A Holmes & Doyle Bibliography
Volume 4, Periodical Articles, Primary References

INTRODUCTION

This bibliography is a work in progress. It attempts to update Ronald B. De Waal's comprehensive bibliography, *The Universal Sherlock Holmes*, but does not claim to be exhaustive in content. New works are continually discovered and added to this bibliography. Readers and researchers are invited to suggest additional content.

Volumes 3-6 in the supplement are assembled from the general periodical literature and from selected Sherlockian or Doylean periodicals; it now includes 8,879 citations. Those selected periodicals or newsletters include (at this point):

The Baker Street Journal
Baker Street Miscellanea
Baker Street West 1
The Beeman's Christmas Annual
The Camden House Journal
Canadian Holmes
The Friends of the Sherlock Holmes Collections Newsletter
The Holmes & Watson Report
The Illustrious Clients News
The Musgrave Papers
The Nezire Zanmai International
The Ritual
The Serpentine Muse
Sherlock
The Sherlock Holmes Gazette
The Sherlock Holmes Journal
Sherlock Holmes - The Detective Magazine
Shoso-In Bulletin
The Strand Magazine (Birmingham, MI)
Varieties of Ash

Coverage of these periodicals or newsletters begins around 1994, the final year covered by De Waal's bibliography, but may not yet be totally up-to-date (given the ongoing nature of this bibliography). It is hoped that other periodical titles will be added at a later date. Articles selected from the general periodical literature include items in which the keywords "Sherlock Holmes" or "Conan Doyle" were found within the body of the text or abstract of the article. Many of these articles contain passing references to either Holmes or Doyle, and may not be substantive in content. Nevertheless, they are included here for the "completist" who wishes to locate every known reference in the periodical literature to either the famous consulting detective or his literary agent.

- Volume 1 in this supplement focuses on monographic and serial titles, arranged alphabetically by author or main entry.
- Volume 2 presents the same information as in Vol. 1, but arranged by subject.

Volume 4, Periodical Articles, Primary References

- Volume 3 presents the periodical literature on Doyle and Holmes, listing individual articles alphabetically by author.
- Volume 4 includes "core" or "primary" citations, i.e. articles published in Sherlockian or Doylean periodicals, articles published elsewhere that are more substantive in nature, or that bear directly on Holmes, Doyle, or "playing the Game."
- Volume 5 includes "passing" or "secondary" references, i.e. those entries that are passing in nature or contain very brief information or content.
- Volume 6 presents the periodical literature arranged by subject categories (as originally devised for the De Waal bibliography and slightly modified here).
- Volume 7 lists audio/visual materials alphabetically by author/main entry.
- Volume 8 lists audio/visual material alphabetically by subject (De Waal category) heading.
- Volume 9 is a combined list, arranged alphabetically by author, of all formats (audio/visual, books, serials).
- Volume 10 is a combined list, arranged alphabetically by subject, of all formats.

For the listings below, articles without an author, i.e. anonymous, are listed first, followed by the author listing. The starting page number for each article is given, but not necessarily the following pages for that article.

The compiler wishes to thank Peter E. Blau, Don Hobbs, Leslie S. Klinger, and Fred Levin for their assistance in providing additional entries for this bibliography.

NOTE // ABSTRACT --- // The article reviews several books including The Beautiful Cigar Girl; Edgar Allan Poe, Mary Rogers, and the invention of murder. Stashower, Daniel. Dutton Books, 326 p. \$25.95 "Stashower (mystery writer and Edgar Award-winning biographer of Arthur Conan Doyle) tells the sensational real-life story of the 1841 murder of Mary Rogers, New York City's 'beautiful cigar girl'--along with the real-life story of how Edgar Allan Poe transformed the crime into the short story that would invent modern detective fiction and that he hoped would turn his failing career around. During the decline of his wife's health and particular personal hardship, Poe expanded his character C. Auguste Dupin's passion and talent for deductive reasoning to compose the longer-than-usual 'The Mystery of Mary Roget,' debuting the formula that would find its literary legacy in Sherlock Holmes and others."

NOTE // ABSTRACT --- // The author reports on a controversial auction of private papers of author Sir Arthur Conan Doyle at Christie's in London this week. The long unseen collection shows that Conan Doyle was not only one of the most popular writers of the 20th century--he has still outsold J.K. Rowling and J.R.R. Tolkien put together--but a public figure who took an active interest in politics and war, championed many private causes and gave GBP250,000 (millions in today's money) to further the interests of spiritualism. Befittingly, the auction has not been without controversy, not least thanks to the mysterious death of Richard Lancelyn Green, a former chairman of the Sherlock Holmes Society of London, who was found garrotted in his locked

bedroom in March. There was not enough evidence for the coroner to rule it was suicide, but enough for believers in the "Conan Doyle curse" to suspect foul play worthy of Holmes's attention. Lancelyn Green believed that some of the papers in the auction had rightfully been left to the British Library, and he told the Times newspaper that he had written to Christie's asking them not to go ahead with the sale, which Christie's denies. Would-be Conan Doyle biographers, as well as the British Library, have expressed disappointment that the material in the auction has now been dispersed.

