SEPTEMBER, 1929

No. 1

ANALYTIC INDEX OF THE UNITED STATES DEPARTMENT OF AGRICULTURE YEARBOOK FOR 1928

Copyrighted by V. E. Nylin

The readers of the Visitor are again under obligation to Mr. V. E. Nylin of our faculty for a complete analytic index of the United States Department of Agriculture Yearbook for 1928. The regular readers of the Visitor will recall that Mr. Nylin prepared for the Visitor in the winter of 1926-27 a complete analysis or bibliography of the yearbooks of the United States Department of Agriculture from 1901 to 1925, inclusive. In February, 1928, he prepared for the Visitor of that month a similar analysis of the yearbook of 1926. In September, 1928, he prepared a like analysis for the yearbook of 1927. This (September, 1929) issue of the Visitor contains his analysis of the contents of the United States Department of Agriculture yearbook for 1928. We feel sure that readers of the Visitor, particularly those who are teaching agriculture, will value highly this service which Mr. Nylin has rendered. There is much valuable material in these yearbooks. Doubtless this material would be more generously used if those who possess the yearbook had an analytic index such as Mr. Nylin has produced.

Persons quoting from the references found herein should precede the figures of the year with the word "yearbook" to avoid confusion.

Mr. Nylin or the Visitor will appreciate receiving any corrections of this index or suggestions for its improvement.

A. V. S.

ANIMAL HUSBANDRY

General—

- Animal Husbandry Research Yields Dividends to All. E. W. Sheets. p. 125.
Avocado Culls May Prove Source of Oil and Livestock Feed. G. S. Jamieson. p. 134.
Beef Graming and Stamping Protects Consumer's Interest. W. C. Davis. p. 144.
Cod-Liver Oil in Feeds Requires Care to Preserve Vitamin. E. M. Nelson. p. 204.
Douglas Fir Cut-Over Land's Fire Hazard is Minimized by Grazing. D. C. Ingram. p. 260.
Feeds Commercially Produced Have Wide Distribution in U. S. Floyd J. Hosking. p. 286.
Hides and Skins to be Classed and Graded Under U. S. Standards. M. C. Romberger. p. 356.
Livestock Betterment Registers Advancement Throughout the World. D. S. Burch. p. 420.
Livestock Co-operative Association Efficient Intensive Study Shows. Kelsey B. Gardner. p. 422.
Livestock Farmers Can Obtain Better Profits with Better Husbandry. William Jackson. p. 423.
Livestock Feeder Who Knows Feed Nutrients Can Cut Down Costs. Arthur T. Semple. p. 426.
Livestock Improvement Can be Accomplished by Selective Breeding. Hugh C. McPhee. p. 428.
Livestock Improvement Greatly Influenced by Educational Exhibits. R. S. Allen. p. 430.
Livestock Weighed Under Improved Conditions at Many Public Stockyards. C. A. Briggs. p. 434.
Meat Handling Needs to be Safeguarded by Constant Cleanliness. A. J. Pistor. p. 451.
Meat Labels Must Be Informative and Not False or Misleading. F. W. Meyst. p. 452.

Meat Market Reports Help Cattle Men to Suit Consumer Demand. B. F. McCarthy. p. 453.

Beef Cattle—

- Beef Steers Produced on Range Should Show Maximum Weight for Age. W. H. Black. p. 148.
Grazing Too Early in Season is Harmful to Livestock and Range. Arnold R. Standing and Ernest Winkler. p. 348.

Dairying—

- Butter Certified as to Quality Brings Profit, Pleases Buyer. Roy C. Potts. p. 175.
Dairy Cows Help in Developing Nevada Reclamation Project. L. E. Cline. p. 247.
Dairy Cows' Persistency in Production of Milk is Subject of Studies. M. H. Fohrman. p. 249.
Dairy Herd Improvement Associations Formed in All Leading Countries. Joseph B. Parker. p. 253.
Dairy Studies Show that Within Breeds the Bigger Cows Win. J. C. McDowell. p. 255.
Fly-Control Methods in Use at Beltsville. Can Be Used on All Dairy Farms. R. P. Hotis. p. 300.
Milk Stations for Cooling Product Help Maintain Its Quality. C. E. Clement. p. 462.

Horses—

- Horses of United States Supply Foreign Demand for Edible Horse Meat. R. P. Steddom. p. 374.

Poultry—

- Egg Standardization Facilitates Recognition of Quality in Prices. George H. Powers. p. 267.
Poultry Breeders Can Increase Profits by Controlling Production. M. A. Jull. p. 494.
Poultry (Dressed) Is Covered in Tentative Grades and Standards. Thomas W. Heitz. p. 496.

THE VISITOR

Published monthly by the Division of Agricultural Education, University of Minnesota, University Farm, St. Paul, Minn.

