SIGMA XI PRESENTS "BEAUTY IN NATURE" SEMINAR

The UMD Scientific Research Society will hold a seminar at 7:30 pm on Wednesday, October 3, in 142 School of Medicine Building. Jon Pastor, Department of Biology/CWE-NRRI, and the first recipient of Chancellor's Research Award, will speak on "Beauty in Art, Mathematics, and Nature". Pastor explores the patterns in nature by doing field experiments and constructing mathematical models. He also draws and paints the landscapes and organisms that he studies. Over the years, he had noticed that some of the criteria used by scientists to judge the worth of a theory are more aesthetic in nature, rather than being strictly scientific. Occam's Razor is one such example. Many of the aesthetic criteria used by scientists are also the same criteria often used to judge the beauty of a work of art. In this lecture, Pastor will illustrate how the concept of beauty enters into his scientific research and into his paintings and drawings. A social hour will follow the presentation. For more information, please contact Dr. Arun Goyal, President-elect, UMD-SigmaXi at 726-7566 or e mail: agoyal@d.umn.edu.
