

## **Applied Psychological Measurement**

### **Volume 12, 1988**

David V. Budescu. On the Feasibility of Multiple Matching Tests—Variations on a Theme by Gulliksen, 5-14.

Richard C. Bell, Philippa E. Pattison, and Graeme P. Withers. Conditional Independence in a Clustered Item Test, 15-26.

Roger E. Millsap. Tolerance Intervals: Alternatives to Credibility Intervals in Validity Generalization Research, 27-32.

David Andrich. The Application of an Unfolding Model of the PIRT Type to the Measurement of Attitude, 33-51.

C. David Vale and Kathleen A. Gialluca. Evaluation of the Efficiency of Item Calibration, 53-67.

Gary Skaggs and Robert W. Lissitz. Effect of Examinee Ability on Test Equating Invariance, 69-82.

Norman Cliff, Linda M. Collins, Judith Zatzkin, Dannie Gallipeau, and Douglas J. McCormick. An Ordinal Scaling Method for Questionnaire and Other Ordinal Data, 83-97.

Dato N. M. de Gruijter. Standard Errors of Item Parameter Estimates in Incomplete Designs, 109-116.

Terry A. Ackerman and Philip L. Smith. A Comparison of the Information Provided by Essay, Multiple-Choice, and Free-Response Writing Tests, 117-128.

Carol A. Nickerson and Gary H. McClelland. Extended Axiomatic Conjoint Measurement: A Solution to a Methodological Problem in Studying Fertility-Related Behaviors, 129-153.

John Hattie and Colin Fraser. The Constraining of Parameters in Restricted Factor Analysis, 155-162.

Charles E. Lance. Residual Centering, Exploratory and Confirmatory Moderator Analysis, and Decomposition of Effects in Path Models Containing Interactions, 163-175.

Jeffrey Lee Rasmussen. Evaluation of Small-Sample Statistics That Test Whether Variables Measure the Same Trait, 177-187.

Frank B. Baker, Alan S. Cohen, and B. Ross Barmish. Item Characteristics of Tests Constructed by Linear Programming, 189-199.

Wim J. van der Linden and Ellen Boekkooi-Timminga. A Zero-One Programming Approach to Guiliksen's Matched Random Subtests Method, 201-209.

Linda M. Collins, Norman Cliff, and Clyde W. Dent. The Longitudinal Guttman Simplex: A New Methodology for Measurement of Dynamic Constructs in Longitudinal Panel Studies, 217-230.

Eugene Kennedy. Estimation of the Squared Cross-Validity Coefficient in the Context of Best Subset Regression, 231-237.

Walter D. Way, Timothy N. Ansley, and Robert A. Forsyth. The Comparative Effects of Compensatory and Noncompensatory Two-Dimensional Data on Unidimensional IRT Estimates, 239-252.

Gregory L. Candell and Fritz Drasgow. An Iterative Procedure for Linking Metrics and Assessing Item Bias in Item Response Theory, 253-260.

R. Darrell Bock, Robert Gibbons, and Eiji Muraki. Full-Information Item Factor Analysis, 261-280.

Robert J. Mislevy. Exploiting Auxiliary Information About Items in the Estimation of Rasch Item Difficulty Parameters, 281-296.

Paul G. W. Jansen, Arnold L. van den Wollenberg, and Folkert W. Wierda. Correcting Unconditional Parameter Estimates in the Rasch Model for Inconsistency, 297-306.

Arnold L. van den Wollenberg, Folkert W. Wierda, and Paul G. W. Jansen. Consistency of Rasch Model Parameter Estimation: A Simulation Study, 307-313.

Benjamin Wright. The Efficacy of Unconditional Maximum Likelihood Bias Correction: Comment on Jansen, van den Wollenberg, and Wierda, 315-318.

John S. Uebersax. PANEL: Latent Class Modeling of Interrater Agreement, 321.

Marion S. Aftanas. Theories, Models, and Standard Systems of Measurement, 325-338.

Mark L. Davison and Niyada Srichantra. Acquiescence in Components Analysis and Multidimensional Scaling of Self-Rating Items, 339-351.

Mark Wilson. Detecting and Interpreting Local Item Dependence Using a Family of Rasch Models, 353-364.

Gary J. Lautenschlager and Dong-Gun Park. IRT Item Bias Detection Procedures: Issues of Model Misspecification, Robustness, and Parameter Linking, 365-376.

Isaac I. Bejar. An Approach to Assessing Unidimensionality Revisited, 377-379.

Michelle Liou. Unidimensionality Versus Statistical Accuracy: A Note on Bejar's Method for Detecting Dimensionality of Achievement Tests, 381-386.

Frank B. Baker. The Item Log-Likelihood Surface for Two- and Three-Parameter Item Characteristic Curve Models, 387-395.

Jürgen Rost. Measuring Attitudes With a Threshold Model Drawing on a Traditional Scaling Concept, 397-409.

Donald R. Lehmann. An Alternative Procedure for Assessing Convergent and Discriminant Validity, 411-423.

Jacob Cohen. Set Correlation and Contingency Tables, 425-434.