Entered as second class matter at the post-office at St. Paul, Minn., under the act of August 24, 1912.

Acceptance for mailing at special rate of postage provided for in section 1103, Act of October 3, 1917, authorized August 2, 1918.

THE STAFF

A. V. STORM	D. D. MAYNE
A. M. FIELD	F. W. LATHROP
L. E. JACKSON	V. E. NYLIN

Poultry (Dressed) Now Included in Federal Inspection Service. Rob R. Slocum. p. 498.
Poultry Need Protein for Their Best Growth. A. R. Lee. p. 500.
Poultry's Mineral Requirements Vary at Different Ages. H. W. Titus. p. 502.

Sheep—

Lambing Loss Declines in the National Forests as Shelter is Provided. J. H. Hatton. p. 409.
Lamb Twinning Can Be Increased by Extra Feed at Breeding Season. C. G. Potts. p. 411.
Sheep of the Columbia Type Well Adapted to Intermountain Region. J. M. Cooper. p. 540.
Wool Carelessly Packed Fails to Realize Its Full Value in Market. Russel L. Burrus and John P. Roberts. p. 629.
Wool Yields Can Be Increased by Rigid Culling and Selection. Mary J. Brandon. p. 630.

Swine—

Hog Profits Greatly Affected by Heavy Death Rate of Pigs. Oscar Steanson. p. 364.
Hog Profits Increased by Proper Selection of Foundation Animals. J. H. Zeller. p. 363.
Hogs Can Be Produced Profitably in Parts of Northern Great Plains. R. E. Hutton. p. 368.

Veterinary—

Cattle Grub Damage Reduced by Various Methods of Control. F. C. Bishopp. p. 181.
Cattle Malady Called John's Disease to be Fought Co-operatively. L. B. Ernest. p. 183.
Cattle Tick Passes from Oklahoma After Battle of 22 Years. L. J. Allen. p. 184.
Cattle Tuberculosis Reduced 50 per cent By Testing Campaign. A. E. Wight. p. 186.
Foot-and-Mouth Disease Eradication by Slaughter Proved Cheapest for U. S. H. W. Schoening. p. 308.
Fur Farmers Aided by Research in Combating Outbreaks of Disease. J. E. Shillinger. p. 341.
Hog-Cholera Losses Can Be Much Reduced by Sanitary Measures. U. G. Houck. p. 361.
Horse Malady Called Dourine Yielding to Eradication Program. F. L. Schneider and H. E. Kemper. p. 370.
Livestock Industry Suffers Heavy Loss by Abortion Disease. John R. Mohler. p. 433.
Nemas Carry Bacterial and Fungous Disease from Plant to Plant. G. Steiner. p. 477.
Tuberculosis of Fowls Can Be Eradicated by Using Simple Measures. Elmer Lash. p. 594.

BIBLIOGRAPHY

Bibliographical Aids to the Use of Recent Agricultural Bulletins. Claribel R. Barnett. p. 156.
Bulletins from U. S. and State Agencies Valued by Farmers. M. C. Wilson. p. 171.

Business Men Demand and Get Increasing Fund of Agricultural Information. C. B. Sherman. p. 174.
Economics Literature Monthly Review Aids the Extension Worker. Mary G. Lacy. p. 266.

BIOLOGY

Rat Control Aided by Development of Effective New Poisons. James Silver. p. 518.
Waterfowl Breeding a Necessary Adjunct to Protective Measures. W. S. McAtee. p. 601.
Wild Animals Affect Forest Production in Many Important Ways. W. B. Bell. p. 608.
Muskrat Farming in Marsh Areas Becomes a Profitable Industry. Frank G. Ashbrook. p. 469.

BREEDING—ANIMALS AND PLANTS

Corn Breeding for Resistance to Cold Yields Good Results. J. R. Holbert and W. R. Burlison. p. 227.

CHEMISTRY

Dust-Explosion Hazard Exists in Nearly All Manufacturing Plants. David J. Price. p. 263.
Dyes Important Both in Diagnosis and as Medicinal Agents. W. C. Holmes. p. 265.
Food Colors Certified by the Department are Both Harmless and Pure. H. T. Herrick. p. 302.
Food, Drug, Insecticide Administration Protects Farmers in Many Ways. George P. Larrick. p. 303.
Food Spoilage, Which Causes Heavy Losses, Due to Many Causes. C. A. Browne. p. 305.
Iodine Survey Planned in Studies of Minor Constituents of Food. E. T. Wherry. p. 394.
Labels on Packages of Foodstuffs Mean Much to Alert Buyer. Katherine A. Smith. p. 405.
Light Rays a Factor in Helping to Solve Many Farm Problems. C. H. Kunsman. p. 417.
in Quality. F. P. Veitch. p. 534.
Spray-Residue Removal by Mechanical Methods is Extensively Tested. Lon A. Hawrosin When Poorly Strained is Much Reduced. p. 553.

