PORTER PRUNERS

PORTER POINTCUT

Power, speed and clean cutting make this a fine orchard tool. Cuts up to 1 1/4" green wood. Fast cutting on sprout and sucker growth at the point. Both sharp edges cut without stripping bark or crushing fibers. A precision tool made to give long service.

PORTER GOOSENECK

Narrow head—slender, gooseneck—the smartest thing in the grove—a pruner built for fast work in citrus, peach and pecan trees, light action, two sharp blades cut without damaging bark or crushing fibers.

PORTER TWIN-CUT No. 9 PROFESSIONAL

One hand pruner. It feels right in the hand—it cuts at the point, which means ease and speed. Both blades sharp. Wide blade opening with minimum handle opening. Precision built. All parts drop forged and interchangeable.

PORTER FORESTER

For heavy brush cutting most of the year. For general pruning in season. No. 3 size easily cuts 2" greenwood stumps flat and close to ground, without damaging or stripping down bark.

Send for illustrated folder describing the patented 3-Power Slot. Also Pole Pruners.

FEATURES

1. Clean Cutting
2. Close Cutting
3. Easy Working
4. Most Powerful

PROTECT YOUR TREES with this complete line of Pruning Tools

LATHAM RED RASPBERRY

By **W. G. BRIERLEY**
University of Minnesota

WHEN fruit breeding was begun at the University of Minnesota Fruit Breeding Farm in 1908, raspberry improvement was one of the first objectives. Among the many crosses made were some between the old varieties, King and Loudon. A number of promising seedlings arising from this cross were selected and propagated at the farm. One of these seedlings, however, was outstanding because of vigor of plant, heavy yield, and size of berry. It was given the temporary identification of Minnesota No. 4 and in 1914 was sent out to growers and other experiment stations for testing. It so quickly proved

of value in commercial plantings that on March 6, 1920, it was formally named Latham in honor of the late A. W. Latham who for many years was secretary of the Minnesota State Horticultural Society.

During the thirty odd years since the Latham was first sent out for testing, it has become one of the leading late varieties in commercial plantings over the country. In Minnesota it is by far the foremost variety in commercial fields, and nurseries in the "home" state produce plants in great numbers for sale throughout all raspberry areas in the country.

The Latham has been used extensively in further breeding work at Minnesota and at other stations. Its offspring, produced either by selfing or crossing with other varieties, include Chief, produced at Minnesota, Sunrise, an introduction by the U.S. Department of Agriculture, and Tahoma, a production from the Western Washington station.

ONE OF A SERIES OF REASONS FOR

Emlong's Superiority

NO. 5 FACILITIES TO ASSURE DELIVERY OF QUALITY

Here is the final step which assures you of receiving Emlong and ship your order. stock at its peak of quality. Our modern storage and packing plant is manned by experts who have at their finger tips all of the mechanical facilities necessary, plus the experience

Proper storage of stock, correct timing of shipments to arrive at best growing time and careful packing, all play their part to assure you success with Emlong's Pride-O-Mich stock.
