THE UNIVERSITY OF MINNESOTA, TUESDAY, JANUARY 9, 1912.

FIVE CENTS THE COPY

ETHNIC CENSUS RESULTS PUBLISHED BY DR. JENKS

Over 40,000 Families in Minneapolis Investigated For Statistics.

Said to Be The First Work of Its Kind Ever Attempted.

Dr. A. E. Jenks of the department of sociology and anthropology has made public the results of the ethnic census that he has been compiling for the last two years with the aid of his classe, and made these results the subject of a paper which he read before the Association for the Advancement of Science at Washington during the holidays.

The report shows that seven-eighths of foreign born residents of Minneapolis marry pure bloods of their own nationality, less than one-eighth of the second generation follow their example and in the third generation practically none.

The Scandinavian people have the greatest tendency to amalgamate with other nationalities.

The least tendency to amalgamate is found among the English.

Germans show the greatest variety of combinations with other nationalities, 102 different kinds of amalgamation being found among them.

These conclusions, based on two and a half-years' work by students at the University of Minnesota, in a census of 40,000 Minneapolis families, the first work of the kind ever undertaken at any university, were announced last night by Professor Albert E. Jenks on his return from the convention of the Association for the Advancement of Science at Washington, D. C.

This tremendous labor was done by the students without remuneration and from the pure love of scientific research.

First Work of the Kind.

"This is the first work of the kind undertaken," said Dr. Jenks. "We have not finished compiling the facts found, but when the work is finished the averages will vary little from those now attained, which show the relative values quite well.

"If the same work were done for the whole nation, I believe the results in general would be the same.

"There is a mass of work yet to be done, a task for trained compilers. A thousand dollars would complete it, and we hope to find some one who is willing to give that much for the advancement of science."

Melting Pot Evidences.

The tendency of the Scandinavian people to amalgamate is shown by this census in the record of 8,729 foreign-born Swedes, 88 per cent of whom married pure Swedes. Of 1,080 pure-blood Swedes, American born, only 11 per cent married pure Swedes, and in the third generation only one-tenth of 1 per cent sought mates of the same nationality. The figures for the Norwegians were about the same. The students questioned, 718 Jewish families and found that they, like others, lost their tendency to marry only their own people after the third generation.

More children are found in families
(Continued on page 4.)

POUCHER TO TAKE FIGURES ON VALUE OF POST OFFICE

Thinks Students Would be Surprised To Know Amount Saved By System.

Minnesota Said To Be Pioneer In Developing Private Postal System.

Postmaster Jay Poucher has decided to make out some statistics in regard to the amount of mail which goes unstamped through the university postoffice, and expects that when the matter is set down in figures, an astonishing saving in postage will be disclosed benefiting both the students and the faculty.

Minnesota was one of the first universities of the country to use the system of a distributing post-office, and it is only in late years that many other institutions have followed suit. Mr. Poucher thinks it would surprise nearly every one in the University to know of the amount of mail which is delivered through his office.

Hard to Make Statistics.

"The matter of computing statistics," he said, "will be difficult, because to be at all fair, the work would have to be covered at least a month. I shall try it for a month, beginning today; as I think this time of year is about average for the amount of mail we deliver through this office which it stamped, would cost the university and the students a good deal of money.

"Some days we distribute as much as 3,000 or 4,000 letters and notes and so on. The official notices of the University, such as receipts and programs would be rather expensive if sent by the regular mail route. In most universities the regular postal offices are the only facilities available for written communication."

Registrar Pierce said that he had no definite information on the subject, but that he supposed the system saved the university enough in postage to pay the postmaster's salary.

Distributions are now made every hour. Arrangements have now been made so that a delivery will be made twice a day to the members of the faculty in their offices.

STATE KEEPS BREN'S BOND

Regents Unable To Get Papers From Auditor, Necessary To Collect The Money.

Another tangle in the Bren case developed yesterday when the secretary of state, turned down the request of John Lind, president of the board of regents, and declined to turn over the bonds of the former University cashier. Mr. Lind said that the company which bonded Bren for \$70,000 in two separate documents, had agreed to settle for approximately \$14,000.