CROPS

General—

Color Measurement of Farm Products is a Factor in Grading. Dorothy Nickerson. p. 206.
Immigrant Plants Hold Large Place Among U. S. Crops. B. T. Galloway. p. 379.
Paper-Mulch Trials Center About Three Lines of Usefulness. L. H. Flint. p. 483.
Plant Immigrants Pass Numerous Tests Before Becoming Established. Knowles A. Ryerson. p. 490.
Seed Law Forbids the Interstate Shipment of Misbranded Seed. E. Brown. p. 538.
Seed Samples of Introduced Plants Make Big Collection. H. C. Skeels. p. 538.
Sweet Potatoes as Possible Source of Starch Investigated. H. S. Paine. p. 569.

Corn—

Broomcorn Harvesting at the Milk Stage Produces Best Brush. J. B. Sieglinger. p. 171.
Corn Breeding for Resistance to Cold Yields Good Results. J. R. Holbert and W. L. Burlison. p. 227.
Corn Plants Dying Early May Reveal Potash Lack in Soil. John F. Trost. p. 229.
Silo Filling Without a Man in the Silo Gives Good Results. T. E. Woodward. p. 541.

Cotton—

Cotton Classification Service is Maintained Under Standards Act. C. L. Finch. p. 233.

Cotton Progress in Irrigated Valleys a Community Problem. O. F. Cook. p. 240.

Flax—

Flax Resistant to Wilt Developed at Experiment Stations. A. C. Dillman. p. 296.

Forage—

Bermuda-Grass Pastures Can Be Made Profitable by the Proper Methods. H. N. Vinall and W. T. Cobb. p. 154.

Grain Sorghum—

Sorgo Known as Atlas Yields Well and Resists Lodging. John H. Parker. p. 551.

Legumes—

Alfalfa and Red-Clover Seed, If Imported are Colored Artificially. E. Brown. p. 122.

Alfalfa and Red Clover Yellowed by Leaf-hopper Attack. John Monteith, Jr., and E. A. Hollowell. p. 123.

Red Clover's Hairiness in American Types is Due to Leaf Hopper. A. J. Pieters. p. 521.

Red Clover Seed Production Depends on Many Factors. E. A. Hollowell. p. 524.

Sweet Clover in Dry Farming Belt, Once Started, Rarely Fails. L. W. Kephart. p. 567.

Velvet Beans of a Bush Variety Developed with Distinguishable Seed. W. J. Morse. p. 598.

Oats—

Oat Varieties that Resist Smut Grown by Experimentation. T. R. Stanton, F. A. Coffman, and V. T. Tapke. p. 481.

Sugar Beets—

Sugar-Beet Seed in New Mexico Grown by Rapid Method. John C. Overpeck. p. 562.

Sugar Beets With Only One Visible Seed would Reduce Costs Greatly. A. F. Woods. p. 563.

Sugar Cane—

Bagasse from Sugar Cane, Once Waste, Now is Valuable in Industry. Sydney F. Sherwood. p. 137.

Sugar Cane Requires Nitrogen as Chief Plant-food Element. Lewis A. Hurst. p. 563.

Sugar Cane Varieties for Sirup Production Now Being Tried Out. P. A. Yoder. p. 564.

Sugar Industry Saved in Louisiana by Using Disease Resistant Varieties of Cane. E. W. Brandes. p. 565.

Tobacco

Tobacco Growth Much Affected by Care and Condition of Seed Bed. Otto Olson. p. 580.

Wheat—

Winter-Wheat Seeding Date in Great Plains Varies with Locality. A. F. Swanson. p. 614.

ECONOMICS

Marketing—

Co-operative Associations Practice Pooling to Cut Costs and Spread Risks. Chris L. Christensen. p. 214.

Co-operative Handling of Grain on Large Scale is Now Making Headway. J. F. Booth and W. J. Kuhrt. p. 215.

Co-operative Marketing of California Eggs is Promoted by Grading. A. V. Swarthout. p. 217.

Co-operative Marketing Contracts Established on a Firm Legal Basis. L. S. Hulbert. p. 218.

Cotton Co-operatives Liberalize Contracts and Extend Services. J. S. Hathcock. p. 237.

Cotton-Fiber Research Points Way to Better Marketing Practices. Arthur W. Palmer. p. 235.

Cotton Quality Studies Show Opportunities to Adjust Staple Production. B. Youngblood. p. 240.

Cottonseed's Kernel Content and Components are Basis for Grading. G. S. Meloy. p. 241.

