primary coordinating and liaison role between the patient (and family) and the specialist staff. This redefinition of roles gives the nursing staff the long-term supervisory role. Medical care is available through staff physicians on a 24-hour-a-day, 7-day-a-week basis.

The teamwork approach, along with the redefined nurses' role, allows the doctor to concentrate on his specialty and interest, medicine. The system also attempts to counteract what the Federal Health and Manpower Commission has defined as our current health care system -- "more a collection of bits and pieces with overlapping duplication, great gaps, high costs, and wasted effort." Thus the center may have very positive consequences for health care in all areas: rural, urban, and suburban; rich, middle-class, and poverty-bound.

Current support funds limit the center's services to children but Defoe hopes that the total family will eventually be included in the program. Current operations are somewhat inefficient, according to Defoe. The major reason for this inefficiency is the relative ignorance of modern medicine about the procedures for running and coordinating such community health organizations. But the CUHCC plans operational changes this summer and expects continuing changes in the future.

The Community University Health Care Center was activated in mid-1966 but the building was not occupied for patient care until February, 1967. The first floor of the center houses the waiting room, interview rooms and the business and secretarial offices. The second floor is occupied by the dental suite, six medical examining rooms for children, a nurse station and a small treatment and laboratory

(MORE)

facility. The third floor contains the two psychologists' offices and evaluation area, audiology and speech, social work and staff and student office space. The fourth floor is occupied by a Public Health Nursing substation from the Minneapolis Public Health Department, a meeting room and library-multi-purpose. The Public Health Nursing substation is staffed by 12 full-time public health nurses from Minneapolis.

The nurse, in her new role, seems to have captured the confidence of the children and their families, Defoe says. And as the operation evolves, the University is involving more and more students (the potential community health care specialists of the future). Beginning last summer, for example, University pediatric residents began two-month rotations through the clinic. Graduate students in clinical child psychology, speech pathology and dentistry are also working at the center.

The Community University Health Care Center is primarily a service to the community, an example of how the University of Minnesota is sharing its resources and knowledge with the people of the state. And, just as important, the CUHCC is a vital training ground that already is providing important information for the design of future health care operations in Minnesota and nationally.

Defoe personally thinks that the interdisciplinary teamwork will provide the key to efficient health care for the future. And because of its efficiency, it will cost less, on the average, for better and more complete health care. People will go to such centers for a complete health check-up and treatment (there will be no need to dash in three directions for medical, dental, and social-psychological help); physicians and other health specialists will be used more efficiently, and national health problems will be attacked on an overall basis.

MINING SIMULATOR
ELIMINATES YEARS
OF UNDERGROUND WORK

(FOR IMMEDIATE RELEASE)

Long years spent in underground mining planning may be saved by a big, 7 foot by 11 foot, electrical gadget. Its face covered with 1500 telephone jacks, the instrument simulates a plan or top view of an underground tabular ore deposit.

The "Mine Stress and Convergence Analog" computer, as the instrument is called, was demonstrated in June at a Rock Mechanics Short Course conducted in cooperation with the department of conferences and institutes, General Extension Division, at the University of Minnesota.

"A whole range of possibilities, in planning the layout and sequence of an underground mine, which ordinarily would take years of actual excavation work, can now be explored in a few minutes through simulation with the mine stress and convergence analog," Professor Neville Cook of South Africa, a recent guest lecturer at the University, explained in demonstrating the device.

The first prototype of the simulator, or analog, built by Cook at the Mining Research Laboratory of the South African Chamber of Mines, is now being used to plan many major gold mines in South Africa.

A "more sophisticated model," built under the direction of Associate Professor David Lacabanne of the School of Mineral and Metallurgical Engineering at the University, was demonstrated at the short course. This model -- still being modified and improved -- is the only one of its kind presently in the United States.

(MORE)

Each jack on the face of the instrument represents an underground area or block of earth. When the jack is pulled out, this is equivalent to having "mined out" or removed all the earth from that area.

"Changes in current and voltage which then take place simulate the changes in underground stress and convergence of openings," Professor Charles Fairhurst, director of various rock mechanics research programs and acting head of the School of Mineral and Metallurgical Engineering explained.

"Experience with a certain type of mining problem is thus gained before mining begins. Alternative answers to various mining approaches which an engineer might be planning to use are provided in advance, forcing him to examine his reasons for any given approach.

The most basic design problem in underground excavation -- how to extract as much ore as possible, yet leave enough orebody to prevent collapse before mining can be completed -- is simplified considerably, if not pre-solved, with this computer method.

The more often these computer results are compared with underground observations, the more useful the computer will become in actually predicting and planning what will happen in mining.

"How High-Speed Computers Advance Design of Practical Mine Pillar Systems," a technical paper by Professor Fairhurst and Assistant Professor A. M. Starfield of the University, was published in the May 1968 "Engineering and Mining Journal." The paper presents a full theoretical discussion of the mine stress and convergence analog as well as the use of computer techniques in mining.

'U' TO OFFER
SPECIAL COURSE IN
NEIGHBORHOOD COMMUNICATION

(FOR IMMEDIATE RELEASE)

More effective participation in neighborhood groups through better communication among individuals is the goal of a special University of Minnesota course to be offered this summer.

Minneapolis inner city residents will participate in the course, to be held Friday evenings, July 12-Aug. 16, at MacPhail Center in downtown Minneapolis.

John Geier, director of communication and behavioral sciences in the University's School of Dentistry, and Q. T. Smith, director of communication at St. Paul-Ramsey Hospital, will teach the course.

Geier described the course as being primarily concerned with practical matters and minimally devoted to theory.

The course will begin with general sessions on the principles of interpersonal communication and skills sessions with case studies and role playing, Geier said. The participants will then be divided into small permanent groups through which they will study the processes and results of group interaction. Geier described this procedure as basically a sensitivity training approach.

Reactions to a similar course given last year showed that the participants had increased in awareness of themselves and of how they were communicating their ideas to others, Geier said.

Tuition and materials will be paid for under Title I of the Higher Education Act of 1965, so there will be no cost to participants.

The course was organized by the University General Extension Division's department of special courses.

UNIVERSITY OF MINNESOTA EVENTS

(FOR IMMEDIATE RELEASE)

GRAPHIC ARTS EXHIBIT
TO OPEN IN 'U' GALLERY

Works by leading graphic artists of the United States and Europe will be displayed in the University of Minnesota Gallery, July 3-31.

The collection of the International Graphic Arts Society includes selections ranging from realistic and traditional to abstract and expressionist forms and represents the current trends in the field of graphic arts.

There will be a public opening from 7 to 9 p.m. Wednesday (July 3) in the gallery on the third floor of Northrop auditorium. The gallery is regularly open from 8:30 a.m. to 4 p.m., Monday through Friday, and from 2 to 5 p.m. Sunday.

SECOND PIANO TRIO RECITAL
TO BE GIVEN AT 'U' MONDAY

The second of two piano trio recitals by Isidor Saslav, Minneapolis Symphony Orchestra concertmaster, his wife Ann, a concert pianist, and Robert Jamieson, the symphony's principal cellist, will be given Monday (July 1) in the Museum of Natural History auditorium. Tickets are \$1.50.

The program includes Beethoven's "Trio No. 6 in E Flat Major," Bloch's "Three Nocturnes" and Mendelssohn's "Trio No. 1 in D Minor."