"When two men are killed during the renovation of the royal palace at Holyrood in Scotland, Sherlock Holmes and Dr. Watson are summoned. Mycroft Holmes, the famous detective's brother, is a trusted advisor to Queen Victoria and wants to prevent a possible assassination attempt. Clues point to the involvement of David Rizzio, but the Italian secretary of Mary, Queen of Scots, was murdered at Holyrood 300 years earlier. Carr seems a natural to try his hand at a Holmes

adventure since the psychologist hero of *The Alienist*, his best-known novel, uses methods similar to those of the consulting detective. As with *The Alienist*, this book offers plenty of period detail and is written in a slightly stiff style, approximating that of Sir Arthur Conan Doyle. Carr's Sherlock seems a bit vague, with Watson and Mycroft being much more specific and interesting. Simon Prebble, one of the best readers of mysteries, employs a variety of voices and accents to heighten the Victorian verisimilitude. Recommended for all popular collections."

NOTE // ABSTRACT --- // "The writer discusses the connections between Sherlock Holmes's methods and mathematical problem solving. Holmes investigated deductively, reasoned mathematically, used many different strategies, liked to solve mathematics problems, and often used a type of indirect proof. Like Holmes, students need to make observations and then test to see if these observations lead toward a solution. They should consider a problem, but they should take a break if they cannot see a solution after some time; they should gather data and look for patterns; they should question obvious facts; they should learn from errors by taking the time to look for them and correct them; and they should use indirect proofs. The writer suggests that mathematics teachers need to promote imagination, observation, and curiosity in students."

NOTE // ABSTRACT --- // "Freud identified 'primal phantasies' (life in the womb, 'primal scene,' seduction, castration). It is argued that 'The Engineer's Thumb,' a short story from The Adventures of Sherlock Holmes, draws its uncanniness from the fact that it is underpinned by all the primal phantasies described by Freud. 'The Engineer's Thumb' therefore illustrates what analytical interpretation can contribute to the understanding of certain literary works.... In addition, in this short story, Conan Doyle, by setting up a 'talking cure,' anticipates the creation of psychoanalysis and highlights in a striking way certain aspects of what was to become psychoanalytical treatment."

Based on new archival research, it looks at the reasons for his institutionalisation and what befell him during his stay. It will consider Doyle's claim that he was wrongfully confined and also the suggestion that his family were responsible for having him committed. Finally, the paper will examine the nature of Doyle's condition and the creative work he produced whilst an asylum inmate."

One of the most respected men in England -- Sir Arthur Conan Doyle, the creator of Sherlock Holmes -- believed that the girls could literally see and photograph fairies that frolicked in their back yard.... The girls, Frances Griffiths and Elsie Wright stuck to their story until as late as the 1980s, when they finally admitted that four of the five famous photographs, at least, were fakes."

NOTE // ABSTRACT --- // Presents numerous brief reviews of audio recordings including *The Moor by Laurie R. King*. 8 cassettes, unabridged. 11 hrs. Recorded Bks. 1998. ISBN 0-7887-1979-3. \$72. "In this fourth Mary Russell novel, read by Jenny Sterlin, King takes us back to Dartmoor, scene of *The Hound of the Baskervilles*, again on the trail of a spectral hound. Shedockians have been amused or horrified by King's misappropriation of Holmes. Holmes, who had stated that love is 'an emotional thing...opposed to true cold reason' and 'I should never marry myself, lest I bias my judgment,' is in the King books married to an American half his age. Not satisfied with changing Holmes's misogynistic nature, King also robs him of his trusty biographer, Dr. Watson. Pastiche, in its truest sense, tries to resemble the style of the original work. Libraries wanting Sherlock Holmes mysteries would do better with any of the BBC series (*The Adventures of Sherlock Holmes, Audio Reviews*, LJ 2/15/97). Not recommended."

"...I asked him if he could pinpoint a time in his life when he knew that he wanted to be a writer. He said that when he was just 10 years old, he had to write a short story for a class assignment. The result was a tale about Sherlock Holmes. It was a grand success, receiving an A and flattering kudos from his parents. Interestingly, 30 prolific years later, Chabon's most recent book, *The Final Solution*, is a novella centered on the character of Holmes as an old man (though the author never actually names the famous detective)...."

Book by Book: Notes on Reading and Life. Holt. May 2006. c.192p. ISBN 0-8050-7877-0. pap. \$17. "Once we're finished reading all those books our teachers required us to read, where do we turn for counsel on reading and life? Pulitzer Prize-winning critic Dirda (An Open Book) affectionately offers up this bouquet of thoughts and quotations from novels, poems, and essays as a guide to discovering the meaning of our experiences. Dirda's thoughtful little meditations conduct us through all aspects of life from work, leisure, and love to art, spiritual matters, and death and grief. He imagines the ideal guest room library filled with "familiar, cozy, browsable, and soothing" books, ranging from the mysteries of Sir Arthur Conan Doyle and G.K. Chesterton to the humor of P.G. Wodehouse and James Thurber and the maxims of Franqois de La Rochefoucauld. In the section on love, Dirda provides a minicourse on the subject in the Western world, beginning with Sappho's poetry and coursing through Ovid and Horace, Tristan and Isolde, Dante's The Divine Comedy, Gustave Flaubert's Madame Bovary, Philip Roth's The Dying Animal, and Zadie Smith's On Beauty. Finally, Dirda sums up the value of a life lived book by book: "The beauty of words, the sound and fall of sentences, a writer's distinctive voice rising from the page--these, in the end, provide the greatest and most lasting pleasures of a reading life." A lovingly crafted volume, this is recommended for all libraries."