Crop Reports Lessen Price Swings; Assist Farmer to Plan Work. W. F. Callander. p. 242.

Crop-Yield Forecasts Demand Study of Many Complex Relationships. Joseph A. Becker. p. 245.

Co-operative Marketing of Dressed Turkeys as Means of Added Profit. D. H. Propps. p. 218.

Co-operative Marketing Hampered by Lapses into Former Practices. T. B. Manny. p. 220.

Co-operative Marketing Schools for Farmers Held in Three Commonwealths. A. W. McKav. p. 221.

Egg Standardization Facilitates Recognition of Quality in Prices. George H. Powers. p. 267.

Fire Risk in Country Grain Elevators Not Recognized Enough. Hylton R. Brown. p. 296.

Foreclosure Rate in Farm Realty Still Heavy in 1927-28. E. H. Wiecking. p. 309.

Freight-Rate Charges Under Hoch-Smith Law Help in Farm Relief. Thor Hultgren. p. 334.

Fruit and Vegetable Inspection at Shipping Points is Increasing. F. G. Robb. p. 336.

Fruits and Vegetables for Canning are Sold Increasingly by Grade. R. R. Pailthorp. p. 337.

Grubstake Stage and Settlers in Northern Lake States Measured. William A. Hartman. p. 350.

Hay Marketing Is Much Improved by Federal Inspection. K. B. Seeds. p. 354.

Hides and Skins to be Classified and Graded Under U. S. Standards. M. C. Romberger. p. 356.

Horses of United States Supply Foreign Demand for Edible Horse Meat. R. P. Steddom. p. 374.

Insurance Against Trifling Losses is Wasteful Generally. V. N. Valgren. p. 390.

Intentions-to-Plant Reports Aid Farmers to Plan Production. John B. Shepard. p. 391.

Investment of Farm Savings Not Diverse Enough Records Show. David L. Wickens. p. 392.

Livestock Co-operative Association Efficient Intensive Study Shows. Kelsey B. Gardner. p. 422.

Measuring Changes in Prices Paid and Prices Received by Farmers. C. M. Purves and C. F. Sarte. p. 444.

Milk Transportation in Tanks Coming Into Use Widely in U. S. R. O. Hotis. p. 446.

Meat Handling Needs to be Safeguarded by Constant Cleanliness. A. J. Pistor. p. 451.

Meat Labels Must Be Informative and Not False or Misleading. F. W. Meyst. p. 452.

Meat Market Reports Help Cattle Men to Suit Consumer Demand. B. F. McCarthy. p. 453.

Meat-Packing Plants Under Federal Control Use Pure Water Supply. Robert H. Kerr. p. 456.

Meats for Export are Required to Undergo Special Supervision. Wm. H. Smith, Jr. p. 458.

Milk Stations for Cooling Product Help Maintain Its Quality. C. E. Clement. p. 462.

Peat Deposits Under Some Conditions Are Serious Fire Hazard. Harry E. Roethe. p. 486.

Pecan Shelling Plants Increase with Demand for Cracked Kernels. C. A. Reed. p. 486.

Poultry (Dressed) Is Covered in Tentative Grades and Standards. Thomas W. Heitz. p. 496.

Poultry (Dressed) Now Included in Federal Inspection Service. Rob R. Slocum. p. 498.

Produce Clearing House Operation Necessitates Full Market Information. B. C. Boree. p. 506.

Tax Relief Sought Through Controlling Local Expenditures. Witney Coombs. p. 570.

Tea, Coffee Standards Save on Purchases by Government Agencies. G. F. Mitchell. p. 573.

Tobacco Co-operative's Failure Attributed to Numerous Difficulties. J. J. Scanlan. p. 578.

Windstorm Insurance on Farm Property is Highly Important. V. N. Valgren. p. 612.

World's Agriculture Much Changed by the War and Its Results. O. C. Stine. p. 632.

Agricultural Maps. O. E. Baker. p. 640.

ENGINEERING

Combine Harvester is Improved by Invention of New Attachments. W. M. Hurst. p. 208.

Combined Wheat May Be Cleaned for Safe Storage in Two Ways. R. H. Black. p. 210.

Dockage Removal at Thresher is Aided by Self-Cleaning Screen. R. H. Black. p. 259.

Fence Post Treatment Economizes Timber from Custer Forest. C. N. Whitney. p. 288.

Fence Posts Properly Treated Have Greatly Increased Durability. George M. Hunt. p. 290.

Grain Drying on Farm Awaits Development of Suitable Equipment. W. M. Hurst. p. 345.

Logging With Tractors Has Many Advantages Over Older Methods. Quincy Randles. p. 439.

Lumber Grades Suited for Various Kinds of Buildings on the Farm. C. V. Sweet. p. 439.