Bren claims to have been robbed of \$13,800 on the campus last June, and recent examinations of the accounts have increased the alleged shortages about \$400.

Bren is now under indictment for defalcation to the amount of \$19,000. This sum covers the bundle of money found in the vault last June, amounting the nearly \$5,000. Bren is not given credit for this money.

CATALOGUE OF DELINQUENTS TO BE KEPT BY REGISTRAR

Monthly Reports From Every Instructor in University Required.

Lists of Reported Students to Be Kept Until After Graduation.

President Vincent issued a bulletin of instruction to all instructors in all departments of the university recently, which stated a few regulations for more uniform grades. Among other propositions included in the bulletin, was one which provides for the keeping of a card catalogue of all students who are reported as delinquent.

In the future every instructor will be asked to send in monthly reports to the registrar, giving a full list of students who are behind in their work. These reports will make the basis of a permanent list of delinquencies, and the record of every student thus reported will be kept until he graduates. It is thought that this system will make the work of the committee on students work simpler, and will provide a more systematic method of keeping records.

Uniformity in Grades.

The purpose of the President's bulletin is also to cause a greater uniformity in grades throughout the whole institution. An effort will be made to obtain more accurate knowledge of the work the students are doing, so that closer track may be kept of their individual standing. Several other rules with practically the same purpose were included in the bulletin.

It is planned to have the first of the monthly reports handed in sometime during January and the card catalogue will be begun immediately.

MAY CHANGE JOINT COURSES

Arts Faculty May Make Special Arrangements for Students of Law and Dentistry.

It is rumored that at the faculty meeting next Saturday, for the college of science, literature and the arts, the question of joint courses will be brought up for re-arrangement. There has been a demand for a new curriculum for those students who are taking combination courses and it is proposed to make special courses for their accommodation.

Since the university has been requiring one or two years in the arts college for graduation in the technical colleges, there have been some doubts expressed as to whether the first year or two of the present arts curriculum were not unsuitable for the joint courses.

It is now proposed to make changes in the courses of those who wish to take law and dentistry. If the students declare their intention of taking law as soon as they are permitted to, it is proposed to give them an opportunity to register for classes in economics and politics their first year, and to take more work in the line of social sciences, than is permitted under the present system.

FINAL BIG EIGHT CONCLAVE WILL BE HELD JANUARY 26

Gopher Committee on Athletics to Meet Soon to Instruct Delegates.

White Resolutions and Questions of Eligibility Will Be Finally Settled.

Final settlement of Minnesota's athletic policy, so far as it is governed by the western intercollegiate conference, will be made Jan. 26, when the faculty delegates from the members of the "Big Eight" Colleges will meet at the Palmer House in Chicago, in accordance with the recent call issued by President Johnston of the University of Indiana, who is head of the organization this year.

The faculty council committee on athletics is expected to meet within the next few days to decide what instructions shall be given Prof. James Paige, the Gopher representative. Several propositions, mostly regarding the various phases of the question of what shall constitute amateurism, are slated for a lengthy discussion at that time. It is extremely doubtful however, whether any radical action will be taken beyond instructing Mr. Paige as to what to ask for and to submit to the conference decision, whatever that conclusion may be.

Two Propositions.

The first proposition to come before the conference delegates is Prof. Paige's amendment to the White Resolution, passed in 1902 when Michigan was a member. The Gopher representative at the December meeting proposed that instead of a two-thirds vote being required to make effective legislation which has been passed by a majority but objected to by one or more members, only a simple majority shall be required at the second meeting. His resolution was passed by a six to two vote, Chicago and Wisconsin alone holding out. If the six repeat their vote at the next meeting the Paige rule will prevail, and hereafter only five instead of six affirmative votes will be necessary to enforce conference legislation.