NOTE // ABSTRACT --- // Review of The Spoken Word: Writers. Historic Recordings of Writers Born in the 19th Century. Compiled by Steve Cleary, Richard Fairman, and Toby Oakes. London: British Library, 2003. CD-ROM. GBP9.95. ISBN 0-7123-0516-5. Includes a reference to Doyle and Holmes. "...To a modern American ear most of the voices in this collection share a cultured but bland upper-class English inflection. There are some vivid exceptions: Conan Doyle's slight Scottish burr, James Joyce's dense music, Agatha Christie's down-to-earth exposition, and Noel Coward's theatrical yet distinctive diction. Overall, though, this is not one of those spoken word collections that offer rich auditory pleasures. Still, the content is well chosen and nicely varied. Roughly half the writers read from (or, in Coward's case, perform) their own work. The others offer ideas about writing or other subjects that are, in general, succinct and enlightening. Bernard Shaw begins with an account of the touring companies that were his early bread and butter. Arthur Conan Doyle follows, first with the relatively well-known story of how a medical professor inspired Sherlock Holmes, then with reflections on how Holmes changed not only the mystery genre but also forensics...."

NOTE // ABSTRACT --- // "In 1919, Fayetteville, Arkansas, spiritualist Lessie Stringfellow Read and her adoptive mother, Alice Stringfellow, contacted Sir Arthur Conan Doyle in hopes of receiving assistance in publishing Leslie's Letters to His Mother, eventually published by the Fayetteville Democrat in 1926. Said to be a product of automatic writing, the book consisted of messages allegedly received between 1886 and 1912 from Alice's son, Leslie, who had died in 1886, and described the afterlife from his point of view as a new arrival. While Doyle is famous for his Sherlock Holmes mysteries, he had a keen interest in spiritualism throughout his career and, by 1919, had become England's foremost public advocate for it. Surviving correspondence indicates that he believed the document to be authentic and was impressed not only because it reflected ideas and images from other spiritualist writings, but because it described the afterlife in very specific terms."

Sherlock Holmes stopped at a door some little distance from the Carlton, and cautioning me not to speak, he led the way into the hall. Through the glass panelling I caught a glimpse of a large and luxurious room, in which a considerable number of men were sitting about and reading papers, each in his own little nook. Holmes showed me into a small chamber which looked out into Pall Mall, and then, leaving me for a minute, he came back with a companion whom I knew could only be his brother...."

NOTE // ABSTRACT --- // This essay states that novelist Raymond Chandler had borrowed some of his ideas for the novel 'The Big Sleep' from 'The Mystery of Cloomber,' a novella by Arthur Conan Doyle. Rats behind the wainscoting, one of the most famous images in Chandler's novel 'The Big Sleep' was taken from 'The Mystery of Cloomber.' 'The Big Sleep' is about the Sternwoods, a doomed family over whom death hovers ominously. What Chandler borrowed from Doyle's novella is the mood of inevitable doom that is beyond the characters' power to prevent or even understand.

The author notes the interest of Arthur Conan Doyle in the Cottingley fairy photographs, outlines his theories regarding them, and comments on the recent film *Fairy Tale: A True Story* by Charles Sturridge. She concludes by examining the place of electricity in the depiction of fairies and in art works by Marinetti, Picabia and Raoul Dufy."

NOTE // ABSTRACT --- // "Writing in the person of Dr. Watson, Donald Thomas carries on the great tradition of Sir Arthur Conan Doyle by presenting five new cases featuring the world's most famous consulting detective, Sherlock Holmes. Sherlockians will revel in the level of accurate detail from the original stories while those who are not as familiar with the early cases will not be disadvantaged thanks to the clarity of Thomas's writing. The title case features the plot to destroy Holmes in which his would-be assassins appear to have thought of everything but Holmes's vast array of intellectual resources. Watson's earlier account of Holmes's death at Reichenbach Falls was erroneous: that four additional stories follow is a clue to this one's ending. 'The Case of the Greek Key' presents an ingenious exercise in code-breaking involving the British Admiralty, German spies, and Kaiser Wilhelm. 'The Case of the Peasenhall Murder' contains a seemingly impossible series of events and conflicting stories to untangle. 'The Case of the Phantom Parlor Maid' takes Holmes into the supernatural realm until he can reason out the problem, and 'The Queen of the Night' is a compelling tale of jewel thieves, duplicity, and the preparations for the coronation of Edward VII. In each of these cases Holmes and Watson live again exactly as they had in the writings of Conan Doyle but into a future Thomas, as a masterful story-teller, articulates splendidly. One could not hope for a better re-creation of the Baker Street duo."

The photographs were taken in 1917 by two young girls, Elsie Wright and Frances Griffiths, and included an image of Frances behind an array of cut-out fairies in a glen. They came to public notice when published by the novelist Arthur Conan Doyle in the December 1920 issue of Strand magazine; Doyle had an abiding interest in the paranormal. The images were actually taken using a Midg box quarterplate magazine camera and a developing and contact printing kit."