Machinery Plays a Vital Role in Making Agriculture Efficient. M. R. Cooper. p. 441.

Rice Dried on Farm by Use of Machinery Imported from Italy. E. N. Bates, R. M. Gehl and G. P. Bodner. p. 526.

Road-work on Farm Outlets Needs Skill and Right Equipment. R. E. Royall. p. 528.

Tobacco Barns for Flue Curing Best if Made Fireproof. E. G. Moss. p. 577.

Water Supply of Rural Communities Frequently Requires Purification. J. W. Sole. p. 603.

Farm Mechanics

Belt Failure Often Caused by Neglect or Faulty Installation. R. W. Frey and F. P. Veitch. p. 151.

Chimney Cleaning Without Sweep's Aid Requires Only Salt. T. A. H. Miller. p. 193.

Harness Life Can be Doubled or Trebled by Cleaning and Repairing. F. V. Veitch and R. W. Frey. p. 352.

Ice Chest for Small Family May be of Simple Construction. T. A. H. Miller. p. 378.

Irrigation Pipes of Concrete Economical Under Some Conditions. Samuel Fortier. p. 395.

Wood Checking and Weathering Can Be Prevented by Paint. Rolf Thelen. p. 623.

Wood for Different Uses Needs Different Degrees of Dryness. Rolf Thelen. p. 623.

Wood-Selection Rules Help but Should Not Be Followed Blindly. A. O. Benson. p. 626.

ENTOMOLOGY

Aphids' Life History Differs Greatly from that of Most Insects. P. W. Mason. p. 128.

Ants that Invade Houses are Easily Killed. E. A. Back and R. T. Cotton. p. 131.

Bedbugs are Quickly Exterminated by the Fumigation Method. E. A. Back and R. T. Cotton. p. 138.

Bee Breeding by Artificial Insemination Done Experimentally. Jas. I. Hambleton. p. 138.

Beekeeping Studies to be Made in South in Field Laboratory. Jas. I. Hambleton. p. 141.

Cicada Appearing at 17-Year and 13-Year Intervals is Not a Serious Pest. J. A. Hyslop. p. 196.

Cockroaches Can be Quickly Eradicated by Sodium Fluoride. E. A. Back and R. T. Cotton. p. 204.

Corn-Borer Control by Mechanical Means is Advanced a Stage. R. B. Gray. p. 222.

Corn-Borer Research Lays Foundation for Control of the Pest. W. R. Walton. p. 224.

Beeswax Goes Largely into Candles But Has Numerous Other Uses. Harold J. Clay. p. 142.

Blister-Rust Control in Western States is Aided by Nature. Stephen N. Wyckoff. p. 166.

Blister-Rust Control Proves Feasible in the Eastern States. J. F. Martin. p. 167.

Fleas Controlled by Creosote Oil Sprays and Other Insecticides. F. C. Bishopp. p. 297.

Fly Control Methods in Use at Beltsville Can Be Used on All Dairy Farms. R. P. Hotis. p. 300.

House-Fly Control is Best Accomplished by Preventing Breeding. F. C. Bishopp. p. 377.

Insect Control in National Parks is Many-Sided Problem. H. E. Burke. p. 382.

Insect Pest Survey Assembles Data from All Parts of Country. J. A. Hyslop. p. 385.

Insect Poison Called Rotenone Highly Toxic but Costly at Present. F. B. LaForge. p. 388.

Insecticide Research Develop a Promising Substitute for Nicotine. C. R. Smith. p. 388.

Insecticide Residues Removed from Fruit by Various Washes. R. C. Roark. p. 389.

Japanese Beetle in Narrow Range Meets Variety of Conditions. Henry Fox. p. 396.

Japanese Beetle is Controlled on Some Trees by Spraying. Loren B. Smith. p. 398.

Mexican Bean Beetle Continues Destructive Spread in Eastern U. S. Neale F. Howard. p. 460.

Narcissus Bulbs Attacked by Flies May Be Fumigated. Charles F. Doucette. p. 470.

Sugar Beet Leaf Hopper Studies Afford Basis for Damage Forecasts. Walter Carter. p. 559.

FARM MANAGEMENT

Appalachian Land Uses Affected by Aftermath of War. Millard Peck. p. 132.

Combining Enterprises Properly May Increase Income from the Farm. R. S. Kifer. p. 212.

Corn-Stover Shredding Pays if Supply of Hay and Straw is Short. George W. Collier. p. 231.

Cotton Progress in Irrigated Valleys a Community Problem. O. F. Cook. p. 238.

Dairy-Farm Labor Saves by Utilizing Latest Implements. T. E. Woodward. p. 251.

Dairy Experiments at Beltsville Find Corn and Alfalfa Most Profitable. T. E. Woodward. p. 252.

