

Extension history

Early 4-H projects include seed corn contests

Growing seed corn and baking bread were the first statewide 4-H club projects. In 1904, T.A. Erickson, then Douglas County school superintendent, organized seed corn contests for local boys and girls clubs. The aim was to educate youth (and their parents) about raising better corn. Seeking wider involvement, Erickson organized Minnesota's first county school fair, at Nelson School in Alexandria. Project exhibits included corn, potatoes and poultry.

Erickson, who became Extension's first state 4-H leader, wrote 4-H's founding principles: to interest youngsters in county life, to teach kids and adults at the same time, and to help the schools "teach boys and girls how to do things worth while."?