NOTE // ABSTRACT --- // "The writer describes his involvement in a project to expose the 20th century's longest-running photography hoax--the Cottingley fairy photographs. He details how the five pictures of fairies were staged in 1917 and 1921 by two girls, Elsie Wright and Frances Griffiths, using cardboard figures. Recalling how he later became friends with the elderly Elsie, he explains how the girls were reluctant to expose the fraud for fear of showing up the famous men who became interested in the case, particularly Sir Arthur Conan Doyle, then an accomplished photographer. Noting the longevity of the hoax and of media interest in it, he describes how the hoax came to an end with confessions from the two women in the 1980s."

NOTE // ABSTRACT --- // "By 1920, the hoax of Conan Doyle's pictures of the Cottingley Fairies divided Britain into believers and skeptics. The pictures were taken by two girls who claimed that they had seen the fairies. In the baffling final picture, the Fairy Sunbath, the girls conveniently placed six fairy cutouts along a grassy bank. The girls' story defied disproval until 1983."

NOTE // ABSTRACT --- // "This article discusses the case of racism in the Sherlock Holmes story, The Yellow Face. The publication of a short story defending the marriage of a black man to a white woman would not be too unusual for the 1990s, but the widespread distribution of a similar story in the 1890s is a historical oddity. One hundred years ago, the Sherlock Holmes stories were some of the most popular and widely read in print. The Yellow Face brought before the reading public the volatile topic of just such an interracial couple, the prejudice they encountered, and the precarious fate of their mulatto child. Because of some improbable and illogical developments in the narrative, this case ranks among some of the poorer in the Sherlock Holmes cannon when viewed strictly as a detective story. But when examined as a vehicle for delivering a didactic message on racial attitudes that was half-a-century ahead of its time, The Yellow Face reveals itself to be shrewdly constructed. In the opinion of mystery writer John Dickson Carr, only an ardent Sherlockian can find high merit in The Yellow Face. The story certainly supports the view that a didactic intention may undermine artistry, at least when the tale is evaluated solely as a mystery."

NOTE // ABSTRACT --- // The article presents the author's reaction to having read the book "The Resident Patient," by Sir Arthur Conan Doyle, which centers on a doctor named Trevelyan who visits Sherlock Holmes and Watson to discuss a patient named Blessington. A discussion of the story's plot, which centers on the fact that Blessington is really a criminal named Sutton, is presented. The author's involvement in being a witness in a case where a man hanged another man and attempted to make the incident look like suicide is discussed.

The address 221B was not there in Baker Street, Marylebone during the years of the Sherlock Holmes stories. But Baker Street was extended and renumbering of the buildings was done in 1930. 221B became a real address and the popular Sherlock Holmes Museum was made there. The beautiful Regent's Park is the famous residential area of Marylebone. Medical services are offered in Wimpole and Harley streets.

Eureka. 2005. pap. \$11.95. ISBN 0-9746648-5-5. Gr 8 Up "Doyle's prose and poetry are brought to life in this exciting volume. It has some overlap from the first volume (Eureka, 2002), but also includes some truly outstanding new tales. In 'The Ghosts of Goresthorpe Grange,' a man believes that his house is occupied by spirits and seeks out the help of a medium. Ultimately, he is drugged and swindled, and the dreamlike style of the art reinforces this mood. In 'Two Great Brown-Pericord Motor,' two men create an invention and become fiercely jealous and protective of it, until disaster erupts. This volume also contains two Sherlock Holmes stories and thrilling tales of sea adventures. Though each one is illustrated by a different artist, the writing ties the collection together nicely. Unlike the earlier volume, this one utilizes a consistent comic format throughout. The artists have deftly captured the themes and moods of each piece in the black-and-white illustrations done in a wide range of styles and techniques. This assortment of tales may attract new readers to Doyle's work."

The author introduces the extract from Conan Doyle's *The History of Spiritualism*, published in 1927, and comments on the two possible types of spirit photography. Conan Doyle discusses William Crookes's photographs of an apparition summoned by the medium Florence Cook, offers an explanation of how spirit photography might be possible, and describes his own experiments with the photomedium William Hope.

Special passages from these works, gathered here in the form of long extracts, evoke the passion of the celebrated detective for cocaine and constitute rather generally an original sort of evidence on the emergence of drug addicts in Europe at the end of the 19th century.

Includes an entry with a reference to Holmes by a well-known member of the Sherlockian community. An Open Book: Coming of Age in the Heartland by Michael Dirda. Norton. \$24.95. ISBN 0-393-05756-9. "As Michael Dirda, senior editor of The Washington Post Book World and a distinguished literary critic, observes early on in this beautifully written memoir: 'To be an indiscriminate reader--as the luckiest young often are--means the right books are all around you.' Dirda's portrait of the writer as a young reader is an irresistible choice for librarians. Dirda began life as a chubby, nearsighted kid, growing up in the 1950s in the gritty factory town of Lorain, OH. An omnivorous reader, he gradually sharpened his literary taste (and enlarged his world) on an eclectic mix of books and comics that included Tarzan, Sherlock Holmes, the Green Lantern, the Count of Monte Cristo, and Raskolnikov. Dirda takes the reader along on his journey to Oberlin College (which he attended in the '60s on a scholarship), and concludes with an account of a romantic summer spent in Paris, at the impressionable age of 19. The future Pulitzer Prize winner for criticism seemed to emanate 'an invisible tractor beam for printed matter.' SLJ readers will relish Dirda's candid, sometimes bittersweet account of his early life with books and his assertion that 'childhood reading possesses an almost holy power.' Dirda's boyhood reading list--consisting of weighty titles he managed to read in high school--is not to be missed: it offers some stiff competition to the American Library Association's list of 'Outstanding Books for the College Bound.'"

