However, photographs may be taken from the orchestra pit. *Do not block the ramp or the aisles.* The graduates need to proceed down the ramp and back to their seats in a timely manner. Thank you.

### **DEGREES AND HONORS**

Degrees in the Institute of Technology are awarded with two types of honors. Degrees with distinction and high distinction are awarded automatically to students with grade point averages exceeding 3.75 and 3.90, respectively. The *cum laude*, *magna cum laude*, and *summa cum laude* degrees are awarded upon application to students who meet certain grade point average requirements and complete special work within the major. Students receiving the Latin honors degrees have completed a senior thesis.

### KENNETH H. KELLER

Kenneth H. Keller is The Charles M. Denny, Jr. Professor of Science, Technology and Public Policy in the University of Minnesota Hubert H. Humphrey Institute of Public Affairs and holds a joint appointment in the Institute of Technology as a professor of chemical engineering and materials science.

Educated at Columbia University and Johns Hopkins University, Keller spent most of his career at Minnesota where he joined the chemical engineering and materials science faculty in 1964, became vice president for academic affairs in 1980, and served as president of the University from 1985 to 1988. From 1990 to 1996 he was a senior fellow for science and technology at the Council on Foreign Relations in New York and for two of those years was senior vice president for programs. He presently chairs the Medical Technology Leadership Forum and the National Research Council's Board for the Technical Assessment of the National Institute of Standards and Technology. He is also a member of the NRC's Board on Life Sciences.

His scientific research over some 20 years focused on fluid mechanics and mass transfer in biological systems, with particular emphasis on blood-flow phenomena. For that work he received the American Institute of Chemical Engineers' Food, Pharmaceutical and Bioengineering Division Award. Currently his research interests include the impact of science and technology on international politics and economics, the policy issues raised by high-technology medicine, and the role of American institutions of higher education in research and development.

In 1987 Keller was named Twin Citian of the Year, and in 1996 he received a Distinguished Alumnus Award from Johns Hopkins University. He is a fellow of the American Association for the Advancement of Science and a member of the National Academy of Engineering. He has also been named a national associate of the National Academies for his contributions to their public policy work.

# A Message from the IT Alumni Society

---

Congratulations on your wonderful accomplishment! Your hard work and tenacity has paid off, and I applaud you on a job well done.

On behalf of the University of Minnesota Alumni Association (UMAA), I am pleased to offer you one of the first benefits of earning your degree: a complimentary one-year membership in the IT Alumni Society (ITAS).

That membership makes you part of a community of over 50,000 UMAA members. ITAS, which is affiliated with the UMAA, has nearly 7,000 members worldwide and is recognized as one of the most successful alumni societies. ITAS offers you enrichment and growth opportunities while connecting you to your alma mater in meaningful ways.

You'll receive a membership card in the mail shortly, along with a new alumnus welcome package. For more information on the benefits of your ITAS membership, visit [www.it.umn.edu/alumni](http://www.it.umn.edu/alumni) or contact us at [itas@it.umn.edu](mailto:itas@it.umn.edu). We are here to serve you.

I wish you all the best as you take the next steps toward your professional and personal goals.

Again, congratulations and welcome!