Dairy-Herd Improvement Associations Formed in All Leading Countries. Joseph B. Parker. p. 253.

Family Living Needs Studied in Relation to Income of Farms. Eugene Merritt. p. 280.

Family Living Supplied by Farm Recorded in Maryland Home Study. Chase G. Wodehouse. p. 283.

Farm Living Standards Widely Divergent on Good and on Poor U. S. Farms. C. J. Galpin. p. 284.

Grain Quality Affected by Time of Harvesting with Combine Machine. B. C. Rothgeb. p. 346.

Grubstake Stage of Settlers in Northern Lake States Measured. William A. Hartman. p. 349.

Investment of Farm Savings Not Diverse Enough, Records Show. David L. Wickens. p. 392.

Tenant Farming on Share Basis Usually Best for Beginners. Howard A. Turner. p. 574.

Wages of Farm Hands Augmented by Many Important Perquisites. J. C. Folsom. p. 600.

FORESTRY

Alaskan Forests to Supply Paper While Maintaining Growth. B. F. Heintzleman. p. 120.

Blister-Rust Control in Western States is Aided by Nature. Stephen N. Wyckoff. p. 166.

Douglas Fir Cut-Over Land's Fire Hazard is Minimized by Grazing. D. C. Ingram. p. 263.

Forest-Fire Fighting with a Power Pump is Found Effective. C. R. Tillotson. p. 311.

Forest-Fire Patrol by Airplane Greatly Helps Ground Force. Howard F. Flint. p. 312.

Forest-Fire Prevention is an Individual and Social Responsibility. Evan W. Kelley. p. 314.

Forest Fires Destroy Deer, Grouse, Bear, and Other Wild Life. R. H. Rutledge. p. 315.

Forest Fires Fought in Oregon by Settlers Aiding U. S. Foresters. John D. Guthrie. p. 317.

Forest Grazing Permits Largely Influenced by Proximity of Ranches. John H. Hatton. p. 320.

Forest Lands in Lake States to be Bought by U. S. Government. E. W. Tinker. p. 321.

Forest-Lecture Tour of Schools Conducted in Pacific Northwest. John D. Guthrie. p. 323.

Forest Litter Aids in Conserving Water for California Farms. W. C. Lowdermilk. p. 326.

Forest Planting on Huron Forest Both Efficient and Cheap. Fred R. Johnson. p. 328.

Forest Purchases by U. S. Help Solve Farm Problem in the East. W. W. Ashe. p. 329.

Forest Range Fencing is Proceeding Rapidly in Arizona and New Mexico. E. Q. Miller. p. 331.

Forest Tree Seedlings Kept from Damping-off by aluminum sulphate. Carl Hartley. p. 332.

Tree Crop May be Wind Sown at Distance from the Seed Trees. H. W. Siggins. p. 586.

Trees of Small Size Unprofitable to Cut for Making Lumber. W. W. Ashe. p. 587.

Tree Planting Goes Ahead in Nebraska with Federal Help. Fred R. Johnson. p. 590.

Tree Poisoning Tried for Clearing Land is Found Effective. George R. Boyd. p. 592.

Wilderness Areas in the National Forests are to be Preserved. E. W. Tinker. p. 610.

Woodland Thinning by Preserving Better Trees Often Profitable. Duncan Dunning. p. 624.

Wood of Native Trees Compared Regarding Resistance to Decay. George M. Hunt. p. 626.

Woods on the Farm Like a Savings Account If Rightly Handled. W. R. Mattoon. p. 628.

HOME ECONOMICS

Beef Should Be Bought and Cooked According to both Quality and Cut. H. K. Warner. p. 146.

Cake of Different Kinds Needs Flour of Different Kinds. J. A. LeClerc. p. 176.

Canning of Vegetables by New Steam Process Holds Flavors Better. Lawrence H. James. p. 180.

Children's Sun Suits Benefit Health and Promote Happy Play. Ruth O'Brien. p. 191.

Cotton Fabrics Again in Fashion's Favor for Women's Summer Wear. Ruth O'Brien. p. 233.

Diet of College Students Ample, Analysis Shows. Edith Hawley. p. 258.

Fabrics' Stiffness is Measurable by Device Made for the Purpose. Esther C. Peterson and Tobias Dantzig. p. 279.

Food Spoilage, which Causes Heavy Losses, Due to Many Causes. C. A. Brown. p. 305.

Honey Has Valuable Food Properties but is Low in Vitamins. Hazell E. Munsell. p. 369.

Insecticide Residues Removed from Fruit by Various Washes. R. C. Roark. p. 389.

Kapok and Like Fibers Used for Pillows, Life Preservers, Insulation. Lyster H. Dewey. p. 403.