"Lovers of the whodunit will be overjoyed to discover this new series. Set in Victorian England, the Baker Street Irregulars are nine homeless boys who often work for the illustrious detective Sherlock Holmes. Holmes employs the boys after a family of tightrope walkers fall to their deaths during a performance. Though the story's twist and turns are predictable, readers will enjoy the action. Fans of Sherlock Holmes will enjoy the many references to his other famous cases. Observant readers will find a message hidden throughout the text in bold letters. Pen and ink illustrations are scattered throughout the book."

Enola Holmes Mystery. 213p. Philomel/Sleuth, Feb. 2006. Tr \$10.99. ISBN 0-399-24304-6. Gr 4-8 "In what is hopefully the start of an exciting new series, Missing Marquess features the intriguing, much younger sister of Sherlock and Mycroft Holmes. Enola was a late-life baby, causing something of a scandal in society. Her rather vague mother is a 64-year-old widow who disappears on Enola's 14th birthday. It takes the girl a short time to realize that her mother left her some ciphers that indicate why she went away and how she is faring. The teen reluctantly enlists the services of her adult brothers, who quickly determine that Lady Holmes has been padding the household accounts for years. When they decide that their sister belongs at a boarding school, Enola escapes and heads for London dressed as a widow. There she is able to solve a mystery involving the disappearance of young Viscount Tewksbury. She decides to stay in the city, adopting a number of disguises, and become a 'Perditorian,' or finder of lost things or people. Springer focuses a great deal on the restrictions placed on Victorian females by Showing how unusual Enola's bravery and common sense are, even as she often struggles with conventional reactions. She wants her brothers' affection, or indeed anyone's, but knows that a socially accepted life will strictly limit her freedom and learning. Enola's loneliness, intelligence, sense of humor, and sheer pluck make her an extremely appealing heroine who hopefully will one day find the affection for which she so desperately longs."

NOTE // ABSTRACT --- // The article reviews the book "The Fall of the Amazing Zalindas," by Tracy Mack and Micheal Citrin. "When three tightrope walkers fall to their deaths, Sherlock Holmes must investigate. He is aided by a group of street children who help him as well as one another. These ragamuffins, led by the very capable Wiggins, go to the circus to seek out clues while Holmes and Watson pursue other leads. The case involves the theft of a priceless 17th-century book commissioned by Charles II and only meant to be seen by the ruling king or queen. Frail Ozzie turns out to be a vital new member of the Irregulars with a razor-sharp memory, and a gypsy girl from the circus proves helpful to solving the murders. Ozzie and Wiggins are memorable characters, and Holmes and Watson are extremely well defined. Black-and-white illustrations seem quite slapdash and do little to enhance the Victorian flavor of the book. Alex Simmons and Bill McKay's *The Raven League* (Sleuth, 2006), another story about Holmes and a gang of waifs, gives readers a more immediate impression of the realities of Victorian London with its many abused and homeless children, child labor, filth, and class differences."

1875. Groves, Derham. "Better Homes and Gardens: Sense of Place in the Sherlock Holmes Stories." *Journal of Popular Culture* 36, no. 3 (2003): 466.
NOTE // ABSTRACT --- // In Sir Arthur Conan Doyle's autobiography, "Memories and Adventures," the creator of Sherlock Holmes and Dr. Watson chose to sum up his life's work as a writer in architectural terms. Doyle's choice of metaphor in this description is not surprising given that his father, Charles Altamont Doyle, was an architect with the Scottish Office of Works. Little is known about Charles' architectural career, although he is credited with designing the fountain at Holyrood Palace in Edinburgh and one of the windows in Glasgow Cathedral. Some of Doyle's literary houses were undoubtedly inspired by real places, such as the "wooden outhouse" in "Black Peter" which Peter Carey, the disreputable retired captain of the steam-sealer, Sea Unicorn, "built himself... a few hundred yards from his house. The idea that a house can tell a story about its occupants was behind a design project called "Better Holmes and gardens" which have run both at the Royal Melbourne Institute of Technology (RMIT), and at the University of Melbourne. It involved architecture students early in the course each designing a house for the characters in a Sherlock Holmes story of his or her choice. For example, in 2001, the students could have chosen to design a house for the disfigured circus performer Euginia Ronder in "The Veiled Lodgers."

NOTE // ABSTRACT --- // "Although the popular television series CSI: Crime Scene Investigation presents cutting-edge images and laboratory techniques, it reiterates the reassuring ideological message and the glorification of the man of science that typify Doyle's Sherlock Holmes stories. While the Holmes stories use reassuring, formulaic narratives to consolidate a normative national identity and counter increasing disenchantment with empire, CSI replays a similar sort of procedural detective story to reassure viewers with the fantasy that the United States can be secured amidst threats of violence and terrorism, that individual identity, as well as national identity, can be fixed and scientifically assured." NOTE // ABSTRACT --- // The article discusses works of author Arthur Conan Doyle. It illustrates how author Henry Highland Garnet and Africa/Africans may have affected Doyle in his struggle with race politics, his continuing anxiety with the epistemology of Blackness. Doyle articulates constant struggle of the photographer and his tools with the object of the photographic gaze. The article emphasizes that the emergence of the science/detection method is in specific response to the anxieties uprooted by modernity. Twentieth-century critics reveal that racial anxieties or "whispers of Norbury" are still very much a menace, threatening to explode at the blink of an unseeing eye.