The second proposition, amateur-

ism, the success of which will depend a great deal on the fate of Mr. Paige's amendment to the White Resolution, has assumed varied forms during the past few weeks. The Minnesota delegate has laid before the conference a proposal to base ball questions of eligibility in "Big Eight" athletics solely on scholarship, this of course including the one year residence rule. This is the rule for which it is expected Mr. Paige will fight at the January meeting. Prof. Goodenough, the Illinois representative, has recently sent out a proposal to have summer baseball legalized so far as the college game is concerned, which would be included in Mr. Paige's more far-reaching idea. Iowa is quoted as favoring summer baseball but not willing to go so far as to let down all the bars to professionalism on the part of college athletes.

Opposition Expected.

On the other hand, Directors Stagg of Chicago and Ehler of Wisconsin

CHANGING THE CURRICULUM.

It has been suggested that a re-
organization of the curriculum be
made where it concerns students who
are taking a combination course. That
is, in the case of students registering
for academic work and expecting to
change later to law, or medicine or
dentistry. When the additional ac-
ademic work was made a requirement
for a degree in the technical colleges,
very little special provisions was
made for those following this com-
bination course, which has given rise
to some dissatisfaction.

For university students to graduate
without any "cultural" education
makes it seem as though the standards
of the educational institutions were
lowering. But most everyone agrees
that culture should be practical. It
would be an undoubted improvement,
if courses in social sciences could be
introduced into the curriculum of the
professional colleges.

At the same time, the curriculum of
the academic college might bear in-
vestigation. There was a time not
long ago, when most stress was laid
on greek and latin in universities. The
tendency has been to introduce social
culture for just plain "culture," and it
seems that there might still be an op-
portunity for improvement. It looks
as though Minnesota, under the pres-
ent administration, would take a pro-
gressive stand in educational practice.

DEAN MAY GET OFFER

Educators in Oklahoma Consider
Minnesota Man for University
President.

Dr. George F. James, dean of the
college of education, has been tenta-
tively offered the presidency of the
University of Oklahoma, according to
the prevailing belief on the Minnesota
campus. Some time, probably several
weeks, will elapse before Dr. James
decides on what course to pursue.

The dean returned Saturday from
Oklahoma and, although refusing to
explain just how far negotiations had
progressed, made it perfectly plain
that the regents of the southern in-
stitution have not technically proffered
him the presidency. The usual
custom, however, is for the man
sought to indicate his willingness to
accept the position before it is offered
formally. That Dean James is not
willing to state his position is regard-
ed as evidence that he is considering
the Oklahoma proposition.

Dr. James visited the Oklahoma
University as a guest of the board
of regents. He was given splendid
treatment while there and, it is be-
lieved, found favor with all of the
regents.

DEAN TAKES EASTERN TRIP.

Inspects Engineering Laboratories
During Holiday Visits.

Dean Shenehon of the College of
Engineering left Friday night for the
East where he will attend the meet-
ing of the American Society of Civil
Engineers of which he is a member.

The Dean spent Saturday in Chi-
cago, going from there to Detroit
and Niagara Falls. He will go to
Washington and Philadelphia where
he will inspect the laboratories of the
Pennsylvania State University. After
spending some time in Baltimore,
Dean Shenehon will go to New York
to attend the meeting of the Ameri-
can Society of Civil Engineers to be
held there Jan. 17 and 18. Dean She-
nehon is expected to return two weeks
from today.

Alumni Discuss Athletics.

The regular monthly meeting of
the Board of Directors of the Gen-
eral Alumni Association will be held
in room 310 Folwell Hall, at 8 o'clock
on Tuesday evening, January 16th.
The Board will make the question of
athletics a special order of business
and any alumnus who cares to be
heard upon any question connected
with this subject will be welcome
and will be given a hearing.

are utterly opposed to "lowering standard," as they term meeting proposition in the manner suggested by the Gopher delegate. Purdue, also, will undoubtedly follow the example which Chicago is expected to set. Contrary to the usual custom, the January meeting has been called for a Friday morning instead of a Saturday forenoon. This course was followed in anticipation of a long session, probably lasting two days. More or less heat is sure to be generated by the friction arising from conflicting ideas, and is the desire of President Johnston to allow the delegates as well as their ideas, to the situation ample time to compose their features, before returning to their respective colleges.