Labels on Packages of Foodstuffs Mean Much to Alert Buyer. Katharine A. Smith. p. 405.

Meat Combines High Nutritive Value With Great Palatability. Paul E. Howe. p. 449.

Standard of Living May be Improved by Use of Family Budget. C. J. Galpin. p. 555.

Fruits Composition Given in Tables for Reckoning Nutrients. Charlotte Chatfield. p. 340.

Women on Farms Average 63 Hours Work Weekly in Survey of 700 Homes. Hildegarde Kneeland. p. 620.

HORTICULTURE

Avocado Industry is Rapidly Developing in Florida and California. T. Ralph Robinson. p. 135.

Blackberries of Four English Varieties are Introduced into U. S. George M. Darrow. p. 164.

Cemetery Neatness and Beauty are Enhanced by Parklike Arrangement. Furman Lloyd Mulford. p. 187.

Citrus Specialists Find New Methods of Propagation. Walter T. Swingle and T. Ralph Robinson. p. 201.

Coloring of Mature Fruit by Ethylene Gas Unobjectionable. E. M. Chace. p. 205.

Container Act Sets Standard Sizes for Hampers and Baskets. H. A. Spilman. p. 213.

Date Varieties at All Growth Stages Shown by Vegetative Characters. Silas C. Mason. p. 256.

Japanese Higan Cherries Gain in Favor for the Adornment of Parks. Paul Russell. p. 401.

Lawn Grass Aided, Weeds Checked by Ammonium Sulphate. B. E. Brown. p. 411.

Lawn Growing Required Good Seed, Fertilizer, and Persistent Work. Russel A. Oakley. p. 413.

Prune Bud Variations Have Varietal and Trade Significance. A. D. Shamel. p. 507.

Spray-Residue Removal by Mechanical Methods is Extensively Tested. Lon A. Hawkins. p. 553.

Floriculture—

Chrysanthemum Flowering Season Varies According to Daily Exposure to Light. H. A. Allard. p. 194.

Flowers May Disappoint Unless Effort Made to Check Fungous Disease. Freeman Weiss. p. 207.

Lily Breeding is Fertile Field for Plant Improvement. David Griffiths. p. 419.

Roses Developed for Dooryard are Still Far From Well Known. B. Y. Morrison. p. 532.

Tulip "Breaking" is Proved to be Caused by Mosaic Infection. M. B. McKay, Philip Brierley, T. P. Dykstra. p. 596.

ORNITHOLOGY

Bird Refuges Play Indispensable Part in Saving Wild Life. Ernest P. Walker. p. 159.

Birds Can be Attracted to Wood Lots by Various Measures and Practices. W. L. McAttee. p. 162.

PLANT PATHOLOGY

Airplane Dusting of Cotton Fields Proves Effective. Economical. B. R. Coad. p. 117.

Citrus Decay Less if Care Used by Grower, Dealer, and Consumer. H. R. Fulton. p. 200.

Forest Tree Seedlings Kept From Damping-Off by Aluminum Sulphate. Carl Hartley. p. 332.

Fruit Washes and Their Relation to Storage Diseases. D. F. Fisher. p. 338.

Gipsy-Moth and Brown-Tail Moth Campaign Status. A. F. Burgess. p. 342.

Molds Pressed Into Service in Utilizing Some Farm Products. H. T. Herrick and O. E. May. p. 464.

Mushroom Culture in the United States is a Growing Industry. E. B. Lambert. p. 468.

Peach Rots and How Temperature Affects Their Development. Charles Brooks. p. 485.

Quarantined Nursery Stock May Be Shipped if Infestation Removed. Walter E. Fleming. p. 512.

Rust Epidemics of Local Areas Betray Barberries Presence. L. D. Hutton. p. 535.

Seed-Borne Diseases of Cereals Succumb to Dust Fungicides. R. W. Leukel. p. 537.

Smut on Pacific Coast Wheat Can Profitably Be Removed by Washington. E. N. Bates and G. P. Bodnar. p. 542.

Sugar-Beet Disease Control Progressing toward Solution. G. H. Coons. p. 557.

Sugar-Beet Leaf Spot Controlled by Dusting from an Auto Truck. George H. Coons and Dewey Stewart. p. 560.

Tobacco Wildfire is Less Serious Menace than it Once Seemed. James Johnson. p. 581.

Tomato Blight Control Effected by Destroying Remains of the Crop. W. S. Porte and Fred J. Pritchard. p. 583.

Tomato Yellows Due to Virus that Causes Curly Top in Beets. Michael Shapovalov. p. 585.

Tulip "Breaking" is Proved to be Caused by Mosaic Infection. M. B. McKay, Philip Brierley, T. P. Dykstra. p. 596.

Watery Soft Rot Is Very Serious Market Disease of Vegetables. G. B. Ramsey. p. 605.