Various strategic acquisitions methodologies, such as donor relations, exhibitions, scholarly publications, and conference development are presented as part of the narrative. NOTE // ABSTRACT --- // "This article focuses on physicians Sir Arthur Conan Doyle, John Watson and William Sherlock Holmes. Arthur Conan Doyle was both a physician and a versatile author of historical novels, short stories, volumes of poems, plays, histories, science fiction, and publications on occult science. Holmes and Watson are 2 of the most immediately recognizable figures in popular culture. Their images have been adapted countless times for innumerable purposes. Biographical data concerning them can be drawn from the research efforts of Holmesian authorities. Arthur Conan Doyle, Sherlock Holmes, and John Watson were honored on a set of 4 stamps showing scenes from the adventures of Sherlock Holmes."

silhouetted image of a deerstalker hat and smoking pipe, one that secures his fame as a popular detective from the Victorian period to our own. Despite his aloof and sometimes prickly behaviour on the page, Holmes remains a favourite with a diverse group of audiences, instantly likeable to his contemporary readers. This article will connect the fond regard in which Holmes' character was held in the nineteenth century to the detective's relationship with dogs. Using Donna Haraway's recent theorization of dogs as 'companion species' in her manifesto on otherness, the article will suggest that the Victorians regarded Holmes' sleuthing fame as inseparable from his respect for animal otherness, one with which he is identified throughout Conan Doyle's stories. In this respect, I argue, Holmes is a hudographical detective, his crimesolving powers rooted in his relationship with and to dogs. [Abstract from author]

NOTE // ABSTRACT --- // Reviews the book 'The Mysterious Case of Sir Arthur Conan Doyle,' by Cynthia Adams. "Young aficionados of Sherlock Holmes will be interested in this biography of Arthur Conan Doyle, which begins with his early life as a poor boy growing up in Edinburgh, the eldest son in a large Roman Catholic family. Giving sufficient attention to the roots and development of Doyle's creative gifts as a writer and storyteller, Adams shows how Doyle created and developed the character of Sherlock Holmes while working as a medical doctor, why he killed him off at the height of Holmes' popularity, and how he brought this incredibly popular fictional detective back for an adoring public. She succeeds in making major contemporary events in which Doyle was involved, such as the Boer War, understandable to a young audience. Doyle's complexity as a writer and an individual are suggested in the narrative, but the shortness of the biography allows Adams time only for a straightforward, uncomplicated treatment of his life. If Doyle is studied in your curriculum, this book will get some use from Sherlock Holmes fans. Recommended."

"A former GP last night sparked a literary row after claiming to have unearthed proof that Sir Arthur Conan Doyle was schizophrenic. Doctor turned author Andrew Norman makes the claim in a new book, which uses Conan Doyle's medical records, family history and fictional works as evidence for his claim. Arthur Conan Doyle: Beyond Sherlock Holmes, a biography due out next month, alleges that the Edinburgh-born author inherited the mental condition from his father Charles...."

NOTE // ABSTRACT --- // Presents an essay on Sherlock Holmes and his many resurrections since his invention some 150 years ago. Contention that the book "Curious Incident of the Dog in The Night-Time," by Mark Haddon, not only gets its title from author Arthur Conan Doyle but also parallels the way that trusty Watson could notice facts without grasping their meaning; "The Hamilton Case," by Michelle de Kretser which also makes mention of Holmes; "Final Solution," by Michael Chabon where an elderly unnamed man (suggested to be Holmes) is brought out of retirement to solve a case; Criticism of "The New Annotated Sherlock Holmes edited by Leslie S. Klinger who is a confirmed Sherlockian; How the campiness of the stories remains a winning feature after all this time.

NOTE // ABSTRACT --- // Sherlock Holmes, one of the best-known and highly rated of all fictional detectives, appears to have been an avid, analytical chemist. His devotion to, together with the use of, the scientific method in his profession has a special appeal to scientists. Careful reading reveals that the detective referred to theory on 64 separate occasions and to hypothesis on 29 occasions. Abundant evidence exists to indicate that Holmes conducted studies in such varied fields as acetones, coal tar derivatives, barium compounds, blood testing, and gemstones. Holmes was probably an amateur chemist, rather than a real user of the science, and he never solved a case by chemical means. His knowledge of chemistry, his use of chemicals, and his entire lifestyle are the very factors that create the eccentricity that has kept the character of Sherlock Holmes alive for so long..

3454. Owen, Alex. "'Borderland forms': Arthur Conan Doyle, Albion's daughters, and the politics of the Cottingley fairies." *History workshop*, no. 38 (1994): 48-85.
NOTE // ABSTRACT --- // "Owen looks at incidents surrounding photographs taken in 1917 by two English girls from the Yorkshire village of Cottingley. In photos taken of each other, the girls are shown playing with fairies. These photos were championed as genuine by Conan Doyle who published them in the Strand magazine in Dec 1920. Owen argues that Cottingley was one of the last manifestations of a glorious Victorian and Edwardian fairy tradition, and a highly-publicized incident in a broader interwar engagement with mysticism and the occult. He explores these themes, paying particular attention to the historical context that gave the Cottingley fairies their validity, and the blurring of the boundaries between rationalism, fantasy and spirituality that facilitated belief in a 20th c. fairyland. He contends that the issues are intimately bound up with social questions. Cottingley affords a fleeting glimpse of the interior worlds of two early-20th-c. working-class girlhoods, and the way in which the fanciful realizations of childhood were appropriated and recast by a small group of middle-class men. Power relations are a crucial part of the untold story, and social and gender anxieties constitute one of its major underlying tensions."