Wisconsin.—Eight hundred nine-inch stockings filled with toys and candy were given away to students who attended the Union Mixer. Local cartoons adapted to the songs, "Ocean a Roll," "Beautiful Doll," and "Way Down Yonder in the Corn Field," were shown on a curtain.

PROGRAMS OUT TODAY

Registration Begins January 23.—
About 200 New Students Expected.

Programs for the second semester have been put in all the post-office boxes and will be ready this morning. The formal registration slips will be distributed about Saturday, so that the students may get ready for the second semester. A penalty will be provided for all who register later than Jan. 23, and the fees must be paid within the following week.

Registrar Pierce said yesterday that he expected in the neighborhood of 200 new students for the second semester. Under the present ruling, no student will be admitted in the middle of the year who has not some advanced college standing. This admits only those who have already received credit at the university, or those who come from other colleges. The registrar is preparing a booklet for the new students, containing information like that in a similar booklet issued last fall. A meeting of all new students will be called Feb. 7.

We clean everything except reputations.

We call at your room if you call Main or Center 880 or address University Box 2173.

TRACK CHAMPIONS MAY PLAY WITH MINNESOTA

It Is Said That Arrangements Have Been Made For Meet With Missouri.

Dates Not Decided Upon But Will Probably Be Held On Northrop Field.

A dual track meet between the Universities of Minnesota and Missouri the coming spring is regarded as a certainty, following a conference yesterday between Athletic Director Jones of the Southern institution and Minnesota athletic authorities. Mr. Jones, who is also track coach and coached the team which won the conference meet at Minneapolis last spring, was in the city yesterday and negotiations have been all but completed for a dual meet as a result of his visit.

The question of dates is the only thing in the way at present but it is believed that this matter can be settled without trouble. If the meet is arranged it will be held either late in April or late in May and at Northrop field in all probability.

The Missouri track team was the surprise of the conference meet last spring. With a small number of men the Southerners grabbed first place by a good majority, defeating the strong team from Illinois and Chicago and springing an unexpected victory.

Since their victory at that time the Missourians have come into great prominence, and it is believed that a dual meet between the Southerners and the Minnesota team will prove one of the most interesting attractions possible for Minnesota to secure.

BOARD MAY HOLD "M's."

Northwestern Road Wants \$78 For Goods Stolen by Men.

At the last meeting in December, the Athletic Board of Control received

a bill from the Northwestern road for seventy-eight dollars covering various things that were taken in the football special train at the time of the Wisconsin game. After considering the matter the Board of Control voted to withhold the awarding the usual football "M's" until this material had been returned or until it had been paid for by those who took it. This is likely to bring a settlement of the account in the very near future.

BUILDING CHANGES MADE.

Several Better Accommodations Effected During Vacation.

Considerable remodeling has been carried out in several buildings on the campus during vacation. One of the lecture rooms in the law building has been divided up into three office rooms. Some decorating has been also carried out in this building. The south end of the museum in Pillsbury Hall has been walled off and three new offices made there also. The room previously occupied by these offices has been remodeled in a library room to accommodate the new volumes which have been recently given to the department.

Several of the rooms in the Medical and Pathology building have been redecorated. The toilet rooms on the south side of the main floor of the library building have been moved back next to the chapel stairs and the whole remaining part of the south side of the building on this floor given over to comptrollers offices.

(Continue from page 1.)

of pure-bloods than in combinations in all nationalities except the Welsh. The Welsh thrive best when combined with the Irish, leading all other combinations in the number of offspring, while the Irish mixture with some other is generally the most prolific. The Scandinavian mixture with another nationality is the least prolific.

HIPPODROME LEASE ILLEGAL

Opinion of Attorney General May Give University Use of Building As Drill Hall.

The hippodrome building at the state fair grounds again appears as a farm school drill hall possibility by virtue of the decision of the attorney general who holds its present lease as being illegal.

It is possible that the fair board may submit some proposition on the building to the regents at their meeting tomorrow.

The hippodrome building is in use now as a skating rink operated by a private firm.

The faculty at Wisconsin has organized bowling teams.