Yellows Resistant Cabbages Developed by Plant Breeding. J. C. Walker. p. 635.

ROADS—ROAD BUILDING

Highway Needs are Indicated by Taking Censuses of Traffic. H. S. Fairbank. p. 358.

RURAL ORGANIZATION

Chick-rearing Methods Often Greatly Improved by Extension Campaigns. H. L. Shroder. p. 191.

Extension Activities—

Co-operative Marketing Schools for Farmers Held in Three Commonwealths. A. W. McKay. p. 221.

Exhibits that Talk Prove an Effective Educational Device. H. T. Baldwin. p. 269.

Extension Agents Get Invaluable Help from Local Volunteer Leaders. F. A. Merrill. p. 276.

Extension Workers Need General and Vocational Training. E. H. Shinn. p. 276.

Family Living Needs Studied in Relation to Income of Farms. Eugene Merritt. p. 280.

Family Living Supplied by Farm Recorded in Maryland Home Study. Chase G. Wodehouse. p. 283.

Farm Living Standards Widely Divergent on Good and on Poor U. S. Farms. C. J. Galpin. p. 284.

Movie Audiences in Many Countries See Department's Films. Raymond Evans and H. B. McClure. p. 465.

Negro Extension Work Promoted by Local Organization Activity. J. B. Pierce. p. 474.

Publications for Farmers Distributed in Millions by Federal Government. M. C. Merrill. p. 508.

Radio Audiences Gets Housekeepers' Chats Five Days Each Week. Josephine F. Hemphill. p. 512.

Radio Service of the Department Expands Educational Programs. Morse Salisbury. p. 514.

Research in Every Field Important to Progress of Mankind. A. F. Woods. p. 525.

Women Market 4-H Brand Products in Increasing Volume. Oia Powell Malcolm. p. 614.

SOILS AND SOIL FERTILITY

Fertilizer Concentration Need Not Increase the Risk of Burning Plants. William H. Ross and Albert R. Merz. p. 291.

Fertilizer Consumption in Cotton Area Varies with Return from Crop. Lawrence Myers. p. 292.

Fertilizer Known as Double Superphosphate Has Useful Properties. K. D. Jacob. p. 294.

Forest Litter a Good Fertilizer on Farm as Well as Tree Crop. W. R. Mattoon. p. 325.

Lawn Grass Aided, Weeds Checked by Ammonium Sulphate. B. E. Brown. p. 411.

Nitrogen Loss from Soil by Leaching is Largely Preventable. F. E. Allison. p. 479.

Nitrogen Supply of United States Much Dependent on Imports. P. E. Howard. p. 480.

Organic Materials May Hurt Crop if Applied Undecayed. F. E. Allison. p. 482.

Pecans Respond to Commercial Fertilizer when Rightly Applied. J. J. Skinner. p. 488.

Potash Production in U. S. Increasing Though Still Far Below Needs. J. W. Turrentine. p. 493.

Soil Bacteria Useful to Farmers May Be Caused to Multiply. Lewis T. Leonard. p. 543.

Soil Deterioration by Sheet Erosion Lowers Fertility of Vast Area. Hugh H. Bennett. p. 544.

Soil Particles That Glitter Are Often Mistaken for Gold. W. H. Fry. p. 547.

Soil Survey in 25 Years Maps More than Half Our Arable Land. A. G. McCall. p. 548.

Sugar Cane Requires Nitrogen as Chief Plant-food Element. Lewis A. Hurst. p. 563.

Terracing to Control Erosion If Well Done is Paying Investment. Lewis A. Jones. p. 575.

Urea Demonstrated to be Valuable as Nitrogen Fertilizer. Edmund C. Shorey. p. 597.

WEATHER

Calendar Has Played Great Part in History and Success in Farming. C. F. Marvin. p. 177.

Hail-Occurrence Data for the United States Gathered and Analyzed. P. C. Day. p. 350.

Rainfall Distribution is Compared at Near-by Measurement Stations. Alfred J. Henry. p. 516.

Solar-Radiation Study Reveals Facts Highly Important to Farmers. Herbert H. Kimball. p. 549.

Weather Relationship to Yields Studied in Canada and Argentina. O. L. Dawson. p. 606.

DISTRICT CONFERENCES

The conferences of the agriculture teachers in the public schools of Minnesota called by Mr. Paul Calrow, State Supervisor of Agricultural Education, are called for the following dates and places: October 11-12, Bemidji; October 18-19, Austin; October 25-26, Montevideo.

These conferences are to begin Friday morning and close Saturday noon unless other arrangements are made after the conference opens. As time is a little shorter this year than usual, it is important that all teachers be present promptly at the opening and continue in attendance until the close.