NOTE // ABSTRACT --- // The article focuses on "The Perfect Medium: Photography and the Occult," an exhibition of spirit photography at the Metropolitan Museum of Art in New York City. Some of the works featured in the exhibit include pocket-sized gilded framed formal portraits and bigger and bolder images from the early decades of the 20th century. The event showed that photography can indeed serve as an ideal form for catching ghosts and spirits. Includes references to Doyle. "...Among the exhibition's photographs of this period were two from the famous Cottingley Fairies series, produced in 1925 by the 16-year-old Elsie Wright and her 10-year-old cousin Frances Griffiths, and vigorously supported by Sir Arthur Conan Doyle (who maintained a substantial collection of spirit photographs and once conducted a demonstration of a spirit-photo session at Carnegie Hall in which audience members were reported to have shouted out and swooned; these decorous, achingly sweet concoctions continued to compel belief (and pilgrimages to the wooded site of the fairies' supposed visit) until 1981, when Elsie died and Frances confessed to copying the winged sprites from an illustrated book. Such was Conan Doyle's power in the spirit photography movement that his death was almost immediately followed by his appearance in a host of occult photographs. Most bittersweet (though perhaps less touching than funny) is a 1931 portrait by William Hope of Conan Doyle's stolid-looking son Denis, literally haunted by his inescapable father....Also on view at Burgin, along with an assortment of purported spirit photographs and various publications pro and con, were playbills of 'Anti-Spiritualist Entertainments' from 1879, a booklet called 'Spirit Rapping Made Easy,' a catalogue for magician's props including 'materialized hands...fine for spiritualist seances' and a poster for an entertainment that reads 'Is Arthur Conan Doyle Right? Can the Dead Talk to the Living?' illustrated by an enormous ghostly arm reaching down to write on a magic slate while a pert Gibson girl looks on, agog...."

NOTE // ABSTRACT --- // Reviews several sound recordings including *Sherlock Holmes: A Study in Scarlet* by Sir Arthur Conan Doyle. 3 cassettes. unabridged. 41/2 hrs. Blackstone Audiobks. 1999. ISBN 0-7861-1604-8. \$23.95. "This is the first story Conan Doyle wrote about his famous detective, Sherlock Holmes. In this short novel, Dr. Watson is presented to Holmes as a potential Baker Street roommate. Holmes utters the immortal line, 'You have been in Afghanistan, I perceive,' and the adventures begin. *A Study in Scarlet* introduces and fleshes out the characters of Holmes and Watson, while initiating readers to the world's first consulting detective. Valuable to Sherlockians as the beginning of an ageless saga, this novel is also an interesting mystery. It allows Holmes a chance to outwit Scotland Yard, and readers get to see how he resolves the mysterious murder at Lauriston Gardens. Frederick Davidson gives a correctly British narration to this Baker Street adventure. Sure to be a hit with mystery readers; recommended for all public libraries."

NOTE // ABSTRACT --- // "The adventures of Sherlock Holmes, although primarily famous as stories of detection of crime, offer a considerable amount to interest the medical reader. There are many medical references in the stories, and the influence of Conan Doyle's medical background is clearly seen in the main characters. Aspects of the stories also reflect Conan Doyle's medical career, and also something of his attitude towards the profession. From Holmes's sayings and accounts of his methods, parallels can be drawn between Holmesian deduction and the diagnostic process. It is concluded, however, that deduction cannot be used as a direct paradigm since medical problems are rarely soluble through a process of logic alone."

"'Arthur and George' is two intertwined biographies, of English writer Arthur Conan Doyle and writer George Edalji, wrongly imprisoned for seven years on charges of livestock mutilation. Barnes' forensic writing deftly introduces to two men who inhabit different worlds in the same country. Arthur, while not cut out for greatness, has the opportunities to experience life through travel, education and war, while George is restricted to a quiet existence as the obedient son of a Midlands vicar."

The article considers Rhode Island's Sherlock Holmes societies and examines both specific references to Jews in the Holmes canon and evidence of Doyle's attitudes toward victims of persecution.

NOTE // ABSTRACT --- // "In 1894, Dr. Arthur Conan Doyle wrote 'The Third Generation,' a short story involving the transmission of congenital syphilis from generation to generation. Analysts of his writings have interpreted the pathogenetic mechanism involved in modern terms: infection of mother by father and then transplacental infection of the fetus. However, a review of the contemporary literature and the history of the concepts of congenital and 'hereditary' syphilis demonstrates that the late 19th-century understanding of the process involved a Lamarckian transmission of paternal infection, via the sperm at the moment of conception. It was undoubtedly this concept that Doyle learned in medical school in the late 1870s and that provided the background to his story."

NOTE // ABSTRACT --- // Argues that during the later years of empire, English popular literature took on the task of managing a repressed but corrosive guilt over imperial "loot," a constant battle against a feared "curse" of empire. One of the writers to step up to that challenge was Arthur Conan Doyle, whose phenomenally popular detective, Sherlock Holmes, not only provides near magical solutions to problems besetting the English, but also explains guilt in terms of foreign contamination. The author explores the view of the imperial relationship as a narcissistic one in which it is the dual sense of self--the alternation between grandiosity on one hand, and a terrified sense of guilt, loss, and vulnerability to destruction on the other--that is the hallmark of narcissistic disturbance. A further understanding of this disturbance may provide a tool with which to probe the psychology of the British imperial public and finally the role of Sherlock Holmes in managing imperial duality. If the dangers in the Sherlock Holmes stories described by the author reveal a narcissistic vulnerability, then this vulnerability is balanced by a study in grandiosity, the omniscient and omnipotent detective Sherlock Holmes.

NOTE // ABSTRACT --- // "Sherlock Holmes was intended by his creator, Arthur Conan Doyle, to be a 'scientific detective'. Conan Doyle criticized his predecessor Edgar Allan Poe for giving his creation -- Inspector Dupin -- only the 'illusion' of scientific method. Conan Doyle believed that he had succeeded where Poe had failed; thus, he has Watson remark that Holmes has 'brought detection as near an exact science as it will ever be brought into the world.' By examining Holmes' methods, it becomes clear that Conan Doyle modelled them on certain images of science that were popular in mid- to late-19th century Britain. Contrary to a common view, it is also evident that rather than being responsible for the invention of forensic science, the creation of Holmes was influenced by the early development of it." NOTE // ABSTRACT --- // Sir Arthur Conan Doyle incorporated an unidentified tropical disease as a murder weapon in the Sherlock Holmes story, "The Dying Detective," written in 1913. Documentary and circumstantial evidence suggests that the disease mentioned was melioidosis. The description of the newly identified disease occurred shortly before Doyle's death. Doyle's other works at the time reflect a consistent interest in tropical disease.

NOTE // ABSTRACT --- // Seeks to place Arthur Conan Doyle's A Study in Scarlet (1887) within the broader context of the notion that blood brotherhood transcended nation. According to this idea, in a process facilitated by the revolution in communications, Anglo-American racial "reunion" might lead to the foundation of an inter-imperial body politic. Doyle absorbed through fiction and other readings a deep interest in and knowledge of the United States. His writings also reflect his fear that the black races, the children of Britain's second empire, could strike back against and infect the mother country. His deep kinship with America was expressed in a "rhetorical imperative of racial unity"; this offered an antidote for the British, a means "to reclaim a white confederacy and re-stabilize their imperial position." These preoccupations are reflected in the text of A Study in Scarlet, in which the narrative is uncomfortably split between London and the American West. Though the cultural contexts are different, the character of Sherlock Holmes, the tracker of crime, has deep affinities with the pathfinders and pioneers of the American West.

NOTE // ABSTRACT --- // Current work on conceptual integration and literary texts often features detailed analysis of a single reading of a text in terms of the conceptual integration networks involved in constructing that interpretation. However, a single linguistic form can inspire manifold readings. This article takes a historical view of the conceptual blends involved in a range of different literary interpretations generated by different groups of readers of a single set of texts, the Sherlock Holmes detective stories by Arthur Conan Doyle. First, it examines the case of the numerous and diverse historical readers who took these fictional texts to be non-fiction, and how their conceptions mirror and diverge from the ways readers become immersed in texts they know to be fiction. This is followed by an analysis of the early 'Sherlockian' essays, criticism operating under the pretense of a historical Holmes and a historical Watson who recorded his adventures with varying accuracy. In the Sherlockian tradition, something very like the naïve believer stance independently emerges from this playful and parodic novel blend. The history of this stance among its practitioners is then shown to be an example of the routinization of a blend within a discourse community. These complex discourse blends turn out to have much the same capacity for entrenchment and semantic change as any grammatical construction. [Abstract from author]

NOTE // ABSTRACT --- // This article focuses on a fictitious character [sic], Sherlock Homes, with reference to the book "The New Annotated Sherlock Holmes," edited with a foreword and notes by Leslie S. Klinger. The book consists of two volumes and it is a collection of 56 short stories. The original edition of this book was edited by William S. Baring-Gould. In the original (1968) edition, Baring-Gould elected to go nap on his own personal and controversial concept of the chronology of the stories, Klinger decided to relegate all such data to a most useful Chronological Table at the end of Volume One. Something in the region of two thousand annotations are scattered broadcast throughout the book, lifting the curtain on the modes, manners and events of Victorian England, and ventilating, and where necessary explaining, Sherlockian theoretical constructs past and present.

NOTE // ABSTRACT --- // Posted date: September 7, 1998. "Many scholars mention the use of Freudian psychology in literary works, but very few scrutinize the interplay between the literary and the psychological texts involved. This paper explores how the mystery story can incorporate psychoanalysis into its essential components, such as the crime, the clues, and the detective. I set up a theoretical framework in which the key elements of the mystery story may appropriate psychoanalysis, and I generalize how psychoanalysis may influence the mystery story as a subgenre. Then I offer 2 case studies of Marnie and The Seven-Per-Cent Solution, which both use a large amount of psychoanalysis. I examine how these two works incorporate psychoanalysis and measure their formal qualities against my theoretical conjectures." [Abstract from author]
